Appendix VI - Sustainable Finance Disclosure (Unaudited)	528

General Information

The following information is derived from and should be read in conjunction with the full text and definitions section of the Prospectus.

Muzinich Funds (the "Fund") was constituted on 8 May 1998 as an open-ended umbrella unit trust.

The Fund is authorised and regulated by the Central Bank of Ireland (the "Central Bank") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "UCITS Regulations").

At 30 November 2024, the Fund was comprised of 20 active Sub-Funds (the "Sub-Funds"). Two of these funds are not authorised in Switzerland and have therefore been deleted from the following list. The names and launch dates are as follows:

Sub-Fund	Launch Date
Muzinich Americayield Fund	13 May 1998
Muzinich Europeyield Fund	15 June 2000
Muzinich Global High Yield Low Carbon Credit Fund	25 July 2003
Muzinich Enhancedyield Short-Term Fund	26 November 2003
Muzinich ShortDurationHighYield Fund	4 October 2010
Muzinich Sustainable Credit Fund	14 May 2011
Muzinich LongShortCreditYield Fund	19 June 2012
Muzinich EmergingMarketsShortDuration Fund	22 July 2013
Muzinich Global Tactical Credit Fund	13 November 2013
Muzinich Asia Credit Opportunities Fund	11 November 2015
Muzinich Emerging Market Corporate Debt Fund	2 May 2017
Muzinich European Credit Alpha Fund	31 October 2017
Muzinich High Yield Bond 2028 Fund	24 September 2018
Muzinich Global Short Duration Investment Grade Fund	9 July 2019
Muzinich Dynamic Credit Income Fund	28 April 2022
Muzinich Global Fixed Maturity 2027 Fund	20 April 2023
Muzinich Global Market Duration Investment Grade Fund	26 January 2024
Muzinich Global Fixed Maturity 2028 Fund	11 April 2024

There is no cross liability between the Sub-Funds.

^{**} Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.

^{***} Muzinich Global Market Duration Investment Grade Fund launched on 26 January 2024.
**** Muzinich Global Fixed Maturity 2028 Fund launched on 11 April 2024.

Prices

The prices for buying and selling Units in the Sub-Funds are represented by the Net Asset Value ("NAV") per Unit. A subscription fee not exceeding 5% of the NAV per Unit may be added to the total subscription amount and the resultant sum shall be rounded up to the nearest cent. The subscription fee shall be paid to Muzinich & Co. (Ireland) Limited (the "Manager"), or to any placing or sales agent, or agents or distributors appointed by the Manager, for its or their absolute use and benefit and shall not form part of the net assets of the relevant Sub-Fund.

The Manager may at its sole discretion waive such fee or fees or differentiate between applicants as to the amount of such fee or fees within the permitted limits.

Dealing

The Dealing Day for all Sub-Funds is each Business Day. Applications for subscriptions for all Sub-Funds must be received by the Administrator at its registered office no later than 4.00pm (Irish time) on the relevant Dealing Day. Requests for redemptions of Units in all Sub-Funds with the exception of Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund must be received by the Administrator at its registered office no later than 4.00pm (Irish time) on the relevant Dealing Day. For Muzinich LongShortCreditYield and Muzinich European Credit Alpha Fund requests for redemptions must be received by the Administrator at its registered office no later than 4.00pm (Irish time) one Business Day prior to the relevant Dealing Day.

Any application received after the time aforesaid shall be deemed to be made in respect of the next Dealing Day following such relevant Dealing Day. The deadline for receipt of subscription monies is 4.00pm (Irish time), three Business Days after the relevant Dealing Day.

Application and redemption requests should be addressed to the Administrator:

State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

Tel: +353-1-853-8693 Fax: +353-1-523-3710

Distributions

The Manager will determine the distribution policy of each Class of Units in accordance with the criteria as set out in the Supplement of the Sub-Fund. The distributions will normally be payable twice a year, in or around June and December in each year. Income Units which have a distribution frequency designated in the name of the Units, such as "(Monthly)" or "(Quarterly)", will declare dividends in accordance with their applicable frequency. Dividends may be declared monthly or quarterly, on the last Business Day of the month, unless otherwise set out in the relevant Supplement. Please refer to Note 10 for total distributions made by each Sub-Fund during the financial year.

The following table illustrates the distributions that were paid over the last 2 financial years by each Sub-Fund:

^{*} This distribution was declared after the financial year end and has not been included as a liability in these financial statements.

For distributing Unit Classes that have launched and terminated during the financial year please refer to the Note 21 of the financial statements.

Dealings with Connected Persons

Regulation 43(1) of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is a) conducted at arm's length; and b) in the best interest of the Unitholders of the UCITS".

As required under UCITS Regulation 78.4, the Directors, as responsible persons, are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Significant events during the financial year

Details of any significant events during the financial year are disclosed in Note 21 to the financial statements.

Significant events after the financial year end

Details of any significant events after the financial year end are disclosed in Note 22 to the financial statements.

^{**} This Unit Class terminated on 27 February 2023 and re-launched on 29 February 2024. Prior to the termination there weren't any distribution disclosed for this class.

^{****} Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.

^{*****} Muzinich Global Market Duration Investment Grade Fund launched on 26 January 2024.

^{******} Muzinich Global Fixed Maturity 2028 Fund launched on 11 April 2024.

Corporate Governance Code

Statement of Compliance

The Board of Directors of the Manager has adopted in full the voluntary Code of Corporate Governance for Collective Investment Schemes and Management Companies issued by Irish Funds ("IF"), the text of which is available from the IF website, "http://www.irishfunds.ie". The Fund has been in compliance with the Corporate Governance Code during the financial year ended 30 November 2024.

Statement of Responsibilities of the Manager

The Manager of the Fund is required by the UCITS Regulations to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Fund at the end of that period, the profit or loss and the movement in net assets attributable to Unitholders resulting from operations for the period then ended. In preparing these financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are prudent and reasonable;
- state whether the financial statements have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in operation.

The Manager is also required to manage the Fund in accordance with the Trust Deed and the UCITS Regulations. The Manager is also responsible with respect to its duties under the Unit Trusts Act, 1990 for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the UCITS Regulations the assets of the Fund shall be entrusted to the Depositary for safe-keeping. The Manager has appointed State Street Custodial Services (Ireland) Limited to act as Depositary for the Fund.

Muzinich & Co. (Ireland) Limited

Report of the Depositary to the Unitholders of Muzinich Funds

We have enquired into the conduct of the Manager in respect of the Muzinich Funds (the "Trust") for the financial year ended 30 November 2024, in our capacity as Depositary to the Trust.

This report including the opinion has been prepared for and solely for the Unitholders of the Trust as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the Unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and (ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Trust has been managed during the year in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Depositary by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited 78 Sir John Rogerson's Quay Dublin 2 Ireland

Date: 20 March 2025

Investment Manager's Report for the financial year ended 30 November 2024

Financial Markets in the Period

Global credit generated primarily positive returns across the board for the reporting period (1 December 2023) to 30 November 2024). While spreads tightened over the period, the dominant driver of returns was rising government yields. During this time, we saw resilient macroeconomic data and markets navigating concerns stemming from political uncertainty in the US ahead of the presidential election. Following the highly anticipated elections in the US, corporate credit gained. US Treasury yields fell more at the longer end than at the front end; a trend typically observed when markets perceive that near term central bank rate cuts are already fully priced in. With the likely focus of the incoming administration on pro-growth policies, fiscal expansion, and protective trade measures, US and European risk appetites diverged with spreads grinding notably tighter in the US - particularly in high yield - while moving wider in Europe. We also saw divergence in the rates market, with the yield on the German 10-year falling as the market moved to price more rate cuts from the European Central Bank in response to a weaker economic outlook. In the US, Treasury yields fell by a much smaller margin. Q3 earnings, largely completed at the close of the reporting period, also showed notably weaker earnings in Europe (particularly in the underperforming automotive sector) than in the US. Emerging Market (EM) debt gained on tightening spreads at the close of the reporting period, driven by positive sentiment surrounding the US presidential election. Government bond yields moved lower globally, creating a favorable environment for EM assets as investors sought higher yields in a declining rate environment.

References to returns refer to gross returns. Net returns will be reduced by fees and expenses and will vary by unit class. Reference returns refer to returns in the base currency of each Fund relative to a currency-similar market indicator.

Muzinich Americayield Fund

In this environment, the Fund generated strong positive returns and comfortably outperformed its indicative index, the ICE BofA B/BB US Non-Financial Cash Pay High Yield Constrained Index (JC4N). We maintained the Fund as fully invested as practicable to capture the benefits of the higher yield and positive convexity of high yield bonds. On a sector basis, strong credit selection of telecommunications, cable/satellite TV, and homebuilders/real estate bonds bolstered returns, as did our off-benchmark exposure to diversified financial services. Conversely, a relative underweight of healthcare bonds acted as a drag on relative performance. By duration, performance benefitted from strong credit selection across the core 1-5 years duration range, with the Fund's largest duration cohorts outperforming the reference index. During the latter part of the reporting period, the Fund meaningfully benefitted from significant weight at the front end of the curve, which outperformed as rates steepened. From a relative rating perspective, our strong credit selection of BB- rated bonds and both strong credit selection and an overweight of B+ and single-B rated credit bolstered returns.

Muzinich Europeyield Fund

In this environment, the Fund generated positive returns and outperformed the indicative ICE BofA BB-B European Currency Non-Financial High Yield Constrained Index (HP4N). On a sector basis, the Fund benefitted most significantly from strong credit selection and an underweight of technology and automotive & auto parts bonds, as well as our off-benchmark exposure to banking bonds. Conversely, exposure to select homebuilders/real estate bonds acted as a drag. From a duration perspective, strong credit selection and an underweight of 3-5 years duration bonds benefitted relative returns. By region, strong credit selection and an underweight stance in the European periphery and the US bolstered returns, while exposure to select Eastern European bonds detracted. Over the reporting period, we have maintained a high level of carry while tweaking a small part of the portfolio to reduce cyclicality and idiosyncratic risk. We have begun to reduce our exposure to automotives as we believe the yields offered may not be commensurate with the fundamental challenges ahead for that sector. During the latter part of the reporting period, we also reduced exposure to corporate hybrids as we view the pick-up in spreads between senior bonds (mostly investment grade rated) and subordinated bonds as unattractive versus historical levels. At this time, we prefer to invest in new bond issues with fixed maturity and no hypothetical extension risk.

Investment Manager's Report for the financial year ended 30 November 2024 cont/d...

Muzinich Global High Yield Low Carbon Credit Fund

In this environment, the Fund generated positive returns but underperformed its indicative reference index, the ICE BofA Global High Yield Constrained Index (HWOC). For the reporting period, all regions generated positive total returns, with notable outperformance from the European periphery. Conversely, on a relative basis, exposure to select Latin American bonds detracted vs. the index. At the sector level, the Fund benefitted from strong credit selection in banking, technology, and containers, and insurance - all generally low-carbon sectors - while exposure to select homebuilders/real estate bonds acted as a drag on relative performance. Notably, we also lost ground vs. the index this year in some sectors which are less attractive given the Fund's ESG targets, notably energy and metals and mining. From a relative rating perspective, strong credit selection and an underweight of BB+ rated credit most meaningfully benefitted performance. On an absolute rating basis, positive contributions were led by the BB rated cohort and B+ rated credit (where the Fund is also overweight). By duration, strong contributions from the core 3-5 years duration segment contributed to positive returns. At the close of the reporting period, the Fund's overweight in euro-denominated securities worked slightly in its favor. The overall duration of the Fund ended the reporting period in line with the reference index.

Muzinich Enhancedyield Short-Term Fund

During the reporting period, the Fund generated positive returns and comfortably outperformed its indicative ICE BofA German Federal Government (1 to 3 years) Index (G1D0). All regions contributed to returns over the year, with Fund performance primarily driven by the core allocations to the US and Europe. We also saw notable contributions from our exposure to the European periphery and Asia (ex. Japan). In this strong period for credit, positive contributions to absolute performance came from across all sectors, with particularly strong performance from some of the portfolio's higher-yielding sectors such as banking, diversified financial services, and homebuilders/real estate. By rating, the top contributors to positive returns for the period came from investment grade holdings (which benefitted from our BBB bias), and the portfolio's higher rated allocations in high yield. Contributions from all duration segments benefitted total returns, with relative outperformance bolstered by our 3-5 years duration allocation. Given the divergence between US and European credit in response to the US presidential election result in November, we increased exposure to USD holdings and reduced exposure to euro-denominated credit. At the close of the reporting period, we trimmed our real estate exposure with gains locked in following strong performance for the period.

Muzinich ShortDurationHighYield Fund

Over the reporting period, the Fund (or "SDHY") generated attractive positive returns just below those of the shorter duration segment of the BB-B US high yield market. We maintained the Fund as fully invested as practicable to capture the benefits of the higher yield and positive convexity of short duration bonds. On a sector basis, the top contributors to absolute performance were energy, diversified financial services, and homebuilders/real estate, while no sector detracted. From a duration perspective, contributions across the core 0-3 years duration range meaningfully bolstered total returns. By rating, the single-B rated cohort and BB- rated bonds led positive contributions to absolute performance. During the latter portion of the reporting period, we shifted to a single-B rating bias with favorable results. Post-election, we began to moderately increase risk in the portfolio, as we believe high yield in general will be a beneficiary of the new administration's focus on economic growth, lower taxes, and deregulation. Specifically, we began to increase exposure to diversified financials in the B+ rated category and to spectrum-secured telecommunications in the B- rated area. As of the end of the reporting period, the five largest sectors in the Fund by weighting are energy, diversified financial services, homebuilders/real estate, services, and telecommunications.

Muzinich Sustainable Credit Fund

The Fund generated positive performance and comfortably outperformed its indicative market, the Bloomberg Barclay's Global Aggregate Corporate Total Return Index hedged EUR (LGCPTREH). Over the reporting period, the Fund benefitted from its shorter duration bias relative to the index, as well as our allocation to high yield credit. At the regional level, strong credit selection and the overweight position in Western Europe

Muzinich Sustainable Credit Fund cont/d...

meaningfully contributed to both relative outperformance and absolute returns. Within this allocation, our holdings were heavily tilted towards BBB rated credit and higher yielding sectors, which saw some of the strongest performance over the reporting period. On a sector basis, the Fund's higher-beta allocations in banking, diversified financial services, and automotives & auto parts benefitted performance, as did an overweight and strong credit selection of homebuilders/real estate bonds. During the reporting period, we saw the Fund's blend of investment grade and high yield bonds work particularly well; credit selection in the BBB cohort was a notable contributor, as was the selection and allocation into "higher quality" (BB+) high yield. By duration, strong credit selection across the 1-5 years duration range bolstered performance, while exposure to select 5-7 years duration bonds acted as a drag on relative performance. No duration bucket detracted from absolute returns during this period.

Muzinich LongShortCreditYield Fund

In this strong year for US high yield, the Fund delivered attractively and steadily, gaining each and every month over the period while the market saw volatility, but underperforming the US high yield market overall as represented by the ICE BofA Merrill Lynch US Cash Pay High Yield index (J0A0). Fund gains were comprised of market-beating returns in the Fund's Core Long positions and incremental contributions from the Fund's Arbitrage book, partially defrayed through losses in individual credit shorts and portfolio level hedging positions - although these techniques helped protect the portfolio during the period's market declines. Overall, the Fund achieved its returns with less than half the volatility of the market, outperforming - and even gaining - when the market declined, but also participating with more restraint during the market's most significant risk-on increases. As already noted, Core Long holdings outperformed the market on a return basis and on a contribution basis, though our exposure to this book was approximately 90% of NAV across the period. By industry, virtually all long sectors were positive, with contributions led by an extended rally in banking paper that had underperformed in 2023, and strong local returns in energy-a sector we weighted more heavily in 2024. Small allocations to broadcasting, consumer-products, utilities, chemicals, and diversified financials all punched well above their weight through strong selection. We estimate that our current beta to the market at the end of the fiscal year is approximately 35% as we anticipate some continued volatility post US elections amidst snug valuations.

Muzinich EmergingMarketsShortDuration Fund

In this environment, the Fund generated positive returns and outperformed its reference index, the ICE BofA Emerging Market Short Duration Index (Q690). This was a strong period of performance for the Fund, both on a relative and absolute basis. Total returns benefited from spread tightening and carry from the front end of the curve, as well as rising government yields. All regions generated positive total returns, with Asia (ex. Japan) as the strongest performer on both an absolute and relative basis. Within Asia, China was the largest contributor to both total and relative returns driven by security selection. On a relative basis, Latin America underperformed towards the end of the reporting period as investors recalibrated to address uncertainty regarding Mexico (given the incoming Trump administration in the US), and the sincerity of the Brazilian administration's fiscal austerity. In Eastern Europe, falling policy rates benefitted our predominantly investment grade holdings in the region. At a sector level, the Fund's largest market allocations-energy and banking-delivered strong performance on both an absolute and relative basis. On a relative sector basis, an underweight of quasi & foreign government bonds and strong credit selection of consumer products bonds additionally bolstered returns. Conversely, our more conservative positioning in homebuilders/real estate acted as drag vs. the reference index, as did a relative underweight of metals/mining bonds (where the Fund is underweight on valuation grounds). High yield credit outperformed investment grade for the reporting period—driven by its high coupon and less sensitivity to rising interest rates. The Fund's strong credit selection and overweight of BB- rated credit most meaningfully benefitted both absolute and relative performance.

Muzinich Global Tactical Credit Fund

In this environment, the Fund generated strong positive returns, outperforming its performance target, the US 3 Month Treasury Bill +3%. The Fund underperformed its indicative reference index, the ICE BofA Global Corporate and High Yield (GI00). Over the reporting period, we decreased our cash and Treasury positions and invested in global corporate credit. The Fund's allocations to high yield and floating-rate paper significantly contributed to portfolio returns. Conversely, the Fund's style avoidance of lower-rated high yield (CCC rated) was an opportunity cost in a period during which CCCs outperformed BB/B-rated bonds. Our allocation to European investment grade notably outperformed its benchmark due to our focus on BBB-rated bonds and subordinated credit. On an absolute sector basis, our allocation to banking meaningfully contributed to returns, as did the other larger sector exposures including energy, financial services, and homebuilders/real estate. US Treasury holdings were inefficient during this time, as yields rose over the period. Portfolio duration decreased over the reporting period (although remains well above the Fund's longer-term average). This was achieved by our decision to significantly reduce exposure to the 10+ years duration bucket.

Muzinich Asia Credit Opportunities Fund

In this environment, the Fund generated positive returns and outperformed its reference index, the ICE BofA Asian Dollar Index (ADOL). In what was broadly a strong period for credit, all regions generated positive returns. The best performing regions were Singapore, Macau, China, and the Philippines. While exposure to South Korea acted as a drag on total returns, our strong selection led to outperformance in this region vs. the reference index. As credit spreads tightened across investment grade and high yield-but to an appreciably greater extent for high yield-the Fund's overweight in high yield credit bolstered returns. During this time, BBcredit was the leading contributor to relative outperformance due to strong credit selection and an overweight allocation. The Fund's lack of exposure to CCC rated credit, however, acted as a drag on relative performance as "lower quality" high yield credit rallied. By sector, strong credit selection and an overweight in banking and diversified financial services most meaningfully bolstered returns. This was further augmented by an underweight in quasi sovereigns and strong credit selection in capital goods. Conversely, the Fund's relative underweight in metals/mining and more conservative positioning in homebuilders/real estate acted as a drag vs. the reference index. No duration bucket detracted from relative or total returns for the reporting period. The Fund benefitted most meaningfully from strong credit selection across the core 1-7 years duration range, while strong credit selection of 10+ years duration paper more than compensated by our relative underweight positioning.

Muzinich Emerging Market Corporate Debt Fund

During this reporting period, the Fund generated positive returns and comfortably outperformed its reference index, the ICE BofA Emerging Market Corporate Liquid Index (EMCL). All regions generated positive total returns, led by Asia (ex. Japan) as we saw some green shoots in China suggesting that policy stimulus is beginning to feed into the system. At the close of the reporting period, while some underperformance came from Hong Kong-primarily due to the Fund's underweight in more interest rate-sensitive securities-this was offset by strong outperformance of our holdings in India due to lack of exposure to a company under scrutiny by the US regulator. Latin America also contributed meaningfully to absolute returns over the reporting period. At the sector level, energy was the greatest contributor to total returns and the largest sector exposure. On a relative sector basis, capital goods and banking outperformed vs. the benchmark, while the Fund's underweight in metals & mining bonds acted as a drag. From a duration perspective, strong credit selection of 1-3 years duration bonds most meaningfully bolstered returns. By rating, an overweight and strong credit of BB- rated credit led relative outperformance for the period.

Muzinich European Credit Alpha Fund

The Fund generated strong positive returns, however, with a relatively low beta to the European high yield market, did not quite capture all the gains expressed in the ICE BofA BB/B European High Yield Index (HEC4). During this time, the high yield asset class generated healthy positive returns, despite macro volatility around the potential effects of the US presidential election for Europe. We view the stability of high yield, decoupling

Muzinich European Credit Alpha Fund cont/d...

from equity volatility, as a reflection of the strength of the current technical, underpinning our expectation of carry-like returns at this time. The asset class received sizeable inflows over the reporting period, while the universe has decreased in size due to Rising Stars outpacing Fallen Angels; in short, there has been more cash chasing fewer bonds. At the close of the reporting period, while the Overlay acted as a modest headwind due to a combination of hedges losing value and single name shorts, this was mostly offset by continued strong performance of the Arbitrage Book on the back of several trades that performed well. At the close of the reporting period, we are keeping beta around 0.7x. However, with spreads at the tighter end of the range, the scope for above-carry returns from spread tightening is more limited. We therefore want to maintain meaningful downside protection here, to invest more aggressively if spreads widen. We note that it has rarely (if ever) been cheaper for us to hedge a portion of our carry due to the unique current market setup. Yields are still somewhat elevated, meaning carry is relatively high, but spreads are tight and implied volatility is low (i.e., the credit options we use to hedge cost us less of our carry). We can therefore achieve downside protection if spreads widen from current tight levels, at low cost in terms of carry, which provides an excellent market backdrop for ECA's strategy.

