## MANAGEMENT REPORT

### STATUTORY AUDITOR

PriceWaterHouseCoopers Audit

### INVESTMENT POLICY

This management report covers the period from 31 December 2024 to 31 December 2025.

#### INVESTMENT POLICY

##### 01/25

The upward pressure on long-term interest rates continued at the beginning of January. The US 10-year yield approached the 4.80% mark before falling back in the second half of the month. German 10-year yields followed the same trend, fuelled by rising inflation expectations. France's risk premium declined. Spreads narrowed over the month: BBBs tightened by around 5 bps and BBs by around 10 bps. The primary market was dynamic, with some transactions offering attractive issue premiums. To finance its hybrid bond maturing at the end of the year, La Poste issued a new 6-year hybrid bond rated BB+ with a coupon of 5%, a very attractive level. Ipsos, now rated Baa3 by Moody's and BBB by Fitch, issued a five-year bond with a yield of 3.80%. Elior convinced the market of its recovery and was able to refinance its 2026 bond with a 2030 bond carrying a coupon of 5.625%, compared with 3.75% for the former.

##### 02/25

The US 10-year yield continued the decline that began in mid-January. The fear of inflationary pressure generated by Trump's political agenda, reflected in poor inflation figures across the Atlantic, gradually gave way to fears about growth. The fall in consumer confidence and the rise of the euro were signs of this. European long-term rates fell by almost 10 bps. France's risk premium declined slightly once again. Spreads narrowed across all credit segments: BBBs tightened by around 10 bps and BBs by around 15 bps. Some issues offered an attractive issue premium. Loxam, Europe's leading equipment rental company, refinanced its 2026 maturities with a 5-year bond carrying a coupon of 4.25%. We also subscribed to the Tier 2 capital of CCF Holdings, which was formed following the merger between the former CCF and MyMoneyBank, both of which are owned by the Cerberus fund. This instrument was rated BB+, has a 10-year maturity with a 5-year call option, and offered a yield of 5.15%.

##### 03/25

The announcement of the German recovery plan came as a positive surprise, both in terms of its scale and the political consensus that emerged. Given the financing needs generated by this plan, yield curves were strongly impacted, suffering a shock on the long end not seen since German reunification. We took advantage of the steepening yield curves to increase the portfolio's duration. BBB spreads remained stable, while BB and B spreads widened by 10 bps and 30 bps respectively. The primary market was very dynamic, offering numerous investment opportunities amid the recent rise in yields. Recycling specialist Séché refinanced its acquisition in Singapore via a 5-year BB-rated issue with a coupon of 4.5%. SIG Group, a supplier of aseptic carton packaging machinery, issued a five-year bond rated BBB- to refinance its short-term debt, carrying a coupon of 3.75%.

##### 04/25

Tariff announcements on "Liberation Day" on 2 April led to a sharp correction in risky assets, illustrated by a 100 bp surge in the Crossover index. The more conciliatory stance subsequently adopted by the Trump administration enabled the index to retrace 80% of its initial rise. Thanks to the fall in sovereign interest rates – the yield on the 5-year OAT fell by 25 bps over the month – credit indices were in positive territory. Investment Grade, with a spread widening of just 10 bps, outperformed High Yield. The ECB cut rates by 25 bps, as expected, while stressing the macro risks weighing on the Euro Zone, opening the door to further cuts. The primary market was interrupted by this phase of volatility, but picked up again at the end of the month, with some notable transactions taking place. These included high yield issues from Eircom, Stada and Infopro. In the investment-grade segment, the Belgian insurer Ethias issued a 10-year Tier 2 bond rated BBB at a yield of around 5%, which we consider to be attractive.

## SYCOMORE SELECTION CREDIT

**05/25**

The temporary stabilisation of the trade war enabled the markets to continue their rebound. However, concerns about the size of the US budget deficit put pressure on US long-term interest rates. The German 5-year bond yield rose by around 10 bps. Spreads with France and, in particular, Italy tightened, with Moody's placing Italy's Baa3 rating on a positive outlook. The Crossover index returned to around 300 bps, its level before the start of the trade war. The primary market was very buoyant, after virtually closing in April, with strong demand from investors. In order to protect its long-term rating, cable company Prysmian issued its first hybrid securities, offering a coupon of 5.25%, a particularly attractive level for a BB rating and an initial term of 5 years. AccorInvest continued to reshape its debt structure by issuing three tranches maturing in 2030 and 2032. AccorInvest is a spin-off from the Accor group and owns 576 hotels worth almost €8 billion. It is rated B2/B.

**06/25**

The ECB cut its key rates by 25 bps. The move was widely anticipated. However, its statement turned out to be more hawkish than expected. Sovereign long-term rates rose slightly, with a further steepening taking place at the start of the month. The Italy-Germany spread narrowed over the month, partly as a result of announcements in Germany that are likely to raise the budget deficit to 3% from 2026. The France-Germany spread rose slightly. The primary market remained very dynamic. Investor demand remained strong, as evidenced by the further fall in spreads that began in mid-April. Orange refinanced its short-term hybrid bonds by issuing a new 7-year tranche worth €750 million, accompanied by a buyback offer for the short-term tranches. Once again, a hybrid issuer demonstrated its reliability in terms of call options, even though the outstanding volume of hybrids has stagnated for the past three years and this segment remains relatively cheap compared to senior bonds. German energy services provider Techem issued a 7-year bond with a 4.625% coupon and a B+ rating. This issuer has a long track record in the high-yield market and has demonstrated its ability to reduce debt.

**07/25**

The prospect of a trade agreement between the United States and several of its partners, such as Europe and Japan, provided a buoyant climate for the markets in July. With no decision from the central banks, the markets awaited a downward movement from the Fed and a final 25 bp cut from the ECB. Yield curves continued to steepen, against a backdrop of reduced demand for government bonds. On the other hand, corporate bonds continue to be widely favoured: credit spreads tightened once again. This affected the following categories: Investment Grade and High Yield. Capital flows were also strong from investors, providing firm support for the valuation of corporate bond markets. Initial earnings reports showed the resilience of the automotive suppliers sector, with Forvia and OP Mobility helping their bonds to rise over the month. At the same time, OP Mobility carried out a primary issue that was more than 10 times oversubscribed, demonstrating the current demand for these assets.

**08/25**

The Jackson Hole speech gave Jerome Powell the opportunity to deliver a message pointing in the direction of a probable rate cut at the next meeting, while the Federal Reserve came under considerable pressure from Donald Trump. Credit spreads remained at a low level, against a backdrop of strong investor demand for the asset class, in both Investment Grade and High Yield. Conversely, political uncertainty in France against a backdrop of deteriorating public finances caused sovereign spreads to widen again. Against this backdrop, we reduced certain positions that were yielding less than at the start of the year, in anticipation of a resumption of primary market trading from the first few weeks of September. The results for the first half of the year were still being published, and at this stage the issuers in the portfolio had delivered consistently. The fund's duration remained stable.

