Edmond de Rothschild Asset Management (France) is authorised to operate in France under the no. GP 04000015 and is regulated by the Autorité des Marchés Financiers (AMF).

Key Information Document production date: 27.02.2026

What is this Product?

Type

The Product is a sub-fund of a French SICAV fund, which is a UCITS governed by European Directive 2009/65/EC.

Term

The term of the Product is 99 years. This Product has no maturity date. The Management Company reserves the right to dissolve the Product unilaterally. The Product may also be dissolved in the event of a merger, a total redemption of shares, or if the Product's net assets fall below the regulatory minimum amount. The assets and liabilities of the various sub-funds are segregated. As such, any shares you hold in this sub-fund may not be exchanged for shares in another sub-fund in the EdR SICAV fund.

Objectives

The Product's management objective is to outperform its benchmark, the MSCI EMU index, over the recommended investment period by investing in Eurozone companies that contribute mainly to the climate-change mitigation objective and to the achievement of the United Nations' Sustainable Development Goals (SDGs).

Its investment strategy consists in seeking to achieve, for the portfolio, a climate trajectory alignment that is lower than that of the benchmark.

The Product is managed actively, which means that the Manager makes investment decisions in line with the Product's investment policy with a view to achieving the Product's objectives. This active management process includes taking decisions related to asset selection, regional allocation, sectoral views and overall market exposure. The Manager is in no way limited by the composition of the benchmark index in the positioning of the portfolio, and the Product may not hold all the components of the benchmark index, or even any of the components in question at all. The fund may diverge wholly or significantly from the benchmark index or, occasionally, very little.

Benchmark index: MSCI EMU (NR), net dividends reinvested

Investment policy: The Product's investment strategy is a responsible investment strategy targeting Eurozone markets, and is geared towards promoting sustainable development, most notably by seeking to achieve, for the portfolio, a climate trajectory alignment that is lower than that of the benchmark. The Product implements an active stock-picking management approach, selecting listed stocks from an investment scope comprising mainly Eurozone securities exhibiting strong convictions on climate change. At least 75% of the Product will be permanently invested in equities and other PEA-eligible securities and at least 60% will be exposed to shares issued in one or more countries of the eurozone. Up to 110% of the Product's net assets may be exposed to equity risk. The ESG investment universe is composed of all companies in the Product's benchmark index, the MSCI EMU, as well as listed small and mid-cap companies in the eurozone worth up to €5 billion and not belonging to this index. The Product will also be able to invest up to 10% of its assets in listed large-capitalisation companies worth over €5 billion outside the eurozone. The management company may select securities from outside this ESG universe. However, it will ensure that the chosen ESG universe offers a relevant comparison for the Product's ESG rating. Securities are selected based on the combined use of financial criteria to identify the securities with significant growth prospects and non-financial criteria in order to meet the requirements with regard to Socially Responsible Investment. This analysis is designed to allow securities to be selected based on the Management Company's own ESG rating grid, which classifies securities according to the environment, social-societal, and governance criteria listed below:

Environment: energy consumption, greenhouse gas emissions, water, waste, pollution, environmental management strategy, green impact;

Social: quality of employment, human resources management, social impact, health and safety;

Governance: structure of governance bodies, remuneration policy, audit and internal control, shareholders.

The SRI ratings model was formulated:

- using a Best-in-Universe approach, i.e. by favouring the best-performing companies regardless of their financial rating, size or sector.

- using differentiated weightings of the three ESG pillars for each sector depending on its specific challenges:

as a result, the three non-financial pillars are allocated a greater or lesser weighting depending on the sector in question, which puts a different emphasis on each of the three pillars.

For example, a chemical company will be more affected by environmental issues whereas, for a company in the business services sector, a greater weighting will be placed on social factors. At any point in time, at least 100% of the portfolio companies will have an ESG rating that is assigned either internally or by an external rating agency.