Muzinich High Yield Bond 2028 Fund

During the reporting period, the Fund generated strong, positive returns. By sector, homebuilders/real estate was the biggest contributor to performance, followed by banking diversified financial services, and automotive & auto parts. No sector detracted from returns. By rating, the Fund's BBB and BB- rated bonds most meaningfully outperformed. By duration, with a healthy portion of the Fund in the 0-3 year duration-to-worst segment (given the Fund's fixed maturity mandate), the portfolio was well positioned to be somewhat insulated from rate moves during the reporting period. We maintain our conviction that high yield strategies, particularly those with shorter duration, are well positioned for this environment as ample liquidity/low defaults and historically strong credit quality bode well, despite the potential for continued near term volatility.

Muzinich Global Short Duration Investment Grade Fund

The Global Short Duration Investment Grade Fund generated positive returns and comfortably outperformed its indicative ICE BofA German Federal Government (1 to 3 years) Index (G1D0). While positive returns came from all sectors on an absolute basis, notably strong performance was led by some of the portfolio's largest sector exposures including banking, diversified financial services, and homebuilders/real estate. By rating, strong credit selection led to outperformance from the Fund's BBB and BBB+ rated selections where we continue to identify undervalued opportunities due to our focus on fundamental credit analysis. The Fund's small high yield allocation provided an additional performance boost given the sub-asset class's lower sensitivity to rates. In terms of duration, holdings across the core 0-3 years duration range were most beneficial to returns, while no duration bucket detracted from absolute performance.

Towards the close of the reporting period, the shorter duration bias of the Fund's USD allocation benefitted performance as short-term US rates moved higher. During this time, while allocations across regions benefitted returns, we saw notable contributions from Western Europe and the European periphery as both short-term rates and spreads outperformed in Europe. We continue to trim our real estate exposure after strong performance over the reporting period. Meanwhile, we increased exposure to automotives & auto parts due to attractive risk premiums for high quality issuers. The banking sector remains a significant part of

Muzinich Global Short Duration Investment Grade Fund cont/d...

the portfolio and continues to offer healthy yields in short-dated investment grade, particularly in Tier 2 instruments. However, we do note that this market now looks less attractive vs. senior banking bonds than it did earlier in the period. At the latter part of the reporting period, we also added exposure to AAA rated CLOs given what we believe to be attractive spreads in these instruments, although they remain a very small part of the portfolio.

Muzinich Dynamic Credit Income Fund

Over the reporting period the Fund delivered positive returns and performed in line with its indicative market as represented by its bespoke reference index (70% of HW40 - ICE BofA BB-B Global High Yield Index, 30% of GBC4 - ICE BofA BBB Global Corporate Index). All sub-asset classes positively contributed to total returns, led by strong performance from the Fund's high yield holdings. Strong credit selection in both US and European high yield compensated for the Fund's more conservative positioning in emerging markets high yield. On a regional basis, strong credit selection from the European periphery followed positive returns generated by the Fund's more sizable US and Western European exposure. From a sector perspective, strong credit selection in banking, utilities, and insurance bonds bolstered returns, while exposure to select chemicals bonds acted as a drag on relative returns. On an absolute rating basis, the BB rated cohort was the largest contributor to total returns, while no rating bucket detracted. On a relative ratings basis, the Fund's strong credit selection of BBB rated credit most meaningfully bolstered performance. Strong credit selection across the 1-5 years duration range benefitted returns.

Muzinich Global Fixed Maturity 2027 Fund

The Fund produced a solid return over the reporting period. Positive returns were generated most significantly by the portfolio's BBB rated cohort, with notable contributions from allocations to "better-quality" high yield credit (with a predominately BB rated focus). On a sector basis, positive contributions came from across the board, led by the Fund's holdings in homebuilders/real estate, diversified financial services, banking, energy, and automotives & auto parts. All duration buckets contributed to total returns for the period, led by positive contributions from the core 1-3 years duration segment. Due to the Fund's fixed maturity profile, the portfolio skews toward shorter duration paper which benefitted from less sensitivity to the market's periods of rate induced stress. At the close of the reporting period, the portfolio is invested approximately 50% in Western Europe and 29% in the US. All regions delivered healthy, positive results, with notable contributions from allocations to the European periphery and Eastern Europe.

Muzinich Global Market Duration Investment Grade Fund

As noted in the semi-annual report, the Fund launched on January 26, 2024 and was rapidly invested with the intention to protect capital and generate attractive returns compared to a benchmark of government bonds of similar duration to the portfolio. The Fund generated strong positive performance and outperformed its reference index, the Bloomberg Global Aggregate Corporate Index. Over the period, all sectors generated positive absolute performance, with banking - the largest sector exposure - providing notable contributions as the spread premium over corporates continues to compress, particularly in the Tier 2 market. On a relative sector basis, strong credit selection in homebuilders/real estate and technology bolstered performance, while a relative overweight in healthcare acted as a drag vs. the reference index. By rating, strong credit selection and an overweight of the BBB rated cohort led relative and absolute contributions. Towards the close of the reporting period, as European and US spreads diverged, reflecting the changing risk appetite in both markets, we moved the portfolio slightly into more USD credit while reducing EUR exposure. We maintained our overweight position in GBP credit vs. the reference index given the continued yield premium in GBP credit after hedging costs. This has largely been driven by the recent underperformance of UK gilts. During this time, Fund duration increased modestly - in line with the reference index. On a sector basis, we increased exposure to automotives given the recent spread-widening in the sector, which we see as an opportunity to add exposure to higher quality issuers in this sector. We continued to trim our exposure to the real estate sector, given strong performance over the period. Banking exposure was also reduced as part of our pruning of Tier 2 exposure

Muzinich Global Market Duration Investment Grade Fund cont/d...

given the strong performance of these instruments. During the latter part of the reporting period, we marginally increased our AAA rated CLO exposure given the attractive spread premium in these instruments, although they remain a small part of the portfolio (less than 2%).

Muzinich Global Fixed Maturity 2028 Fund

The Fund produced a healthy return over the reporting period, benefitting from a well-diversified portfolio comprised of mostly investment grade corporates with some "better quality" high yield exposure. Positive returns were generated most significantly by our allocations to BBB- and BB- rated bonds, benefitting additionally from our allocations to B+ rated credit. All duration buckets contributed to total returns for the period, led by positive contributions from across the core 1-5 years duration range. On a sector basis, contributions to absolute returns were led by homebuilders/real estate, banking, energy, diversified financial services, and automotives & auto parts. At the close of the reporting period, the portfolio was invested approximately 33% in Western Europe and 36% in the US. All regions delivered positive results, with notable contributions from allocations to the European periphery, Asia (ex. Japan), and Eastern Europe.

Outlook

Looking ahead, we expect continued strong technicals and fundamentals that could support relatively tight spread levels. We believe new issuance (gross and net) is likely to pick up, creating both potential opportunities and some volatility. In our view, the default outlook should remain quite modest, with a low maturity wall through 2025. The US high yield market could broadly benefit from the new administration's focus on domestic growth and deregulation, but certain sectors and credits may be disproportionately impacted by new policies. As such, we plan to retain the flexibility to take advantage of market and/or credit pullbacks as they occur.

Soft Commission Arrangements

There were no soft commission arrangements in place during the financial year or during the prior financial year and there are no plans to introduce such programs.

All market data from Bloomberg or as noted.

Muzinich & Co. Limited Investment Manager 20 March 2025

INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF MUZINICH FUNDS

Report on the audit of the financial statements

Opinion on the financial statements of Muzinich Funds (the 'Fund')

In our opinion the Fund's financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Fund as at 30 November 2024 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and the provisions of the Trust Deed

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position:
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units;
- the Statement of Cash Flows; and
- the related notes 1 to 23, including significant accounting policy information as set out in note 1.

The relevant financial reporting framework that has been applied in their preparation is IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the Unit Trusts Act, 1990 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Fund's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF MUZINICH FUNDS

Our responsibilities and the responsibilities of the Manager with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The Manager is responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of the Manager for the financial statements

The Manager is responsible for the preparation and fair presentation of the financial statements in accordance with the relevant financial reporting framework, and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intend to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

• We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF MUZINICH FUNDS

- In our opinion the accounting records of the Fund were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Use of our report

This report is made solely to the Fund's unitholders, as a body, in accordance with the applicable Regulations and the provisions of the Trust Deed. Our audit work has been undertaken so that we might state to the Fund's unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

^{*} Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

Notes to the financial statements for the financial year ended 30 November 2024

1. Significant accounting policies

(i) Basis of preparation and statement of compliance

These annual financial statements for the financial year ended 30 November 2024 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"), and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), and the Central Bank (Supervision And Enforcement) Act 2013 (Section 48 (1) (Undertakings For Collective Investment in Transferable Securities)) Regulations 2019, (together the "UCITS Regulations").

The preparation of financial statements in conformity with IFRS requires the Fund to make certain accounting estimates and assumptions. Actual results may differ from those estimates and assumptions. The Directors of the Muzinich & Co. (Ireland) Limited (the "Manager") believe that any estimates used in preparing the financial statements are reasonable and prudent.

These financial statements are prepared on a going concern basis. Management have reviewed the assessment of the Fund's ability to continue as a going concern. All Sub-Funds hold sufficient cash and liquidity within their portfolios to be able to meet their financial obligations at a minimum for a 12 month period post signing of the financial statements. Therefore, management has concluded that the going concern basis of accounting is the most appropriate and has applied same in these financial statements.

(ii) New standards, amendments and interpretations issued and effective for the financial year beginning 1 December 2023

There are a number of standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 December 2023. The following new and amended standards and interpretations do not have a significant impact on the Fund's financial statements:

- · IFRS 17 Insurance Contracts.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).
- International tax reform Pillar II Model rules (amendments to IAS 12).
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).

(iii) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 December 2023

A number of new standards, amendments to standards and interpretations are not effective for annual periods beginning on or after 1 December 2023, and have not been early adopted in preparing these financial statements. The following new and amended standards and interpretations are not expected to have a significant impact on the Fund's financial statements:

- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1).
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16).
- Disclosure of Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7).
- IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information.
- IFRS S2 Climate-related Disclosures.
- Lack of Exchangeability (Amendments to IAS 21).
- Amendment to IFRS 9 and IFRS 7 Classification and Measurement of Financial Instruments.
- IFRS 18 Presentation and Disclosure in Financial Statements.
- IFRS 19 Subsidiaries without Public Accountability: Disclosures.

Notes to the financial statements for the financial year ended 30 November 2024 cont/d...

1. Significant accounting policies cont/d...

(iv) Financial instruments at fair value through profit or loss

Recognition and initial measurement

Financial assets and financial liabilities are initially recognised at fair value through profit or loss ("FVTPL") on the Fund's Statement of Financial Position on the trade date, which is the date on which the Fund becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised at the date they are originated. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded in the Statement of Comprehensive Income. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately, while on other financial instruments they are amortised.

Classification and subsequent measurement

(a) Classification of financial assets

Under IFRS 9, all instruments in the Portfolio of Investments are classified at fair value through profit or loss. Subsequent to initial recognition, all instruments classified at fair value through profit or loss have changes in their fair value recognised in the Statement of Comprehensive Income.

The financial instruments classified as held-for-trading are classified as such under IFRS 9:

- financial instruments currently designated into this category because they are managed on a fair value basis in accordance with a documented investment strategy. Accordingly, these financial instruments will be mandatorily measured at FVTPL under IFRS 9; and
- financial instruments currently measured at amortised cost are: cash balances and all other assets and liabilities except the financial instruments classified as held-for-trading and measured at FVTPL. These instruments meet the "solely payments of principal and interest" (SPPI) criterion and are held in a held to-collect business model. Accordingly, they will continue to be measured at amortised cost under IFRS 9.

IFRS 9 uses the forward-looking 'expected credit loss' ("ECL") model. This will require considerable judgement about how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis. The new impairment model will apply to financial assets measured at amortised cost or FVOCI, except for investments in equity instruments.

Based on the Fund's assessment, changes to the impairment model do not have a material impact on the financial assets of the Fund, this is because:

- the majority of the financial assets are measured at FVTPL and the impairment requirements do not apply to such instruments; and
- the financial assets at amortised cost are short-term (i.e. no longer than 12 months), of high credit quality and/or highly collateralised. Accordingly, the ECLs have had no impact.

On initial recognition, the Fund classifies financial assets as measured at amortised cost or FVTPL. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI").

All other financial assets of the Fund are measured at FVTPL.

(iv) Financial instruments at fair value through profit or loss cont/d...

Classification and subsequent measurement cont/d...

(a) Classification of financial assets cont/d...

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed, including:

- The documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- · How the performance of the portfolio is evaluated and reported to the Fund's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

The Fund has determined that it has two business models:

- Held-to-collect business model: this includes cash at bank, amounts at broker, amounts receivable for subscription of units, receivable from Investment Manager, receivable for investments sold, interest receivable and other debtors. These financial assets are held to collect contractual cash flow.
- Other business model: this includes debt securities (except financial assets held by the money market fund see below), equity investments, investments in unlisted open-ended investment funds and unlisted private equities. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Fund considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Fund considers:

- Contingent events that would change the amount or timing of cash flows;
- · Leverage features;
- · Prepayment and extension features;
- Terms that limit the Fund's claim to cash flows from specified assets (e.g. non-recourse features); and
- Features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

(iv) Financial instruments at fair value through profit or loss cont/d...

Classification and subsequent measurement cont/d...

(a) Classification of financial assets cont/d...

Assessment whether contractual cash flows are SPPI cont/d...

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Fund were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

(b) Subsequent measurement of financial assets

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income and expense and foreign exchange gains and losses, are recognised in the Statement of Comprehensive Income.

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. Interest income, if any, and foreign exchange gains and losses are recognised in the Statement of Comprehensive Income. Any impairment and gain or loss on derecognition is also recognised in profit or loss.

Cash at bank, amounts at broker, amounts receivable for subscription of units, receivable from Investment Manger, receivable for investments sold, interest receivable and other debtors are included in this category.

(c) Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Financial liabilities at FVTPL:

· Held-for-trading: derivative financial instruments.

Financial liabilities at amortised cost:

• This includes amounts due to broker, amounts payable for redemption of units, payable for investments purchased, other payables and accrued expenses.

Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Sub-Funds commit to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially classified at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income (see Note 1 (xvii)).

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Funds have transferred substantially all risks and rewards of ownership and a realised gain or loss is recognised. Realised gains and losses are presented in the Statement of Comprehensive Income as net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss.

1. Significant accounting policies cont/d...

(iv) Financial instruments at fair value through profit or loss cont/d...

Recognition, derecognition and measurement cont/d...

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value and realised gains and losses on sales of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income within net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss. Interest on debt securities at fair value through profit or loss is recognised in the Statement of Comprehensive Income within interest income based on the effective interest rate.

All transferable securities are traded on a regulated market.

(v) Valuation of securities

Investments in debt securities and exchange traded funds ("ETF's") are valued at fair value through profit or loss. For securities held long, the quoted market price is taken as the measure of fair value. The Sub-Funds had no securities held short. The value of any investment which is not normally quoted, listed or traded on or under the rules of a recognised exchange or market is valued at its probable realisation value, as determined by the Manager, having been approved for such purposes by State Street Custodial Services (Ireland) Limited (the "Depositary"), in good faith and in consultation with Muzinich & Co. Limited (the "Investment Manager") and subject to the approval of the Depositary.

Investments in investment funds are valued by utilising the valuations of the underlying investment funds (its published NAV) to determine the fair value of the relevant Sub-Fund's interest.

(vi) Forward foreign currency exchange contracts

The value of open forward foreign currency exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on open forward foreign currency exchange contracts are included in the net unrealised gain or loss on forward foreign currency exchange contracts, as appropriate, on the Statement of Financial Position and are shown in the Portfolio of Investments of the relevant Sub-Fund.

Forward foreign currency exchange contracts held are Over the Counter ("OTC") Financial Derivative Instruments.

(vii) Futures

A futures contract is an agreement between two parties to buy and sell a security or currency at a specific price or rate at a future date. Future contracts are quoted on active markets. The daily change in contract value is recorded as an unrealised gain or loss and is recognised as a realised gain or loss when the contract is closed. Gains and losses on futures contracts are recognised in the Statement of Comprehensive Income within realised or unrealised gains or losses on financial assets and liabilities.

(viii) Swaps

Some Sub-Funds may enter into swap agreements. A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument.

Derivatives such as interest rate swaps are used for trading purposes. Interest rate swaps are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate.

In a credit default swap, one party makes a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party on its obligation. The Sub-Fund may use credit default swaps to provide a measure of protection against defaults of sovereign or corporate issues (i.e. to reduce risk where the Sub-Fund owns or has exposure to the issuer).

1. Significant accounting policies cont/d...

(viii) Swaps cont/d...

The maximum exposure the Sub-Fund has in selling credit protection is equal to the notional amount of such credit default swap contracts. For credit default swaps on corporate or sovereign issuers, a credit event may be triggered by events such as bankruptcy, failure to pay, obligation acceleration, repudiation, moratorium or restructuring. The Investment Manager monitors a variety of factors including credit ratings, cash flow assumptions, market activity, market sentiment and valuation as part of its ongoing process of assessing payment and performance risk. In connection with these agreements, cash or securities may be set aside as collateral by the Custodian in accordance with the terms of the swap agreement.

Credit Default Swaps Buy Protection means that the relevant Sub-Fund will receive compensation in the event of the relevant credit events occurring. Credit Default Swaps Sell Protection means that the relevant Sub-Fund will have to pay compensation in the event of the relevant credit events occurring.

Swaps (including credit default swaps) are marked-to-market daily using standard models that incorporate quotations from market makers and the change in value, if any, is recorded as unrealised gain or loss in the Statement of Comprehensive Income.

Payments received or made on swap contracts are recorded as realised gains or losses in the Statement of Comprehensive Income. Gains or losses are realised upon termination of the swap agreements. These financial instruments are not actively traded on exchanges. The values assigned to these instruments are based upon the best available information and because of the uncertainty of the valuation, these values may differ significantly from the values that would have been realised had a ready market for these instruments existed and the differences could be material. Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of the amounts recognised in the Statement of Comprehensive Income. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligations to perform or disagree as to the meaning of contractual terms in the agreements, or that there may be unfavorable changes in interest rates or the price of the index or security underlying these transactions.

In a total return swap, one party pays the other the total economic performance of a specified asset(s), the Reference Obligation(s), for another cash flow, typically a reference rate plus a spread. The performance or "Total Return" comprises the sum of interest, dividends, fee payments, and any payment due to the change in value of the Reference Obligation. Payments due to change in value are equal to the appreciation (or depreciation) in the marked-to-market value of the Reference Obligation. A net depreciation in value (i.e. a negative total return) results in a payment to the Total Return Payer. A total return swap may provide for acceleration of its termination date upon the occurrence of one or more referenced events with respect to a Reference Obligation.

To mitigate the counterparty risk resulting from swap transactions, the relevant Sub-Fund will only enter into swap transactions with highly rated financial institutions specialised in this type of transaction and in accordance with the standard terms laid down by the International Securities Dealers Association.

Swaps held are Over the Counter ("OTC") Financial Derivative Instruments.

(ix) Options

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised losses.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The Fund may not carry out uncovered short sales of Options.

1. Significant accounting policies cont/d...

(ix) Options cont/d...

Options held are exchange traded Financial Derivative Instruments.

(x) Swaptions

A swaption is an option that grants the right, with no obligation, to enter into an underlying swap on pre-agreed terms. A payer swaption gives the owner of the swaption the right to enter into a swap where they pay the fixed leg and receive the floating leg. A receiver swaption gives the owner of the swaption the right to enter into a swap where they pay the floating leg and receive the fixed leg.

Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been 'swapped'.

When a swaption is written, an amount equal to the premium received by the relevant Sub-Fund is recorded as a liability and is subsequently adjusted to the current market value of the swaption written. Premiums received from written swaptions that expire unexercised are treated by the relevant Sub-Fund on the expiration date as realised gains. If a written swaption is exercised, the premium is added to the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss.

Swaptions held are exchange traded Financial Derivative Instruments.

(xi) Loans

Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution that acts as an agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, (i) the Sub-Funds' have the right to receive payments of principal, interest and any fees to which it is entitled only from the party from whom the Sub-Fund has purchased the participation and only upon receipt by that party of payments from the borrower and (ii) the Sub-Fund generally has no right to enforce compliance by the borrower with the terms of the loan agreement or to vote on matters arising under the loan agreement.

Thus, the Sub-Fund may be subject to credit risk by the party from whom it purchased the loan participation and by the borrower, and the Fund may have minimal control over the terms of any loan modification. When the Sub-Fund purchases assignments of loans, it generally acquires direct rights against the borrower.

(xii) Revenue recognition

Interest income on cash is recognised on an effective interest rate basis.

When calculating the effective interest rate, the Sub-Funds estimate cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period.

Realised gains and losses on sales of investments are calculated based on the average book cost of the investment and are included in net gains/losses on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Unrealised gains and losses on investments arising during the year are also included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

The unrealised gain or loss on open forward foreign currency exchange contracts is calculated by reference to the difference between the contractual rate and the rate to close out the contract at the Statement of Financial Position date. Gains and losses relating to forward foreign currency exchange contracts are included

1. Significant accounting policies cont/d...

(xii) Revenue recognition cont/d...

in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

(xiii) Foreign currency translation

In accordance with IAS 21 ("The effects of changes in Foreign Exchange Rates"), items included in the individual Sub-Fund's financial statements are measured using the currency of the primary economic environment in which it operates, the functional currency. The functional currency assessment is done on a Sub-Fund by Sub-Fund basis. All Sub-Funds' base currencies equated to their respective functional currencies when assessed under IAS 21.

Items included in the financial statements of the Sub-Funds are measured in the currency of the primary economic environment in which the Sub-Funds operate (the "functional currency").

The functional currency (and presentational currency) of all Sub-Funds is US Dollars (US\$), with the exception of Muzinich Europeyield Fund, Muzinich Enhancedyield Short-Term Fund, Muzinich Sustainable Credit Fund, Muzinich European Credit Alpha Fund, Muzinich High Yield Bond 2028 Fund, Muzinich Global Short Duration Investment Grade Fund, Muzinich Global Fixed Maturity 2027 Fund, Muzinich Global Market Duration Investment Grade Fund and Muzinich Global Fixed Maturity 2028 Fund which have functional currency (and presentational currency) of Euro (€).

Foreign currency denominated assets and liabilities, including investments, are translated to the functional currency of the relevant Sub-Fund at the exchange rate prevailing at the year end date. Transactions in foreign currencies are translated to the functional currency of the relevant Sub-Fund at the exchange rates ruling at the dates of the transactions. The foreign exchange gain or loss based on the translation of the original cost of investments is included in net gains/losses on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. The foreign exchange gain or loss on the translation of other assets or liabilities is included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Please refer to Note 15 for exchange rates used at the year end date.