**09/25**

As widely expected, the Fed cut its key rates by 25 bps and the market expected two further cuts between then and the end of the year. On the other hand, the ECB left rates unchanged, showing itself to be slightly more optimistic about growth in the Euro Zone but giving no indication as to its monetary policy over the coming months. Spreads narrowed across the credit market, with High Yield outperforming the best-rated issuers. In particular, the downgrading of France and the upgrading of Italy and Spain had little impact on corporate risk premiums. The primary market remained very dynamic. Swiss operator Matterhorn, owned by Xavier Niel, issued a 5-year bond to finance the acquisition of a majority stake in Monaco Telecom: the yield came in at around 4% for a BB rating. The Spanish automotive supplier Gestamp, a manufacturer of body parts, was able to refinance its short-term debt via a 5-year bond offering a yield of 4.40% for a BB rating. Unibail reissued a hybrid bond with a first call date in June 2031. The coupon was 4.75% for a Ba1/BBB- rating.

**10/25**

The bankruptcy of US automotive supplier First Brands sent a chill through the private debt markets, with a contagion effect on the high yield bond markets. However, Q3 results were broadly in line with expectations, enabling a recovery at the end of the month. Some companies, such as Accor and Unibail, published particularly robust reports, while others, such as Altarea, had their ratings upgraded. Despite the US government shutdown lasting longer than usual, depriving the country of statistics, the Fed continued its cycle of rate cuts, allowing long-term rates to ease.

# SYCOMORE SELECTION CREDIT

The primary markets remained particularly buoyant in October; in particular, we participated in the Aegis (Verisure), Exor, Séché Environnement, TDC NET and Carmila issues.

11/25

€ Sovereign rates remained relatively stable in November. French and Italian risk premiums fell. Fears of a bubble linked to artificial intelligence led to an increase in volatility in risky assets, fuelling a slight rise in spreads over the month. The market expected ECB rates to remain stable for the next few months. On the other hand, the Fed's rate cut expectations proved volatile and were banking on one cut at the December meeting, as well as two further cuts in 2026. The primary market remained buoyant in both the investment grade and high yield sectors. Spanish retailer Eroski – which has a co-operative governance structure – refinanced its debt by issuing a 5.5-year bond with a 5.75% coupon and a B1/BB-rating. The US telecoms operator Verizon issued a hybrid bond offering a 4% yield with a BBB rating: a level we consider attractive.

12/25

Long-term € rates came under pressure during the month, accentuating the steepening of sovereign yield curves. The market was concerned about the potential scale of government bond issues in 2026, linked to the large budget deficits expected in France and Germany. The ECB left rates unchanged, as expected. The market expected short-term rates to remain stable over the next twelve months. The French risk premium fell, helped by the PLFSS vote (Social Security Financing Bill for 2026). Credit spreads eased across the board as the primary market dried up. This has resulted in high yield indices significantly outperforming investment grade indices, which are currently in negative territory. Board game publisher Asmodee, a spin-off of Swedish media group Ambracer, issued a bond maturing in 2031 to refinance the "FRN" issued a year earlier. Asmodee's very favourable earnings trajectory facilitated the market's excellent response to this issue, which resulted in a 150 bp reduction in the coupon. Celsa is a Spanish producer of low-emission circular steel. It raised €1.2 billion on the bond market to extend its debt. The 8.25% coupon, combined with a B/B2 rating and a 5-year maturity, appeared attractive to us.

Over the period, the Fund posted the following performance:

Unit Class	Performance over the period <sup>1</sup>	Performance of the benchmark Barclays Capital Euro Corporate ex- Financials Bond Index (coupons reinvested)
I	+ 4.25 %	+ 2.63 %
ID	+ 4.26 %	+ 2.63%
MF (*)	+ 5.04 %	+ 3.05 %
R	+ 3.69 %	+ 2.63 %
X	+ 4.43 %	+ 2.63 %
R USD	+ 17.61 %	+ 2.63 %

(\*) MF unit class activated on 29/01/2025

<sup>1</sup>Past performance is not a guarantee of future performance.

## CHANGES DURING THE PERIOD

On 21 February 2025, the prospectus was updated to reintroduce the possibility of placing redemption orders expressed as an amount

## CHANGES IN NET ASSETS

The changes in net assets are presented from the close of the previous financial year:

## Derivatives

the Fund operates in all regulated or organised French and foreign markets, or in over-the-counter transactions. The instruments used are interest rate and currency futures and options as well as forward foreign exchange contracts and credit default swaps (CDSs). These instruments expose or hedge the portfolio to or against interest rate risk, credit risk and exchange rate risk (with this being limited to 10% of net assets), without the possibility of overexposure. However, CDSs, which may be single issuer or on bond indices, can only be used to hedge the portfolio. These instruments may not represent more than 40% of the Fund's net assets. The commitment of the Fund on the futures markets by using financial derivative instruments is limited to its net assets, with this liability being assessed through the commitment method.

## Securities with embedded derivatives

The Fund trades financial instruments with embedded equity derivatives.

These are bond instruments with a conversion or subscription right, specifically convertible bonds, bonds redeemable into new or existing shares and bonds with redeemable share subscription warrants. They may represent up to 100% of the Fund's net assets, while indirect exposure to equities, calculated according to the delta of the convertible bond, is limited to 10% of the Fund's net assets.

There are no plans to use total return swaps in the Fund's management.

## MEASURE OF OVERALL RISK

The Fund's overall risk, which is used to account for the additional risk associated with the use of derivative instruments, is realised using the commitment calculation method.

## INFORMATION ON TEMPORARY DISPOSALS OF SECURITIES WITHIN THE FUND (SECURITIES LENDING)

There are no plans to use temporary acquisitions and disposals of securities in connection with the management of the Fund

## PEA ELIGIBILITY

The Fund is not eligible for the PEA (*Plan d'Epargne en Actions*).

## VOTING RIGHTS POLICY

Sycomore Asset Management provides unitholders with a Voting Policy document, which sets out the conditions under which it exercises the voting rights attached to securities held by the UCITS it manages.

## INTERMEDIARY SELECTION PROCESS

Sycomore Asset Management selects and assesses the intermediaries with which it works, only choosing those who offer the highest efficiency in their specific fields.

