The Depository performs three types of functions, namely (i) the oversight duties (as defined in Article 34 (1) of the Law), (ii) the monitoring of the cash flows of Aberdeen Standard Liquidity Fund (Lux) (as set out in Article 34 (2) of the Law) and (iii) the safekeeping of Aberdeen Standard Liquidity Fund (Lux)'s assets (as set out in Article 34 (3) of the Law).

Under its oversight duties, the Depository is required to ensure:

- (1) that the sale, issue, repurchase, redemption and cancellation of Shares effected on behalf of Aberdeen Standard Liquidity Fund (Lux) are carried out in accordance with the Luxembourg law and the Articles of Incorporation,
- (2) that the value of Shares is calculated in accordance with the Luxembourg law and the Articles of Incorporation,

- (5) that Aberdeen Standard Liquidity Fund (Lux)'s revenues are allocated in accordance with Luxembourg law or the Articles of Incorporation.

The overriding objective of the Depositary is to protect the interests of the Shareholders of Aberdeen Standard Liquidity Fund (Lux), which always prevail over any commercial interests.

The Depositary is part of an international group of companies and businesses that, in the ordinary course of their business, act simultaneously for a large number of clients, as well as for their own account, which may result in actual or potential conflicts. Conflicts of interest arise where the Depositary or its affiliates engage in activities under the depositary agreement or under separate contractual or other arrangements. Such activities may include:

- (i) providing nominee, administration, registrar and transfer agency, research, agent securities lending, investment management, financial advice and/or other advisory services to Aberdeen Standard Liquidity Fund (Lux);
- (ii) engaging in banking, sales and trading transactions including foreign exchange, derivative, principal lending, broking, market making or other financial transactions with Aberdeen Standard Liquidity Fund (Lux) either as principal and in the interests of itself, or for other clients.

In connection with the above activities the Depositary or its affiliates:

- (i) will seek to profit from such activities and are entitled to receive and retain any profits or compensation in any form and are not bound to disclose to, Aberdeen Standard Liquidity Fund (Lux), the nature or amount of any such profits or compensation including any fee, charge, commission, revenue share, spread, mark-up, mark-down, interest, rebate, discount, or other benefit received in connection with any such activities;
- (ii) may buy, sell, issue, deal with or hold, securities or other financial products or instruments as principal acting in its own interests, the interests of its affiliates or for its other clients;
- (iii) may trade in the same or opposite direction to the transactions undertaken, including based upon information in its possession that is not available to Aberdeen Standard Liquidity Fund (Lux);
- (iv) may provide the same or similar services to other clients including competitors of Aberdeen Standard Liquidity Fund (Lux);
- (v) may be granted creditors' rights by Aberdeen Standard Liquidity Fund (Lux) which it may exercise.

Aberdeen Standard Liquidity Fund (Lux) may use an affiliate of the Depositary to execute foreign exchange, spot or swap transactions for the account of Aberdeen Standard Liquidity Fund (Lux). In such instances the affiliate shall be acting in a principal capacity and not as a broker, agent or fiduciary of Aberdeen Standard Liquidity Fund (Lux). The affiliate will seek to profit from these transactions and is entitled to retain and not disclose any profit to Aberdeen Standard Liquidity Fund (Lux).

The affiliate shall enter into such transactions on the terms and conditions agreed with Aberdeen Standard Liquidity Fund (Lux).

Where cash belonging to Aberdeen Standard Liquidity Fund (Lux) is deposited with an affiliate being a bank, a potential conflict arises in relation to the interest (if any) which the affiliate may pay or charge to such account and the fees or other benefits which it may derive from holding such cash as banker and not as trustee. The Management Company may also be a client or counterparty of the Depositary or its affiliates.

Potential conflicts that may arise in the Depositary's use of sub-custodians include four broad categories:

- (1) conflicts from the sub-custodian selection and asset allocation among multiple sub-custodians influenced by (a) cost factors, including lowest fees charged, fee rebates or similar incentives and (b) broad two-way commercial relationships in which the Depositary may act based on the economic value of the broader relationship, in addition to objective evaluation criteria;
- (2) sub-custodians, both affiliated and non-affiliated, act for other clients and in their own proprietary interest, which might conflict with clients' interests;
- (3) sub-custodians, both affiliated and non-affiliated, have only indirect relationships with clients and look to the Depositary as its counterparty, which might create incentive for the Depositary to act in its self-interest, or other clients' interests to the detriment of clients; and
- (4) sub-custodians may have market-based creditors' rights against client assets that they have an interest in enforcing if not paid for securities transactions.

In carrying out its duties the Depositary shall act honestly, fairly, professionally, independently and solely in the interests of Aberdeen Standard Liquidity Fund (Lux) and its Shareholders.

The Depositary has functionally and hierarchically separated the performance of its depositary tasks from its other potentially conflicting tasks. The system of internal controls, the different reporting lines, the allocation of tasks and the management reporting allow potential conflicts of interest and the Depositary issues to be properly identified, managed and monitored. Additionally, in the context of the Depositary's use of sub-custodians, the Depositary imposes contractual restrictions to address some of the potential conflicts and maintains due diligence and oversight of sub-custodians to ensure a high level of client service by those agents. The Depositary further provides frequent reporting on clients' activity and holdings, with the underlying functions

subject to internal and external control audits. Finally, the Depositary internally separates the performance of its custodial tasks from its proprietary activity and follows a Standard of Conduct that requires employees to act ethically, fairly and transparently with clients.

Up-to-date information on the Depositary, its duties, any conflicts that may arise, the safe-keeping functions delegated by the Depositary, the list of delegates and sub-delegates and any conflicts of interest that may arise from such a delegation will be made available to Shareholders on request.

In the event of a loss of a financial instrument held in custody, determined in accordance with the Law and the UCITS Regulations, the Depositary shall return financial instruments of identical type or the corresponding amount to Aberdeen Standard Liquidity Fund (Lux) without undue delay, unless it can prove that the loss of a financial instrument held in custody has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary.

In case of a loss of financial instruments held in custody, the Shareholders may invoke the liability of the Depositary directly or indirectly through the Management Company provided that this does not lead to a duplication of redress or to unequal treatment of the Shareholders.

Broadly, the Depositary will be liable to Aberdeen Standard Liquidity Fund (Lux) for all other losses suffered by Aberdeen Standard Liquidity Fund (Lux) as a result of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Law, subject to the terms and exclusions set out in the Depositary Agreement. The Depositary shall not be liable for consequential or indirect or special damages or losses, arising out of or in connection with the performance or non-performance by the Depositary of its duties and obligations.

Either Aberdeen Standard Liquidity Fund (Lux) or the Depositary may terminate the Depositary Agreement upon ninety (90) days' written notice. A new depositary must be designated to carry out the duties and assume the responsibilities of the Depositary and the replacement of the Depositary shall be effected within two months.

Delegation

The Depositary has full power to delegate the whole or any part of its safe-keeping functions but its liability will not be affected by the fact that it has entrusted to a third party some or all of the assets in its safekeeping. The Depositary's liability shall not be affected by any delegation of its safe-keeping functions under the Depositary Agreement.

The Depositary has delegated those safekeeping duties set out in Article 22(5)(a) of the UCITS Directive to State Street Bank and Trust Company with registered office at One Lincoln Street, Boston, Massachusetts 02111, USA, whom it has appointed as its global sub-custodian. State Street Bank and Trust Company as global sub-custodian has appointed local sub-custodians within the State Street Global Custody Network.

Information about the safe-keeping functions which have been delegated and the identification of the relevant delegates and sub-delegates are available at the registered office of the Management Company as well as on the website <http://www.statestreet.com/about/office-locations/luxembourg/subcustodians.html>.

STRUCTURE

Funds & Base Currencies

Aberdeen Standard Liquidity Fund (Lux) has adopted an "umbrella" structure to provide investors with a choice of different Funds. Each Fund will be differentiated by its specific Investment Objective and Policy.

All the Funds of Aberdeen Standard Liquidity Fund (Lux) listed in the table under "FUNDS QUALIFYING AS MONEY MARKET FUNDS" under "Fund Information" qualify and are authorised as Money Market Funds.

The Funds represent segregated portfolios of assets and accordingly, the assets of a Fund belong exclusively to that Fund and shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body, including any other Fund and shall not be available for any such purpose.

The Funds are denominated in a currency that is appropriate for the market and the type of investments of the Fund concerned. The Base Currency of each Fund is listed under "Fund Information" and can also be found at www.abrdn.com.

Types of Shares & Share Price Calculations

The Shares relating to each Fund are issued in registered form only and will be uncertificated. Shares are not issued in bearer form.

Investors can restructure their portfolio without having to deal with the excessive paperwork associated with Share certificates (former units certificates). Ownership of Shares is evidenced by an entry in Aberdeen Standard Liquidity Fund (Lux)'s register of Shareholders. Shares may be issued in a sole name or in joint names – up to four joint names are possible. Shares in any Fund will normally be allotted (including Shares rounded to up to three decimal places, if appropriate, to the full value of the amount invested) upon completion of the application procedure described in the section "Dealing in Shares of Aberdeen Standard Liquidity Fund (Lux)" under "Subscription for Shares" of this Prospectus. Shares can be issued, switched or redeemed during any Dealing Day.

Not all Funds will issue all Classes of Shares. Investors should refer to www.abrdn.com for current details of which Classes of Shares are in issue.

The Shares relating to each Fund are issued in the following main Classes, namely Class A, Class I, Class J, Class K, Class L, Class M, Class X, Class Y and Class Z. Share Class definitions can be found under Appendix F of this Prospectus.

Share Prices (i.e., Net Asset Value per Share as adjusted to reflect dealing charges), for all Classes of Shares, in all Funds, are calculated daily. The single Share Price for each Fund and Class is the basis for all dealing transactions with the Funds.

Shares are quoted and dealt in the relevant Share Class' designated currency of denomination and in other currencies, including (without limitation) US Dollars, Sterling and Euro. For the purposes of being eligible for central clearing systems such as Clearstream or Euroclear and the National Securities Clearing Corporation (NSCC), which may require stock identification numbers or codes (which include a reference to the quoted and dealing currency of the Share in this code or number), these dealing currencies represent individual Share Classes in these systems.

Shares quoted and dealt in currencies other than the relevant Class' designated currency of denomination are not additional Classes in Aberdeen Standard Liquidity Fund (Lux) and must not be viewed as such. They are the Classes quoted and dealt in other currencies with the associated foreign exchange risk.

For information on how to invest refer to the section on "Subscription for Shares".

ABERDEEN STANDARD LIQUIDITY FUND (LUX) –SHORT DURATION STERLING FUND

This Fund is subject to Article 6 of the SFDR. Further information can be found under section "EU's Sustainable Finance Disclosure Regulation – Sustainability Risk Integration".

Investment Objective and Policy

The Fund's investment objective is to achieve income by investing in investment grade debt, debt-related securities and Money Markets Instruments whilst aiming to avoid loss of capital. The Fund is actively managed and aims to outperform FTSE UK Sterling Eurodeposit 1 Month.

To achieve this objective, the Fund's assets are invested with the principle of risk diversification, through active Duration and yield curve management, in a wide spectrum of fixed and floating sterling denominated debt and debt-related instruments and Money Market Instruments including but not limited to bonds, debentures, commercial paper, floating rate notes, certificates of deposit and Asset Backed Securities. The maximum Duration of the Fund's investments will not exceed 1 year with the maximum expected* maturity of instruments up to 5 years.

The Fund may hold ancillary liquid assets (i.e. bank deposits at sight, such as cash held in current accounts with a bank accessible at any time) up to 20% of its net assets for treasury purposes. That is, to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets provided under article 41(1) of the Law or for a period of time strictly necessary in case of unfavourable market conditions.

The Fund may invest directly in money market and cash equivalent instruments or short-term debt securities, which may include fixed or floating rate commercial paper, bonds, notes and bills, bank deposits, certificates of deposit, term deposits up to one year, bankers' acceptances, call and notice accounts, and undertakings of collective investment which invest in these instruments (i.e. money market funds) for treasury purposes.

The Fund may invest up to 20% in Asset Backed Securities of its net assets and up to 10% of its net assets in other collective investment schemes, including those which are managed, directly or indirectly, by the Investment Manager or its affiliates.

The Board may decide to increase the investment limit in Asset Backed Securities to up to 50%. Such decision will be notified to Shareholders in the Fund by an announcement published on the internet site www.abrdn.com at least twenty-four (24) hours in advance and this Prospectus will be amended accordingly.

The Investment Manager will seek to maintain the highest fund rating from one or more rating agency in a rating category which is appropriate to this investment policy.

Income: Income will be declared daily in respect of income Shares and will be paid monthly on or about the second Business Day of each following month. Income for accumulation Shares will be declared daily and capitalised into the Net Asset Value of the accumulation Shares.

Investment Manager: abrdn Investments Limited

Profile of the Typical Investor:

This Fund gives access to short-term Sterling-denominated debt, debt related instruments and money market instruments and may appeal to investors seeking income at a level consistent with capital preservation. The Fund may be of interest to investors who wish to include a Sterling-denominated short term debt and money markets component to their diversified portfolio. The Fund may be suitable for investors who are comfortable with a low level of risk. While the Fund aims to generate income, prospective investors should be aware that the withdrawal of income will have the effect of reducing the level of any capital growth which the Fund might achieve. Potential investors in the Fund are advised to consult their professional investment advisers in respect of any investment decision in relation to the Fund. The Fund may appeal to investors with a short term investment horizon.

In addition to the general risk factors set out under "General Risk Factors" potential investors should be aware of certain fund specific risks:

- The risk profile of this Fund may be higher than a regular money market fund due to its investments in Asset-Backed and Mortgage Backed Securities.
- The Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Where long term interest rates rise, the capital value of bonds is likely to fall and vice versa. Credit risk reflects the ability of a bond issuer to meet its obligations. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.

