What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide capital growth and income in excess of the Bloomberg Global Aggregate Bond Index after fees have been deducted over a three to five year period by investing in bonds.

The fund is actively managed and invests at least two-thirds of its assets in bonds with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) issued by governments, government agencies, supranationals and companies worldwide in various currencies.

The fund may invest up to 10% of its assets in contingent convertible bonds and up to 30% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for nonrated bonds). The fund may also invest up to 40% of its assets in asset-backed securities and mortgage-backed securities issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The fund may invest up to 15% of its assets in mainland China through regulated markets (including the Chinese Interbank Bond Market (CIBM) via Bond Connect or CIBM Direct).

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market

investments, and hold cash (subject to the restrictions provided in the prospectus).

Benchmark: The fund's performance should be assessed against its target benchmark being to exceed the Bloomberg Global Aggregate Bond Index. The fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. Please see appendix III of the fund's prospectus for further details. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depository: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

 The risk indicator assumes you keep the product for 3 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The Unfavourable scenario occurred for an investment between 12 2020 to 04 2023

The Moderate scenario occurred for an investment between 06 2016 to 06 2019

The Favourable scenario occurred for an investment between 08 2018 to 08 2021

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	USD 438	USD 751
Annual cost impact (*)	4.4%	2.4% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2,8 % before costs and 0,4 % after costs.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
