## Information to Shareholders

Information about the Net Asset Value of the shares of each fund and about the subscription and redemption prices is available at all times at the registered office of the SICAV.

Copies of the annual report, including audited financial statement and semi-annual reports may be obtained by shareholders from the registered office of the SICAV.

A detailed schedule of portfolio charges is available free of charges upon request at the registered office of the SICAV.

### **Sustainable Finance Disclosure Regulation (“SFDR”)**

In line with the SFDR which became effective as from 10 March 2021 the prospectus of the SICAV has been updated in 2024. All the funds have been classified as either article 6, article 8 or article 9. Information on the environmental/social characteristics for the funds disclosing under Article 8 of SFDR is made available in the Annex to the unaudited section of the annual report. Information on sustainable investments for the funds disclosing under Article 9 of SFDR is made available in the Annex to the unaudited section of the annual report.

### **German Shareholders**

No notification pursuant to Sec. 310 of the German Capital Investment Code (Kapitalanlagegesetzbuch) has been filed for the following portfolios and the shares in these portfolios may not be marketed to investors in the Federal Republic of Germany:

## Directors' Report

Dear Shareholder,

We are pleased to present the SICAV's 2024 annual report, of which our board report forms a part. Our board report covers the main business activities of the SICAV.

### ACTIVITY DURING THE YEAR

At the end of 2024, the SICAV's fund range remained unchanged at 40 funds. Redemptions overtook subscriptions overall, with a net outflow for the SICAV of EUR 209 million and a year-end overall net asset value of EUR 17.9 billion, an increase of 11% year on year. The Multi Asset Inflation Strategy fund was liquidated in October 2024 due to the low assets under management and lack of investor interest. In contrast, a new fund - Global Fixed Income Solution – was launched in November 2024. Danske Invest is constantly working to keep the fund range relevant and is developing relevant investment products focusing on sustainability to meet our investors' demands. More details about investment activity appear in the investment manager's report.

### Sustainability considerations

As 2023, 2024 was also committed to the Sustainable Finance Disclosure Regulation (SFDR) and sustainability in general. In November 2024, the Global Corporate Sustainable Bond fund was redesigned into a new green corporate bond fund by investing in purely green bonds that contribute to positive environmental benefits, and the fund is now known as the European Corporate Green Bond. The ESG restrictions of the Euro High Yield Bond fund were changed to include the following restrictions: alcohol, fossil fuels, gambling and military equipment. As of 31 December 2024, we have one Article 6, 34 Article 8 and five Article 9 funds.

### The board held seven meetings

In 2024, we held three additional meetings besides our regular quarterly meetings. We also signed eight circular resolutions - an electronic means allowing approval of a resolution without a physical meeting (typically used for technical matters only). Given the SICAV's business scope and nature, we do not currently consider it necessary to have any standing committees. Therefore, the entire board addresses all board-related matters, including audit.

### The Annual General Meeting will be held in April 2025

The meeting will address the following matters related to the 2024 financial year. Since we propose no particular business and are unaware of any proposals from shareholders, we believe the meeting will include the following routine matters only:

- the adoption of audited financial statements and approval of the allocation of the results;
- the re-election of directors;
- the approval of the payment of dividends;
- the approval of the directors' remuneration;
- the re-election of the auditor; and
- the discharge of directors' duties.

We recommend that shareholders vote to support all board proposals on the above matters, including Deloitte Audit's re-election as the SICAV's auditor. Board compensation includes remuneration (which is not paid to executive directors) and expense reimbursement. The compensation for 2024 can be found in the notes of the audited financial statements.

Articles 6, 8, and 9 of the EU Sustainable Finance Disclosure Regulation pertain to the classification of investment funds according to their sustainability characteristics. Article 6 funds do not incorporate sustainability considerations into the investment process, nor do they explicitly promote environmental, social, and governance (ESG) factors. While they may assess ESG risks, these funds are not classified as sustainable investments. Article 8 funds promote environmental and/or social characteristics but do not prioritise sustainable investment as their primary objective. They are required to disclose how these characteristics are achieved. Article 9 funds have a distinct sustainability objective, such as investing in projects that contribute to environmental or social goals. They must demonstrate that their investments align with sustainable objectives and do not cause significant harm.

# DANSKE INVEST SICAV

## Directors' Report (continued)

### ONGOING RESPONSIBILITIES

#### Review of accounts

We reviewed and discussed the SICAV's 2024 accounts with the management company. We find them consistent with the accounting documents and information provided to us. We believe the annual report and accounts (including the SFDR annexes) are fair, balanced, and understandable and provide the information necessary for shareholders to assess the SICAV's financial position, performance, business model as well as the sustainable characteristics of each fund.

#### Internal controls

We have reviewed the management company's formal quarterly reports on its activities and responsibilities, including the activities of those to whom it has delegated certain functions, mainly the central administrator, J.P. Morgan Bank S.E., Luxembourg branch. We believe these reports adequately document compliance with the internal controls we and the management company have established to ensure that the SICAV meets its obligations to shareholders based on the prospectus, articles of incorporation, and all relevant regulations.

The results of the annual review and analysis carried out by the management company on the fee level in the SICAV show that Danske Invest is priced competitively on an overall level as well as on all individual asset levels in fully priced funds in the Luxembourg fund market.

#### In Closing

We thank you, our shareholders, for your continued support and everyone involved in Danske Invest SICAV's management for their dedicated work during the past financial year. We look forward to providing shareholders with the highest possible degree of satisfaction.

Yours sincerely,

Jan Stig RASMUSSEN, Chairperson

On behalf of the board

15 April 2025

*The report has been approved by the SICAV's Board of Directors ("the board" or "we") of Danske Invest SICAV. The SICAV is part of Danske Invest, the brand name for funds managed by various fund management companies within the Danske Bank Group. The SICAV is primarily domiciled in Luxembourg and the Nordic countries. Danske Bank Group sponsors the Danske Invest fund family, and each investment fund is managed according to the local regulations of its domicile. Except where the context may indicate otherwise, the terms used in this report have the same definitions as in the prospectus.*

## Investment Manager's Report for the year ended 31 December 2024

### Global economy

The global economy proved generally resilient in 2024, benefiting from a favorable combination of healthy growth, and easing inflation that also allowed central banks to start cutting interest rates. The economy thus continued on its course towards a soft landing, characterized by reduced inflation and growth – but not to the extent that it significantly raises unemployment. The labour markets continued to be strong, with good job creation and low unemployment, which contributed to supporting consumer spending. However, the development of the global economy was characterized by significant geographical differences.

### USA: The economy showed surprising strength

The US was by far the strongest economy in 2024. Despite the previous year's interest rate hikes, economic growth again showed surprising strength, exceeding market expectations at the start of 2024, while inflation gradually came under control. This allowed the US central bank, the Federal Reserve, to begin a normalization of monetary policy during the year and lowered the monetary policy interest rate by a total of one percentage point. The strong growth was in particular driven by a very robust American labour market and thus strong growth in consumer spending. Overall, by 2024, the US economy was well and truly heading for the soft landing and was the main driver of the global economy.

### EUROPE: Moderate growth and significant country differences

Europe also avoided a hard landing in 2024, but growth was moderate and nowhere near US growth levels. At the same time, there were significant differences across Europe. Countries such as Spain and Italy experienced good growth, whereas growth declined in both Germany and France. This was mainly linked to global developments, where the service sector flourished while the manufacturing sector lagged behind – and the manufacturing sector is more important for the German and French economies. However, the European economy benefited from a strong labour market with low unemployment, just as the European Central Bank began interest rate cuts, by one percentage point. On the other hand, political uncertainty in both France and Germany, created nervousness during the year, and the European economy was also affected by tighter fiscal policy.

### CHINA: Significant economic easing

Chinese growth had a challenging 2024. Although growth was helped by a significant easing of economic policy in the autumn, the last quarter of the year could be described as a disappointment. Expectations for the Chinese market were considerably raised in September following the authorities' many announcements on a more relaxed economic policy. While extensive construction and rising house prices have previously been an important growth engine for the Chinese economy, the housing market continued to be understated, putting a damper on consumer confidence and economic activity in 2024.

