What is this product?

The objective of the SICAV is to obtain, over the recommended investment period of at least 3 years, after deducting maximum operating and management costs, a performance 1.65% higher than that of the overnight money market rate, capitalised €STR OIS.

To achieve this, the management team:

The sensitivity of the SICAV is actively managed within a sensitivity range of between 0 and +9.5.

- actively manages currencies (both OECD and non-OECD currencies)

The SICAV may temporarily purchase and sell securities. Eligible forward financial instruments may be used for hedging and/or exposure purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

How long should I hold it and can I take money out early?

Recommended holding period: 3 years. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for medium-term investment; you should be prepared to stay invested for at least 3 years. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI OBLIG INTERNATIONALES FLEXIBLE prospectus for more information about redemptions.

In order to manage liquidity risks, if redemption requests exceed a predefined threshold, the Management Company may cap redemptions (using what are known as "Gates") and only partially process such requests on a pro rata basis.

In order to promote a fair distribution of portfolio adjustment costs, the Management Company may use a predetermined net asset value adjustment mechanism by applying a factor reflecting the cost of liquidity (known as "Swing Pricing").
The ways in which these mechanisms operate is described in the prospectus.
