What is this product?

Type

The Fund is a sub-fund of the Company, a UCITS authorised by the Central Bank, and this KID describes the share class above and the Fund.

Term

The Fund has no fixed maturity date, however it may be terminated in certain circumstances described in the Prospectus, including if the Net Asset Value ("NAV") of the Fund falls below US\$50 million. This share class may be terminated where its NAV falls below US\$10 million.

Objectives

Investment Objective

The Fund aims to provide investors with income and capital growth over a medium to long-term period by investing predominantly in bonds issued by companies and governments worldwide.

Investment Policy

To achieve this, the Investment Manager evaluates the expected risk and return of each individual issuer in the Portfolio. Metrics such as yield, or yield spread to government bonds with a similar maturity date will be analysed to assess expected returns. The investment philosophy is to buy securities in which the expected returns overstate the risks, benefitting from income and capital appreciation either by holding the security to redemption or through selling the security at a higher price when the implied risk of default as determined by the market is equal to the Investment Manager's assessment of the risk.

The Fund typically aims to create returns through a long exposure. However, it may apply a 'long-short strategy' whereby, in addition to buying and holding assets, it may use derivatives (ie instruments whose prices are dependent on one or more underlying asset ('FDI') to take 'short' positions whereby the Fund may make money in respect of issuers whose securities the Fund believes to be overvalued or expects to fall in value.

The Fund will invest at least 80% of its Net Asset Value in fixed and floating rate government, corporate or securitised bonds denominated in USD (or in other currencies and hedged back to USD) issued by governments, government agencies, supra-national and corporate issuers worldwide listed or traded on markets globally. The Fund will invest across the full range of capital structures from senior secured to subordinated bonds (senior securities holders will always be first to receive a payout from a company's holdings in the event of default whereas subordinate status means they only are paid out after senior bonds).

The Fund may also invest in a number of other assets including currencies, money market instruments, mortgage backed securities, asset backed securities (including collateralised loan obligations and collateralised mortgage obligations), equities and other fixed income investments, eligible collective investment schemes and other liquid assets. The Fund may also invest in bonds that are convertible from debt to equity upon the occurrence of a trigger event (CoCos).

The Fund's investments will not be limited by geographical sector. The Fund may invest in emerging markets and such investment is not expected to exceed 40% of its Net Asset Value. There is no limit to the extent the Fund may gain exposure to non-investment grade securities.

The Fund may actively use FDI to achieve its investment objective, for efficient portfolio management purposes and for hedging against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.

The Fund may increase its holdings of cash and other liquid assets in times of exceptional market circumstances or where it is of the opinion that there are insufficient investment opportunities.

The Fund is actively managed and no benchmark is used as a universe for the selection of investments or for performance comparison purposes.

Share Class Policy

Any income earned on investments will be added to the value of investors' shares.

The Fund's reference currency is USD. The Fund will use FDI to provide investors with a similar return to any share class issued in the working currency of the Fund (USD).

Investors can buy and sell their shares on each Dealing Day of the Fund.

What happens if Man Asset Management (Ireland) Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the PRIIPs Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). If the Fund is not able to pay out what you are owed, you are not covered by any investor compensation or guarantee scheme and you may face financial loss. There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