### The financial markets

2024 ended up being a good year for stocks, with bonds also giving positive returns. However, the stock markets were characterized by large geographical differences.

#### Equity markets

2024 was generally a very good year for the equity markets. Global equities returned an average of 25 per cent, albeit with regional differences. The equity markets benefited, among other things, from solid growth and declining inflation.

#### Bond markets

Interest rate developments during 2024 were characterized by speculation about when and how much the central banks would ease monetary policy, which depended, amongst other things, on the development of inflation.

During the first half of 2024, long-term interest rates generally rose, in the autumn they fell back, before rising slightly again towards the end of the year. In both the US and Germany, the interest rates on 10-year government bonds ended 2024 at higher levels than at the start of the year. In Denmark, the interest rate ended the year at a slightly lower level. If we look at the short-term interest rates (2-year government bonds), the interest rate in the US ended unchanged compared to the beginning of the year, while the interest rates in Germany and Denmark ended the year at a lower level.

### Sectors: Technology companies gave the highest returns

At a sector level both the communications service sector and the IT sector contributed with high returns in 2024. As a result, technology companies were generally among the year's high jumpers and benefited from a continued focus on artificial intelligence. The raw materials sector contributed with the lowest return of all sectors in 2024 and suffered from the continued challenges to Chinese growth, as China is a major global consumer of raw materials.

## Investment Manager's Report for the year ended 31 December 2024 (continued)

### Market expectations for 2025\*

#### Global economy

Overall, we expect good global growth in 2025. Both in Europe and the US, we benefit from strong labour markets with low unemployment and good wage growth, which helps to support consumption. Inflation has also come under control and is approaching the central banks' target. In 2024, this paved the way for interest rate cuts from the central banks in Europe and the US. In 2025 we expect further interest rate cuts - particularly in Europe, where inflation is best controlled, and the economy is more likely to need additional monetary stimulus. However, an escalating trade war originating from Donald Trump's administration in the US is a significant uncertainty factor that, depending on its continued development, could negatively impact economic growth, inflation and interest rates relative to our expectations.

#### Equities /Bonds

When we turn our attention to the equities, we anticipate a positive return for the remainder of 2025.

There is no doubt that trade wars are fundamentally bad for the equity markets, and in the coming period, this may lead to more bumps along the way – especially if the trade war escalates further. We are monitoring the situation day by day.

However, as mentioned above, we remain confident regarding economic growth, supported by factors such as low unemployment and the prospect of further interest rate cuts from central banks. We also hope and expect that, at some point, there will be more focus on Donald Trump's business-friendly policies regarding deregulation and tax cuts rather than his geopolitical confrontational approach.

As always, we generally advise investors to think long-term and be patient when investing, and not to allow their investment strategy to be derailed by fear and more short-term market fluctuations resulting from, among other things, political statements from Trump.

Looking at the bond markets, we generally expect positive returns from bonds, benefiting from decent interest rate levels. Towards the end of 2024 and the beginning of 2025, long-term rates rose considerably – a development that was further amplified in Europe in March this year due to a historic fiscal policy shift in Germany, paving the way for large debt-financed investments in defence and infrastructure.

We do, however, anticipate that rates will somewhat decline over the course of the year. This presents potential for bond prices to rise, and we also see limited risk of significant price drops in bonds due to increasing market rates. Nevertheless, the interest rate outlook has become considerably more uncertain due to the fiscal policy shift.

Within credit bonds, we also expect positive returns, primarily driven by ongoing interest payments.

#### Currency

During 2025, we expect a weakening of EUR and DKK from current levels against USD, JPY, GBP, and CHF, while we expect a strengthening against NOK. We expect both SEK and CNY to end 2025 at the same level.

\*Please note that the content of this annual report is not a recommendation to buy or sell shares in the SICAV and do not constitute investment advice. Always talk to an adviser if you are considering making an investment and find out whether a given investment fits your investment profile.

## REPORT OF THE *REVISEUR D'ENTREPRISES AGREÉ*

### Opinion

We have audited the financial statements of Danske Invest SICAV (the “SICAV”) and of each of its funds, which comprise the statement of net assets and the statement of investments and other net assets as at December 31, 2024 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the SICAV and of each of its funds as at December 31, 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the *réviseur d’entreprises agréé* for the Audit of the Financial Statements” section of our report. We are also independent of the SICAV in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other information

The Board of Directors of the SICAV is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d’entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### **Responsibilities of the Board of Directors of the SICAV for the Financial Statements**

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the SICAV is responsible for assessing the SICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the SICAV either intends to liquidate the SICAV or to cease operations, or has no realistic alternative but to do so.

### **Responsibilities of the “réviseur d'entreprises agréé” for the Audit of the Financial Statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

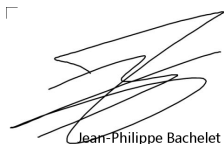

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material

misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the SICAV's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the SICAV.
- Conclude on the appropriateness of the Board of Directors of the SICAV use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the SICAV's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the SICAV to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de révision agréé*

# DANSKE INVEST SICAV

## Notes to the Audited Financial Statements as at 31 December 2024

### NOTE 1 – GENERAL

Danske Invest SICAV (the "SICAV") is an investment company incorporated under the laws of the Grand Duchy of Luxembourg as a *Société d'Investissement à Capital Variable* subject to Part I of the amended Law of 17 December 2010 relating to the undertakings for collective investment (the "2010 Law"). The SICAV's purpose is to invest in all kinds of transferable securities, units or shares of other open-ended UCI or UCIs, as well as derivatives on transferable securities and other financial instruments authorised by the 2010 Law.

The SICAV was incorporated on 30 June 2011 for an unlimited period of time and is governed by the law of 10 August 1915 on commercial companies, as amended, and by the 2010 Law.

The registered office of the SICAV is established at 13, rue Edward Steichen, L-2540 Luxembourg. The SICAV is recorded at the Luxembourg "Registre de Commerce et des Sociétés" under the number B 161867.

The Articles of incorporation were first published on 10 August 2011 in the Mémorial C. They were amended on 6 September 2005, 24 October 2005, 14 November 2008, 16 July 2014 and 2 March 2020 and published in the RESA (*Recueil électronique des sociétés et associations*) on 25 November 2005, 16 November 2005, 8 December 2008, 8 October 2014 and 23 April 2020 respectively.

Until 31 December 2019, Danske Invest Management Company served as the designated Management Company of the SICAV under chapter 15 of the 2010 Law and pursuant to the Management Company Agreement dated 9 December 2014 entered into force between the SICAV and the Management Company.

On 1 January 2020, Danske Invest Management Company was absorbed (via a merger) by Danske Invest Management A/S, which is a public limited company incorporated under the Danish laws, which has been authorized by Finanstilsynet (the Danish Financial Supervisory Authority) as management company within the meaning of Directive 2011/61/EU, as amended, and which has its registered office in Bernstorffsgade 40, 1577 Copenhagen V, Denmark. This merger was conducted in compliance with articles 1023-1 and following the Luxembourg law dated 10 August 1915 on commercial companies, as amended as well as the applicable Danish law and regulations. Consequently, some functions of the Management Company are performed from its registered office in Denmark with the assistance of its branch established in Luxembourg, namely Danske Invest Management A/S, Luxembourg Branch. In Denmark, Danske Invest Management A/S performs the oversight of the delegated investment management function and the Danske Invest Management A/S, Luxembourg Branch performs the domiciliary services, risk management and oversight of entities to which administration and distribution is delegated.

Danske Invest Management A/S has also been appointed to act as Management Company for the following Investment funds: Danske Invest, Danske Invest Select, Danske Invest Index, Profil Invest, Danske Invest PCC Ltd, Danske Invest Institutional, AP Invest, Danske Invest SICAV-SIF and Danske Invest Allocation.