** The maturity for Asset Backed Securities and/or amortising assets is determined by the expected maturity of such assets rather than the legal maturity at issuance of such securitisations.*

GENERAL RISK FACTORS

General

Investors should remember that the price of Shares of any of the Funds and any income from them may fall as well as rise and that investors may not get back the full amount invested. Past performance is not a guide to future performance. Where the currency of the relevant Fund varies from the currency invested, or where the currency of the relevant Fund varies from the currencies of the markets in which the Fund invests (in situations where such unhedged exposures are permitted in application of the regulations governing specific funds), there is the prospect of additional loss (or the prospect of additional gain) to the investor greater than the usual risks of investment. A number of the risk warnings below have been included because the Funds may invest in other collective investment schemes to which these apply. The following statements are intended to summarise some of the risks, but are not exhaustive, nor do they offer advice on the suitability of investments.

Political, Economic and/or Regulatory Risks

The Funds are domiciled in Luxembourg and investors should note that all the regulatory protections provided by local regulatory authorities may not apply. Investors should consult their financial advisors for further information in this area. The value of a Fund and its investments may be affected by uncertainties or instability caused by international political developments, changes in government policies, legal, fiscal or regulatory reforms or restrictions on foreign investment and currency repatriation. The Funds will also be registered in jurisdictions outside of the EU, which may result in more restrictive requirements or investment limits being applied to the Funds, without any notice to Shareholders.

Investment Objective

There is no guarantee or assurance that the investment objectives of any of the Funds will be achieved. Investors should also be aware that the investment objectives of a Fund may state that it may invest on a limited basis into areas not naturally associated with the name of the Fund. These other markets may act with more or less volatility than the core investment area and performance will be in part dependent on these investments. Investors should ensure (prior to any investment being made) that they are satisfied with the risk profile of the overall objectives disclosed.

Valuation Risk

Investors should note that subscription for Shares of any of the Funds is not the same as making a deposit with a bank or other deposit taking body and the value of the Shares is not insured or guaranteed. The value of a Fund may be affected by the creditworthiness of issuers of that Fund's investments and, notwithstanding the policy of the Fund of investing in short term instruments, may also be affected by substantial adverse movements in interest rates.

Where a Fund invests in (i) unlisted or (ii) listed or traded instruments, there is a possibility that a market price is either unavailable or not representative. In such circumstances, the Administrator may consult the Investment Managers on the valuation of such instruments. There is a possible conflict of interest with the Investment Managers being involved in the valuation of the Fund's investments while receiving a fee for its services that will increase when the value of the Fund increases.

Negative Yields

Market conditions, including but not limited to a reduction in interest rates, may have a material impact on the yield payable on Shares of a Class. Either the yielding will be so low that following the deduction of the charges and expenses applicable to that Class will be a negative number (negative net yield) or the yield will already be a negative number before the charges and expenses have been deducted (negative gross yield). Negative yields may reduce the Share Prices. Such market conditions, together with any actions taken by financial institutions in response thereto (such as, for example, by way of reducing interest rates and therefore income payable on the Fund, are outside the control of the Board.

Counterparty Risk

Each Fund may enter into contracts that entail a credit exposure to certain counterparties. To the extent that a counterparty defaults on its obligation and the Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, a loss of income and possible additional costs associated with asserting its rights.

Credit Risk

Credit risk can affect all fixed income securities, Money Market Instruments or Reverse Repurchase Agreements, where an issuer may fail to make principal and interest payments when due. Issuers with lower credit quality typically offer higher yields for this added risk. Conversely, issuers with higher credit quality typically offer lower yields. Lower credit quality may lead to greater volatility in the price of a security and in Shares of a Fund. Lower credit quality also may affect a security's liquidity and make it difficult for a Fund to sell the security.

Currency Risk

A Fund may invest in securities denominated in a number of different currencies other than the Base Currency in which such Fund is denominated. Changes in foreign currency exchange rates may adversely affect the value of a Fund's investments and the income thereon.

The Net Asset Value of a Fund invested in fixed income securities will change in response to fluctuations in interest rates and exchange rates. Except to the extent that values are independently affected by currency exchange rate fluctuations, when interest rates decline, the value of fixed income securities generally can be expected to rise. Conversely, when interest rates rise, the value of fixed income securities generally can be expected to decline. The performance of investments in fixed income securities denominated in a specific currency will also depend on the interest-rate environment in the country issuing the currency. As the Net Asset Value of a Fund is calculated in its Base Currency, the performance of investments denominated in a currency other

than the relevant Fund's Base Currency will depend on the strength of such currency against the Base Currency and on the interest rate environment in the country issuing the currency. In the absence of other events that could otherwise affect the value of non-Base Currency investments (such as a change in the political climate or an issuer's credit quality), an appreciation in the value of the non-Base Currency generally can be expected to increase the value of a Fund's non-Base Currency investments in terms of the Base Currency. A rise in interest rates or decline in the value of non-Base Currencies relative to the Base Currency generally can be expected to depress the value of a Fund's non-Base Currency investments.

Each Fund may enter into hedging transactions on currencies to protect against declines in the value of investments denominated in currencies other than the relevant Fund's Base Currency, and against increases in the cost of investments denominated in currencies other than the relevant Fund's Base Currency.

Interest Rate Risk

Funds that invest in debt securities or Money Market Instruments are subject to interest rate risk. The value of a fixed income security will generally increase when interest rates fall and decrease in value when interest rates rise. Interest rate risk is the chance that such movements in interest rates will negatively affect the value of a security or, in a Fund's case, its Net Asset Value. Securities with greater interest rate sensitivity and longer maturities tend to produce higher yields, but are subject to greater fluctuations in value. As a result, securities with a longer maturity tend to offer higher yields for this added risk. While changes in interest rates may affect a Fund's interest income, such changes may positively or negatively affect the Net Asset Value of a Fund's Shares on a daily basis.

Inflation/ Deflation Risk

Inflation risk refers to the possibility of a reduction in the value of the income or assets as inflation decreases the value of money. The real value of a Fund's portfolio could decline as a result of increasing inflation. Deflation risk refers to the possibility of a decline in the prices throughout the economy over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of a Fund's portfolio.

Operational Risk

Aberdeen Standard Liquidity Fund (Lux)'s operations (including investment management, distribution and collateral management) are carried out by several service providers. Aberdeen Standard Liquidity Fund (Lux) and/or the Management Company follow a due diligence process in selecting service providers; nevertheless operational risk can occur and have a negative effect on Aberdeen Standard Liquidity Fund (Lux)'s operations, and it can manifest itself in various ways, including business interruption, poor performance, information systems malfunctions or failures, regulatory or contractual breaches, human error, negligent execution, employee misconduct, fraud or other criminal acts. In the event of a bankruptcy or insolvency of a service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions.

Liquidity Risk

A Fund may invest in certain securities that subsequently become difficult to sell because of reduced liquidity which would have an adverse impact on market price. Reduced liquidity for such securities may be driven by a specific economic or market event, such as the deterioration in the creditworthiness of an issuer.

Money Market Instruments, Fixed-term Deposits and Certificates of Deposit

Certain Funds may invest a large proportion of their assets in fixed-term deposits, certificates of deposit and/or Money Market Instruments. Investors should note that investment in such Funds is not the same or equivalent to a deposit in a bank account and is not protected by any governments or other guarantee or investor compensation scheme, which may be available to protect the holder of a bank deposit account. Investors should remember that the price of Shares of any of the Funds and any income from them may fall as well as rise and that investors may not get back the full amount invested.

Pre-Payment Risk

Certain fixed income securities, such as mortgage-backed and asset-backed securities, give an issuer the right to call its securities before their maturity date. The possibility of such pre-payment risk may force the Fund to reinvest the proceeds of such investments in securities offering lower yields.

Holding Securities Overseas

Securities held with a local correspondent or clearing / settlement system or securities correspondent ("Securities System") may not be as well protected as those held within Luxembourg. In particular, losses may be incurred as a consequence of the insolvency of the local correspondent or Securities System. In some markets, the segregation or separate identification of a beneficial owner's securities may not be possible or the practices of segregation or separate identification may differ from practices in more developed markets.

Depository Risk

The assets of Aberdeen Standard Liquidity Fund (Lux) and its Funds shall be held in custody by the Depository and its sub-custodian(s) and/or any other custodians, prime broker and/or broker-dealers appointed by Aberdeen Standard Liquidity Fund (Lux). Investors are hereby informed that cash and fiduciary deposits may not be treated as segregated assets and might therefore not be segregated from the relevant depository, sub-custodian(s), other custodian / third party bank, prime broker and/or broker dealer's own assets in the event of the insolvency or the opening of bankruptcy, moratorium, liquidation or reorganization proceedings of the depository, sub-custodian(s), other custodian / third party bank, prime broker or the broker dealer as the case may be. Subject to specific depositor's preferential rights in bankruptcy proceedings set forth by regulation in the jurisdiction of the relevant depository, sub-custodian(s), other custodian / third party bank, prime broker or the broker dealer, Aberdeen Standard Liquidity Fund (Lux)'s claim might not be privileged and may only rank *pari passu* with all other unsecured creditors' claims. Aberdeen Standard Liquidity Fund (Lux) and/or its Funds might not be able to recover all of their assets in full.

Derivative instruments

The Funds may use derivative instruments for hedging purposes. This will generally increase the risk profiles and may lead to volatility in fund values.

Specific risks linked to Reverse Repurchase Agreements

In relation to Reverse Repurchase Agreements, investors must notably be aware that (A) in the event of the failure of the counterparty with which cash of a Fund has been placed there is the risk that collateral received may yield less than the cash placed out, whether because of inaccurate pricing of the collateral, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) (i) locking cash in transactions of excessive size or duration, (ii) delays in recovering cash placed out, or (iii) difficulty in realising collateral may restrict the ability of the Fund to meet redemption requests, security purchases or, more generally, reinvestment; and that (C) Reverse Repurchase Agreements will, as the case may be, further expose a Fund to risks similar to those associated with optional or forward derivative financial instruments, which risks are further described in other sections of this prospectus.

Specific Risks related to OTC Derivative Transactions

In general, there is less governmental regulation and supervision of transactions in the OTC markets (in which currencies, forwards and certain options on currencies are generally traded) than of transactions entered into on organised exchanges. In addition, many of the protections afforded to participants on some organised exchanges, such as the performance guarantee of an exchange clearinghouse, may not be available in connection with OTC transactions. Therefore, any Fund entering into OTC transactions will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Fund will incur losses. A Fund will only enter into transactions with counterparties which it believes to be creditworthy, and may reduce the exposure incurred in connection with such transactions through the receipt of letters of credit or collateral from certain counterparties. Regardless of the measures the Fund may seek to implement to reduce counterparty credit risk, however, there can be no assurance that a counterparty will not default or that the Fund will not sustain losses as a result.

Asset-Backed Securities and Mortgage Backed Securities

Some Funds may invest their assets in Asset Backed Securities (ABS) including Mortgage Backed Securities (MBS), which are debt securities based on a pool of assets or collateralised by the cash flows from a specific pool of underlying assets. ABS and MBS assets may be highly illiquid and therefore prone to substantial price volatility. Owing to the divergent structure and particular features of these instruments compared with traditional bonds (corporate bonds or sovereign debt), these transactions may exhibit divergent characteristics in terms of counterparty and interest rate risk as well as other types of risks, such as reinvestment risk arising from built-in termination rights (prepayment options), credit risks on the underlying assets and advance repayments of principal resulting in a lower total return (especially if repayment of the debt is not concurrent with redemption of the assets underlying the claims).

Unless otherwise specifically stated for a Fund, ABS and/or MBS will not represent more than 20% of the Net Asset Value of a Fund.

Investing in other collective investment schemes

A Fund incurs costs of its own management and administration comprising the fees paid to the Management Company and other service providers. It should be noted that, in addition, such a Fund incurs similar costs in its capacity as an investor in UCITS or Other UCI's, including, for the avoidance of any doubts, other money market funds, (together referred to as "Investment Funds") which in turn pay similar fees to their manager and other service providers. Furthermore, the investment strategies and techniques employed by certain Investment Funds may involve frequent changes in positions and a consequent portfolio turnover. This may result in brokerage commission expenses which exceed significantly those of other Investment Funds of comparable size. Investment Funds may be required to pay performance fees to their manager. Under these arrangements the managers will benefit from the appreciation, including unrealised appreciation of the investments of such Investment Funds, but they may not be similarly penalised for realised or unrealised losses. As a consequence, the direct and indirect costs borne by a Fund investing in Investment Funds are likely to represent a higher percentage of the Net Asset Value than would typically be the case for a Fund which invests directly in the relevant underlying investments (and not through other Investment Funds).

As a shareholder of another collective investment scheme, a Fund would bear, along with other shareholders, its pro rata portion of the expenses of the other collective investment scheme, including management and/or other fees (excluding subscription or redemption charges). These fees would be in addition to the management fee and other expenses which a Fund bears directly in connection with its own operations.

Reliance on third party fund management

A Fund investing in other collective investment schemes will not have an active role in the day-to-day management of the collective investment schemes in which a Fund invests. Moreover, a Fund will generally not have the opportunity to evaluate the specific investments made by any underlying collective investment schemes before they are made. Accordingly, the returns of a Fund will primarily depend on the performance of these unrelated underlying fund managers and could be substantially adversely affected by the unfavourable performance.

Potential Conflicts of Interest

The Management Company and the Investment Managers and other companies in the abrdn Group may effect transactions in which they have, directly or indirectly, an interest which may involve a potential conflict with the Management Company's duty to the Fund. More specifically, subject to applicable laws and regulations, any of these companies may undertake sale and purchase transactions between (i) a Fund and (ii) (a) the Investment Managers, (b) a abrdn Group company or (c) other funds or portfolios managed by the Investment Managers or any abrdn Group company; provided such transactions are carried out on an arm's length basis at current market value, and consistent with best execution standards, in the best interests of such Fund and are effected on terms which are not less favourable to the Fund than if the potential conflict had not existed. Such potential conflicting

interests or duties may arise because the Investment Managers or other members in the abrdn Group may have invested directly or indirectly in the Funds. The Investment Managers, under the rules of conduct applicable to it, must try to avoid conflicts of interests and, where they cannot be avoided, ensure that its clients (including the Fund) are fairly treated.

Neither the Management Company nor the Investment Managers nor other companies in the abrdn Group shall be liable to account to the Fund for any profit, commission or remuneration made or received from or by reason of such transactions or any connected transactions nor will the Investment Management fees, unless otherwise provided, be abated.

The Management Company and the Investment Manager or any of their respective connected persons may deal with a Fund as principal provided that such transactions (i) are carried out on an arm's length basis and consistent with the best interests of such Fund and (ii) have been made with the prior written consent of the Depositary. All such transactions will be disclosed in the Aberdeen Standard Liquidity Fund (Lux) annual report.

The Management Company will adopt and implement policies for the prevention of conflict of interests as foreseen by applicable rules and regulations in Luxembourg.

Cross Liability Risk

For the purpose of the relations between the Shareholders of different Funds, each Fund will be deemed to be a separate entity with, but not limited to, its own contributions, capital gains, losses, charges and expenses. Thus, liabilities of an individual Fund which remain undischarged will not attach to Aberdeen Standard Liquidity Fund (Lux) as a whole. However, while Luxembourg law states that, unless otherwise provided for in fund documentation, there is no cross-liability, there can be no assurance that such provisions of Luxembourg law will be recognised and effective in other jurisdictions.

Tax Risk

Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any dividends or other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. Tax law and practice in certain countries may change in the future and it is possible therefore that the current interpretation of the law or understanding of practice might change, or that the law might be changed with retrospective effect. It is therefore possible that Aberdeen Standard Liquidity Fund (Lux) could become subject to additional taxation in such countries that is not anticipated either at the date of the Prospectus or when investments are made, valued or disposed of.

Sovereign Debt Risk

Certain developed and developing countries are especially large debtors to commercial banks and foreign governments. Investment in debt obligations ("Sovereign Debt") issued or guaranteed by such governments or their agencies and instrumentalities ("governmental entities") involves a higher degree of risk. The governmental entity that controls the repayment of Sovereign Debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. A governmental entity's willingness or ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the governmental entity's policy towards the International Monetary Fund and the political constraints to which a governmental entity may be subject. Governmental entities may also be dependent on expected disbursements from foreign governments, multilateral agencies and others abroad to reduce principal and interest arrearage on their debt.

The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on a governmental entity's implementation of economic or fiscal reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability or willingness to service its debt on a timely basis. Consequently, governmental entities may default on their Sovereign Debt. Holders of Sovereign Debt, including a Fund, may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. There is no bankruptcy proceeding by which Sovereign Debt on which a governmental entity has defaulted may be collected in whole or in part.

In light of the fiscal conditions and concerns on sovereign debt of certain European countries, a Fund with exposure to Europe may be subject to an increased amount of volatility, liquidity, price and currency risk associated with investments in Europe. The performance of the relevant Fund could deteriorate should there be any adverse credit events in the European region (e.g. downgrade of the sovereign credit rating of a European country).

Where a Fund may have investment exposure to Europe in the context of the investment objective and strategy that it is pursuing, in light of the fiscal conditions and concerns on sovereign debt of certain European countries, such Fund may be subject to a number of risks arising from a potential crisis in Europe. The risks are present both in respect of direct investment exposure (for example if the Fund holds a security issued by a sovereign issuer and that issuer suffers a downgrade or defaults) and indirect investment exposure, such as the Fund facing an increased amount of volatility, liquidity, price and currency risk associated with investments in Europe.

In a case when any country should cease using the Euro as their local currency or should a collapse of the Eurozone monetary union occur, such countries may revert back to their former (or another) currency, which may lead to additional performance, legal and operational risks to the Fund and may ultimately negatively impact the value of the Fund. The performance and value of the Fund may potentially be adversely affected by any or all of the above factors, or there may be unintended consequences in addition to the above arising from the potential European crisis that adversely affect the performance and value of the Fund.

Brexit

On 29 March 2017 the United Kingdom submitted a notification of its intention to withdraw from the European Union. This means that the United Kingdom will potentially no longer be a Member State of the European Union with effect from 31 October 2019 or a later date. Depending on the outcome of the negotiations with the United Kingdom on the withdrawal agreement, there may be impacts on the structure and the operations of Aberdeen Standard SICAV I and its Funds.

Suspension of Share Class Dealing

Investors are reminded that in certain circumstances their right to redeem from or switch Funds may be suspended (See Appendix E, section 10, "Suspension").

ESG Investment Risk

Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities in which the Fund might otherwise invest. Such securities could be part of the benchmark against which the Fund is managed, or be within the universe of potential investments. This may have a positive or negative impact on performance and may mean that the Fund's performance profile differs to that of funds which are managed against the same benchmark or invest in a similar universe of potential investments but without applying ESG or sustainability criteria.

Furthermore, the lack of common or harmonised definitions and labels regarding ESG and sustainability criteria may result in different approaches by managers when integrating ESG and sustainability criteria into investment decisions. This means that it may be difficult to compare funds with ostensibly similar objectives and that these funds will employ different security selection and exclusion criteria. Consequently, the performance profile of otherwise similar funds may deviate more substantially than might otherwise be expected. Additionally, in the absence of common or harmonised definitions and labels, a degree of subjectivity is required and this will mean that a fund may invest in a security that another manager or an investor would not.

Aberdeen Standard Liquidity Fund (Lux), the Management Company or the Investment Managers do not make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of any ESG assessment of the underlying investments.

DEALING IN SHARES OF ABERDEEN STANDARD LIQUIDITY FUND (LUX)

MARKET TIMING AND LATE TRADING

The Management Company applies a number of policies and procedures designed to protect the Funds from being adversely impacted by the trading strategies of investors including application of a dilution adjustment. Further information about the application of any dilution adjustment can be found in the "Swing Pricing / Dilution Levy" section below.

The Management Company believes that these policies provide significant protection to the Funds from trading which may constitute or lead to market abuse.

Late trading is illegal as it violates the provisions of this Prospectus. The Board of Directors will use its reasonable endeavours to ensure that late trading cannot take place. The effectiveness of these procedures is closely monitored.

SUSPENSION OF DEALINGS

The Board of Directors may suspend dealing in the event that a reliable price cannot be established as at the Valuation Point. Investors are reminded that in certain circumstances the issue, redemption and switching of Shares may be suspended (See Appendix E, section 10. "Suspension").

SWING PRICING/DILUTION LEVY

Please note that there are different dilution policies which apply to different Funds within Aberdeen Standard Liquidity Fund (Lux). In relation to the Short Duration Sterling Fund (which is a non-MMF), a swing pricing policy applies. In relation to those Funds qualifying as LVNAV MMFs, a dilution levy is applied. In relation to those Funds qualifying as VNAV MMFs, no dilution policy applies. Full details are set out below.

- 1. The below swing pricing policy only applies to the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund**

The Board of Directors' current policy is to impose a swing pricing adjustment to the Net Asset Value of each Class of Shares of the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund in the following circumstances:

- if the net redemptions on a particular Dealing Day exceed 5% of the Net Asset Value of the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund or any lower thresholds (i.e. from 0% up to 5%) (the "**Swing Threshold**") as determined by the Board of Directors, the Net Asset Value for issues and redemptions will be adjusted downwards by the applicable swing factor (the "**Swing Factor**"); or

- if net subscriptions on a particular Dealing Day, exceed 5% of the Net Asset Value of the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund or any lower Swing Threshold applicable as determined by the Board of Directors, the Net Asset Value for issues and redemptions will be adjusted upwards by the applicable Swing Factor.

If charged the swing pricing adjustment will be paid into the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund and become part of the assets of the Fund.

As a result of a swing pricing adjustment, the Share price for subscription or redemption of Shares will be higher or lower than the Share price for subscription or redemption of Shares which would otherwise have been applied in the absence of a swing pricing adjustment.

The costs associated with dealing in Shares as a result of Shareholder subscriptions and redemptions may adversely impact the value of a Fund's assets. In order to (i) prevent this adverse effect, called "dilution", on existing or remaining Shareholders and therefore protect their interests, (ii) more equitably allocate the costs associated with investor trading activity to those investors transacting on the relevant trade date; (iii) reduce the impact on the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund's performance of transactions costs and (iv) deter frequent trading activity, the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund may apply swing pricing as part of their valuation policy.

The decision to swing the Net Asset Value is based on the overall net-flows in the Fund, and is not applied per share class. It does therefore not address the specific circumstances of each individual investor transaction.

As dilution is related to the inflows and outflows of money from the Fund it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently it is also not possible to accurately predict how frequently Aberdeen Standard Liquidity Fund (Lux) will need to make such dilution adjustments.

The Management Company retains the right to suspend the application of the swing pricing mechanism on a specific Dealing Day when it considers that its application is not the most appropriate approach when taking into consideration the circumstances surrounding particular investor trading activity.

The swing pricing allows for the Net Asset Value to be adjusted upwards or downwards by a Swing Factor which is not expected to be higher than 0.15% of the Net Asset Value of the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund, if on any Dealing Day, the net subscriptions or net redemptions in Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund exceed a Swing Threshold, as set by the Board of Directors from time to time upon proposal by the Management Company and determined on the basis of elements as disclosed in the abrdn Group's swing pricing policy (e.g. the size of the relevant Fund, the type and liquidity of positions in which the Fund invests, etc.). The maximum Swing Factors noted are expected and the actual Swing Factor will reflect the costs noted below which may adversely impact the value of a Fund's assets. The Management Company may decide to increase the maximum Swing Factor beyond the maximum percentages stated above, where such increase is justified by exceptional market conditions such as volatile markets and taking into account the best interest of Shareholders. Such decisions will be communicated to Shareholders via a publication at www.abrdn.com and notified to the CSSF.

The Swing Factor is determined on the basis of expected costs associated with the Aberdeen Standard Liquidity Fund (Lux) –Short Duration Sterling Fund's portfolio trading activity. Such costs can include, but are not limited to bid/offer spreads, broker fees, transaction charges, tax and duty charges, entry or exit fees, share class specific costs and, registration costs where appropriate, in line with the abrdn Group's swing pricing policy.

The Management Company has implemented a swing pricing policy, which has been approved by the Board of Directors as well as specific operational procedures governing the day-to-day application of the swing pricing.

2. The below dilution levy policy only applies to Funds qualifying as LVNAV MMFs

In respect of **LVNAV MMFs**, the Board of Directors may impose, in certain circumstances, a dilution levy by way of a separate entry or exit charge to Shareholders when they subscribe or redeem Shares in a LVNAV MMF. Such dilution levy is intended to cover an estimate of cost and charges of the relevant Fund so as to best protect the existing or remaining Shareholders. Such dilution levy will only be imposed in the following circumstances:

- if the net redemptions of Shares with respect to a Fund on a particular Dealing Day exceed 5% of the Net Asset Value of the Fund or any lower or higher threshold determined by the Board of Directors (having considered prevailing market conditions);
- if the net subscriptions of Shares with respect to a Fund on a particular Dealing Day exceed 5% of the Net Asset Value of the Fund or any lower or higher threshold determined by the Board of Directors (having considered prevailing market conditions); **or**

- due to such redemptions or subscriptions of Shares, it is anticipated that a Fund will fail to comply with the portfolio requirements for a Short-Term MMF (being that the portfolio shall have a WAM of no more than 60 days and a WAL of no more than 120 days), subject at all times to the provisions of the MMF Regulations.

The rate of the dilution levy will be determined by the Management Company and will be varied from time to time at the Management Company's discretion to reflect the current market conditions, but is not expected to be higher than 0.15% of the Net Asset Value of the Fund. The Management Company may decide to increase the maximum dilution levy, where such increase is justified by exceptional market conditions such as volatile markets and taking into account the best interest of Shareholders. Such decisions will be communicated to Shareholders via a publication at www.abrdn.com and notified to the CSSF.

3. For Funds qualifying as VNAV Funds, there will no swing pricing or dilution levy applied.

PREVENTION OF MONEY LAUNDERING AND FINANCING OF TERRORISM

Pursuant to international rules and Luxembourg laws and regulations comprising, but not limited to, the law of 12 November 2004 on the fight against money laundering and financing of terrorism, as amended, the Grand Ducal Regulation dated 1 February 2010, CSSF Regulation 12-02 of 14 December 2012 and CSSF Circular 13/556 concerning the fight against money laundering and terrorist financing, and any respective amendments or replacements, obligations have been imposed on all professionals of the financial sector to prevent the use of undertakings for collective investment for money laundering and financing of terrorism purposes. As a result of such provisions, the registrar agent of a Luxembourg undertaking for collective investment must ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. The Registrar and Transfer Agent may require subscribers to provide any document it deems necessary to effect such identification. In case of appointment of sub-distributors, the Management Company must enter into a distribution agreement with the sub-distributor delegating the material execution of the Management Company's obligations (including but not limited to the performance of AML obligations in compliance with regulations deemed equivalent to the Luxembourg laws and regulations defined above).