(xiv) Net assets attributable to redeemable participating Unitholders

The liability to Unitholders is presented in the Statement of Financial Position as "Net assets attributable to redeemable participating Unitholders" and is determined based on the residual assets of the relevant Sub-Fund after deducting all other liabilities. The prices at which Units may be issued or redeemed are calculated by reference to the relevant Sub-Fund's NAV calculated daily in accordance with the Prospectus and the Trust Deed.

(xv) Expenses

All expenses, including Management and Depositary Fees, are recognised in the Statement of Comprehensive Income on an accruals basis. Fees and charges which are identifiable with a particular Sub-Fund are charged to it and other charges are borne pro-rata to the net assets of each Sub-Fund.

(xvi) Critical accounting estimates and judgements

The Manager makes estimates and assumptions concerning the future. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of the revision and future years if the revision affects both current and future years. The resulting accounting estimates may not equal the actual results.

1. Significant accounting policies cont/d...

(xvi) Critical accounting estimates and judgements cont/d...

Recognition, derecognition and measurement cont/d...

(a) Judgement

Information about judgements made in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements of the Fund are included in Note 1(iv) Financial Instruments at fair value through profit or loss and Note 1(xviii) Functional and presentation currency, to the financial statements.

(b) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 30 November 2024 and 30 November 2023 is included in Note 18 to the financial statements and relates to the determination of fair value of financial instruments with significant unobservable inputs.

(xvii) Transactions costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Transaction costs on the purchase and sale of bonds and financial derivative instruments are expensed on the date of the purchase or sale of the relevant investment.

Transaction costs are shown separately in Note 2 and Note 9 to the financial statements.

(xviii) Distributions

Distributions, if declared, will only be paid out of a Sub-Fund's net investment income return. Distributions with an ex-date during the financial year are included as a finance cost in the Statement of Comprehensive Income. Dividends will not be paid in respect of any class of Unit which is an accumulating class. Income and profits, if any, attributable to an accumulating Unit class will be accumulated, reinvested in the relevant Sub-Fund on behalf of the Unitholders of that class and will be reflected in the NAV of the relevant accumulating Unit Class. Please see Note 10 for details of any distributions paid during the financial year ended 30 November 2024.

(xix) Cash and cash equivalents

Cash and cash equivalents include cash in hand and other short-term investments in an active market with original maturities of three months or less and bank overdrafts. All amounts are subject to insignificant changes in fair value. All cash and cash equivalents are held with the Depositary, whose parent company is State Street Bank and Trust Company, which has a long-term credit rating of AA- (30 November 2023: AA-).

Investors should note that, the Fund operates a Subscriptions/Redemptions Account(s) (as defined below) for each of the Sub-Funds in accordance with the requirements of the Central Bank relating to umbrella fund cash accounts. A Subscriptions/Redemptions Account is an account in the name of the Fund through which subscription monies and redemption proceeds and dividend income (if any) for each Sub-Fund are channelled. Monies in a Subscriptions/Redemptions Account are deemed assets of the respective Sub-Funds.

Where monies are held by the Fund in a Subscriptions/Redemptions Account for the account of a Sub-Fund, an investor shall rank as an unsecured creditor of the Fund in respect of any claim in relation to monies held in such Subscriptions/Redemptions Account in the event such Sub-Fund (or another Sub-Fund of the Fund) becomes insolvent.

For Units launched and terminated during the financial year please refer to the Note 21 of the financial statements.

2. Significant agreements cont/d...

Manager cont/d...

Such fees are accrued on each Dealing Day and payable monthly in arrears. The Manager pays the fees of the Investment Manager. All percentages are unchanged for the financial year ended 30 November 2024.

Administrator's Fee

The Administrator's fees and expenses are paid directly out of the assets of the Sub-Funds.

Investment Manager's Performance Fee

A performance fee will be payable out of the assets of the relevant Sub-Funds (not all Sub-Funds have a performance fee), calculated on a unit-by-unit basis for each class of Units so that each issued Unit is charged a performance fee which equates with that issued Unit's performance.

The performance fee in respect of each issued Unit will be equal to 10% for Muzinich LongShortCreditYield Fund, and 20% for Muzinich European Credit Alpha Fund and 20% for the E Units and N Units of Muzinich Global Tactical Credit Fund, of the increase in the NAV per Unit in each case in excess of the high water mark (the "High Water Mark").

The High Water Mark at any Valuation Day is the greater of:

- (i) The highest NAV per Unit on the last day of any preceding Performance Period; or
- (ii) The Initial Issue Price per Unit at the end of the initial offer period.

The use of a High Water Mark ensures that Unitholders will not be charged a performance fee until any previous losses are recovered.

The performance fee is payable annually in arrears in respect of each Performance Period. The performance fee will accrue daily and be taken into account in the calculation of the NAV per Unit as at each Valuation Point. In the event that a Unitholder redeems Units prior to the end of a Performance Period, the amount of any accrued but unpaid performance fee in respect of such Units will be paid to the Investment Manager.

At 30 November 2024, a performance fee of US\$940,284 (2023: US\$Nil) was charged on Muzinich LongShortCreditYield Fund and €96,535 (2023: €Nil) was charged on Muzinich European Credit Alpha Fund. These amounts are included in Other expenses in the Statement of Comprehensive Income.

Amounts payable at the financial year end were US\$893,800 (2023: US\$103,852) and €96,481 (2023: €62,930) for Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund, respectively.

Depositary

State Street Custodial Services (Ireland) Limited has been appointed Depositary pursuant to the Trust Deed. For this service, the Depositary's fee is 0.02% p.a. of the NAV of the relevant Sub-Fund accrued on each Dealing Day and payable monthly in arrears.

Depositary fees are paid directly out of the assets of the Sub-Funds. The Sub-Fund pays a transaction charge on the purchase and sale of each investment, and transaction fees associated with financial derivative instruments.

Transaction Costs

For the financial year ended 30 November 2024, brokerage charges, taxes and Custody transaction costs, included in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income, are as follows:

3. Taxation

The Sub-Funds are regarded as resident in Ireland for tax purposes. It is the intention of the Manager that the business of the Sub-Funds will be conducted in such a manner as to ensure that they are Irish resident for tax purposes.

The Sub-Funds qualify as an investment undertaking as defined in Section 739B(1) of the Taxes Consolidation Act, 1997 (of Ireland) as amended (the "Taxes Act"). Under current Irish law and practice, the Sub-Funds are not chargeable to Irish tax on their income and gains.

However, tax can arise on the happening of a "chargeable event" in a Sub-Fund. A chargeable event includes any distribution payments to Unitholders or any encashment, redemption, cancellation, transfer or deemed disposal of Units or the appropriation or cancellation of Units of a Unitholder by a Sub-Fund for the purposes of meeting the amount of tax payable on a gain arising on a transfer. A deemed disposal will occur at the expiration of a "Relevant Period", meaning a period of eight years beginning with the acquisition of a Unit by a Unitholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

No tax will arise on a Sub-Fund in respect of chargeable events in respect of Unitholders who are neither Irish Resident nor Ordinarily Resident in Ireland at the time of the chargeable event provided that a Relevant Declaration is in place and a Sub-Fund is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct. In the absence of either a Relevant Declaration or a Sub-Fund satisfying and availing of equivalent measures there is a presumption that the Unitholder is Irish Resident or Ordinarily Resident in Ireland.

A chargeable event does not include:

- An exchange by a Unitholder, effected by way of an arms-length bargain where no payment is made to the Unitholder of Units in a Sub-Fund for other Units in a Sub-Fund;
- Any transactions (which might otherwise be a chargeable event) in relation to Units held in a recognised clearing system as designated by order of the Irish Revenue Commissioners;
- A transfer by a Unitholder of the entitlement to Units where the transfer is between spouses and former spouses, subject to certain conditions; or
- An exchange of Units arising on a qualifying amalgamation or reconstruction (within the meaning of Section 739H of the Taxes Act) of a Sub-Fund with another investment undertaking.

If a Sub-Fund becomes liable to account for tax if a chargeable event occurs, a Sub-Fund shall be entitled to deduct from the payment arising on a chargeable event an amount equal to the appropriate tax and/or where

^{**} Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

^{***} This relates to commissions and fees on derivative trades.

3. Taxation cont/d...

applicable, to appropriate or cancel such number of Units held by the Unitholder or the beneficial owner of the Units as are required to meet the amount of tax. The relevant Unitholder shall indemnify and keep a Sub-Fund indemnified against loss arising to a Sub-Fund by reason of a Sub-Fund becoming liable to account for tax on the happening of a chargeable event if no such deduction, appropriation or cancellation has been made.

Dividends received by a Sub-Fund from investments in Irish equities may be subject to Irish dividend withholding tax at the standard rate of income tax (currently 20%). However, a Sub-Fund can make a declaration to the payer that it is a collective investment undertaking beneficially entitled to the dividends which will entitle a Sub-Fund to receive such dividends without deduction of Irish dividend withholding tax.

Dividends, interest and capital gains received from other investments made by a Sub-Fund may be subject to withholding taxes imposed by the country from which the investments income/gains are received, and such taxes may not be recoverable by a Sub-Fund and its Unitholders.

4. Equalisation

Income equalisation arrangements apply to the Sub-Funds. The arrangements are intended to ensure that the income per Unit which is distributed in respect of the distribution period is not affected by changes in the number of Units in issue during the year. The arrangements have no effect on the NAV of any Unit Class.

Equalisation in relation to the income Units is included within distributions and equalisation in the Statement of Comprehensive Income. The calculation of equalisation is based on total accumulated undistributed net income.

Performance fees - Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund

A performance fee will be payable out of the assets of the Sub-Fund calculated on a Unit-by-Unit basis for each class of Units so that each issued Unit is charged a performance fee which equates with that issued Unit's performance.

The performance fee in respect of each issued Unit will be equal to 10% for Muzinich LongShortCreditYield Fund and 20% for Muzinich European Credit Alpha Fund and the E Units issued by Muzinich Global Tactical Credit Fund, of the increase in the NAV per Unit in each case in excess of the high water mark (hereinafter called the "High Water Mark").

Deficit Subscriptions

If Units are issued at a time when the NAV per Unit is less than the High Water Mark (hereinafter called a "Deficit Subscription"), the adjustments set out below will be made by State Street Fund Services (Ireland) Limited (the "Administrator") to reduce inequities that could otherwise result for a Unitholder or the Investment Manager.

When a Deficit Subscription occurs, the Unitholder will be required to pay a Performance Fee with respect to any subsequent appreciation in the value of those Units from the NAV per Unit at the date of issue, calculated to the Valuation Day up to the High Water Mark. The Performance Fee will be charged at the end of the Performance Period by redeeming such number of the Unitholder's Units as have an aggregate NAV (after accrual of any Performance Fee) equal to the applicable percentage of any such appreciation (a "Performance Fee Redemption"). The aggregate NAV of the Units so redeemed will be paid to the Investment Manager as a Performance Fee. Performance Fee Redemptions are employed to ensure that the Sub-Fund maintains a uniform NAV per Unit. As regards the Unitholder's remaining Units, any appreciation in the NAV per Unit of those Units above the High Water Mark will be charged a Performance Fee in the normal manner.

Premium Subscriptions

When Units are purchased when the NAV per Unit is greater than the High Water Mark for the Units (hereinafter called a "Premium Subscription"), the prospective Unitholder is required to pay an additional sum equal to the accrued performance fee per Unit (hereinafter called the "Performance Fee Credit"). The Performance Fee Credit is designed to ensure that all holders of Units have the same amount of capital at risk per Unit.

4. Equalisation cont/d...

The Performance Fee Credit will be at risk and may depreciate based on the performance of the Sub-Fund subsequent to the subscription. In the event of a decline in the NAV per Unit, the Performance Fee Credit due to the Unitholder will reduce in line with the performance fee accrual for other Units until the Performance Fee Credit is exhausted. Subsequent appreciation in the NAV per Unit will result in a recapture of any Performance Fee Credit lost due to such reductions, but only to the extent of the previously lost Performance Fee Credit up to the amount paid at subscription.

At the end of the Performance Period, an amount equal to the lower of the Performance Fee Credit paid at the time of the Premium Subscription calculated to the Valuation Day (less any Performance Fee Credit previously applied) or 10% of the excess of the NAV per Unit over the High Water Mark is applied in the subscription for additional Units for the Unitholder. Such subscription is calculated using the NAV per Unit (net of Performance Fees) on the Valuation Day.

If the Unitholder redeems Units subscribed at the time of the Premium Subscription (hereinafter called "Premium Units") before the last day in any Performance Period, the Unitholder will receive additional redemption proceeds equal to any Performance Fee Credit then remaining multiplied by a fraction, the numerator of which is the number of Premium Units being redeemed and the denominator of which is the number of Premium Units owned by the Unitholder immediately prior to the redemption.

5. NAV per Unit

The NAV per Unit of each Unit Class is determined by dividing the net assets of the Unit Class by the total number of Units in issue for that Unit Class. The NAV per Unit and the number of Units outstanding at the year end is set out in the Portfolios of Investments.

6. Number of Units in issue and net assets attributable to Redeemable Participating Unitholders

Each Unit will represent an individual beneficial interest in the relevant Sub-Fund. The return on an investment in the relevant Sub-Fund will depend solely upon the investment performance of the assets in that Sub-Fund and the increase or decrease (as the case may be) in the NAV of the Units. The amount payable to a Unitholder in respect of each Unit upon liquidation of a Sub-Fund will equal the NAV per Unit at the date of liquidation. The Units in issue are shown in the Portfolios of Investments.

In accordance with the provisions of the Fund's Prospectus, listed investments and investments with prices quoted in over the counter markets or by market makers are stated at the mid price on the valuation day for the purpose of determining NAV per Unit for subscriptions and redemptions and for various fee calculations.

Net assets attributable to Unitholders represents a liability in the Statement of Financial Position, carried at the redemption amount that would be payable at the Statement of Financial Position date if the Unitholder exercised the right to redeem the Units in the relevant Sub-Fund.

Units in a Sub-Fund may be designated as one or more Classes of Units, the respective rights of which may differ.

Discretionary Units

This Class of Units may pay distributions (if any) out of interest income earned and realised and unrealised net capital gains after the deduction of expenses in respect of each Accounting Period on any Business Day as may from time to time be determined by the Manager, in its absolute discretion. The amount of the distribution (if any) for any Accounting Period will be determined by the Manager. Any sums not distributed will be accumulated and reflected in the NAV per Unit for the Discretionary Units.

Discretionary Units of Muzinich Enhancedyield Short-Term Fund may pay distributions (if any) out of net income and realised and unrealised gains net of realised and unrealised losses in respect of each Accounting Period and interim Accounting Period and out of capital, on any Business Day as may from time to time be determined by the Manager, in its absolute discretion.

6. Number of Units in issue and net assets attributable to Redeemable Participating Unitholders cont/d...

Income Units

This Class of Units will distribute interest income earned after the deduction of expenses in respect of each Accounting Period. Any sums not distributed will be accumulated and reflected in the NAV of the Unit. The distributions will normally be payable twice a year, in or around June and December in each year.

Monthly Income Units

This Class of Unit will distribute net income earned after the deduction of expenses on a monthly basis. Distributions will be declared on the last Business Day of each month and payable shortly thereafter. Any sums not distributed will be accumulated and reflected in the NAV of the Units.

IRD Income Units

IRD Income Units will distribute interest income earned, and may at the discretion of the Manager distribute out of realised and unrealised net capital gains and/or from capital, after the deduction of expenses in respect of each Accounting Period. Any sums not distributed will be accumulated and reflected in the NAV of the Unit. The distributions will normally be payable twice a year, in or around June and December in each year. IRD Income Units which have a distribution frequency designated in the name of the Units, such as Monthly or Quarterly, will declare dividends in accordance with their applicable frequency. Dividends that are declared monthly will be declared on the last Business Day of each month and dividends that are declared quarterly will be declared on or around 31 March, 30 June, 30 September and 31 December, unless otherwise set out in the relevant Supplement.

Accumulation Units

This Class of Units will accumulate the income, realised and unrealised net capital gains/losses and will not pay any distributions in respect of any accounting period.

Discretionary S Units

This Class of Units may pay distributions out of interest income earned and realised and unrealised net capital gains after the deduction of expenses in respect of each Accounting Period on any Business Day as may from time to time be determined by the Manager, in its absolute discretion. The amount of the distribution for any Accounting Period will be determined by the Manager, subject to a minimum distribution payment of 2% per Accounting Period. Any sums not distributed will be accumulated and reflected in the NAV of the Unit.

Hedged Income/Accumulation Units

This Class of Units will be hedged against exchange rate fluctuations between the Denominated Class Currency and the Base Currency of the relevant Sub-Fund. The Investment Manager will try to mitigate the risk of currency volatility by using forward foreign currency exchange contracts.

The following tables show the movement in subscriptions and redemptions of each type of Unit that was in issue during the financial year ended 30 November 2024:

Audit fees

Fees and expenses excluding VAT, paid to the statutory auditors, Deloitte Ireland LLP, in respect of the financial year ended 30 November 2024 and prior financial year ended 30 November 2023, entirely relate to the audit of the financial statements of the Sub-Funds. There were no fees and expenses paid in respect of other assurance, tax advisory or non-audit services provided by the auditors for the financial year ended 30 November 2024 or financial year ended 30 November 2023.

Muzinich

Notes to the financial statements for the financial year ended 30 November 2024 cont/d...

10. Distributions

The Manager will determine the distribution policy of each Unit Class in accordance with the criteria for each Unit Class. The distributions will normally be paid in or around June and December in each year. Any sums not distributed will be accumulated and reflected in the NAV of each Unit.

	-

^{*} Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

All other Sub-Funds had only Accumulation Units in issue, therefore no distributions were paid on these Sub-Funds.

11. Cash and cash equivalents

At the financial year ended 30 November 2024, all cash at bank balances are held with State Street Bank and Trust (30 November 2023: State Street Bank and Trust). The long term credit rating for State Street Bank and Trust at 30 November 2024 is AA- (30 November 2023: AA-).

Investors should note that, the Fund operates a Subscriptions/Redemptions Account(s) (as defined below) for each of the Sub-Funds in accordance with the requirements of the Central Bank relating to umbrella fund cash accounts. A Subscriptions/Redemptions Account is an account in the name of the Fund through which subscription monies and redemption proceeds and dividend income (if any) for each Sub-Fund are channelled. Monies in a Subscriptions/Redemptions Account are deemed assets of the respective Sub-Funds.

Where monies are held by the Fund in a Subscriptions/Redemptions Account for the account of a Sub-Fund, an investor shall rank as an unsecured creditor of the Fund in respect of any claim in relation to monies held in such Subscriptions/Redemptions Account in the event such Sub-Fund (or another Sub-Fund of the Fund) becomes insolvent.

Trade and other creditors are payable at various dates in the next three months in accordance with the suppliers' usual and customary credit terms.

14. Efficient portfolio management

The Investment Manager may, on behalf of a Sub-Fund engage in transactions in financial derivative instruments for the purposes of efficient portfolio management and/or to protect against exchange risks within the conditions and limits laid down by the Central Bank.

Efficient portfolio management transactions relating to the assets of the Sub-Funds may be entered into by the Investment Manager with one of the following aims; (a) a reduction of risk (including currency exposure risk); (b) a reduction of cost (with no increase or minimal increase in risk); and (c) generation of additional capital or income for a Sub-Fund with a level of risk consistent with the risk profile of a Sub-Fund and the diversification requirements in accordance with the UCITS Regulations and as disclosed in the Prospectus.

In relation to efficient portfolio management operations the Investment Manager will look to ensure that the techniques and instruments used are economically appropriate in that they will be realised in a cost-effective way. Such techniques and instruments include but are not limited to futures, options, interest rate swaps, credit default swaps (to buy and sell protection) and forward foreign currency exchange contracts.

Any direct and indirect operational costs and/or fees which arise as a result of the use of efficient portfolio management techniques is deducted from the revenue delivered to the relevant Sub-Fund at normal commercial rates and does not include any hidden revenue.

Such direct or indirect costs and fees are paid to the relevant counterparty to the financial derivative instruments transaction, which, in the case of financial derivative instruments used for currency hedging purposes, includes the Depositary or entities related to the Depositary. All revenues generated through the use of efficient portfolio management techniques, net of direct and indirect operational costs and fees, is returned to the relevant Sub-Fund.

14. Efficient portfolio management cont/d...

The Sub-Funds invest in financial derivative instruments ("FDIs") in accordance with conditions or requirements imposed by the Central Bank.

Cash collateral received, if any, on FDIs is disclosed in Note 11.

The Investment Manager employs a risk management process in respect of a Sub-Fund which enables it to monitor and measure the risks attached to the financial derivative positions using a commitment approach and details of this process have been provided to the Central Bank. FDIs not included in the risk management process will not be utilised until such time as a revised risk management process has been submitted to and cleared by the Central Bank. The Manager will provide on request to Unitholders supplementary information relating to the risk management methods employed by the Investment Manager in respect of the Sub-Funds including the quantitative limits that are applied and any recent developments on the risk and yield characteristics of the main categories of investments.

All Sub-Funds with the exception of Muzinich LongShortCreditYield Fund and Muzinich Global Tactical Credit Fund use forward foreign currency exchange contracts to hedge the currency exposures of securities or other assets of a Sub-Fund denominated in a currency other than the base currency of the relevant Sub-Fund or the denominated currency of a hedged Unit class.

In relation to Muzinich LongShortCreditYield Fund and Muzinich Global Tactical Credit Fund, FDIs are utilised by the Sub-Funds for both investment purposes and efficient portfolio management purposes. The income arising from these FDIs is disclosed within the net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in the Statement of Comprehensive Income. The realised and unrealised gains and losses are also disclosed in the Statement of Comprehensive Income. Counterparty transaction costs on FDIs are embedded in the price of FDIs and are therefore not separately identifiable for disclosure within the financial statements.

All derivative contracts open at 30 November 2024 are disclosed in the Portfolios of Investments.

There are no other instruments used on the Sub-Funds which require any additional disclosures in relation to efficient portfolio management.

15. Exchange rates

^{*} The above unitholdings represent all of the Units issued in respect of the relevant class.

Performance fees

A performance fee will be payable out of the assets of the relevant Sub-Fund calculated on a Unit-by-Unit basis for each class of Units so that each issued Unit is charged a performance fee which equates with that issued Unit's performance.