# SYCOMORE SELECTION CREDIT

Sycomore Asset Management provides unitholders, on its website ([www.sycomore-am.com](http://www.sycomore-am.com)), with a "Report on intermediation fees" document, which sets out the conditions under which investment decision-making and order execution services were used during the previous year.

## **REPORT ON INTERMEDIATION FEES**

Sycomore Asset Management provides unitholders with a "Report on brokerage fees" document via its website ([www.sycomore-am.com](http://www.sycomore-am.com)). This document sets out the conditions under which investment decision-making and order execution services were used during the previous year.

## **INFORMATION ON THE INTEGRATION OF ESG CRITERIA INTO THE INVESTMENT POLICY**

In response to the requirements of Article 173 – VI of the French Energy Transition for Green Growth Act (loi de transition énergétique pour la croissance verte) and in accordance with the provisions of Decree No. 2012-132 of 30 January 2012 on the disclosure by portfolio management companies of the social, environmental and governance quality criteria taken into account in their investment policy, Sycomore Asset Management makes available to unitholders, on its website ([www.sycomore-am.com](http://www.sycomore-am.com)), a document entitled "ESG Integration Policy", which presents the principles, analysis tools, and human resources dedicated to ESG integration, as well as the transparency, voting, and commitment policy of Sycomore AM.

## **MANAGEMENT COMPANY STAFF REMUNERATION FOR 2025\***

*An excerpt from Sycomore AM's remuneration policy is available on the company website: [www.sycomore-am.com](http://www.sycomore-am.com). In accordance with regulations arising from Directives 2011/65/EC (AIFM) and 2014/91/EC (UCITS V), Sycomore AM (SAM) has established a remuneration policy. Its objectives are to promote alignment of interests between investors, the management company and its staff, as well as sound and efficient risk management of managed portfolios and of the management company, taking into account the nature, scope and complexity of SAM's business.*

### **1. Principles for determining and paying staff remuneration**

SAM staff remuneration shall at the very least consist of:

- Fixed remuneration;
- A variable remuneration, which rewards the individual and collective performance of the working units;
- Complementary schemes that are part of a general and non-discretionary policy at the level of the management company, in force or that will come into force, such as profit-sharing, participation, etc.

Where appropriate, certain staff members may:

- Receive shares in SAM, to be held directly or indirectly;
- Have their housing provided or paid for.

An appropriate balance is struck between the fixed and variable components of staff remuneration.

### **2. Remuneration governance and oversight**

The management company's general management draws up and adopt the remuneration policy after consulting with the Director of Human Resources and Chief Compliance Officer, the latter of whom checks for consistency with general management policy and procedures during an internal assessment that takes place at least once a year.

A remuneration committee meets once a year. It is made up of the Chairman and Chief Executive Officer of SAM and two non-staff members, one of whom chairs the committee. The committee's role is to review the remuneration policy's implementation each year and advise general management on the content or implementation of this policy.

### **3. Identified Staff**

Some staff members are referred to as "Identified Staff". Under the applicable regulations, Identified Staff include employees whose work may have a significant influence on the risk profile of the management company and/or the products it manages, due to the decisions they make. The list of Identified Staff is drawn up by the Human Resources Department and validated by the Chief Compliance Officer. It is then approved by the general management.

# SYCOMORE SELECTION CREDIT

## 4. Determination of theoretical variable remuneration amounts

At the end of each financial year, SAM calculates the value that the company has added. A percentage of this added value makes up the overall budget for remuneration (both fixed and variable portions).

Once this overall remuneration budget is calculated, all staff members are subject to an annual appraisal, at the end of which a theoretical individual variable remuneration is determined, within the limits of the overall variable remuneration budget.

## 5. Terms on which variable remuneration is paid

For staff members not classed as Identified Staff and for Identified Staff whose variable remuneration proposed in the appraisal interview remains below the threshold set in Article 6 of this policy, this variable remuneration becomes vested.

For Identified Staff, excluding those responsible for control functions, whose variable remuneration calculated during the appraisal interview exceeds the threshold determined under the conditions set out in Article 6 of this policy, the system applied to variable remuneration is as follows:

- 50% of the variable remuneration due becomes vested and payable in cash on the day when salaries are paid in January.
- 50% of the variable remuneration due will be paid in cash gradually over the next three calendar years, on a pro rata basis, and will be linked to certain indicators to ensure the interests of Identified Staff and investors are aligned.

For Identified Staff responsible for the control functions, whose variable remuneration exceeds the threshold determined under the conditions set out in Article 6, the system applied to variable remuneration is as follows:

- 50% of the variable remuneration due in respect of the appraisal interview becomes vested and payable in cash on the day when salaries are paid in January.
- 50% of the variable remuneration due will be paid in cash gradually over the next three calendar years, on a pro rata basis.

The index-linking of variable remuneration tranches may be simplified from an operational viewpoint, depending on the situation of each Identified Staff member.

In all cases, variable remuneration will only be paid if it is compatible with the financial position of the management company as a whole and is justified by the performance of the operational unit, the portfolios and the Identified Staff member concerned.

Identified Staff must undertake not to use personal insurance or hedging strategies to counter the impact of these provisions on their remuneration. Equally, variable remuneration is not paid through instruments or methods that facilitate the circumvention of regulatory requirements and this policy.

## 6. Proportionality principle

In accordance with the regulations in force, the scheme referred to in Article 5 shall apply only to Identified Staff whose variable remuneration exceeds a threshold set by general management.

## 7. Guaranteed variable remuneration

Guaranteed variable remuneration is exceptional, applies only when a new staff member is hired, and is limited to the first year.

Total fixed remuneration of all Management Company staff: €6,589,000  
Total variable remuneration of all staff members of the Management Company: €3,419,000 Number of beneficiaries: 70, of which 36 are classed as Identified Staff  
Total amount of fixed and variable remuneration of Identified Staff: €7,757,000

The amounts indicated cover all of the management company's business activities for 2025. NB: Remuneration data has not been audited by the Fund's statutory auditor.

# SYCOMORE SELECTION CREDIT

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:** SYCOMORE SELECTION CREDIT  
**Legal entity identifier:** 9695 001XM70M2W01YD 25  
**Publication date:** 23/01/2026

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

As indicated in the Prospectus, the Sycomore Sélection Crédit fund aims to outperform the Bloomberg Euro Aggregate Corporate ex-Financials TR index (“benchmark index” of the Fund) over a minimum investment period of five years and through a socially responsible investment process, by selecting companies specifically based on environmental criteria and on their contribution to employment.

One of the objectives of bond issues is to enable companies to finance their development: Sycomore Sélection Crédit thus contributes through its investments to the financing of economic growth.

No benchmark has been defined to determine whether this financial product complies with the environmental and/or social criteria it promotes.

