LETTER FROM THE CHAIR

Dear Shareholders:

Markets — which rallied in late 2022 and early 2023 on signs of peaking inflation, hopes that monetary policy tightening cycles may be nearing an end, and a rapid reopening of China's economy — have recently run into turbulence. Inflation data suggest that price pressures will prove more persistent than expected, putting renewed upward pressure on interest rates. On a positive note, markets have largely adjusted to the challenges posed by Russia's invasion of Ukraine, thanks in part to mild European winter weather that has alleviated concerns over potential shortages of natural gas. Resilient labor markets in much of the developed world have further contributed to a brighter-than-expected economic backdrop. However, investors are mindful that the lagged effects of ongoing monetary policy tightening have yet to fully work their way through the global economy.

Tighter global financial conditions represent a headwind for richly valued growth equities and interest rate—sensitive parts of the economy, such as housing. Over the near term, we feel companies will face a challenging earnings backdrop as they are forced to absorb higher input and labor costs while pricing power dwindles. As for fixed income, the rise in interest rates has made bonds more attractive than they have been in years, which may provide balance for investors' portfolios.

During times of market transition, it is important to have a deep understanding of company fundamentals, and we have built our unique global research platform to do just that.

At MFS®, we put our clients' assets to work responsibly by carefully navigating increasingly complex global capital markets. Our investment team is guided by a commitment to long-term fundamental investing. Our global investment platform — combining collective expertise, long-term discipline, and thoughtful risk management — seeks to uncover what we believe are the best, most durable investment ideas in markets around the world, enabling us to potentially create value for investors.

Respectfully,

Lina Medeiros Chair of the Board

MFS Investment Management Company (Lux) S.à r.l

4 May 2023

⁽a) The performance is for the period from the inception date through the stated period end. See Note 18 for additional information.

NOTES TO PERFORMANCE TABLE

Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please contact your financial consultant.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers, the sub-funds' performance results would have been less favorable. Please see the prospectus and financial statements for details. All results are historical and assume the reinvestment of dividend and capital gain distributions, if any.

Total returns do not include the applicable sales charges. If these charges had been included, the results would have been lower.

Changes in currency exchange rates may affect the net asset values per share and the performance of share classes denominated in currencies other than a sub-fund's base currency.

Performance results do not include adjustments made for financial reporting purposes.

Performance results include the impact of swing pricing, if applicable. See Note 3 of the Notes to Financial Statements for additional information.

From time to time the sub-funds may receive proceeds from litigation settlements, without which performance would be lower.

⁽b) The commencement of operations of the sub-fund was 18 May 2022.

GENERAL INFORMATION

Audited annual and unaudited semiannual financial statements are available at the registered office of the fund and at meridian.mfs.com.

Notices of general meetings are published in the *Mémorial – Journal Officiel du Grand-Duché de Luxembourg* and in other newspapers circulating in jurisdictions in which the fund is registered or in other publications as determined by the directors.

The list of changes in the portfolios for the period ended 31 January 2023 is available, free of charge, at the registered office of the fund.

Information concerning the sub-funds' net asset values and purchases and sales of securities is available at the registered office of the fund.

The Articles of Incorporation are lodged at the office of the Chief Registrar of the District Court of Luxembourg (Greffe du Tribunal d'Arrondissement de et à Luxembourg), at *meridian.mfs.com*, and at the registered office of the fund where they are available for inspection and where copies thereof may be obtained upon request.

The fund's most recent offering documents, including the Key Information Documents (KIDs), Key Facts Statements (KFS) for Hong Kong investors, and prospectus, contain information on the sub-funds' investment objectives, charges, expenses and risks. The offering documents, Articles of Incorporation and financial reports and other information about the sub-funds are available to investors at no cost at the fund's registered office, from your financial intermediary, or on the web at *meridian.mfs.com*. Please read them carefully before you invest. Please note that not all of the sub-funds or classes may be registered or authorized for distribution in every jurisdiction. In certain jurisdictions, investments may only be made by qualified investors and/or through authorized intermediaries on a limited private placement basis subject to applicable laws and regulations in the country of distribution. In particular, please note that as of 31 January 2023 the Contrarian Value Fund, Diversified Income Fund, Emerging Markets Debt Local Currency Fund, Emerging Markets Equity Research Fund, Euro Credit Fund, Global Credit Fund, Global Equity Income Fund, Global Intrinsic Value Fund, Global New Discovery Fund, Global Opportunistic Bond Fund, Global Strategic Equity Fund, Managed Wealth Fund, Prudent Capital Fund, U.S. Corporate Bond Fund, and U.S. Growth Fund were not registered in Hong Kong and these sub-funds shall not be offered to the public in this jurisdiction.

CORPORATE GOVERNANCE

ALFI CODE OF CONDUCT

The fund is committed to corporate governance standards relating to its management. In connection therewith, the fund adheres to the ALFI (Association of the Luxembourg Fund Industry) Code of Conduct for Luxembourg Investment Funds, which was issued in September 2009 and updated and re-issued in 2022. This Code sets forth principles regarding qualified and experienced personnel, conflicts of interests and serving the best interests of fund shareholders, due diligence and oversight, compliance with applicable laws and risk management processes.

SHAREHOLDER COMPLAINTS OR INQUIRIES

If you wish to make a complaint about any aspect of the service you have received, you may contact your local agent in your respective country, or contact the funds' transfer agent at State Street Bank International GmbH, Luxembourg Branch, by mail, phone or email.

Mail: MFS Meridian Funds c/o State Street Bank International GmbH, Luxembourg Branch

49 Avenue J.F. Kennedy L-1855 Luxembourg

You may find more information on the fund's complaint handling process at *meridian.mfs.com*.

CERTAIN RISK MANAGEMENT DISCLOSURES (unaudited)

Information Regarding Global Exposure Under The Funds' Risk Management Program

The fund's Management Company must employ a risk management process which enables it to monitor and measure at any time the risk of the positions in the sub-funds' portfolios and their contribution to the overall risk profile of their portfolios. The global exposure relating to financial derivative instruments may be calculated through the "commitment approach" or through a Value-at-Risk ("VaR") methodology. Generally, a sub-fund that uses derivatives more extensively or as part of its investment objective will utilize the VaR methodology, and a sub-fund that uses derivatives less extensively will utilize the commitment approach.

For each sub-fund except the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, Global Opportunistic Bond Fund, and Managed Wealth Fund, the commitment approach methodology is used to calculate global exposure. The commitment approach is based, in part, on the principle of converting the exposure to derivative instruments into equivalent positions of the underlying assets and quantifying the exposure in absolute value of the total commitments (which may account for hedging and netting).

For the Managed Wealth Fund, an absolute Value-at-Risk ("VaR") approach is used and for the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, and Global Opportunistic Bond Fund, a relative VaR approach is used, to measure global exposure. VaR provides a measure of the potential minimum loss that could arise over a given time interval under normal market conditions, and at a given confidence level. The sub-funds' risk management program limits the maximum VaR that the sub-fund can have relative to its net asset value for absolute VaR or relative to its benchmark for relative VaR, as determined by the sub-fund taking into account its investment policy and risk profile. For the Managed Wealth Fund, the absolute VaR cannot be greater than 20% of its respective net asset value. For the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, and Global Opportunistic Bond Fund, the relative VaR cannot be greater than 200% of its current benchmark. The VaR approach used by each of these sub-funds is based upon an historical model. The VaR is measured daily at the 99% level of confidence based on a one month (20 day) holding period. The underlying data set encompasses one year of data (minimum of 250 observations).

For the Emerging Markets Debt Local Currency Fund, the expected level of leverage may vary between 0% and 375% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Euro Credit Fund, the expected level of leverage may vary between 0% and 275% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Global Credit Fund, the expected level of leverage may vary between 0% and 275% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

For the Global Opportunistic Bond Fund, the expected level of leverage may vary between 0% and 400% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 125% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above. Effective 24 April 2023, the expected level of leverage measured using the commitment approach, may vary between 0% and 200% based on the net asset value of the sub-fund.

For the Managed Wealth Fund, the expected level of leverage may vary between 0% and 200% (measured using the sum of the notional value of derivatives used by the sub-fund), based on the net asset value of the sub-fund. In addition, the Management Company supplementally monitors the expected level of leverage measured using the commitment approach, which may vary between 0% and 100% based on the net asset value of the sub-fund. Under certain circumstances, such as unusual market conditions or temporary operational factors, the level of leverage might exceed the ranges noted above.

The sum of notional value is the sum of the absolute values of the full underlying exposures of our derivative positions. The sum of notional value is based upon the full notional exposure with no netting or hedging. Under both levels of leverage methodologies, the sum of the absolute exposures is calculated in order that exposures of opposite signs to unrelated assets do not offset each other in the final result.

Please see the table below for summary information regarding the daily VaR and leverage results for the Emerging Markets Debt Local Currency Fund, Euro Credit Fund, Global Credit Fund, Global Opportunistic Bond Fund, and Managed Wealth Fund beginning 1 February 2022 through the year ended 31 January 2023:

See Schedules of Investments Footnotes and Notes to Financial Statements

Footnotes to Schedules of Investments:

Taxable: Security not exempt from United States federal taxes

- (b) Securities traded on other regulated markets.
- (c) Other transferable securities, currently not traded on a regulated market. Classified as illiquid securities, refer to Note 17.
- (d) In default
- (g) All or a portion of the security has been segregated as collateral for open forward foreign currency exchange contracts.
- (i) Interest only security for which the sub-fund receives interest on notional principal (Par amount). Par amount shown is the notional principal and does not reflect the cost of the security.
- (k) As of 31 January 2023, the following sub-funds held securities that were fair valued in accordance with the policies adopted by the Board of Directors:

| Sub-Fund | Market Value | % of Total Sub-Fund Market Value | Number of Securities |
|---|------------------|----------------------------------|----------------------|
| Asia Ex-Japan Fund | \$ 33,747,269 | 66.12% | 42 |

- (p) Payment-in-kind (PIK) security for which interest income may be received in additional securities and/or cash.
- (v) The rate quoted is the annualized seven-day yield of the fund at period end and may be negative (i.e., the costs and expenses of the fund may exceed the income and gains of its portfolio).
- (y) The rate shown represents an annualized yield at time of purchase.

The following abbreviations are used in this report and are defined:

- ADR American Depositary Receipt
- AGM Assured Guaranty Municipal CDO Collateralized Debt Obligation
- CLO Collateralized Loan Obligation
- CPI Consumer Price Index
- ETC Exchange-Traded Commodity
- ETF Exchange-Traded Fund
- FLR Floating Rate. The period-end rate reported may not be the current rate.
- GDR Global Depositary Receipt
- IEU International Equity Unit
- REIT Real Estate Investment Trust
- TBA To Be Announced
- TIPS Treasury Inflation Protected Security
- UMBS Uniform Mortgage-Backed Security

SCHEDULES OF INVESTMENTS

31 January 2023

Note 1: The Fund

The MFS Meridian Funds (the "fund" or the "Company") is an open-ended investment company incorporated under the laws of the Grand Duchy of Luxembourg on 4 February 1992. It is organised under Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment, as amended, as a Société Anonyme qualifying as a "Société d'Investissement à Capital Variable" ("SICAV"). The fund is registered with the Registre de Commerce et des Sociétés of Luxembourg, under number R.C.S. B 39346. On 31 October 2014, MFS Investment Management Company (Lux) S.à r.l. ("MFS Lux") was appointed by the fund to act as Management Company.

The fund is organised as an "umbrella fund" comprising separate sub-funds each of which relates to a separate portfolio of securities with specific investment objectives. At 31 January 2023, it comprises 38 sub-funds, each relating to a separate investment portfolio consisting of securities, cash, and other instruments. Each sub-fund may offer various types of classes of shares, which may differ in the minimum subscription amount, minimum holding amount, currency and/or eligibility requirements, the fees and expenses, and the dividend policy applicable to them. The fund may be offered for sale in European Economic Area ("EEA") states, subject to notification in countries other than the Grand Duchy of Luxembourg, and in certain jurisdictions subject to local offering requirements. Please note that not all of the sub-funds or classes may be registered or authorized for distribution in every jurisdiction. Share classes available for each sub-fund at 31 January 2023 can be found under "Statistical Information" in this report.

Note 2: Summary of Significant Accounting Policies

The financial statements have been prepared in accordance with Luxembourg legal and regulatory requirements applicable to investment funds. A reconciliation of the impact on net investment income for those impacted sub-funds arising from accounting differences between Luxembourg legal and regulatory requirements for investment funds and Generally Accepted Accounting Principles ("GAAP") used in the United States is provided in Note 16.

- A) Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the reporting period. Actual results may differ from those estimates.
- B) Financial Instrument Valuations Equity securities are generally valued at the last sale or official closing price on their primary market or exchange as provided by a third-party pricing service. Equity securities, for which there were no sales reported that day, are generally valued at the last quoted daily bid quotation on their primary market or exchange as provided by a third-party pricing service.
 - Debt instruments and floating rate loans are generally valued at an evaluated or composite bid as provided by a third-party pricing service.
 - Exchange-traded options are generally valued at the last sale or official closing price on their primary exchange as provided by a third-party pricing service. Exchange-traded options for which there were no sales reported that day are generally valued at the last daily bid quotation on their primary exchange as provided by a third-party pricing service. For put options, the position may be valued at the last daily ask quotation if there are no trades reported during the day. Options not traded on an exchange are generally valued at a broker/dealer bid quotation. Foreign currency options are generally valued at valuations provided by a third-party pricing service.

Futures contracts are generally valued at the last posted settlement price on their primary exchange as provided by a third-party pricing service. Futures contracts for which there were no trades that day for a particular position are generally valued at the closing bid quotation on their primary exchange as provided by a third-party pricing service.

Swap agreements are generally valued using valuations provided by a third-party pricing service, which for cleared swaps includes an evaluation of any trading activity at the clearinghouses.

Forward foreign currency exchange contracts are generally valued at the mean of bid and asked prices for the time period interpolated from rates provided by a third-party pricing service for proximate time periods.

Short-term instruments with a maturity at issuance of 60 days or less may be valued at amortized cost, which approximates market value.

Open-end investment companies are generally valued at their net asset value per share excluding redemption fees (if any).

Securities and other assets generally valued on the basis of information from a third-party pricing service may also be valued at a broker/dealer bid quotation.

Values obtained from third-party pricing services can utilize both transaction data and market information such as yield, quality, coupon rate, maturity, type of issue, trading characteristics, and other market data. The values of securities and other assets and liabilities expressed in non-base currencies are converted to the base currency of the sub-fund based upon exchange rates provided by a third-party source.

The Management Company has delegated primary responsibility for determining or causing to be determined the value of the sub-fund's investments (including any fair valuation) to Massachusetts Financial Services Company ("MFS"), the Investment Manager, pursuant to valuation policies and procedures approved by the Board of Directors of the Company and under the oversight of the Board of Directors. In carrying out the valuation policies and procedures, the Investment Manager provides instructions to the Administration Agent on an ongoing basis. If the Investment Manager determines that reliable market quotations are not readily available, investments are valued at fair value as determined in good faith by the Investment Manager in accordance with such procedures under the oversight of the Board of Directors.

Under the valuation policies and procedures applicable to the sub-funds, investments may be valued at fair value if the Investment Manager determines that an investment's value has been materially affected by events occurring after the close of the exchange or market on which the investment is principally traded (such as a foreign exchange or market) and prior to the determination of the sub-fund's net asset value, or after the halt of trading of a specific security where trading does not resume prior to the close of the exchange or market on which the security is principally traded. Events that occur after markets close (such as developments in foreign markets) and prior to the determination of the sub-fund's net asset value may be deemed to have a material effect on the value of securities traded in these markets. Accordingly, the sub-fund's non-U.S. ("foreign") equity securities may often be valued at fair value. The Investment Manager may rely on third-party pricing services or other information (such as the correlation with price movements of similar securities in the same or other markets; the type, cost and investment characteristics of the security; the business and financial condition of the issuer; and trading and other market data) to assist in determining whether to fair value and at what value to fair value an investment. The value of an investment for

at 31 January 2023

purposes of calculating the sub-fund's net asset value can differ depending on the source and method used to determine the value. When fair valuation is used, the value of an investment used to determine the sub-fund's net asset value may differ from quoted or published prices for the same investment. There can be no assurance that the sub-fund could obtain the fair value assigned to an investment if it were to sell the investment at the same time at which the sub-fund determines its net asset value per share.

- C) Dividends and Interest Dividends received in cash are recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded when the sub-fund is informed of the dividend if such information is obtained subsequent to the ex-dividend date. Interest income is recorded on the accrual basis. Each sub-fund generally accretes discounts on debt securities as adjustments to interest income. The sub-funds do not amortize premiums on debt securities. Dividend and interest payments received in additional securities are recorded on the ex-dividend or ex-interest date in an amount equal to the value of the security on such date. Debt obligations may be placed on non-accrual status or set to accrue at a rate of interest less than the contractual coupon when the collection of all or a portion of interest has become doubtful. Interest income for those debt obligations may be further reduced by the write-off of the related interest receivables when deemed uncollectible.
 - The sub-funds may receive proceeds from litigation settlements. Any proceeds received from litigation involving portfolio holdings are reflected in the Statements of Operations and Changes in Net Assets in net realized gain (loss) on investments, derivatives, and currency transactions if the security has been disposed of by the sub-fund or in net change in unrealized gain (loss) on investments, derivatives, and currency translation if the security is still held by the sub-fund. Any other proceeds from litigation not related to portfolio holdings are recorded as net realized gain, in the Statements of Operations and Changes in Net Assets.
- D) Foreign Currency Translation Purchases and sales of foreign investments, income, and expenses initially expressed in foreign currencies are converted each business day into each sub-fund's base currency based upon currency exchange rates prevailing on the respective dates of such transactions or on the reporting date for foreign denominated receivables and payables. The base currency for the Blended Research European Equity Fund, Continental European Equity Fund, Euro Credit Fund, European Core Equity Fund, European Research Fund, European Smaller Companies Fund, and European Value Fund is EUR. The base currency for the U.K. Equity Fund is GBP. Effective 7 June 2022, the base currency of the Japan Equity Fund was changed from USD to JPY. The base currency for all the remaining sub-funds is USD. Gains and losses attributable to foreign currency exchange rates on sales of securities and foreign exchange rate movements on receivables, payables, income, and expenses are recorded for financial statement purposes as net realized gain (loss) on investments, derivatives, and currency transactions. The portion of both realized and unrealized gains and losses on investments that results from fluctuations in currency exchange rates is not separately disclosed.
- Cost of Securities Sold In determining the cost of securities sold, each sub-fund uses the identified cost basis.
- F) Derivative Collateral Requirements Derivative counterparty credit risk is managed through formal evaluation of the creditworthiness of all potential counterparties. On certain, but not all, uncleared derivatives, the sub-fund attempts to reduce its exposure to counterparty credit risk, whenever possible by entering into an International Swaps and Derivatives Association ("ISDA") Master Agreement on a bilateral basis, at the sub-fund level. The ISDA Master Agreement gives each party to the agreement the right to terminate all transactions traded under such agreement if there is a specified deterioration in the credit quality of the other party. Upon an event of default or a termination of the ISDA Master Agreement, the non-defaulting party has the right to close out all transactions traded under such agreement and to net amounts owed under each agreement to one net amount payable by one party to the other. This right to close out and net payments across all transactions traded under the ISDA Master Agreement could result in a reduction of the sub-fund's credit risk to such counterparty equal to any amounts payable by the sub-fund under the applicable transactions, if any. These netting rights may be stayed or limited in the event the counterparty becomes insolvent. However, absent an event of default by the counterparty or a termination of the agreement, the ISDA Master Agreement does not result in an offset of reported balance sheet assets and liabilities across transactions between the sub-fund and the applicable counterparty.

Collateral and margin requirements differ by type of derivative. Margin requirements are set by the clearing broker and the clearinghouse for cleared derivatives (e.g., futures contracts, cleared swaps, and exchange-traded options). Collateral terms are contract specific for uncleared derivatives (e.g., forward foreign currency exchange contracts, uncleared swap agreements, and uncleared options). For derivatives traded under an ISDA Master Agreement, which contains a collateral support annex, the collateral requirements are netted across all transactions traded under such counterparty-specific agreement and an amount is posted from one party to the other to collateralize such obligations. Cash that has been segregated or delivered to cover the sub-fund's collateral or margin obligations under derivative contracts, if any, will be reported separately in the Statements of Assets and Liabilities as "Restricted cash" for uncleared derivatives and/or "Deposits with brokers" for cleared derivatives. Securities pledged as collateral or margin for the same purpose, if any, are noted in the Schedules of Investments. The sub-funds may be required to make payments of interest on uncovered collateral or margin obligations with the broker. Any such payments are included in "Interest expense and similar charges" in the Statements of Operations and Changes in Net Assets. Collateral received consists of cash and/or high quality government debt, which is not reported in the Statements of Assets and Liabilities or Schedules of Investments. At 31 January 2023, the following sub-funds had segregated cash or received cash and/or high quality government debt as collateral for open cleared and uncleared derivatives.