The performance fee in respect of each issued Unit will be equal to 10% for Muzinich LongShortCreditYield Fund and 20% for Muzinich European Credit Alpha Fund, of the increase in the NAV per Unit in each case in excess of the high water mark (hereinafter called the "High Water Mark").

At 30 November 2024, a performance fee of US\$940,284 (2023: US\$Nil) was charged on Muzinich LongShortCreditYield Fund, and €96,535 (2023: €Nil) was charged on Muzinich European Credit Alpha Fund.

16. Related party transactions cont/d...

Performance fees cont/d...

Amounts payable for performance fees at the financial year end for Muzinich LongShortCreditYield Fund were US\$893,800 (2023: US\$103,852), and for Muzinich European Credit Alpha Fund were €96,481 (2023: €62,930).

The Manager may from time to time and at their sole discretion and out of their own resources decide to waive part or all of the Manager Fee, Annual Administrative Fee, Investment Manager Fee, Equalisation or Non-equalisation performance fees. These fee waivers are voluntary and may be discontinued by the Investment Manager at any time without prior notice. These fee waivers may result in a reimbursement of expenses to the Sub-Funds by the Investment Manager.

Directors

Ms. Ersilia Molnar and Mr. Alex McKenna are directors of the Manager and Investment Manager. Mr. Alex McKenna is also an employee of the Investment Manager.

For the financial year ended 30 November 2024, the director fees paid were €65,493 (2023: €52,369). There were no amounts outstanding to the directors as at 30 November 2024 (2023: Nil).

16. Related party transactions cont/d...

Cross investments cont/d...

At 30 November 2024, Muzinich Global Short Duration Investment Grade Fund had sold 50,000 Units in Muzinich Global Market Duration Investment Grade Fund for €5,251,762. No investments were held at the year end or at prior year end.

In relation to the fee paying unit classes, there is rebate which offsets all of the management fee charge for the Muzinich Fund holdings on those classes.

17. Financial instruments

The Sub-Funds primarily invest in the following:

Sub-Fund	
Muzinich Americayield Fund	Publicly traded debt securities (including notes, such as floating rate short-term an medium-term notes, and bonds) of US corporate borrowers generally traded or recognised exchanges in the US.
Muzinich Europeyield Fund	Publicly traded debt securities (including notes, such as floating rate short-term an medium-term notes, and bonds) of European corporate borrowers and Europea currency-denominated debt securities of North American corporate borrowers generall traded on recognised exchanges in Europe.
Muzinich Global High Yield Low Carbon Credit Fund	Publicly traded high yield debt securities (including notes, such as floating rat short-term and medium-term notes, and bonds) which are listed and/or traded on recognised exchange and which are issued by corporate borrowers which are domiciled headquartered, or whose primary business activities or principal trading markets are if the US, Europe and emerging markets. The Sub-Fund may have an exposure of more that 20% of the NAV to emerging markets.
Muzinich Enhancedyield Short-Term Fund	Corporate debt securities (including fixed and floating rate notes and bonds) or in U and European Treasury Bonds and US and European Agency Bonds, which are public traded on recognised exchanges. The Sub-Fund will at all times invest at least 60% of it NAV in investment grade bonds.
Muzinich ShortDurationHigh Yield Fund	Publicly traded US\$ denominated bonds of corporate borrowers traded on recognise exchanges.
Muzinich Sustainable Credit Fund	Debt securities (including fixed and floating rate notes and bonds) which are publicl traded on recognised exchanges and which are issued by companies domiciled in chaving their principal place of business in the US, European Union, or other Organisatio for Economic Cooperation and Development ("OECD") Member Countries.
Muzinich LongShortCreditYield Fund	Higher-yielding corporate debt securities (including notes, such as floating rat short-term and medium-term notes, and bonds) issued primarily by US issuers, and als European and/or emerging market issuers. The Sub-Fund may utilise futures, options credit default swaps and total return swaps to gain exposure to higher yieldin corporate debt and to hedge investments in the Sub-Fund's securities and their relate assets, markets and currencies.
Muzinich EmergingMarketsShortDuration Fund	Fixed and/or floating rate corporate and government debt instruments i.e. bonds an existing corporate loan receivables (which are collateralised, freely transferable traded on a regulated market and unlisted), subject to a 9.9% limit in corporate loans a further detailed below, with relatively short durations, specifically investing in select short maturity and callable issues and floating rate instruments. The Sub-Fund's short duration profile affords Unitholders a degree of protection against rising interest rates

Sub-Fund	
Muzinich Global Tactical Credit Fund	Fixed and/or floating rate corporate bonds issued by US, European and emerging market issuers (normally less than 40% of the NAV of the Sub-Fund will be invested in emerging market issuers), which are listed and/or traded on a recognised exchange.
Muzinich Asia Credit Opportunities Fund	Debt securities (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers which have their head office or exercise an overriding part of their economic activity in Asian countries and which are denominated in Hard Currency.
Muzinich Emerging Market Corporate Debt Fund	Debt securities, primarily bonds, (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers which have their head office or exercise an overriding part of their economic activity in emerging market countries (Asia, Africa, Latin America and certain parts of Europe) but, to a lesser extent may also invest in European and North American companies with emerging market exposure.
Muzinich European Credit Alpha Fund	Investing primarily, either directly or indirectly through the use of FDI, in high yield corporate debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) issued primarily by European issuers, or by companies that carry out a substantial proportion of their activities in Europe but whose issues may be in non- European currencies.
Muzinich High Yield Bond 2028 Fund**	High yield (i.e. sub-investment grade) fixed and/or floating rate corporate bonds and/or investment grade corporate bonds issued by US, European and emerging market issuers), which are listed and/or traded on a Recognised Exchange. The Sub-Fund may also invest in money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers.
Muzinich Global Short Duration Investment Grade Fund	Investment grade debt securities (including fixed and floating rate notes (such as promissory notes) and bonds) which are publicly traded on Recognised Exchanges and which are issued by US, European and emerging market issuers.
Muzinich Dynamic Credit Income Fund	Investing primarily in high yield (i.e. sub-investment grade) corporate and government bonds and in investment grade corporate and government bonds, as rated by Standard and Poor, Moody's and/or Fitch (or another Recognized Credit Rating Agency, or by the Investment Manager in the case of unrated bonds), all of which may be fixed and/or floating rate and issued by US, European and emerging market issuers.
Muzinich Global Fixed Maturity 2027 Fund	Investing primarily in Hard Currency denominated debt securities, and such securities held in the Sub-Fund's portfolio may be investment grade or non-investment grade as rated by Moody's and/or Standard & Poor's or as deemed equivalent by the Investment Manager.

17. Financial instruments cont/d...

Muzinich Global Market	

Duration Investment Grade

Sub-Fund

Fund***

Investment grade debt securities (including fixed and floating rate notes (such as promissory notes) and bonds) which are publicly traded on Recognised Exchanges and which are issued by US, European and emerging market issuers.

Muzinich Global Fixed Maturity 2028 Fund****

Up to 25% in debt securities which have a maturity that extends past the Sub-Fund's liquidation date. With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities/instruments in which the Sub-Fund will invest will be listed and/or traded on a Recognised Exchange (as defined in the Prospectus). The Investment Manager will not actively purchase equities in pursuit of the Sub-Fund's investment objective. However, in the event that an asset held by the Sub-Fund is subsequently restructured by an issuer, the Sub-Fund may become a recipient of, and hold, equities in such issuer. Such equities (if any) will be limited and are not expected to form a material part of the portfolio.

The Sub-Funds' liabilities include bank overdrafts, amounts due to broker, short-term creditors, derivatives and redeemable participating Units with the exception of Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund, which enter into forward foreign currency exchange contracts for the purpose of currency hedging.

Muzinich & Co. (Ireland) Limited, as Manager of the Sub-Funds, is responsible for the general risk management process with respect to the Sub-Funds ensuring that the investment mandate and regulatory rules are adhered to. The portfolio management team within the Investment Manager is responsible on a daily basis for credit analysis of underlying assets purchased by the Sub-Funds and reviews average days to maturity as a means of controlling risk, and will ensure that securities, at the time of purchase, normally have a rating as follows:

Sub-Fund

Muzinich Americayield Fund
Muzinich Europeyield Fund

A Moody's or equivalent rating of at least B3, but typically less than A.

^{**} Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.

^{***} Muzinich Global Market Duration Investment Grade Fund launched on 26 January 2024.

^{****} Muzinich Global Fixed Maturity 2028 Fund launched on 11 April 2024.

Sub-Fund	
Muzinich Global High Yield Low Carbon Credit Fund	The Investment Manager seeks to meet its objective through the careful selection of publicly traded high yield debt securities (including notes, such as floating rate short-term and medium-term notes, and bonds) which are listed and/or traded on a recognised exchange and which are issued by corporate borrowers which are domiciled, headquartered, or whose primary business activities or principal trading markets are in the US, Europe and emerging markets. The Sub-Fund may have an exposure of more than 20% of the NAV to emerging markets. Such bonds will generally be rated below investment grade by Moody's/Standard & Poor's (or as deemed equivalent by the Investment Manager), but typically less than A.
Muzinich Enhancedyield Short-Term Fund	The Sub-Fund primarily invests in corporate debt securities (including fixed and floating rate notes and bonds) or in US and European Treasury Bonds and US and European Agency Bonds, which are publicly traded on recognised exchanges. The Sub-Fund maintains an average investment grade Moody's or Standard & Poor's rating (or as deemed equivalent by the Investment Manager) of at least Baa3 or BBB-, respectively, and will at all times invest at least 60% of its NAV in investment grade bonds (including ancillary liquid assets). No more than 40% of the Sub-Fund's NAV may be rated below investment grade, and the minimum permissible rating of a security will be B3/B- by at least one rating agency (or as deemed equivalent by the Investment Manager).
Muzinich	Corporate bonds rated Ba/B by Moody's or Standard & Poor's (or equivalent) with
ShortDurationHighYield Fund	relatively short durations.
Muzinich Sustainable Credit Fund	The Sub-Fund primarily invests in debt securities (including fixed and floating rate notes and bonds) which are publicly traded on recognised exchanges and which are issued by companies domiciled in or having their principal place of business in the US, European Union, or other OECD Member Countries. Such bonds will be rated by Moody's or Standard & Poor's (or as deemed equivalent by the Investment Manager) at least B3 or B-at the time of purchase. However, the Sub-Fund's portfolio will maintain an average investment grade Moody's, Standard & Poor's, or equivalent rating of at least Baa3 or BBB-, respectively, and will at all times invest at least 60% of its NAV in investment grade bonds (including ancillary liquid assets). No more than 40% of the Sub-Fund's NAV may be rated below investment grade.
Muzinich LongShortCreditYield	A minimum A- rating or better, in circumstances where the Investment Manager
Fund	considers it to be in the best interest of the Sub-Fund.
Muzinich EmergingMarketsShortDuration Fund	The Sub-Fund will primarily focus on debt instruments with ratings in the B/BB/BBB ratings categories as cited by Moody's and/or Standard & Poor's (or as deemed equivalent by the Investment Manager), but may also invest in higher rated securities.
Muzinich Global Tactical Credit Fund	A minimum A- rating or better, in circumstances where the Investment Manager considers it to be in the best interest of the Sub-Fund.

•	П	n	١.	-	 n	•

Sub-Fund	
Muzinich Asia Credit Opportunities Fund	The Sub-Fund will invest at least two thirds of the Sub-Fund's NAV in Hard Currency debt securities issued by government or corporate issuers in Asian countries and up to one third of the Sub-Fund's NAV in debt securities and money market instruments, including securities of Asian, European and North American companies, denominated in the local currencies of emerging market countries, maintaining an average investment grade Moody's or Standard & Poor's rating (or as deemed equivalent by the Investment Manager) of at least Baa3 or BBB-, respectively. With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities/instruments in which the Sub-Fund will invest will be listed and/or traded on a recognised exchange (as defined in the Prospectus). The Sub-Fund may also opportunistically invest a maximum of 10% of its NAV in transferable securities that are equities including, but not limited to, shares, depositary receipts (e.g. American Depositary Receipts and Global Depositary Receipts) and convertible bonds. In addition, the Sub-Fund may invest up to 10% of its NAV in China A Shares listed on the Shanghai Stock Exchange via the Northbound Trading Link of the Shanghai Hong Kong Stock Connect program. The Sub-Fund may at times invest a maximum of 50% of its NAV in non-investment grade debt securities and the minimum permissible rating of such securities will be B3/B- by any one rating agency (or as deemed equivalent by the Investment Manager).
Muzinich Emerging Market Corporate Debt Fund	Debt Securities generally rated below investment grade, typically less than AA, by Moody's or Standard & Poor's (or as deemed equivalent by the Investment Manager). The Investment Manager retains the flexibility to invest substantially in cash and/or money market instruments with investment grade ratings as well as debt instruments issued by OECD banks and corporates with a minimum 'A-' rating or better.
Muzinich European Credit Alpha	The corporate bonds in which the Investment Manager will primarily invest will be
Fund	noninvestment grade, but the Investment Manager may also invest in investment grade corporate bonds, which the Investment Manager believes may enhance the overall returns of the Sub-Fund. The securities in which the Sub-Fund may invest will be listed or traded on a Recognised Exchange.

Sub-Fund	
Muzinich High Yield Bond 2028 Fund**	The Sub-Fund will invest in high yield (i.e. sub investment grade) corporate bonds and/or investment grade corporate bonds, as rated by Standard and Poor's, Moody's and/or Fitch (or as deemed equivalent by the Investment Manager) ("Ratings Agency"). Should any difference in rating by one or more Ratings Agency (or firm) arise, the following approach shall be taken; Where there is one available rating this will be used, where there are two available ratings the lowest shall be used, and where there are three available ratings, they will be sorted in ascending order and the second shall be used. A maximum of 5% of the NAV of the Sub-Fund may be invested in corporate bonds that are rated below B3/B- at the time of purchase. The allocation between high yield and investment grade, and among various geographies, will be determined primarily based on a relative value assessment across global credit markets. The Sub-Fund may also invest in Contingent Convertible Securities but such investments (if any) will be limited and are not expected to form a material part of the portfolio. The Fund will invest in debt securities which have a maturity that is no later than the Fund's liquidation date of 31 December 2028.
Murrinish Clabal Shart Downti	The Cub Fund will maintain a martfalia with an average investment and the Li
Muzinich Global Short Duration Investment Grade Fund	The Sub-Fund will maintain a portfolio with an average investment grade Moody's or Standard & Poor's rating (or as deemed equivalent by the Investment Manager) of at least Baa2 or BBB, respectively. The Sub-Fund's investment portfolio will be diversified as to issuer and industry, with no single corporate issuer comprising more than 3% of the Sub-Fund's NAV. Investments in emerging markets are not expected to exceed 15% of the Sub-Fund's NAV. The Investment Manager may also invest up to 5% of the Sub-Fund's NAV in sub-investment grade debt securities which the Investment Manager believes may enhance the overall returns of the Sub-Fund.
Muzinich Dynamic Credit	The Sub-Fund may invest in investment grade and subinvestment grade corporate hybrid
Income Fund	bonds (bonds issued by non-financial companies that have equity-like features) and subordinated debt securities issued by financial companies. At times, the Sub-Fund may invest in asset-backed securities in the form of collateralized loan obligations ("CLO"). Such investments will be limited to a maximum of 10% of the NAV of the Sub-Fund, and a maximum of 2.5% of the NAV of the Sub-Fund in any one tranche of a CLO. The Sub-Fund may also invest in Contingent Convertible Securities but such investments (if any) will be limited to a maximum of 5% of the NAV of the Sub-Fund, and a maximum a 2.5% of the NAV of the Sub-Fund in any one issue. The Investment Manager may maintain a certain level of liquid assets in the Sub-Fund.
Muzinich Global Fixed Maturity	The Investment Manager seeks to meet the Sub-Fund's investment objective through
2027 Fund	investment in debt securities, primarily bonds (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers.
Muzinich Global Market	The Investment Manager seeks to meet its objective through construction of a prudently
Duration Investment Grade Fund***	managed portfolio of debt securities with attractive risk and reward characteristics and an average investment grade rating, in accordance with its investment strategy. The Investment Manager generally targets an average duration to worst of no more than +/-1 year compared to the Bloomberg Barclays Global Aggregate Corporate (Currency hedged) benchmark; but, due to market conditions, the average duration to worst may at times be as high as +/- 1.5 years.
Warriage Clabel 5: 144 c ::	The leavest the second state of the second sta
Muzinich Global Fixed Maturity 2028 Fund****	The Investment Manager seeks to meet the Fund's investment objective through investment in debt securities, primarily bonds (fixed and/or floating rate) and money market instruments (including but not limited to OECD government bills, treasury notes, commercial paper and certificates of deposit) which are issued by government or corporate issuers.

- ** Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.
- *** Muzinich Global Market Duration Investment Grade Fund launched on 26 January 2024.
- **** Muzinich Global Fixed Maturity 2028 Fund launched on 11 April 2024.

Details of the investment strategy of the Investment Manager during the year is contained within their report for the relevant Sub-Fund.

Under the UCITS Regulations issued by the Central Bank, the Manager is required to employ a risk management process which enables it to accurately monitor and manage the global exposure to the relevant Sub-Fund from derivatives. The Manager uses a methodology known as the "Commitment Approach" to measure the global exposure of the Sub-Funds and manage the potential loss to the Sub-Funds due to market risk. The Commitment approach is a methodology that aggregates the underlying market or notional values of derivatives to determine the exposure of the Sub-Funds to derivatives. In accordance with the UCITS Regulations, global exposure for the Sub-Funds to derivatives must not exceed 100% of the relevant Sub-Fund's NAV. During the financial year and the prior financial year the Sub-Funds adhered to this guidance.

An investment in the Sub-Funds involves certain substantial risks, and returns from the Sub-Funds may not adequately compensate Unitholders for the risks assumed. The Sub-Funds will be subject to those risks common to funds investing in publicly traded securities, including market volatility. The main risks relating to financial instruments are set out below.

(a) Market Risk

Market risk comprises three types of risk; market price risk, interest rate risk and currency risk.

(i) Market price risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market. The Sub-Funds invest in debt securities.

Movements in the market prices of debt securities will affect the NAV of the Sub-Funds. The Sub-Funds are therefore exposed to market price risks in relation to its debt investments.

The Sub-Funds' overall market positions are monitored on a daily basis by the Sub-Funds' Investment Manager. The portfolio manager for the Sub-Funds reviews the portfolios on a daily basis from a performance and risk perspective. All security trades are subject to pre-trade compliance checks and additionally the portfolios are monitored daily within the Investment Manager's trading system for restrictions and guidelines specific to the relevant Sub-Fund. Within the Investment Manager and Sub-Investment Manager is the Portfolio Risk Analytics Committee ("PRAC"). This body's responsibilities are directly concerned with the relevant Sub-Fund's strategy and compliance with its mandate. The PRAC reports directly to the executive board of the Investment Manager.

The PRAC is responsible for the review of all accounts to assure their conformity with their stated guidelines, such as portfolio diversification, minimum credit rating compliance, etc. This also includes risk control

- (a) Market Risk cont/d...
- (i) Market price risk cont/d...

surveillance that involves monitoring of currency positions to make sure that portfolios are properly hedged to limit their exposure to currency risk.

The table below sets out the impact of a 5% movement in market prices of financial assets at fair value through profit or loss to the net assets attributable to Unitholders of the Sub-Funds.

17. Financial instruments cont/d...

(a) Market Risk cont/d...

(ii) Interest rate risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Sub-Funds invest mainly in fixed income securities i.e. bonds. Accordingly, the value of the investments in the Sub-Funds is sensitive to movements in interest rates.

Longer term obligations are usually more sensitive to interest rate changes. The performance of the Sub-Funds may be affected by changes in economic and marketing conditions and in the legal, regulatory and tax requirements or due to an issuer's individual situation.

A bond's sensitivity to interest rates can be expressed in terms of duration, which gives the estimated percentage change in the relevant portfolio value, associated with a 1% increase in interest rates. The tables below provide duration numbers at 30 November 2024 and 30 November 2023. Also shown in the tables are the estimated impacts on the portfolio of a 1% increase in interest rates. The sensitivity analysis is based on a small parallel shift of the yield curve (interest rates of all maturities moving in unison):

	Duration	Initial value ('000)	Expected change if interest rates rise by 1%	Monetary effect
Sub-Fund				
Muzinich Americayield Fund	3.32	US\$565,852	3.32%	US\$18,786

^{*} Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

(iii) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Manager will attempt to mitigate currency risk related to the hedged Unit Classes and non-base currency positions in the portfolios, by using forward foreign currency exchange contracts in order to hedge against fluctuations in currencies other than the functional currency of the relevant Sub-Fund.

17. Financial instruments cont/d...

- (a) Market Risk cont/d...
- (iii) Currency risk cont/d...

At 30 November 2024, forward foreign currency exchange contracts were held on all Sub-Funds for the purpose of Unit Class and portfolio hedging (30 November 2023: with the exception of Muzinich Fixed Maturity 2021 Fund).

The tables below provide details of the exposure (by weight) to each currency as at 30 November 2024 at fair value prices. Currency forwards % represents the percentage of forward foreign currency exchange contracts notional values in the NAV.

^{*} Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

At the 30 November 2024 and 30 November 2023 had the exchange rates between foreign currencies and the relevant base currency for each Sub-Fund increased by 10%, with all other variables held constant, the increase in net assets attributable to holders of redeemable participating Units would have amounted to approximately the following amounts. These amounts take account of forward foreign currency exchange contracts notionals of the non-base currency leg. A decrease of 10% would have had an equal, but opposite effect.

Sub-Fund Muzinich Americayield Fund	30/11/2024 US\$39,499,534	30/11/2023

^{**} Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.

(b) Credit risk

This is the risk that one party to a financial instrument or transaction will cause a financial loss for the other party by failing to discharge an obligation when it falls due. This includes counterparty risk and issuer (or investment) risk.

The Sub-Funds are subject to the credit risk of its Depositary with respect to cash balances and settlements. The Investment Manager reviews the creditworthiness of the Depositary for these purposes. The Investment Manager reviews in detail the creditworthiness of all bond issuers before committing to a purchase using available information in the market place. The creditworthiness of issuers is also kept under constant review. The Sub-Funds have no impaired or past due assets.