### ● **How did the sustainability indicators perform?**

The Fund will assess the attainment of each of the environmental or social criteria using the following sustainability indicators, among others:

#### At the level of the companies held:

- **SPICE ratings of investee companies:** SPICE<sup>[1]</sup> stands for Society & Suppliers, People, Investors, Clients, and Environment. This rating assesses companies’ sustainable performance. It integrates the analysis of economic, governance, environmental, social, and societal risks and opportunities into the commercial practices and product and service offerings of companies. The analysis takes into account a selection of criteria from which a score between 1 and 5 per SPICE letter is obtained. These 5 scores are weighted such that environmental issues make up 20% (SPICE rating E), social issues make up 40% (SPICE Ratings S, P & C) and governance issues make up 20% (50% of SPICE Rating I).
- **At the societal level:** societal contribution<sup>[2]</sup> of products and services. The societal contribution combines the positive and negative societal contributions of the different products and services of a company. The methodology is based on the societal aspects of the 17 UN Sustainable Development Goals (SDGs) of the United Nations and the 169 targets that make them up.
- **At the level of human capital:** two indicators relate to SDG 8 (“Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all”) and SDGs 3, 4, 5, and 10 for the former:
  - **The Happy@Work rating<sup>[3]</sup>:** this analysis provides a comprehensive and objective assessment of the level of wellbeing at work.
  - **The Good Jobs rating<sup>[4]</sup>** is a metric that aims to assess, on a scale of 0 to 100, a company’s overall ability to create sustainable and quality jobs for all, particularly in areas – countries or regions – where employment is relatively limited and therefore necessary for sustainable and inclusive development.
- **At the environmental level:** The net environmental contribution indicator (NEC)<sup>[5]</sup>. The NEC enables investors to evaluate the extent to which a given business model contributes to the ecological transition. The score is calculated on a scale from -100%, for the activities that are the most damaging to the environment, to +100% for activities providing a strong positive environmental impact. The NEC targets five impact categories (challenges: climate, waste, biodiversity, water, air quality) by business group (areas of contribution: ecosystems, energy, mobility, construction, production).
- **The Environmental Contribution rating within the Environment pillar of our SPICE methodology.**
- **The Reputation Risk & Responsible Marketing rating within the Clients pillar of our SPICE methodology.**
- **The Communication and Transparency rating within the Investors pillar of our SPICE methodology.**
- **The Bondholder Risk rating within the Investors pillar of our SPICE methodology.**
- **Compliance of portfolio companies with the Investment Manager’s SRI exclusion policy.**
- **Compliance of portfolio companies with the Investment Manager’s controversy review process.**
- **Compliance of portfolio companies with the Investment Manager’s Negative Impact policy.**

## SYCOMORE SELECTION CREDIT

- **Compliance of the issuing government with the Investment Manager's country rating model.**

### **At product level:**

- Net environmental contribution: In 2025, the Fund's net environmental contribution was 8%, compared with 4% for the benchmark index.
- Carbon intensity: In 2025, the Fund's carbon intensity stood at 655 kg CO<sub>2</sub>eq/k€, compared with 1033 kg CO<sub>2</sub>eq/k€ for the benchmark index.

---

[1] Further information is available on the website indicated at the end of this document

[2] Ibid

[3] Ibid

[4] Ibid

[5] Ibid

### ● ***...and compared to previous periods?***

At year-end 2024:

- The Fund's net environmental contribution stood at +9%, whilst the benchmark index had an environmental contribution of +2%.
- The Fund's carbon intensity stood at 725 kg CO<sub>2</sub>eq/k€, compared with 1080 kg CO<sub>2</sub>eq/k€ for the benchmark index.

### ● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund may partially make sustainable investments with a social or environmental objective. Investments are classified as sustainable if they are identified as contributing positively to environmental or social challenges through their products or services or through their practices.

The qualification of a sustainable investment requires 1) the achievement of a minimum score on at least one of the indicators of positive contribution of the definition of sustainable investment established by Sycomore AM; 2) the absence of significant harm; 3) good governance practices. These elements are detailed in Sycomore AM's ESG integration policy.

It should be noted that the Fund undertakes to invest a minimum of 50% of its net assets in underlying assets qualifying as sustainable investments under the terms and conditions set forth herein, regardless of whether the objective of its investments is environmental or social in nature.

### ● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Four levels are put in place to prevent sustainable environmental or social objectives from being significantly affected, on an ex-ante basis, before any investment decision.

Indeed, investments targeted by one or more of the following criteria will not be considered a sustainable investment:

1. **In accordance with the Investment Manager's SRI Exclusion Policy**[6]: activities are limited based on their controversial social or environmental impacts, as defined and reviewed each year in Sycomore AM's basic policy (applicable to all direct investments of Sycomore AM) and in the Socially Responsible Investment (SRI) policy (applicable to all UCITS, mandates and dedicated funds managed according to an SRI strategy).

2. **Companies involved in a level 3/3 controversy**[7]: identified based on the Investment Manager's in-depth analysis of controversies. Companies classified as most controversial (-3

# SYCOMORE SELECTION CREDIT

on the Sycomore AM scale, from 0 to -3) are considered to be in breach of one of the principles of the United Nations Global Compact.

3. **SPICE rating below 3/5:** The SPICE methodology covers all environmental, social, and governance issues targeted by the indicators of adverse impacts on sustainability factors listed in the Regulatory Technical Standards. A lower rating, less than 3/5, indicates a lower sustainability performance on one or more adverse impacts.
4. **According to Sycomore AM's Principal Adverse Impacts (PAI) policy<sup>[8]</sup>:** a PAI policy to identify additional risks of significant impacts on the environmental and social issues covered by the PAI indicators listed in Table 1 of Annex I of the SFDR Regulation is implemented. Companies meeting all the exclusion criteria relating to GHG emissions, biodiversity, water, waste, gender equality, the principles of the United Nations Global Compact/OECD Guidelines for Multinational Enterprises, or controversial weapons, will not be considered "sustainable".

<sup>[6]</sup> Further information is available on the website indicated at the end of this document

<sup>[7]</sup> Ibid

<sup>[8]</sup> Ibid

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

Adverse impacts on sustainability factors are taken into consideration at two levels:

1. **Solely for sustainable investments:** a PAI policy based directly on the indicators in Table 1 of Annex I and all relevant indicators in Tables 2 and 3.
2. **For all of the financial product's investments:** The framework of the SPICE analysis considers all the issues covered by all the indicators of adverse impacts on sustainability factors, with the ability to use them to feed into the analysis.

**Negative Impact Policy:** each sustainability factor referred to in Table 1 of Annex I was associated with an exclusion criterion as outlined in the Sycomore AM PAI policy.