- G) Forward Foreign Currency Exchange Contracts Each sub-fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of the contract. Certain sub-funds may enter into forward foreign currency exchange contracts for efficient portfolio management, hedging, or for investment purposes. For efficient portfolio management purposes, the sub-fund may enter into contracts to deliver or receive foreign currency it will receive from or require in its normal investment activities. For hedging purposes, the sub-fund may use contracts in a manner intended to protect foreign currency denominated securities from declines in value due to unfavorable exchange rate movements. For investment purposes, certain sub-funds may enter into contracts with the intent of changing the relative exposure of the sub-fund's portfolio of securities to different currencies to take advantage of anticipated exchange rate changes. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any unrealized gains or losses are recorded as a receivable or payable for forward foreign currency exchange contracts until the contract settlement date. On contract settlement date, any gains or losses are recorded as realized gain (loss) on investments, derivatives, and currency transactions in the Statements of Operations and Changes in Net Assets. Collateral, in the form of cash or securities, is held in segregated accounts with the sub-fund's depositary in connection with these agreements. Details of the forward foreign currency exchange contracts outstanding are listed in Note 10.
- H) Hedged Share Classes Certain sub-funds offer classes with the aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class ("Hedged Share Classes" with the exception of the BRL-Hedged Share Classes as discussed below) and the unhedged base currency class of the relevant sub-fund. Brown Brothers Harriman Investor Services Limited ("BBH"), as delegated provider of currency hedging services for Hedged Share Classes, engaged in hedging transactions for such Hedged Share Classes. The terms and conditions applicable to the Hedged Share Classes are the same as those which apply for the same classes of shares offered in the base currency, the difference being the hedging of the Hedged Share Class to the base currency of the sub-fund. BBH may execute such hedging transactions by using various hedging techniques and instruments, including forward foreign currency exchange contracts, foreign exchange swap contracts, currency futures, written call options, and purchased put options. The gains/losses and expenses of the hedging process will be borne by the Hedged Share Classes. Given that there is no segregation of liabilities between share classes of the sub-funds, there is a risk that, under certain circumstances, currency hedging transactions in relation to one share class (e.g. a Hedged Share Class) could result in liabilities which might affect the net asset value of the other share classes of the same sub-fund. For example, if a currency hedging transaction in respect of a Hedged Share Class were to result in liabilities that the Hedged Share Class has insufficient assets to cover, assets attributable to the other share classes of the sub-fund may be used to cover the liabilities. Further, collateral posting requirements, which may become more burdensome in light of recent regulatory developments, may require the sub-fund to maintain a larger allocation to cash and cash-equivalent instruments than the Investment Manager would otherwise determine to hold. This could negatively affect performance for the sub-fund as a whole, even where the corresponding derivative transactions are in respect of the Hedged Share Classes alone. Details of the class-specific forward foreign currency exchange contracts outstanding are listed in Note 11.

BRL-Hedged Share Classes seek to systematically convert the value of net assets to the Brazilian Real ("BRL") through the use of derivatives. BRL-Hedged Share Classes are similar in terms of characteristics and risks to the other Hedged Share Classes as described above, except that they are not denominated in BRL (due to currency trading restrictions on BRL) but in the base currency of the respective Fund. BRL-Hedged Share Classes are designated with an "R" (e.g., IH1R (USD)). References to "Hedged Share Classes" throughout this document otherwise include the BRL-Hedged Share Classes.

I) Written Options — In exchange for a premium, each sub-fund may write call options on securities for which it anticipated the price would decline and also write put options on securities for which it anticipated the price would increase. At the time the option was written, the sub-fund believed the premium received exceeded the potential loss that could result from adverse price changes in the options' underlying securities. In a written option, the sub-fund as the option writer grants the buyer the right to purchase from, or sell to, the sub-fund a specified number of shares or units of a particular security, currency or index at a specified price within a specified period of time. The premium is initially recorded as a liability in the Statements of Assets and Liabilities. The option is subsequently marked-to-market daily with the difference between the premium received and the market value of the written option being recorded as unrealized appreciation or depreciation. When a written option expires, the sub-fund realizes a gain equal to the amount of the premium received. The difference between the premium and the amount paid on effecting a closing transaction is considered a realized gain or loss. When a written

at 31 January 2023

call option is exercised, the premium received is offset against the proceeds to determine the realized gain or loss. When a written put option is exercised, the premium reduces the cost basis of the security purchased by the sub-fund. Collateral, for uncleared options, in the form of cash or securities, is held in segregated accounts with the sub-fund's depositary in connection with these agreements.

At the initiation of the written option contract, for exchange traded options, the sub-fund is required to deposit securities or cash as collateral with either the depositary for the benefit of the broker or directly with the clearing broker, based on the type of option. For uncleared options, the sub-fund may post collateral subject to the terms of an ISDA Master Agreement as generally described above if the market value of the options contract moves against it. The sub-fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option. Losses from writing options can exceed the premium received and can exceed the potential loss from an ordinary buy and sell transaction. Although the sub-fund's market risk may be significant, the maximum counterparty credit risk to the sub-fund is equal to the market value of any collateral posted to the broker. For uncleared options, this risk is mitigated in cases where there is an ISDA Master Agreement between the sub-fund and the counterparty providing for netting as described above.

- Purchased Options Each sub-fund may purchase call or put options for a premium. Purchased call and put options entitle the holder to buy or sell a specified number of shares or units of particular security, currency or index at a specified price at a specified date or within a specified period of time. Purchasing call options may be used to hedge against an anticipated increase in the cost of securities or currency to be acquired or to increase the sub-fund's exposure to an underlying instrument. Purchasing put options may hedge against an anticipated decline in the value of portfolio securities or currency or decrease the sub-fund's exposure to an underlying instrument. The premium paid is initially recorded as an investment in the Schedules of Investments. That investment is subsequently marked-to-market daily with the difference between the premium paid and the market value of the purchased option being recorded as unrealized appreciation or depreciation. Premiums paid for purchased call and put options which have expired are treated as net realized loss on investments in the Statements of Operations and Changes in Net Assets. Upon the exercise or closing of a purchased option, the premium paid is either added to the cost of the security or financial instrument in the case of a call option, or offset against the proceeds on the sale of the underlying security or financial instrument in the case of a put option, in order to determine the net realized gain or loss on investments, derivatives, and currency transactions. Whether or not the option is exercised, the sub-fund's maximum risk of loss from purchasing an option is the amount of premium paid. All option contracts involve credit risk if the counterparty to the option contract fails to perform. For uncleared options, this risk is mitigated in cases where there is an ISDA Master Agreement between the sub-fund and the counterparty providing for netting as described above and, where applicable, by the posting of collateral by the counterparty to the sub-fund to cover the sub-fund's exposure to the counterparty under such ISDA Master Agreement.
- K) Swap Agreements Certain sub-funds may enter into swap agreements. A swap agreement is generally an exchange of cash payments, at specified intervals or upon the occurrence of specified events, between the sub-fund and another party. Swaps may be centrally cleared ("cleared swaps") or uncleared ("uncleared swaps"). In a cleared swap transaction, the ultimate counterparty to the transaction is a clearinghouse (the "clearinghouse"). The contract is transferred and accepted by the clearinghouse immediately following execution of the swap contract with an executing broker. Thereafter, throughout the term of the cleared swap, the sub-fund interfaces indirectly with the clearinghouse through a clearing broker and has counterparty risk to the clearing broker as well. Net cash payments are exchanged at specified intervals and the expected income or expense is recorded on the accrual basis. The swap agreement is recorded at value and adjusted daily and the change in value is recorded as unrealized appreciation or depreciation in the Statements of Operations and Changes in Net Assets. The value of the swap agreement, which is adjusted daily, is recorded in the Statements of Assets and Liabilities, as "Swaps, at value" for uncleared swaps. For cleared swaps, payments (variation margin) are made or received by the sub-fund each day, depending on the daily fluctuations in the value of the cleared swap, such that only the current day net receivable or payable for variation margin is included in "Receivable due from brokers" or "Payable due to brokers" as reported in the Statement of Assets and Liabilities. Amounts paid or received at the inception of the swap agreement are disclosed as premiums paid or received in Note 14 and are amortized using the effective interest method over the term of the agreement. A liquidation payment received or made upon early termination is recorded as a realized gain or loss in the Statements of Operations and Changes in Net Assets. In most instances, collateral for uncleared swaps, in the form of cash or securities, is held in segregated accounts with the sub-fund's depositary in connection with these agreements. Collateral may also be posted directly with certain counterparties. Collateral for cleared swaps, in the form of cash or securities, is posted by the sub-fund directly to the clearing broker.

Risks related to swap agreements include the possible lack of a liquid market, unfavorable market and interest rate movements of the underlying instrument and the failure of the counterparty to perform under the terms of the agreements. The sub-fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparty over the contract's remaining life, to the extent that the amount is positive, plus any collateral posted directly to the counterparty. To address counterparty risk, uncleared swap agreements are limited to only highly-rated counterparties. Risk is further reduced by having an ISDA Master Agreement between the sub-fund and its counterparty providing for netting as described above and, where applicable, by the posting of collateral by the counterparty to the sub-fund to cover the sub-fund's exposure to the counterparty under such ISDA Master Agreement. The sub-fund's counterparty risk due to cleared swaps is mitigated by the fact that the clearinghouse is the true counterparty to the transaction and the regulatory safeguards in the event of a clearinghouse or clearing broker bankruptcy. Certain sub-funds may enter into swaps for efficient portfolio management. Certain sub-funds may also enter into swaps for investment purposes. For efficient portfolio management purposes, the sub-fund may use swaps to reduce its exposure to interest and foreign exchange rate fluctuations. For investment purposes, certain sub-funds may use swaps to take a position on anticipated changes in the underlying financial index.

Interest Rate Swaps – Interest rate swap agreements involve the periodic exchange of cash flows, between the sub-fund and a counterparty, based on the differences between two interest rates applied to a notional principal amount. The two interest rates exchanged may either be a fixed rate and a floating rate or two floating rates based on different indices. The net receivable or payable associated with these payments is accrued daily and recorded as an unrealized gain or loss, and any payments received or made are recorded as realized gain or loss, in the Statements of Operations and Changes in Net Assets. Details of the interest rate swaps outstanding are listed in Note 14.

Credit Default Swaps — Credit default swaps are agreements to manage a sub-fund's exposure to the market or certain sectors of the market, to reduce a sub-fund's credit risk exposure to defaults of corporate and sovereign issuers or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. In a credit default swap, the protection buyer can make an upfront payment and will make a stream of payments to the protection seller based on a fixed percentage applied to the contract notional amount in exchange for the right to receive a specified return upon the occurrence of a defined credit event on the reference obligation (which may be either a single security or a basket of securities issued by corporate or sovereign issuers)

at 31 January 2023

and, with respect to the cases where physical settlement applies, the delivery by the buyer to the seller of a defined deliverable obligation. Although agreement specific, credit events generally consist of a combination of the following: bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium, each as defined in the 2003 ISDA Credit Derivatives Definitions as amended by the relevant contract. Restructuring is generally not applicable when the reference obligation is issued by a North American corporation and obligation acceleration, obligation default, or repudiation/moratorium are generally only applicable when the reference obligation is issued by a sovereign entity or an entity in an emerging markets country. Upon determination of the final price for the deliverable obligation (or upon delivery of the deliverable obligation in the case of physical settlement), the difference between the value of the deliverable obligation and the swap's notional amount is recorded as realized gain or loss in the Statements of Operations and Changes in Net Assets. As discussed earlier in this note, collateral requirements for these swaps, if uncleared, are based generally on the market value of the swap netted against collateral requirements for other types of uncleared derivatives traded under each counterparty's ISDA Master Agreement. Details of the credit default swaps outstanding are listed in Note 14.

- L) Futures Contracts The sub-funds may enter into futures contracts which may be used to hedge against or obtain broad market exposure, interest rate exposure, currency exposure, or to manage duration. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into a futures contract, the sub-fund is required to deposit with the broker either in cash or securities an initial margin in an amount equal to a certain percentage of the notional amount of the contract, which subjects the sub-fund to counterparty risk to the clearing broker and possibly the clearinghouse with respect to such collateral. Subsequent payments (variation margin) are made or received by the sub-fund each day, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the sub-fund until the contract is closed or expires at which point the gain or loss on futures contracts is realized. Upon entering into such contracts, the sub-fund bears the risk of interest or exchange rates or securities' prices moving unexpectedly, in which case, the sub-fund may not achieve the anticipated benefits of the futures contracts and may realize a loss. Details of the futures contracts outstanding are listed in Note 13.
- M) Combined Statements The combined Statements of Assets and Liabilities and Statements of Operations and Changes in Net Assets are presented in EUR at the exchange rate at 31 January 2023. The currency translation adjustment relates to the retranslation of the opening Net Asset Values at this exchange rate. The currency exchange rates (USD to EUR) for 31 January 2023 and 31 January 2022 were 0.919836 and 0.890115, respectively. The currency exchange rates (GBP to EUR) for 31 January 2023 and 31 January 2022 were 1.134019 and 1.197115, respectively. The currency exchange rate (JPY to EUR) for 31 January 2023 was 0.007067. In connection with the Japan Equity Fund's 7 June 2022 base currency conversion, the fund's opening Net Asset Value was translated from USD to JPY using the 3 June 2022 conversion date exchange rate of 130.855000 resulting in a currency translation adjustment of ¥70,774,425.
- N) Negative Interest Each sub-fund may be charged interest ("negative interest") on cash balances. Any such payments are included in "Interest expense and similar charges" in the Statements of Operations and Changes in Net Assets.
- O) Distributions The income allocated to Roll-up shares (A1, C1, I1, N1, S1, P1, W1, and Z1, if offered) of each sub-fund shall be included in the portion of the net assets corresponding to such shares. Each sub-fund distributes to shareholders of Income shares (A2, A4, C2, I2, N2, and W2, if offered) substantially all of the net investment income attributable to such shares. For Gross Income shares (I3 if offered), the dividend is calculated at the discretion of the Board of Directors on the basis of the total investment income attributable to such shares, with relevant expenses of the class deducted after such distribution. See the fund's prospectus for additional details.
- P) Repurchase Agreements Each sub-fund may enter into repurchase agreements. Each repurchase agreement is recorded at cost. For certain repurchase agreements, collateral posted by the counterparty is held by the sub-funds' depositary or its agent, while for others it may be held with a third-party agent. In the latter case, the sub-funds are exposed to additional counterparty risk with respect to such collateral due to the possibility of insolvency of the third-party agent. Under Luxembourg regulations, the sub-funds' depositary has established procedures to monitor collateral held with such third-party agent on behalf of the sub-funds. Each sub-fund monitors, on a daily basis, the value of the collateral to ensure that its value, including accrued interest, is greater than amounts owed to each sub-fund under each such repurchase agreement. Interest income earned on the sub-fund's investment in repurchase agreements are reflected in "Income on repurchase agreements" in the Statements of Operations and Changes in Net Assets. Details of the repurchase agreements including various counterparties and collateral amounts relating to such agreements outstanding are listed in Note 12. For the year ended 31 January 2023, the following sub-funds had transaction costs for repurchase agreements. These amounts are included in the total transaction costs in Note 15.

| Sub-Fund | Transaction Costs |
|---|----------------------|
| Asia Ex-Japan Fund | \$1,135 |
| Contrarian Value Fund | \$1,145 |
| Diversified Income Fund | \$1,150 |
| Emerging Markets Debt Fund | \$1,145 |
| Emerging Markets Debt Local Currency Fund | \$1,130 |
| Emerging Markets Equity Fund | \$1,140 |
| Emerging Markets Equity Research Fund | \$800 |
| Global Concentrated Fund | \$1,125 |
| Global Credit Fund | \$1,145 |
| Global Equity Fund | \$1,070 |
| Global Equity Income Fund | \$1,140 |
| Global High Yield Fund | \$1,150 |
| Global Intrinsic Value Fund | \$1,150 |

| Sub-Fund – (continued) | Transaction Costs |
|----------------------------------|----------------------|
| Global New Discovery Fund | \$800 |
| Global Opportunistic Bond Fund | \$1,130 |
| Global Research Focused Fund | \$1,115 |
| Global Strategic Equity Fund (b) | \$425 |
| Global Total Return Fund | \$1,150 |
| Inflation-Adjusted Bond Fund | \$945 |
| Japan Equity Fund | ¥51,415 |
| Latin American Equity Fund (d) | \$460 |
| Limited Maturity Fund | \$1,120 |
| Managed Wealth Fund | \$1,150 |
| Prudent Capital Fund | \$1,150 |
| Prudent Wealth Fund | \$1,150 |
| U.S. Concentrated Growth Fund | \$1,135 |
| U.S. Corporate Bond Fund | \$1,140 |
| U.S. Government Bond Fund | \$1,145 |
| U.S. Total Return Bond Fund | \$1,145 |
| U.S. Value Fund | \$1,145 |

- (b) The commencement of operations of the sub-fund was 18 May 2022.
- (d) The sub-fund ceased operations on 28 June 2022.
- Q) Inflation-Adjusted Debt Securities Certain sub-funds may invest in inflation-adjusted debt securities issued by the U.S. Treasury. Certain sub-funds may also invest in inflation-adjusted debt securities issued by U.S. Government agencies and instrumentalities other than the U.S. Treasury and by other entities such as U.S. and foreign corporations and foreign governments. The principal value of these debt securities is adjusted through income according to changes in the Consumer Price Index or another general price or wage index. These debt securities typically pay a fixed rate of interest, but this fixed rate is applied to the inflation-adjusted principal amount. The principal paid at maturity of the debt security is typically equal to the inflation-adjusted principal amount, or the security's original par value, whichever is greater. Other types of inflation-adjusted securities may use other methods to adjust for other measures of inflation.

Note 3: Swing Pricing

Large transactions into or out of a sub-fund can create "dilution" of the sub-fund's assets because the price at which an investor buys or sells shares may not entirely reflect the trading and other related costs that arise when the Investment Manager trades securities to accommodate the large inflows and outflows. Therefore, the Company has adopted procedures such that a sub-fund's net asset value may be adjusted upward or downward (otherwise known as "swing pricing") in order to reduce the impact of such costs to existing shareholders of that sub-fund. Under these procedures, in the usual course of business, the adjustment will be triggered whenever the net subscriptions, exchanges, and redemptions in shares of all classes on a particular business day exceed a certain percentage of the sub-fund's assets as set by the Board of Directors of the Company or Management Company from time to time. In case of a large amount of net purchases, the net asset value per share will be adjusted upward and purchasers of sub-fund shares on that valuation date will effectively contribute an additional amount to offset the related transaction costs. Conversely, net asset value per share will be adjusted downward with a large amount of net redemptions. The adjusted net asset value will be applicable to all purchases, exchanges, or redemptions in shares of all classes on that valuation day. As a sub-fund's net purchases, redemptions, and exchanges vary from business day to business day, it is not possible to predict how frequently a sub-fund's net asset value will be adjusted. Based on these adjustments, the volatility of a sub-fund's net asset value may not fully reflect the true performance of the sub-fund's underlying assets. The published/dealing NAV per share, as adjusted in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, is disclosed in Statistical Information and may include a swing pricing adjustment. This adjustment is not recognized in either the Statements of Assets and Liabilities or the Statements of Operations and Changes in Net Assets. At 31 January 2023, no sub-funds included a swing pricing adjustment. A swing pricing historical activity report for the period is available at meridian.mfs.com.

Any adjustment to a sub-fund's net asset value (the "swing factor") will generally not exceed 2% of the net asset value of the relevant sub-fund on the relevant valuation date. However, under extraordinary conditions and when necessary in light of the best interests of investors, the Board of Directors may determine to use a swing factor in excess of 2% for a sub-fund. Such a decision must be notified to the CSSF, and investors will be informed via notice published in a Luxembourg newspaper and in another newspaper of more general circulation, as well as on meridian.mfs.com.

Note 4: Securities Loaned

Goldman Sachs Agency Lending ("GSAL"), as lending agent, may loan the securities of certain sub-funds to certain qualified institutions (the "Borrowers") approved by the fund. The loans are collateralized by high quality government debt in an amount at least equal to the market value of the securities loaned marked-to-market on a daily basis; such collateral is held within the sub-fund's depositary's custodian network. GSAL provides the applicable sub-fund with indemnification against Borrower default, including failure to deliver to the sub-fund any applicable distributions with respect to securities on loan or to return to the applicable sub-fund securities on loan in accordance with the lending agreement. On loans collateralized by high quality government debt, a fee is

at 31 January 2023

received from the Borrower, and is allocated between the sub-fund and the lending agent (which is not a related party to the fund, Management Company, Investment Manager or Depositary). Under the current securities lending agreement, the Company has agreed to pay the lending agent 15% of income generated up to \$4 million from securities lending transactions and 12.5% of income exceeding \$4 million from securities lending transactions. A nominal account maintenance and per-transaction fee is also paid to the Depositary Trust Clearing Corporation in connection with collateral maintenance. Income and expense from securities lending is separately reported in the Statements of Operations and Changes in Net Assets. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income as disclosed in Note 2. At 31 January 2023, there were no securities on loan or collateral outstanding.

