What is this product?

Type | Undertaking for Collective Investment in Transferable Securities - Société d'Investissement à Capital Variable (SICAV), incorporated in France.

Term | The life of the product is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV.

Objectives | Echiquier Global Flexible is a subfund that seeks to deliver a performance net of management fees equal to Compounded €STER + 6% over the recommended investment period through discretionary and opportunistic management, particularly on the fixed income, equity, credit and currency markets.

The Compounded €STER +6% index can be a representative indicator of the management of Echiquier Global Flexible. It is used solely for information purposes and is calculated in euros, dividends and coupons reinvested. Investors are advised that the portfolio's composition may differ from that of the benchmark index.

The UCITS implements an active and discretionary management strategy. Its management is based on the combination of two approaches:

- the allocation of portfolio assets between the various major liquid asset classes worldwide (equities, sovereign bonds, credit, currency, and money market).

- a rigorous securities selection process:

- on shares and bonds issued by companies (stock picking and bond picking),

- on bonds issued by governments,

- on tracker funds, ETFs and derivatives.

Investments are primarily made through subscriptions to UCIs.

The subfund may invest up to 20% of its net assets directly in equities.

Exposure to equities (directly through shares, via UCIs or derivatives) can be as high as 100% of net assets. Exposure to small caps, below €1 billion, (directly or via funds) will not exceed 30% of net assets.

Up to 30% of the fund's net assets will be exposed to emerging market equities.

The exposure to the fixed income and money markets can vary between 0% and 100% of net assets.

Up to 100% of the fund's net assets may be exposed to currency risk.

Exposure to commodities will not exceed 10% of net assets.

The fund may invest up to 100% of its assets in securities of other French and/or European UCITS.

However, the fund's exposure to volatility via futures will be limited to 10% of net assets. The amounts invested in securities with embedded derivatives cannot exceed 10% of the net assets. The fund may borrow cash up to a limit of 10%.

The UCITS may trade in derivatives, on a discretionary basis, to:

- Reduce the portfolio's exposure to equity markets, currency, interest rate and volatility risks.

- Expose the portfolio to the currency, interest rate, equity and volatility risks. The fund does not, in any event, intend to implement a strategy of over-exposing the portfolio to these different risks.

Distributable sums allocation | Accumulation

Subscription/redemption procedures | Subscription and redemption orders are centralised daily at 12 noon and executed at the net asset value calculated on the basis of the day's closing market prices. The net asset value is calculated daily with the exception of French public holidays and/or French markets closed (official calendar of Euronext Paris S.A.)

Targeted retail investors | This product is intended in particular for retail investors who (i) have basic knowledge and limited or no experience of investing in UCIs, (ii) want an investment consistent with the investment objective and the recommended holding period of the product, and (iii) are prepared to assume a low to medium level of risk on their initial capital. The conditions concerning accessibility of the product to US Persons are defined in the prospectus.

Depository | BNP Paribas SA

Where and how to obtain information on the product | The prospectus, the annual reports and the most recent interim documents, as well as any other practical information, and in particular where to find the most recent price of the units are available on our website www.lfde.com or upon simple written request, free of charge, at: La Financière de l'Echiquier 53 avenue d'Iéna, 75116 Paris, France.

What are the risks and what could I get in return?

Risk indicator

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to other products. It indicates the likelihood that the product will incur losses in the event of market movements or if we are unable to pay you.

We have classified this product in risk class 3 out of 7, which is a low to medium risk class. In other words, the potential losses linked to the product's future results are low to medium and, if the situation deteriorates on the markets, it is unlikely that our ability to pay you will be affected.

 The synthetic risk indicator is based on the assumption that you hold the shares for the whole recommended investment period of five years.

The other materially relevant risks not taken into account in the calculation of the product's SRI are as follows:

- Credit risk
- Liquidity risk
- Counterparty risk

For more details regarding risks, please refer to the prospectus.

What happens if La Financière de l'Échiquier is unable to pay out?

The product is incorporated as a separate entity to the Management Company. In the event of failure of the Management Company, the assets of the product held by the custodian will not be affected.

In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. They depend on the amount you invest, the time you hold the product, and the product's return.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%);
- that for other holding periods, the product changes as indicated in the moderate scenario;
- that EUR 10,000 is invested in the first year.

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	€513	€1,783
Impact of annual costs (*)	5.20%	3.19% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 5.76% before costs and 2.57% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:
