

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DPAM B Equities Euroland

(a sub-fund of DPAM B SA, a public SICAV under Belgian law)

managed by CA Indosuez Fund Solutions S.A.

Class F - ISIN: BE0948484184

Objectives and investment policy

Objective

- The objective of the fund is to offer you exposure to equity securities of eurozone companies. This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The fund promotes environmental and social aspects within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. It does not have a sustainable investment objective.

Investment policy

- The fund mainly invests (without any sector restrictions) in shares and/or other equity securities of companies which have their registered office and/or a significant part of their assets, activities, profit centres or decision-making centres in a eurozone EU Member State. The fund applies binding investment restrictions to (a) companies that do not comply with Global Standards, (b) companies involved in controversial activities, and (c) companies involved in controversies of maximum severity. More information on the product can be found on the manager's website <https://www.funds.dpaminvestments.com/funds.html>.

Benchmark: MSCI EMU Net Return.

Use of the benchmark: the benchmark is used to compare performance. The selection and weighting of the assets in the fund's portfolio may differ significantly from the composition of the benchmark.

Subscription/Redemption

- Subscription or redemption requests may be made every business day before 3 p.m. (Belgian time) to the financial service.

Types of shares

- The shares of the fund are capitalisation shares which do not give right to a dividend. All income earned by the fund is reinvested. The shares are restricted to eligible investors (as defined under the legislation of the fund's Home Member State) and require a minimum initial subscription of EUR 25,000.

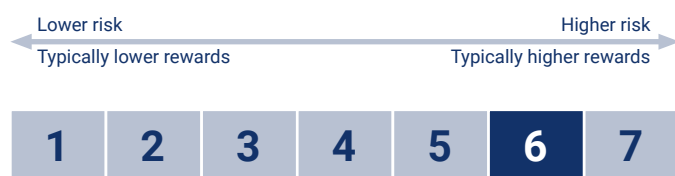

Derivative products

- The fund may, on an optional basis, use derivatives such as options and/or futures contracts ("futures" and/or "forwards") in order to achieve the investment objectives and/or for hedging purposes (hedging or exposure against/to the risks linked to certain markets).

Investment holding period

- This fund may not be appropriate for investors who intend to withdraw their capital within 5 years of the initial investment.

Risk and reward profile

- As any investment is risky by nature, the return (performance) thereof is potential only. The risk and reward profile of your investment is reflected by a synthetic indicator which ranks the fund over a risk/return scale from the lowest (1) to the highest (7) risk category.
- The computation of this risk/reward profile is based on the portfolio's net asset value fluctuations (volatility) recorded over the past 5 years (or on simulations based on an appropriate benchmark for funds or share classes of less than 5 years). It gives an indication of the fund's potential performance and of your capital risk exposure, but it does not guarantee that the risk/reward profile currently published will remain unchanged.
- Historical data, such as those used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund.
- The lowest risk/return category (level 1) does not mean a risk-free investment.
- The risk/return profile mentioned herein is essentially due the presence of shares in the portfolio.
- The capital invested in this fund is neither guaranteed nor protected. You may therefore lose all or part of your investment.

Certain risks are not (or not adequately) reflected in the risk and reward profile mentioned herein. Amongst those risks, the following could have a material impact on the risk and reward profile of the fund:

- Concentration risk:** as the portfolio is mainly composed of equity securities issued by companies in the Eurozone, it is likely to be more specifically exposed to economic developments in the Eurozone.
- Sustainability risk:** environmental and/or social aspects are not systematically part of the fund's investment selection process. As a result, the fund may have greater exposure to companies that have a negative sustainability impact.