Note 5: Related Party Transactions

A) Management Company Fee — The Board of Directors of the fund has appointed MFS Investment Management Company (Lux) S.à r.l. pursuant to a Management Company Agreement to carry out the functions of management of the fund as prescribed under Luxembourg regulations. The Management Company is responsible for the fund's investment management, administration and distribution and marketing functions. The Management Company has been permitted by the fund to delegate, under the Management Company's supervision and control, certain administrative, distribution and investment management functions to affiliates or third party service providers. The Management Company has appointed MFS, an affiliate, as the Investment Manager and Administrative Services Agent.

Each sub-fund pays the Management Company an annual fee approved by the fund's Board of Directors, which is intended to cover the expenses of services the Management Company provides in connection with its mandate, plus a target profit margin. These expenses include fees paid to the Management Company's independent Conducting Persons and Managers of the Management Company, legal, regulatory and operational costs of the Management Company as well as fees paid by the Management Company to third parties to provide certain administrative, risk management and reporting services to the Management Company, including the administrative support services provided by MFS. The fund also reimburses the Management Company for out-of-pocket expenses related to its services. The management company fee is computed daily and is allocated such that each sub-fund pays a fixed fee of \$20,000 (or currency equivalent) plus an asset-based fee based on average daily net assets over \$40 million and up to \$4 billion (or currency equivalent) for each sub-fund. The management company fee incurred by each sub-fund for the year ended 31 January 2023 was equivalent to the following annual effective rates of each sub-fund's average daily net assets:

| Sub-Fund | % of Average Daily Net Assets |
|---|-------------------------------------|
| Asia Ex-Japan Fund | 0.0464% |
| Blended Research European Equity Fund | 0.2197% |
| Continental European Equity Fund | 0.0807% |
| Contrarian Value Fund | 0.0336% |
| Diversified Income Fund | 0.0376% |
| Emerging Markets Debt Fund | 0.0290% |
| Emerging Markets Debt Local Currency Fund | 0.0762% |
| Emerging Markets Equity Fund | 0.0395% |
| Emerging Markets Equity Research Fund | 0.7762% |
| Euro Credit Fund | 0.0385% |
| European Core Equity Fund | 0.0341% |
| European Research Fund | 0.0291% |
| European Smaller Companies Fund | 0.0306% |
| European Value Fund | 0.0250% |
| Global Concentrated Fund | 0.0301% |
| Global Credit Fund | 0.0392% |
| Global Equity Fund | 0.0290% |
| Global Equity Income Fund | 0.6225% |
| Global High Yield Fund | 0.0320% |
| Global Intrinsic Value Fund | 0.0361% |
| Global New Discovery Fund | 0.3475% |
| Global Opportunistic Bond Fund | 0.0308% |
| Global Research Focused Fund | 0.0350% |
| Global Strategic Equity Fund (b) | 0.9052% |
| Global Total Return Fund | 0.0293% |
| Inflation-Adjusted Bond Fund | 0.0323% |

| Sub-Fund – (continued) | % of Average Daily Net Assets |
|--------------------------------|-------------------------------------|
| Japan Equity Fund | 0.6194% |
| Latin American Equity Fund (d) | 0.3498% |
| Limited Maturity Fund | 0.0298% |
| Managed Wealth Fund | 0.1048% |
| Prudent Capital Fund | 0.0263% |
| Prudent Wealth Fund | 0.0274% |
| U.K. Equity Fund | 0.0658% |
| U.S. Concentrated Growth Fund | 0.0306% |
| U.S. Corporate Bond Fund | 0.0311% |
| U.S. Government Bond Fund | 0.0318% |
| U.S. Growth Fund | 0.0485% |
| U.S. Total Return Bond Fund | 0.0305% |
| U.S. Value Fund | 0.0292% |

⁽b) The commencement of operations of the sub-fund was 18 May 2022.

B) Investment Management Fee – The Management Company has an investment management agreement with MFS to provide investment management services for the sub-funds. The investment management fee is computed daily and paid monthly at the following annual rates as of 31 January 2023 based on average daily net assets of each share class for the sub-funds below:

| Sub-Fund | Class A | Class C | Class I | Class N | Class S | Class W |
|---|---------|---------|----------|---------|---------|----------|
| Asia Ex-Japan Fund | 1.05% | 1.05% | 0.75% | 1.05% | 1.05% | 0.80% |
| Blended Research European Equity Fund | 0.60% | 0.60% | 0.45% | 0.60% | _ | 0.50% |

| U.S. Value Fund | 1.80% |

The investment management fee for Class Z shares will be administratively levied and will be paid directly by the shareholder, in relation to investment management services provided by MFS to the sub-fund, and the payment of such fee is not charged to or paid by the sub-fund.

C) Distribution and Service Fees — The Management Company is also responsible for oversight of the distribution and marketing function with respect to the fund. All distribution and service fees are being paid to the Management Company or its affiliate. The Management Company or its affiliates may pay all or a portion of such fees to financial intermediaries. The Management Company may engage certain of its affiliates (including MFS International Limited) to provide distribution support to the Management Company.

The fund has adopted a distribution plan, which provides that each sub-fund pays the Management Company or its affiliate an annual distribution and/or service fee paid on a monthly basis. Each sub-fund pays a distribution fee annually of average daily net assets of Class A, Class C, and Class N shares at the following rates:

| Sub-Fund | Class A | Class C | Class N |
|---------------------------------------|---------|---------|---------|
| Asia Ex-Japan Fund | 0.75% | 1.00% | 1.25% |
| Blended Research European Equity Fund | 0.75% | 1.00% | 1.25% |

⁽d) The sub-fund ceased operations on 28 June 2022. Information for the current period is as of 28 June 2022, and period end information disclosed is as of this date.

⁽e) WSH1 (EUR), WSH1 (CHF), and WS1 (USD) have an investment management fee of 0.60%.

⁽f) ISB1 (EUR) has an investment management fee of 0.37%.

⁽b) The commencement of operations of the sub-fund was 18 May 2022.

In consideration for the distribution fees, the Management Company or its affiliate pays expenses on behalf of these sub-funds related to the marketing and distribution of their shares, including a fee paid to financial intermediaries or institutions.

The service fee paid to the Management Company or its affiliate is established at the annual rate of 0.50% of average daily net assets attributable to the Class C shares of each sub-fund.

Class A shares are subject to a front-end load of up to 6.00% of the net asset value of such shares. With respect to each sub-fund, certain large purchases of Class A shares may be purchased without a front-end load. Class N shares and Class P shares are subject to a front-end load of up to 3.00% of the net asset value of such shares. Class C shares are subject to a back-end load up to a maximum of 1.00% in the event of a shareholder redemption within twelve months following the purchase. Front-end loads may be paid to the Management Company or its affiliate (all or a portion of which may be paid as

⁽d) The sub-fund ceased operations on 28 June 2022. Information for the current period is as of 28 June 2022, and period end information disclosed is as of this date.

at 31 January 2023

a commission by the Management Company or its affiliate to the applicable financial intermediary upon the sale of Class A shares) or may be deducted from the applicable purchase amount directly by the financial intermediary upon the purchase of Class A shares. The Management Company or its affiliate receives all back-end loads, which are generally intended to recapture sales commissions paid by the Management Company or its affiliate to financial intermediaries upon the purchase of the applicable class.

The Management Company has voluntarily agreed to rebate a portion of the service fee for Class C shares and a portion of the distribution fee for Class A shares, Class N, and Class P shares to the respective share class attributable to accounts for which there is no broker-dealer or other financial intermediary designated except for accounts attributable to MFS or its affiliates' seed money. The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets.

- D) Directors' Fees The fund pays no compensation directly to Directors of the fund who are employees of the Management Company, Investment Manager or its affiliates (other than fund related out-of-pocket expenses). As of the date of this report, all Directors of the fund are employees of the Management Company, MFS Investment Management or its affiliates, except for Thomas Bogart and James R. Julian Jr., whose compensation, paid by the sub-funds in aggregate amounted to \$100,000 during the reporting period, before taxes. Thomas Bogart and James R. Julian Jr., also received reimbursement for out-of-pocket expenses, paid by the sub-funds. These fees are included in the "Miscellaneous" expenses in the Statements of Operations and Changes in Net Assets. For the year ended 31 January 2023, there were out-of-pocket expenses of \$6,994 paid by the sub-funds.
- E) Expense Cap Arrangement Each sub-fund has entered into a temporary expense cap agreement whereby MFS has agreed in writing to bear certain of the sub-fund's "Other Expenses," excluding taxes (other than the Luxembourg taxe d'abonnement) and expenses associated with the sub-fund's investment activities such as interest expense, such that these expenses do not exceed the rates of average daily net assets of Class A, Class C, Class I, Class N, Class P, Class W, and Class Z noted in the table below.

"Other Expenses" generally include all direct sub-fund expenses other than investment management, distribution and service fees. "Other Expenses" include fees paid to the Management Company, Depositary and Transfer Agent, legal and audit fees, share class hedging expenses, certain expenses associated with the sub-fund's investment activities including interest, and expenses in connection with the sub-fund's operation and central administration in Luxembourg, among others. "Other Expenses" do not include brokerage commissions and transaction costs or currency conversion costs and the fee paid to the securities lending agent.

For Class S, each sub-fund has entered into a temporary expense cap agreement whereby MFS has agreed in writing to bear certain direct expenses, excluding taxes (other than the Luxembourg taxe d'abonnement) and expenses associated with the sub-fund's investment activities such as interest expense, such that the "Total Expense Ratio" does not exceed the rates of average daily net assets noted in the table below.

To the extent the "Total Expense Ratio" (in the case of Class S) or "Other Expenses" (in the case of other classes) exceeds the expense cap rate, the difference is attributable to certain other expenses that are excluded from the expense cap arrangement, such as interest expenses associated with the sub-fund's investment activities, brokerage commissions and transaction costs, currency conversion costs, or the fee paid to the securities lending agent.

For Class IS and Class WS, the Management Company reserves the right to offer a partial waiver of the investment management fee and/or an arrangement to bear "Other Expenses." The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets.

- (b) The commencement of operations of the sub-fund was 18 May 2022.
- (d) The sub-fund ceased operations on 28 June 2022. Information for the current period is as of 28 June 2022, and period end information disclosed is as of this date.
- (e) WSH1 (EUR), WSH1 (CHF), and WS1 (USD) have an other expense cap rate of 0.05%.
- (f) ISB1 (EUR) has an other expense cap rate of 0.10%.

The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets. These expense cap agreements are in place until 31 January 2024, at which time the arrangements may or may not be continued. All transactions entered into between the fund and MFS have been entered into in the ordinary course of business and on normal commercial terms. The fund has not entered into any transactions through a broker who is a connected person, nor has the fund entered into any transactions which are outside the ordinary course of business or not on normal commercial terms.

Note 6: Depositary Fees

Each sub-fund will pay State Street Bank International GmbH, Luxembourg Branch ("State Street"), the fund's depositary and global custodian (the "Depositary"), a fee based on the monthly net asset value of the month-end holdings by foreign markets of the sub-funds plus a fee based upon the trading activity of each sub-fund. The Depositary and the Management Company or MFS, on behalf of the fund, shall determine the level of the fee from time to time in light of market rates applicable in Luxembourg. The fee is approved by the fund's Board of Directors. Reasonable disbursements and out-of-pocket expenses incurred by the Depositary or by other banks and financial institutions to which safekeeping of assets of the sub-funds is entrusted are in addition to the Depositary's fee. The Management Company and the fund have also entered into agreements with State Street to serve as the Registrar, Transfer Agent, Luxembourg Paying Agent, Central Administration Agent, and Fund Accounting Agent. The fund pays State Street fees for such services at commercial rates agreed upon between the parties, together with reasonable out-of-pocket expenses. The fees paid to State Street for these services are part of each sub-fund's operating expenses which are capped by MFS as described in Note 5.

Note 7: Commission Sharing

The Investment Manager and its affiliates (the "MFS Global Group") utilize a global investment platform built on the principle of close collaboration among members of its investment team, where research and investment ideas are shared. MFS Global Group investment professionals rely on their own internal research in making investment decisions even though they utilize external research provided by brokers or other research providers to help develop investment ideas. External research is also used to help understand market consensus, sentiment or perception, and identify relative inefficiencies more quickly and effectively.

The MFS Global Group makes decisions on the procurement of external research separately and distinctly from decisions on the selection of brokers that execute transactions for client accounts. The MFS Global Group will only execute a transaction with a broker who provides external research when, in the MFS Global Group's judgment, the broker is capable of providing best execution for that transaction.

However, as permitted by Section 28(e) of the U.S. Securities Exchange Act of 1934, as amended ("Section 28(e)"), which governs the Investment Manager, the MFS Global Group may cause certain clients to pay a broker that provides "brokerage and research services" (as defined in Section 28(e)) to the MFS Global Group an amount of commission for effecting a securities transaction for clients in excess of the amount other brokers would have charged for the transaction if the MFS Global Group determines in good faith that the greater commission is reasonable in relation to the value of the brokerage and research

at 31 January 2023

services provided viewed in terms of the MFS Global Group's overall responsibilities to its clients. The brokerage and research services received may be useful and of value to the MFS Global Group in serving both the accounts that generated the commissions and other clients of the MFS Global Group. Accordingly, not all of the research and brokerage services provided by brokers through which client securities transactions are effected may be used by MFS in connection with the client whose account generated the brokerage commissions.

The MFS Global Group has undertaken to bear the costs of external research for all accounts it advises, either by paying for external research out of its own resources, or by voluntarily reimbursing clients from its own resources for excess commissions paid to obtain external research. For accounts subject to a regulatory prohibition on the payment of excess commissions for research, including accounts that are directly or indirectly subject to the Markets in Financial Instruments Directive in the EU or U.K. ("MiFID II accounts"), the MFS Global Group will pay for external research out of its own resources. For all other accounts, the MFS Global Group operates a commission sharing arrangement that generates commission "credits" for the purchase of external research from commissions on equity trades in a manner consistent with Section 28(e). Under this arrangement the MFS Global Group may cause a client to pay commissions in excess of what the broker or other brokers might have charged for certain transactions in recognition of brokerage and research services provided by the executing broker. The MFS Global Group has voluntarily undertaken to reimburse clients from its own resources in an amount equal to all commission credits generated under this arrangement.

The research services obtained by the MFS Global Group through the use of commission credits may include: access to corporate management; industry conferences; research field trips to visit corporate management and/or to tour manufacturing, production or distribution facilities; statistical, research and other factual information or services such as investment research reports; access to analysts; a small number of expert networks; reports or databases containing corporate, fundamental, technical and political analyses; ESG-related information; portfolio modelling strategies; and economic research services, such as publications, chart services, and advice from economists concerning macroeconomics information, and analytical investment information about particular corporations.

Through the use of eligible brokerage and research services acquired with commission credits, the MFS Global Group initially avoids the additional expenses that it would incur if it developed comparable information through its own staff or if it purchased such services with its own resources. As a result, clients may pay more for their account transactions in the first instance than if the MFS Global Group caused clients to pay execution only rates. However, because the MFS Global Group has voluntarily undertaken to reimburse clients from its own resources for commission credits generated from client brokerage, the MFS Global Group ultimately assumes the additional expenses that it would incur if it purchased external research with its own resources. If the MFS Global Group determined to discontinue this voluntary undertaking, it may have an incentive to select or recommend a broker based on its interest in receiving external research rather than the client's interest in receiving lower commission rates.

Although the MFS Global Group generally bears the costs of external research, it generally does not pay, and therefore does not reimburse clients with respect to research that is made available by a broker to all of its customers and that the MFS Global Group generally considers to be of de minimis value, or for external research provided by executing brokers in fixed income transactions that incur mark-ups, mark-downs, and other fees rather than commissions. With respect to fixed income, the MFS Global Group believes that executing brokers in fixed income transactions do not charge lower mark-ups, mark-downs, commission equivalents or other fees if clients forego research services. Consequently, the MFS Global Group does not believe it pays higher mark-ups, mark-downs, commission equivalents or other fees to brokers on fixed income transactions than it would if it did not receive any research services from brokers.

Note 8: Taxation

The fund is subject to Luxembourg law with respect to its tax status. Under legislation and regulations currently prevailing in Luxembourg, the fund is subject to a "taxe d'abonnement" on its net assets at an annual rate of 0.05% for Class A, Class C, Class N, Class P, and Class W and 0.01% for Class I, Class S, and Class Z. The "taxe d'abonnement" is calculated and payable quarterly on the basis of the net assets at the end of each calendar quarter. Interest and dividend income, and gains on securities, may be subject to non-recoverable withholding taxes deducted at source in the countries of origin.

The fund is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with current regulations.

United Kingdom Tax Considerations – The Company has received "reporting fund" status for certain sub-funds and share classes for the fiscal year ended 31 January 2023. More information can be found at www.mfs.com.

Note 9: Line of Credit

Each sub-fund and other funds managed by MFS participate in an unsecured committed line of credit, subject to a \$250 million sublimit provided by a syndicate of banks under a credit agreement. Borrowings may be made for temporary financing needs. Interest is charged to each sub-fund, based on its borrowings, generally at a rate equal to the highest of 1) Daily Simple SOFR (Secured Overnight Financing Rate) plus 0.10%, 2) the U.S. Federal Funds Effective Rate, or 3) the Overnight Bank Funding Rate, each plus an agreed upon spread. A commitment fee, based on the average daily unused portion of the committed line of credit, is allocated among the participating sub-funds. The line of credit expires on 14 March 2024 unless otherwise extended or renewed. In addition, each sub-fund and other funds managed by MFS have established a \$200 million unsecured uncommitted borrowing arrangement with its depositary bank for temporary financing needs. Interest is charged to each participating sub-fund, based on its borrowings, at rates equal to customary reference rates plus an agreed upon spread. Any interest fees are reflected in "Interest expense and similar charges" and any commitment fees are reflected in "Miscellaneous" expense in the Statements of Operations and Changes in Net Assets. None of the sub-funds had any borrowings outstanding under these arrangements at 31 January 2023. The Global Strategic Equity Fund did not participate in the unsecured committed line of credit during the year end 31 January 2023. The sub-fund was added to the unsecured committed line of credit on 16 March 2023.

at 31 January 2023

Note 10: Open Forward Foreign Currency Exchange Contracts

At 31 January 2023, the sub-funds had outstanding the following forward foreign currency exchange contracts. Each sub-fund had sufficient cash and/or other securities to cover any commitments under these derivative contracts.

| Туре | Currency | Counterparty | Contracts to Deliver/Receive | Settlement Date Range | In Exchange For | Contracts at Value | Net Unrealized Gain (Loss) |

Note 15: Transaction Costs

For the year ended 31 January 2023, the sub-funds incurred transaction costs which have been defined as brokerage commissions (which may include costs related to Research, see Note 7) in respect of the purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets, and fees charged by the Depositary for the execution of the sub-funds' transactions. Brokerage commissions are included in Identified Cost in the Schedules of Investments or in Net Realized Gain (Loss) on Investments, Derivatives, and Currency Transactions in the Statements of Operations and Changes in Net Assets. The reimbursement of Research by MFS, if any, is included in "Other" in the Statements of Operations and Changes in Net Assets. Fees charged by the Depositary are disclosed as part of the Depositary fee in the Statements of Operations and Changes in Net Assets.

- (b) The commencement of operations of the sub-fund was 18 May 2022.
- (d) The sub-fund ceased operations on 28 June 2022. Information for the current period is as of 28 June 2022, and period end information disclosed is as of this date.