The SICAV is an umbrella fund and as such provides Investors with the choice of investment in a range of several separate funds, each of which relates to a separate portfolio of liquid assets and other securities and assets permitted by the 2010 Law with specific investment objectives, as described in the relevant fund "Description" in the current Prospectus. Each fund "Description" forms an integral part of the current Prospectus.

On 31 December 2024, forty funds are operational:

- Aktiv Förmögenhetsförvaltning
- China
- Danish Bond
- Danish Mortgage Bond
- Denmark Focus
- Eastern Europe (in liquidation)
- Emerging Markets Debt Hard Currency

- Sverige Småbolag

\*Please refer to Note 12.

As at 31 December 2024, the following cash amounts were outstanding:

- Danske Invest SICAV – Eastern Europe (in liquidation): RUB 1,166,861
- Danske Invest SICAV – Emerging Markets Sustainable Future : RUB 2,714,685
- Danske Invest SICAV – Russia(in liquidation): RUB 76,710

### NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with generally accepted accounting principles and laws and regulations in force in the Grand Duchy of Luxembourg applicable to undertakings for collective investment in transferable securities.

#### a) Valuation of Assets

In general, the value of each fund assets is determined as follows:

- (i) Cash in hand or on deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received are valued at full value, adjusted for any appropriate discount or premium we may apply based on our assessments of any circumstances that make the full payment unlikely.
- (ii) Transferable securities and money market instrument that are listed or traded on an official stock exchange or other regulated market are generally valued at the most recent price quoted on the market where they are principally traded.
- (iii) Non-listed securities, or listed securities for which the price determined according to the above methods not representative of fair market value are valued in good faith at a prudent estimate of their sales price.
- (iv) Derivatives that are traded on stock exchanges or regulated markets are valued at the settlement price most recently quoted for a derivative's primary market(s), adjusted if necessary to allow for settlement on a different day if current-day settlement is not possible.  
  
Derivatives that are not traded on stock exchanges or regulated markets are valued at liquidation value, according to policies applied consistently for each given type of derivative.
- (v) Shares or units of UCITS or UCIs are valued at the most recent Net Asset Value reported by the UCITS/UCI, or, if the most recent Net Asset Value does not reflect current market realities, at fair value.
- (vi) Credit default swaps and contracts for difference are valued according to valuation principles set by the Board of Directors of the SICAV, based on mark-to-market practice using standard market practice.
- (vii) All other swaps are valued at market value, with reference to the applicable rate curve.
- (viii) Currencies are valued at the latest mid-market foreign exchange rate (applies to currencies held as assets, to hedging positions, and when translating values of securities denominated in other currencies into the base currency of the Fund).
- (ix) All other assets are valued in good faith at a prudent estimate of their sales price.

# DANSKE INVEST SICAV

## Notes to the Audited Financial Statements (continued) as at 31 December 2024

### NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

All valuation methodologies are established by the Board. For any asset, the Board of Directors of the SICAV can choose a different valuation method if it believes that method may result in a fairer valuation. For more information on our asset valuation methods, see the articles.

All assets which are valued in a currency other than the currency in which shares of the relevant fund are denominated will be converted into the relevant currency at the latest median foreign exchange rate.

(x) Timing of asset pricing. The fund use snapshot pricing, meaning that the prices used for valuation are as of a specific point during the trading day rather than end-of-day values. Changes in value between the time of pricing and the closure of the relevant market will therefore not normally be reflected in the Net Asset Value.

(xi) The Management Company valued the following security on the basis of the probable realizable value Hesalight A/S 7.00% 12.12.19 at EUR 0.00 per share, which represents 0.00% of the Net Asset of Nordic Corporate Bond on 31 December 2024.

(xii) The Management Company valued the following security on the basis of the probable realizable value Neon Capital Ltd. 0% 06.01.28 at JPY 93.99 per share, which represents 0.06% of the Net Asset of Emerging Markets Debt Hard Currency on 31 December 2024.

(xiii) The Management Company valued the following security NMC Health Plc at zero on 27 March 2020 based on the uncertainty of the outcome of ongoing investigations into company accounts and its debt position. The security is held in Emerging Markets Sustainable Future, Global Index and Global Index Restricted.

(xiv) As regards to the Russian securities held in the funds including the funds under liquidation – Russian and Eastern Europe – the Management Company has decided to evaluate the prices of all Russian Securities in the funds by applying a 100% reduction, with the exception of holdings in Nebius Group NV. The security is priced based on its potential availability to be traded in the market again. The latest estimated prices reflect a fairer value of the securities in the NAV estimation.

(xv) The Management Company valued the following security on the basis of the probable realizable value CONTRA ABIOMED, Inc. at zero per share, which represents 0.00% of the Net Asset of Global Index, Global Index Restricted and Global Portfolio Solution – Balanced on 31 December 2024.

### b) Unrealised capital gain tax on investments

There may be changes in the tax laws or interpretations of such laws of various jurisdictions in which the funds operate or invest in. As a result the fund can become subject to additional or unseen taxation as well as to changes in taxation treaties between the countries in which the fund operates or invests in. These changes may affect adversely the ability to efficiently realise income or capital gains. Liabilities in respect of taxes payable on unrealised capital gains on investments in certain countries are accrued in the Net Asset Value on a daily basis.

### c) Realised profit / (loss) on sale of investments

Realised profit and loss on sale of investments sold are computed on the basis of average cost.

### d) Foreign exchange conversion

All assets valued in a currency other than the base currency of the fund are converted to the base currency at the exchange rates prevailing at 31 December 2024.

The exchange rates used as at 31 December 2024 for the combined financial statements of the SICAV are as follows:

1 AED	=	0.261317	EUR
1 AUD	=	0.596535	EUR
1 BRL	=	0.155367	EUR

1 VND	=	0.000038	EUR
1 ZAR	=	0.051188	EUR
1 ZMW	=	0.034468	EUR

Income and expenses expressed in a currency other than the base currency of the fund are converted at the applicable exchange rate prevailing at the transaction date.

#### e) Cost of investment securities

The acquisition cost of investment securities in each fund expressed in currencies other than the currency of denomination is converted to the base currency at the exchange rates prevailing at the purchase date.

#### f) Income/charges from investments

Income on long securities and dividends on securities are recognized net of withholding tax quoted at ex-date, to the extent information thereon is reasonably available to the fund. Bank interest, interest on fixed income securities and interest on Contracts For Difference (CFDs) are accrued for each net asset valuation.

#### g) Forward foreign exchange contracts

Profit and loss arising from un-matured forward foreign exchange contracts are determined on the basis of the applicable forward exchange rates at the valuation date, and are recorded in the combined Statement of Net Assets. Net realised profit / loss and change in net unrealised appreciation / depreciation on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at 31 December 2024 are shown in Note 5.

#### h) Futures contracts

Futures contracts are valued on the last available published price on the valuation date and are recorded in the Statement of Net Assets. Realised profit / loss and change in net unrealised appreciation / depreciation on futures contracts are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at 31 December 2024 are shown in Note 6.

#### i) Swing Pricing

On business days when trading in a fund's shares will require net purchases or sales of portfolio investments exceeding a certain percentage of the fund's net assets (as set by the Management Company and approved by the SICAV), a fund's Net Asset Value may be adjusted.

This adjustment reflects an assessment of the overall costs incurred in buying and selling investments to satisfy subscriptions or redemptions of shares (understanding that a fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

Swing pricing is intended to reduce the impact of these costs on Shareholders who are not trading their shares at that time.

## Notes to the Audited Financial Statements (continued) as at 31 December 2024

### NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

In general, the Net Asset Value will be adjusted upward when there is strong demand to subscribe for fund shares and downward when there is strong demand to redeem fund shares. Swing pricing adjustments are automatic and are applied systematically by computation.

Thresholds and adjustment percentages can vary by fund, but the adjustment will not be larger than 2% of Net Asset Value for all share classes within a fund. In extraordinary situations the Management Company can raise this limit to protect the interests of Shareholders.