In case of delay or failure by an applicant to provide the documents required or enter into the relevant contractual distribution agreement, the application for subscription will not be accepted and in case of redemption, payment of redemption proceeds delayed. Neither Aberdeen Standard Liquidity Fund (Lux) nor the Registrar and Transfer Agent have any liability for delays or failure to process deals as a result of the applicant providing no or only incomplete documentation.

Shareholders may be requested to provide additional or updated identification documents from time to time pursuant to ongoing client due diligence requirements under relevant laws and regulations.

The right is reserved by Aberdeen Standard Liquidity Fund (Lux) to reject any application for subscription of Shares in whole or in part. If an application is rejected, the application monies or balance thereof will be returned, once sufficient evidence of identification has been produced, at the risk of the applicant and without interest as soon as reasonably practicable, at the cost of the applicant, by bank transfer.

DEALING TIMES

Applications for subscription and instructions for redemptions or switches must be made to the Transfer Agent and delivered to the Transfer Agent's office on any Dealing Day for the Fund or Funds concerned provided they are submitted and received in accordance with the requirements set out below in the sections "Subscriptions for Shares", "Redemptions of Shares" and/or "Exchange (switching) of Shares".

SUBSCRIPTION FOR SHARES

Application for Shares

Investors may apply for either a specific number of Shares or Shares of a specified value on any Dealing Day.

In case investors of MMFs apply for a specified value, subscriptions of Shares must be carried out at a price that is equal to the Constant NAV or the Variable NAV of the relevant Class, upon decision of the Management Company and as follows:

- subscriptions of Shares of VNAV MMFs are carried out at a price that is equal to the Variable NAV of the relevant Class;
- subscriptions of Shares of Public Debt CNAV MMFs are normally carried out at a price that is equal to the Constant NAV of the relevant Class;
- subscription of Shares of LVNAV MMFs are normally carried out at a price that is equal to the Constant NAV of the relevant Class, provided that the Constant NAV of the relevant Fund does not deviate by more than 20 basis points from the Variable NAV of that same Fund. In the event that the deviation exceeds 20 basis points from the Variable NAV of that same Fund, the subsequent subscriptions will be undertaken at a price that is equal to the Variable NAV of the relevant Class.

Please see Appendix D for further details in relation to the calculation of the Net Asset Value.

The Cut-Off Times for applications for Shares are as follows (subject to specific deadlines in case of applications for Shares via fax or telephone as described below):

TAXATION OF SHAREHOLDERS

Automatic Exchange of Information

Following the development by the Organisation for Economic Co-operation and Development ("OECD") of a common reporting standard ("CRS") to achieve a comprehensive and multilateral automatic exchange of information (AEOI) in the future on a global basis, Council Directive 2014/107/EU amending the Council Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (the "Euro-CRS Directive") was adopted on 9 December 2014 in order to implement the CRS among the member States of the European Union.

The Euro-CRS Directive was implemented into Luxembourg law by the law of 18 December 2015 on the automatic exchange of financial account information in the field of taxation ("CRS Law").

The CRS Law requires Luxembourg financial institutions to identify financial asset holders and establish if they are fiscally resident in countries with which Luxembourg has a tax information sharing agreement.

In addition, Luxembourg tax authorities signed the OECD's multilateral competent authority agreement ("Multilateral Agreement") to automatically exchange information under the CRS. The Multilateral Agreement aims to implement the CRS among non EU member states; it requires agreements on a country by country basis.

Aberdeen Standard Liquidity Fund (Lux) and/or the Registrar and Transfer Agent require shareholders to provide information in relation to the identity and tax residence of financial account holders (including certain entities and their controlling persons), account details, reporting entity, account balance/value and income/sale or redemption proceeds to the local tax authorities of the country of tax residency of the foreign investors to the extent that they are tax resident of another EU member State or of a country for which the Multilateral Agreement is in full force and applicable.

The personal data obtained will be used for the purpose of the CRS Law or such other purposes indicated by Aberdeen Standard Liquidity Fund (Lux) in the data protection section of the Prospectus in compliance with Luxembourg data protection law. Information regarding an investor and his/her/its account will be reported to the Luxembourg tax authorities (*Administration des Contributions Directes*), which will thereafter automatically transfer this information to the competent foreign tax authorities on a yearly basis, if such an account is deemed a CRS reportable account under the CRS Law.

Shareholders should consult their professional advisors on the possible tax and other consequences with respect to the implementation of the CRS.

Luxembourg

Subject to the provisions of the 2005 Law, Shareholders are not subject to any capital gains, income, withholding, gift, estate, inheritance or other tax in Luxembourg (except for Shareholders domiciled, resident or having a permanent establishment in Luxembourg).

General

Investors and prospective investors should note that levels and bases of taxation may change and they should ascertain from their professional advisers the potential consequences to them of acquiring, holding, redeeming, transferring, selling or switching any of Aberdeen Standard Liquidity Fund (Lux)'s Shares or receiving dividends therefrom under the relevant laws of each jurisdiction to which they are subject, including the tax consequences and any foreign exchange control requirements. These consequences will vary with the law and practice of a Shareholder's country of citizenship, residence, domicile or incorporation and personal circumstances.

The foregoing statements on taxation are given on the basis of Aberdeen Standard Liquidity Fund (Lux)'s understanding of present legislation and practice in force at the date of this document and is subject to change. The summary does not purport to be a comprehensive description of all Luxembourg tax laws and Luxembourg tax considerations that may be relevant to a decision to invest in, own, hold, or dispose of Shares and is not intended as tax advice to any particular Investor or potential Investor.

Investors should consult their tax adviser about their own position.

COMPLIANCE WITH U.S. REPORTING AND WITHHOLDING REQUIREMENTS

The Foreign Account Tax Compliance provisions of the Hiring Incentives to Restore Employment Act ("FATCA") generally impose a U.S. federal reporting and withholding tax regime with respect to certain U.S. source income (including, among other types of income, dividends and interest) and gross proceeds from the sale or other disposal of property. The rules are designed to require certain U.S. persons' direct and indirect ownership of certain non-U.S. accounts and non-U.S. entities to be reported to the U.S. Internal Revenue Service. The 30% withholding tax regime could apply if there is a failure to provide certain required information.

On 28 March 2014, the Grand-Duchy of Luxembourg entered into a Model 1 Intergovernmental Agreement ("IGA") with the United States of America and a memorandum of understanding in respect thereof. Aberdeen Standard Liquidity Fund (Lux) would hence have to comply with such Luxembourg IGA, as implemented into Luxembourg law by the Law of 24 July 2015 relating to FATCA (the "FATCA Law") in order to comply with the provisions of FATCA rather than directly complying with the US Treasury Regulations implementing FATCA. Under the FATCA Law and the Luxembourg IGA, Aberdeen Standard Liquidity Fund (Lux) may be required to collect information aiming to identify its direct and indirect Shareholders that are Specified US Persons for FATCA purposes ("reportable accounts"). Any such information on reportable accounts provided to Aberdeen Standard Liquidity Fund (Lux) will be shared with the Luxembourg tax authorities which will exchange that information on an automatic basis with the Government of the United States of America pursuant to Article 28 of the convention between the Government of the United States of America and the Government of the Grand-Duchy of Luxembourg for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes in Income and Capital, entered into in Luxembourg on 3 April 1996. Aberdeen Standard Liquidity Fund (Lux) intends to comply with the provisions of the FATCA Law and the Luxembourg IGA to be deemed compliant with FATCA and will thus not be subject to the 30% withholding tax with respect to its share of any such payments attributable to actual and deemed U.S. investments of Aberdeen Standard Liquidity Fund (Lux). Aberdeen Standard Liquidity Fund (Lux) will continually assess the extent of the requirements that FATCA and notably the FATCA Law place upon it.

To ensure Aberdeen Standard Liquidity Fund (Lux)'s compliance with FATCA, the FATCA Law and the Luxembourg IGA in accordance with the foregoing, Aberdeen Standard Liquidity Fund (Lux) or the Management Company, in its capacity as the Aberdeen Standard Liquidity Fund (Lux)'s management company or the Administrator, may:

- a) request information or documentation, including self-certification forms, a Global Intermediary Identification Number, if applicable, or any other valid evidence of a shareholder's FATCA registration with the IRS or a corresponding exemption, in order to ascertain such shareholder's FATCA status;
- b) report information concerning a shareholder and his account holding in Aberdeen Standard Liquidity Fund (Lux) to the Luxembourg tax authorities if such account is deemed a US reportable account under the FATCA Law and the Luxembourg IGA;
- c) deduct applicable US withholding taxes from certain payments made to a Shareholder by or on behalf of Aberdeen Standard Liquidity Fund (Lux) in accordance with FATCA, the FATCA Law and the Luxembourg IGA; and
- d) divulge any such personal information to any immediate payor of certain U.S. source income as may be required for withholding and reporting to occur with respect to the payment of such income.

Any withholding obligation would be carried out in accordance with applicable laws and regulations and the Management Company will act in good faith and on reasonable grounds in relation thereto. Although Aberdeen Standard Liquidity Fund (Lux) will attempt to satisfy any obligations imposed on it to avoid the imposition of FATCA withholding tax, no assurance can be given that Aberdeen Standard Liquidity Fund (Lux) will be able to satisfy these obligations. If Aberdeen Standard Liquidity Fund (Lux) becomes subject to a withholding tax as a result of the FATCA regime, the value of the Shares held by the Shareholders may suffer material losses.

The foregoing statements on taxation are given on the basis of Aberdeen Standard Liquidity Fund (Lux)'s understanding of present legislation and practice in force at the date of this document and is subject to change.

EU'S SUSTAINABLE FINANCE DISCLOSURE REGULATION – SUSTAINABILITY RISK INTEGRATION

Investment Philosophy and Process

Sustainability Risk Integration

abrdrn, through its Management Company and Investment Managers, integrate sustainability risks and opportunities into its research, analysis and investment decision-making processes for the Funds. abrdrn believes that the consideration of sustainability risks and opportunities can have a material impact on long-term returns for investors.

All Funds are managed using an investment process integrating environmental, social and governance ("ESG") factors but unless specifically noted do not promote environmental or social characteristics or have specific sustainable investment objectives. For Funds that do not have sustainability-related characteristics or that do not pursue sustainable investment objectives, this means that whilst sustainability risk factors and risks are considered, they may or may not impact portfolio construction.

abrdrn's sustainability risk integration requires, in addition to its inclusion in the investment decision making process, appropriate monitoring of sustainability considerations in risk management and portfolio monitoring. Where the Management Company believes it can influence or gain insight, the Management Company actively engages with the companies and assets in which it invests. The Management Company believes this will create long-term value, including in relation to ESG practice. Where the Management Company has rights, the Management Company also votes at annual general meetings of target companies to drive change. abrdrn also engages with policymakers on sustainability risk and stewardship matters.

Combining the integration of sustainability risks and opportunities with broader monitoring and engagement activities may affect the value of investments and therefore returns.

Further information on abrdrn's approach on sustainable investing and sustainability risk integration are available on the website at www.abrdrn.com under "Sustainable Investing".

Sustainability-related disclosure in line with EU SFDR

The European Union Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (“**SFDR**”) is designed to enable investors to better understand sustainability-related investment strategies, notably sustainability risk integration, promotion of environmental or social characteristics and pursuit of a sustainable investment objective.

As part of this enhanced transparency, investment funds are subject to disclosure requirements depending on the degree of consideration given to sustainability and binding investment criteria. The disclosure requirements are defined in the following SFDR Articles and further specified by SFDR Delegated Regulation (*Commission Delegated Regulation (EU) 2022/1288*).

- **Article 6** – Funds which integrate sustainability risks into their investment process but do not give binding commitments, do not promote environmental and/or social characteristics and do not have sustainable investments as their objective.
- **Article 8**- Funds that promote social and/or environmental characteristics, invest in companies that follow good governance, give binding commitments but do not have a sustainable investment objective.
- **Article 9** - Funds that have sustainable investment or carbon reduction as their objective and give binding commitments.

The SFDR Article to which each Fund is subject is set out in its investment objective and policy.

Principle adverse impact (“PAI”) consideration

Under SFDR all Funds have to indicate whether they consider PAIs on sustainability factors and if so, how this is applied. PAI indicators are metrics that measure the negative effects on environmental and social matters.

Article 6 Funds do not commit in any binding way to consider PAIs in the investment process, because the Funds do not commit to achieving a sustainable outcome nor to reducing negative impacts on ESG matters. However, Article 6 Funds do consider and integrate sustainability risks into their investment process (as set out above). Principle adverse impact indicators, as provided by Commission Delegated Regulation (EU) 2022/1288, may be considered as part of this risk assessment. **EU Taxonomy (Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment)**

The EU Taxonomy regulation provides a methodology to identify whether economic activities can be considered environmentally sustainable (“**Taxonomy-aligned**”) or not.

The investments underlying an Article 6 Fund do not take into account the EU criteria for environmentally sustainable economic activities.

- b) Moreover, where Aberdeen Standard Liquidity Fund (Lux) holds on behalf of a Non-MMF investments in Transferable Securities and Money Market Instruments of issuing bodies which individually exceed 5% of the net assets of such Non-MMF, the total of all such investments must not account for more than 40% of the total net assets of such Non-MMF.

This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision.

Notwithstanding the individual limits laid down in paragraph a), each Non-MMF may not combine:

In particular, sums deriving from the issue of these bonds must be invested in conformity with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in case of bankruptcy of the issuer, would be used on a priority basis for the repayment of principal and payment of the accrued interest.

Companies which are part of the same group for the purposes of the establishment of consolidated accounts, as defined in accordance with directive 83/349/EEC or in accordance with recognised international accounting rules, are regarded as a single body for the purpose of calculating the limits contained in this paragraph III).