Note 16: Summary of accounting differences between Luxembourg legal and regulatory requirements for investment funds and accounting principles generally accepted in the United States

The fund's financial statements are prepared in accordance with Luxembourg legal and regulatory requirements for investment funds. These requirements differ in the manner in which discount is accreted and premium is amortized into income for certain fixed income securities from accounting principles generally accepted in the United States ("U.S. GAAP"). These differences do not change the total results of operations but may impact amounts reported for net investment income and change in realized and unrealized gain (loss) for investments, derivatives, and currency translation. These differences have no impact on the net assets of the sub-funds. A description of the material differences and the financial statement impact for those impacted sub-funds are as follows:

| | Luxembourg legal ar requirements | U.S. GAAP | | | |
|---|--|---|-----------------------|--|--|
| Fixed income securities | Premium on fixed income to be amortized to incom Discount on interest only to be accreted to income | ne on a daily basis. to income securities is not required only secu | | n on fixed income securities is amortized ne on a daily basis. Discount on interest urities is accreted to income on a daily | |
| Sub-Fund | Total net investment income in accordance with Luxembourg legal and regulatory requirements | Net adjustment amortization of prem accretion of discount of fixed income secu | ium and on certain | Total net investment income in accordance with U.S. GAAP | |

Note 17: Russia and Ukraine Conflict

The market disruptions, which began in late February 2022, associated with geopolitical events related to the conflict between Russia and Ukraine may adversely affect the value of the sub-funds' assets and thus the sub-funds' performance. In addition, the Diversified Income Fund, Emerging Markets Debt Fund, Emerging Markets Debt Local Currency Fund, Emerging Markets Equity Fund, Emerging Markets Equity Research Fund, Global Equity Income Fund, Global New Discovery Fund, Global Opportunistic Bond Fund, and Global Total Return Fund invest in securities and/or derivative instruments that are economically tied to Russia and/or Ukraine. Escalation of the conflict between Russia and Ukraine in late February 2022 caused market volatility and disruption in the tradability of Russian securities, including closure of the local securities market, temporary restriction on securities sales by non-residents, and disruptions to clearance and payment systems. To the extent that the sub-funds are unable to sell securities, whether due to market constraints or to the sanctions imposed on Russia by the United States and other countries, those securities will be considered illiquid and the value of those securities will reflect their illiquid classification. This may negatively impact the sub-funds' performance and/or ability to achieve their investment objectives. Management continues to monitor these events and to evaluate the related impacts, if any, to the sub-funds.

Note 18: Share Class Events

Effective 18 May 2022, the following MFS Meridian Fund's share classes commenced operations:

Contrarian Value Fund A1 (EUR), W1 (EUR)

Effective 9 June 2022, the following MFS Meridian Fund's share class commenced operations:

Japan Equity Fund I1 (JPY)

Effective 26 July 2022, the following MFS Meridian Funds' share classes commenced operations:

Contrarian Value Fund WS1 (USD), WSH1 (CHF), WSH1 (EUR)

European Research Fund ISB1 (EUR)

Effective 13 September 2022, the following MFS Meridian Fund's share class commenced operations:

Inflation Adjusted Bond Fund IH1 (EUR)

Note 19: Subsequent Events

Effective 24 February 2023, the following MFS Meridian Fund's share classes commenced operations:

Global Opportunistic Bond Fund IS1 (USD), ISH1 (EUR), ISH2 (GBP), WS1 (USD), WSH1 (EUR), WSH2 (GBP)

Effective 31 March 2023, the following MFS Meridian Fund's share class commenced operations:

U.S. Total Return Bond Fund IS1 (USD)

ADDENDUM

EXPENSE RATIOS (audited)

For the twelve months ended 31 January 2023:

The following expense ratio has been calculated in accordance with the Swiss Funds & Asset Management Association Guidelines on the calculation and disclosure of the Total Expense Ratio of collective investment schemes 16 May 2008 (Version of 20 April 2015).

| Emerging Markets Debt Fund | |
|----------------------------|-------|
| Class Z1 (USD) | 0.05% |

REMUNERATION POLICY (unaudited)

The Management Company has adopted a remuneration policy and implements related procedures and practices which are consistent with and promote sound and effective risk management in a manner appropriate to the Management Company's size, internal organization, and the nature, scope and complexity of its activities. The remuneration policy of the Management Company is administered and overseen by a remuneration committee composed of members of MFS executive management and its human resources team and is reviewed and approved by the remuneration committee and Board of Management Company each financial year.

Further details on the remuneration policy, including a description of how remuneration and benefits are calculated, are available by referring to *meridian.mfs.com* (and clicking the link "Information on MFS' Remuneration Policy"), and a paper copy of such details is available upon request of the registered office of the Management Company without charge.

As of the Company's fiscal year end, the Management Company identified staff who performed activities in respect of the Company consisted of 65 individuals, inclusive of the independent Managers of the Management Company and certain delegated investment manager staff. The total amount of remuneration paid by the Management Company and its delegates to identified staff in respect of the Company during the Company's fiscal year was €35,118,255, which consisted of €1,982,560 in fixed remuneration and €33,135,695 in variable remuneration. Information on the remuneration paid during the year to identified staff is available upon request at the registered office of the Management Company based on the demonstration of a satisfactory need for such information.

None of the remuneration paid by the Management Company for the Company's financial year was paid directly by the Company or any sub-fund, or resulted from performance fees.

SECURITIES FINANCING TRANSACTIONS REGULATION (unaudited)

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") requires disclosure detailing the Company's use of securities financing transactions in the Company's annual and semiannual reports.

A securities financing transaction ("SFT") is defined per Article 31(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction;
- a margin lending transaction.

The SFTR also extends the disclosure requirements to total return swaps.

The disclosure requirements are presented in the tables below. For additional information regarding the sub-funds' usage of SFTs and total return swaps, refer to the following Notes within the Notes to Financial Statements:

- Repurchase Agreements: Note 2 and Note 12
- Securities Loaned: Note 4
- Total Return Swaps: Note 2 and Note 14

At 31 January 2023, the sub-funds had the following amounts of assets engaged in each type of SFT and as a percentage of the sub-fund's net assets:

| Sub-Fund | Market Value of Repurchase Agreements | % of Net Assets |
|---|--|--------------------|
| Settlement/clearing for each type of SFT: | Bi-Lateral | |
| Asia Ex-Japan Fund | \$24,000 | 0.05% |
| Contrarian Value Fund | \$587,000 | 0.22% |
| Diversified Income Fund | \$260,000 | 0.29% |
| Emerging Markets Debt Fund | \$4,913,000 | 0.22% |
| Emerging Markets Debt Local Currency Fund | \$105,000 | 0.39% |
| Emerging Markets Equity Fund | \$75,000 | 0.09% |
| Emerging Markets Equity Research Fund | \$5,000 | 0.17% |
| Global Concentrated Fund | \$335,000 | 0.05% |
| Global Credit Fund | \$99,000 | 0.12% |
| Global Equity Fund | \$778,000 | 0.02% |

| Sub-Fund | Market Value of Repurchase Agreements | % of Net Assets | |
|---|--|--------------------|--|
| Settlement/clearing for each type of SFT: | Bi-Lateral | | |
| Global Equity Income Fund | \$4,000 | 0.08% | |
| Global High Yield Fund | \$318,000 | 0.13% | |
| Global Intrinsic Value Fund | \$78,000 | 0.08% | |
| Global New Discovery Fund | \$7,000 | 0.12% | |
| Global Opportunistic Bond Fund | \$539,000 | 0.15% | |

Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors:

The sub-funds are not permitted to sell, reinvest or pledge collateral received in the form of securities. To the extent the sub-funds receive cash as collateral, such cash collateral would only be placed on deposit with credit institutions allowed under Luxembourg law, and if applicable may only be reinvested in high-quality government bonds, reverse repurchase transactions (provided the transactions are with credit institutions subject to prudential supervision and the sub-fund is able to recall at any time the full amount of cash on accrued basis) or short-term money market funds allowed by Luxembourg law in order to mitigate the risk of losses on reinvestment. The sub-funds did not receive cash collateral for SFTs or total return swaps at 31 January 2023.

Safekeeping of collateral received by the sub-funds as part of SFTs, number and names of custodians and the amount of the collateral assets safe-kept by each of the custodians:

Safekeeping of collateral granted by the sub-fund as part of SFTs and total return swaps, proportion of collateral held in segregated accounts or in pooled accounts or in any other accounts:

At 31 January 2023, the sub-funds did not pledge collateral in connection with SFTs or total return swaps.

Data on return and cost for each type of SFTs and total return swaps broken down between the sub-fund, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps:

For information on income or returns earned and costs incurred for repurchase agreements, refer to Note 2 and for securities loaned, refer to Note 4. At 31 January 2023, the sub-funds did not hold any total return swaps.

EU Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

Effective as of the date of this report, the following MFS Meridian Funds sub-funds were designated as meeting the criteria of Article 8 under SFDR:

| Blended Research European Equity | Global Credit Fund | Prudent Capital Fund |
|----------------------------------|--------------------------------|-------------------------------|
| Continental European Equity Fund | Global Equity Fund | Prudent Wealth |
| Contrarian Value Fund | Global Equity Income Fund | U.K. Equity Fund |
| Diversified Income Fund | Global Intrinsic Value Fund | U.S. Concentrated Growth Fund |
| Euro Credit Fund | Global Opportunistic Bond Fund | U.S. Corporate Bond fund |
| European Core Equity Fund | Global Research Focused Fund | U.S. Growth Fund |
| European Research Fund | Global Strategic Equity Fund | U.S. Total Return Bond Fund |
| European Smaller Companies Fund | Global Total Return Fund | U.S. Value Fund |
| European Value Fund | Limited Maturity Fund | |
| Global Concentrated Fund | Managed Wealth Fund | |
| | | |

These sub-funds promote the MFS Low Carbon Transition Characteristic. Further information on the characteristic is contained in the respective SFDR website disclosure which can be accessed at meridian.mfs.com (select location and applicable Article 8 fund for the 'SFDR Article 8 Fund Disclosure' document). Further information is available in the respective SFDR website disclosure which can be accessed at meridian.mfs.com (select location and applicable Article 8 fund for the 'SFDR Article 8 Fund Disclosure' document).

The extent to which each sub-fund met the underlying climate criteria as of the date of this report is available in the SFDR Annex attached to this report and available at meridian.mfs.com (select location and applicable Article 8 fund for the 'SFDR Article 8 Fund Disclosure' document).

Neither the MFS Meridian Article 8 funds listed above, nor the other sub-funds of MFS Meridian Funds, take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and portfolio alignment with such Taxonomy Regulation is not calculated.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of MFS Meridian Funds 4, rue Albert Borschette L-1246, Luxembourg Grand Duchy of Luxembourg Ernst & Young Société anonyme 35E, Avenue John F. Kennedy L-1855 Luxembourg

Tel: +352 42 124 1 www.ey.com/luxembourg B.P. 780 L-2017 Luxembourg

R.C.S. Luxembourg B 47 771 TVA LU 16063074

Opinion

We have audited the financial statements of MFS Meridian Funds (the "Fund") and of each of its sub-funds, which comprise the statements of assets and liabilities and the schedules of investments as at 31 January 2023, and the statements of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 January 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITOR'S REPORT

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young Société anonyme Cabinet de révision agréé

Kerry Nichol

Luxembourg, 4 May 2023

REPORT OF INDEPENDENT AUDITORS

To the Shareholders of MFS Meridian Funds 4, rue Albert Borschette L-1246, Luxembourg Grand Duchy of Luxembourg Ernst & Young Société anonyme 35E, Avenue John F. Kennedy L-1855 Luxembourg

Tel: +352 42 124 1 www.ey.com/luxembourg B.P. 780 L-2017 Luxembourg

R.C.S. Luxembourg B 47 771 TVA LU 16063074

Opinion

We have audited the financial statements of MFS Meridian Funds (the "Fund"), which comprises the statements of assets and liabilities, including the schedules of investments, as of 31 January 2023, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of MFS Meridian Funds at 31 January 2023, and the results of its operations and changes in net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of the Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements, and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by the Board of Directors, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

REPORT OF INDEPENDENT AUDITORS

Other Information

The Board of Directors is responsible for the other information. The other information comprises the Letter from the Chair, Performance Table, General Information, Corporate Governance, Certain Risk Management Disclosures, Statistical Information, and Addendum but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective

Sustainable

and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Sustainability indicators

Taxonomy or not.

measure how the environmental or social characteristics promoted by the financial product are attained.

Product name: MFS Meridian Funds – Blended Research European Equity Fund ("MFS Blended Research European Equity Fund")

Legal entity identifier: 54930067ZHQOV0SGFJ15

Environmental and/or social characteristics

| Does this financial product have a sustainable investment? | | |
|--|---|--|
| Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 22 November 2022, the MFS Blended Research European Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Blended Research European Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 87.33% of the equity securities in the portfolio of the MFS Blended Research European Equity Fund met at least one of the climate criteria, which represented 87.01% of the total assets. Equity securities represented 99.63% of the assets of the MFS Blended Research European Equity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 22 November 2022 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 70.46 | 70.20 |
| 31 October 2022 | 69.51 | 69.01 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 62.73 | 62.50 |
| 31 October 2022 | 63.81 | 63.36 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 0 | 0 | |
| 31 October 2022 | 0 | 0 | |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 87.33 | 87.01 |
| 31 October 2022 | 87.33 | 86.71 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Blended Research European Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Blended Research European Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

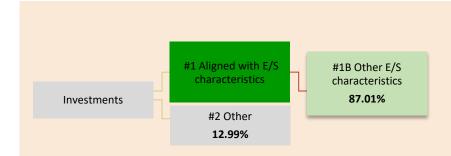

What was the proportion of sustainability-related investments?

The MFS Blended Research European Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Blended Research European Equity Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 99.63% of the total assets of the portfolio of the MFS Blended Research European Equity Fund; the remaining investments of 0.37% of the portfolio included cash and /or cash equivalent instruments; 87.33% of the equity securities in the portfolio of the MFS Blended Research European Equity Fund met at least one of the climate criteria, which represented 87.01% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 12.99% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Blended Research European Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

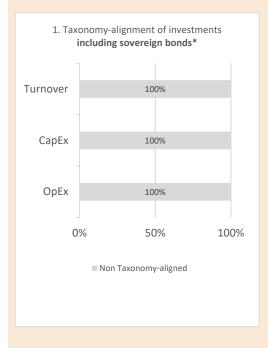

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

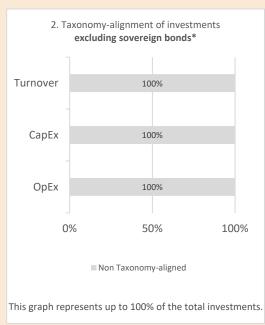

performance.

×

No. The MFS Blended Research European Equity Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Blended Research European Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Blended Research European Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the

climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Blended Research European Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Blended Research European Equity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Continental European Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Continental European Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 92.67% of the equity securities in the portfolio of the MFS Continental European Equity Fund met at least one of the climate criteria, which represented 90.17% of the total assets. Equity securities represented 97.29% of the assets of the MFS Continental European Equity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 80.26 | 78.10 |
| 30 November 2021 | 75.14 | 73.56 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 77.42 | 75.33 | |
| 30 November 2021 | 72.70 | 71.19 | |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 0 | 0 | |
| 30 November 2021 | 0 | 0 | |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 92.67 | 90.17 |
| 30 November 2021 | 90.79 | 88.88 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Continental European Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Continental European Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Continental European Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Continental European Equity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Continental European Equity Fund

During the reporting period, MFS investment professionals conducted at least 6 engagements with issuers in the portfolio on climate related risks and opportunities including: Danone SA, Flutter Entertainment PLC, Prysmian SpA. Topics engaged on include identification of identification of climate risk, physical risk, transition risk, and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: UBS Group AG.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

| • • Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Contrarian Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Contrarian Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 94.01% of the equity securities in the portfolio of the MFS Contrarian Value Fund met at least one of the climate criteria, which represented 88.70% of the total assets. Equity securities represented 94.36% of the assets of the MFS Contrarian Value Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 60.45 | 57.04 | |
| 30 November 2021 | 63.88 | 60.44 | |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 72.79 | 68.68 |
| 30 November 2021 | 56.70 | 53.62 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 94.01 | 88.70 |
| 30 November 2021 | 81.29 | 76.91 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Contrarian Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Contrarian Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

What were the top investments of this financial product?

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022 and 30 September 2022, 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS Contrarian Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Contrarian Value Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 94.36% of the total assets of the portfolio of the MFS Contrarian Value Fund; the remaining investments of 5.64% the portfolio included cash and / or cash equivalent instruments; 94.01% of the equity securities in the portfolio of the MFS Contrarian Value Fund met at least one of the climate criteria, which represented 88.70% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 11.30% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Industrials | 26.86 |
| Financials | 19.00 |
| Consumer Discretionary | 13.62 |
| Materials | 8.40 |
| Information Technology | 6.37 |
| Communication Services | 6.84 |
| Cash & Cash Equivalents | 5.96 |
| Consumer Staples | 4.87 |
| Utilities | 3.32 |
| Health Care | 1.86 |
| Energy | 1.52 |
| Real Estate | 1.38 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022 and 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a shareof:

- turnover
 reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Contrarian Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

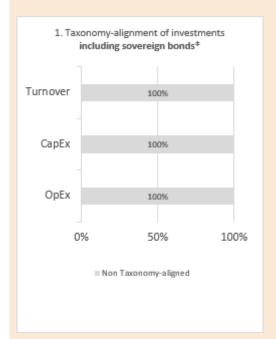

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

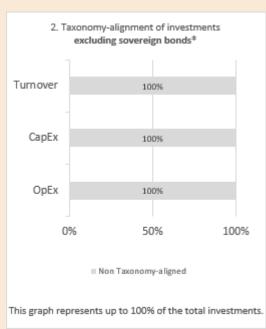

| Yes: | | |
|------|----------------|------------------|
| | In fossil fuel | In nuclear energ |

No. The MFS Contrarian Value Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Contrarian Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Contrarian Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

the EU Taxonomy.

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Contrarian Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Contrarian Value Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group — MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Contrarian Value Fund

During the reporting period, MFS investment professionals conducted at least 10 engagements with issuers in the portfolio on climate related risks and opportunities including: Anglo American Plc, ArcelorMittal, Citigroup, Danone SA, Ryanair Holdings PLC, Weir Group Plc. Topics engaged on include identification of climate risk, transition risk, physical risk, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted FOR management proposals on: climate transition plans of the following issuers during the reporting period: UBS Group AG, London Stock Exchange Group plc, NatWest Group plc and National Grid plc; climate related shareholder proposals of the following issuer during the reporting period: Alphabet Inc. MFS investment professionals assessed and voted AGAINST

climate related shareholder proposals of the following issuer during the reporting period: Booking Holdings Inc.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 30 November 2022, the MFS Diversified Income Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Diversified Income Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023: 66.56% of the equity securities in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 20.57% of the total assets; 61.13% of the corporate debt instruments in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 24.25% of total assets. Equity securities represented 30.91% and corporate debt instruments represented 39.67% of the assets of the MFS Diversified Income Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 30 November 2022 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 49.86 | 15.41 |
| 31 October 2022 | 60.65 | 18.71 |

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 54.02 | 21.43 |
| 31 October 2022 | 54.28 | 22.30 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 55.09 | 17.03 |
| 31 October 2022 | 54.57 | 16.83 |

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 16.31 | 6.47 |
| 30 November 2022 | 17.19 | 7.19 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2022 | 0 | 0 |

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2022 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 2.14 | 0.85 |
| 30 November 2022 | 2.33 | 0.96 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|--|---|
| 31 January 2023 | 66.56 | 20.57 |
| 30 November 2022 | 71.60 | 22.08 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 61.13 | 24.25 |
| 30 November 2022 | 62.39 | 25.63 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Diversified Income Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Diversified Income Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

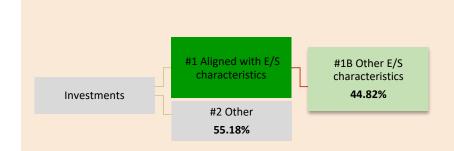

What was the proportion of sustainability-related investments?

The MFS Diversified Income Fund aims to have at least 50% of the equity securities and 50% of the corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Diversified Income Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 30.91% and corporate debt instruments represented 39.67% of the total assets of the portfolio of the MFS Diversified Income Fund; the remaining investments 29.42% of the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 66.56% of the equity securities in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 20.57% of the total assets of the portfolio; 61.13% of the corporate debt instruments in the portfolio of the MFS Diversified Income Fund met at least one of the climate criteria, which represented 24.25% of the total assets of the portfolio; 44.82% of the total assets of the portfolio attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 55.18% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

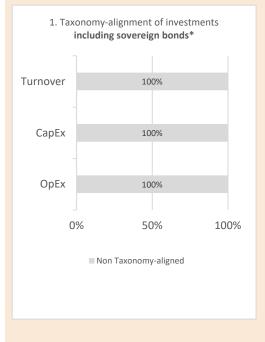

Zero. The MFS Diversified Income Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

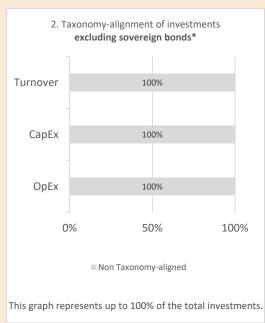

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS Diversified Income Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Diversified Income Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Diversified Income Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

sustainable investments with an environmental objective that do not take into account the criteria for

environmentally sustainable economic activities under the EU

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Diversified Income Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives") Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") – In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities and corporate debt instruments of the MFS Diversified Income Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Diversified Income Fund

During the reporting period, MFS investment professionals conducted at least 5 engagements with issuers in the portfolio on climate related risks and opportunities including: Cable One Inc, Cimpress, Danaher Corp, Duke Energy, and Xcel energy. Topics engaged on include identification of climate risk, climate scenario analysis, climate transition risk, and Net Zero/ SBTi initiatives. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Microsoft Inc. and National Australia Bank Limited.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental
or social objective
and that the
investee companies
follow good

governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Euro Credit Fund ("MFS Euro Credit Fund ") Legal entity identifier: 549300DZGNNNNMSY602

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Euro Credit Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Euro Credit Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 79.06% of the corporate debt instruments in the portfolio of the MFS Euro Credit Fund met at least one of the climate criteria, which represented 57.34% of the total assets. Corporate debt instruments represented 72.53% of the assets of the MFS Euro Credit Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 57.53 | 41.73 |
| 30 November 2021 | 56.13 | 48.72 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 49.91 | 36.20 |
| 30 November 2021 | 44.04 | 38.23 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 8.18 | 5.93 |
| 30 November 2021 | 6.92 | 6.0 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|---|---|
| 31 January 2023 | 79.06 | 57.34 |
| 30 November 2022 | 76.48 | 66.39 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Euro Credit Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Euro Credit Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting

and industry collaborations (as appropriate).