### **SPICE score:**

The SPICE methodology covers all environmental, social, and governance issues targeted by the indicators of adverse impacts on sustainability factors listed in the Regulatory Technical Standards.

More specifically, Sycomore AM's SPICE fundamental analysis model is an integrated model that provides a holistic view of companies in the investment universe. It has been developed taking into account the OECD Guidelines for Multinational Enterprises. It fully integrates ESG factors to understand how companies manage negative impacts as well as key sustainable opportunities while following a double materiality approach. Sycomore AM's Principal Adverse Impact policy sets out how the issues covered by the PAIs are covered by SPICE.

**Exclusion policy:** Finally, Sycomore AM's exclusion policy targets indicators of negative impacts on sustainability, including controversial weapons, exposure to the fossil fuel sector and production of chemical pesticides. More generally, it has been drafted to target companies that violate the principles of the United Nations Global Compact and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises.

Once the analysis (SPICE analysis including the examination of controversies, and review of compliance with the exclusion policy and the Principal Adverse Impact Policy) has been carried out, it affects investment decisions as follows:

- As indicated in the previous question, it offers protection against material damage to any sustainable investment objective, excluding companies that do not comply with the minimum safeguard requirements;
- It also has an impact on investment decisions in two ways: 1) assumptions regarding the company's outlook (growth and profitability forecasts, liabilities, mergers and acquisitions, etc.) can be reinforced by certain results of the SPICE analysis where applicable, and 2) certain fundamental assumptions of the valuation models are linked to the results of the SPICE analysis.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## SYCOMORE SELECTION CREDIT

*Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Detailed description:*

The development of Sycomore AM's "SPICE" analytical framework and exclusion policy was based on the OECD Guidelines for Multinational Enterprises, the United Nations Global Compact, International Labour Organization standards and the United Nations Guiding Principles on Business and Human Rights. To assess the fundamental value of a company, analysts consider methodologically how a company interacts with its stakeholders. This fundamental analysis aims to understand the strategic issues, business models, quality of governance and degree of integration of sustainability considerations, as well as the risks and opportunities facing the company. Sycomore AM has also defined its human rights policy in accordance with the United Nations Guiding Principles on Business and Human Rights.

Despite the due diligence described above to identify potential violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the effective compliance of the issuers analysed can never be guaranteed.

*The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

*The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

### How did this financial product consider principal adverse impacts on sustainability factors?

As indicated in the previous sub-section:

- The principal adverse impacts, as well as all other adverse impacts, are taken into account for any investment of the portfolio through the SPICE analysis and results, supplemented by Sycomore AM's exclusion policy.
- In addition, in order to qualify as a sustainable investment, any investment must comply with the PAI policy, particularly with regard to the principal adverse impacts.

Information on the main negative impacts on sustainability factors will be published in the Fund's annual report.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Largest investments	Sector	% of assets	Country
Autostrade per l'Italia SpA	Industrials	1.67	ITA
LOXAM SAS	Industrials	1.57	FRA
Orange SA	Communication Services	1.55	FRA
Altarea SCA	Real Estate	1.53	FRA
Aeroporti Roma	Industrials	1.40	ITA
La Poste SA	Industrials	1.35	FRA
TDC Net A/S	Communication Services	1.28	DNK

# SYCOMORE SELECTION CREDIT

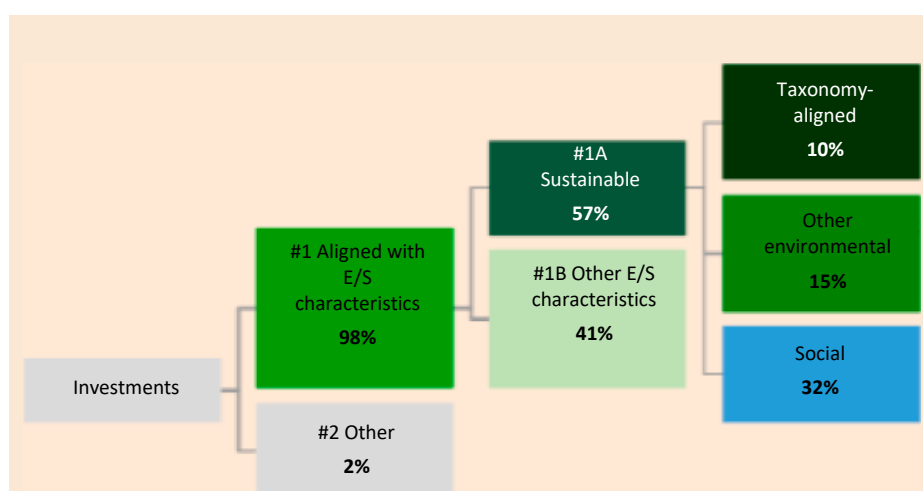

Credit Agricole Assurances SA	Financials	1.27	FRA
Mobilux Finance SAS	Consumer Discretionary	1.27	FRA
El Corte Ingles, SA	Consumer Staples	1.26	ESP
Roquette Freres Societe anonyme	Health Care	1.26	FRA
Banijay Entertainment SASU	Communication Services	1.25	FRA
Lkq Dutch Bond B.V.	Consumer Discretionary	1.18	NLD
TDF Infrastructure SAS	Communication Services	1.16	FRA
Boels Topholding BV	Industrials	1.14	NLD

Asset allocation describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **# 1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# SYCOMORE SELECTION CREDIT

● **In which economic sectors were the investments made?**

Sector	%
Industrials	15.55
Consumer Discretionary	12.54
Financials	10.39
Communication Services	8.70
Real Estate	5.48
Materials	5.29
Consumer Staples	4.15
Health Care	4.02
Utilities	2.60
Information Technology	1.95

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas       In nuclear energy
- No

1. Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SYCOMORE SELECTION CREDIT

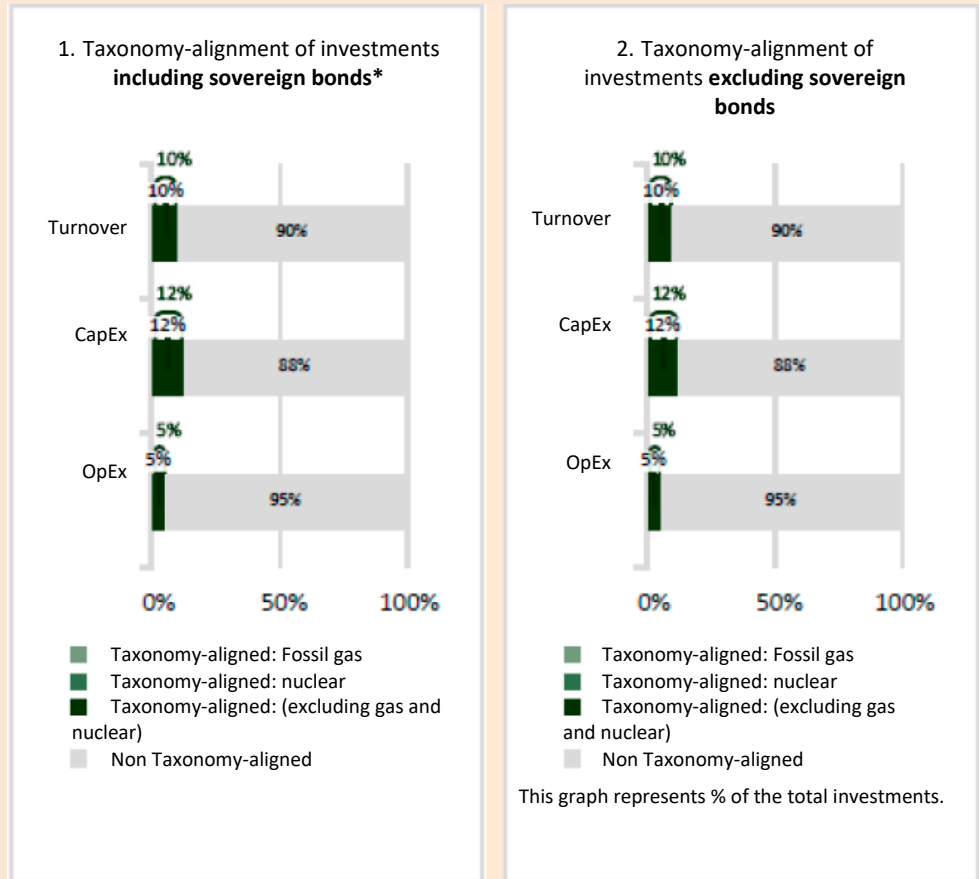

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies;
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy;
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data provided by MSCI  
 Revenue data coverage: 73%  
 CapEx data coverage: 52%  
 OpEx data coverage: 46%

• **What was the share of investments made in transitional and enabling activities?**

4% of investments were in transitional and enabling activities.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned with the EU taxonomy rose in 2025 from 8% to 10%.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The proportion of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy is 23%.

Are sustainable investments with an environmental objective that do not

# SYCOMORE SELECTION CREDIT

take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of socially sustainable investments?

The proportion of socially sustainable investments (which are not covered by the environmental objective) was 36%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2% of the Fund’s assets consisted of cash and cash equivalents, held for liquidity purposes, and derivative instruments, presented in this document in the “other” category. By nature, these investments are not associated with minimum environmental or social guarantees.

## What measures have been taken to attain environmental and/or social objectives during the reference period?

The following mandatory criteria apply to the Fund.

### At the investment level:

- **When investing in companies**, the following screening and exclusion filters apply to all investments in the financial product:
  - **Selection filter:** Its objective is to promote businesses presenting sustainable development opportunities divided into five sub sets:
    - **Companies with an Environmental Contribution rating** greater than or equal to 2/5 within the Environment pillar of our SPICE methodology.
    - **Companies with a Happy@Work rating** greater than or equal to 2/5 within the People pillar of our SPICE methodology.
    - **Companies with a Reputation Risk and Responsible Marketing rating** greater than or equal to 2/5 within the Client pillar of our SPICE methodology. **Companies with a Communication and Transparency rating** greater than or equal to 2/5 within the Investors pillar of our SPICE methodology.
    - **Companies with a Bondholder risk rating** greater than or equal to 2/5 within the Investors pillar of our SPICE methodology.
  - **Exclusion filter:** this filter excludes companies which present sustainability risks that could call into question those companies’ competitiveness or that could be the source of serious adverse impacts. A company is thus excluded if it:
    - is involved in activities identified in the Sycomore AM SRI exclusion policy for their controversial social or environmental impacts, which also includes investments affected by serious controversies (level 3/3).
    - obtained a SPICE rating strictly below 2/5.
- **For bonds, other international debt securities and short-term negotiable securities from private issuers:** these will be selected through an in-house rating of the issuing Country strictly above 2.5 on a scale of 5 (5 being the highest rating), the Country being thus considered as sufficiently sustainable and inclusive.

Concerning the product, the Management Company aims to achieve better performance than the Fund’s benchmark in regards of the following two indicators:

- Net environmental contribution;
- Carbon intensity.

In addition, the Fund will continuously invest at least 50% of its net assets in sustainable investments that have either an environmental or a social objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared with the reference benchmark?

The fund does not have a non-financial benchmark index.

- ***How did the reference benchmark differ from a broad market index?***

The fund does not have a non-financial benchmark index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The fund does not have a non-financial benchmark index.

- ***How did this financial product perform compared with the reference benchmark?***

The fund does not have a non-financial benchmark index.

- ***How did this financial product perform compared with the broad market index?***

The fund outperformed the market index.

Statutory Auditor's Report on the annual  
financial statements

(Year ended 31 December 2025)

**STATUTORY AUDITOR'S REPORT  
ON THE ANNUAL FINANCIAL STATEMENTS  
Year ended 31 December 2025**

**SYCOMORE SELECTION CREDIT**  
UCITS CREATED AS A FRENCH FONDS COMMUN DE PLACEMENT (FCP MUTUAL FUND)  
Governed by the French Monetary and Financial Code

Management Company  
SYCOMORE ASSET MANAGEMENT  
14, Avenue Hoche  
75008 PARIS

**Opinion**

Pursuant to our appointment by the Management Company, we conducted the audit of the annual financial statements for SYCOMORE SELECTION CREDIT, the UCITS created as a French Fonds Commun de Placement (FCP), for the financial year ended 31 December 2025, as attached to this report.

In our opinion, the annual financial statements give a true and fair view of the financial position of the UCITS created as a French Fonds Commun de Placement (FCP mutual fund), and of the results of its operations, as well as its financial condition and assets for the financial year, in accordance with French legal and regulatory requirements relating to the preparation of the financial statements.

**Basis for our opinion**

***Audit standard***

We conducted our audit in accordance with professional audit standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion. Our responsibilities under these standards are set out in the '*Responsibilities of the Statutory Auditor with respect to the audit of the annual financial statements*' section of this report.

***Independence***

We conducted our audit in accordance with the independence rules provided for by the French Commercial Code and the code of ethics of the profession of statutory auditor, for the period from 01/01/2025 to the date of publication of our report.

