What is this product?

Type

The Product is a share class of the Sub-Fund "AXA World Funds - Italy Equity" (the "Sub-Fund") which is part of the SICAV "AXA World Funds" (the "Company").

Term

This product has no maturity date, although it has been created for 99 years and could be liquidated under the conditions laid down in the articles of incorporation of the company.

Objectives

Investment Objective

The Sub-Fund seeks to achieve long term capital growth measured in Euro by investing in large, medium and small capitalisation companies domiciled or listed in Italy.

Investment Policy

The Sub-Fund is actively managed and mainly invests in equities of companies of any capitalization domiciled or listed in Italy that are part of the FTSE Italia All-share NT index benchmark index (the "Benchmark") universe. As part of the investment process, the Investment Manager has broad discretion over the composition of the Sub-Fund's portfolio and can take, based on its investment convictions, large overweight or underweight positions on the sectors or companies compared to the Benchmark's composition and/or take exposure to companies, countries or sectors not included in the Benchmark, even though the Benchmark constituents are generally representative of the Sub-Fund's portfolio. Thus, the deviation from the Benchmark is likely to be significant.

Investment decisions are based on a combination of macroeconomic, sector and company specific analysis. The share selection process relies on a rigorous analysis of the companies' business model, quality of management, growth prospects and overall risk return profile.

The Sub-Fund invests at least 75% of its assets in equities, equivalent securities, investment certificates and cooperative investment certificates issued by companies having their registered office in the European Economic Area (i.e. securities or rights eligible to the French Plan d'Epargne en Actions - PEA).

The Sub-Fund shall also comply with investment criteria in order to be classified as "qualified investments" intended to a piani individuali di risparmio a lungo termine (PIR) pursuant to art. 1, paragraphs 100 to 114, of Law no. 232 of 11 December 2016, established until 31st December 2018 or, pursuant to Law no. 157 of 19 December 2019 established as of 1st January 2020 and Law no. 234 of 30 December 2021.

Specifically, at all times the Sub-Fund shall invest at least 70% of its net assets, either directly or indirectly, in securities, including those not traded in regulated markets or Multilateral Trading Facilities (MTFs), issued or entered into with companies domiciled in Italy, as provided for by art. 73 of the consolidated law on income tax, under Presidential Decree 22 December 1986, no. 917, or in an EU or EEA Member State with permanent establishment in Italy.

Within this limit and during at least 2/3 of the calendar year, the aforesaid 70% must be invested as follows:

- at least 25% in securities of companies which are not listed in the FTSE MIB index of Borsa Italiana or any other equivalent indices of other regulated markets;

- at least 5% in securities which are not listed in the FTSE MIB and FTSE Mid Cap indices of Borsa Italiana or any other equivalent indices of other regulated markets.

The Sub-Fund cannot invest more than 10% of its net assets in securities or rights issued or entered with the same company.

The Sub-Fund cannot invest in securities issued by companies which are not resident in countries that allow an adequate exchange of information with Italy. The Sub-Fund may invest up to 20% of its net assets in money market instruments, money market funds and bank deposits.

The Sub-Fund will invest not more than 10% of its net assets in units of UCITS and/or other UCIs.

Derivatives may be used for efficient portfolio management or hedging purposes.

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Intended retail investor

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7 which is the a medium-high risk class. This rates the potential losses from future performance at a medium-high level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the Summary risk indicator can be materially relevant, such as counterparty risk, derivatives risk. For further information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets could develop very differently in the future.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	€742	€1 685
Annual cost impact (*)	7.5%	3.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.67 % before costs and 1.44 % after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs