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

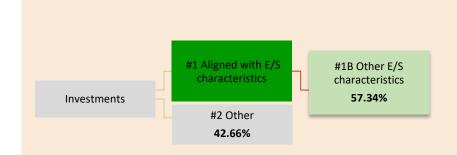

The MFS Euro Credit Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Euro Credit Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, corporate debt instruments represented 72.53% of the total assets of the portfolio of the MFS Euro Credit Fund; the remaining investments of 28.47% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments. As of 31 January 2023, 79.06% of the corporate debt instruments in the portfolio of the MFS Euro Credit Fund met at least one of the climate criteria, which represented 57.34% of the total assets of the portfolio

that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 42.66% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|------------------------------------|------------------|

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Euro Credit Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Euro Credit Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Euro Credit Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Euro Credit Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS Euro Credit Fund

During the reporting period, MFS investment professionals conducted at least 17 engagements with issuers in the portfolio on climate related risks and opportunities including: Anglo American PLC, Boston Scientific Corp, CEZ AS, Danaher Corp, Duke Energy Corp, Enel SpA, Engie SA, Glencore PLC, Macquarie

Group PLC, Toronto Dominion Bank, and Xcel Energy. Topics engaged on include identification of climate risk, climate transition risk, climate change physical risk, climate scenario analysis, and Net Zero/SBTi.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

| practices. |

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

| Does this financial product have a sustainable investment? | | | | |
|--|---|--|--|--|
| Yes | • No | | | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Core Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Core Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date")"

As of 31 January 2023, 85.52% of the equity securities in the portfolio of the MFS European Core Equity Fund met at least one of the climate criteria, which represented 84.52% of the total assets. Equity securities represented 98.82% of the assets of the MFS European Core Equity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - —ensuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 65.35 | 64.58 | |
| 30 November 2021 | 66.92 | 66.17 | |

Climate Criterion 2 - —easuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the | % of total assets in the portfolio |
|---------------------|----------------------------------|------------------------------------|
| | portfolio meeting this criterion | meeting this criterion |
| 31 January 2023 | 71.72 | 70.88 |
| 30 November 2021 | 68.0 | 67.26 |

Climate Criterion 3 - —easuring 'n't-zero' 'ssuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'n't-zero' 'etermined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 0 | 0 | |
| 30 November 2021 | 0 | 0 | |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 85.52 | 84.52 |
| 30 November 2021 | 87.20 | 86.22 |

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Core Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "d" no significant harm" "rinciple does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Core Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "A"ditional Emissions Indicators")" At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |
|-------------------------------------|------------------------|---------|----------------|
| Roche Holding AG | Health Care | 4.20 | Switzerland |
| LVMH Moet Hennessy Louis Vuitton SE | Consumer Discretionary | 3.61 | France |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's'value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S"P Global Market Intelligence")" GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

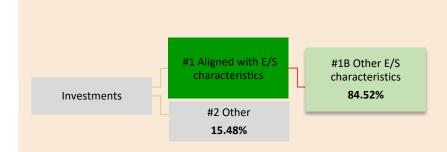

What was the proportion of sustainability-related investments?

The MFS European Core Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Core Equity Fund (i.e. #1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 98.82% of the total assets of the portfolio of the MFS European Core Equity Fund; the remaining investments of the portfolio included cash and / or cash equivalent instruments; 85.52% of the equity securities in the portfolio of the MFS European Core Equity Fund met at least one of the climate criteria, which represented 84.52% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 15.48% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Consumer Staples | 18.71 |
| Industrials | 16.03 |
| Consumer Discretionary | 15.51 |
| Financials | 14.34 |
| Health care | 14.31 |
| Materials | 10.34 |
| Real Estate | 4.03 |
| Communication Services | 3.72 |
| Information Technology | 2.40 |
| Cash & Cash Equivalents | 0.60 |
| Equity Warrants | 0.05 |
| Other | -0.03 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022 and 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS European Core Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

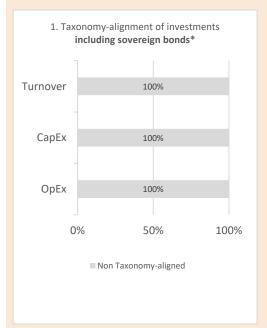

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

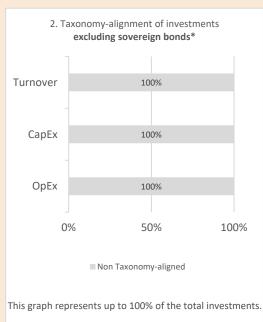

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS European Core Equity Fund does not commit to make investments aligned with the EU Taxonomy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS European Core Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS European Core Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

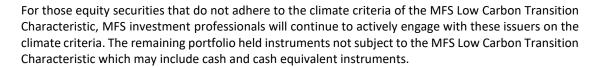

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

are
sustainable
investments with
an environmental
objective that do
not take into
account the
criteria for
environmentally
sustainable
economic activities
under the EU
Taxonomy.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Core Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS European Core Equity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS European Core Equity Fund

During the reporting period, MFS investment professionals conducted at least 11 engagements with issuers in the portfolio on climate related risks and opportunities including: Check Point Software Technologies Ltd, Danone SA, Flutter Entertainment PLC, LEG immobililien SE, Rolls-Royce Holdings PLC, Ryanair Holdings PLC ADR, Whitbread PLC. Topics engaged on include identification of climate risk, climate transition risk, climate change physical risk, climate scenario analysis and Net Zero/ SBTi

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. initiatives. MFS investment professionals assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Aena SME SA, UBS Group AG and London Stock Exchange Group Plc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – European Research Fund ("MFS European Research Fund") Legal entity identifier: S9K235E4P9KO3JXU6G54

Environmental and/or social characteristics

| Does this financial product have a sustainable investment? | | | | |
|--|---|--|--|--|
| • • Yes | • No | | | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Research Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Research Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 87.20% of the equity securities in the portfolio of the MFS European Research Fund met at least one of the climate criteria, which represented 85.84% of the total assets. Equity securities represented 98.43% of the assets of the MFS European Research Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 65.87 | 64.84 | |
| 30 November 2021 | 60.91 | 60.43 | |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 66.02 | 64.98 |
| 30 November 2021 | 68.20 | 67.71 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 87.20 | 85.84 |
| 30 November 2021 | 86.71 | 86.03 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Research Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Research Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

| Largest investments | Sector | Asset % | Country |
|-------------------------------------|------------------------|---------|----------------|
| Nestle SA | Consumer Staples | 5.03 | Switzerland |

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

tallesation

Asset allocation describes the share of investments in specific assets.

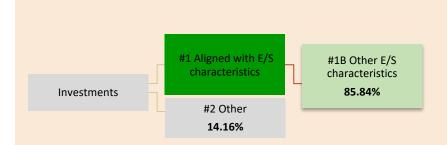

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022 and 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS European Research Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Research Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 98.43% of the total assets of the portfolio of the MFS European Research Fund; the remaining investments of 1.57% in the portfolio included cash and / or cash equivalent instruments; 87.20% of the equity securities in the portfolio of the MFS European Research Fund met at least one of the climate criteria, which represented 85.84% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 14.16% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Financials | 18.29 |
| Consumer Staples | 14.05 |
| Consumer Discretionary | 12.21 |
| Industrials | 12.20 |
| Health Care | 11.55 |
| Materials | 7.74 |
| Energy | 5.97 |
| Information Technology | 5.29 |
| Utilities | 5.12 |
| Communication Services | 4.93 |
| Cash & Cash Equivalents | 1.50 |
| Real Estate | 1.14 |
| Equity Warrants | 0.05 |
| Other | -0.04 |

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. fora transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS European Research Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

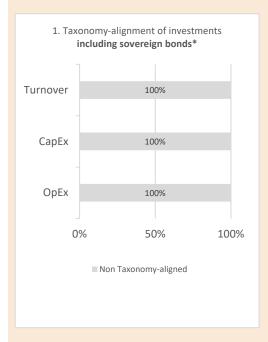

Does the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

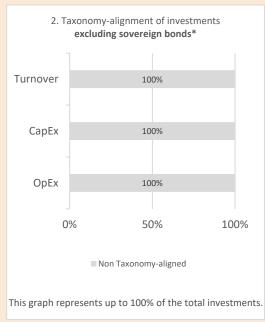

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

×

No. The MFS European Research Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS European Research Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS European Research Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Research Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS European Research Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS European Research Fund

During the reporting period, MFS investment professionals conducted at least 19 engagements with issuers in the portfolio on climate related risks and opportunities including: Danaone SA, Eni SpA, Flutter Entertainment PLC, Glencore PLC, Iberdola SA, Rolls-Royce Holdings PLC, Ryanair Holdings PLC ADR, Tesco PLC, Weir Group PLC, and Whitbread PLC. Topics engaged on include identification of climate risk, climate transition risk, climate change physical risk, climate scenario analysis and Net Zero/ SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: UBS Group AG, London Stock Exchange Group Plc, Glencore plc, NatWest Group plc and National Grid plc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

 $\frac{https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html}{}$

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – European Smaller Companies Fund ("MFS European Smaller Companies

Fund")

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Smaller Companies Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Smaller Companies Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 75.56% of the equity securities in the portfolio of the MFS European Smaller Companies Fund met at least one of the climate criteria, which represented 69.91% of the total assets. Equity securities represented 92.52% of the assets of the MFS European Smaller Companies Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

indicators measure how the environmental or social characteristics promoted by the

financial product

are attained.

Sustainability

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 49.08 | 45.41 |
| 30 November 2021 | 52.85 | 50.03 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 57.31 | 53.03 |
| 30 November 2021 | 46.70 | 44.20 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 75.56 | 69.91 |
| 30 November 2021 | 69.43 | 65.72 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Smaller Companies Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Smaller Companies Fund

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes

investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

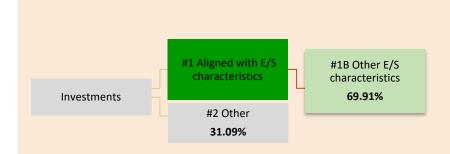

What was the proportion of sustainability-related investments?

The MFS European Smaller Companies Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Smaller Companies Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 92.52% of the total assets of the portfolio of the MFS European Smaller Companies Fund; the remaining investments of 7.48% in the portfolio included cash and / or cash equivalent instruments; 75.56% of the equity securities in the portfolio of the MFS European Smaller Companies Fund met at least one of the climate criteria, which represented 69.91% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 31.09% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Materials | 22.52 |

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Smaller Companies Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS European Smaller Companies Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS European Smaller Companies Fund

During the reporting period, MFS investment professionals conducted at least 4 engagements with issuers in the portfolio on climate related risks and opportunities including: Flutter Entertainment PLC, Forterra PLC, Greggs PLC and LEG Immobillien SE. Topics engaged on include Climate change risk and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – European Value Fund ("MFS European Value Fund") Legal entity identifier: FOW0N0ZBCI2YVLH77334

Environmental and/or social characteristics

| Doe | s this financial product have a susta | ainable investment? |
|-----|--|---|
| •• | Yes | • No |
| | It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| | It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS European Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS European Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 93.32% of the equity securities in the portfolio of the MFS European Value Fund met at least one of the climate criteria, which represented 90.62% of the total assets. Equity securities represented 97.11% of the assets of the European Value Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how to applications and the continuous cont

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 66.20 | 64.28 |
| 30 November 2021 | 67.00 | 66.07 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the | % of total assets in the portfolio |
|---------------------|----------------------------------|------------------------------------|
| | portfolio meeting this criterion | meeting this criterion |
| 31 January 2023 | 81.02 | 78.68 |
| 30 November 2021 | 72.60 | 71.63 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 93.32 | 90.62 |
| 30 November 2021 | 87.30 | 86.09 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS European Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS European Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 30 November 2021 to 31 January 2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |
|-----------------------------|------------------------|---------|----------------|
| Nestle SA | Consumer Staples | 5.19 | Switzerland |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

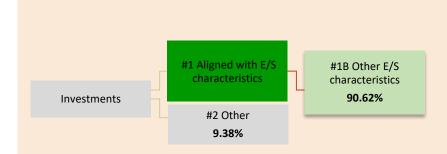

What was the proportion of sustainability-related investments?

The MFS European Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS European Value Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 97.11% of the total assets of the portfolio of the MFS European Value Fund; the remaining investments of 2.89% in the portfolio included cash and / or cash equivalent instruments; 93.32% of the equity securities in the portfolio of the MFS European Value Fund met at least one of the climate criteria, which represented 90.62% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 9.38% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight | | |

expressed as a shareof:
- turnover reflecting the share of revenue from green activities of

investee companies

Taxonomy-aligned

activities are

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS European Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

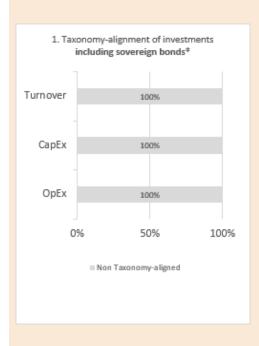

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

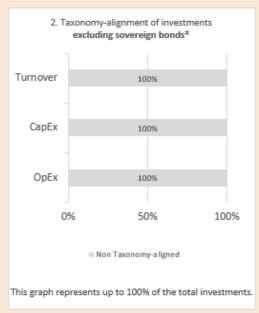

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS European Value Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS European Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS European Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS European Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS European Value Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS European Value Fund

During the reporting period, MFS investment professionals conducted at least 11 engagements with issuers in the portfolio on climate related risks and opportunities including: Anglo American PLC, Flutter Entertainment PLC, Heineken NV, Iberdola, LEG Immobilien, RWE AG, Ryanair Holdings PLC ADR, and Weir Group PLC. Topics engaged on include identification of climate risk, climate transition risk, climate change physical risk, climate scenario analysis and Net Zero/ SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuer during the reporting period: UBS Group AG.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

| Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Concentrated Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Concentrated Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 82.50% of the equity securities in the portfolio of the MFS Global Concentrated Fund met at least one of the climate criteria, which represented 81.19% of the total assets. Equity securities represented 98.40% of the assets of the MFS Global Concentrated Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 69.12 | 68.02 |
| 30 November 2021 | 73.91 | 70.03 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 64.39 | 63.37 |
| 30 November 2021 | 67.20 | 66.38 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 82.50 | 81.19 |
| 30 November 2021 | 96.46 | 95.31 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Concentrated Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Concentrated Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

What was the proportion of sustainability-related investments?

The MFS Global Concentrated Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the Global Concentrated Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 98.40% of the total assets of the portfolio of the MFS Global Concentrated Fund; the remaining investments of the 1.60% portfolio included cash and / or cash equivalent instruments; 82.50% of the equity securities in the portfolio of the MFS Global Concentrated Fund met at least one of the climate criteria, which represented 81.19% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 18.81% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Health Care | 22.19 |
| Industrials | 21.01 |
| Information Technology | 14.24 |
| Consumer Staples | 14.14 |
| Communication Services | 8.86 |
| Consumer Discretionary | 8.74 |
| Materials | 5.82 |
| Financials | 4.14 |
| Cash & Cash Equivalents | 0.80 |
| Equity Warrants | 0.15 |
| Other | -0.08 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

activities are expressed as a shareof: - turnover

Taxonomy-aligned

- turnover
 reflecting the share of revenue from green activities of investee companies

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Concentrated Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

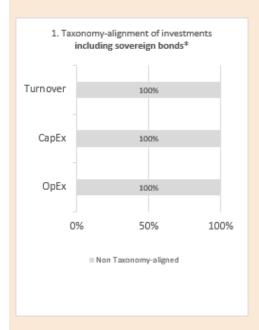

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

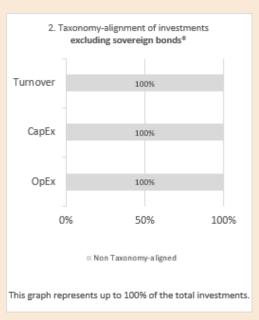

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS Global Concentrated Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Concentrated Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Concentrated Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Concentrated Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Concentrated Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Global Concentrated Fund

During the reporting period, MFS investment professionals conducted at least 5 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture PLC, Boston Scientific Corp, and Danone SA. Topics engaged on include identification of climate risk, climate transition risk, climate change physical risk and Net Zero/ SBTi initiatives. MFS investment professionals assessed and voted FOR management proposals on climate transition plans of the following issuer during the reporting period: Canadian National Railway Company. MFS investment professionals assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Honeywell International, Charter Communications, Inc and United Parcel Service, Inc. MFS investment professionals assessed and voted AGAINST climate related shareholder proposal of the following issuer during the reporting period: Comcast Corp.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

| | It will make a minimum of sustainable investments with a social objective:% | * It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Credit Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Credit Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 71.82% of the corprate debt instruments in the portfolio of the MFS Global Credit Fund met at least one of the climate criteria, which represented 57.83% of the total assets. Corporate debt instruments represented 80.52% of the assets of the MFS Global Credit Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 58.44 | 47.06 |
| 30 November 2021 | 58.93 | 48.71 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 33.49 | 26.97 |
| 30 November 2021 | 34.71 | 28.69 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Climate Criterion 4 – Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 5.45 | 4.39 |
| 30 November 2021 | 4.62 | 3.82 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|---|---|
| 31 January 2023 | 71.82 | 57.83 |
| 30 November 2022 | 75.40 | 62.32 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Credit Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Credit Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Credit Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

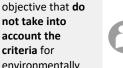

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Credit Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the

climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Credit Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Credit Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS Global Credit Fund

During the reporting period, MFS investment professionals conducted at least 17 engagements with issuers in the portfolio on climate related risks and opportunities including: American Electric Power Co Inc, Anglo American PLC, Boston Scientific Corp, CEZ AS, Constellation Brands Inc, Enbridge Inc, Enel SpA, Engie SA, Glencore PLC, Macquarie Group Ltd, Toronto Dominion Bank, Vulcan Materials Co and Xcel Energy. Topics engaged on include identification climate change risk, transition risk, and Net Zero/ SBTi initiatives.

| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 80.79% of the equity securities in the portfolio of the MFS Global Equity Fund met at least one of the climate criteria, which represented 80.10% of the total assets. Equity securities represented 99.14% of the assets of the MFS Global Equity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 63.97 | 63.42 |
| 30 November 2021 | 69.34 | 68.94 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 65.39 | 64.83 |
| 30 November 2021 | 60.40 | 60.04 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 80.79 | 80.10 |
| 30 November 2021 | 86.59 | 86.09 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 30 November 2021 to 31 January 2023.

| Largest investments | Sector | % Asset | Country |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

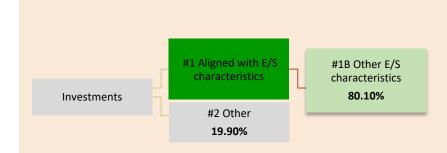

What was the proportion of sustainability-related investments?

The MFS Global Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Equity Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 99.14% of the total assets of the portfolio of the MFS Global Equity Fund; the remaining investments of 0.86% the portfolio included cash and / or cash equivalent instruments; 80.79% of the equity securities in the portfolio of the MFS Global Equity Fund met at least one of the climate criteria, which represented 80.10% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 19.90% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Health Care | 19.83 |
| Industrials | 18.56 |
| Information Technology | 14.64 |
| Consumer Staples | 13.43 |

MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are

expressed as a

shareof:

- capital expenditure (CapEx) showing the green investments made

by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

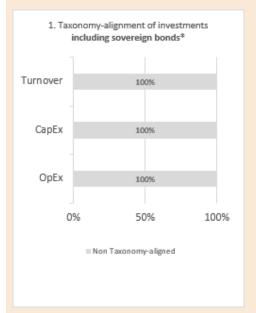

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

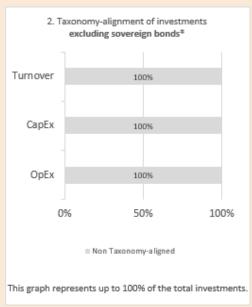

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS Global Equity Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to

the best

performance.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities

under the EU

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Equity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Global Equity Fund

During the reporting period, MFS investment professionals conducted at least 15 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture PLC, Boston Scientific Corp, Check Point Software Technologies Ltd, Colgate-Palmolive, Danone SA, Heineken NV, Hoya Corp, PPG Industries Inc, Rolls-Royce Holdings PLC, Union Pacific Corp, and Whitbread PLC. Topics engaged on include identification of climate change risk, transition risk, climate scenario analysis, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Aena S.M.E. SA, UBS Group, Canadian Pacific Railway, London Stock Exchange Group plc and Canadian National Railway Company. MFS investment professionals assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Honeywell International and United

Parcel Service, Inc. MFS investment professionals assessed and voted AGAINST climate related shareholder proposal of the following issuer during the reporting period: Comcast Corp.

