What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The Sub-Fund's investment objective is to generate attractive risk adjusted returns.

Investment policies The Sub-Fund will seek to achieve its investment objective by investing on a long only basis in a diversified portfolio of structured finance securities ("SFS"), in particular in the form of European collateralised loan obligations ("CLOs") which will be listed or traded on a Recognised Market. It is anticipated that the Sub-Fund may invest up to 100% of its Net Asset Value in CLOs. The Sub-Fund may also invest in other types of SFS, being asset backed securities ("ABS") and mortgage-backed securities ("MBS").

In general terms, SFS are securities that entitle their holders to receive payments that depend on the cash flow from an underlying portfolio of collateral. They are usually issued in multiple tranches with different entitlements to the interest and principal proceeds generated by the collateral.

Performance depends mainly on the performance of the collateral, which may be managed or static, and on structural terms.

CLOs are traded securities which are backed by a pool of debt. The issuers of the CLOs in which the Sub-Fund will invest will be established as companies and trusts solely for the purpose of issuing CLO tranches. Such companies and trusts will be located in Europe and the underlying credit exposure of such CLOs will be primarily to European and U.S. assets.

The Sub-Fund may also invest up to 10% of its net assets in open-ended exchange traded funds and other open ended collective investment schemes which enable the Sub-Fund to achieve its investment objective. The Sub-Fund may also invest in cash and money market instruments for cash management purposes.

Benchmark The Sub-Fund is actively managed, meaning the Investment Manager actively selects and invests the securities in which the Sub-Fund invests with the aim of meeting the investment objective of the Sub-Fund, and is not managed with reference to any benchmark.

Redemption and Dealing You may sell your shares in the Sub-Fund on any Wednesday that banks are open in Ireland, United Kingdom and France. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. 5 business days before the day on which you want to sell.

Distribution Policy Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.

Launch date The Sub-Fund came into existence in 2019. This Share class was launched on 12/06/2019.

Fund Currency Reference currency of the Sub-Fund is EUR.

Conversion of units/shares You may switch your shares to the shares of another sub-fund of MontLake UCITS Platform ICAV free of charge.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Sub-Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the ICAV as set forth in the ICAV prospectus, the Sub-Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Practical information

Depository The Sub-Fund's assets are held with its depository, Northern Trust Fiduciary Services (Ireland) Limited.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The performance scenarios described in this document are hypothetical and illustrative examples based on certain assumptions and do not represent actual or guaranteed outcomes; particularly in the case of the favourable scenario, actual performance may differ significantly.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the ICAV prospectus, available free of charge at www.waystone.com.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 27 March 2015 and 27 March 2020.

Moderate: this type of scenario occurred for an investment between 25 February 2017 and 25 February 2022.

Favourable: this type of scenario occurred for an investment between 26 January 2019 and 26 January 2024.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Sub-Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Sub-Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	198 EUR	1,300 EUR
Annual cost impact*	2.0%	2.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.5% before costs and 3.3% after costs.
