What is this product?

Type

Baillie Gifford Worldwide Positive Change Fund ("the Fund") is a sub-fund of Baillie Gifford Worldwide Funds PLC (the Company). The Fund is managed by Baillie Gifford Investment Management (Europe) Limited. The Company is an open-ended investment company with variable capital organised under the laws of Ireland as a public limited company pursuant to the Companies Acts and the UCITS Regulations and is managed by the Manager.

Term

The Fund does not have a fixed maturity. All the shares in the Fund may be redeemed by the Company in certain circumstances details of which are outlined in the Prospectus including if so determined by the Directors of the Company, following consultation with the Manager. As such, the Manager may not unilaterally terminate the Fund.

Objectives

The Fund aims to produce capital growth over the long term and to contribute towards a more sustainable and inclusive world by investing primarily in the equities of companies whose products, and/or services make a positive social and/or environmental impact. The Fund will invest at least 90% in shares of companies worldwide for whom delivering a positive impact is core to their business; whose products, behaviour and/or services represent an improvement to the prevailing practices; and who conduct business with honesty and integrity. This will include companies addressing critical challenges in the four impact themes, each of which represent key global challenges: (i) social inclusion and education, (ii) environment and resource needs, (iii) healthcare and quality of life and (iv) base of the pyramid (addressing the needs of the poorest four billion people in the world). An impact analysis is conducted to assess whether a company contributes to one of the social impact themes. This analysis is based on the assessment of three factors: (i) intent (ii) product impact and (iii) business practices. The Fund will be concentrated. The Investment Manager will manage the Fund in order to align the Fund's holdings with the goal of net zero GHG emissions by 2050 or sooner, in line with global efforts to limit warming to 1.5C ("net zero"). As part of this process, all portfolio companies are actively assessed and prioritised for engagement for their alignment with net zero on an ongoing basis. The Fund is actively managed and no index is used for the purposes of determining or constraining the composition of the Fund's portfolio. The Fund's performance (after deduction of costs) is measured against the MSCI ACWI Index. The Fund seeks to materially outperform the index over rolling 5 year periods. The return of the Fund is dependent on the performance of the underlying assets. Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You can sell some or all of your shares on any day on which banks in Ireland are open for business by contacting the Transfer Agent by phone or post. The Fund's assets are held through the Company's Depositary, which is Brown Brothers Harriman Trustee Services (Ireland) Limited. To obtain further and other practical information, including prices, and documentation please see the Other Relevant Information section of this document. This Key Information Document describes the Fund only, the Prospectus and the annual and interim reports and accounts are prepared for the Company rather than the Fund. The assets of the Fund are segregated from other funds in the Company. This means that the assets of one fund cannot be used to meet the liabilities of another fund. You may at any time switch all or some of your shares in the Fund for shares in any other fund of the Company and may obtain further information about this from the conversion of shares section of the Prospectus.

Intended retail investor

The Fund is suitable for all investors seeking a fund that aims to deliver long-term growth and has a sustainable objective to deliver positive impact. The Fund considers sustainability preferences through sustainable investments including a minimum proportion of Taxonomy aligned investments and the qualitative consideration of principal adverse impacts. Investors should be prepared to bear losses. The Fund is compatible for mass market distribution. The Fund may not be suitable for investors concerned about short term volatility and performance, seeking a regular source of income and investing for less than five years. The Fund does not offer capital protection.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

← Lower risk Higher risk →

The risk indicator assumes you keep the product for a minimum of 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of Baillie Gifford Investment Management (Europe) Limited to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The concentrated portfolio, and exposure to emerging markets and foreign currencies may increase risk. Charges are taken from income; if expenses exceed income the capital value falls.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.