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 30 November 2022, the MFS Global Equity Income Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Equity Income Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 75.20% of the equity securities in the portfolio of the MFS Global Equity Income Fund met at least one of the climate criteria, which represented 74.26% of the total assets. Equity securities represented 98.74% of the assets of the MFS Global Equity Income Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 30 November 2022 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how t

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 59.03 | 58.29 |
| 31 October 2022 | 64.82 | 63.83 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 58.78 | 58.04 |
| 31 October 2022 | 58.20 | 57.31 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| 31 January 2023 | 0 | 0 |
| 31 October 2022 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 75.20 | 74.26 |
| 31 October 2022 | 79.82 | 78.61 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Equity Income Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Equity Income Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 30 November 2022 to 31 January 2023.

MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Asset allocation describes the share of investments in

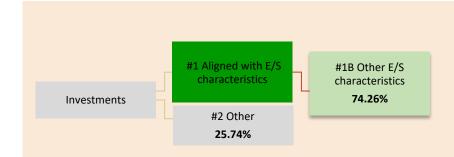

specific assets.

What was the proportion of sustainability-related investments?

The MFS Global Equity Income Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Equity Income Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 98.74% of the total assets of the portfolio of the Global Equity Income Fund; the remaining investments of 1.26% the portfolio included cash and / or cash equivalent instruments; 75.20% of the equity securities in the portfolio of the MFS Global Equity Income Fund met at least one of the climate criteria, which represented 74.26% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 25.74% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Health Care | 20.56 |
| Consumer Staples | 18.87 |
| Financials | 16.74 |
| Information Technology | 10.22 |
| Industrials | 6.61 |
| Materials | 6.59 |
| Communication Services | 5.38 |
| Consumer Discretionary | 3.40 |
| Energy | 2.95 |
| Real Estate | 2.08 |
| Cash & Cash Equivalents | 1.46 |
| Convertible Debt | 0.48 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned

activities are

- reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Equity Income Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

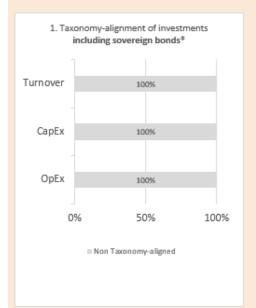

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

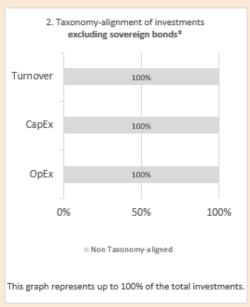

| L | Yes: | | |
|---|------|----------------|-------------------|
| | | In fossil fuel | In nuclear energy |

No. The MFS Global Equity Income Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Equity Income Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Equity Income Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to

the best

performance.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Equity Income Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Equity Income Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Proxy Voting - MFS Global Equity Income Fund

During the reporting period, MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Microsoft and National Australia Bank Limited.

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Intrinsic Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Intrinsic Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 71.95% of the equity securities in the portfolio of the MFS Global Intrinsic Value Fund met at least one of the climate criteria, which represented 70.41% of the total assets. Equity securities represented 97.86% of the assets of the MFS Global Intrinsic Value Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 56.77 | 55.56 |
| 30 November 2021 | 58.16 | 57.63 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 52.65 | 51.52 |
| 30 November 2021 | 44.4 | 44.0 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 0 | 0 | |
| 30 November 2021 | 0 | 0 | |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 71.95 | 70.41 |
| 30 November 2021 | 69.90 | 69.26 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Intrinsic Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Intrinsic Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January

2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

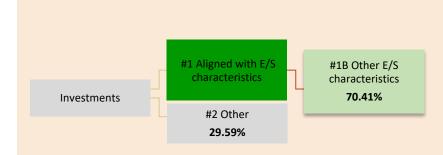

What was the proportion of sustainability-related investments?

The MFS Global Intrinsic Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Intrinsic Value Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 97.86% of the total assets of the portfolio of the MFS Global Intrinsic Value Fund; the remaining investments of 2.16% in the portfolio included cash and / or cash equivalent instruments; 71.95% of the equity securities in the portfolio of the MFS Global Intrinsic Value Fund met at least one of the climate criteria, which represented 70.41% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 29.59% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |

activities are

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Intrinsic Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

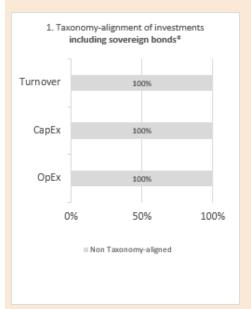

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

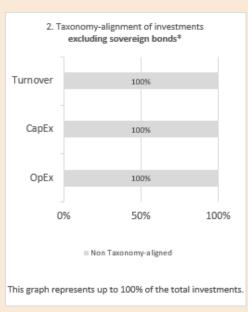

investee companies capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational expenditure (OpEx) reflecting green operational activities of investee.

No. The MFS Global Intrinsic Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Intrinsic Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Intrinsic Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

1

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

criteria for environmentally sustainable economic activities under the EU

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Intrinsic Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Intrinsic Value Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Global Intrinsic Value Fund

During the reporting period, MFS investment professionals conducted at least 13 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture PLC, Agilent Technologies Inc, Colgate-Palmolive Co, Danaher Corp, Epiroc AB, Glencore PLC, LEG Immobilien SE, Ryanair Holdings, and Vulcan Materials Co. Topics engaged on include identification of climate risk, transition risk and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuer during the reporting period: Alphabet Inc,. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposal of the following issuer during the reporting period: Amazon.com Inc. and Microsoft.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Opportunistic Bond Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Opportunistic Bond Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 66.44% of the corprate debt instruments in the portfolio of the MFS Global Opportunistic Bond Fund met at least one of the climate criteria, which represented 23.08% of the total assets. Corporate debt instruments represented 34.74% of the assets of the MFS Global Opportunistic Bond Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 49.55 | 17.22 |
| 30 November 2021 | 52.05 | 20.89 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 30.11 | 10.46 |
| 30 November 2021 | 23.18 | 9.30 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 8.33 | 2.89 |
| 30 November 2021 | 5.89 | 2.36 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|---|---|
| 31 January 2023 | 66.44 | 23.08 |
| 30 November 2022 | 65.04 | 26.10 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Opportunistic Bond Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

TU.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Opportunistic Bond Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

What was the proportion of sustainability-related investments?

The MFS Global Opportunistic Bond Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Opportunistic Bond Fund (i.e. # 1) from the Transition Date.

describes the share of investments in

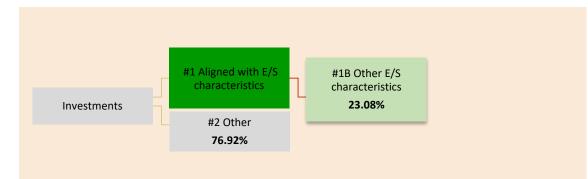

Asset allocation

specific assets.

What was the asset allocation?

As of 31 January 2023, corporate debt instruments represented 34.74% of the total assets of the portfolio of the MFS Global Opportunistic Bond Fund; the remaining investments of 65.26% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 66.44% of the corporate debt instruments in the portfolio of the MFS Global Opportunistic Bond Fund met at least one of the climate criteria, which represented 23.08% of the total assets of the

portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 76.92% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Taxonomy-aligned activities are expressed as a shareof:

- turnover
 reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

account the
criteria for
environmentally
sustainable
economic activities
under the EU
Taxonomy.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

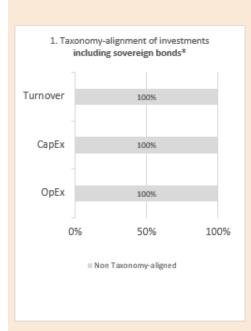

Zero. The MFS Global Opportunistic Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

 Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | |
|------|----------------|-------------------|
| d | In fossil fuel | In nuclear energy |

No. The MFS Global Opportunistic Bond Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Opportunistic Bond Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Opportunistic Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Opportunistic Bond Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in corporate debt instruments of the MFS Global Opportunistic Bond Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned,

across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS Global Opportunistic Bond Fund

During the reporting period, MFS investment professionals conducted at least 29 engagements with issuers in the portfolio on climate related risks and opportunities including: Albion Financing, American Electric Power, Anglo American, Boston Scientific Corp, CEZ AS, Constellation Brands Inc, Danaher Corp, Duke Energy, Enbridge, Enel SpA, Engie SA, Eni SpA, Glencore, Macquarie, Millicom International Cellular, Petroleos Mexicanos, Q-Park Holding, Sasol, Toronto-Dominion, Vulcan Materials, Warner Music Corp and Xcel Energy. Topics engaged on include identification of climate change risk, transition risk, climate scenario analysis, and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

| •• | Yes | • No |
| susta | in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| susta | I make a minimum of ainable investments with a lobjective:% | It promotes E/S characteristics, but will not make any sustainable investments |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Global Research Focused Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Research Focused Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 83.30% of the equity securities in the portfolio of the MFS Global Research Focused Fund met at least one of the climate criteria, which represented 82.85% of the total assets. Equity securities represented 99.46% of the assets of the MFS Global Research Focused Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 69.98 | 69.60 |
| 30 November 2021 | 52.16 | 51.67 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the | % of total assets in the portfolio |
|---------------------|----------------------------------|------------------------------------|
| | portfolio meeting this criterion | meeting this criterion |
| 31 January 2023 | 57.58 | 57.27 |
| 30 November 2021 | 45.50 | 45.07 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 83.30 | 82.85 |
| 30 November 2021 | 73.45 | 72.76 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Research Focused Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Research Focused Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 30 November 2021 to 31 January 2023.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

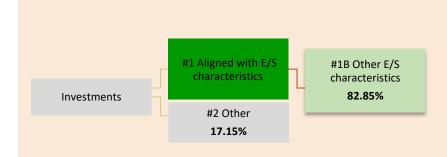

What was the proportion of sustainability-related investments?

The MFS Global Research Focused Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Research Focused Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 99.46% of the total assets of the portfolio of the MFS Global Research Focused Fund; the remaining investments of 0.54% in the portfolio comprised of cash and cash equivalent instruments; 83.30% of the equity securities in the portfolio of the MFS Global Research Focused Fund met at least one of the climate criteria, which represented 82.85% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 17.15% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

reflecting the share

Taxonomy-aligned

activities are

shareof:

- turnover

expressed as a

expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

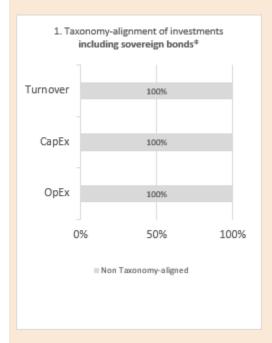

Zero. The MFS Global Research Focused Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

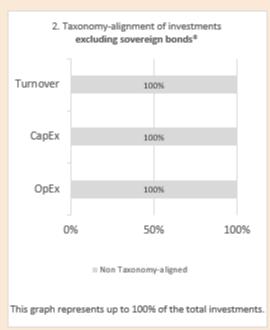

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | | |
|------|----------|--------|-------------------|
| | In fossi | l fuel | In nuclear energy |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Research Focused Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Research Focused Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

under the EU Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Research Focused Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Research Focused Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Global Research Focused Fund

During the reporting period, MFS investment professionals conducted at least 8 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture, Chubb LTD, ConocoPhilips, Danaher Corp, Iberdrola and LEG Immobilien SE. Topics engaged on include identification of climate change risk, transition risk, climate scenario analysis, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Canadian Pacific Railway and Woodside Petroleum Ltd. MFS investment professionals assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Honeywell International and Alphabet Inc. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Woodside Petroleum Ltd, Amazon.com Inc. and Microsoft.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Global Strategic Equity Fund ("Global Strategic Equity Fund") Legal entity identifier: 549300CC00Z25I4TJK84

Environmental and/or social characteristics

| Ooes this financial product have a sustainable investment? | | |
|--|---|--|
| • • Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 May 2022, the MFS Global Strategic Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Strategic Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 89.05% of the equity securities in the portfolio of the MFS Global Strategic Equity Fund met at least one of the climate criteria, which represented 88.18% of the total assets. Equity securities represented 99.02% of the assets of the MFS Global Strategic Equity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 May 2022 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 66.53 | 65.88 |
| 30 April 2022 | 74.94 | 74.39 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 73.79 | 73.07 |
| 30 April 2022 | 59.07 | 58.63 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 April 2022 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 89.05 | 88.18 |
| 30 April 2022 | 83.77 | 83.14 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Strategic Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Strategic Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 May 2022 to 31 January 2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 30 June 2022, 30 September 2022 and 31 December 2022. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

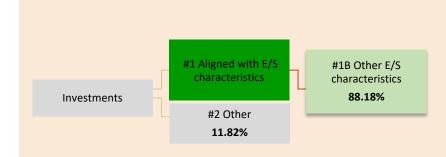

What was the proportion of sustainability-related investments?

The MFS Global Strategic Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Strategic Equity Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 99.02% of the total assets of the portfolio of the MFS Global Strategic Equity Fund; the remaining investments of 0.88% the portfolio comprised of cash and / or cash equivalent instruments; 89.05% of the equity securities in the portfolio of the MFS Global Strategic Equity Fund met at least one of the climate criteria, which represented 88.18% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 11.82% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Strategic Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

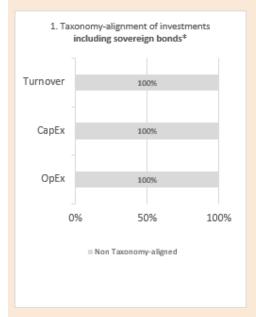

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

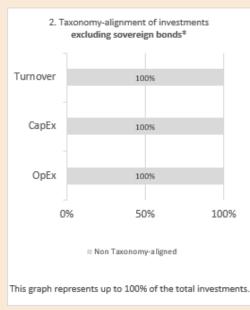

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS Global Strategic Equity Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Strategic Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Strategic Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

corresponding to the best

performance.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Strategic Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Strategic Equity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Global Strategic Equity Fund

During the reporting period, MFS investment professionals conducted at least 2 engagements with issuers in the portfolio on climate related risks and opportunities including: Boston Scientific Corp and Danaher Corp. Topics engaged on include identification of climate change risk. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Microsoft and National Australia Bank Limited.

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS Global Total Return Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Global Total Return Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023: 83.01% of the equity securities in the portfolio of the MFS Global Total Return Fund met at least one of the climate criteria, which represented 49.31% of the total assets; 73.98% of the corporate debt instruments in the portfolio of the MFS Global Total Return Fund met at least one of the climate criteria, which represented 8.73% of total assets. Equity securities represented 59.31% and corporate debt instruments represented 11.80% of the assets of the MFS Global Total Return Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 22 July 2022 to 31 January 2023.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 66.12 | 39.22 |
| 30 June 2022 | 69.44 | 41.02 |

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 59.75 | 7.05 |
| 30 June 2022 | 62.51 | 3.55 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 58.24 | 34.54 |
| 30 June 2022 | 8.30 | 4.90 |

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 32.12 | 3.79 |
| 30 June 2022 | 30.14 | 7.37 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the | % of total assets in the portfolio |
|---------------------|----------------------------------|------------------------------------|
| | portfolio meeting this criterion | meeting this criterion |
| 31 January 2023 | 0 | 0 |
| 30 June 2022 | 0 | 0 |

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 June 2022 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 5.68 | 0.67 |
| 30 June 2022 | 5.25 | 0.62 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|--|---|
| 31 January 2023 | 83.01 | 49.24 |
| 30 June 2022 | 73.33 | 43.23 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 73.98 | 8.73 |
| 30 June 2022 | 72.72 | 8.57 |

and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Global Total Return Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Global Total Return Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

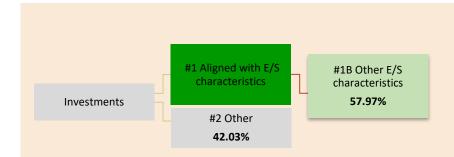

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS Global Total Return Fund aims to have at least 50% of the equity securities and 50% of the corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Global Total Return Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 59.31% and corporate debt instruments represented 11.80% of the total assets of the portfolio of the MFS Global Total Return Fund; the remaining investments of 28.89% the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 83.01% of the equity securities in the portfolio of the MFS Global Total Return Fund met at least one of the climate criteria, which represented 49.24% of the total assets of the portfolio; 73.98% of the corporate debt instruments in the portfolio of the MFS Global Total Return Fund met at least one of the climate criteria, which represented 8.73% of the total assets of the portfolio; 57.97% of the total assets of the portfolio attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 42.03% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a shareof:

- turnover reflecting the share of revenue from green activities of

investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a

green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Global Total Return Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

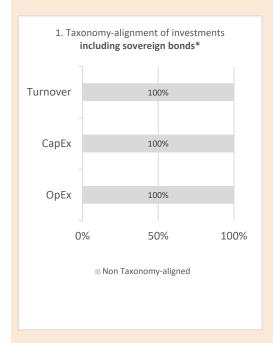

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

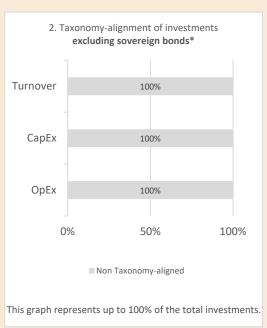

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS Global Total Return Fund does not commit to make investments aligned with the EU Taxonomy.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Global Total Return Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Global Total Return Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Global Total Return Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Global Total Return Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Global Total Return Fund

During the reporting period, MFS investment professionals conducted at least 20 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture, American Electric Power Co Inc, Boston Scientific Corp, Cboe Global Markets, CEZ, Chubb Ltd, Colgate Palmolive, ConocoPhillips, Constellation Brands, Danaher, Danone SA, Duke Energy Corp, Enel SpA, Glencore, Kimberly-Clark, PPG, Sempra Energy, Union Pacific, and Xcel Energy Inc. Topics engaged on include identification of climate change risk, transition risk, physical risk, climate scenario analysis, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Microsoft and National Bank of Australia.

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Limited Maturity Fund ("MFS Limited Maturity Fund ") Legal entity identifier: H22Q4XW7UTNWFDP0PD4

| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS Limited Maturity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Limited Maturity Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 76.20% of the corporate debt instruments in the portfolio of the MFS Limited Maturity Fund met at least one of the climate criteria, which represented 42.36% of the total assets. Corporate debt instruments represented 55.59% of the assets of the MFS Limited Maturity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 21 July 2022 to 31 January 2023.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 66.95 | 37.22 |
| 30 June 2022 | 70.45 | 39.60 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 29.48 | 16.39 |
| 30 June 2022 | 30.68 | 17.24 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 June 2022 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 1.57 | 0.87 |
| 30 June 2022 | 1.58 | 0.89 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|---|---|
| 31 January 2023 | 76.20 | 42.36 |
| 30 June 2022 | 79.01 | 44.41 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Limited Maturity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Limited Maturity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality

and also their engagement practices. In partnership with our global stewardship team and our team of

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 21 July 2022 to 31 January 2023.

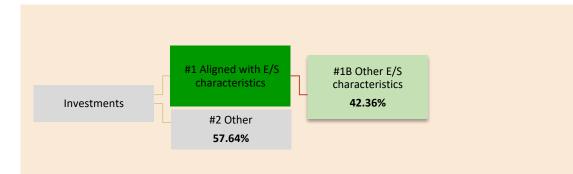

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS Limited Maturity Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Limited Maturity Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, corporate debt instruments represented 55.59% of the total assets of the portfolio of the MFS Limited Maturity Fund; the remaining investments of 44.41% the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 76.20% of the corporate debt instruments in the portfolio of the MFS Limited Maturity Fund met at least one of the climate criteria, which represented 42.36% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 57.64% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|------------------------------------|------------------|
| Corporate-Industrial | 26.93 |
| Corporate-Financial Institutions | 26.48 |
| Treasury-Treasury | 18.22 |

| Derivatives-OTC | -3.30 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 December 2021, 31 March 2022, 30 June 2022 and 30 September 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market

value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

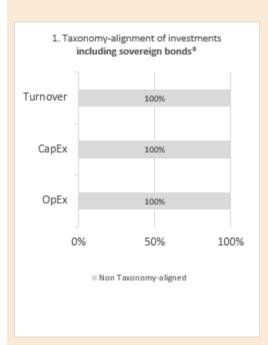

Zero. The MFS Limited Maturity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

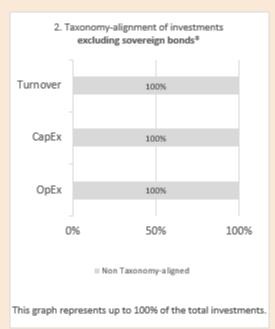

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | | | | |
|------|----------------|--|------|-----------|--------|
| | In fossil fuel | | In r | nuclear e | energy |
| ١ | | | | | |

No. The MFS Limited Maturity Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Limited Maturity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned activities are expressed as a shareof:

turnover
 reflecting the share
 of revenue from
 green activities of
 investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to

the best

performance.

