Website of the manufacturer: www.carmignac.com

Date of production of the KID : 19/12/2025

WHAT IS THIS PRODUCT?

TYPE

Carmignac Credit 2031 is a French common fund (Fonds Commun de Placement – FCP), governed by European Directive 2009/65/EC (UCITS)

TERM

The fund was launched on 31st December 2024 for a period of 99 years, except in the cases of early dissolution or extension.

OBJECTIVE

The investment objective is to deliver annualised performance, net of fees, in excess of 2,98%, measured from the Fund creation date (31/12/2024) to 31/10/2031 (the “Maturity Date”). This performance, mainly generated through a bond buy & hold strategy, is expressed net of management fees, currency hedging fees, estimated defaults and potential capital losses made when reselling certain instruments prior to maturity. This objective is based on the market assumptions made by the manager when the Fund is launched, and only applies to subscriptions at this time. For subsequent subscriptions, performance will depend on market conditions at that time, which we cannot predict and which may therefore result in divergent performance. This objective does not constitute a promise of returns. Issuers' actual financial situation may be worse than expected and this may adversely affect the fund's performance.

The investment strategy consists in creating a diversified portfolio of debt securities and securitisation instruments to be held until the Maturity Date. The portfolio may be made up of securities of any maturity, including those maturing after the Fund's Maturity Date. The portfolio's weighted average rating at the end of the creation phase will be at least investment grade. A financial instrument whose rating worsens over the fund's lifecycle will not necessarily be sold. As such, the portfolio's weighted average rating may fall (including below investment grade) if one or more of the securities in the portfolio has its rating downgraded. While the portfolio thus created is intended to be held until the Maturity Date, the portfolio manager reserves the right to buy or sell the securities therein, especially if they expect the security's risk profile to deteriorate or identify an investment opportunity in line with the fund's objective and strategy. However, no new investment may cause the portfolio's weighted average rating to fall below investment grade. As the Maturity Date draws near, the fund will adopt a prudent management approach during the divestment phase. Securities will be kept until they mature or, especially in the case of securities maturing later than the fund, resold.

The fund may invest up to 110% of its net assets in bonds from the private or public sector, with no restrictions as regards sector or geographic region (up to 30% outside OECD countries, including emerging markets); high yield bonds may account for up to 50% of net assets. The fund may also invest up to 40% of its net assets in securitisation instruments such as collateralised loan obligations (CLO). The portfolio's direct and indirect exposure to credit risk, including exposure incurred through the use of futures, shall not exceed 120%. The Fund's duration ranges between 0 and 7. This duration will decrease over time and will be no more than 2 at the end of the buy & hold period.

Prior to the Maturity Date, and depending on prevailing market conditions, the management company will opt either to continue a similar investment strategy with a new target maturity date, or to merge the fund with another UCITS, or to wind up the fund, subject to AMF approval.

The fund has no reference indicator. The fund is an actively managed UCITS. The investment manager has discretion over the composition of the portfolio, subject to compliance with the investment objective and the investment policy.

INTENDED RETAIL INVESTOR

Due to the fund's maturity date, this fund is suitable for investors who do not plan to withdraw their money before 31st October 2031, and whose goal is to grow their investment without any capital guarantee.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

OTHER INFORMATION

Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 13:00 CET/CEST and are executed on the next business day using the previous day's NAV.

These units are accumulation units.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website www.carmignac.com, directly from the manufacturer or on the website www.fundinfo.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Lower risk

Higher risk

The recommended investment period is from the launch date to the maturity date, i.e. 31 October 2031.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Risks not sufficiently considered by the indicator include:

- Credit risk: the fund is invested in securities whose credit rating may decline, meaning there is a risk that the issuer may not be able to meet its commitments. Should an issuer's creditworthiness deteriorate, the value of the financial instruments linked to this issuer may fall.
- Liquidity risk: the markets in which the fund participates may occasionally be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the fund may be caused to liquidate, initiate or modify its positions.
- Counterparty risk: the fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- Risk linked to the impact of techniques such as the use of derivatives: the use of derivatives may lead to certain risks of loss specific to such strategies.

If the fund is denominated in a currency other than the official currency of the country where the fund is being marketed, the return, when expressed in the official currency of the country where the fund is being marketed, may change depending on currency fluctuations.

The summary risk indicator shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class.