The Sub-Funds may enter into credit derivatives to isolate and transfer the credit risk associated with a particular reference asset. Credit default swaps provide a measure of protection against defaults of debt issuers. The Sub-Funds' use of credit default swaps does not assure their use will be effective or will have the desired result. A Sub-Fund may either be the buyer or seller in a credit default swap transaction. Credit default swaps are transactions under which the parties obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. On settlement, credit default products may be cash settled or involve the physical delivery of an obligation of the reference entity following a default.

The buyer in a credit default swap contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference asset has occurred.

If a credit event occurs, the seller must pay the buyer the full notional value of the reference asset that may have little or no value. If the Sub-Fund is a buyer and no credit event occurs the Sub-Fund's losses will be limited to the periodic stream of payments over the term of the contract. As a seller, the Sub-Funds will receive a fixed rate of income throughout the term of the contract, provided that there is no credit event. If

(b) Credit risk cont/d...

a credit event occurs, the seller must pay the buyer the full notional value of the reference obligation. The counterparties to the credit default swaps are referenced in the Portfolio.

The Fund may invest in investments such as Bank Loans Participations and typically will result in the Sub-Fund having a contractual relationship only with the lender, not with the borrower. In connection with purchasing participations, the Sub-Funds generally have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and a Sub-Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, a Sub-Fund will assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Sub-Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

As disclosed in Note 11, all cash at bank balances are held with the Depositary (30 November 2023: the Depositary). State Street Bank and Trust Company, the Parent of the Depositary, currently holds a long term rating of Aa2 (30 November 2023: Aa2) (Moody's). The cash held as collateral is held with Barclays Bank (long term rating: A2), BNP Paribas (long term rating: Aa3), Deutsche Bank (long term rating: A3), Goldman Sachs (long term rating: A1), JP Morgan Chase (long term rating: A2) and Morgan Stanley (long term rating: A3) as detailed in Note 11 (30 November 2023: Barclays Bank, BNP Paribas, Deutsche Bank, Goldman Sachs, JP Morgan Chase and Morgan Stanley). State Street Bank and Trust Company also act as counterparty to the forward foreign currency exchange contracts held at 30 November 2024 and 30 November 2023.

The total carrying value of assets exposed to credit risk and details of credit risk exposures and concentration are contained in the Portfolios of Investments. At 30 November 2024 and 30 November 2023, the following financial assets were exposed to credit risk as summarised in the table below:

- * Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.
- *** Effective 26 January 2024, Muzinich High Yield Bond 2024 Fund changed its name to Muzinich High Yield Bond 2028 Fund.
- **** Muzinich Global Market Duration Investment Grade Fund launched on 26 January 2024.
- ***** Muzinich Global Fixed Maturity 2028 Fund launched on 11 April 2024.

In the event of insolvency or bankruptcy of the Depositary, the cash held by the Depositary on behalf of the Sub-Funds will be treated as a general creditor. The long term credit rating of the parent company of the Depositary, State Street Bank and Trust Company is Aa1 (30 November 2023: Aa2) (Moody's).

The Sub-Funds' securities are maintained within the Depositary's custodial network in segregated accounts. The Depositary will ensure that any agents it appoints to assist in safekeeping the assets of the Sub-Fund will segregate the assets of the Sub-Fund. Thus in the event of insolvency or bankruptcy of the Depositary, the Sub-Fund's assets are segregated and protected and this further reduces counterparty risk.

The Sub-Fund will however, be exposed to the risk of the Depositary or certain depositories used by the Depositary, in relation to the Sub-Fund's cash held by the Depositary. In event of the insolvency or bankruptcy of the Depositary, the Sub-Fund will be treated as a general creditor of the Depositary in relation to cash holdings of the Sub-Fund.

(c) Liquidity risk

Liquidity risk is defined as the risk that the Sub-Funds may not be able to meet its financial liabilities when they fall due.

The Sub-Funds' investments are primarily in commercial notes, bonds, equities, forward foreign currency exchange contracts, credit default swaps and total return swaps. These are subject to liquidity risks because there may be no active secondary market for these types of investments. The Sub-Funds may not be able to quickly liquidate their investments at amounts close to their fair values in order to respond to its liquidity requirements, including those arising from the redemption of participating Units. The Investment Manager monitors the Sub-Funds' liquidity positions on a daily basis.

17. Financial instruments cont/d...

(c) Liquidity risk cont/d...

The main financial liability of the Sub-Funds is the redemption of participating Units. As part of an open-ended umbrella unit trust, the Sub-Funds are required to redeem Units at a price equivalent to the NAV per Unit, subject to settlement and dealing restrictions laid down in the Trust Deed. The Sub-Funds may also apply a redemption fee of up to a maximum of 1% (% of NAV per Unit). The Sub-Fund is therefore exposed to the liquidity risk of meeting Unitholder's redemptions at any time. The Investment Manager ensures that the Sub-Funds have at all times a sufficient amount of liquid assets in order to meet potential redemption requests. The Investment Manager monitors this situation by reviewing liquidity in the market place. The Sub-Funds also have the ability to limit daily redemption requests to 10% of the Units in issue.

The Sub-Funds enter into derivative contracts traded over the counter ("OTC"), which are not traded in an organised market. The Sub-Funds may not be able to liquidate these OTC contracts at an amount which represents their fair value. The Sub-Funds enter into forward foreign currency exchange contracts for the purpose of hedging the Unit Classes in the relevant Sub-Fund and Muzinich LongShortCreditYield Fund enters into other OTC derivative contracts (including credit default swaps, total return swaps and options) in order to pursue its investment objective. The Investment Manager does not consider liquidity risk in relation to OTC contracts to be significant to the Sub-Funds.

^{*} Muzinich Global Fixed Maturity 2027 Fund launched on 20 April 2023.

All the above liabilities are payable within three months.

(d) Capital Management

The capital of the Fund is represented by the net assets attributable to redeemable participating Unitholders. The amount of net assets attributable to redeemable participating Unitholders can change significantly on a daily basis, as the Fund is subject to daily subscriptions and redemptions at the discretion of the Unitholders.

As a result, a redemption request may have a significant impact on the liquidity of the Fund and its ability to continue as a going concern. See Liquidity Risk note above for details of how this risk is mitigated.

The Fund's aim with respect to management of its capital is to safeguard its ability to continue as a going concern in order that each Sub-Fund may achieve its overall objective of long-term capital growth, and to maintain a strong capital base to support the development of each Sub-Fund's investment activities.

The Investment Manager monitors capital on the basis of the value of net assets attributable to redeemable participating Unitholders.

(e) Fair value hierarchy

IFRS 13 requires disclosures surrounding the level in the fair value hierarchy in which fair value measurement inputs are categorised for assets and liabilities measured in the Statement of Financial Position. The determination of the fair value for financial assets and financial liabilities for which there is no observable market price requires the use of valuation techniques.

17. Financial instruments cont/d...

(e) Fair value hierarchy cont/d...

The Fund categorises investments using the following hierarchy as defined by IFRS 13:

- Level 1 Quoted market prices in an active market for an identical instrument.
- Level 2 Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

For each class of assets and liabilities not measured at fair value in the Statement of Financial Position but for which fair value is disclosed, IFRS 13 requires the Fund to disclose the level within the fair value hierarchy within which the fair value measurement would be categorised and a description of the valuation technique and inputs used in the technique.

Assets and liabilities, including reverse repurchase agreements, not carried at fair value are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

Cash and cash equivalents include deposits held with banks and other short-term investments in an active market and they are categorised as Level 1.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Fund. Payable for investments sold and other payables represent the contractual amounts and obligations due by the Fund for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.

The puttable value of redeemable units is calculated based on the net difference between total assets and all other liabilities of each Sub-Fund within the Fund in accordance with the Funds' Prospectus. These Units are not traded on an active market.

A demand feature is attached to these Units, as they are redeemable at the holders' option and can be redeemed on any dealing date for cash/assets equal to a proportionate share of the Fund's NAV attributable to the Unit Class. The fair value is based on the amount payable on demand, discounted from the first date that the amount could be required to be paid. The impact of discounting in this instance is not material. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable units held.

17. Financial instruments cont/d...

(e) Fair value hierarchy cont/d...

The following table analyses within the fair value hierarchy the Sub-Fund's financial assets and liabilities measured at fair value at 30 November 2024:

There were no transfers between levels during the financial year ended 30 November 2024 or the financial year ended 30 November 2023.

(f) Offsetting

The Sub-Funds mitigate the credit risk of derivatives by entering into master netting agreements and holding collateral in the form of cash.

Derivative transactions are either transacted on an exchange with central clearing counterparties or entered into under International Derivatives Swaps and Dealers Association ("ISDA") master netting agreements. A default by a party in performance with respect to one transaction under such an ISDA agreement would give the other party the right to terminate all transactions under such ISDA agreement and calculate one net amount owed from one party to the other. Exchange traded derivatives are not subject to a master netting agreement.

The ISDA agreement does not meet the criteria for offsetting in the Statement of Financial Position. This is because they create a right of set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Fund or the counterparties. In addition, the Fund and its counterparties do not intend to settle on a net basis or to realise the assets and settle the liabilities simultaneously. All amounts are shown gross in the Statement of Financial Position. Amounts shown in the tables below show positions in the event of default, insolvency or bankruptcy of the Fund or the counterparties.

17. Financial instruments cont/d...

(f) Offsetting cont/d...

At 30 November 2024 and 30 November 2023 futures contacts held by Muzinich Europeyield Fund, Muzinich LongShortCreditYield Fund and Muzinich European Credit Alpha Fund were traded on an exchange and therefore not subject to a master netting agreement and have been excluded from the tables below.

The following tables present information about the offsetting of FDIs and collateral amounts as at 30 November 2024:

The Prospectus, the Key investor information documents, the Trust Deed, the annual and semi-annual financial statements as well as a list containing all purchases and sales which have been made during the reporting period can be obtained free of charge at the office of the Swiss Representative. The last Unit prices can be found on www.fundinfo.com. For the shares of the Funds distributed to non-qualified investors in and from Switzerland and for the shares of the Funds distributed to qualified investors in Switzerland, the place of performance is Geneva. Each time performance data is published, it should be noted that the past performance is no indication of current or future performance, and that it does not take account of the commissions and costs incurred on the issue and redemption of shares.

Schedule of Material Portfolio Changes for the financial year ended 30 November 2024 (Unaudited)

In accordance with the UCITS regulations this statement presents the aggregate purchases and aggregate sales of a security exceeding 1.00% of the total value of purchases or sales for the financial year or at least the top 20 purchases and sales.

Appendix III - Remuneration Disclosure (Unaudited)

Reference is made to the UCITS Regulations and specifically the remuneration requirements set out in regulations 24A and 24B thereof. The Manager has implemented a remuneration policy in line with the provisions of regulation 24A ("Remuneration Policy").

The European Securities and Markets Authority ("ESMA") was mandated under Article 14a(4) of Directive 2009/65/EC (as amended) (the "UCITS Directive") to produce guidance on the application of remuneration principles under Article 14b. ESMA issued the "Guidelines on sound remuneration policies under the UCITS Directive and AIFMD" ("the "ESMA Guidelines") on 31 March 2016, and the ESMA Guidelines have applied since 1 January 2017 to UCITS management companies such as the Manager, and to the extent applicable its delegate(s).

Regulation 89(3A) of the UCITS Regulations requires the annual report of the Fund to contain certain remuneration-related information, and this requirement applied as of 18 March 2016.

In the financial year of the Fund ended on 30 November 2024:

- (a) Only fixed remuneration (meaning payments or benefits without consideration of any performance criteria) is paid by the Manager to the three independent Directors. The other five Directors who are executives of the Manager and/or Investment Manager are not paid such remuneration. The Board of Directors of the Manager, as identified in the section of the Prospectus headed "Directory", are responsible for awarding remuneration and any benefits and these are set at a level that reflects the qualifications and contribution required taking into account the Manager's size, internal organisation and the nature, scope and complexity of its activities.
- (b) Director's fees charged for the year amounted to EUR 65,493.
- (c) The Remuneration Policy was subject to an annual review in accordance with the requirements of the UCITS Regulations and amended to reflect changes in Identified Staff of the Manager.
- (d) In accordance with Section IX of the ESMA Questions and Answers on the UCITS Directive, the following extract is the information disclosed by the Investment Manager which is subject to regulatory requirements on remuneration for its relevant staff to whom investment management (including risk management) activities have been delegated that are equally as effective as those under the UCITS Directive.
- (e) For the year ended 31 December 2024, the total remuneration to all staff paid by the AIFM during that period was EUR 21,571,977.
 - Due to the Investment Manager's financial year end, the audited information for 2023 needed to provide relevant disclosure attributable to the Fund is not currently available. However, the latest available audited information is included below and, for reference, the fees paid to the Manager by the Fund during the period are disclosed in Note 17 above. The Investment Manager's fees are paid out of the Manager's fee.

Appendix III - Remuneration Disclosure (Unaudited) cont/d...

The below information is an extract from the Notes to the Financial Statements of Muzinich & Co. Limited for the Year Ended 31 December 2023.

Staff costs

	2023
	£
Wages and salaries	53,668,494
Social security costs	7,053,075
Cost of defined contribution scheme	1,445,987
	62,167,556

Employees

The average monthly number of employees, including the Directors, during the year was as follows:

	2023
	No.
Marketing and Client Service	63
Investment	79
Operations and Administrative	51
	193

Appendix IV - Securities Financing Transaction Regulations (Unaudited)

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse, and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of securities financing transactions and Total Return Swaps.

Muzinich Global Market Duration Investment Grade Fund	2,721,896	76.68	-	-

There was no commission charged on the transactions in the above table for the financial year ended 30 November 2024.

Appendix VI - Sustainable Finance Disclosure (Unaudited)

1. Article 6 Disclosure

The following sub-fund of Muzinich Funds has been categorised as Article 6 financial products for the purposes of Regulation (EU) 2019/2088 ("SFDR") (each, an "Article 6 Fund", together the "Article 6 Funds"):

· Muzinich High Yield Bond 2028 Fund

For the purpose of Regulation EU/ 2020/852 (the "Taxonomy Regulation"), it should be noted that the investments underlying the Article 6 Funds do not take into account the EU criteria for environmentally sustainable economic activities.

2. Article 8 Disclosure

The following sub-funds of Muzinich Funds have been categorised as Article 8 financial products for the purposes SFDR (each, an "Article 8 Fund", together the "Article 8 Funds").

- · Muzinich Americayield Fund
- Muzinich Europeyield Fund
- · Muzinich Global High Yield Low Carbon Credit Fund
- · Muzinich Enhancedyield Short-Term Fund
- · Muzinich ShortDurationHighYield Fund
- Muzinich Sustainable Credit Fund
- · Muzinich LongShortCreditYield Fund
- Muzinich EmergingMarketsShortDuration Fund
- · Muzinich Global Tactical Credit Fund
- · Muzinich Asia Credit Opportunities Fund
- Muzinich Emerging Market Corporate Debt Fund
- · Muzinich European Credit Alpha Fund
- Muzinich Global Short Duration Investment Grade Fund
- Muzinich Dynamic Credit Income Fund
- · Muzinich Global Fixed Maturity 2027 Fund
- · Muzinich Global Market Duration Investment Grade Fund
- · Muzinich Global Fixed Maturity 2028 Fund

Muzinich & Co. Limited (the "Investment Manager") evaluates and integrates sustainability risks as part of the investment research process and uses data provided by experienced, independent ESG data providers in order to evaluate the ESG risk management by an issuer.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Global High Yield Low Carbon Credit Fund

Legal entity identifier: 49300MBB0IKQASDXP90

Environmental and/or social characteristics

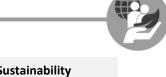

Did this financial product have a sustainable investment objective? ★ It promoted Environmental/Social (E/S) It made sustainable characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 1.98% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU X activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 40% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from the extraction of conventional and non-conventional fossil fuels
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

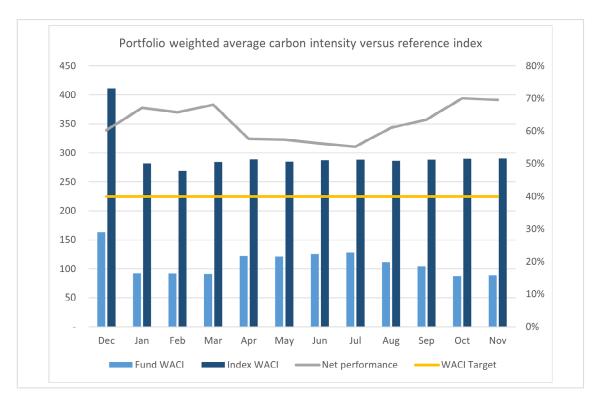

The weighted average carbon intensity of this financial product has remained more than 40% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Limits on ESG scoring and research coverage

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) with an ESG Risk Rating of 40 or above as specified by the ESG policy
- Had a weighted average ESG Risk Rating below 30 as specified by the ESG policy
- Maintained a portfolio which when excluding cash holdings, was more than 90% covered by an independent ESG data provider

Reference index: ICE BofA Global High Yield Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.
Unadjusted gender pay gap	Medium	
Board gender diversity	Medium	The Investment Manager monitors controversies relating to
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.
Lack of anti-corruption and anti-bribery policies	High	

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Virgin Media Secured Fin	Information and Communication	1.39%	GB
Ephios Subco Sarl	Human Health and Social Work Activities	1.23%	LU
Vz Vendor Financing	Information and Communication	1.21%	NL

Klabin Austria Gmbh	Manufacturing	0.81%	BR

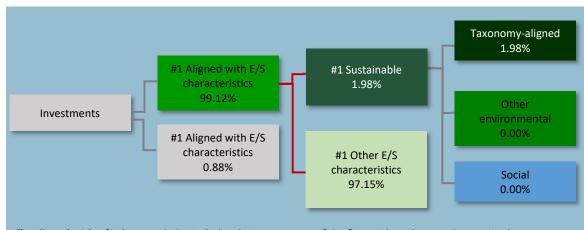

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Information and Communication	19.33%
Manufacturing	19.04%
Financial and Insurance Activities	15.94%
Arts, Entertainment and Recreation	10.46%
Transportation and Storage	5.40%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	4.95%
Real Estate Activities	4.64%
Electricity, Gas, Steam and Air Conditioning Supply	3.62%
Administrative and Support Service Activities	3.36%
Human Health and Social Work Activities	2.69%
CASH AND OTHER	10.57%
Sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	2.84%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

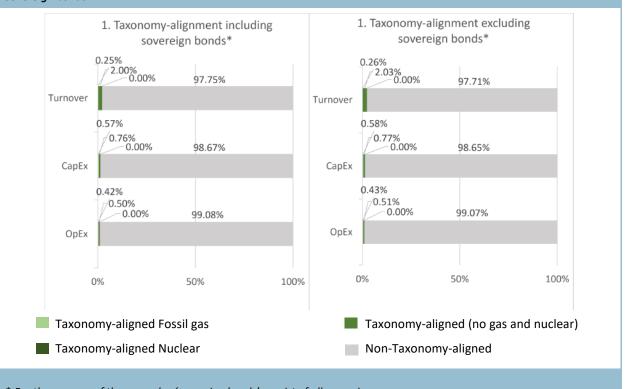

×	Yes:			
		X In fossil gas	×	In nuclear energy
	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities					
Transitional activities	0.00%				
Enabling activities	0.30%				

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 1.98%, while the figure for the previous reference period was 2.50%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it. are sustainable

investments with an environmental objective that **do** not take into account the criteria for environmentally sustainable economic activities under Regulation

(EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

This financial product did not target a minimum allocation to Sustainable Investments

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Sustainable Credit Fund

Legal entity identifier: 549300J0XERWY3FZ4D65

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from production of alcoholic beverages
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from production or distribution of adult entertainment
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from production of fur or specialty leather products
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from the provision of commercial gambling services
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from military contracting
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from the production of nuclear power or related services
- Held 0 issuers (0% by weight) deriving more than 5% of revenues from the extraction of non-conventional forms of oil or gas
- Held 0 issuers (0% by weight) deriving more than 0% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation
- Held 0 issuers (0% by weight) listed on the Norges Bank Investment Management (NBIM) exclusion list

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

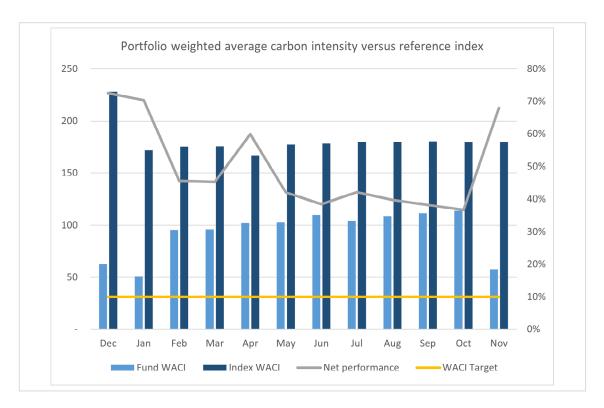

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

The percentile rank of an issuers ESG score relative to industry peers

This investment product held 10 issuers (or 2.73% by weight) on average throughout the year which were deemed by an independent ESG data provider to rank below their sector median ESG score. These were typically holdings which passively breached the threshold or which the Investment Manager anticipated would improve to meet the stated threshold within a reasonable timeframe.

Reference index: Bloomberg Barclays Global Aggregate Corporate Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment
Hazardous waste ratio	Low	Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.
Unadjusted gender pay gap	Medium	
Board gender diversity	Medium	The Investment Manager monitors controversies relating to
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.
Lack of anti-corruption and anti-bribery policies	High	

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Standard Chartered Plc	Financial and Insurance Activities	2.03%	GB
Westpac Banking Corp	Financial and Insurance Activities	1.75%	AU

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	35.07%
Manufacturing	18.28%
Information and Communication	12.37%
Real Estate Activities	7.53%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	5.02%
Transportation and Storage	4.03%
Electricity, Gas, Steam and Air Conditioning Supply	2.75%
Professional, Scientific and Technical Activities	2.23%
Accommodation and Food Service Activities	2.08%
Administrative and Support Service Activities	1.84%
CASH AND OTHER	8.80%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	5.04%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

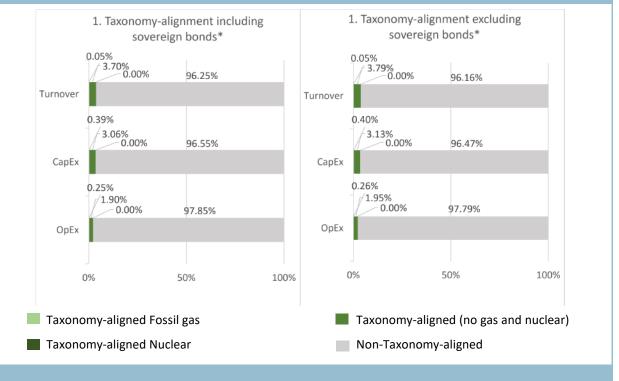

X	Yes:			
		In fossil gas	×	In nuclear energy
	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning an	d Enabling Activities
Transitional activities	0.00%
Enabling activities	0.66%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 3.66%, while the figure for the previous reference period was 5.72%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable

economic activities

under Regulation (EU) 2020/852.