*Statutory Auditor's Report on the annual financial statements*

*Financial year ended 31 December 2025 – Page 2*

### **Justification of our assessments**

In accordance with the provisions of Articles L.821-53 and R.821-180 of the French Commercial Code relating to the justification of our assessments, we hereby bring to your attention the following assessments which, in our professional judgment, were the most important for the audit of the financial statements for the financial year.

The assessments given are based on our audit of the annual financial statements, taken as a whole, and thus contributed to forming our opinion expressed above. We do not express an opinion on the individual elements of these annual financial statements.

1. Financial contracts that have the characteristics of credit derivatives:

Financial contracts that have the characteristics of credit derivatives are valued by the management company using financial models. The mathematical models applied are based on external data and market assumptions made by the management company. Based on the elements that led to the determining of the valuations used, we assessed the approach implemented by the management company.

2. Other portfolio financial instruments:

The assessments that we carried out focused on the appropriateness of the accounting principles applied as well as the reasonableness of the significant estimates used.

### **Specific verifications**

We have verified the information in accordance with professional standards applicable in France, and the specific verifications required by law and regulations.

We have no matters to report as to the fair presentation and the consistency with the annual financial statements of the information given in the management report prepared by the management company.

## **SYCOMORE PARTNERS**

*Statutory Auditor's Report on the annual financial statements*

*Financial year ended 31 December 2025 – Page 3*

### **Responsibilities of the management company with respect to the annual financial statements**

The management company is responsible for preparing annual financial statements that provide a true and fair view, in compliance with French legal and regulatory requirements, and implementing internal control measures that it deems necessary for preparing annual financial statements that do not contain significant misstatements, whether said misstatements are due to fraud or error.

When preparing the annual financial statements the management company is responsible for evaluating the fund's ability to continue operating, and to present in these annual financial statements, if applicable, the relative information necessary for business continuity and to apply the standard accounting policy for a going concern, unless the fund is going to be liquidated or if it is going to cease doing business.

The annual financial statements have been prepared by the Management Company.

### **Responsibilities of the Statutory Auditor relating to the audit of the annual financial statements**

#### *Audit objective and approach*

We are responsible for preparing a report on the annual financial statements. Our objective is to obtain reasonable assurance that the financial statements, as a whole, are free from material misstatement. "Reasonable assurance" means a high level of assurance but no guarantee that an audit carried out according to professional accounting standards can systematically detect any material misstatements. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As provided for in Article L. 821-55 of the French Commercial Code, our task of certifying the financial statements does not consist in guaranteeing the viability or quality of the fund's management.

As part of an audit carried out according to the applicable professional accounting standards in France, the Statutory Auditor uses their professional judgement throughout this audit. In addition:

- they identify and evaluate the risk that these annual financial statements may contain material misstatements whether due to fraud or error, establish and follow audit procedures to address these risks, and collect evidence that they deem sufficient and appropriate to form their opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, falsification, intentional omissions, misrepresentations, or circumvention of internal controls; they take note of the relevant internal controls in order to establish audit procedures that are appropriate in the circumstances, not to express an opinion on the effectiveness of these internal controls;
- They assess the appropriateness of the accounting methods used, and the reasonableness of the accounting assumptions made by the management company, as well as the information concerning it provided in the annual financial statements;
- They assess the appropriateness of the management company's application of the going concern accounting policy and, depending on the evidence collected, whether or not there is significant uncertainty as a result of events or circumstances that could affect the fund's ability to continue as a going concern. This

## INVESTMENT STRATEGY AND PROFILE

### INVESTMENT OBJECTIVE

The aim is to outperform the Bloomberg Euro Aggregate Corporate ex-Financials TR (coupons reinvested) over a minimum investment period of five (5) years, within a modified duration range of 0 to +5 and according to a socially responsible investment process.

The prospectus of the UCI fully and precisely describes its characteristics.

# SYCOMORE SELECTION CREDIT

## Accounting Principles

The annual financial statements are presented in the format provided for by ANC Regulation No. 2020-07, as amended by ANC Regulation 2022-03.

The general accounting principles apply:

- True and fair view, comparability, business continuity,
- regularity, sincerity,
- prudence,
- compliance with the permanence of methods.

The accounting method adopted for recognising income from fixed-income securities is the accrued interest method.

Purchases and disposals of securities are recognised net of expenses.

The accounting currency of the portfolio is the Euro.

The financial year is 12 months.

## Fund overview

Units	ISIN	Allocation of distributable amounts	Currency	Target investors	Subscription fee	Operating and management charges

## Asset valuation rules

Foreign currency-denominated securities, futures and options held in the portfolio are converted into the accounting currency on the basis of the exchange rates quoted in Paris on the valuation date.

The portfolio is valued whenever the net asset value is calculated and when the accounts are closed in accordance with the following methods:

## Transferable securities

**Listed securities:** at market value - including accrued interest (that day's closing price)

However, transferable securities whose price has not been recorded on the calculation day, or listed by contributors and for which the price has been adjusted, as well as securities that are not traded on a regulated market, are valued under the responsibility of the management company (or by the Board of Directors for a SICAV), at their probable trading value. Prices are adjusted by the management company based on its knowledge of issuers and/or the markets.

In view of the issuer's position, and in the absence of a liquid market and observable transaction prices, the management company therefore used a valuation of €0.00 at 31/12/2025 for the fixed income security XS1331156684 SWISSPORT INVEST 6.75% 15-31/12/2099.

There may therefore be a significant difference between the carrying amounts recognised as assets on the balance sheet as measured above and any future recoveries on these securities.

**UCIs:** at either the last known net asset value or the latest estimated value. Fund administrators confirm the net asset values of units in foreign investment funds calculated on a monthly basis. Valuations are updated weekly on the basis of estimates provided by the administrators of these funds, which are then approved by the investment manager.

**Negotiable debt securities and equivalent instruments** that are not traded in high volumes are valued using an actuarial method. The yield used is that applicable to equivalent securities, adjusted where necessary by a differential representing the issuer's intrinsic characteristics.

## Financial futures and options

**Futures:** the clearing price for the day.

The valuation of off-balance sheet items is calculated on the basis of the par value, the clearing price and, if necessary, the exchange rate.

**Options:** the closing price for the day or, failing this, the last available price.

**OTC options:** market value, based on prices provided by counterparties. These valuations are checked by the management company.

Off-balance sheet options are valued by referring to the underlying asset, taking into account the delta and price as well as any exchange rate.

**Currency forwards:** Valuation based on the daily prices of the currencies in scope. The premium/discount is then calculated depending on the maturity of the contract.