The Net Asset Value for all the funds in the SICAV have swung during the financial year with the exception of the following funds:

Aktiv Förmögenhetsförvaltning, Eastern Europe (in liquidation), Global Emerging Markets Small Cap, Global Index, Global Portfolio Solution - Balanced, Global Portfolio Solution - Defensive, Global Portfolio Solution - Opportunity, Global Portfolio Solution - Stable, Russia (in liquidation), Sverige, Sverige Beta and Sverige Småbolag.

No fund required a swing adjustment on 31 December 2024.

#### j) Realised profit / loss on Contracts For Difference ("CFDs")

Net realised profit / loss and change in net unrealised appreciation / depreciation on CFDs are computed on the basis of average cost, and recorded in the Statement of Operations and Changes in Net Assets. The net unrealised profit / loss on CFDs is recorded in the Statement of Net Assets and full details of the contracts open as at 31 December 2024 are shown in Note 8.

#### k) Swaps and Swaptions

The total return swaps and inflation swaps are valued at fair market value as determined in good faith pursuant to the procedures established by the Board of Directors of the SICAV. The unrealised profit / loss on swaps is presented in the Statement of Net Assets. The realised profit / loss and change in net unrealised appreciation / depreciation on swaps and swaptions are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at 31 December 2024 are shown in Note 7 and Note 9.

A swaption can be defined as the option to enter into a specified swap agreement with the issuer on a specified future date.

#### l) Options Contracts

Options are valued at the market price on the valuation date. Unrealised gains or losses resulting at the time of reporting from the valuation of options are recorded in the Statement of Net Assets. Net realised profit / loss and change in net unrealised appreciation / depreciation on sale of options are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at 31 December 2024 are shown in Note 7.

#### m) Combined financial statements of the SICAV

The combined financial statements represent the sum of the financial statements of each fund after conversion. The combined financial statements are presented in EUR, using the exchange rate in effect as at 31 December 2024. The difference between the opening net assets stated at the rate of exchange used for conversion into EUR as of 31 December 2024 and 31 December 2023 is shown as Currency conversion in the Combined Statement of Operations and Changes in Net Assets.

### NOTE 3 – MANAGEMENT FEES AND OPERATING AND ADMINISTRATIVE EXPENSES

#### Management fees

The Management Company receives the management fee from the net assets of each share class, payable quarterly in arrears, which in turn pays the Investment Manager and the distributors. The actual annual rates applied on 31 December 2024 are listed in the table below.

#### Operating and Administrative Expenses

The SICAV pays the Management Company operating and administrative expenses (the "Operating and Administrative Expenses") as determined in respect of each fund and/or share class in the relevant fund description in the SICAV Prospectus. The Operating and Administrative Expenses are fixed, and the actual annual rates applied on 31 December 2024 are listed in the table below.

The Management Company shall bear the excess in actual expenses to any Operating and Administrative Expenses charged to the fund and/or share class. On the other hand the Management Company is entitled to retain any amount of the Operating and Administrative Expenses charged to the fund and/or share class, which exceeds the actual related expenses incurred by the respective fund and/or share class.

Under current law and practice, the SICAV is liable, to an annual subscription tax of 0.05% except those funds or share classes, which may benefit from the lower rate of 0.01% as more fully described in article 174 of the 2010 Law. No such tax is due on the portion of assets of the fund invested in other Luxembourg UCIS or UCIs (if any) provided that such assets have already been subject to the subscription tax. This tax is paid by the Management Company out of the Operating and Administrative Expenses.

# DANSKE INVEST SICAV

## Notes to the Audited Financial Statements (continued) as at 31 December 2024

### NOTE 3 – MANAGEMENT FEES AND OPERATING AND ADMINISTRATIVE EXPENSES (continued)

The Operating and Administrative Expenses covers the administration and safekeeping of assets and in addition other ongoing operating and administrative expenses as follows:

- the Luxembourg tax d'abonnement;
- fees and expenses of the depositary, including charges for local correspondents that exceed the depositary's responsibility;
- fees of the central administration and registrar agent;
- risk and compliance monitoring;
- fees and expenses of professional firms, such as the auditors and legal advisers;
- government, regulatory and registration expenses;
- cost of providing information to shareholders, such as publishing NAVs and notices as well as creating, translating and distributing financial reports, prospectuses and PRIIPs KIDs;
- fund formation expenses;
- reasonable out-of-pocket expenses of board members, and any fees that the board agrees the SICAV should pay to independent board members for their service on the board;
- all other costs associated with operation and distribution, including expenses incurred by the management company and all service providers.

In case a portion of the above mentioned fees of the Service Providers is paid directly from the assets of the Fund and/or share class, the Operating and Administrative Expenses due to the Management Company is reduced accordingly. The Operating and Administrative Expenses do not include the following fees and expenses, which are payable by the Fund:

- 1) brokerage and bank charges incurred on business transactions and securities trades and other transaction-related expenses;
- 2) extraordinary expenses, such as legal or other expertise needed to defend the interest of shareholders.

The above mentioned fees are calculated on each valuation day on the net assets of the relevant fund and/or share class and are paid quarterly in arrears.

Only share classes active at year end are disclosed:

\*Please refer to Note 12.

If the fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same Management Company or by any other company to which the Management Company is linked by common management or control or by a substantial direct or indirect holding, that Management Company or other company may not charge subscription or redemption fees on account of the Fund's investment in the units of other UCITS and/or other UCI.

In respect of a fund's investments in UCITS and other UCIs whether managed or not by the Management Company or any other company linked to the Management Company, the total management fee (excluding any performance fee, if any, and taking into account net amount of possible rebates from the other UCITS and/or UCIs in which the fund invests in) charged to such fund itself and the other UCITS and/or other UCIs concerned are outlined in the table below:

Fund	Maximum Annual Management Fees incl. Underlying Funds	Maximum Management Fee in % p.a.	Current Management Fee in % p.a.	Maximum Operating & Admin. Expense % p.a.	Current Operating & Admin. Expense % p.a.
Global Portfolio Solution - Balanced - Class X	2.50%	0.95%	0.5525%	0.50%	0.15%
Global Portfolio Solution - Defensive - Class X	2.50%	0.85%	0.44625%	0.50%	0.15%

## Notes to the Audited Financial Statements (continued) as at 31 December 2024

### NOTE 3 – MANAGEMENT FEES AND OPERATING AND ADMINISTRATIVE EXPENSES (continued)

Global Portfolio Solution - Stable - Class X	2.50%	0.75%	0.3825%	0.50%	0.15%

#### Transactions with the related parties and cross-investments:

During the year, there have been no significant transactions which were outside the ordinary course of business or which were not on normal commercial terms.

Some of the funds use cross investment techniques, meaning that the funds invest into other funds within Company's umbrella structure. The combined Statement of Net Assets and the combined Statement of Operations and Charges in Net Assets have not been adjusted to remove the impact of the cross investments. The commissions on subscriptions and redemptions, as well as management fees, were not applied to the assets of the fund that has cross-invested into other funds.

#### NOTE 4 – PERFORMANCE FEES

The Investment Manager is also entitled to receive a performance fee from Europe Long-Short Equity Factors, Global Alternative Opportunities and Global Tactical Allocation calculated, accrued and locked on each valuation day and paid annually in arrears on or after the last valuation day in each financial year. If a performance fee is payable in relation to a relevant share class, the performance fee shall be an amount equal to 20% of the Outperformance for Europe Long-Short Equity Factors and Global Alternative Opportunities and 10% of the Outperformance for Global Tactical Allocation.

The performance fee methodology is in accordance with CSSF Circular 20/764 regarding guidelines on performance fees in UCITS, ESMA Guidelines on performance fees in UCITS and ESMA "Questions and Answers" regarding the application of the UCITS Directive.