Once this process has been applied, the investment universe will be reduced by at least 25% as of 01.01.2025, then 30% as of 01.01.2026, by eliminating the poorest non-financial ratings using a Best-in-Universe approach. Other than for the efficient and marginal management of the portfolio, derivatives will only be used on a temporary and exceptional basis.

To determine if the analysed company embodies the characteristics of a responsible and sustainable company as defined by the Management Company, the latter carries out research to produce an internal ESG rating on a 7-point scale ranging from AAA to CCC. This rating is an aggregation of the results scored against the various ESG criteria in the rating grid determined by the analysts. The securities included in the portfolio will have a rating greater than or equal to A according to the Management Company's internal rating. A climate profile analysis of the company is also being carried out. As part of its climate objective, the management company aims to achieve, for this Product, a climate trajectory below that of the benchmark. Moreover, a climate profile analysis of the company will also be conducted. Based on the manager's expectations of changes on the equity markets, the Product may invest up to 25% of its net assets in debt securities and money market instruments traded on eurozone markets. These stocks (which are rated at least Investment Grade, but with no maximum duration) are selected according to their expected yield. Subject to a limit of 100% of the assets, the Product may invest in financial contracts traded on regulated, organised or OTC markets.

Furthermore, the Product may invest up to a global limit of 10% of its net assets in UCI units or shares. The Product may hold securities not denominated in euros, and may therefore be exposed to currency risk. For hedging purposes, the Product may use forward currency contracts or currency swaps. The Product may also subscribe to equity options, for both hedging and exposure purposes, and to futures to manage exposure to equities. Exposure to currency risk through currencies other than those of the eurozone is limited to a maximum of 10% of the net assets.

AMF classification: Equities from Eurozone countries

This Product is eligible for the French PEA equity savings plan.

Allocation of income: Accumulation

Allocation of net realised capital gains: Accumulation

Intended Retail Investors

A EUR shares: All subscribers, provided they are willing to accept the risk of capital loss.

This Product may not be purchased by or benefit, either directly or indirectly, natural or legal persons residing or domiciled in the United States, citizens of the United States, or United States Persons.

Practical information

Custodian: Edmond de Rothschild (France)

You can request the redemption of your shares on any day of the week, except on public holidays and on the days on which French markets are closed (see the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12:30 pm on the day before the net-asset valuation day.

The Product's prospectus, its latest annual report, and any subsequent interim reports (in French, and in English, if required) will be provided free of charge upon written request to Edmond de Rothschild Asset Management (France) 47, rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France; telephone: +33 (0) 140 172 525; email: contact-am-fr@edr.com.

Share prices and, where necessary, information on other share classes, as well as information on the Product's net asset value, performance scenarios and past performance, can be found on www.edmond-de-rothschild.com.

What are the risks and what could I get in return?

Risk Indicator

←----->
Lower risk Higher risk

The summary risk indicator assumes that you will hold the Product until the maturity date of the recommended holding period (5 years). The actual risk can vary significantly if you opt to exit before the maturity date, and you may get back less.

The summary risk indicator is provided as a guide to the level of risk of this Product compared to other products. It shows how likely it is that this Product will incur losses due to market fluctuations, or our inability to pay you.

We have assigned this Product a risk rating of 4 out of 7, which means that it is a medium-risk product. In other words, the potential losses on the Product's future performance are in the medium range and, if market conditions were to deteriorate, our ability to pay you may be affected.

Moreover, you will also be exposed to the following risks (not shown in the summary risk indicator):

Liquidity risk: The markets for some securities and instruments may have limited liquidity. This restricted liquidity may be disadvantageous for the Product, both in terms of obtaining the indicated prices and executing orders at the desired prices.

As this Product does not include any protection against future market performance, you could end up losing some or all of your investment.

Pay particular attention to currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which the Product is marketed, the final return will depend on the rate of exchange between the two currencies. This risk is not taken into account in the indicator shown above.

Other risks may affect the Product's performance. Please refer to the prospectus for further details.

