What is this product?

Type | Undertaking for Collective Investment in Transferable Securities - Société d'Investissement à Capital Variable (SICAV), incorporated in France.

AMF classification | International equities

Term | The life of the product is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV.

Objectives | Echiquier World Next Leaders is managed in a dynamic and discretionary manner through stock-picking on international equity markets and more specifically in companies considered by the management team to be innovative and emerging global leaders (high growth potential) in traditional or burgeoning sectors.

The objective of the UCITS is to outperform its benchmark, the MSCI All Country Index Net Return (Euro) net dividends reinvested, over the recommended investment period. However, it is not the subfund's objective to replicate the performance of this index, and the portfolio's composition may therefore differ substantially from that of the benchmark index.

The UCITS implements active and discretionary management based on a rigorous stock-picking process.

The investment strategy seeks to select stocks which, according to the analysis conducted by the management company, offer the best current or potential growth, and have the criteria to be tomorrow's leaders in their area, in all regions of the world and all sectors.

At all times, a minimum of 75% of the net assets of Echiquier World Next Leaders will be invested in listed equities, with a maximum of 50% in emerging-market equities.

These will mainly be stocks with a market capitalisation of below €20 billion. The subfund may, however, invest in small caps with a market capitalisation of less than €500 million up to a limit of 10% of its net assets.

Compliance with the market capitalisation criterion is assessed at the time of the initial investment in the equities in question.

The exposure to equity risk will be a minimum of 60% with a maximum of 50% in emerging markets.

The fundamental analysis carried out by the management team is based on the following criteria:

- Analysis of the company's management;
- Quality of its financial structure
- Visibility on future earnings;
- Analysis of the financial results
- The growth prospects for its business;
- The speculative nature of the security.

The UCITS reserves the right to invest a maximum of 25% in fixed-income products.

At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Echiquier and using the ratings produced by agencies.

Eligible securities are deemed investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Derivative instruments, whether or not traded on regulated markets or over the counter, can be used on a discretionary basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The subfund does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

Allocation of distributable amounts | Accumulation

Subscription/redemption procedures | Subscription and redemption orders are centralised daily at 12 noon and executed at the net asset value calculated on the basis of the day's closing market prices. The net asset value is calculated daily with the exception of French public holidays and/or days on which the French markets are closed (official calendar of Euronext Paris S.A.)

Targeted retail investors | This product is intended in particular for retail investors who (i) have basic knowledge and limited or no experience of investing in UCIs, (ii) want an investment consistent with the investment objective and the recommended holding period of the product, and (iii) are prepared to assume a medium to high level of risk on their initial capital. The conditions concerning accessibility of the product to US Persons are defined in the prospectus.

Depositary | BNP Paribas SA

Where and how to obtain information on the product | The prospectus, the annual reports and the most recent interim documents, as well as any other practical information, and in particular where to find the most recent price of the units are available on our website www.lfde.com or upon simple written request, free of charge, at: La Financière de l'Echiquier 53 avenue d'Iéna, 75116 Paris, France.

What are the risks and what could I get in return?

Risk indicator

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to other products. It indicates the likelihood that the product will incur losses in the event of market movements or if we are unable to pay you.

We have classified this product in risk class 5 out of 7, which is a medium to high risk class. In other words, the potential losses linked to the product's future results are medium to high, and if the situation deteriorates in the markets, it is likely that the ability to pay you will be affected.

The synthetic risk indicator is based on the assumption that you hold the shares for the whole recommended investment period of five years.

The other materially relevant risks not taken into account in the calculation of the product's SRI are as follows:

- Credit risk
- Liquidity risk
- Currency risk

For more details regarding risks, please refer to the prospectus.

Performance scenarios I

The figures shown include all costs of the product itself as well as the fees due to your advisor or distributor.

What you will get from this product depends on future market performance. Future market trends may change and cannot be predicted precisely.

These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product (and the benchmark where applicable) over the past 10 years.

The stress scenario shows what you could get in extreme market situations. Markets could move very differently in the future.

What happens if La Financière de l'Échiquier is unable to pay out?

The product is set up as a separate entity to the Management Company. In the event of failure of the Management Company, the assets of the product held in custody by the depositary will not be affected.

In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. They depend on the amount you invest, the time you hold the product, and the product's return.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%);
- that for other holding periods, the product performs as indicated in the moderate scenario;
- that EUR 10,000 is invested in the first year.

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	€498	€1,480
Impact of annual costs (*)	5.04%	2.67% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 5.52% before costs and 2.86% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	We will not charge an entry fee for this product, but the person who sells you the product may apply subscription fees of 3.00% - This is the maximum amount you will pay. The person selling the product will inform you of the actual fees.	Up to EUR 300
Exit costs	We will not charge an exit cost, but the person who sells the product can do so.	EUR 0
Recurring costs charged each year		
Management fees and other administrative and operating expenses	1.65% of the value of your investment per year. This is an estimate of costs over one year taking into account changes in the UCI's pricing policy.	EUR 160
Transaction costs	0.38% of the value of your investment. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount notably varies according to the quantity we buy and sell.	EUR 37