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich AMERICAYIELD FUND

Legal entity identifier: 54930086G66KM1ZTG004

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable **economic activities**. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

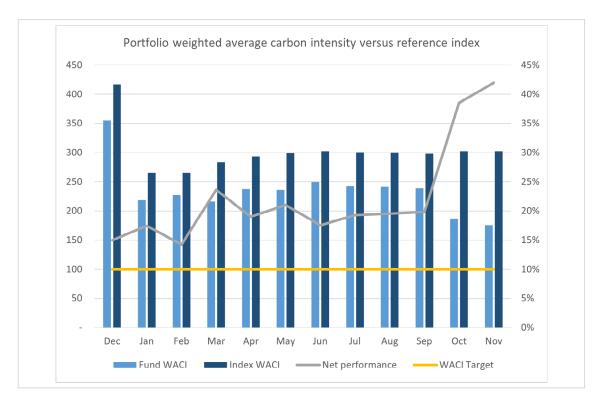

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA BB-B US Non-Financial Cash Pay High Yield Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

specific assets.

Asset allocation describes the

share of investments in

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Manufacturing	25.24%
Information and Communication	14.05%
Financial and Insurance Activities	9.80%
Mining and Quarrying	9.41%
Transportation and Storage	7.77%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	5.86%
Human Health and Social Work Activities	5.15%
Real Estate Activities	4.74%
Arts, Entertainment and Recreation	4.52%
Accommodation and Food Service Activities	3.82%
CASH AND OTHER	9.62%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	8.19%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

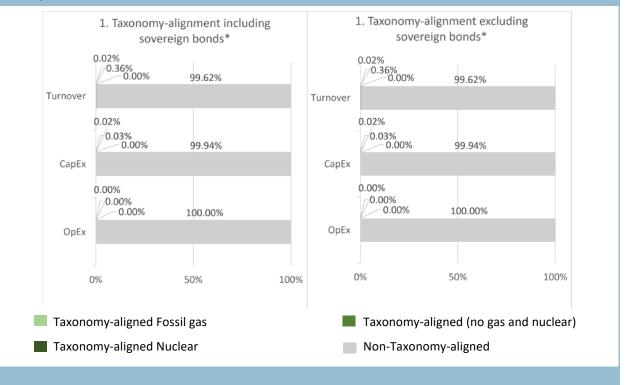

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

st For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	0.26%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 0.36%, while the figure for the previous reference period was 0.87%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it. are

sustainable investments with an environmental objective that **do** not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Asia Credit Opportunities Fund

Legal entity identifier: 5493002D54TFNT7E2J18

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? ★ It promoted Environmental/Social (E/S) It made sustainable characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 3.33% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU X activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

environmental objective might be aligned with the Taxonomy or not.

stainability

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

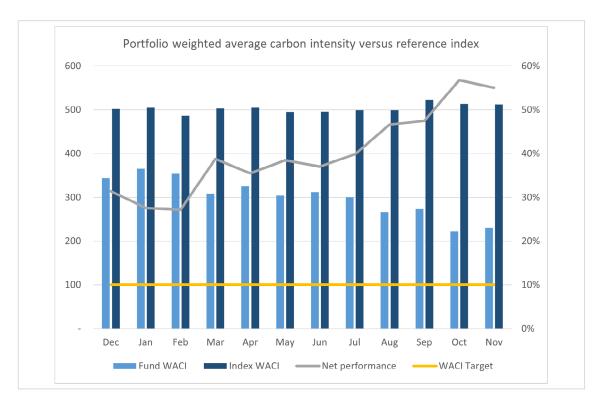

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA Asian Dollar Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via mon portfolio carbon reports which include energy mixes portfolio companies and is linked to this financial produ

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the

specific assets.

share of investments in

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	31.03%
Manufacturing	23.76%
Information and Communication	7.61%
Transportation and Storage	6.39%
Electricity, Gas, Steam and Air Conditioning Supply	6.18%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	5.71%
Arts, Entertainment and Recreation	5.35%
Accommodation and Food Service Activities	4.09%
Real Estate Activities	3.77%
Public Administration and Defence; Compulsory Social Security	2.73%
CASH AND OTHER	3.39%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	13.69%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

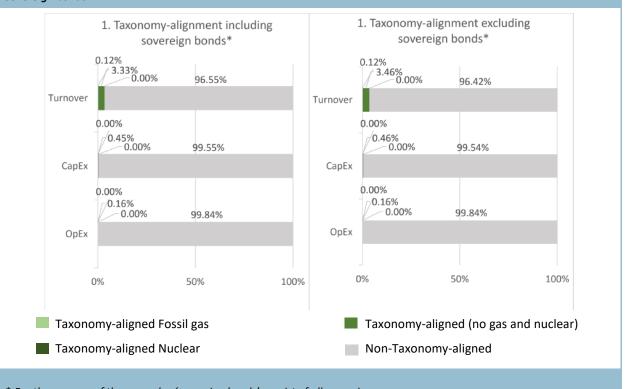

×	Yes:			
		X In fossil gas	×	In nuclear energy
	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities	
Transitional activities	0.00%
Enabling activities	1.49%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 3.33%, while the figure for the previous reference period was 4.35%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into

account the criteria for environmentally

economic activities

under Regulation (EU) 2020/852.

sustainable

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?

Adverse Impact Category	Actions Taken to Address Adverse Impacts		
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.		
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.		
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.		
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.		

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Dynamic Credit Income Fund

Legal entity identifier: 549300MSJCNAPHIGUC69

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable It promoted Environmental/Social (E/S) X characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 2.38% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU X activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: ____%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable **economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics

promoted by the

financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from gambling operations
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from adult entertainment
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

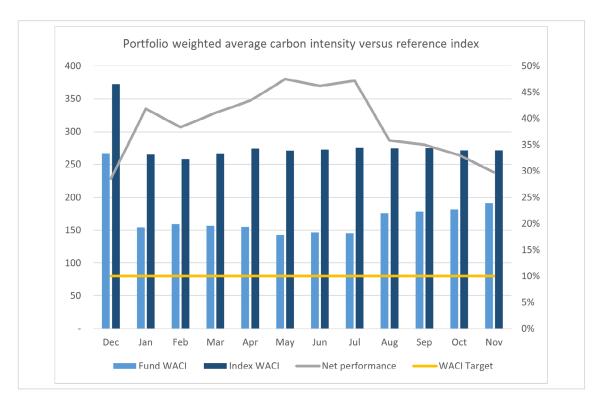

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: Custom: 70% ICE BofA BB-B Global High Yield Index, 30% ICE BofA BBB Global Corporate Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer research period. Under some circumstances the Investment
Hazardous waste ratio	Low	Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.
Unadjusted gender pay gap	Medium	
Board gender diversity	Medium	The Investment Manager monitors controversies relating to
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.
Lack of anti-corruption and anti-bribery policies	High	

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

> 01/12/2023 -30/11/2024

Asset allocation describes the

specific assets.

share of investments in

Largest investments	Sector	% Assets	Country
Barclays Plc	Financial and Insurance Activities	1.36%	GB
Us Treasury N/b	Public Administration and Defence;	1.22%	US
Tenet Healthcare Corp	Human Health and Social Work Activities	0.99%	US

Venture Global Lng Inc	Manufacturing	0.70%	US
Caixabank Sa	Financial and Insurance Activities	0.68%	ES

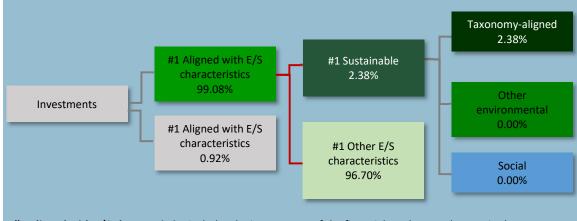

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Manufacturing	29.36%
Financial and Insurance Activities	18.15%
Information and Communication	11.32%
Transportation and Storage	7.13%
Real Estate Activities	6.00%
Mining and Quarrying	5.90%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	4.93%
Human Health and Social Work Activities	2.96%
Electricity, Gas, Steam and Air Conditioning Supply	2.70%
Administrative and Support Service Activities	2.34%
CASH AND OTHER	9.21%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	11.72%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

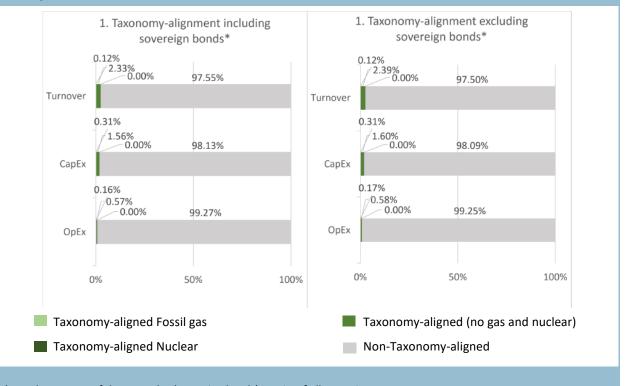

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

st For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning ar	nd Enabling Activities
Transitional activities	0.00%
Enabling activities	0.68%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 2.38%, while the figure for the previous reference period was 2.33%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation

(EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts		
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.		
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.		
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.		
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.		

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich European Credit Alpha Fund

Legal entity identifier: 549300ZKLJE9R6P9GS41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

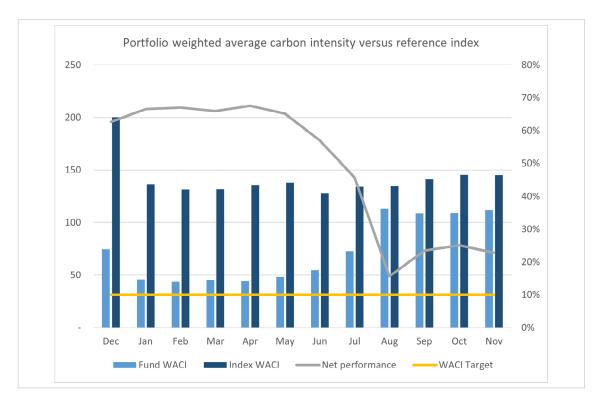

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA BB-B Euro High Yield Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via mon portfolio carbon reports which include energy mixes portfolio companies and is linked to this financial producarbon efficiency target. What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Deutsche Bank Ag	Financial and Insurance Activities	3.02%	DE
Standard Chartered Plc	Financial and Insurance Activities	1.91%	GB
Lloyds Banking Group Plc	Financial and Insurance Activities	1.58%	GB
Vz Vendor Financing	Information and Communication	1.57%	NL
Electricite De France Sa	Electricity, Gas, Steam and Air Conditioning	1.52%	FR
Iliad Holding Sas	Information and Communication	1.51%	FR
Telefonica Europe Bv	Information and Communication	1.51%	ES
Volkswagen Intl Fin Nv	Manufacturing	1.39%	DE
Banco Santander Sa	Financial and Insurance Activities	1.38%	ES
Softbank Group Corp	Information and Communication	1.35%	JP
Cirsa Finance Inter	Arts, Entertainment and Recreation	1.23%	LU
Bayer Ag	Manufacturing	1.22%	DE
Caixabank Sa	Financial and Insurance Activities	1.19%	ES
Virgin Media Secured Fin	Information and Communication	1.17%	GB
Flora Food Management Bv	Manufacturing	1.15%	NL

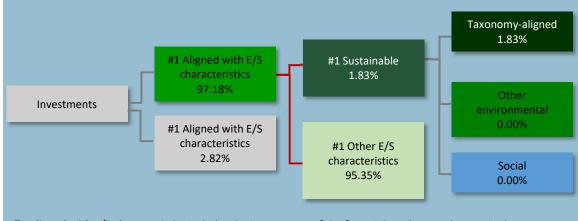

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	27.60%
Manufacturing	19.78%
Information and Communication	15.94%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	5.22%
Real Estate Activities	5.06%
Arts, Entertainment and Recreation	4.19%
Administrative and Support Service Activities	4.05%
Transportation and Storage	2.75%
Electricity, Gas, Steam and Air Conditioning Supply	2.61%
Mining and Quarrying	2.54%
CASH AND OTHER	10.24%
Sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	6.34%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

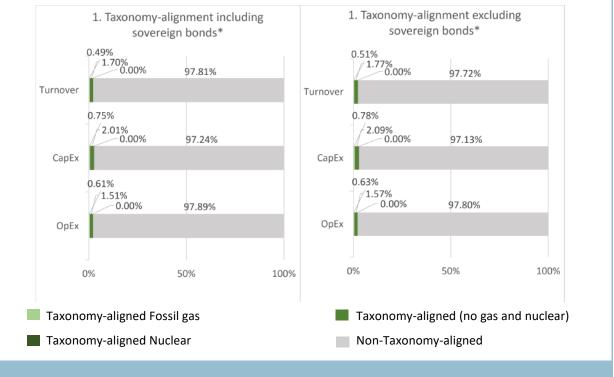

X	Yes:			
		X In fossil gas	×	In nuclear energy
	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	0.29%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 1.83%, while the figure for the previous reference period was 2.37%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Emerging Market Corporate Debt Fund

Legal entity identifier: 549300720XDMF6SMWG51

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

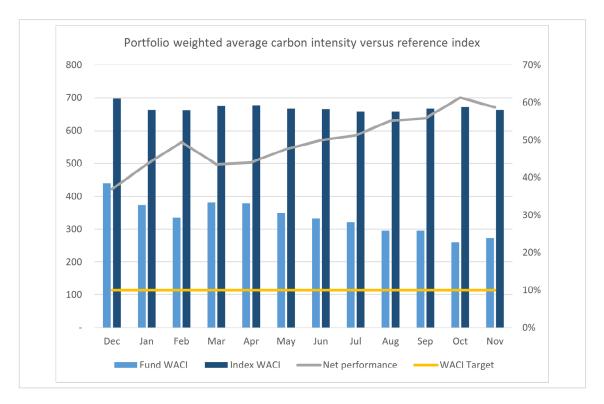

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA US Emerging Markets Liquid Corporate Plus Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via mont portfolio carbon reports which include energy mixes portfolio companies and is linked to this financial productarbon efficiency target. The Investment Manager engage with certain issuers where it considers there to be opportunity for the issuer to mitigate its impact on this fact	
Energy consumption intensity per high impact climate sector	Low		
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year.	
Emissions to water	Low	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager of independent ESG data provider considers an issuer to severely breached the UNGC principles pr OECD guideline multinational enterprises, the Investment Manager's interprises.	
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.	
Unadjusted gender pay gap	Medium		
Board gender diversity	Medium	The Investment Manager monitors controversies relating to	
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to	
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity	
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Lack of anti-corruption and anti-bribery policies	High		

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Fortune Star Bvi Ltd	Accommodation and Food Service	2.04%	CN
Sk Hynix Inc	Manufacturing	2.02%	KR
Petroleos Mexicanos	Manufacturing	1.94%	MX
Huarong Finance 2017 Co	Financial and Insurance Activities	1.85%	CN
Prosus Nv	Information and Communication	1.63%	CN
Teva Pharm Fnc NI Ii	Manufacturing	1.62%	IL
Indian Railway Finance	Transportation and Storage	1.57%	IN
Gold Fields Orogen Hold	Mining and Quarrying	1.50%	ZA
Grupo Bimbo Sab De Cv	Manufacturing	1.45%	MX
America Movil Sab De Cv	Information and Communication	1.45%	MX
Pt Pertamina (persero)	Manufacturing	1.45%	ID
Ecopetrol Sa	Manufacturing	1.43%	CO
Saudi Arabian Oil Co	Manufacturing	1.38%	SA
Power Finance Corp Ltd	Financial and Insurance Activities	1.29%	IN
Gusap Iii Lp	Manufacturing	1.20%	BR

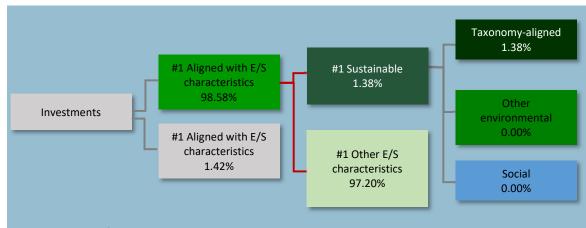

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

describes the share of investments in specific assets.

Asset allocation

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Manufacturing	35.89%
Financial and Insurance Activities	18.16%
Transportation and Storage	8.35%
Mining and Quarrying	7.04%
Information and Communication	5.79%
Electricity, Gas, Steam and Air Conditioning Supply	4.84%
Real Estate Activities	4.21%
Accommodation and Food Service Activities	3.81%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	3.51%
Arts, Entertainment and Recreation	3.15%
CASH AND OTHER	5.26%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	22.01%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

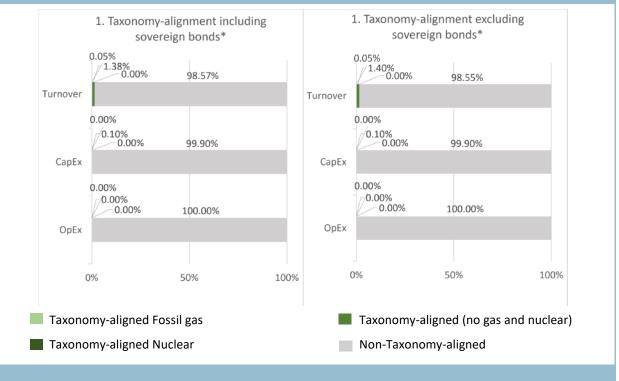

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities			
Transitional activities	0.00%		
Enabling activities	0.32%		

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 1.38%, while the figure for the previous reference period was 1.93%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation

(EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich EmergingMarketsShortDuration Fund

Legal entity identifier: 549300ND8K253GYQK585

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

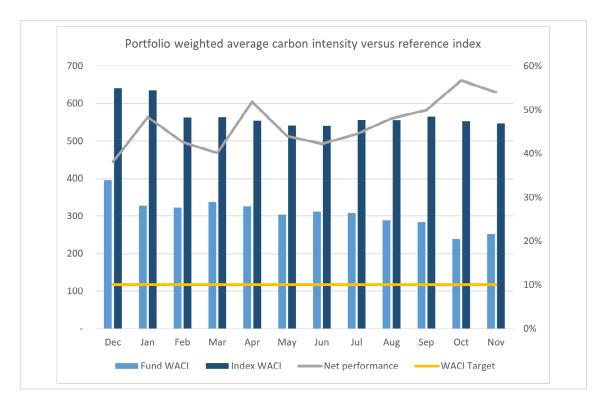

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: Custom Muzinich blend

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of	
Energy consumption intensity per high impact	Low	portfolio companies and is linked to this financial product's carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	28.66%
Manufacturing	23.18%
Mining and Quarrying	7.54%
Transportation and Storage	6.58%
Real Estate Activities	5.80%
Information and Communication	4.95%
Electricity, Gas, Steam and Air Conditioning Supply	4.77%
Accommodation and Food Service Activities	4.25%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	3.63%
Arts, Entertainment and Recreation	2.59%
CASH AND OTHER	8.05%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	19.97%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

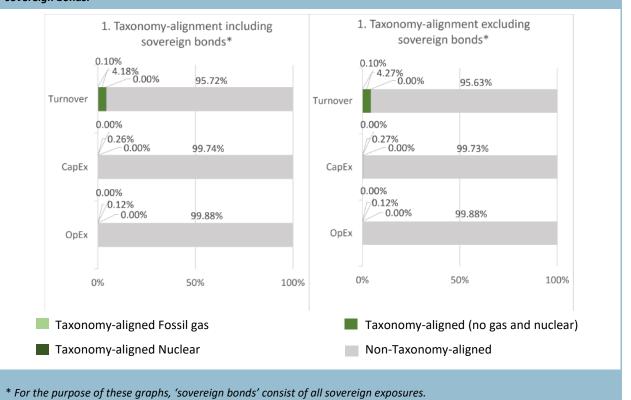

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	0.60%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 4.18%, while the figure for the previous reference period was 3.78%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

are

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Enhancedyield Short-Term Fund

Legal entity identifier: 549300T0Z7X48JW8L065

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? ★ It promoted Environmental/Social (E/S) It made sustainable characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 4.21% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU X activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

sustainable

Sustainable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

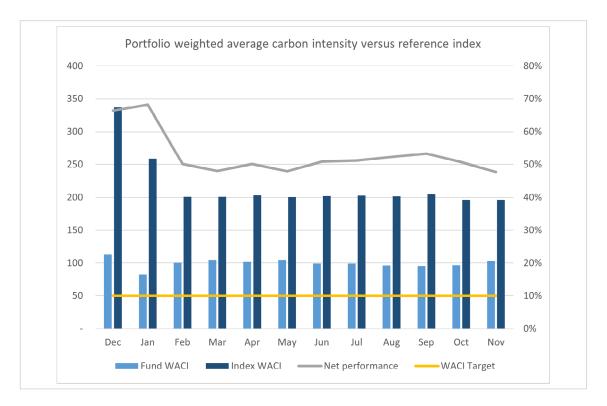

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: Custom: 60%ICE BofA 1-3 Year Global Corporate Index, 40% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's			
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.

James Hardie Intl Fin	Manufacturing	0.90%	US

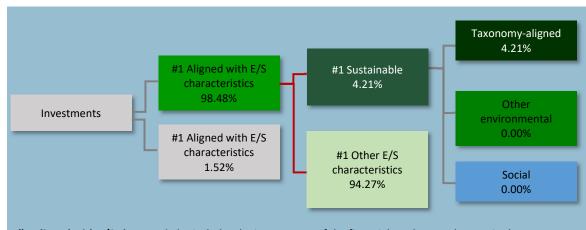

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

share of investments in specific assets.