A performance fee is charged when a share class of the fund outperforms its reference benchmark for performance fee calculation, a measure of relevant market performance, as shown below:

Share Class	Reference Benchmark For Performance Fee Calculation	Bloomberg ticker	Benchmark administrator ESMA registered
CHF	Swiss Average Rate Overnight	SSARON	Yes
DKK	Tomorrow/Next Interest Rate	DETNT/N	Yes
EUR	Euro short-term rate	ESTRON	N/A
NOK	Norwegian Overnight Weighted Average Rate	NOWA	N/A
SEK	Stockholm Interbank Offered Rate Tomorrow/Next	STIB1D	No
USD	US Federal Funds effective rate	FEDL01	No

At the beginning of the first business day of a calculation period, and as soon as a performance fee is crystallised at the end of the calculation period, the accrued fee is set to zero and the respective values of the relevant NAV and the reference benchmark for performance fee calculation are defined as the zero point for the period's performance fee calculations.

On every day that is a business day for a fund, the performance of the applicable reference benchmark for performance fee calculation is subtracted from the share class performance. A positive result indicates outperformance, a negative number underperformance.

The results from these calculations accrue over the calculation period. When the accruals result in net outperformance for the period to date, they are factored into NAV. When the accruals result in net underperformance for the period to date, no performance fee is factored into NAV, but the accrual calculations continue, meaning that no performance fee can be earned during that calculation period until the accrued underperformance is overcome.

# DANSKE INVEST SICAV

## Notes to the Audited Financial Statements (continued)

as at 31 December 2024

### NOTE 4 – PERFORMANCE FEES (continued)

The performance fee is payable only if the performance of the share class exceeds the NAV previously attained when a performance fee was crystallised at the end of the calculation period, or if it exceeds the NAV at inception, if no performance fee has been paid.

This above-mentioned NAV, referred as high watermark, is adjusted for the movements in the reference benchmark for performance fee calculation and takes into account the subscriptions, redemptions or distributions effects. The calculation method is designed to account for the actual investment performance of the fund and not for NAV increases resulting from new subscriptions. Furthermore, swing pricing or other adjustments intended to mitigate the effects of transaction volumes or costs are not counted in the performance fee calculation.

In cases where the value for the reference benchmark for performance fee calculation is negative, its value is defined as zero for the purposes of the calculation of the performance fee.

Because different share classes of a fund may have different NAVs, the actual performance fees paid may vary by share class. As at 31 December 2024, performance fee applied to Europe Long-Short Equity Factors, Global Alternative Opportunities and Global Tactical Allocation, as shown below:

Fund	Class	Fund Ccy	Performance

Danske Invest SICAV - Multi Asset Inflation Strategy was liquidated on 7 October 2024.

Danske Invest SICAV - Global Corporate Sustainable Bond was renamed European Corporate Green Bond effective 22 November 2024.

### NOTE 13 – POST BALANCE SHEET EVENTS

Danske Invest SICAV – Global Emerging Markets Small Cap was liquidated on 14 February 2025.

Danske Invest SICAV – India merged into Danske Invest SICAV – Global Emerging Markets on 21 February 2025.

### NOTE 14 – RECONCILIATION BETWEEN PUBLISHED NAV AND NAV PRESENTED IN THESE FINANCIAL STATEMENTS FOR THE FUNDS

The Net Asset Values per share reported in these Financial Statements for the fund Global Alternative Opportunities and Global Tactical Allocation are different from the ones published as of 31 December 2024.

Global Alternative Opportunities' Total Net Assets as reported in these Financial Statements have been adjusted by the amount of 817,011 EUR accruals on performance fees as at 31 December 2024, which represents 0.10% of the Total Net Assets.

Global Tactical Allocation's Total Net Assets as reported in these Financial Statements have been adjusted by the amount of 1,713,153 EUR accruals on performance fees as at 31 December 2024, which represents 0.08% of the Total Net Assets.

Please refer to below table:

Fund	Total Net Assets as published as at Year- end (in EUR)	Adjustment (in EUR)	Adjusted Total Net Assets as per current Financial Statements(in EUR)
Global Alternative Opportunities	786,235,113	817,011	787,052,124
Global Tactical Allocation	2,025,954,490	1,713,153	2,027,667,643

## Unaudited Appendix

### RISK EXPOSURE

Danske Invest Management A/S uses a risk management process to monitor and measure at any time the overall risk profile of each fund from direct investment, derivatives, techniques, collateral and all other sources. Global exposure assessments are calculated every trading day (whether or not the fund calculates a NAV for that day), and encompass numerous factors, including coverage for contingent liabilities created by derivative positions, counterparty risk, foreseeable market movements and the time available to liquidate positions.

Any derivatives embedded in transferable securities or money market instrument count as derivatives held by the fund, and any exposure to transferable securities or money market instruments gained through derivatives (except certain index-based derivatives) counts as investment in those securities or instruments.

**Risk monitoring approaches:** There are three main risk measurement approaches: the commitment approach and the two forms of value at risk (VaR) - Absolute and Relative. These approaches are described in the Prospectus and the approach each fund uses is outlined in the table below.

Name of the fund	Investment Manager	Sub-Investment Manager	Investment Style	Risk Approach	Risk Basis	Base ccy

# DANSKE INVEST SICAV

## Unaudited Appendix (continued)

### Remuneration policy

Danske Invest Management A/S (DIMA) current remuneration policy is available on the website [www.danskeinvest.lu](http://www.danskeinvest.lu) and several tables on remuneration related information for 2024 are below:

The remuneration to the Danske Invest SICAV Board of Directors is paid out of the operating and administrative expenses from the SICAV.

### 2024 Remuneration for the Danske Invest SICAV Board in EUR

	Fixed remuneration	Variable remuneration	Total remuneration	Head-count
Danske Invest SICAV Board of Directors	87,500	–	87,500	4
<b>Total remuneration</b>	87,500	–	87,500	4

### Remuneration in Danske Invest Management A/S for 2024 in DKK 1,000

	Fixed remuneration	Variable remuneration	Total remuneration	Head-count
DIMA Board of Directors	494	–	494	6
Management Board	5,014	–	5,014	2
Other material risk takers	4,518	196	4,714	9
Other employees	41,593	1,210	42,803	37
<b>Total remuneration</b>	51,619	1,406	53,025	54

DIMA has delegated portfolio management to Danske Bank A/S in Denmark. The total remuneration for Danske Bank A/S has been allocated to the SICAV based on the SICAV's pro rata share of the total AUM managed by Danske Bank A/S for 2024 as outlined in the table below.

### 2024 Remuneration for the Investment Manager for Danske Invest SICAV in DKK 1,000

	Fixed remuneration	Variable remuneration	Total remuneration	Head-count
Danske Bank A/S	54,818	28,704	83,522	39
<b>Total remuneration</b>	54,818	28,704	83,522	39

# DANSKE INVEST SICAV

## Unaudited Appendix (continued)

### Acceptable Collateral

\* For any Acceptable Collateral that is required to have an issuer rating: ratings are based on the S&P equivalent but if more than one ratings agency has issued rating and the ratings are not equivalent to each other, then the second.

\*\* Main index means the main index of an Acceptable Jurisdiction.

As defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, margin lending transactions and Total Return Swaps.

Accordingly, disclosures required by Article 13 of the Regulation are not applicable for the year ended 31 December 2024.

# How to read the SFDR annexes

## Funds categorised under SFDR Article 8 and 9

The SFDR-annexes provide information on how and to which extent sub-funds have succeeded in attaining their respective environmental and/or social characteristics and/or met their sustainable investment objective in the reference year. The annexes supplement the financial statements in the annual report and are based on requirements to format, structure and content set out in the Sustainable Finance Disclosure Regulation (SFDR) and Taxonomy Regulation.

The SFDR annexes cover the reference period of 1 January 2024 – 31 December 2024.

The sustainability-related performance of the sub-funds is demonstrated against selected sustainability indicators which in general are reported through average values. Where relevant, the SFDR-annexes state the so-called “binding elements” for the respective environmental and/or social characteristics or sustainable investments commitments that the sub-funds are reporting their performance against, which may be integrated through inclusions, exclusions and/or active ownership processes. Further information on Danske Invest Management A/S’ general approach to responsible investment these processes is available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

Information on data sources, sustainability indicators and monitoring relevant for the specific sub-funds can be found in the document “sustainability-related disclosures” accessible ed through the link.