Not applicable.

Taxonomy.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Limited Maturity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Limited Maturity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Limited Maturity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS Limited Maturity Fund

During the reporting period, MFS investment professionals conducted at least 2 engagements with issuers in the portfolio on climate related risks and opportunities including: Enel SpA and Glencore, Macquarie. Topics engaged on include identification of climate change risk, transition risk, and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

 $\underline{https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-\underline{funds.html}$

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – Managed Wealth Fund ("MFS Managed Wealth Fund") Legal entity identifier: 222100EEEJHVDAVX719

Environmental and/or social characteristics

| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS Managed Wealth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Managed Wealth Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 86.78% of the equity securities in the portfolio of the MFS Managed Wealth Fund met at least one of the climate criteria, which represented 80.57% of the total assets. Equity securities represented 92.84% of the assets of the MFS Managed Wealth Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 21 July 2022 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 68.82 | 63.89 | |
| 30 June 2022 | 69.05 | 57.29 | |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 62.96 | 58.45 |
| 30 June 2022 | 8.92 | 7.40 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 June 2022 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 86.78 | 80.57 |
| 30 June 2022 | 81.26 | 59.12 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Managed Wealth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Managed Wealth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

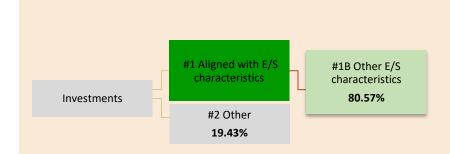

What was the proportion of sustainability-related investments?

The MFS Managed Wealth Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Managed Wealth Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, equity securities represented 92.84% of the total assets of the portfolio of the MFS Managed Wealth Fund; the remaining investments of 7.16% in the portfolio included derivatives, cash and / or cash equivalent instruments. As of 31 January 2023, 86.78% of the equity securities in the portfolio of the MFS Managed Wealth Fund met at least one of the climate criteria, which represented 80.57% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 19.43% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Other | 73.12 |
| Information Technology | 16.50 |
| Health Care | 15.17 |
| Financials | 14.55 |
| Industrials | 12.67 |
| Cash & Cash Equivalents | 12.58 |
| Consumer Discretionary | 7.61 |
| Consumer Staples | 6.64 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a shareof:

- turnover reflecting the share of revenue from green activities of investee companies
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Managed Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

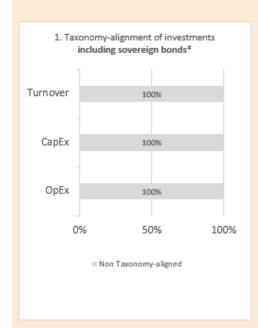

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

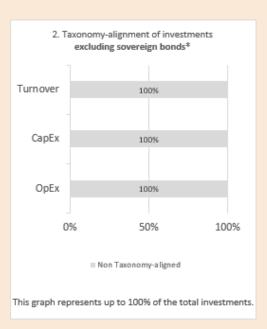

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

×

No. The MFS Managed Wealth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Managed Wealth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Managed Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Managed Wealth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

<u>Platform Initiatives</u>

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS Managed Wealth Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned,

across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Managed Wealth Fund

During the reporting period, MFS investment professionals conducted at least 19 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture PLC, AIA Group Ltd, Bayer AG, Charter Communications Inc, Check Point Software Technologies Ltd, Chubb Ltd, Cie Generale des Etablissements Michelin SCA, Citigroup Inc, Colgate-Palmolive Co, Compass Group PLC, ConocoPhillips, Danaher Corp, Duke Energy Corp, EOG Resources Inc, Kimberly-Clark Corp, Lowe's Cos Inc, PPG Industries Inc, Rolls-Royce Holdings PLC, Take-Two Interactive Software Inc, Union Pacific Corp, and Xcel Energy Inc. Topics engaged on include identification of climate change risk, transition risk, climate scenario analysis, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted AGAINST a climate related shareholder proposals of the following issuers during the reporting period: Microsoft.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Link to access website disclosure:

https://www.mfs.com/content/mfs-enterprise/microsites/meridian/global/en/mfs-meridian-funds.html

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| | It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| | It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS Prudent Capital Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS Prudent Capital Fund will aim to have at least 50% of the equity securities and 50% of the corporate debt instruments (as applicable) in the portfolio invested in equity issuers and corporate debt issuers that meet at least one of the four climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023: 68.64% of the equity securities in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 40.43% of the total assets; 62.92% of the corporate debt instruments in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 6.82% of total assets. Equity securities represented 58.88% and corporate debt instruments represented 10.84% of the assets of the MFS Prudent Capital Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

Sustainability

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers and corporate debt issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 46.45 | 27.35 |
| 30 November 2021 | 66.76 | 32.23 |

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 52.77 | 5.77 |
| 30 November 2021 | 29.9 | 3.02 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 61.28 | 36.08 |
| 30 November 2021 | 52.30 | 25.27 |

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 23.71 | 2.57 |
| 30 November 2021 | 9.60 | 0.97 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities and corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the | % of total assets in the portfolio |
|---------------------|----------------------------------|------------------------------------|
| | portfolio meeting this criterion | meeting this criterion |
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 6.09 | 0.66 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|--|---|
| 31 January 2023 | 68.64 | 40.42 |
| 30 November 2021 | 80.16 | 38.70 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 62.92 | 6.82 |
| 30 November 2021 | 34.6 | 3.50 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Prudent Capital Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Prudent Capital Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

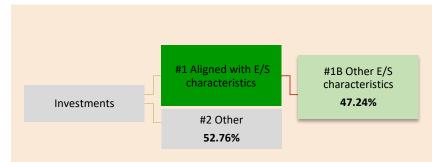

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The MFS Prudent Capital Fund aims to have at least 50% of the equity securities and 50% of the corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Prudent Capital Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 58.88% and corporate debt instruments represented 10.84% of the total assets of the portfolio of the MFS Prudent Capital Fund; the remaining investments of 30.28% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 68.64% of the equity securities in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 40.42% of the total assets of the portfolio; 62.92% of the corporate debt instruments in the portfolio of the MFS Prudent Capital Fund met at least one of the climate criteria, which represented 6.82% of the total assets of the portfolio; 47.24% of the total assets of the portfolio attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 52.76% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|------------------------|------------------|
| U.S. Governments | 27.87 |
| Information Technology | 13.23 |
| Other | 13.17 |
| Communication Services | 10.95 |
| Corporate Debt | 9.21 |
| Real Estate | 7.64 |
| Industrials | 7.61 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a shareof:

- turnover
 reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS Prudent Capital Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | | |
|----------------|---------------------------|--|-----|
| | In fossil fuel | In nuclear energy | |
| ★ No. T | he MFS Prudent Capital Fu | nd does not commit to make investments aligned with the EU Taxonom | ۱y. |

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

sustainable

investments with

an environmental objective that **do not take into**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Prudent Capital Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Prudent Capital Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Prudent Capital Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform

Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities and the corporate debt instruments of the MFS Prudent Capital Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Prudent Capital Fund

During the reporting period, MFS investment professionals conducted at least 8 engagements with issuers in the portfolio on climate related risks and opportunities including: Check Point Software, Danone, Iberdrola, LEG Immobilien SE, Q-Park Holding, and Warner Music Group. Topics engaged on include identification of climate change risk, transition risk, physical risk, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Honeywell International, Charter Communications Inc. and Alphabet Inc. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Amazon.com Inc., Comcast Corp, and Microsoft.

How did this financial product perform compared to the reference benchmark?

Not applicable.

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS Prudent Wealth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS Prudent Wealth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

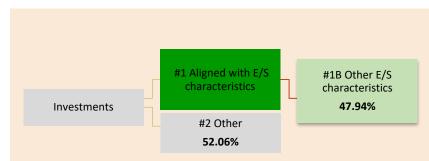

What was the proportion of sustainability-related investments?

The MFS Prudent Wealth Fund aims to have at least 50% of the equity securities and 50% of the corporate debt instruments in the portfolio invested in equity issuers and corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS Prudent Wealth Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 67.51% and corporate debt instruments represented 1.14% of the total assets of the portfolio of the MFS Prudent Wealth Fund; the remaining investments of the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments; 60.92% of the equity securities in the portfolio of the MFS Prudent Wealth Fund met at least one of the climate criteria, which represented 41.12% of the total assets of the portfolio; 62.92% of the corporate debt instruments in the portfolio of the MFS Prudent Wealth Fund met at least one of the climate criteria, which represented 6.82% of the total assets of the portfolio; 47.94% of the total assets of the portfolio attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 52.06% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- #1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- #2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Asset allocation describes the share of

investments in specific assets.

In which economic sectors were the investments made?

| Sectors | % Average weight |

Taxonomy-aligned activities are expressed as a shareof:

- turnover
 reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

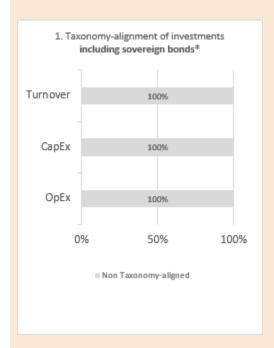

Zero. The MFS Prudent Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

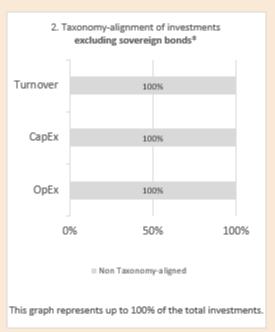

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |
| | | |

No. The MFS Prudent Wealth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS Prudent Wealth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS Prudent Wealth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective?

Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities and corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS Prudent Wealth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities and corporate debt instruments of the MFS Prudent Wealth Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS Prudent Wealth Fund

During the reporting period, MFS investment professionals conducted at least 6 engagements with issuers in the portfolio on climate related risks and opportunities including: Check Point Software, Danone, Iberdrola, and LEG Immobilien SE. Topics engaged on include identification of climate change risk, transition risk, and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Charter Communications Inc. and Alphabet Inc. MFS investment professionals also assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Booking Holdings inc. and Microsoft.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.K. Equity Fund ("MFS U.K. Equity Fund") Legal entity identifier: DAPX7647TOH0KQ40FF91

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.K. Equity Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.K. Equity Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 91.42% of the equity securities in the portfolio of the MFS U.K. Equity Fund met at least one of the climate criteria, which represented 90.84% of the total assets. Equity securities represented 99.36% of the assets of the MFS U.K. Equity Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 73.96 | 73.49 |
| 30 November 2021 | 74.09 | 72.80 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 59.32 | 58.94 |
| 30 November 2021 | 51.80 | 50.89 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 91.42 | 90.84 |
| 30 November 2021 | 88.62 | 87.07 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.K. Equity Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.K. Equity Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

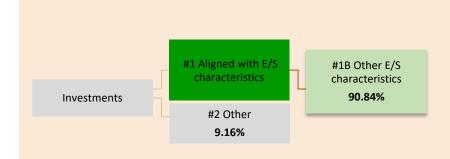

What was the proportion of sustainability-related investments?

The MFS U.K. Equity Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.K. Equity Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 99.36% of the total assets of the portfolio of the MFS U.K. Equity Fund; the remaining investments of the portfolio included cash and / or cash equivalent instruments; 91.42% of the equity securities in the portfolio of the MFS U.K. Equity Fund met at least one of the climate criteria, which represented 90.84% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 9.16% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Financials | 18.13 |
| Consumer Staples | 17.87 |
| Industrials | 13.07 |
| Materials | 11.81 |
| Energy | 9.01 |
| Health Care | 8.86 |
| Consumer Discretionary | 8.28 |
| Communication Services | 5.66 |
| Utilities | 2.62 |
| Real Estate | 1.80 |
| Cash & Cash Equivalents | 1.56 |
| Information Technology | 1.35 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

expressed as a shareof:
- turnover reflecting the share of revenue from

green activities of investee companies

Taxonomy-aligned

activities are

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS U.K. Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

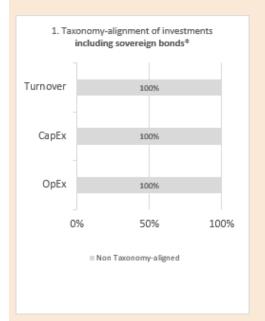

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

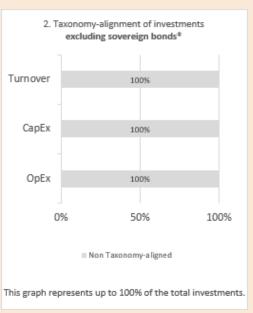

No. The MFS U.K. Equity Fund does not commit to make investments aligned with the EU Taxonomy.

×

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.K. Equity Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS U.K. Equity Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.K. Equity Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS U.K. Equity Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS U.K. Equity Fund

During the reporting period, MFS investment professionals conducted at least 11 engagements with issuers in the portfolio on climate related risks and opportunities including: Flutter, Forterra, Glencore, Tesco, Weir Group, and Whitbread. Topics engaged on include identification of climate change risk, transition risk, and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR management proposals on climate transition plans of the following issuers during the reporting period: Rio Tinto plc, London Stock Exchange group plc, Glencore plc, NatWest Group, Barclays plc and National Grid plc.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.S. Concentrated Growth Fund ("**U.S. Concentrated Growth Fund**") **Legal entity identifier:** G651RPCOZ0VMJ132HI34

Environmental and/or social characteristics

| Does this financial product have a sustainable investment? | | |
|--|---|--|
| • • Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Concentrated Growth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Concentrated Growth Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 90.08% of the equity securities in the portfolio of the MFS U.S. Concentrated Growth Fund met at least one of the climate criteria, which represented 89.41% of the total assets. Equity securities represented 99.25% of the assets of the MFS U.S. Concentrated Growth Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 77.45 | 76.87 |
| 30 November 2021 | 62.19 | 61.52 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 59.36 | 58.92 |
| 30 November 2021 | 52.80 | 52.20 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | |
|---------------------|--|---|--|
| 31 January 2023 | 0 | 0 | |
| 30 November 2021 | 0 | 0 | |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|--|---|
| 31 January 2023 | 90.08 | 89.41 |
| 30 November 2021 | 80.22 | 79.36 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Concentrated Growth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Concentrated Growth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

| Largest investments | Sector | % Asset | Country |
|--|------------------------|---------|---------------|
| Microsoft Corp | Information Technology | 8.82 | United States |
| Alphabet Inc Class A | Communication Services | 7.68 | United States |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

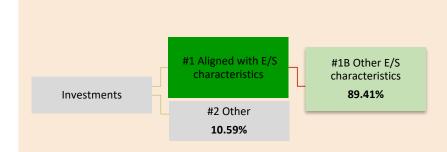

What was the proportion of sustainability-related investments?

The MFS U.S. Concentrated Growth Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS US Concentrated Growth Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, equity securities represented 99.25% of the total assets of the portfolio of the MFS US Concentrated Growth Fund; the remaining investments of 0.75% in the portfolio included cash and / or cash equivalent instruments; 90.08% of the equity securities in the portfolio of the MFS US Concentrated Growth Fund met at least one of the climate criteria, which represented 89.41% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 10.59% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

Asset allocation describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Information Technology | 35.74 |
| Health Care | 14.64 |
| Consumer Discretionary | 13.17 |
| Communication Services | 11.62 |
| Financials | 8.46 |
| Consumer Staples | 6.72 |
| Industrials | 5.60 |
| Real Estate | 3.26 |
| Cash & Cash Equivalents | 0.80 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

activities are expressed as a shareof: - **turnover**

Taxonomy-aligned

- reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

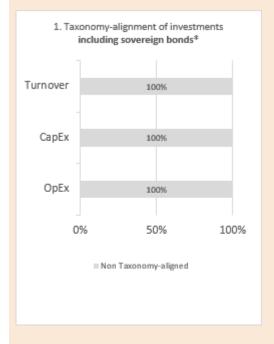

Zero. The MFS U.S. Concentrated Growth Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

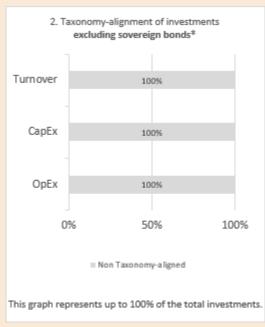

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS U.S. Concentrated Growth Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Concentrated Growth Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS U.S. Concentrated Growth Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Concentrated Growth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS U.S. Concentrated Growth Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS U.S. Concentrated Growth Fund

During the reporting period, MFS investment professionals conducted at least 6 engagements with issuers in the portfolio on climate related risks and opportunities including: Accenture, Agilent Technologies, Boston Scientific Corp, Danaher Corp, and Xcel Energy. Topics engaged on include identification of climate change risk, climate scenario analysis, transition risk, and Net Zero / SBTi initiatives. MFS investment professionals also assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Charter Communications Inc. and Alphabet Inc. MFS investment professionals assessed and voted AGAINST a climate related shareholder proposal of the following issuer during the reporting period: Microsoft.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product

whether the financial product attains the environmental or social characteristics that they promote. Link to access website disclosure:

| Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Corporate Bond Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Corporate Bond Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 77.22% of the corporate debt instruments in the portfolio of the MFS U.S. Corporate Bond Fund met at least one of the climate criteria, which represented 65.93% of the total assets. Corporate debt instruments represented 85.38% of the assets of the MFS U.S. Corporate Bond Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 68.05 | 58.11 |
| 30 November 2021 | 68.17 | 63.25 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 28.20 | 24.08 |
| 30 November 2021 | 28.51 | 26.45 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 1.92 | 1.64 |
| 30 November 2021 | 2.21 | 2.05 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|---|---|
| 31 January 2023 | 77.22 | 65.93 |
| 30 November 2022 | 81.39 | 75.51 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives? Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Corporate Bond Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Corporate Bond Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

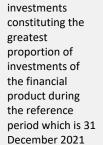

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

to 31 January 2023.

The list includes

What was the proportion of sustainability-related investments?

