**Manufacturer's website:** [www.carmignac.com](http://www.carmignac.com)

**Date of production of the KID:** 15/01/2026

## WHAT IS THIS PRODUCT?

### TYPE

Carmignac Investissement Latitude is a French common fund (Fonds Commun de Placement – FCP), governed by European Directive 2009/65/EC (UCITS)

### TERM

The fund was launched on 03/01/2005 for a period of 99 years, except in the cases of early dissolution or extension.

### OBJECTIVES

The fund's objective is to outperform its reference indicator (50% MSCI AC WORLD NR (USD) and 50% capitalised €STER) over a recommended investment horizon of five years. The reference indicator is rebalanced each quarter. The fund's main performance drivers are as follows: (i) Equities: the fund always has at least 85% of its net assets invested in Z2 EUR Acc units of its master fund, Carmignac Investissement, which always has at least 60% of its net assets exposed to international equities (all caps, without restrictions in terms of sector or region, including emerging countries). Due to the use of derivatives for hedging purposes, the fund's equity market exposure may vary between 0% and 100% of its master fund's equity exposure. (ii) Currencies: up to 125% of the fund's net assets may be exposed to one or more currencies through investment in the master fund. The fund has the possibility of hedging this exposure through the use of futures.

The fund is a feeder fund of Carmignac Investissement (the master fund). At least 85% of its net assets are invested in Z2 EUR acc units of its master fund at all times. Up to 15% of its net assets may be invested in liquid assets on an ancillary basis and/or in financial contracts that may be used solely to hedge the risks incurred by the master fund, most notably equity and currency risks. The feeder fund will therefore perform differently to the master fund given the equity and currency risk hedging, and its own costs.

The fund's investment universe is totally independent of the reference indicator, the individual constituents of which are not necessarily representative of the assets invested in by the fund. The fund's investment strategy is not dependent on the indicator. Therefore, the fund's holdings and the

weightings may substantially deviate from the composition of the indicator. There is no limit set on the level of such deviation.

The fund promotes environmental/social characteristics in accordance with Article 8 of the sustainability-related financial disclosures regulation (SFDR) by investing in the master fund. The latter applies "best-in-universe" and "best-effort" approaches and an active engagement policy. An analysis of non-financial criteria leads to a reduction of at least 20% in the master fund's investment universe through negative screening to exclude companies whose non-financial ratings reflect high risk. In addition, the master fund invests at least 50% of its net assets in sustainable investments within the meaning of the SFDR and aims to gradually reduce the portfolio's carbon emissions. The definition of sustainable investment used by the fund is based on the framework of the United Nations Sustainable Development Goals (SDGs). This framework is only one of the frameworks that can be used to illustrate positive results; others may reveal different results. The fund's sustainability risk may differ from that of the reference indicator.

### INTENDED RETAIL INVESTOR

Due to the fund's equity market exposure, this fund is suitable for investors who do not plan to withdraw their money within 5 year(s), and whose goal is to grow their investment without any capital guarantee.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

### OTHER INFORMATION

This unit is an accumulation unit.

Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 16:30 CET and are executed on the next business day using the previous day's NAV.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website [www.carmignac.com](http://www.carmignac.com).

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks not sufficiently considered by the indicator include:

- Counterparty risk: the fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- Liquidity risk: the markets in which the fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the fund may be caused to liquidate, initiate or modify its positions.

The recommended holding period is 5 year(s).

If the fund is denominated in a currency other than the applicable currency of the legal tender of the Member State where the PRIIP is being marketed, the return the retail investor gets, when expressed in the currency of the Member State where the PRIIP is being marketed, may change depending on currency fluctuations.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The summary risk indicator shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class.

## PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Recommended holding period:		5 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5 580 EUR	5 020 EUR
	Average return each year	-44,18 %	-12,87 %
Unfavourable	What you might get back after costs	7 770 EUR	8 010 EUR
	Average return each year	-22,30 %	-4,34 %
Moderate	What you might get back after costs	10 060 EUR	11 400 EUR
	Average return each year	0,57 %	2,65 %
Favourable	What you might get back after costs	12 830 EUR	14 740 EUR
	Average return each year	28,30 %	8,07 %

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- Unfavourable scenario: This type of scenario occurred for an investment between May 2015 and May 2020
- Moderate scenario: This type of scenario occurred for an investment between November 2016 and November 2021
- Favourable scenario: This type of scenario occurred for an investment between November 2019 and November 2024

## WHAT HAPPENS IF CARMIGNAC GESTION IS UNABLE TO PAY OUT?

The fund is a co-ownership of financial instruments and deposits separate from the management company. In the event of the latter's default, the product's assets held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the fund. There is no compensation or guarantee system in place that would fully or partially offset this loss.

## WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Costs over time

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 €. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 5 years
Total costs	628 EUR	1 994 EUR
Annual cost impact (*)	6.38 %	3.36 %

\* The Reduction in Yield (RIY) illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.01 % before costs and 2.65 % after costs. The total costs take into account one-off, ongoing and incidental costs.

These figures include the maximum distribution fee that the person selling you the product may charge 4.00% of amount invested. This person will inform you of the actual distribution fee.

### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	4.00% of the amount you pay in when entering this investment	Up to 400 EUR
Exit costs	We don't charge any exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.80% of the value of your investment per year. This is an estimate based on actual costs over the last year.	173 EUR
Transaction costs	0.58% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.	56 EUR
Incidental costs taken under specific conditions		
Performance fees	20% max. of outperformance if performance since the beginning of the fiscal year exceeds that of the reference indicator, even in the event of negative performance, and if no past underperformance remains to be compensated. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0 EUR

### HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Given the fund's exposure to the equity market, the recommended investment period is more than 5 year(s).

However, you can redeem your investment without incurring any penalties at any point during this period, or stay invested for longer.

Redemptions are possible each business day. In exceptional circumstances, your right to request the redemption of your investment may be suspended. The management company reserves the right to introduce caps on redemption requests ("gates") in order to spread redemptions across several NAV dates where such redemption requests exceed the 5% threshold (net redemptions of subscriptions expressed as a percentage of the Fund's net assets).

### OTHER RELEVANT INFORMATION

The fund may comprise other types of unit. You can find more information on these units in the prospectus or on the website: [www.carmignac.com](http://www.carmignac.com). This fund's units have not been registered under the US Securities Act of 1933. They may not be offered or sold, directly or indirectly, to or on behalf of a US person as defined in US Regulation S and FATCA. Depending on your tax status, any capital gains and income resulting from the ownership of units of the fund may be subject to tax. We advise you to obtain further information in this regard from the promoter of the fund or from your tax advisor. The manufacturer may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus. Monthly history of performance scenarios and past performance: <https://go.carmignac.com/performance-scenario> When this product is used as a unit-linked support for a life insurance or capitalization contract, the additional information on this contract, such as the costs of the contract, which are not included in the costs indicated in the this document, the contract in the event of a claim and what happens in the event of failure of the insurance company are presented in the key information document of this contract, which must be provided by your insurer or broker or any other intermediary of insurance in accordance with its legal obligation.