No universally accepted framework (legal, regulatory, or others) currently exists in relation to sustainability related data, information, and assessments . The reporting aims to account for incomplete and inconsistency in the data points and to provide a transparent and easy-to-understand representation of the sub-funds’ performance. Data sources used for the selected sustainability indicators are assessed by the Responsible Investment team in Danske Bank on a continuous basis. The assessments include, but are not limited to, assessments on data coverage, data quality, methodology, costs, and other Danske Bank operational considerations.

Sustainability-related data, information, and assessments is however not comparable to that of financial information. This implies a risk of misrepresentation of data on sustainability-dimensions or impacts associated to an investment. Despite diligent due diligence in the onboarding of data and other resource and cost proportional considerations in place to ensure the accuracy, completeness, and reliability of the data, it is not possible to verify nor guarantee, directly or indirectly, the complete correctness of the underlying data. Therefore, a certain margin of error is still to be expected.

How sustainability-related data, information and assessments are utilized is subject to the specific models, methodologies, and processes applied and governed by Danske Bank’s Responsible Investment Policy, Instructions as well as Guidelines.

For the reading the of the SFDR-annexes, please refer to the text boxes and descriptions in the annexes, the overview of the terms/definitions used below, and for reading the PAI tables, the separate guidance provided below (see 'How to Read the PAI Table in the SFDR Annexes').

## Sub-fund categorised under Article 6

Danske Invest SICAV – Global Alternative Opportunities is categorised under Article 6 and not covered by reporting requirements under the SFDR reporting.

For this sub-fund, investors should be informed that the investments made by the fund does not consider EU criteria for environmentally sustainable economic activities. Nor does the sub-fund make any considerations or prioritisation of principal adverse impact indicators.

# Definition list

<b>Active Ownership</b>	Use of ownership and shareholder rights to impact the activities or behaviour of companies and/or issuers as further set-out in the Active Ownership Policy of Danske Invest Management A/S.
<b>Benchmark</b>	Performance metric used for comparison of performance
<b>Environmental and/or social characteristics</b>	Environmental and/or social characteristics integrated in the investment process through inclusion, exclusion and/or active ownership
<b>ESG</b>	Standard term for environmental ("E"), social ("S") and governance ("G") aspects
<b>ESG-score</b>	Score measuring issuers'/companies' management of ESG aspects. The score is based on a model developed by Danske Bank
<b>Exclusions</b>	The exclusion of companies/issuers based on pre-defined criteria and thresholds, or qualitative assessment criteria (including norms assessments) as further described in the Exclusion Instruction of Danske Invest Management A/S
<b>Inclusions</b>	The inclusion of companies/issuers based on sustainability-related considerations in accordance with Inclusion Instruction of Danske Invest Management A/S
<b>PAI-Indicators</b>	Indicators for the principal adverse impacts on sustainability factors as defined in the Commission's Delegated Regulation (EU) 2022/1288
<b>SDGs</b>	Sustainable Development Goals of the United Nations
<b>Sustainable Finance Disclosure Regulation or SFDR</b>	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector
<b>Sustainability factors</b>	Environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.
<b>Sustainable investment</b>	Investments targeting economic activities that contribute to environmental and/or social objectives without significantly harming such objectives while considering good governance
<b>Taxonomy Regulation</b>	Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investments

## How to Read the PAI Table in the SFDR Annexes

This part of the reading guide is intended to assist in understanding the principal adverse impacts (PAIs) reported by the sub-funds in the SFDR-annexes.

The principal adverse impacts should be understood as the significant or likely significant negative impacts on sustainability factors that are caused by, exacerbated by, or directly linked to investments. Departments that have committed to considering these factors report annually in the SFDR Annexes the measured impact for the year. The reporting is based on 16 mandatory PAI indicators as well as the following additional six PAI indicators which are further detailed below.

The PAI indicators are divided into those applicable solely to investments in investee companies and those applicable to investments in states and supranational entities. Sub-funds report only on the indicators relevant to the funds' investments. For example, a sub-fund investing in equities will not report against the PAI indicators applicable to states.

The reports are based on average of measured quarterly values for the year.

For the majority of indicators, data from ISS ESG is primarily used. The data coverage varies for each indicator, so the measured figures should be read with that reservation why the PAI tables in the annexes also contain information on data coverage.

### PAI Indicators:

#### *Greenhouse Gas (GHG) emissions*

##### ***Scope 1 GHG Emissions (tons):***

means Green House Gas (GHG) emissions generated from sources that are controlled by the investee company that issues the underlying assets. The indicator measures Scope 1 GHG emissions of investee companies expressed as tons of CO2 equivalent. The higher the number of reported Scope 1 GHG emissions the greater the adverse impact.

##### ***Scope 2 GHG Emissions (tons)***

means GHG emissions from the consumption of purchased electricity, steam or others sources of energy generated upstream from investee companies. The indicator measures Scope 2 emissions of investee companies expressed as tons of CO2 equivalent. The higher the number of reported Scope 2 GHG emissions the greater the adverse impact

##### ***Scope 3 GHG Emissions (tons)***

means indirect GHG emissions not covered by Scope 1 and Scope 2 that occur in the value chain of investee companies, including both upstream and downstream emissions, in particular for sectors with a high impact on climate change and its mitigation. The indicator measures Scope 3 emissions of investee companies expressed as tons of CO2 equivalent. The higher the number of reported Scope 3 GHG emissions the greater the adverse impact.

##### ***GHG Emissions Total (tons)***

means the total GHG emissions from investee companies including Scope 1, Scope 2 and Scope 3 expressed as tons of CO2 equivalent. The higher the number of of reported total GHG emissions the greater the adverse impact. Carbon footprint (tCO2e / m€ invested)

##### ***Carbon Footprint (tCO2e/mio. EUR invested)***

means the total GHG emissions emitted per million invested, i.e. the emissions based on invested amount. The larger the carbon footprint, the greater the impact GHG intensity of investee companies

##### ***GHG Intensity (tCO2e/mio. EUR revenue)***

means the total GHG emissions per million of revenue from the investee companies, i.e. the amount of GHG emitted per euro in revenue generated. The higher the reported GHG intensity, the greater the impact

means the share of investments invested into investee companies that derive any revenue from fossil fuel, i.e.

**Exposure to companies active in the fossil fuel sector (share of investments %)** revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. The larger the share, the greater the exposure to investee companies in the fossil fuel sector

**Share of non-renewable energy consumption** – the share of investments in investee companies' consuming energy sources other than renewables/non-fossils. The higher the number, the greater the share of non-renewable energy consumption by investee companies, compared to consumption from renewable energy sources.

**Share of non-renewable energy - production** means the share of investee companies producing energy sources other than renewables/non-fossils. Non-fossils in that respect cover wind, solar. The higher the number, the greater the share non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources

**Energy consumption intensity per high impact sector (GWh pr. million of revenue)** means consumption in Gigawatt hour (GWh) per million euro of revenue for each high impact sector. High impact sectors are such that are defined by EU Commission. Investee companies active in high impact climate sectors generally have much higher emission profile compared to companies in other sectors.

**Investments in companies without carbon emission reduction initiatives** means the share of investee companies without carbon reduction initiatives. The higher the number, the greater the share of investments in investee companies without carbon reductions initiatives.

#### **Biodiversity**

**Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas** means the weight of investments in investee companies that are directly involved in controversies that negatively affect biodiversity sensitive areas. Activities negatively affecting biodiversity-sensitive areas' means activities that (a) lead to the deterioration of natural habitats and the habitats of species and disturb the species for which a protected area has been designated; where (b) none of the conclusions, mitigation measures or impact assessments adopted pursuant to defining regulatory frameworks or their equivalents have been implemented. The higher the number, the larger the share of investments in investee companies whose sites or operations are located in or near biodiversity sensitive areas, where their activities have adverse effects on these environments.