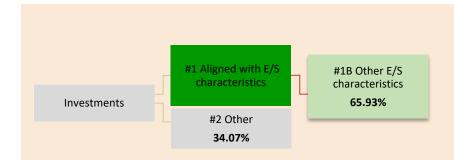

The MFS U.S. Corporate Bond Fund aims to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Corporate Bond Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

As of 31 January 2023, corporate debt instruments represented 85.38% of the total assets of the portfolio of the MFS U.S. Corporate Bond Fund; the remaining investments of 4.62% in the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments;

77.22% of the corporate debt instruments in the portfolio of the MFS U.S. Corporate Bond Fund met at least one of the climate criteria, which represented 65.93% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 34.07% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %Average weight |
|------------------------------------|-----------------|
| Corporate-Industrial | 50.66 |

| Derivatives-Exchange Traded | -1.86 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a shareof:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- green economy.
 operational
 expenditure (OpEx)
 reflecting green
 operational
 activities of
 investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS U.S. Corporate Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

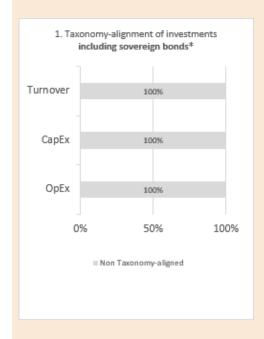

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

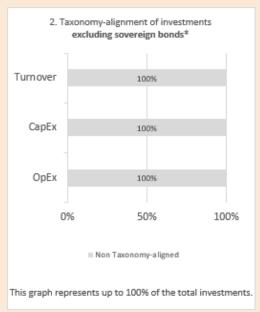

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS U.S. Corporate Bond Fund does not commit to make investments aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Corporate Bond Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS U.S. Corporate Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

Not applicable.

directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those corporate debt instruments that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Corporate Bond Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in corporate debt instruments of the MFS U.S. Corporate Bond Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS U.S. Corporate Bond Fund

During the reporting period, MFS investment professionals conducted at least 24 engagements with issuers in the portfolio on climate related risks and opportunities including American Electric Power, American Homes 4 Rent, Anglo American, Boston Scientific Corp, CenterPoint Energy, Constellation

Brands, Danaher Corp, Duke Energy, Enbridge, Enel SpA, Eni SpA, Glencore, Hilton Worldwide Holdings, Millicom International Cellular, Toronto-Dominion, Vulcan Materials Co, and Xcel Energy. Topics engaged on include identification of climate change risk, climate scenario analysis, transition risk, and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.S. Growth Fund ("MFS U.S. Growth Fund") **Legal entity identifier:** 549300DUBLFTWOTUSY90

Environmental and/or social characteristics

| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Growth Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Growth Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 84.52% of the equity securities in the portfolio of the MFS U.S. Growth Fund met at least one of the climate criteria, which represented 82.80% of the total assets. Equity securities represented 97.96% of the assets of the MFS U.S. Growth Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators measure how

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 63.55 | 62.25 |
| 30 November 2021 | 53.80 | 52.84 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 70.68 | 69.24 |
| 30 November 2021 | 62.0 | 60.94 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria |
|------------------|---|---|
| 31 January 2023 | 84.52 | 82.80 |
| 30 November 2021 | 78.42 | 77.03 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Growth Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Growth Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Growth Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS U.S. Growth Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS U.S. Growth Fund

During the reporting period, MFS investment professionals conducted at least 11 engagements with issuers in the portfolio on climate related risks and opportunities including Accenture, Agilent Technologies, Boston Scientific Corp, Colgate Palmolive, Danaher Corp, EOG Resources Inc, Hilton Worldwide Holdings, Take-Two Interactive Software, and Vulcan Materials Co. Topics engaged on include identification of climate change risk, transition risk, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted FOR a management proposal on climate transition plans of the following issuers during the reporting period: Canadian Pacific Railway Limited. MFS investment professionals assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Charter Communications Inc. and Alphabet Inc. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Amazon and Microsoft.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.S. Total Return Bond Fund ("MFS U.S. Total Return Bond Fund") Legal entity identifier: YJVUBFZW5FW4FOTQBP86

Environmental and/or social characteristics

| Does this financial product have a sustainable investment? | | |
|--|---|--|
| Yes | • No | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 21 July 2022, the MFS U.S. Total Return Bond Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S. Total Return Bond Fund will aim to have at least 50% of the corporate debt instruments in the portfolio invested in corporate debt issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 73.20% of the corporate debt instruments in the portfolio of the MFS U.S. Total Return Bond Fund met at least one of the climate criteria, which represented 31.43% of the total assets. Corporate debt instruments represented 42.94% of the assets of the MFS U.S. Total Return Bond Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 21 July 2022 to 31 January 2023.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained. Climate Criterion 1 - Measuring GHG intensity of corporate debt issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 1 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 66.58 | 28.59 |
| 30 June 2022 | 70.64 | 26.86 |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 19.96 | 8.57 |
| 30 June 2022 | 19.87 | 7.56 |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 0 | 0 |
| 30 June 2022 | 0 | 0 |

Climate Criterion 4 — Measuring activities that facilitate transition to a low carbon economy: the percentage (%) of corporate debt instruments in the portfolio invested in corporate debt issuers that have committed to use the proceeds raised to finance climate change adaptation and / or mitigation activities or to attain a reduction in GHG emissions determined in accordance with the methodology in the website disclosure (see link below).

| Climate Criterion 4 | % of corporate debt instruments in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|---|---|
| 31 January 2023 | 1.07 | 0.46 |
| 30 June 2022 | 1.59 | 0.60 |

Compliance with climate criteria – measuring the percentage (%) of corporate debt instruments in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of corporate debt instruments in the portfolio meeting any criteria | % of total assets in the portfolio meeting this criterion |
|------------------|---|---|
| 31 January 2023 | 73.20 | 31.42 |
| 30 June 2022 | 75.54 | 28.72 |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Total Return Bond Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Total Return Bond Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 21 July 2022 to 31 January 2023.

What was the proportion of sustainability-related investments?

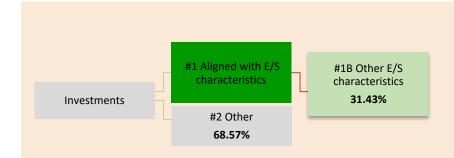

The MFS U.S. Total Return Bond Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Total Return Bond Fund (i.e. # 1) from the Transition Date.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31 January 2023, corporate debt instruments represented 42.94% of the total assets of the portfolio of the MFS U.S. Total Return Bond Fund; the remaining investments of 57.06% the portfolio included non-corporate debt instruments, derivatives, cash and / or cash equivalent instruments;

73.20% of the corporate debt instruments in the portfolio of the MFS U.S. Total Return Bond Fund met at least one of the climate criteria, which represented 31.43% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 68.57% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes. Corporate debt instruments percentages included in this report include any accrued interest amounts.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|------------------------------------|------------------|
| Corporate-Industrial | 22.00 |
| Securitized-MBS Passthrough | 19.48 |
| Treasury | 17.34 |
| Corporate-Financial Institutions | 14.88 |
| Derivatives-Exchange Traded | 11.61 |
| Corporate-Utility | 2.46 |
| Securitized-CLO | 9.20 |
| Securitized-CMBS | 7.63 |
| Government-Related-Local Authority | 1.92 |
| Securitized-ABS | 1.39 |
| Cash | 1.39 |
| Municipals-Local | 0.97 |
| Securitized-CMO | 0.92 |
| Municipals-Health Care | 0.27 |
| Government-Related-Agency | 0.16 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Bloomberg Global Sector Classification Scheme ("BCLASS") and MFS classifications. Bloomberg Finance L.P., its affiliates and licensors own all proprietary rights in BCLASS and has been licensed for use by MFS. MFS may apply own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified.

Taxonomy-aligned activities are expressed as a

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee.

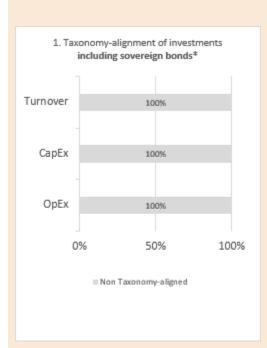

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

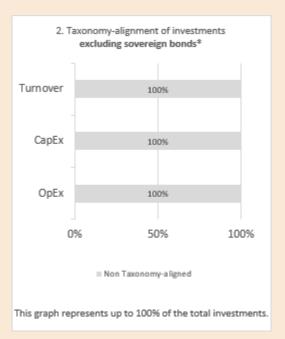

Zero. The MFS U.S. Total Return Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and / or nuclear energy related activities

| that comply with the EU Taxonomy? | | | | | |
|-----------------------------------|---|--|--|--|--|
| | Yes: | | | | |
| | In fossil fuel In nuclear energy | | | | |
| × | No. The MFS U.S. Total Return Bond Fund does not make investments aligned with the EU Taxonomy. | | | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others

have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable

other activities to make a substantial contribution to an environmental

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Total Return Bond Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS U.S. Total Return Bond Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include non-corporate debt instruments, derivatives, cash and cash equivalent instruments.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Total Return Bond Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in corporate debt instruments of the MFS U.S. Total Return Bond Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements - MFS U.S. Total Return Bond Fund

During the reporting period, MFS investment professionals conducted at least 3 engagements with issuers in the portfolio on climate related risks and opportunities including American Electric Power, Enel SpA, and Glencore. Topics engaged on include identification of climate change risk, transition risk, and Net Zero / SBTi initiatives.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: MFS Meridian Funds – U.S. Value Fund ("**MFS U.S. Value Fund**") **Legal entity identifier:** GB1O5HOU4PVHR7NT1O15

Environmental and/or social characteristics

| Does this financial product have a sustainable investment? | | | | | |
|--|---|--|--|--|--|
| • • Yes | • No | | | | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | | |

To what extent were the environmental and/or social characteristics are promoted by this financial product met?

Effective 31 December 2021, the MFS U.S. Value Fund promoted the MFS Low Carbon Transition Characteristic, which refers to the transition to a low carbon economy that MFS as an allocator of capital will promote through active engagement and the application of climate criteria to certain investments made by this product. In particular, the MFS U.S Value Fund will aim to have at least 50% of the equity securities in the portfolio invested in equity issuers that meet at least one of the three climate criteria (see below) from 1 January 2027 (the "Transition Date").

As of 31 January 2023, 85.30% of the equity securities in the portfolio of the MFS U.S. Value Fund met at least one of the climate criteria, which represented 84.46% of the total assets. Equity securities represented 99.02% of the assets of the MFS U.S. Value Fund as of 31 January 2023. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

How did the sustainability indicators perform?

This periodic disclosure relates to the period from 31 December 2021 to 31 January 2023.

Climate Criterion 1 - Measuring GHG intensity of equity issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that reduced their annual GHG intensity in accordance with the methodology set out in the website disclosure (see link below).

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

| Climate Criterion 1 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | | |
|---------------------|--|---|--|--|
| 31 January 2023 | 72.73 | 72.02 | | |
| 30 November 2021 | 83.44 | 82.39 | | |

Climate Criterion 2 - Measuring recognised GHG emissions reduction or stabilization program: the percentage (%) of equity securities in the portfolio invested in equity issuers that have adopted such programs in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 2 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion | | |
|---------------------|--|---|--|--|
| 31 January 2023 | 48.95 | 48.47 | | |
| 30 November 2021 | 37.20 | 36.74 | | |

Climate Criterion 3 - Measuring 'net-zero' issuers: the percentage (%) of equity securities in the portfolio invested in equity issuers that are operating at 'net-zero' determined in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criterion 3 | % of equity securities in the portfolio meeting this criterion | % of total assets in the portfolio meeting this criterion |
|---------------------|--|---|
| 31 January 2023 | 0 | 0 |
| 30 November 2021 | 0 | 0 |

Compliance with climate criteria – measuring the percentage (%) of equity securities in the portfolio that complied with at least one of Climate Criterion 1, 2 and / or 3 in accordance with the methodology set out in the website disclosure (see link below).

| Climate Criteria | % of equity securities in the portfolio meeting any criteria | % of total assets in the portfolio meeting any criteria | | |
|------------------|--|---|--|--|
| 31 January 2023 | 85.03 | 84.46 | | |
| 30 November 2021 | 92.34 | 91.17 | | |

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The MFS U.S. Value Fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Therefore, the "do no significant harm" principle does not apply to any of the investments of this financial product.

How did this financial product consider principal adverse impacts on sustainability factors?

MFS believes that integrating financially material sustainability (environmental, social and governance or ESG) factors into investment analysis and decision-making processes leads to better informed decision-making which will drive investment returns over the long term. MFS investment professionals across the MFS Global Integrated Research Platform have access to proprietary interactive dashboards which allow them to visualize and analyze various ESG data elements, including the principal adverse impact indicators set out below. These ESG data elements are intended to enable MFS investment professionals to better understand and assess the financial impact of sustainability (ESG) factors on issuers and the portfolio, the negative external impact of issuers and the portfolio on sustainability (ESG) factors, and make informed long term investment decisions that are consistent with the financial investment objective of the MFS U.S. Value Fund.

To complement the promotion of the MFS Low Carbon Transition Characteristic which incorporates the GHG emissions (scope 1 and 2, and 3 where available) and GHG intensity of investee companies principal adverse impact indicators, MFS also makes available to investment professionals the following additional greenhouse gas emissions principal adverse impact indicators: carbon footprint, exposure to active in the fossil fuel sector, share of non-renewable energy consumption and production and energy consumption intensity per high impact climate sector (collectively, the "Additional Emissions Indicators"). At a portfolio level, MFS investment professionals considered these Additional Emissions Indicators alongside the MFS Low Carbon Transition Characteristic and underlying climate criteria from July 2022. MFS investment professionals will use the Additional Emissions Indicators as part of their broader assessment to address the readiness of issuers to transition their activities towards a low carbon economy and will engage with issuers consistent with the MFS Low Carbon Transition Characteristic. MFS also makes available to investment professionals the following social principal adverse impact indicators: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises and board gender diversity. MFS investment professionals will consider these indicators within their broader ESG integration framework in the investment process to assess financial materiality and also their engagement practices. In partnership with our global stewardship team and our team of ESG specialists, MFS assesses and addresses the potential adverse impact of companies assessed at the portfolio level through its engagement approach, which may include direct engagement, proxy voting and industry collaborations (as appropriate).

Sustainability issues are complex, interconnected and evolving. MFS believes that the materiality of principal adverse impacts cannot be reduced to an automated process. The consideration of principal adverse impacts by MFS investment professionals for financial materiality is generally subjective and often involves considering risks or opportunities that are intangible and hard to measure. Their analysis will therefore be in-depth, qualitative, issuer-specific and contextual. MFS investment professionals retain flexibility to consider the principal adverse impacts within different points of the investment process and engagement activities, and the extent to which MFS investment professionals consider principal adverse impact indicators may vary. Importantly, MFS investment professionals do not apply

Principal adverse impacts are the most significant negative impacts of investment decision on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

principal adverse impact indicators as the basis for exclusions or screens, nor would these indicators be used within a purely quantitative portfolio optimization framework. As principal adverse indicators are considered at the portfolio level, MFS investment professionals will engage with certain issuers in the portfolio with respect to issues that are considered to be financially material and not engage with every issuer within the portfolio.

The list includes investments constituting the greatest proportion of investments of the financial product during the reference period which is 31 December 2021 to 31 January 2023.

What were the top investments of this financial product?

| Largest investments | Sector | % Asset | Country |
|------------------------------|------------------------|---------|---------------|
| JPMorgan Chase & Co | Financials | 3.55 | United States |
| Johnson & Johnson | Health Care | 3.41 | United States |
| Northrop Grumman Corp | Industrials | 2.86 | United States |

| Thermo Fisher Scientific Inc | Health Care | 2.02 | United States |

The top investment holdings above represent the average security weights for the top 15 securities in the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

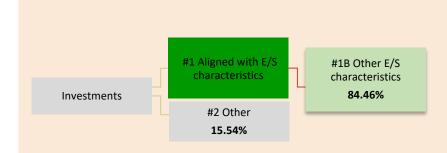

What was the proportion of sustainability-related investments?

The MFS U.S. Value Fund aims to have at least 50% of the equity securities in the portfolio invested in equity issuers meeting at least one of the climate criteria from the Transition Date and therefore aligned with the E/S characteristics promoted by the MFS U.S. Value Fund (i.e. # 1) from the Transition Date.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

As of 31 January 2023, equity securities represented 99.02% of the total assets of the portfolio of the MFS U.S. Value Fund; the remaining investments of 0.8% in the portfolio comprised of cash and / or cash equivalent instruments; 85.30% of the equity securities in the portfolio of the MFS U.S. Value Fund met at least one of the climate criteria, which represented 84.46% of the total assets of the portfolio that attained the MFS Low Carbon Transition Characteristic (which did not qualify as sustainable investments); 15.54% of the total assets were not aligned with the MFS Low Carbon Transition Characteristic or qualified as sustainable investments. Please note that percentages of total assets may differ from the financial statements included in the Shareholder Annual Report due to certain adjustments which have been made for reporting purposes.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

| Sectors | % Average weight |
|-------------------------|------------------|
| Financials | 25.84 |
| Health Care | 19.19 |
| Industrials | 17.93 |
| Information Technology | 7.23 |
| Utilities | 6.96 |
| Consumer Staples | 6.10 |
| Materials | 4.10 |
| Energy | 4.07 |
| Consumer Discretionary | 3.56 |
| Communication Services | 3.22 |
| Cash & Cash Equivalents | 1.07 |
| Real Estate | 0.72 |

The sector holdings above represent the average sector weight for the portfolio at the end of the 31 March 2022, 30 June 2022, 30 September 2022 and 31 December 2022 quarter end periods. Weights are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. Sectors shown are based on the Global Industry Classification Standard (GICS®) sectors and MFS classifications. GICS was developed by and/or is the exclusive property of MSCI, Inc. and S&P Global Market Intelligence Inc. ("S&P Global Market Intelligence"). GICS is a service mark of MSCI and S&P Global Market Intelligence and has been licensed for use by MFS. MFS has applied its own internal sector/industry classification methodology for equity securities and non-equity securities that are unclassified by GICS.

Taxonomy-aligned activities are expressed as a shareof:

- turnover
 reflecting the share
 of revenue from
 green activities of
 investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- green economy.
 operational
 expenditure (OpEx)
 reflecting green
 operational
 activities of
 investee.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Zero. The MFS U.S. Value Fund does not aim or commit to invest in sustainable investments with an environmental objective aligned with the EU Taxonomy.

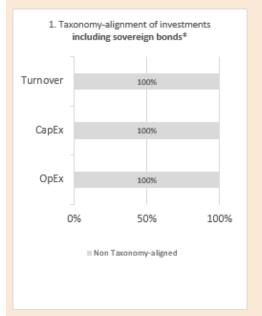

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy?

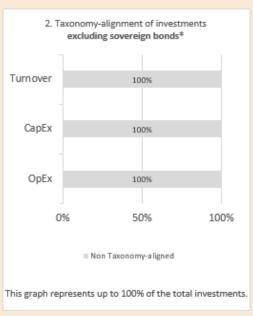

| Yes: | | |
|------|----------------|-------------------|
| | In fossil fuel | In nuclear energy |

No. The MFS U.S. Value Fund does not monitor investments for compliance with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Zero. The MFS U.S. Value Fund does not aim or commit to invest in transitional or enabling activities as defined under the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Zero. The MFS U.S, Value Fund does not aim or commit to invest in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of sustainable investments with a social objective? Not applicable.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

For those equity securities that do not adhere to the climate criteria of the MFS Low Carbon Transition Characteristic, MFS investment professionals will continue to actively engage with these issuers on the climate criteria. The remaining portfolio held instruments not subject to the MFS Low Carbon Transition Characteristic which may include, cash, cash equivalent instruments and currency derivatives.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU

Taxonomy.

What actions have been taken to meet the environmental and / or social characteristics during the reference period?

The MFS U.S. Value Fund is managed by MFS investment professionals operating within the MFS integrated global research platform. As well as supporting strategy level investment analysis and decision making, certain initiatives are undertaken at the platform level for all MFS portfolios ("Platform Initiatives"). Information on Platform Initiatives that support the MFS Low Carbon Transition Characteristic are included below.

Platform Initiatives

Net Zero Assets Managers ("NZAM") - In 2021, MFS joined NZAM initiative. As a signatory, MFS is required to commit a portion of AUM that will align to net zero principles. In May 2022, MFS published interim and long-term targets to align with the Net Zero Asset Managers initiative. As of 2022, 90% of total MFS assets under management will be considered in-scope, including investments in equity securities of the MFS U.S. Value Fund.

MFS interim and long-term targets:

- 2030 90% of in scope AUM is considered net zero aligned or aligning
- 2040 100% of in scope AUM is considered net zero aligned.
- 2050 100% of AUM is considered 'achieving net zero'.

The MFS approach is predicated on the belief that engaging investee companies across all industry sectors to transition in line with the decarbonization of the global economy will reduce the overall climate-related financial risks within our clients' investment portfolios. We believe this approach will help to influence positive change, is in the best interest of clients and aligned with our purpose of creating long-term value responsibly.

Task Force on Climate related Financial Disclosures ("TCFD") – MFS became a signatory in 2019. In 2022, MFS produced its first annual report in line with the TCFD recommendations. This report demonstrates our progress in integrating climate-risk awareness into our business operations and investment strategy. The full report is available on www.mfs.com.

MFS Climate Letter – MFS wrote to 700 issuers that represent our largest and highest emitting portfolio holdings. This letter outlined MFS' support of the Paris Agreement and the goal of limiting temperature increases to below 1.5° Celsius relative to pre-industrial levels. MFS requested these issuers to disclose carbon and related data, plan strategies to reduce their impacts, and act on those strategies in both the short and intermediate terms.

MFS Climate Working Group – MFS established an internal climate working group with the goal of engaging the broader MFS investment professionals on climate change and environmental impact within the MFS investment process and corporate engagement activity. Recent activities during the reporting period include the following: developed an internal climate framework that is Paris aligned, across all sectors, geographies and asset classes; ongoing integration of climate consideration and process across the MFS integrated global research platform; collaborating externally with groups such as NZAM, Climate Action 100+ and other initiatives.

Engagements and Proxy Voting - MFS U.S. Value Fund

During the reporting period, MFS investment professionals conducted at least 21 engagements with issuers in the portfolio on climate related risks and opportunities including Accenture, American Electric Power, Archer Daniels Midland, Boston Scientific Corp, Chubb Ltd, Citigroup, ConocoPhilips, Danaher Corp, Duke Energy, EOG Resources Inc, Kimberly-Clark, Lowe's Cos Inc, McKesson Corp, PPG Industries, Union Pacific Corp, and Xcel Energy. Topics engaged on include identification of climate change risk, transition risk, climate scenario analysis, and Net Zero / SBTi initiatives. MFS investment professionals assessed and voted FOR a management proposal on climate transition plans of the following issuers during the reporting period: Canadian Pacific Railway Limited. MFS investment professionals assessed and voted FOR climate related shareholder proposals of the following issuers during the reporting period: Honeywell International Inc and Charter Communications Inc. MFS investment professionals assessed and voted AGAINST climate related shareholder proposals of the following issuers during the reporting period: Comcast Corp.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