Performance scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the Product's and/or the relevant the benchmark index's worst, average, and best performance over the last 10 years.

Markets could trend very differently in the future.

The stress scenario shows what you might get back in extreme market conditions.

Investment of EUR 10,000

Recommended holding period: 5 years	If you exit after 1 year	If you exit after 5 years (the recommended holding period)
Scenarios		
Minimum	There is no guaranteed minimum return. You could lose some or all of your investment.	
Stress	What you might get back after costs	EUR 4,210
	Average return each year	-57.86%
Unfavourable	What you might get back after costs	EUR 8,090
	Average return each year	-19.05%
Moderate	What you might get back after costs	EUR 10,250
	Average return each year	2.50%
Favourable	What you might get back after costs	EUR 13,400
	Average return each year	34.00%

This table shows different scenarios illustrating the amounts that you could get back over the recommended holding period of 5 years, assuming you invest EUR 10,000.

Unfavourable scenario: This scenario occurred for an investment made between 12.2017 and 12.2022.

Moderate scenario: This scenario occurred for an investment made between 07/2019 and 07/2024.

Favourable scenario: This scenario occurred for an investment made between 03/2020 and 03/2025.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Product is a separate co-ownership comprising financial instruments and deposits held by the portfolio management company. Should the latter become insolvent, the Product's assets that are held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs financial losses will be mitigated due to the legal requirement for the custodian's asset to be held separately from those of the Product.

Investments in the Product are not themselves hedged or guaranteed by a national compensation mechanism. The resale of the Product's shares, and the Product's capital and income, are not guaranteed by the Product manufacturer.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about all of these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are deducted from your investment to cover different types of costs. These amounts depend on how much you invest, and on how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount you invested (0% annual return). For the other holding periods, the Product is expected to perform as shown in the moderate scenario.
- The investment is EUR 10,000.

Investment of EUR 10,000	If you exit after 1 year	If you exit after 5 years (the recommended holding period)
Total costs	EUR 544	EUR 2,017
Annual cost impact (*)	5.4%	3.2%

(*) This illustrates the extent to which the costs will reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is projected to be 9.32% before costs, and 6.07% after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. If this is the case, they will inform you of the amount.

Composition of costs

With an investment of EUR 10,000 and an annual cost if you exit after 1 year.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay upon subscribing to the Product.	EUR 300
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	2.19% of the value of your investment per year. This percentage is determined based on the actual costs incurred in the previous year.	EUR 219
Transaction costs	0.19% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the Product's underlying investments. The actual amount will vary depending on how much we buy and sell.	EUR 19
Incidental costs deducted under specific conditions		
Performance fees (and carried interest) (**)	0.06% , Description: 15% per year of the outperformance compared to the benchmark. The estimated aggregated costs shown above includes the average for the past 5 years.	EUR 6

(**) Performance fees may be calculated based on and deducted from the Product's underlying funds.

The table above shows the annual impact of the different types of costs on the return you could obtain on your investment at the end of the recommended investment period.

The costs shown here do not include any additional costs that may be charged by your distributor or advisor, or any costs in connection with a package that the Product may be part of. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the contract fees.

This table also explains what the different cost categories mean.

How long should I hold the Product, and can I take money out early?

Recommended holding period: 5 years

As this Product is designed for medium-term investments, you should be prepared to hold your investment in the Product for at least 5 years. However, you can request repayment of your investment without penalty at any time during this period or hold your investment for longer.

Daily, with the exception of public holidays and days on which the French markets are closed (according to the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12:30 pm on each net-asset valuation day.

A redemption cap mechanism (known as "gating") may be implemented by the Management Company. The way this works is described in the SICAV's Prospectus and Articles of Association.

How can I complain?

If you wish to make a complaint regarding the Product, the Product manufacturer or the person distributing or advising you about the Product, with a view to having a right recognised or a damage remedied, please send us a written request, describing the problem and the details of the complaint, by post or e-mail, to:

Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France.

E-mail: contact-am-fr@edr.com