**Fixed-term deposits:** these are valued at their par value, even if they have a maturity of greater than three months. The corresponding accrued interest is then added to this amount. However, some contracts stipulate specific conditions in the event of early redemption requests in order to take into account the impact of any rise in the counterparty's financing curve. Accrued interest can then be reduced by this impact, but can't become negative. Fixed-term deposits are then valued at least at their par value.

## SYCOMORE SELECTION CREDIT

**Crédit Défaut Swaps (CDS):** The valuation price is provided by a contributor appointed by the management company. The off-balance sheet commitment for these CDSs corresponds to their par value.

### Swing pricing

Sycomore Asset Management decided to set up a swing pricing mechanism to protect the UCITS and its long-term investors from the impacts of strong inflows or outflows.

If, on any NAV calculation date, the total net subscription/redemption orders from investors on all unit classes of the Fund exceed a pre-established threshold, determined on the basis of objective criteria by the management company as a percentage of the net assets of the Fund, the NAV may be adjusted upwards or downwards to take into account adjustment costs attributable to net subscription/redemption orders respectively. The NAV of each unit class is calculated separately but any adjustment has, as a percentage, an identical impact on all the NAVs of the unit classes of the Fund. Trigger point and cost factors are determined by the management company and reviewed periodically, at least every quarter. These costs are estimated by the management company on the basis of execution fees, bid-ask spreads and any taxes applicable to the Fund.

Since this adjustment is linked to the net balance of subscriptions/redemptions within the Fund, it is not possible to accurately predict whether swing pricing will be applied at any given time in the future. This means it is also impossible to accurately predict how often the management company will have to make such adjustments. Investors should note that, as a result of swing pricing, the volatility of the Fund's NAV may not reflect only the volatility of securities held in the portfolio.

Since the one-time effect of swing pricing on the net asset value is not related to management, performance fees are calculated before the method is applied.

The policy for determining swing pricing mechanisms is available on our website, [www.sycomore-am.com](http://www.sycomore-am.com), or upon request from the management company. The application of swing pricing is at the discretion of the management company in accordance with Sycomore Asset Management's Swing Pricing Policy.

### Operating and management charges

These fees include all the expenses invoiced directly to the UCITS, except for transaction fees.

Transaction fees include intermediary fees (brokerage, stock exchange taxes, etc.) and any turnover fees that may be charged, in particular by the depositary and the management company. The following may be payable in addition to the operating and management charges:

- performance fees. These reward the asset management company when the UCITS exceeds its objectives. They are therefore invoiced to the UCITS;
- transfer commissions invoiced to the UCITS.

For further details regarding fees charged to the UCITS, please refer to the Key Information Document (KID).

## SYCOMORE SELECTION CREDIT

Fees charged to the UCITS	Basis	Rate			
		Unit Classes I and ID	Unit Classes R and R USD	Unit Class X	Unit Class MF
Financial management and administration fees and other service fees	Net assets	Maximum annual rate (including tax)			
		0.60%	1.20%	0.60%	None
Transfer commissions collected by the management company	Charge on each transaction	None			
Transfer commissions collected by the depositary	Charge on each transaction	None			
Performance fee	Net assets	10% including tax above the Bloomberg Euro Aggregate Corporate ex-Financials TR index (coupons reinvested)		None	

**Performance fee:** Starting on 1 January 2022, the outperformance fee calculation will be carried out as follows:

### Calculation method

The outperformance generated by the Fund on a given date is understood to be the positive difference between the net assets and the assets of an imaginary UCI achieving the same performance as its benchmark and recording the same pattern of subscriptions and redemptions as the actual Fund on the same date. If this difference is negative, this amount is an underperformance that will have to be recovered in the following years before being able to provision again for the outperformance fee.

### Offsetting of underperformance and reference period

As specified in the ESMA guidelines on performance fees, the reference period is “the time horizon over which the performance is measured and compared with that of the benchmark index, at the end of which the mechanism for the compensation for past underperformance (or negative performance) can be reset.”

This period is set at 5 years. This means that after more than 5 consecutive years without crystallisation, underperformances that have not been offset and date back more than five years will no longer be taken into account in the performance fee calculation.

### Observation period

The first observation period will begin with a twelve-month period beginning on 1 January 2022.

At the end of each financial year, one of the following two scenarios may apply:

- The Fund underperformed over the observation period. In this case, no fee is charged, and the observation period is extended by one year, up to a maximum of 5 years (reference period).
- The Fund outperformed over the observation period and over the financial year. In this case, the management company receives the fees for which a provision was booked (crystallisation), the calculation is reset, and a new twelve-month observation period begins

### Provisions

On each NAV calculation date, a provision is booked for the performance fee (10% of the outperformance), provided that the net assets before any performance fee exceed those of a fictitious UCI over the observation period, or a provision reversal limited to the existing allowance in the event of underperformance.

In the event of redemptions during the period, the portion of the provision corresponding to the number of shares redeemed will definitively accrue to and be deducted by the Manager.

### Crystallisation

The crystallisation period, i.e. the frequency with which the accrued performance fee, if applicable, must be paid to the management company, is twelve months.

The first crystallisation period will end on the last day of the financial year ending 31 December 2022.

## Research costs

None

## Management fee retrocessions

None

## Allocation of distributable amounts

### Definition of distributable amounts

Distributable amounts consist of:

1° Net income plus retained earnings plus or minus the balance of accrued income;

2° Realised capital gains, net of fees, minus realised capital losses, net of fees, recorded during the financial year, plus net capital gains of the same kind recorded during previous financial years and that have not been distributed or accumulated, plus or minus the balance of capital gain accruals.

### Additional information on the content of the appendix

### Terms and conditions of allocation of distributable amounts

### Allocation of net income

Accumulation for Unit Class I  
Distribution for Unit Class ID

Accumulation for Unit Class X  
Distribution for Unit Class MF

### Changes relating to the Fund

None

### Additional information on the content of the appendix

### Direct exposure to credit markets

All elements of the UCI's portfolio exposed directly to the credit markets are shown in the table.

For each element, the various ratings are recovered: rating of the issue and/or issuer, long-term and/or short-term rating.

These ratings are collected from 3 rating agencies.

## SYCOMORE SELECTION CREDIT

The rules for determining the rating used are then:

1st level: If there is a rating for the issue, this is retained to the detriment of the issuer's rating

2nd level: The second-best long-term rating is selected from those available from the 3 rating agencies (S&P, Moody's and Fitch).

If there is no long-term rating, the second-best short-term rating is selected from those available from the 3 rating agencies. (S&P, Moody's and Fitch)

If there is only one rating, it will be used.

If no rating is available, the item will be considered "Not rated".

Finally, according to the rating used, the categorisation of the item is based on market standards defining the concepts "Investment Grade" and "Non Investment Grade".