Non-MMFs may cumulatively invest up to 20% of the net assets of a Fund in Transferable Securities and Money Market Instruments within the same group.

- f) Notwithstanding the above provisions, Non-MMFs are authorised to invest up to 100% of the net assets of any Fund, in accordance with the principle of risk spreading, in Transferable Securities and Money Market Instruments issued or guaranteed by a Member State, by its local authorities or agencies, by a State accepted by the Luxembourg supervisory

- V. a) Without prejudice to the limits laid down in paragraph VI., the limits provided in paragraph IV. are raised to a maximum of 20% for investments in shares and/or bonds issued by the same issuing body if the aim of the investment policy of a Fund is to replicate the composition of a certain stock or bond index which is sufficiently diversified, represents an adequate benchmark for the market to which it refers, is published in an appropriate manner and disclosed in the relevant Fund's investment policy.
- b) The limit laid down in paragraph a) is raised to 35% where this proves to be justified by exceptional market conditions, in particular on Regulated Markets where certain Transferable Securities or Money Market Instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.
- VI. a) Non-MMFs may not acquire shares carrying voting rights which should enable it to exercise significant influence over the management of an issuing body.
- b) Non-MMFs may acquire no more than:
- 10% of the non-voting shares of the same issuer;
 - 10% of the debt securities of the same issuer;
 - 10% of the Money Market Instruments of the same issuer.
- c) These limits under second and third indents may be disregarded at the time of acquisition, if at that time the gross amount of debt securities or of the Money Market Instruments or the net amount of the instruments in issue cannot be calculated.

The provisions of paragraph V. shall not be applicable to Transferable Securities and Money Market Instruments issued or guaranteed by a Member State or its local authorities or by any other Eligible State, or issued by public international bodies of which one or more Member States are members.

These provisions are also waived as regards shares held by Non-MMFs in the capital of a company incorporated in a non-Member State of the EU which invests its assets mainly in the securities of issuing bodies having their registered office in that State, where under the legislation of that State, such a holding represents the only way in which Non-MMFs can invest in the securities of issuing bodies of that State provided that the investment policy of the company from the non-Member State of the EU complies with the limits laid down in paragraphs IV., VI. and VII.

- VII. a) A Fund may not invest more than 10% of its Net Asset Value in shares or units of the UCITS and/or Other UCIs referred to in paragraph (I) c), except if otherwise disclosed in the Prospectus.
- b) The underlying investments held by the UCITS or Other UCIs in which Non-MMFs invest do not have to be considered for the purpose of the investment restrictions set forth under IV. above.
- c) When Non-MMFs invests in the units of UCITS and/or Other UCIs that are managed directly or by delegation by the Management Company or by any other company with which the Management Company is linked by common management or control, or by a substantial direct or indirect holding, the Management Company or other company cannot charge subscription or redemption fees to the Fund on account of its investment in the units of such UCITS and/or Other UCIs.

In respect of a Fund's investments in such UCITS and Other UCIs, the total management fee (excluding any performance fee, if any) charged both to such Fund and the UCITS and/or Other UCIs concerned shall not exceed 4% of the relevant assets. Aberdeen Standard Liquidity Fund (Lux) will indicate in its Annual Report the total management fees charged both to the relevant Fund and to the UCITS and Other UCIs in which such Fund has invested during the relevant period.

- d) Non-MMFs may acquire no more than 25% of the units of the same UCITS or Other UCI. This limit may be disregarded at the time of acquisition if at that time the gross amount of the units in issue cannot be calculated. For the purpose of the application of this investment limit, each compartment of a UCITS or Other UCI with multiple compartments is to be considered as a separate UCITS or Other UCI.
- VIII. a) Under the conditions and within the limits laid down by the Law, Aberdeen Standard Liquidity Fund (Lux) may, to the widest extent permitted by the Luxembourg laws and regulations (i) create any Non-MMF qualifying either as a feeder UCITS (a "Feeder UCITS") or as a master UCITS (a "Master UCITS"), (ii) convert any existing Fund into a Feeder UCITS, or (iii) change the Master UCITS of any of its Feeder UCITS.
- b) A Feeder UCITS shall invest at least 85% of its assets in the units of another Master UCITS.

A Feeder UCITS may hold up to 15% of its assets in one or more of the following:

- ancillary liquid assets in accordance with paragraph III;

- c) For the purposes of compliance with paragraph X., the Feeder UCITS shall calculate its global exposure related to financial derivative instruments by combining its own direct exposure under the second sub-paragraph of paragraph X.) with either:
- the Master UCITS actual exposure to financial derivative instruments in proportion to the Feeder UCITS investment into the Master UCITS; or
 - the Master UCITS potential maximum global exposure to financial derivative instruments provided for in the Master UCITS management regulations or instruments of incorporation in proportion to the Feeder UCITS investment into the Master UCITS.
- d) As of the date of this Prospectus, none of the Funds qualify as a Feeder UCITS.

 - (b) An MMF may not invest more than 10% of its assets in deposits made with the same credit institution, unless the structure of the Luxembourg banking sector is such that there are insufficient viable credit institutions to meet that diversification requirement and it is not economically feasible for the relevant MMF to make deposits in another Member State, in which case up to 15% of its assets may be deposited with the same credit institution.
- (2) By way of derogation from paragraph 1) a), a VNAV MMF (either Short-Term or Standard) may invest up to 10% of its assets in Money Market Instruments, securitisations and ABCPs issued by the same body provided that the total value of such Money Market Instruments, securitisations and ABCPs held by the relevant MMF in each issuing body in which it invests more than 5% of its assets does not exceed 40% of the value of its assets.
- (3) (a) The aggregate of all of a MMF's exposures to securitisations and ABCPs shall not exceed 15% of its assets.

- (b) As from the date of application of the delegated act referred to in Article 11(4) of the MMF Regulation, the aggregate of all of a MMF's exposures to securitisations and ABCPs shall not exceed 20% of its assets, whereby up to 15% of that MMF's assets may be invested in securitisations and ABCPs that do not comply with the criteria for the identification of STS securitisations and ABCPs.

 - investments in Money Market Instruments, securitisations and ABCPs issued by that body, and/or
 - deposits made with that body, and/or
 - OTC derivatives instruments giving counterparty risk exposure to that body.
 - (7) The limit of 15% laid down under paragraph (6) above would be increased to a maximum of 20% in Money Market Instruments, deposits and OTC financial derivative instruments of that single body to the extent the structure of the Luxembourg financial market would be such that there are insufficient viable financial institutions to meet that diversification requirement and it is not economically feasible for the Fund to use financial institutions in other EU Member States.
 - (8) Notwithstanding the provisions outlined under paragraph 1) a), each Money Market Fund is authorised to invest up to 100% of the assets of any Fund, in accordance with the principle of risk spreading, in Money Market Instruments issued or guaranteed separately or jointly by the EU, the national, regional and local administrations of the Member States or their central banks, the European Central Bank, the European Investment Bank, the European Investment Fund, the European Stability Mechanism, the European Financial Stability Facility, a central authority or central bank of a member state of the OECD, of the Group of Twenty or Singapore, the International Monetary Fund, the International Bank for Reconstruction and Development, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Bank for International Settlements, or any other relevant international financial institution or organisation to which one or more Member States belong, provided that such Fund must hold Money Market Instruments from at least six different issues and securities from one issue do not account for more than 30% of the total assets of such Fund.

In particular, sums deriving from the issue of these bonds must be invested in accordance with the law, in assets which, during the whole period of validity of the bonds, are capable of covering claims attached to the bonds and which, in case of failure of the issuer, would be used on a priority basis for the repayment of the principal and payment of accrued interest.
 - (10) If an MMF invests more than 5% of its assets in bonds referred to in the above paragraph and issued by a single issuer, the total value of such investments may not exceed 40% of the value of the assets of the Fund.
 - (11) Notwithstanding the individual limits laid down in under paragraph 1, the MMF may invest no more than 20% of its assets in bonds issued by a single credit institution where the requirements set out in point (f) of Article 10(1) or point (c) of Article 11(1) of Delegated Regulation (EU) 2015/61 are met, including any possible investment in assets referred to in 9 above.
 - (12) Where an MMF invests more than 5% of its assets in bonds referred to in the first subparagraph issued by a single issuer, the total value of those investments shall not exceed 60% of the value of the assets of the relevant MMF, including any possible investment in assets referred to under paragraph 11 above, respecting the limits set out therein.
 - (13) Companies which are part of the same group for the purposes of the establishment of consolidated accounts, as defined in accordance with directive 2013/34/EU or in accordance with recognised international accounting rules, are regarded as a single body for the purpose of calculating the limits contained in paragraph 1 to 7 above.

VI. Concentration rules

Aberdeen Standard Liquidity Fund (Lux) will in addition comply with such further restrictions as may be required by the regulatory authorities in any country in which the Shares are marketed.

INVESTMENT TECHNIQUES AND INSTRUMENTS AND USE OF FINANCIAL DERIVATIVE INSTRUMENTS

Techniques and Instruments

To the maximum extent allowed by, and within the limits set forth in, the Law and any present or future related Luxembourg laws or implementing regulations, circulars and CSSF's positions, in particular the provisions of (i) article 11 of the Grand-Ducal regulation of 8 February 2008 relating to certain definitions of the law of 20 December 2002 on undertakings for collective investments⁵; (ii) CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investments when they use certain techniques and instruments relating to transferable securities and money market instruments; (iii) CSSF Circular 14/592 relating to ESMA Guidelines on ETFs and other UCITS; and (iv) the MMF Regulation (as applicable) (as these regulations may be amended or replaced from time to time), each Fund of Aberdeen Standard Liquidity Fund (Lux) may for the purpose of generating additional capital or income, or for reducing costs or risks enter, either as purchaser or seller, into optional as well as non-optional Reverse Repurchase Agreements.

Reverse Repurchase Agreements

In order to generate additional revenue for Funds, Aberdeen Standard Liquidity Fund (Lux) intends to participate in Reverse Repurchase Agreements, on a temporary basis and depending on market conditions, subject to complying with the provisions set forth, *inter alia*, in the MMF Regulation (as applicable), in CSSF Circular 08/356 and CSSF Circular 14/592 as the same may be amended or replaced. Under no circumstances shall these operations cause a Fund to diverge from its investment objective as laid down in the Prospectus or result in additional risk higher than its profile as described in the Prospectus.

Reverse Repurchase Agreements, also known as "reverse repos", are financial instruments used in securities and money markets. A Fund provides cash to a counterparty which sells securities and agrees to repurchase those securities from the Fund at a future date. The repurchase price should be greater than the original sale price, the difference effectively representing interest, sometimes called the "repo rate". The securities sold by the counterparty are often referred to as "collateral". Reverse Repurchase Agreements are typically instruments of a short-term nature.

Each Fund may invest in securities subject to Reverse Repurchase Agreements concluded with high quality financial institutions specialised in this type of transactions. Under such agreements, the seller agrees with the buyer, upon entering into the contract, to repurchase the securities at a mutually agreed upon time and price, thereby determining the repo rate during the time of the agreement. This investment technique permits the buyer to earn a fixed rate of return independent from market fluctuations during such period. During the lifetime of a Reverse Repurchase Agreements, the buyer may not sell the securities which are the subject of the agreement either before the repurchase of the securities by the counterparty has been carried out or before the repurchase period has expired.

Aberdeen Standard Liquidity Fund (Lux) may enter into Reverse Repurchase Agreements that consist of forward transactions at the maturity of which the counterparty (seller) has the obligation to repurchase the asset sold and Aberdeen Standard Liquidity Fund (Lux) (buyer) the obligation to return the assets purchased under the transactions.

Aberdeen Standard Liquidity Fund (Lux) will ensure to maintain the importance of purchased securities subject to a repurchase obligation at a level such that it is able, at all times to meet redemption requests from its Shareholders.

100% of the gross revenues generated by entering into Reverse Repurchase Agreements on the basis of arm's length transactions will be returned to Aberdeen Standard Liquidity Fund (Lux).

The assets which are subject to Reverse Repurchase Agreements may be held by a third party custodian which is subject to prudential supervision.

The counterparties to the transactions described above must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by Community law and specialised in this type of transaction. While there are no predetermined legal status or geographical criteria applied in the selection of the counterparties, these elements are typically taken into account in the selection process. The counterparties to such transactions will be organisations referred to under article 2 (6) of the Delegated Regulation 2018/990. Aberdeen Standard Liquidity Fund (Lux) will seek to appoint counterparties from a list of approved counterparties who have undergone a credit risk analysis by the relevant Investment Manager taking into account CSSF rules on counterparty selection. A counterparty may be a related party to the Investment Manager.

⁵ The law of 20 December 2002 on undertakings for collective investments has been repealed and replaced by the Law.

Assets received from counterparties in Reverse Repurchase Agreements constitute collateral.

Collateral will be acceptable if it is in the form of high quality government bonds which have received a favourable credit quality assessment pursuant to the Management Company's ICAP. Such limitation on accepting government bonds only shall not apply to Non-MMFs which can accept non-government high quality bonds as well.

Collateral may be offset against gross counterparty exposure. In offsetting collateral its value is reduced by a percentage which provides, inter alia, for short term fluctuations in the value of the exposure and of the collateral. Collateral levels are maintained to ensure that net counterparty exposure does not exceed the limits per counterparty as set out in this Appendix A "Investment Restrictions, Investment Techniques and Risk Management Process". Collateral received is not sold, reinvested or pledged.

Given the high quality nature of the counterparties to the Reverse Repurchase Agreements, the haircut for the high quality government bonds received is 0%.

Collateral will be valued on a daily basis, using available market prices and taking into account appropriate discounts (if any) determined based on the haircut policy. The collateral will be marked to market daily and may be subject to daily variation margin requirements. Haircuts can be internally reviewed and modified as per a risk based approach.

