	What environmental and/or social characteristics are promoted by this financial product?	
	<p>The Fund's environmental and social characteristics are:</p> <ol style="list-style-type: none"> To maintain a weighted average ESG rating that is better than the Investment Universe. The rating methodology is based on a combination of proprietary and third-party ESG analysis that assesses a company's exposure to industry-specific material ESG issues and how well a company is managing those issues. To avoid investing in companies that violate global environmental and social norms. The Investment Manager assesses companies against an internally generated watchlist, which leverages third-party vendor information. An exclusion policy is applied by the Fund that prohibits investing in or obtaining exposure to companies that are deemed by the Investment Manager to violate United Nations Global Compact (UNGC) principles. This helps to avoid investments that, at a minimum, do not meet social and environmental norms with regards to human rights, labour, and anti-corruption, as well as environmental degradation. To promote: (i) human rights and avoidance of harm to the environment; (ii) climate change mitigation and avoidance of harm to the environment; and (iii) health and avoidance of harm to the environment; by avoiding investment in corporates that are involved (subject to the thresholds set out in the section entitled 'What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance

The investment strategy is described in the prospectus.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

1. The Fund's ESG rating is monitored against the Investment Universe to ensure it outperforms on a weighted average basis over the reference period. The ESG rating measures companies' exposure to, and performance managing, material environmental, social, and governance considerations. The Investment Manager seeks to achieve a better overall ESG rating by making investments in issuers with attractive ESG characteristics and limiting exposure to companies with higher sustainability risks.
2. The Investment Manager assess violations of UNGC principles or OECD Guidelines for Multinational Enterprises based on third-party data and internal research. Any company deemed to be breaching UNGC principles or OECD Guidelines for Multinational Enterprises will be excluded from the Fund's investment universe and the Fund will have 0% exposure to such companies.
3. The Fund applies activity-based exclusion criteria for certain products and services and will have 0% exposure to securities excluded under this policy. The exclusion criteria for the Fund includes companies which are involved in:
 - the manufacture or production of controversial weapons (any revenue from anti-personnel mines, cluster munitions, nuclear weapons in countries not party to the Non-Proliferation Treaty (NPT), biological weapons, chemical weapons, depleted uranium weapons.).
 - Cultivation and production of tobacco.
 - thermal coal mining or production which represents 30% of revenue or greater.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investment considered.

● ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager has developed Global Governance Principles that set out expectations for corporate governance on issues such as board independence, accountability and composition, as well as culture, remuneration, shareholder rights, amongst others. The principles provide a framework for governance assessments and stewardship activity, clearly setting out the Investment Manager's expectations of company management and effective stakeholder management.

The assessment of good governance practices is supported by a broad range of governance information from third-party ESG data sets. These data sources also provide governance-related controversy information, which can be used to flag governance issues at investee companies. Governance assessments and information are taken into consideration as part of our due diligence processes, ongoing monitoring of issuers in the portfolio, and stewardship activities.

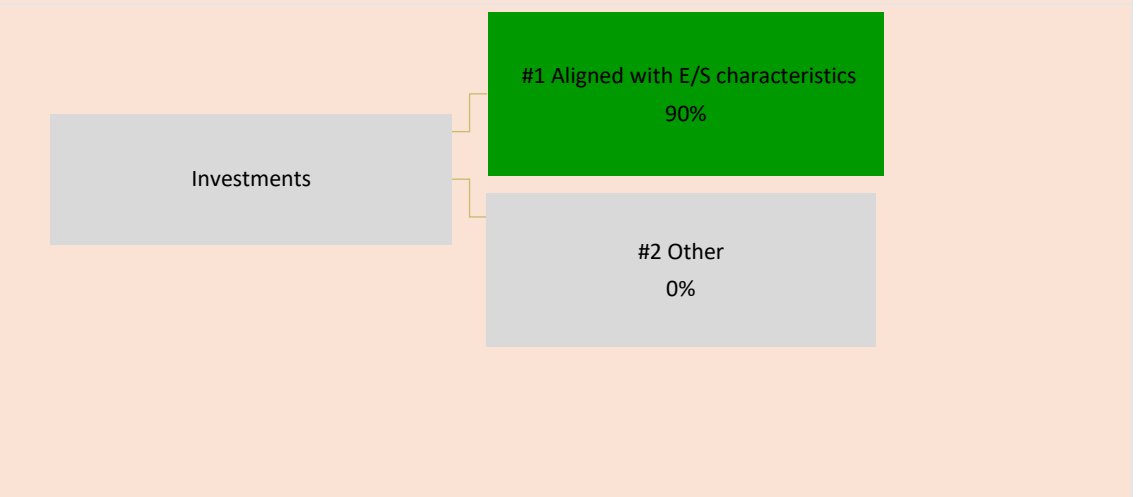

What is the asset allocation planned for this financial product?

At least 90% of the Fund's NAV will be in investments aligned with any one or more of the E/S characteristics of the Fund. The Fund does not commit to making sustainable investments. Any investments in the "#2 Other" category will include investments and other instruments of the Fund that cannot be aligned with the environmental and/or social characteristics of the Fund. These can include, for example, derivatives, cash and cash/equivalents. The Fund does not make a minimum commitment to making investments that fall within the "#2 Other" category and therefore 0% is included for that category in the graphic below. This means that between 0% and 10% of the Fund's NAV might at any point in time be in investments that qualify as "#2 Other" investments. The planned asset allocation will be reviewed on an annual basis.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund does not use derivatives for attaining the environmental or social characteristics promoted by the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making sustainable investments or to making Taxonomy-aligned investments. It is expected, however, that in pursuing its environmental characteristics, the Fund will contribute to one or more of the following environmental objectives as set out in the Taxonomy Regulation: climate change mitigation and/or climate change adaptation.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.
