The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document. Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF. Key Information Document production date: 06/05/2026.

What is this product?

Type: Units of AMUNDI ACTIONS USA RESPONSABLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): International equities

Objectives: By subscribing to AMUNDI ACTIONS USA RESPONSABLE, you are investing in securities of US companies selected based on sustainable development criteria.

The management objective is, over five years, to equal or outperform its benchmark, the S&P500 (expressed in dollars - dividends reinvested), representative of the main market capitalisation of US companies, after taking ongoing charges into account, while incorporating ESG criteria into the selection process and analysis of the Fund's securities.

To achieve this, the management team focuses its portfolio on the shares of listed US companies. As such, it is based on a financial analysis combined with a non-financial analysis based on ESG (environmental, social and governance) criteria. For example, ESG criteria includes energy consumption and greenhouse gas emissions for the environmental dimension, human rights, health or safety for the social dimension, or remuneration policy and overall ethics for the governance dimension. The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

The Fund implements an SRI strategy based on a combination of approaches:

- "rating improvement" approach: the portfolio's average ESG rating must be higher than the ESG rating of the investment universe after eliminating at least 25% of the lowest-rated securities. (From 01/01/2026, this percentage of lowest-rated securities will increase to 30%).
- normative and sectoral exclusion approach: exclusions of controversial weapons, companies that seriously and repeatedly violate one or more of the ten principles of the United Nations Global Compact and sectoral exclusions on coal and tobacco in accordance with Amundi's current exclusion policy. These issuers are rated G.
- Best-in-Class, which aims to favour the leading issuers in their sector of activity according to ESG criteria identified by the management company's team of extra-financial analysts. These issuers are rated A to F.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, apart from bond issues specifically intended to finance green, social and/or sustainable projects, the UCI also applies exclusions to companies that derive a certain share of their turnover from fossil fuels (coal mining, oil and gas etc.) or that do not meet the eligibility criteria of the French SRI label.

Thus, socially responsible management aims to reconcile the search for performance with the development of socially responsible practices and to achieve a more comprehensive assessment of the risks and sectoral opportunities specific to each issuer. Monetary and bond products can also be selected.

The Fund has the SRI (Socially Responsible Investment) label.

Forward financial instruments or temporary purchases and sales of securities may be used for hedging and/or exposure.

The UCI is actively managed. Portfolio construction is carried out according to a systematic approach, aiming to exclude companies negatively rated in terms of ESG and to overweight companies combining positive ratings on both the ESG and financial dimension. The UCI is built under the constraints of limited geographical and sectoral deviations and a moderate ex-ante Tracking Error (risk of performance gap between the portfolio and the benchmark, estimated by a risk model), within a range of 1 to 3% under normal market conditions.

The UCI is classified Article 8 within the meaning of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation").

Intended retail investors: This product is intended for investors with a basic knowledge and/or no or limited experience of investing in funds, who are seeking to increase the value of their investment and receive income over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI ACTIONS USA RESPONSABLE prospectus.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI ACTIONS USA RESPONSABLE prospectus.

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 invested.

Investment EUR 10,000		
Scenarios	If you exit after	
	1 year	5 years*
Total costs	€420	€1,781