Where there is a title transfer, collateral received will be held by the Depository (or sub-custodian on the behalf of the Depository) on behalf of the relevant Fund in accordance with the Depository's safekeeping duties under the Depository Agreement. For other types of collateral arrangement, the collateral can be held by a third party custodian which is subject to prudential supervision and which should be unrelated to the provider of the collateral.

Only the following Funds may use Reverse Repurchase Agreements. If any other Fund uses securities financing transactions, the following table will be updated accordingly:

Name of Fund	Expected proportion of assets under management*	Maximum proportion of assets under management
Aberdeen Standard Liquidity Fund (Lux) - Sterling Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux)- Euro Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux)- Canadian Dollar Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux) - Seabury Euro Liquidity 1 Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux) - Seabury Sterling Liquidity 1 Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux)- Seabury Sterling Liquidity 2 Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux) - Seabury Sterling Liquidity 3 Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux) - US Dollar Fund	0-20 %	50%
Aberdeen Standard Liquidity Fund (Lux) - Short Duration Sterling Fund	0-20 %	50%

*The expected usage may, on a temporary basis, exceed this range for relevant Funds. The proportion of a Fund's net assets subject to Reverse Repurchase Agreements may vary within the limits specified in the table above. Such variations may be dependent on factors such as, but not limited to, total Fund's net assets, market depths and seasonal trends. During periods of high collateral availability and/or limited unsecured issuance, the proportion of a Fund's net assets subject to Reverse Repurchase Agreements may approach the maximum percentage, while there may also be periods in which there is little or no offer from the market, in which case this proportion could be 0 percent.

Financial Derivative Instruments

Each Fund of Aberdeen Standard Liquidity Fund (Lux) may, subject to the conditions and within the limits laid down in the Law, in the MMF Regulation (as applicable) and any present or future related Luxembourg laws or implementing regulations, circulars and CSSF positions (the "Regulations"), invest in financial derivative instruments for the purpose of hedging the interest rate or exchange rate risks inherent in other investments. Subject to the provisions of the applicable Regulations, financial derivative instruments include, but are not limited to, futures, options, swaps (including, but not limited to, credit and credit-default, interest rate and inflation swaps), and forward foreign currency contracts. New financial derivative instruments may be developed which may be suitable for use by Aberdeen Standard Liquidity Fund (Lux) may employ such financial derivative instruments in accordance with the Regulations and collateral received will be according to its collateral policy.

The counterparties to such transactions must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by Community law and specialised in this type of transaction. In respect of OTC Financial Derivative

Transactions, Aberdeen Standard Liquidity Fund (Lux) will receive collateral as specified in each of its ISDA Agreement. Such collateral will be in the form of cash. Collateral in the form of cash deposits in a currency other than the currency of exposure is also subject to a discount of 10%.

As the case may be, cash collateral received by each Fund in relation to Financial Derivative Instruments may be reinvested in a manner consistent with the investment objectives of such Fund in (a) shares or units issued by short-term money market undertakings for collective investment calculating a daily net asset value and being assigned a rating of AAA or its equivalent, (b) short-term bank deposits, (c) short-term bonds issued or guaranteed by an EU member state, Switzerland, Canada, Japan or the United States or by their local authorities or by supranational institutions and undertakings with EU, regional or world-wide scope, and (d) Reverse Repurchase Agreements according to the provisions described under section XII. Article 43. J) of ESMA Guidelines on ETFs and other UCITS issues released by the CSSF under CSSF Circular 14/592. Such reinvestment will be taken into account for the calculation of each concerned Fund's global exposure, in particular if it creates a leverage effect.

Use of Total Return Swaps

A total return swap is an agreement in which one party makes payments based on the total return of an underlying asset, which includes both the income it generates and any capital gains or losses, in exchange for payments based on an interest rate, either fixed or variable, from the other party.

It is not the intention of Aberdeen Standard Liquidity Fund (Lux) to enter into total return swaps transactions. If a Fund was to use total return swaps in the future, the Prospectus will be modified accordingly.

Transparency of securities financing transactions and of reuse (SFTR)

It is not the intention of Aberdeen Standard Liquidity Fund (Lux) to enter into (i) total return swaps; and/or (ii) the securities financing transactions pertaining to securities lending or borrowing and/or buy-sell back/sell-buy back transactions, as defined in the Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) 648/2012 (the "SFT Regulation"). If a Fund was to use such securities financing transactions and total return swaps in the future, the Prospectus will be modified accordingly.

RISK MANAGEMENT PROCESS

Aberdeen Standard Liquidity Fund (Lux) and the Management Company will employ a risk-management process which enables them to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of each Fund. Aberdeen Standard Liquidity Fund (Lux) and the Management Company will employ, if applicable, a process for accurate and independent assessment of the value of any OTC financial derivative instrument.

The risk measurement and monitoring of the Funds will be carried out using a commitment approach.

Upon request of a Shareholder, Aberdeen Standard Liquidity Fund (Lux) and the Management Company will provide supplementary information relating to the quantitative limits that apply in the risk management of each Fund, and to the recent evolution of the risks and yields of the main categories of instruments.

Appendix B – Liquidity Risk and Portfolio Risk Limitation Rules applicable to MMFs

I. Liquidity Rules applicable to all Short-Term MMFs

Any MMF qualifying as Short-Term MMF shall comply on an ongoing basis with all of the following portfolio requirements:

- (a) the MMF's portfolio shall have a WAM of no more than 60 days; and
- (b) the MMF's portfolio shall have a WAL of no more than 120 days, subject to the provision of the MMF Regulation.

For the purposes of point (b) above, when calculating the WAL for securities, including structured financial instruments, a Short-Term MMF shall base the maturity calculation on the residual maturity until the legal redemption of the instruments. However, in the event that a financial instrument embeds a put option, a Short-Term MMF may base the maturity calculation on the exercise date of the put option instead of the residual maturity, but only if all of the following conditions are fulfilled at all times:

- i. the put option is able to be freely exercised by the short-term MMF at its exercise date;
- ii. the strike price of the put option remains close to the expected value of the instrument at the exercise date; and
- iii. the investment strategy of the Short-Term MMF implies that there is a high probability that the option will be exercised at the exercise date.

By way of derogation from point (b) above, when calculating the WAL for securitisations and ABCPs, a Short-Term MMF may instead, in the case of amortising instruments, base the maturity calculation on one of the following:

- i. the contractual amortisation profile of such instruments; or
- ii. the amortisation profile of the underlying assets from which the cash-flows for the redemption of such instruments result.

If the limits referred to in this Appendix are exceeded for reasons beyond the control of an MMF, or as a result of the exercise of subscription or redemption rights, that MMF shall adopt as a priority objective the correction of that situation, taking due account of the interests of its unit holders or shareholders.

II. Specific rules applicable to Short-Term MMFs

A. Rules applicable for Short-Term MMF qualifying as LVNAV MMFs or Public debt CNAV MMFs

Any MMF qualifying as LVNAV MMFs or Public Debt CNAV MMFs, shall comply on an ongoing basis with all of the following portfolio requirements:

- At least 10% of the MMF's assets are to be comprised of daily maturing assets, Reverse Repurchase Agreements which are able to be terminated by giving prior notice of one working day or cash which is able to be withdrawn by giving prior notice of one working day; and
- At least 30% of the MMF's assets are to be comprised of weekly maturing assets, Reverse Repurchase Agreements which are able to be terminated by giving prior notice of five working days or cash which is able to be withdrawn by giving prior notice of five working days.

For the purpose of the calculation referred to in the previous paragraph, assets referred to under section V. 8) of part II of Appendix A above which are highly liquid and can be redeemed and settled within one working day and have a residual maturity of up to 190 days may also be included within the weekly maturing assets of a LVNAV MMF and public debt CNAV MMF, up to a limit of 17.5% of its assets.

If the proportion of weekly maturing assets falls below 30% of the total assets of the relevant Short-Term MMF and if the net daily redemptions on a single working day exceed 10% of its total assets, the Management Company will immediately inform the Board of Directors of the Aberdeen Standard Liquidity Fund (Lux) and a documented assessment of the situation to determine the appropriate course of action having regard to the interests of the Shareholders of the relevant MMF will be undertaken. A decision will be taken on one or more of the following measures must be applied:

- (a) liquidity fees on redemptions that adequately reflect the cost of achieving liquidity and ensure that Shareholders who remain in the relevant MMF are not unfairly disadvantaged when other Shareholders redeem their Shares during the period;
- (b) redemption gates that limit the Shares to be redeemed on any one Valuation Day to a maximum of 10% of the Shares in the MMF for any period up to 15 Business Days;
- (c) suspension of redemptions for any period up to 15 Business Days; and/or

- (d) take no immediate action other than adopt as a priority objective the correction of that situation taking due account of the interest of the Shareholders.

Similarly, if the proportion of weekly maturing assets falls below 10% of the total assets of the relevant MMF, the Management Company will immediately inform the Board of Directors and a documented assessment of the situation to determine the appropriate course of action having regard to the interests of the Shareholders of the relevant MMF will be undertaken. A decision will be taken to apply cumulatively or alternatively the measures disclosed under (a), (b) and (c) above.

When, within a period of 90 days, the total duration of the suspensions exceeds 15 Business Days, the relevant MMF shall automatically cease to be a Public Debt CNAV MMF or a LVNAV MMF as the case may be, in which case Shareholders of that MMF will be informed immediately in writing in a clear and comprehensible way.

The Management Company, with the support of the Investment Manager, has established liquidity management procedures for ensuring compliance with the weekly liquidity thresholds provided for in the MMF Regulation for Short-Term MMFs qualifying as LVNAV MMFs or Public debt CNAV MMFs. Both qualitative and quantitative measures will be implemented. The following processes are in place:

- (i) LVNAV MMFs and Public Debt CNAV MMFs are reviewed individually and on an ongoing basis (with the assistance of the Depositary) with respect to liquidity management, to ensure ongoing compliance with the above minimum levels of daily and weekly liquidity. Such a procedure aims at preventing any mismatch between the level of liquidity of the relevant Fund's assets and the levels of redemptions requested by Shareholders. Reconciliation is carried out between the daily liquidity of the relevant Fund and the Shareholder concentration levels which highlights potential issues;
- (ii) Shareholder's expected behaviour in different flow scenarios is analysed by looking at historical flows and reviewing Shareholder's expected behaviour in order to assess the liquidity requirements in stressed situations. Subscriptions and redemptions over a three year period are analysed in order to extrapolate likely behaviour and to identify patterns in behaviour. Analysis is also undertaken to establish the degree of correlation/close links between different Shareholders by looking at the capital history of all Shareholders in order to compute the correlation of the investment behaviour between the different Shareholders; and
- (iii) assets are categorised depending on various factors (including their degree of liquidity and their maturity) into the following categories: a) cash; (b) Money Market Instruments; and (c) others (such as Asset Backed Securities, bonds, etc.). Strict internal limits and controls are in place in relation to each category of assets; and
- (iv) an Investor Protection Committee is in place which receives and monitors information relating to the above. It meets on a monthly basis or more frequently, if required.

In case the liquidity thresholds fall below the limits above, the Board may decide to apply the liquidity measures listed (a), (b) and (c) above.

B. Rules applicable for MMF qualifying as VNAV MMFs

Any MMF qualifying as VNAV MMF shall comply on an ongoing basis with all of the following portfolio requirements:

- At least 7.5% of the MMF's assets are to be comprised of daily maturing assets, Reverse Repurchase Agreements which are able to be terminated by giving prior notice of one working day, or cash which is able to be withdrawn by giving prior notice of one working day; and
- At least 15% of the MMF's assets are to be comprised of weekly maturing assets, Reverse Repurchase Agreements which are able to be terminated by giving prior notice of five working days, or cash which is able to be withdrawn by giving prior notice of five working days.

For the purpose of the calculation in the previous subparagraph, Money Market Instruments or units or shares of other MMFs may be included within the weekly maturing assets of a Short-Term VNAV MMF up to a limit of 7.5% of its assets provided they are able to be redeemed and settled within five working days.

III. Specific rules applicable to Standard VNAV MMFs

Any MMF qualifying as Standard MMFs shall comply on an ongoing basis with all of the following requirements:

- (a) the Standard MMF's portfolio is to have at all times a WAM of no more than six months;
- (b) the Standard MMF's portfolio is to have at all times a WAL of no more than 12 months;
- (c) at least 7.5% of the Standard MMF's assets are to be comprised of daily maturing assets, Reverse Repurchase Agreements which can be terminated by giving prior notice of one working day or cash which can be withdrawn by giving prior notice of one working day; and

- (d) at least 15% of the Standard MMF's assets are to be comprised of weekly maturing assets, Reverse Repurchase Agreements which can be terminated by giving prior notice of five working days or cash which can be withdrawn by giving prior notice of five working days.

For the purpose of the calculation in the previous subparagraph, Money Market Instruments or units or shares of other MMFs may be included within the weekly maturing assets up to 7.5% of its assets provided they are able to be redeemed and settled within five working days.

For the purposes of point (b) above, when calculating the WAL for securities, including structured financial instruments, each MMF qualifying as a Standard MMF shall base the maturity calculation on the residual maturity until the legal redemption of the instruments. However, in the event that a financial instrument embeds a put option, a Standard MMF may base the maturity calculation on the exercise date of the put option instead of the residual maturity, but only if all of the following conditions are fulfilled at all times:

- i. the put option is able to be freely exercised by the Standard MMF at its exercise date;
- ii. the strike price of the put option remains close to the expected value of the instrument at the exercise date; and
- iii. the investment strategy of the Standard MMF implies that there is a high probability that the option will be exercised at the exercise date.

