WHAT IS THIS PRODUCT?

Type: Undertakings for Collective Investment in Transferable Securities (UCITS) Sub-Fund of the Variable Capital Investment Company - Société d'Investissement à Capital Variable (SICAV) SEXTANT

Maturity: The lifetime of this product is 99 years. AMIRAL GESTION has the right to dissolve the sub-fund in accordance with the Fund's Articles of Association. The sub-fund may also be dissolved in the event of a merger, a total redemption of units or if the sub-fund's net assets fall below the regulatory minimum.

Classification: None

Objectives: SEXTANT GRAND LARGE is a subfund aiming at capital growth over the recommended investment period via exposure to equity and fixed-income markets, with the objective of obtaining, over the same investment period, a performance greater than 5% net of management fees.

The strategy to achieve the investment objective of the SEXTANT GRAND LARGE subfund is based on three performance drivers:
- A highly disciplined stock picking approach, after a fundamental multiple-criterion analysis specific to the investment management firm. The subfund can be invested in and exposed to equities listed on all financial markets throughout the world, irrespective of their market capitalisation or sector. Investment management is generally focused on European equity markets. However, strategies are directed towards the equities of companies headquartered in the OECD. The Subfund may nonetheless invest, in an amount of up to 20% of its net assets, in the equities of companies headquartered outside the OECD. Within this framework, exposure to equity markets may range from 0 to 100%. Shares listed on the unregulated "Marché Libre" may represent up to 10% of the subfund's assets.
- A selection of debt securities, money market instruments and fixed-income securities, irrespective of currency and creditworthiness, for up to 100% of the subfund's net assets. It being specified that the investments in speculative bonds considered "high-yield" shall remain below 50% of net assets.
Transactions involving derivatives (purchase or sale of call options or put options on equities, indices, interest rates or currencies, volatility, and purchase or sale of forward financial instruments (forward exchange, futures or swaps on equities, indices, interest rates or currencies, volatility) and securities incorporating derivatives will be carried out with the aim of exposing or hedging the sub-fund against favorable or unfavorable trends in equities, indices, interest rates and currencies. The subfund manager may aswell intervene on the credit default swaps (CDS). Exposure to derivatives and embedded derivatives is limited to 40% of net assets, with the exception of volatility exposure through futures and options, which is limited to 10% of net assets. The UCITS may therefore be exposed to 140% of its net assets. Finally, the subfund may invest up to 10% of its assets in securities of other French and/or European coordinated UCITS, in particular to invest cash holdings.

Benchmark Information: The UCI is actively managed. The management strategy is unconstrained by the securities making up the benchmark index.

Allocation of distributable income:
- **Allocation of net income** : Accumulation
- **Allocation of net realised capital gains** : Accumulation

Right of redemption: Orders are executed as indicated in the table below

D business day	Day on which NAV is set (d)	D+1 business day	D+2 business days
Daily reception and Daily centralisation before 11:00 (Paris time) of redemption orders	Order executed by the latest on d	Publication of the net asset value	Settlement of redemptions

Targeted retail investors: All subscribers. However, due to the significant risk associated with an investment in equity products, this compartment is primarily intended for investors willing to withstand the substantial fluctuations inherent in equity markets and having a minimum investment horizon of five years. For more information, please refer to the section of the prospectus titled 'Subscribers concerned'. The UCITS may serve as a unit-linked support for life insurance contracts. The UCI may be used as a unit of account in life insurance contracts.

Name of custodian: CACEIS BANK

Place and procedures for obtaining information on the UCITS (prospectus/annual report/half-yearly report): The prospectus of the UCITS and the latest annual and interim reports will be sent free of charge in French within one week simply upon a written request made by the holder to AMIRAL GESTION.

WHAT ARE THE RISKS AND WHAT'S IN IT FOR ME?

Risk indicator:

1	**2**	3	4	5	6	7

− ← → +

Lowest risk — Highest risk

Recommended holding period: 5 years

The risk indicator assumes that you will continue to hold the product 5 years. The actual risk could be very different if you opt to exit prior to the end of the recommended holding period, and you may recover less of your initial investment.

The synthetic risk-reward indicator measures this product's level of risk compared to other products. It indicates the likelihood that this product will suffer losses in the event of market shifts or our inability to pay you. We have classified this product on the 2 out of 7, which is the a low risk class. In other words, potential losses arising from this product's future results are at level low and if the market situation was to worsen, it is very unlikely our ability to pay you could be affected.