Asset allocation describes the

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	40.05%
Manufacturing	19.78%
Information and Communication	9.66%
Real Estate Activities	7.80%
Transportation and Storage	7.22%
Accommodation and Food Service Activities	2.07%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	1.95%
Human Health and Social Work Activities	1.59%
Administrative and Support Service Activities	1.35%
Construction	1.29%
CASH AND OTHER	7.24%
Sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	4.07%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

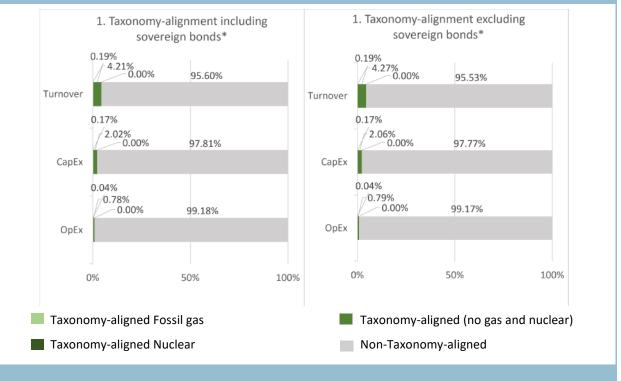

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	0.94%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 4.21%, while the figure for the previous reference period was 3.22%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do

account the criteria

for environmentally

economic activities

under Regulation (EU) 2020/852.

sustainable

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Europeyield Fund

Legal entity identifier: 549300JBHQVWT2N8U421

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable It promoted Environmental/Social (E/S) X characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 2.53% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU X activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: ____%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

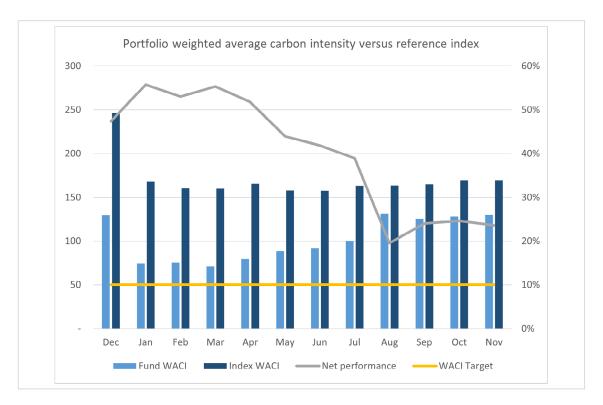

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA BB-B European Currency Non-Financial High Yield Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's	
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engage with certain issuers where it considers there to be opportunity for the issuer to mitigate its impact on this face.	
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year	
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal	
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.	
Unadjusted gender pay gap	Medium		
Board gender diversity	Medium	The Investment Manager monitors controversies relating to	
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to	
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity	
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Lack of anti-corruption and anti-bribery policies	High		

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Virgin Media Secured Fin	Information and Communication	2.35%	GB
Electricite De France Sa	Electricity, Gas, Steam and Air Conditioning	2.02%	FR
Teva Pharm Fnc NI Ii	Manufacturing	1.83%	IL
Iliad Holding Sas	Information and Communication	1.44%	FR
Zf Na Capital	Manufacturing	1.40%	DE
Bayer Ag	Manufacturing	1.32%	DE
Nidda Healthcare Holding	Manufacturing	1.23%	DE
United Group Bv	Information and Communication	1.19%	SI
Verisure Holding Ab	Administrative and Support Service	1.18%	SE
Flora Food Management Bv	Manufacturing	1.18%	NL
Vz Vendor Financing	Information and Communication	1.16%	NL
Forvia Se	Manufacturing	1.16%	FR
Ses Sa	Information and Communication	1.12%	LU
Cirsa Finance Inter	Arts, Entertainment and Recreation	1.08%	LU
Heimstaden Bostad Tresry	Real Estate Activities	1.06%	SE

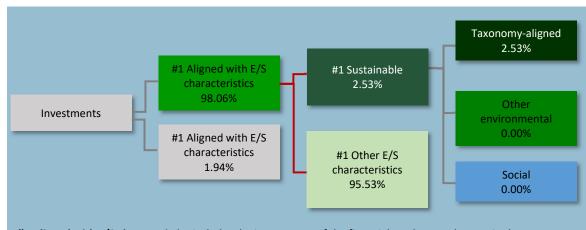

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS	
Manufacturing	27.86%	
Information and Communication	18.13%	
Financial and Insurance Activities	8.02%	
Arts, Entertainment and Recreation	7.51%	
Real Estate Activities	6.66%	
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	5.54%	
Administrative and Support Service Activities	4.74%	
Electricity, Gas, Steam and Air Conditioning Supply	4.17%	
Mining and Quarrying	2.83%	
Transportation and Storage	2.70%	
CASH AND OTHER	11.83%	
Sectors and sub-sectors of the economy that derive revenues from		
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	8.67%	

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

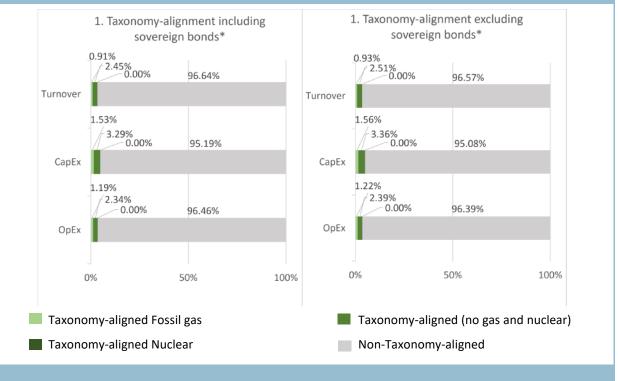

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities			
Transitional activities	0.00%		
Enabling activities	0.52%		

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 2.53%, while the figure for the previous reference period was 1.72%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation

(EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Global Fixed Maturity 2027 Fund

Legal entity identifier: 549300QFNEL887GCER39

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification
system laid down in
Regulation (EU)
2020/852,
establishing a list of
environmentally
sustainable
economic activities.
That Regulation
does not include a
list of socially
sustainable
economic activities.
Sustainable
investments with an

environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

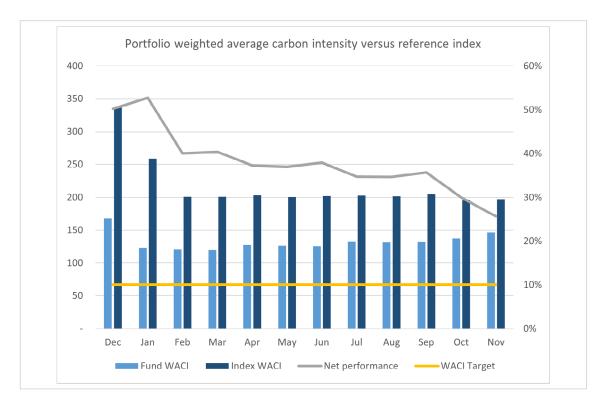

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: Custom: 60%ICE BofA 1-3 Year Global Corporate Index, 40% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's	
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engage with certain issuers where it considers there to be opportunity for the issuer to mitigate its impact on this face.	
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year	
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal	
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.	
Unadjusted gender pay gap	Medium		
Board gender diversity	Medium	The Investment Manager monitors controversies relating to	
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to	
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity	
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Lack of anti-corruption and anti-bribery policies	High		

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Nissan Motor Co	Manufacturing	1.38%	JP
Commerzbank Ag	Financial and Insurance Activities	1.18%	DE
Ford Motor Credit Co Llc	Manufacturing	1.17%	US
Alcoa Nederland Holding	Manufacturing	1.09%	US
Eew Energy From	Electricity, Gas, Steam and Air Conditioning	1.07%	DE
Avolon Holdings Fndg Ltd	Financial and Insurance Activities	1.06%	IE
Mileage Plus Hldings Llc	Transportation and Storage	1.06%	US
Intermediate Capital Gro	Financial and Insurance Activities	1.03%	GB
Cellnex Finance Co Sa	Construction	1.02%	ES
Axa Logistics Europe	Real Estate Activities	1.02%	LU
Autostrade Per L'italia	Transportation and Storage	1.01%	IT
Blue Owl Capital Corp	Financial and Insurance Activities	1.01%	US
Ses Sa	Information and Communication	1.01%	LU
Redexis Sa	Electricity, Gas, Steam and Air Conditioning	1.00%	ES
Iss Global A/s	Administrative and Support Service	0.99%	DK

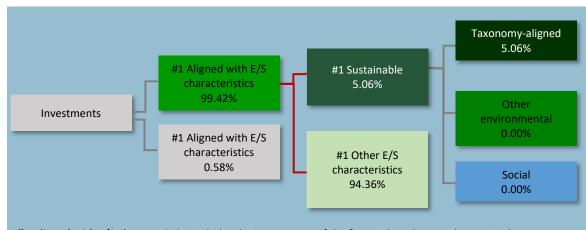

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	28.35%
Manufacturing	20.22%
Real Estate Activities	13.41%
Information and Communication	9.81%
Transportation and Storage	8.39%
Administrative and Support Service Activities	4.54%
Mining and Quarrying	3.41%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	3.36%
Electricity, Gas, Steam and Air Conditioning Supply	2.76%
Arts, Entertainment and Recreation	1.92%
CASH AND OTHER	3.83%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	6.36%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

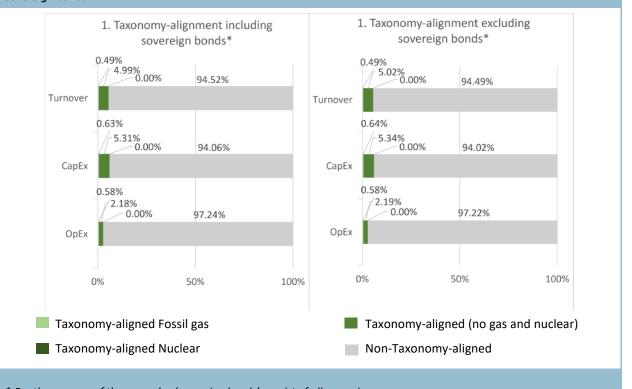

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities						
Transitional activities	0.00%					
Enabling activities	0.67%					

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 5.06%, while the figure for the previous reference period was 6.30%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Global Fixed Maturity 2028 Fund

Legal entity identifier: 2549002RW1CSEZ3H3P69

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

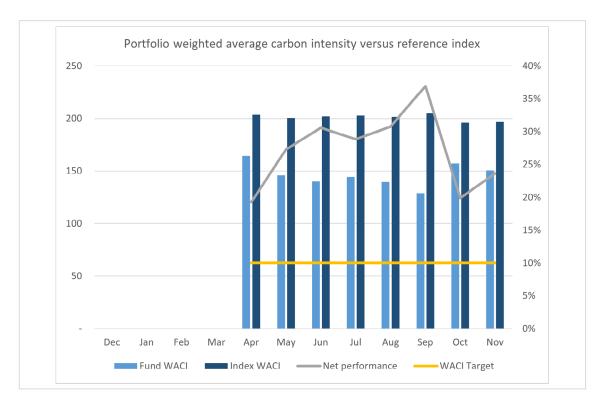

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: Custom: 60%ICE BofA 1-3 Year Global Corporate Index, 40% ICE BofA 1-3 Year BB-B Global High Yield Non-Financial Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product did not exist during the previous reference period hence the Investment Manager is not able to compare the two periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy. The Investment Manager has maintained a WACI target
- in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.
Unadjusted gender pay gap	Medium	
Board gender diversity	Medium	The Investment Manager monitors controversies relating to
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.
Lack of anti-corruption and anti-bribery policies	High	

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Cco Hldgs Llc/cap Corp	Information and Communication	1.87%	US
Ford Motor Credit Co Llc	Manufacturing	1.63%	US
Nissan Motor Co	Manufacturing	1.58%	JP
Macquarie Airfinance Hld	Financial and Insurance Activities	1.55%	GB
Regal Rexnord Corp	Manufacturing	1.47%	US
Harley-davidson Finl Ser	Manufacturing	1.45%	US
Xpo Inc	Transportation and Storage	1.44%	US
Deutsche Bank Ag	Financial and Insurance Activities	1.37%	DE
Enlink Midstream Llc	Transportation and Storage	1.36%	US
Int Distribution Serv	Transportation and Storage	1.35%	GB
Sofina Sa	Financial and Insurance Activities	1.30%	BE
Argenta Spaarbank	Financial and Insurance Activities	1.26%	BE
Nibc Bank Nv	Financial and Insurance Activities	1.26%	NL
Crelan Sa	Financial and Insurance Activities	1.26%	BE
Blue Owl Capital Corp	Financial and Insurance Activities	1.24%	US

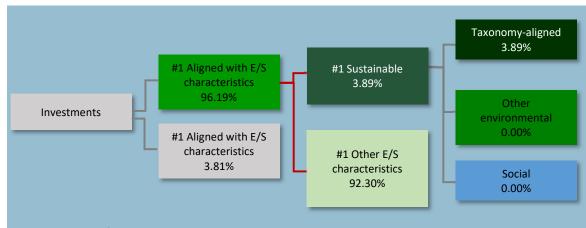

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	25.91%
Manufacturing	21.16%
Information and Communication	15.11%
Real Estate Activities	11.23%
Transportation and Storage	8.58%
Mining and Quarrying	4.73%
Arts, Entertainment and Recreation	4.66%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	2.33%
Administrative and Support Service Activities	1.20%
Construction	0.45%
CASH AND OTHER	4.63%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	8.10%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

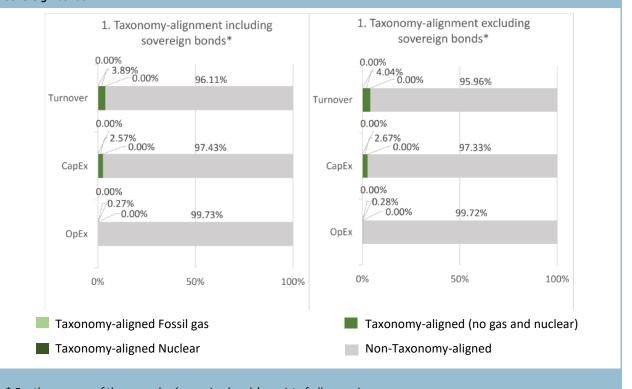

X	Yes:			
		In fossil gas	×	In nuclear energy
	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities						
Transitional activities	0.00%					
Enabling activities	0.71%					

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The financial product did not exist in the previous reporting period, so we cannot compare alignment with the EU Taxonomy for the previous period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into

account the criteria for environmentally

economic activities

under Regulation (EU) 2020/852.

sustainable

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Global Market Duration Investment Grade Fund

Legal entity identifier: 5493000HPX2VMPV8EV14

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

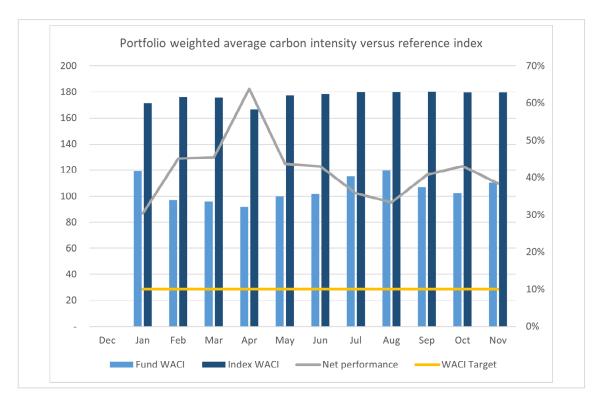

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: Bloomberg Barclays Global Aggregate Corporate Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

...and compared to previous periods?

As the financial product did not exist during the previous reference period hence the Investment Manager is not able to compare the two periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via month portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product carbon efficiency target. The Investment Manager engage with certain issuers where it considers there to be a opportunity for the issuer to mitigate its impact on this factor	
Energy consumption intensity per high impact climate sector	Low		
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year	
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or independent ESG data provider considers an issuer to has severely breached the UNGC principles pr OECD guidelines multinational enterprises, the Investment Manager's inter	
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.	
Unadjusted gender pay gap	Medium		
Board gender diversity	Medium	The Investment Manager monitors controversies relating to	
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to	
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity	
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Lack of anti-corruption and anti-bribery policies	High		

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Hca Inc	Human Health and Social Work Activities	1.79%	US
Unitedhealth Group Inc	Financial and Insurance Activities	1.59%	US
Ford Motor Credit Co Llc	Manufacturing	1.53%	US
Jpmorgan Chase & Co	Financial and Insurance Activities	1.48%	US
T-mobile Usa Inc	Information and Communication	1.43%	US
Cvs Health Corp	Wholesale and Retail Trade; Repair of	1.39%	US
Sherwin-williams Co	Manufacturing	1.35%	US
Bank Of America Corp	Financial and Insurance Activities	1.33%	US
At&t Inc	Information and Communication	1.24%	US
Lowe's Cos Inc	Wholesale and Retail Trade; Repair of	1.21%	US
Abbvie Inc	Manufacturing	1.16%	US
Verizon Communications	Information and Communication	1.16%	US
Barclays Plc	Financial and Insurance Activities	1.11%	GB
American Tower Corp	Real Estate Activities	1.08%	US
Kraft Heinz Foods Co	Manufacturing	1.05%	US

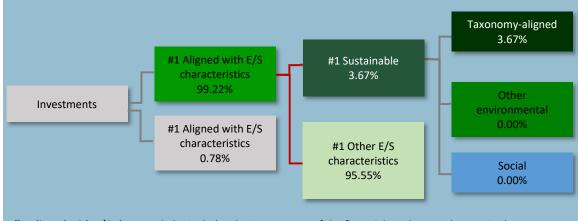

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	28.05%
Manufacturing	28.04%
Information and Communication	10.23%
Real Estate Activities	7.78%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	6.56%
Transportation and Storage	5.91%
Electricity, Gas, Steam and Air Conditioning Supply	4.82%
Mining and Quarrying	2.53%
Human Health and Social Work Activities	1.79%
Professional, Scientific and Technical Activities	1.38%
CASH AND OTHER	2.90%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	9.58%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

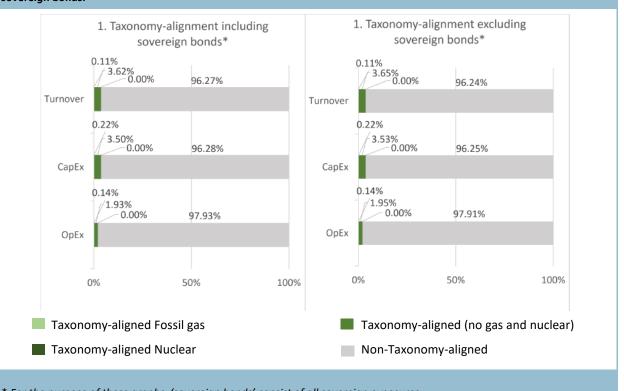

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities			
Transitional activities	0.00%		
Enabling activities	1.69%		

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The financial product did not exist in the previous reporting period, so we cannot compare alignment with the EU Taxonomy for the previous period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation

(EU) 2020/852.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Global Tactical Credit Fund

Legal entity identifier: 549300914IEWVSQ6QI72

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable **economic activities**. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from gambling operations
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from adult entertainment
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

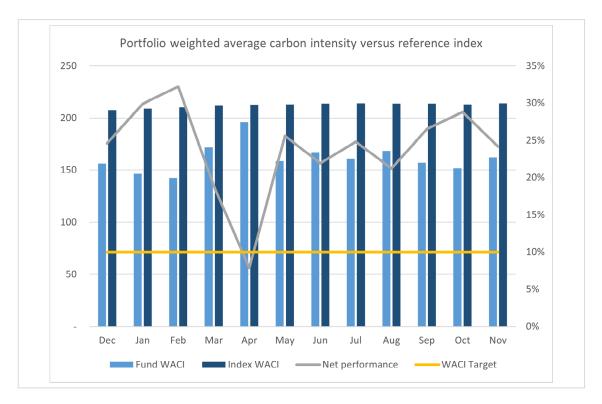

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA Global Corporate & High Yield Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via month portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product carbon efficiency target. The Investment Manager engage with certain issuers where it considers there to be a opportunity for the issuer to mitigate its impact on this factor	
Energy consumption intensity per high impact climate sector	Low		
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year	
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or independent ESG data provider considers an issuer to has severely breached the UNGC principles pr OECD guidelines multinational enterprises, the Investment Manager's inter	
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.	
Unadjusted gender pay gap	Medium		
Board gender diversity	Medium	The Investment Manager monitors controversies relating to	
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to	
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer	
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity	
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.	
Lack of anti-corruption and anti-bribery policies	High		

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS	
Manufacturing	29.11%	
Financial and Insurance Activities	21.13%	
Transportation and Storage	11.02%	
Information and Communication	8.95%	
Public Administration and Defence; Compulsory Social Security	7.66%	
Real Estate Activities	5.68%	
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	3.47%	
Electricity, Gas, Steam and Air Conditioning Supply	3.47%	
Mining and Quarrying	2.04%	
Accommodation and Food Service Activities	1.85%	
CASH AND OTHER	5.62%	
Sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	10.41%	

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

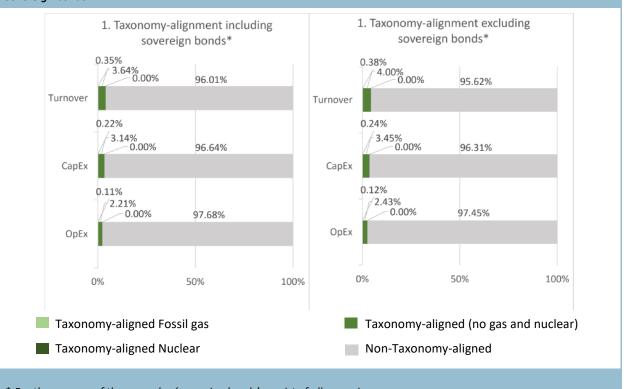

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	2.04%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 3.65%, while the figure for the previous reference period was 2.95%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally

economic activities

under Regulation (EU) 2020/852.

sustainable

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich LongShortCreditYield Fund

Legal entity identifier: 549300T036TR20Y6DW57

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

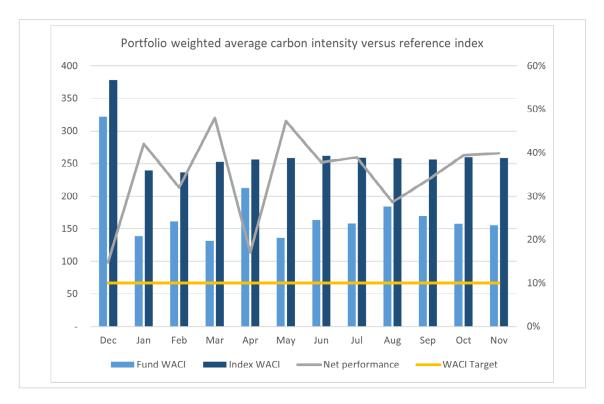

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA US Cash Pay High Yield Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

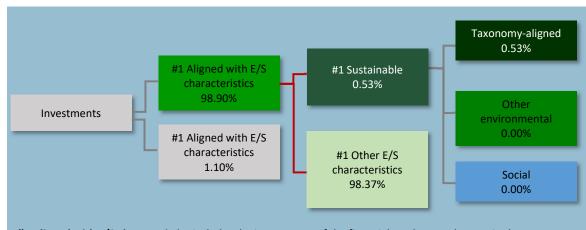

describes the share of investments in

specific assets.