#### **Water – Emissions to water**

**Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)** means emissions of priority substance (waste) such as direct emissions of nitrates phosphates and pesticides. This indicator discloses tons of chemical emissions into water by the investee companies per million invested.

The higher the number of emissions, the greater the adverse impact.

#### **Hazardous waste**

**Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)** means waste with properties that make it dangerous or are capable of having a harmful effect on human health or the environment, such as explosive, irritant or infectious substances. This indicator discloses tons of hazardous waste by the investee companies per million invested.

The higher the number, the greater the adverse impact

#### **Social and employee matters**

***Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)***

means the share of investments in investee companies in violation of UN Global Compact Principles (UNGS) and OECD Guidelines for Multinational Enterprises (“guidelines”). UN GC principles are the ten Principles of the United Nations Global Compact. The higher the number, the greater the share of investments in companies that are in violation of UNGC principles and OECD guidelines.

***Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)***

means the share of investee companies that lack policies or grievance/complaints handling mechanisms, to monitor compliance with the UNGC principles or OECD guidelines. This indicator discloses the share of investments in investee companies lacking processes and compliance mechanisms. The higher the number, the greater the share of investments in investee companies lacking processes and compliance mechanisms.

***Unadjusted gender pay gap (average)***

means the difference between average gross hourly earnings of male paid employees and of female paid employees as a percentage of average gross hourly earnings of male paid employees. The higher the number, the greater the average gender pay gap among the investee companies

***Board gender diversity (Average ratio of female to male)***

means the administrative, management or supervisory body of an investee company. This indicator discloses the average ratio of female to male board members in the fund’s investee companies. The lower the ratio, the smaller the representation of female board members, and the greater the gap to the male representation.

***Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)***

means anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)

***Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)***

means a natural person who reports or publicly discloses information on breached acquired in the context of his or her work-related activities.

This indicator discloses the share of investments in investee companies with insufficient of policies on the protection of whistleblowers. The higher the share, the greater the weight of investments in investee companies with insufficient of policies on the protection of whistleblowers, calculated as a weighted average.

***Lack of human rights policy (Share of investments without a human rights policy)***

means a policy commitment approved at board level on human rights that the economic activities of the investee company shall be in line with the UN Guiding Principles on Business and Human Rights. This indicator discloses the weight of investments in companies lacking human rights policy. The higher the number, the greater the share of investments in investee companies lacking human rights policy..

***Indicators applicable to investments in sovereigns and supra nationals***

***GHG intensity of investee countries (Emissions / GDP)***

means tons CO<sub>2</sub> (total GHG emissions) equivalents emitted per million of country’s GDP, i.e. a measurement of GHG emitted per million of GDP generated.

The higher the number, the greater is the GHG emissions and the larger the adverse impacts.

***Average Corruption Score***

means "the abuse of entrusted power for private gain", including but not limited to bribing of foreign public officials, bribing domestic public officials, improper trading, embezzlement, and obstruction of justice, among others. This indicator is reported through a score, i.e. a numeric grade from 1-4 (where 1 is worst and 4 is the best score) for the underlying sovereign investments.

***Non-cooperative tax jurisdictions***

means jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes. This indicator discloses the share of investments in non-cooperative tax jurisdictions as defined by in the EU list. The higher the number, the greater the percentage of the fund is invested into non-cooperative tax jurisdictions as defined by the EU, calculated as a weighted average

***Average rule of law***

means that the political and judicial systems are predictable and act in the interest of society, fostering economic and social development. This indicator discloses a numeric grade from 1-4 (where 1 is worst and 4 is the best score) for the underlying sovereign investments of the fund, calculated as a weighted average.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Aktiv Förmögenhetsförvaltning

Legal entity identifier: 54930060Y487AD62NS45

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

## 6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### Inclusions – Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 77%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 79%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Exclusions

Indicator: The number of excluded investments in the fund’s portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund’s investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank’s exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio

Alcohol	295	0	0.0%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

## ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 2% as based on revenue can be attributed with 1.2% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 93% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	598 / 82%	1,412 / 86%	1,300 / 85%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	480 / 82%	1,057 / 86%	1,219 / 85%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	112,420 / 82%	141,256 / 86%	113,353 / 85%
04	Total GHG emissions (tons)	113,498 / 82%	143,725 / 86%	115,873 / 85%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	579 / 82%	422 / 86%	303 / 85%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	2,548 / 82%	1,027 / 86%	973 / 85%

11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	29% / 82%	32% / 86%	52% / 85%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 82%	0% / 86%	0% / 85%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 4%	0 / 6%	0 / 8%

<b>Waste – Hazardous waste and radioactive waste ratio</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	0.05 / 35%	<1 / 40%	0 / 5%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 82%	0% / 86%	0% / 85%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	10% / 82%	10% / 86%	10% / 84%
17	Unadjusted gender pay gap (average)	-4% / 6%	-24% / 3%	13% / 4%
18	Board gender diversity (Average ratio of female to male)	41% / 82%	42% / 86%	42% / 84%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 82%	0% / 86%	0% / 85%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 82%	<1% / 86%	0% / 73%
21	Lack of human rights policy (Share of investments without a human rights policy)	51% / 82%	56% / 86%	5% / 84%

<b>The indicators below apply only to sovereigns and supranationals (represents 6% of the total investments)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
22	GHG intensity of investee countries (Emissions / GDP)	220 / 100%	102 / 100%	115 / 100%
23	Investee countries subject to social violations (percentage)	0 (0%) / 100%	0 (0%) / 100%	0 (0%) / 100%
24	Average Corruption Score	3 / 100%	3 / 100%	4 / 100%
25	Non-cooperative tax jurisdictions	0 / 100%	0 / 100%	0 / 100%
26	Average rule of law score	3 / 100%	3 / 100%	3 / 100%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 10 engagement activities were logged for issuers in the fund for issues relating to these indicators. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 4 engagement activities were logged for issuers in the fund relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

## Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 7 engagement activities were logged for issuers in the fund in relation to these issues. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 0 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Stadshypotek Ab 2% 01.09.2028	SE0011062892	Financials	9.4%	SE
Danske Hypotek Ab 1% 17.12.2025	SE0013877214	Financials	7.3%	SE

Sandvik Ab	SE0000667891	Industrials	2.7%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 50% in sustainable investments.

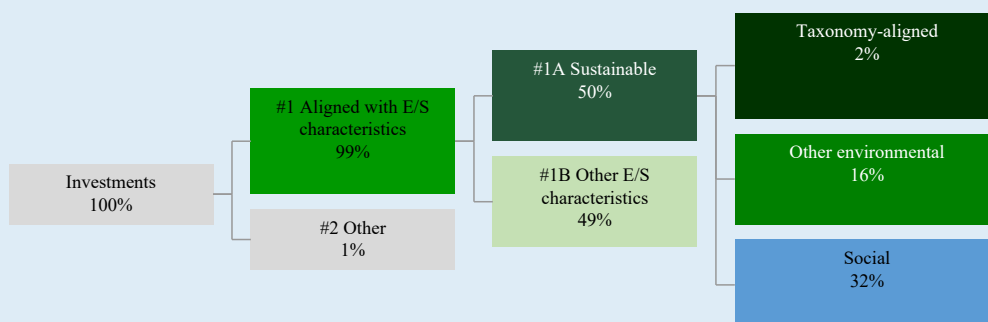

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	98	99	99
#2 Other	2	1	1
#1A Sustainable	21	39	50
#1B Other E/S Characteristics	77	60	49
Taxonomy-aligned	1	2	2
Other environmental	12	20	16
Social	8	18	32

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>

Energy	Oil & Gas Storage & Transportation	No investments
Energy	Coal & Consumable Fuels	No investments
No sector data		1.27%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported shared of economic activities aligned with the EU Taxonomy of 2% as based on revenue can be attributed with 1.2% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