By way of derogation from point (b) above, when calculating the WAL for securitisations and ABCPs, a Standard MMF may instead, in the case of amortising instruments, base the maturity calculation on one of the following:

- i. the contractual amortisation profile of such instruments; or
- ii. the amortisation profile of the underlying assets from which the cash-flows for the redemption of such instruments result.

If the limits referred to in this Appendix are exceeded for reasons beyond the control of a Standard MMF, or as a result of the exercise of subscription or redemption rights, that MMF shall adopt as a priority objective the correction of that situation, taking due account of the interests of its unit holders or shareholders.

Appendix C – Internal Credit Quality Assessment Procedure

The Management Company, with the support of the Investment Manager, has established various methods and procedures for assessing the credit quality of money market instruments, securitisations and ABCPs, taking account the issuer of the instrument and the characteristics of the instrument itself (the "**Credit Quality Assessment**"). The Management Company is in charge of the overall supervision and ongoing monitoring of the Credit Quality Assessment. The Credit Quality Assessment complies with articles 19 to 23 of Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on Money Market Funds (the "**Regulation**") as amended and supplemented by the Commission Delegated Regulation (EU) 2018/990 of 10 April 2018 *inter alia* with regards to credit quality assessment methodologies (the "**Delegated Regulation**").

An overview of the Credit Quality Assessment is set out below. The Credit Quality Assessment is used to determine whether both the credit worthiness of the issuer and the credit quality of a money market instrument, securitisation or ABCP receives a favourable assessment.

Overview of Credit Quality Assessment

The Credit Quality Assessment is independently performed by the Investment Manager's credit research analyst team and overseen by the Head of Research (Financials) and the Head of Research (Non-Financials) of the Investment Manager (please note that such individuals are not performing or responsible for portfolio management).

For Money Market Instruments (CPs and CDs), the Credit Quality Assessment comprises the following:

- An in-depth credit quality assessment of both the issuer and the instrument at least once year (and if there is material change) which, as a minimum, involves the following steps:
 1. Detailed analysis of the type of instrument proposed for investment. This includes looking at:
 - o the instrument within the creditor hierarchy;
 - o consideration of secure/unsecure obligation;
 - o the structuring of the instrument; and
 - o the liquidity of the instrument (for example, daily trading volumes, amount of instrument outstanding, attitude to provision of liquidity within instruments (e.g. buybacks) and tenor of instrument).
 2. A fundamental review of the issuer (which is a two-step research process being quantitative and qualitative) is undertaken. The quantitative approach has four sections: the financial profile; qualitative adjustments; analyst manual adjustments and imposition of sovereign/support cap. Qualitative analysis is then undertaken which can be used to lower (but not increase) ratings. Qualitative analysis looks at a wide range of considerations in relation to the business position of the issuer taking into account various factors such as markets, type of issuer, geography, etc. and key credit metrics using the "CAMEL" framework (Capital; Asset Quality; Management; Earning and Liquidity):
 - o the issuing entity and its relationship to the issuer under review;
 - o the short-term nature of money market instruments;
 - o the asset classes of the instrument;
 - o the structure of the instrument (unsecured/secured) and to include analysis of the relative risk of default of the issuer and the instrument;
 - o the liquidity profile of the instrument (such as size of the market, daily volumes and variations in pricing); and
 - o any other relevant factors such as macroeconomic and financial market considerations and analysis of external ratings.

This stage also incorporates a comprehensive analysis of environmental, social and governance ("ESG") factors. This assesses both the materiality of the ESG risk factors (low, medium, high) to the credit profile of the issuer as well as the timeliness of the ESG risks (short term, medium term, long term). In order to establish an internal assessment of the risks, the credit analysts gather information from a wide range of sources including external agencies (MSCI, Sustainalytics, rating agencies), meetings with companies on specific ESG topics and internal resources such as the Investment Manager's central ESG team. This analysis is supplemented by use of the Risk Rating Framework Tool which undertakes a quantitative based assessment of these risks.

We invite you to visit www.abrdn.com/en/what-we-do/fixed-income to find out more about our Sustainable Development investment principles which apply to the fixed income investments made by all the Funds and advise you to specifically consult "ESG integration in Fixed Income".

3. Following the in-depth credit quality assessment set out above, the third stage of the process will be the approval or rejection of the issuer/instrument where the following additional points are considered:
 - o does the issuer/instrument meet minimum credit standards based on the in-depth credit quality assessment (the core principle behind this is preservation of capital);
 - o consideration of level of lending at both an instrument and issuer level (various internal limits are in place); and
 - o what maturity we are willing to consider (both at instrument and issuer level).
4. In the case of a favourable assessment, the issuer/instrument will be added to an approval list and an internal rating will be given to instruments/issuers based on the results of the Credit Quality Assessment.

For Securitisations and ABCPs, a very similar process as stated above is followed but in addition the following processes are in place:

- A "Research Note" is prepared specific to the instrument;
- The following factors are also considered:
 - o Sponsorship at parent bank level (and any other associated counterparty risks);
 - o Quality and type of underlying assets;
 - o The liquidity structure of the instrument;
 - o Is the parent entity approved; and
 - o Any exposure from an ABCP or securitised instrument (roll-up to parent entity in terms of overall fund exposure).

The Investment Manager will report the results of the Credit Quality Assessment to the Management Company.

When performing the Credit Quality Assessment, the Management Company shall ensure that there is no mechanistic over-reliance on external ratings.

An effective process has been established by the Management Company to ensure that relevant information on the issuer and instrument's characteristics are obtained and kept up-to-date.

Methodologies

The Credit Quality Assessment will be based on methodologies that are prudent, ongoing and that will be systematically applied. The methodologies will be reviewed at least annually (both by the Head of Financial/Non-Financial Research and then by the Credit Committee (as defined below)) and thereafter by the Management Company to determine whether they remain appropriate for the Funds (taking into account any external factors that may influence such methodologies and any other relevant factors) and the details of such review will be sent to the CSSF. In case of (i) material change within the meaning of article 8 of the Delegated Regulation that may have an impact on the existing Credit Quality Assessment or (ii) in case of change of the methodologies used in the context of the performance of the Credit Quality Assessment, the Credit Quality Assessment will be reassessed.

The data used for the purpose of the Credit Quality Assessment shall be of sufficient quality, up-to-date and from reliable sources.

Ongoing Review

The in-depth credit quality assessment of both the issuer and instrument is performed at least once year but the outcome of the Credit Quality Assessment is continually reviewed to make sure decisions remain supported and that there is no change to recommendations. The Investment Manager's independent internal credit team:

- i monitors adherence to exposure limits/tenors daily and actions accordingly;
- ii analyses whether to reduce the limit/tenor and/or remove a counterparty from the approval list if a counterparty breaches the relevant (or is considered to be close to breaching) guidelines;
- iii performs continual due diligence on counterparties;
- iv has regular meetings to discuss any external influences and other relevant factors; and
- v meets with senior management of counterparties via one-on-one meetings.

The Investment Manager will report any significant findings to the Management Company.

Governance and oversight by the Management Company

The Management Company (and specifically the MMF Manager and Risk Conducting Officer) is a member of the "Credit Committee" which sits at least monthly and reviews all credit assessments produced by the Investment Manager's research teams and on that basis approves the counterparties; the type of instruments allowed; the maximum exposures to a single counterparty (at group level) and the maximum duration of instruments for rated and unrated MMFs. The papers provided to the Credit Committee to approve the internal credit rating of a counterparty and the limits proposed to that counterparty contain the contribution of each of the factors considered in the fundamental Credit Quality Assessment. The Credit Committee is also able to see the impact of the credit analyst qualitative assessment on the internal rating. Finally, any changes to the methodology would be subject to the review and approval of the Credit Committee (and therefore also by the Management Company).

In addition to the day-to-day governance of Credit Quality Assessment, the Management Company has a program of activities to test the adequacy of the assessment and provide an element of control over the procedure, this program has three main components:

1. Assessing whether the risk factors considered are relevant, complete and in line with regulatory requirements.
2. An annual review of the internal credit quality assessment which includes verifying whether the methodology is consistently applied to all counterparties and instruments. Such review of the internal credit quality assessment will also occur in the event of a material change (being a change that could have an impact on the existing assessment of an instrument/counterparty).
3. Identify outliers in the Credit Quality Assessment.

The Management Company compares the evolution of the Credit Quality Assessment with the "average" evolution of the credit ratings provided by Moody's, S&P and Fitch over a 3 year period. Any concerns resulting from this program of activities would be reported to the Credit Committee and the Board of the Management Company.

The determination of the review of the credit quality assessment will be transmitted to the CSSF by the Management Company (specifically by the Risk Conducting Officer) at least annually.

Valuation rules in respect of the calculation of the Variable NAV of LVNAV MMFs

The Variable NAV of the Shares of each Class of MMFs qualifying as LVNAV MMFs is determined as follows:

- (a) securitisations, ABCP(s) and Money Market Instruments will be valued at Mark-to-Market. Where the value of the assets of the LVNAV MMF cannot be calculated following the Mark-to-Market, their value shall be determined conservatively by using Mark-to-Model;
- (b) shares or units in MMFs shall be valued at their last available net asset value as reported by such MMFs;
- (c) the value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid, and not yet received shall be deemed to be the full amount thereof, unless, however, the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate in such case to reflect the true value thereof.

The Variable NAV per Share of a LVNAV MMF shall be rounded to the nearest basis point or its equivalent.

- (4) The income Shares and flexible income Shares of all MMFs qualifying as Public Debt CNAV MMFs aim to maintain a Constant NAV per Share, although there is no guarantee that this will be achieved.
- (5) In the event that the Board of Directors takes the decision to calculate the Net Asset Value using Mark-to-Market pursuant to sub-paragraph 3.B.(b) above, the Board of Directors will consider whether it is appropriate to also take a decision to amend the settlement period for subscriptions and redemptions in the relevant MMF.
- (6) Income Shares and flexible income Shares earn income entitlement from and including the date the application for subscription of such Shares is accepted, but will not include any income entitlement for the Dealing Day upon which such Shares are redeemed.
- (7) The Net Asset Value of accumulation Shares includes earned income for the Dealing Day on which their subscription or redemption is accepted.

II. SHARE PRICES AND DILUTION ADJUSTMENT

Subject to any applicable charges, the price of Shares of any Class in any Fund on a particular Dealing Day shall be the Share Price for that Class, being equal to the Net Asset Value of that Class on that day, adjusted when required to reflect any dealing charges (which shall include any commission and/or other costs) and/or any bid/offer spread that the Board of Directors believes are appropriate to take into account in respect of that Class, divided by the number of Shares of that Class then in issue or deemed to be in issue. Such dealing charges will reflect costs and liabilities not included in the calculation of the Net Asset Value of the relevant Class. The dealing charges shall not exceed 1.5% of the Net Asset Value of the relevant Class whilst the bid/offer spread will represent the underlying spread in the securities that the Fund is invested into on the Dealing Day in question.

The Share Price may be rounded to up to a maximum of nine significant figures in the currency of denomination. In all cases, transaction values may be rounded to up to the second decimal place in the currency of denomination.

Potential investors should also note that a dilution adjustment may be applied and should refer to the section "Swing Pricing / Dilution Levy" for further information.

III. CALCULATION OF EXCHANGE (OR SWITCHING) PRICES

Shareholders in a Fund are entitled to switch some or all of their shareholdings into Shares of a different Class in the same Fund provided they meet the qualifications for investment in the different Class, by giving notice to the Transfer Agent, in accordance with the requirements and procedure detailed in the section "Exchange (or Switching) of Shares".

The basis of the switch is related to the respective Share Prices of the Share Classes concerned. The number of Shares into which Shareholders may switch their existing Shares will be calculated by the Transfer Agent on behalf of Aberdeen Standard Liquidity Fund (Lux), in accordance with the following formula:

$$A = \frac{(B \times C) - D}{E}$$

Where:

A is the number of Shares in the new Share Class to which the Shareholder shall become entitled;

B is the number of Shares in the original Share Class which the Shareholder has requested to be switched;

C is the Share Price of a Share in the original Share Class;

D is the switching charge (if any) payable per Share;

E is the Share Price of a Share in the new Share Class.

(b) Voting

At General Meetings each Shareholder has the right to one vote for each whole Share held.

A holder of Shares relating to any particular Fund or Class will be entitled at any separate General Meeting of the holders of Shares relating to that Fund or Class to one vote for each whole Share relating to that Fund or Class of which he is the holder.

The notice of any General Meeting of Shareholders may provide that the quorum and the majority at this General Meeting shall be determined according to the Shares issued and outstanding at a certain date and time preceding the General Meeting (the "Record Date"). An attendance list shall be kept at all general meetings.

(c) Joint Holders

Aberdeen Standard Liquidity Fund (Lux) will register Shares jointly in the names of not more than four holders should they so require. In such case the rights attaching to such a Share must be exercised jointly by all those parties unless they appoint in writing one person to do so.

(d) Rights on a Winding-up

- (i) On a winding-up, assets available for distribution amongst the Shareholders shall be applied first in the payment to the holders of Shares of the relevant Fund and Class of any balance remaining in the relevant portfolio of assets in proportion to the number of Shares of that Class of such Fund, and secondly in the payment to the holders of Shares of any balance then remaining and not comprised in any of the Funds, such balance being apportioned as between the Funds pro rata to the Net Asset Value of each Fund immediately prior to any distribution to Shareholders on a winding-up. Payment of amounts so apportioned will be made to the holders of Shares in the relevant Class of each Fund in proportion to the number of such Shares held either in cash or, upon prior consent of the Shareholder, in kind in accordance with the Articles of Incorporation of Aberdeen Standard Liquidity Fund (Lux). Monies to which Shareholders are entitled will, unless claimed prior to the close of the winding-up, be deposited at the *Caisse de Consignation* in Luxembourg to be held on their behalf. Amounts not claimed from escrow within the relevant prescription period would be liable to be forfeited in accordance with the provisions of Luxembourg law.
- (ii) If Aberdeen Standard Liquidity Fund (Lux) is to be voluntarily liquidated, its liquidation will be carried out in accordance with the provisions of the Law which specifies the steps to be taken to enable Shareholders to participate in the liquidation distribution(s) and in that regard provides for deposit in escrow at the *Caisse de Consignation* in Luxembourg of any such amounts as have not been claimed by any Shareholders prior to the close of liquidation. Amounts not claimed from escrow within the relevant prescription period would be liable to be forfeited in accordance with the provisions of Luxembourg law.