This product provides no protection from market uncertainties. It is therefore possible that you could lose all or part of your investment.

If we are unable to pay you the amounts we owe you, you could lose your entire investment.

For more information on these risks, please refer to the prospectus. Other important risk factors not included in the indicator: Credit risk; Liquidity risk; Risk of impact of the use of financial techniques related to futures instruments

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you get from this product depends on future market performance. Future market developments are uncertain and cannot be accurately predicted.

The unfavourable, intermediate and favourable scenarios presented represent examples using best and worst case performance, as well as the average performance of the product over the past 10 years. The stress scenario shows what you could achieve in extreme market situations. The scenarios presented represent examples based on past performance and certain assumptions. Markets could evolve very differently in the future.

Recommended holding period: 5 years **Investment example: 10,000 €**			
Scénarios		**If you exit after 1 year**	**If you exit after 5 years**
Minimum	There is no minimum guaranteed return. You may lose all or part of your investment.		
Pressure	What you could get after deducting costs	7,403€	7,691 €
	Average annual return	-25.97%	-5.12%
Unfavourable	What you could get after deducting costs	8,544€	9,232 €
	Average annual return	-14.56%	-1.58%
Intermediary	What you could get after deducting costs	10,193€	10,706 €
	Average annual return	1.93%	1.37%
Favourable	What you could get after deducting costs	12,204€	12,830 €
	Average annual return	22.04%	5.11%

A market distress scenario shows what you may obtain in extreme market situations.

Unfavourable scenario: This type of scenario has occurred for an investment between 31/10/2017 - 31/10/2022

Intermediate scenario: This type of scenario has occurred for an investment between 30/04/2019 - 30/04/2024

Favourable scenario: This type of scenario has occurred for an investment between 18/03/2020 - 18/03/2025

WHAT HAPPENS IF AMIRAL GESTION IS UNABLE TO MAKE THE PAYMENTS?

The product is constituted as an entity that is separate from the portfolio management company. In the event of bankruptcy of the portfolio management company, the product's assets held in custody by the depositary will not be affected. In the event of bankruptcy of the depositary, the financial risk incurred by the product is mitigated, owing to the legal separation of the depositary's assets from the product's asserts.

WHAT WILL THIS INVESTMENT COST ME?

The person who sells you this product or who provides advice on it may charge you additional fees. If so, said person shall inform you of such fees and of the impact they have on your investment.

Costs over time:

The tables show the amounts taken from your investment in order to cover the various types of costs. These amounts depend on the amount that you invest, the time during which you hold the product, and the product's returns. The amounts indicated here are illustrations based on an example of invested amount and various possible investment periods.

We have assumed:

- that in the first year you would get back the amount you invested (annual return of 0.0%)
- that for the remaining holding periods, the product evolves as indicated in the intermediate scenario
- that 10,000 EUR are invested

	If you exit after 1 year	**If you exit after 5 years**
Total costs	498 €	1,422 €
Impact of annual costs (*)	5.02%	2.68% every year

(*) This shows how much costs reduce your return each year of the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return will be an estimated 4.1% before deduction of costs and 1.4% after this deduction. It may happen that we share costs with the person who sells you the product, in order to cover the services that it provides to you.

Breakdown of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	2.00% maximum of the amount invested.	until 200 €
Exit costs	1.00% maximum of your investment before it is paid to you.	98 €
Recurring costs incurred each year		
Management fees and other administrative and operating costs	1.83% of the value of your investment per year. This estimate is based on actual costs charged last year.	180 €
Transaction costs	0.19% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on how much we buy and sell.	19 €
Incidental costs incurred under specific conditions		
Performance-related fees	0.02%. 15% (incl. tax) of the positive performance of the share A in excess of 5% per financial year. The actual amount varies depending on the performance of your investment. The estimate of the variable management fees includes the average over the past 5 years.	2 €

HOW LONG DO I HAVE TO HOLD IT AND CAN I WITHDRAW MONEY EARLY?

Recommended holding period: 5 years

The investor may request the total or partial redemption of his units at any time during the life of the Fund. Fees applied in case of redemption: 1.00% maximum

In your Investment Fund, there is a mechanism for limiting redemptions ("Gates"). Please refer to the "Subscription and Redemption Terms" section of the prospectus for more information.