PERFORMANCE SCENARIOS

The unfavourable, moderate and favourable scenarios shown represent examples using the best and worst performance, as well as the average performance of the product over the last ten years. Markets may develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Recommended holding period:		5 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	8 530 EUR	8 450 EUR
	Average return each year	-14.70%	-3.31%
Unfavourable	What you might get back after costs	9 250 EUR	10 100 EUR
	Average return each year	-7.50%	0.20%
Moderate	What you might get back after costs	10 340 EUR	11 100 EUR
	Average return each year	3.40%	2.11%
Favourable	What you might get back after costs	11 410 EUR	14 010 EUR
	Average return each year	14.10%	6.98%

The "after five years" scenarios from the creation date are calculated up to the fund's Maturity Date.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- The unfavourable scenario occurred for an investment between February 2016 and February 2021.
- The moderate scenario occurred for an investment between June 2017 and June 2022.
- The favourable scenario occurred for an investment between December 2019 and December 2024.

WHAT HAPPENS IF CARMIGNAC GESTION S.A. IS UNABLE TO PAY OUT?

The fund is a co-ownership of financial instruments and deposits separate from the management company. In the event of the latter's default, the product's assets held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the fund.

There is no compensation or guarantee system in place that would fully or partially offset this loss.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that these costs will have on your investment.

Cost over time

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 EUR. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 5 years
Total costs	107 EUR	608 EUR
Annual cost impact (*)	1.1%	1.1% each year

*The Reduction in Yield (RIY) illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3,2% before costs and 2,1% after costs. The total costs take into account one-off, ongoing and incidental costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0,94% of the value of your investment per year. This is an estimate.	94 EUR
Transaction costs	0,13% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.	13 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

The recommended investment period is until the Maturity Date, i.e. 31 October 2031.

However, you can redeem your investment without incurring any penalties at any point during this period.

Redemptions are possible each business day. In exceptional circumstances, your right to request the redemption of your investment may be suspended.

The management company reserves the right to introduce caps on redemption requests ("gates") in order to spread redemptions across several NAV dates where such redemption requests exceed the 5% threshold (net redemptions of subscriptions expressed as a percentage of the Fund's net assets). The management company has also instituted a mechanism for adjusting the net asset value ("swing pricing") in order to limit the cost of reorganising the portfolio following significant movements in liabilities, in order to protect the interests of unitholders. The net asset value may therefore be adjusted by a swing factor when, on a given date, the total of net subscriptions, conversions and redemptions exceeds a certain threshold defined by the management company.

HOW CAN I COMPLAIN?

If you have any complaints about this product or the manufacturer's conduct, you can use different means of communication: you can lodge them by email to complaints@carmignac.com, by post to 24 Place Vendôme, 75001 Paris, France, or by telephone on (+33) 01 42 86 53 35.

In all cases, you must clearly state your contact details (name, address, telephone number and email address) and give a brief explanation of your complaint. More information is available on our website www.carmignac.com.

If there is no response within two months or if you consider the response provided by Carmignac Gestion unsatisfactory, you can contact the AMF Ombudsman by letter or using the online form (<https://www.amf-france.org/en/amf-ombudsman>).

OTHER RELEVANT INFORMATION

The fund may comprise other types of unit. You can find more information on these units in the prospectus or on the website: www.carmignac.com.

This fund's units have not been registered under the US Securities Act of 1933. They may not be offered or sold, directly or indirectly, to or on behalf of a US person as defined in US Regulation S and FATCA. Depending on your tax status, any capital gains and income resulting from the ownership of units of the fund may be subject to tax. We advise you to obtain further information in this regard from the promoter of the fund or from your tax advisor.

The manufacturer may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus.

The product complies with the provisions of Article 8 of the Financial Services Sustainability Disclosure Regulations ("SFDR"). For further information, please refer to the fund prospectus.

Monthly history of performance scenarios and past performance: <https://go.carmignac.com/performance-scenario>

Please note that the target return of the fund could be lower than inflation during the period until the end of the product strategy, in which case your actual return would be negative.

When this product is used as a unit-linked support for a life insurance or capitalization contract, the additional information on this contract, such as the costs of the contract, which are not included in the costs indicated in the this document, the contact in the event of a claim and what happens in the event of failure of the insurance company are presented in the key information document of this contract, which must be provided by your insurer or broker or any other intermediary of insurance in accordance with its legal obligation.