(e) Class Rights and Restrictions

- (i) Shares will relate to different Funds. They have no preferential or pre-emption rights and are freely transferable.

- (ii) The Shareholders may resolve to redeem all outstanding Shares of any Class or Fund subject to the sanction of a resolution passed at a separate General Meeting of the Shareholders of that Fund or Class by a simple majority of the votes cast.

- (iii) Termination and Amalgamation of Funds.

Termination of a Fund by compulsory redemption of all relevant shares for reason other than those mentioned in 7 (b) below, may be effected only upon its prior approval of the Shareholders of the Fund to be terminated, at a duly convened Fund meeting which may be validly held without a quorum and decided by a simple majority of the votes cast.

Any merger of a Fund with another Fund of Aberdeen Standard Liquidity Fund (Lux) or with another UCITS (whether subject to Luxembourg law or not) shall be decided by the Board of Directors unless the Board of Directors decides to submit the decision for such merger to the meeting of Shareholders of the Fund concerned. In the latter case, no quorum is required for such meeting and the decision for such merger is taken by a simple majority of the votes cast. In case of a merger of a Fund where, as a result, Aberdeen Standard Liquidity Fund (Lux) ceases to exist, the merger shall, notwithstanding the foregoing, be decided by a meeting of Shareholders resolving in accordance with the quorum and majority requirements for the amendment of the Articles of Incorporation.

- (iv) Subject to the Articles of Incorporation, the Board of Directors may impose or relax restrictions on any Class of Shares or Fund (other than any restriction on transfer but including the requirement that Shares be issued only in registered form and/or bear such legends as the Board of Directors may feel appropriate but not necessarily on all Shares within the same Fund or Class), or require redemption of Shares, as they may think necessary to ensure that Shares are neither acquired nor held by or on behalf of any person in breach of the law or requirements of any country or governmental or regulatory authority, or which might have adverse taxation or other pecuniary consequences for Aberdeen Standard Liquidity Fund (Lux), including a requirement to register under any securities or investment or similar laws or requirements of any country or authority. The Directors may in this connection require a Shareholder to provide such information as they may consider necessary to establish whether he is the beneficial owner of the Shares which he holds. Without limiting the generality of the foregoing, the Directors may impose (and currently have imposed) restrictions on Shares which are to be issued to US Persons (as defined in the section "Important Information", paragraph "United States of America") including restrictions as to the holding, transfer, and switching of such Shares, which will be known as "Restricted Shares". Shares which are not Restricted Shares may be required to be redeemed if the Directors have reason to believe that they are held by United States persons. If it shall come to the attention of the Directors at any time that Shares are beneficially owned by a United States person, either alone or in conjunction with any other person, Aberdeen Standard Liquidity Fund (Lux) shall have the right compulsorily to redeem such Shares.
- (v) Where a resolution affects more than one Class of Shares or Funds and the resolution is such as to change the respective rights thereof, the resolution must, in order to be valid be approved separately by Shareholders of such Class of Shares or Fund in accordance with the quorum and majority requirements provided for by article 10 of the Articles of Incorporation.

Two or more Classes of Shares or Funds may be treated as a single Class or Fund if such Classes or Funds would be affected in the same way by the proposals requiring the approval of holders of Shares relating to the separate Classes or Funds.

6. Directors

The Board shall be composed of at least three persons. Each Director shall be elected by the Shareholders at the Annual General Meeting for a period ending at the next Annual General Meeting and until their successors are elected and qualified.

Directors may resign or be removed or replaced or an additional Director appointed at any time by resolution adopted by the Shareholders.

There are no age limits or share qualifications for Directors.

The Directors are vested with all powers to perform all acts necessary or useful for accomplishing Aberdeen Standard Liquidity Fund (Lux)'s objectives. In particular the Directors have power to appoint any entity to act as management company, depository or any entity to act as distributor, administrator, investment manager or investment adviser and such other representatives and agents as they may consider necessary.

No contract or other transaction between Aberdeen Standard Liquidity Fund (Lux) and any other company or firm shall be affected or invalidated by the fact that any one or more of the Directors or officers of Aberdeen Standard Liquidity Fund (Lux) has a material interest in, or is a director, associate, officer or employee of, that other company or firm.

Save for any item described in this Prospectus and subject to the preceding paragraph, if any Director or officer of Aberdeen Standard Liquidity Fund (Lux) has any material interest in any transaction of Aberdeen Standard Liquidity Fund (Lux), that Director or officer shall declare such material interest to the Board and shall not be counted in the quorum of any meeting of the Directors

to consider or vote on any such transaction and he shall not vote on any such transaction and such transaction and the Director's or officer's interest therein shall be reported to the next succeeding meeting of Shareholders.

Directors shall account to Aberdeen Standard Liquidity Fund (Lux) for any fees resulting from appointments held by them as a result of investments held by Aberdeen Standard Liquidity Fund (Lux). Aberdeen Standard Liquidity Fund (Lux) shall indemnify any Director or officer against expenses reasonably incurred by him in connection with any proceedings to which he may be made a party by reason of such position in Aberdeen Standard Liquidity Fund (Lux), except where due to gross negligence or wilful misconduct on his part.

At no time will a majority of the Directors be resident in the UK nor will Directors resident in the UK form a valid quorum for a Board meeting.

7. Compulsory Redemptions-Dissolution

(a) Minimum Valuation of Aberdeen Standard Liquidity Fund (Lux)

- (1) If at any time the aggregate of the Net Asset Values of all Shares falls below two-thirds of the minimum capital for the time being prescribed by Law, the Directors must submit the question of dissolution of Aberdeen Standard Liquidity Fund (Lux) to a General Meeting, acting without minimum quorum requirement and deciding by a simple majority vote of the votes cast at such meeting.
- (2) If at any time the aggregate Net Asset Values of all Shares is less than one-quarter of the minimum capital for the time being prescribed by Law, the Directors must submit the question of dissolution of Aberdeen Standard Liquidity Fund (Lux) to a General Meeting, acting without minimum quorum requirement and deciding, by a vote of one-quarter of the votes cast at such meeting.

(b) Minimum Valuation of the Funds

In the event that for a period of 30 consecutive days, for any reason the Net Asset Value of any Fund is lower than US\$10,000,000 or in the case of a Fund denominated in a currency other than U.S. Dollars, the equivalent in that currency of such amount, or in case the Board of Directors deems it appropriate because of changes in the economic or political situation affecting Aberdeen Standard Liquidity Fund (Lux) or the relevant Fund, or because it is in the best interests of the relevant Shareholders, the Board of Directors may redeem all shares of the relevant Fund at a price reflecting the anticipated realisation and liquidation costs on closing of the relevant Fund, but with no redemption charge.

8. Deferral of Redemptions

In addition to the circumstances set out under Appendix "Liquidity Risk and Portfolio Risk Limitation Rules" of Appendix B above, Aberdeen Standard Liquidity Fund (Lux) may limit the total number of Shares of any Fund which may be redeemed on any Dealing Day to a number representing 10% of the net assets of that Fund on the preceding Dealing Day. Aberdeen Standard Liquidity Fund (Lux) will ensure the consistent treatment of all holders who have sought to redeem Shares at any Dealing Day at which redemptions are deferred. Where this restriction is applied, Shares will be redeemed on a pro rata basis and any Shares which for this reason are not redeemed on any particular Dealing Day will be carried forward for redemption on the next Dealing Day and will then be redeemed in priority to redemption orders subsequently received, subject to the Board of Director's discretion to limit the total number of Shares which may be redeemed on any Dealing Day to 10% of the net assets of that Fund then in issue in the circumstances set out above.

9. In Specie Subscriptions & Redemptions

- (1) Shares may, at the discretion of the Board of Directors, be issued in consideration of the vesting in Aberdeen Standard Liquidity Fund (Lux) of securities acceptable to it and having a value (after deducting any relevant charges and expenses) equal to the relevant Shares. Such securities will be independently valued in accordance with Luxembourg law by a special report of a Luxembourg approved statutory auditor, if required. The specific costs for such subscription in specie, will be borne by the subscriber or by a third party, but will not be borne by the Aberdeen Standard Liquidity Fund (Lux) unless the Board of Directors considers that the subscription in specie is in the interest of the Aberdeen Standard Liquidity Fund (Lux) or made to protect the interests of the Aberdeen Standard Liquidity Fund (Lux).
- (2) Redemptions are normally effected in cash. However, Aberdeen Standard Liquidity Fund (Lux) has power (subject to the consent of the Shareholder) to satisfy redemptions in specie by allocating to the holder investments from the portfolio of the relevant Fund equal in value (calculated in the manner described in Appendix D) to the value of the holding to be redeemed. The Shareholder may elect to have the assets allocated to him for the in-specie redemption sold for cash. The cash issued to the Shareholder would therefore be net of dealing costs. The nature and type of assets to be transferred in such cases will be determined on a fair and reasonable basis and in circumstances which the Board of Directors considers do not prejudice the interests of the other Shareholders in the relevant Fund. This power will be exercised only rarely. However, it may result in the Shareholder receiving investments per Share redeemed which may be worth less or more than the Share Price of each such Share. The specific costs for such redemptions in specie, (such as but not limited to a report, if required, by Aberdeen Standard Liquidity Fund (Lux)'s auditors) will be borne by the redeeming Shareholder or by a third party, but will not be borne by the Aberdeen Standard Liquidity Fund (Lux) unless the Board of Directors considers that the redemption in specie is in the interest of the Aberdeen Standard Liquidity Fund (Lux) or made to protect the interest of the Aberdeen Standard Liquidity Fund (Lux).

10. Suspension

Suspension of the Calculation of the Net Asset Value and Allotment, Issue, Subscription, Switching and Redemption of Shares.

In addition to the circumstances set out under Appendix "Liquidity Risk and Portfolio Risk Limitation Rules" of Appendix B above, Aberdeen Standard Liquidity Fund (Lux) may suspend the allotment, issue and redemption of Shares relating to a Fund, the right to switch Shares into those of another Fund and the calculation of the Net Asset Value of any Class:

- (a) during any period when any market or stock exchange on which a material part of the investments of the relevant Fund for the time being is quoted, is closed (otherwise than for ordinary holidays), or during which dealings are substantially restricted or suspended;
- (b) during the existence of any state of affairs as a result of which disposal or valuation of assets owned by Aberdeen Standard Liquidity Fund (Lux) attributable to such Fund would be impracticable;
- (c) during any breakdown in or restriction in the use of the means of communication normally employed to determine the price or value of any of the investments attributable to such Fund or the current prices or values on any stock exchange;
- (d) during any period when Aberdeen Standard Liquidity Fund (Lux) is unable to repatriate funds for the purpose of making payments on the redemption of such Shares or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of such Shares cannot in the opinion of the Board of Directors be effected at normal rates of exchange;
- (e) during any period when in the opinion of the Board of Directors there exists unusual circumstances where it would be impractical or unfair towards the Shareholders to continue dealing in the Shares of Aberdeen Standard Liquidity Fund (Lux) or of any Fund or any other circumstance or circumstances where a failure to do so might result in the Shareholders of Aberdeen Standard Liquidity Fund (Lux) or a Fund or a Class of Shares incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment which the Shareholders of the Aberdeen Standard Liquidity Fund (Lux), a Fund or a Class of Shares might not otherwise have suffered; or
- (f) if Aberdeen Standard Liquidity Fund (Lux), a Fund or a Class of Shares is being or may be wound up on or following the date on which such decision is taken by the Board of Directors or notice is given to Shareholders of a General Meeting of Shareholders at which a resolution to wind-up Aberdeen Standard Liquidity Fund (Lux), a Fund or a Class of Shares is to be proposed; or
- (g) in the case of a merger of the Aberdeen Standard Liquidity Fund (Lux) or a Fund, if the Board of Directors deems this to be necessary and in the best interest of Shareholders; or
- (h) in the case of a suspension of the calculation of the net asset value of one or several funds in which a Fund has invested a substantial portion of assets;
- (i) where in relation to an MMF Fund pursuing a Constant NAV, circumstances have arisen that no longer permit the relevant MMF Fund to maintain a Constant NAV provided that in such case the Board of Directors will take all reasonable measures to lift the suspension as soon as possible or by means of a switch to a Variable NAV per Share determination;
- (j) where the Board of Directors believe it would be in the best interests of Shareholders to do so; or
- (k) any other circumstances beyond the control of the Board of Directors.

Shareholders who have requested to subscribe to Shares and Shareholders who have requested switching or redemption of their Shares will be promptly notified in writing of any such suspension and of the termination thereof.

11. Transfers

- (e) the Transfer Agent, Administrator, Investment Managers and/or the Depositary and their Connected Persons shall not be entitled to vote in respect of any Shares beneficially held by it or them (as the case may be) on any resolution proposed at any meeting of the Shareholders of Aberdeen Standard Liquidity Fund (Lux) when the Transfer Agent, Administrator, Investment Managers, Depositary or any of their Connected Persons has a material interest in such resolution.