Asset allocation

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Manufacturing	22.03%
Financial and Insurance Activities	16.23%
Information and Communication	11.24%
Transportation and Storage	10.17%
Mining and Quarrying	8.80%
Arts, Entertainment and Recreation	6.62%
Real Estate Activities	4.49%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	4.37%
Public Administration and Defence; Compulsory Social Security	3.20%
Administrative and Support Service Activities	2.80%
CASH AND OTHER	10.06%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	10.89%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

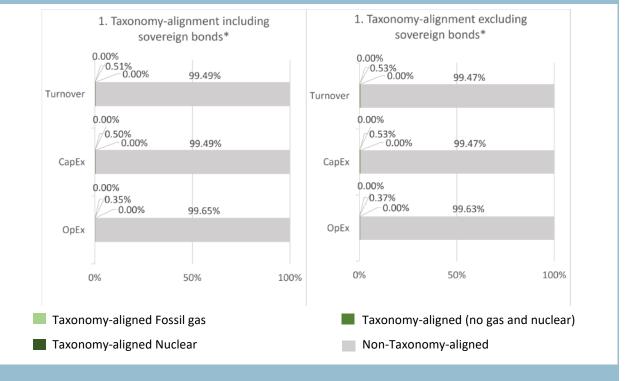

×	Yes:			
		In fossil gas	×	In nuclear energy
	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	0.23%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 0.53%, while the figure for the previous reference period was 0.46%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally

economic activities

under Regulation (EU) 2020/852.

sustainable

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich ShortDurationHighYield Fund

Legal entity identifier: 549300JY3OQ0XVIAWY52

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

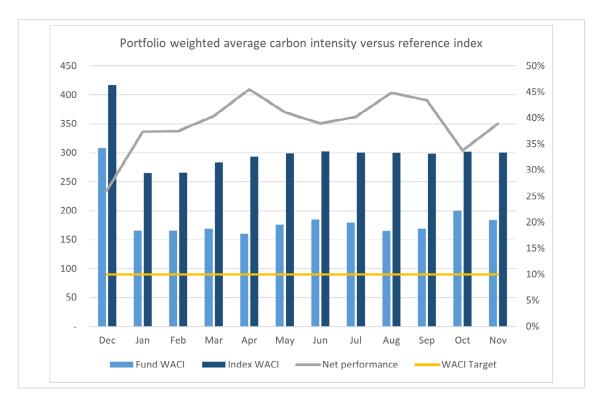

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA BB-B US Non-Financial Cash Pay High Yield Constrained Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

... and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and production	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of portfolio companies and is linked to this financial product's
Energy consumption intensity per high impact climate sector	Low	carbon efficiency target. The Investment Manager engaged with certain issuers where it considers there to be an opportunity for the issuer to mitigate its impact on this factor.
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or its independent ESG data provider considers an issuer to have severely breached the UNGC principles pr OECD guidelines for multinational enterprises, the Investment Manager's internal
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High	"ESG Eligibility Committee" was asked to determine whether such an issuer should remain eligible for investment in this financial product. Outcomes of the Eligibility Committee's decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.
Unadjusted gender pay gap	Medium	
Board gender diversity	Medium	The Investment Manager monitors controversies relating to
Exposure to controversial weapons	High	this PAI and may choose to engage issues which do not provide adequate disclosures or do manage risks relating to
Investments in companies without carbon emission reduction initiatives	Medium	this PAI factor. The reference period represents the first year in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer
Insufficient whistleblower protection	Medium	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity
Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.
Lack of anti-corruption and anti-bribery policies	High	

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Carnival Corp	Transportation and Storage	1.99%	US
Mileage Plus Hldings Llc	Transportation and Storage	1.43%	US
Treasury Bill	Public Administration and Defence;	1.39%	US
Caesars Entertain Inc	Arts, Entertainment and Recreation	1.37%	US
Service Properties Trust	Real Estate Activities	1.36%	US
Icahn Enterprises/fin	Financial and Insurance Activities	1.22%	US
Connect Finco Sarl/conne	Information and Communication	1.16%	GB
American Airlines/aadvan	Transportation and Storage	1.14%	US
Royal Caribbean Cruises	Transportation and Storage	1.10%	US
Uniti Group/csl Capital	Real Estate Activities	1.04%	US
Six Flags Entertainment	Arts, Entertainment and Recreation	1.01%	US
Frontier Communications	Information and Communication	1.00%	US
Wash Multifam Acq Inc	Administrative and Support Service	0.97%	US
Venture Global Lng Inc	Manufacturing	0.97%	US
Dish Network Corp	Information and Communication	0.97%	US

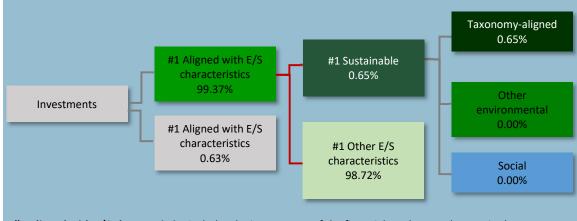

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

share of investments in specific assets.

Asset allocation describes the

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Manufacturing	18.71%
Information and Communication	15.59%
Transportation and Storage	10.84%
Financial and Insurance Activities	10.41%
Mining and Quarrying	10.35%
Arts, Entertainment and Recreation	7.31%
Real Estate Activities	5.76%
Administrative and Support Service Activities	4.76%
Human Health and Social Work Activities	4.09%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	3.75%
CASH AND OTHER	8.43%
Sectors and sub-sectors of the economy that derive revenues from	
exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.	9.62%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

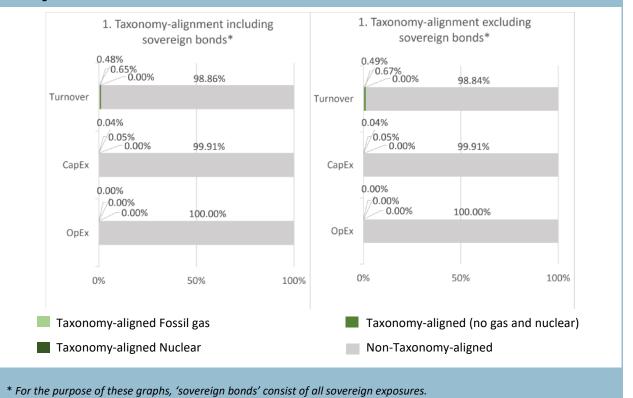

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities			
Transitional activities	0.00%		
Enabling activities	0.11%		

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 0.65%, while the figure for the previous reference period was 0.63%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally

sustainable

economic activities

under Regulation (EU) 2020/852.

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Muzinich Global Short Duration Investment Grade Fund

Legal entity identifier: 549300YFME7OYE62ZO42

Environmental and/or social characteristics

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance
practices.

The EU Taxonomy is
a classification

Sustainable investment means
an investment in an

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promoted certain environmental and/or social characteristics within its portfolio by applying an industry exclusion list and certain conduct-related criteria to avoid investing in companies which the Investment Manager considers to be fundamentally unsustainable. This financial product also met its target to maintain a weighted average carbon intensity (WACI) at least 10% below that of its chosen reference index. Moreover the Investment Manager ensured that portfolio holdings followed good governance practices.

How did the sustainability indicators perform?

The sustainability indicators performed as follows:

The percentage of an individual issuer's revenue which may be derived from specific business activities (e.g., controversial weapons production).

At the end of each of the four quarters in the reference period, this financial product:

- Held 0 issuers (0% by weight) involved in the end manufacture of controversial weapons
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from tobacco production
- Held 0 issuers (0% by weight) deriving more than 10% of revenues from coal mining or coal-related electricity generation, or issuers with up to 30% of coal-related revenues which had not made a public commitment to decommission their coal assets by 2025.

An issuer's alignment with recognised norms and/or international standards relating to respect for human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

The Investment Manager used these indicators to flag issuers which potentially breach its internal ESG eligibility criteria on business conduct. Issuers flagged by the Investment Manager's independent ESG data providers as potentially breaching such norms or standards have been discussed by the Investment Manager's ESG Eligibility Committee.

At the end of each of the four quarters in the reference period, this financial product held 0 issuers (0% by weight) which the Investment Manager's ESG Eligibility Committee considered to be at risk of severely breaching recognised norms or standards on human rights, labour relations, protection from severe environmental harm, and fraud and/or gross corruption standards.

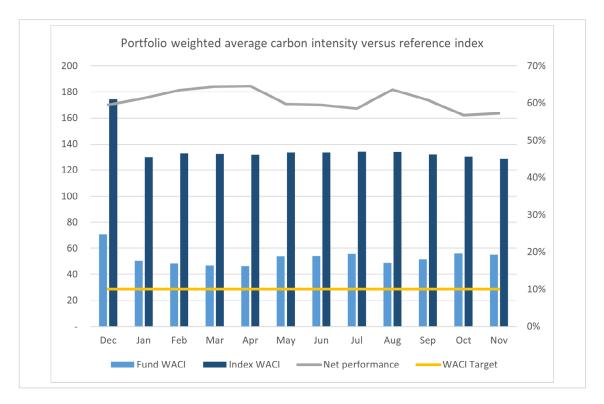

The indicators of Principal Adverse Impact as defined by the SFDR.

The Investment Manager has considered the Principal Adverse Impacts of its investment decisions on sustainability factors. Information on the Principal Adverse Impacts of this financial product is presented at the end of this template.

The percentage margin between the weighted average carbon intensity of the portfolio and that of a comparable investable universe of securities.

The weighted average carbon intensity of this financial product has remained more than 10% lower (i.e. less carbon intensive) than a comparable investable universe of securities as represented by the reference index throughout the investment period as shown in the chart below.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only.

Reference index: ICE BofA 1-3 Year Global Corporate Index

The reference index was chosen as a representative investment universe for this financial product's investment strategy. The grey 'Net performance' line shows the difference between this financial product's weighted average carbon intensity and that of the reference index which should remain above the weighted average carbon intensity 'Target'.

...and compared to previous periods?

As the financial product's ESG policy was binding and has not changed since the last reference period, the performance of the indicators listed above have not materially changed.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This investment product did not have an environmental objective to invest in economic activities that qualify as environmentally sustainable under the EU Taxonomy or which did not align with the EU Taxonomy, or in socially sustainable activities. Nevertheless, the product did make certain investments which qualify under the definition of EU Taxonomy-aligned business activities with climate mitigation and/or climate adaptation activities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Throughout the reference period, the Investment Manager considered certain business conduct criteria relating to human rights, labour rights, environmental protection and governance practices via its due diligence and ongoing monitoring process to ensure holdings did not significantly harm environmental or social objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Throughout the reference period, the Investment Manager considered principal adverse impacts ("PAIs") on sustainability factors when making investment decisions relating to this financial product, as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with certain issuers. The Investment Manager's consideration of PAIs was guided by monitoring the mandatory indicators provided in Table 1 of Annex 1 of the Commission Delegated Regulation (EU) 2022/1288 with regard to the regulatory technical standards supplementing the SFDR. Further information on the consideration of PAI factors is available at the end of this template.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager considered issuer alignment with these guidelines and principles as part of its investment research process. The Investment Manager used indicators provided by independent ESG data providers which flag issuers which potentially breach the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights which in turn would breach its internal ESG eligibility criteria on business conduct. Issuers flagged as part of this process have been discussed by the Investment Manager's ESG Eligibility Committee. The Investment Manager considers investments held throughout the reference period to have aligned with these guidelines and principles.

During the reference period this financial product was screened on a quarterly basis to determine alignment with these guidelines. The Investment Manager did not consider there to have been any severe breaches by holdings during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs on sustainability factors when making investment decisions relating to this financial product via a combination of asset allocation decisions, industry or company-level exclusions or underweights, conduct based exclusions, issuer engagements and the application of a carbon intensity reduction target. The binding elements of this financial product's ESG policy relate directly to the mitigation of PAIs. The Investment Manager considers other PAIs as part of its investment research process including its proprietary ESG scoring methodology, and/or engagement activities. The Investment Manager has prioritised the PAIs on the table below as "Low" ,"Medium" or "High" based its perception of each factor's materiality, the quantity or coverage of data that is typically available on those factors, and it ability to materially influence portfolio companies on those factors through engagement. This financial product's ESG policy has directly addressed "High" priority PAIs by excluding or limiting exposure to certain issuers.

Specifically in relation to this financial product, the Investment Manager considers the PAI factors listed in the table below. The Investment Manager sources PAI data from independent ESG data providers and indirectly via other ESG data sources such as controversy scoring. Data on the PAI factors relating to this financial product is available at the end of this Annex.

GHG emissions	High
Carbon footprint	High
GHG intensity of investee companies	High
Exposure to activities in the fossil fuel sector	High

- 1) This Financial Product excluded issuers with direct involvement in entities which derived more than 10% of their annual revenues from the mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities which the Investment Manager deemed to have a credible transition plan to reduce their reliance or exposure to thermal coal in favour of less carbon intensive forms of energy such as renewable energy.

 2) The Investment Manager has maintained a WACI target
- 2) The Investment Manager has maintained a WACI target in order to reduce this financial product's overall carbon intensity relative to a chosen reference index.

Non-renewable energy consumption and	Medium	The Investment Manager monitored these PAI via monthly portfolio carbon reports which include energy mixes of		
Energy consumption intensity per high impact	Low	portfolio carbon reports which include energy finkes of portfolio companies and is linked to this financial product carbon efficiency target. The Investment Manager engage with certain issuers where it considers there to be a opportunity for the issuer to mitigate its impact on this facto		
climate sector		opportunity for the issuer to margate its impact on this factor.		
Activities negatively affecting biodiversity-sensitive areas	Medium	The Investment Manager monitors controversies relating to this PAI and may choose to engage with issuers which do not provide adequate disclosures, or to manage risks relating to this PAI factor. The reference period represents the first year		
Emissions to water	Low	in which the Investment Manager has formally monitored this PAI and will consider further actions to mitigate it once it has been able to compare different investments over a longer		
Hazardous waste ratio	Low	research period. Under some circumstances the Investment Manager may choose to decline an investment opportunity to invest, or to divest from entities which cause severe adverse impacts on this factor.		
Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	High	In circumstances where the Investment Manager or independent ESG data provider considers an issuer to has severely breached the UNGC principles pr OECD guidelines multinational enterprises, the Investment Manager's intermediate ("ESG Eligibility Committee" was asked to determine wheth such an issuer should remain eligible for investment in the financial product. Outcomes of the Eligibility Committed decisions are recorded and implemented via the Investment Manager's risk team and portfolio managers.		
Policies, processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	High

Lack of a human rights policy	High	to invest, or to divest from entities which cause severe adverse impacts on this factor.		
Lack of anti-corruption and anti-bribery policies	High			

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01/12/2023 -30/11/2024

Largest investments	Sector	% Assets	Country
Ubs Group Ag	Financial and Insurance Activities	1.62%	СН
Barclays Plc	Financial and Insurance Activities	1.53%	GB
Rci Banque Sa	Manufacturing	1.53%	FR
Societe Generale	Financial and Insurance Activities	1.44%	FR
Arval Service Lease Sa/f	Administrative and Support Service	1.42%	FR
Dae Funding Llc	Financial and Insurance Activities	1.33%	AE
Ca Autobank Spa Ie	Financial and Insurance Activities	1.33%	IT
Natwest Group Plc	Financial and Insurance Activities	1.29%	GB
Hamburg Commercial Bank	Financial and Insurance Activities	1.29%	DE
Mirae Asset Securities	Financial and Insurance Activities	1.20%	KR
Daimler Truck Finan Na	Manufacturing	1.19%	DE
Ford Motor Credit Co Llc	Manufacturing	1.14%	US
Hyundai Capital America	Manufacturing	1.12%	US
Hca Inc	Human Health and Social Work Activities	1.05%	US
Kia Corp	Manufacturing	1.02%	KR

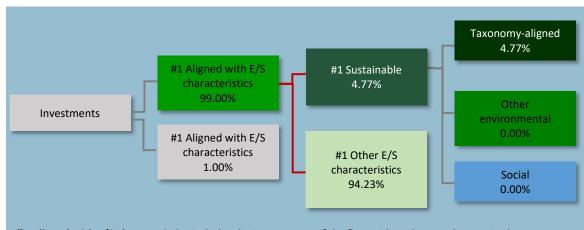

What was the proportion of sustainability-related investments?

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportion of sustainability-related investments for this financial product in the course of the reference period is shown in the chart below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

NACE SECTOR	% ASSETS
Financial and Insurance Activities	40.53%
Manufacturing	24.00%
Real Estate Activities	9.01%
Information and Communication	7.27%
Transportation and Storage	4.02%
Administrative and Support Service Activities	3.63%
Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles	2.65%
Accommodation and Food Service Activities	1.38%
Mining and Quarrying	1.09%
Human Health and Social Work Activities	1.05%
CASH AND OTHER	5.38%
Sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or	2.95%
distribution, including transportation, storage and trade, of fossil fuels.	

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This financial product did not target a minimum allocation to sustainable investments aligned with the EU Taxonomy. Nevertheless, it did make certain EU Taxonomy-aligned investments as detailed below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

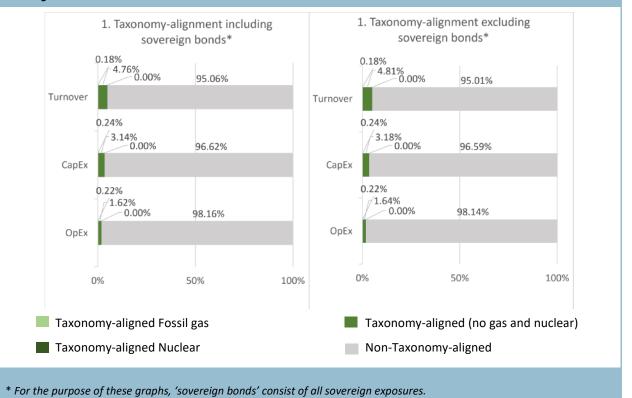

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

This financial product made investments in transitioning and/or enabling activities as follows:

Investments in Transitioning and Enabling Activities		
Transitional activities	0.00%	
Enabling activities	1.42%	

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The share of this financial product's investments that were aligned with the EU Taxonomy during this reference period was 4.77%, while the figure for the previous reference period was 4.44%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable

economic activities

under Regulation (EU) 2020/852.

This financial product did not target a minimum allocation to Sustainable Investments not aligned with the EU Taxonomy and the Investment Manager has not attempted to track this metric in order to report it.

What was the share of socially sustainable investments?

This financial product did not target a minimum allocation to socially sustainable investments and the Investment Manager has not attempted to track this metric in order to report it.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" in the chart above represent cash and cash equivalents, money market instruments and certain hedging instruments including derivatives. Such investments are held for a number of reasons, including, but not limited to, risk management, and/or to ensure adequate liquidity, hedging and collateral cover. The Investment Manager believes that these holdings do not relate directly to a specific issuer and therefore do not relate to the management of sustainability risks and/or PAIs. The Investment Manager therefore does not believe that it would be possible to make a reasonable determination on considerations relating to minimum environmental or social safeguards, in part due to the lack of relevant data relating to such instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted screening of this financial product's investable universe on a quarterly basis to produce lists of issuers which are either eligible or not eligible for investment. Those lists have been programmed into the Investment Manager's trade compliance systems to avoid investments in ineligible issuers and to monitor and identify any potential passive breaches of the criteria.

The Investment Manager has produced monthly carbon footprint reports for this financial product to ensure that it meets its carbon intensity target. The Investment Manager is informed of any breaches if the financial product's ESG policy to ensure that they are rectified within the time period specified in the policy. The Investment Manager is provided with a list of the heaviest emitting issuers in the portfolio so it can make informed decisions to maintain a carbon intensity below the stated targets.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this financial product however a reference index has been used in order to measure and report on the attainment of its WACI target. The reference benchmark used by this financial product is a mainstream index and is used for comparison of environmental characteristics only. The reference index does not consider ESG factors and is therefore not consistent with the environmental and/or social characteristics promoted by this financial product. Asset allocation of the portfolio of this financial product is not constrained in relation to any benchmark.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?
 Not applicable.

Adverse Impact Category	Actions Taken to Address Adverse Impacts
Carbon emissions	This financial product applies a carbon efficiency target whereby the Investment Manager seeks to maintain a weighted average carbon intensity (WACI) at least 10% lower than that of the relevant reference index. Further information is available in the relevant precontractual disclosures.
Exposure to companies active in the fossil fuel industry	This product excluded issuers which derived more than 10% revenues from mining or extraction of thermal coal and/or the production of energy from thermal coal, subject to an allowance for entities with a credible transition plan to reduce exposure to thermal coal by the end of 2025.
Violations of UN Global Compact Principles	This financial product applies a policy which requires the Investment Manager to exclude issuers which severely breach norms and standards—such as those mentioned.
Exposure to companies involved in controversial weapons	This financial product applies a zero-tolerance policy to companies involved in the production of controversial weapons. Further information is available in the relevant precontractual disclosures.

The PAI data shown above is based on average weights of holdings in the portfolio as of the four preceding calendar quarter-ends of the reference period shown above. The Investment Manager notes that the availability of PAI data may vary significantly for different holdings, and it may not be possible for the Investment Manager to calculate certain PAI metrics due to the lack of aggregate research coverage. Further information on PAI calculation methodologies and reporting requirements is available online: https://eur-lex.europa.eu/eli/reg/2019/2088/oj. Further information on product-specific ESG policies is available in the precontractual disclosures of this financial product.