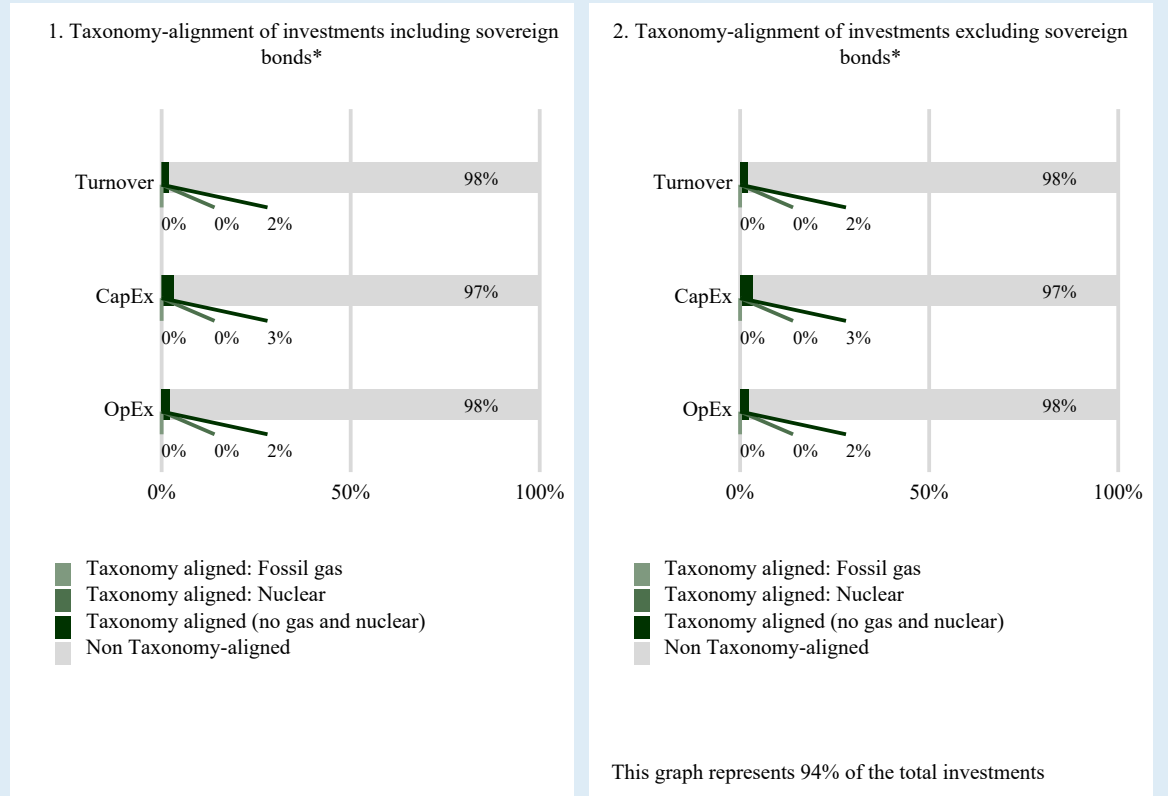

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	2	2
Investments aligned with the EU taxonomy (enabling activities)	1	0	2
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 32 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity .

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supnationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 10 engagements have been registered on climate/GHG related topics, 4 for biodiversity, 0 on hazardous waste and water emissions, and 7 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV China  
Legal entity identifier: 5493008QM35GY8URK268

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	29	2.3%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	4	0.2%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	27	2.2%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	18	2.9%	0
Tar sands	53	0	0.0%	0
Tobacco	120	1	0.1%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	416 / 100%	691 / 100%	1,970 / 100%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	243 / 100%	317 / 100%	499 / 100%
03 Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	4,685 / 100%	6,277 / 100%	3,711 / 100%
04 Total GHG emissions (tons)	5,344 / 100%	7,285 / 100%	6,179 / 100%
05 Carbon footprint (tCO <sub>2</sub> e / m€ invested)	476 / 100%	561 / 100%	347 / 100%

### Actions taken in relation to indicators on investee companies

#### GHG Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 10 engagement activities were logged for issuers in the fund for issues relating to these indicators.

#### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others

associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 13 engagement activities were logged for issuers in the fund in relation to these issues.

### Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns or supranationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	97	98	98
#2 Other	3	2	2
#1A Sustainable	4	N/A	N/A
#1B Other E/S Characteristics	93	N/A	N/A
Taxonomy-aligned	4	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Communication Services	Interactive Media & Services	12.62%

No sector data		0.01%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

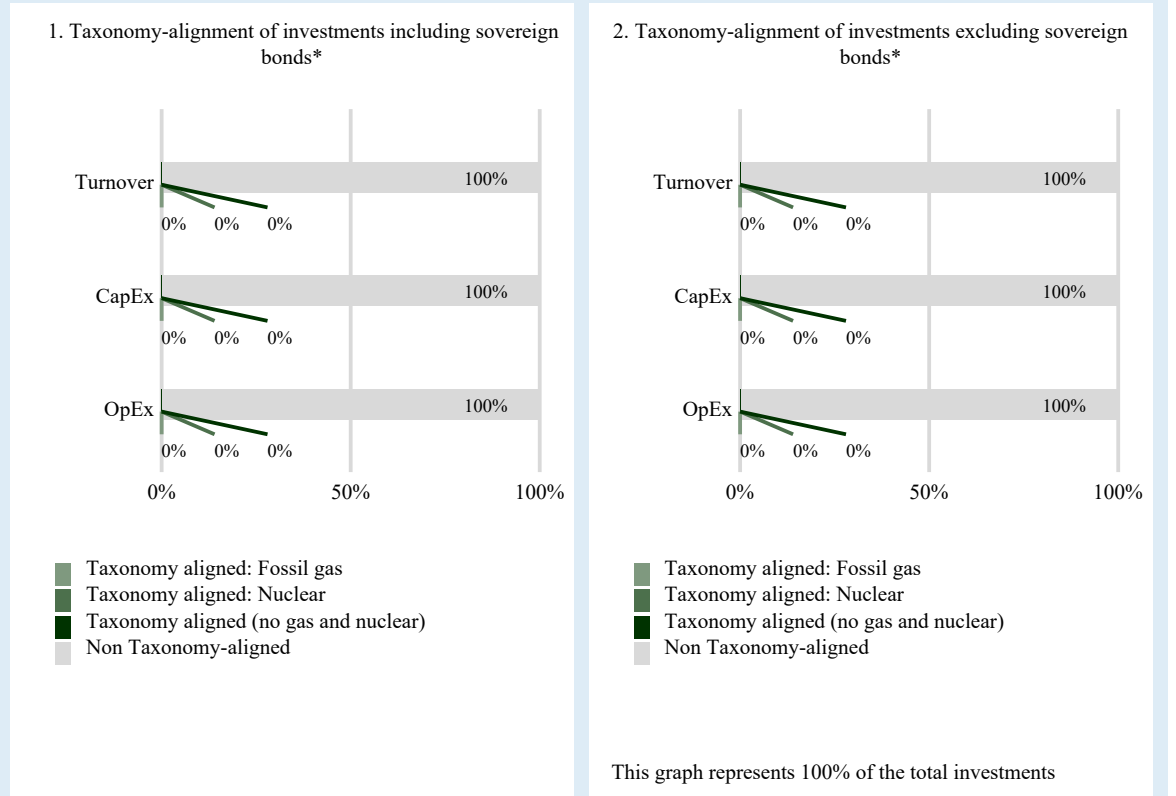

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	4	0	0
Investments aligned with the EU taxonomy (enabling activities)	3	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 10 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 1 on hazardous waste and water emissions, and 13 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Danish Bond

Legal entity identifier: 549300TV6IZQ3FWIF807

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 83% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	0 / 66%	0 / 66%	0 / 67%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 0 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded.

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator.

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund’s extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators.

##### **Social and Employee matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank’s extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than

100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 0 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators.

#### Indicators applicable to sovereigns and supranationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 0 engagement activities were logged for issuers in the fund in relation to these indicators.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	95	97	98
#2 Other	5	3	2
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	54.87%
Financials	Thriffs & Mortgage Finance	29.96%
Government bonds		15.17%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

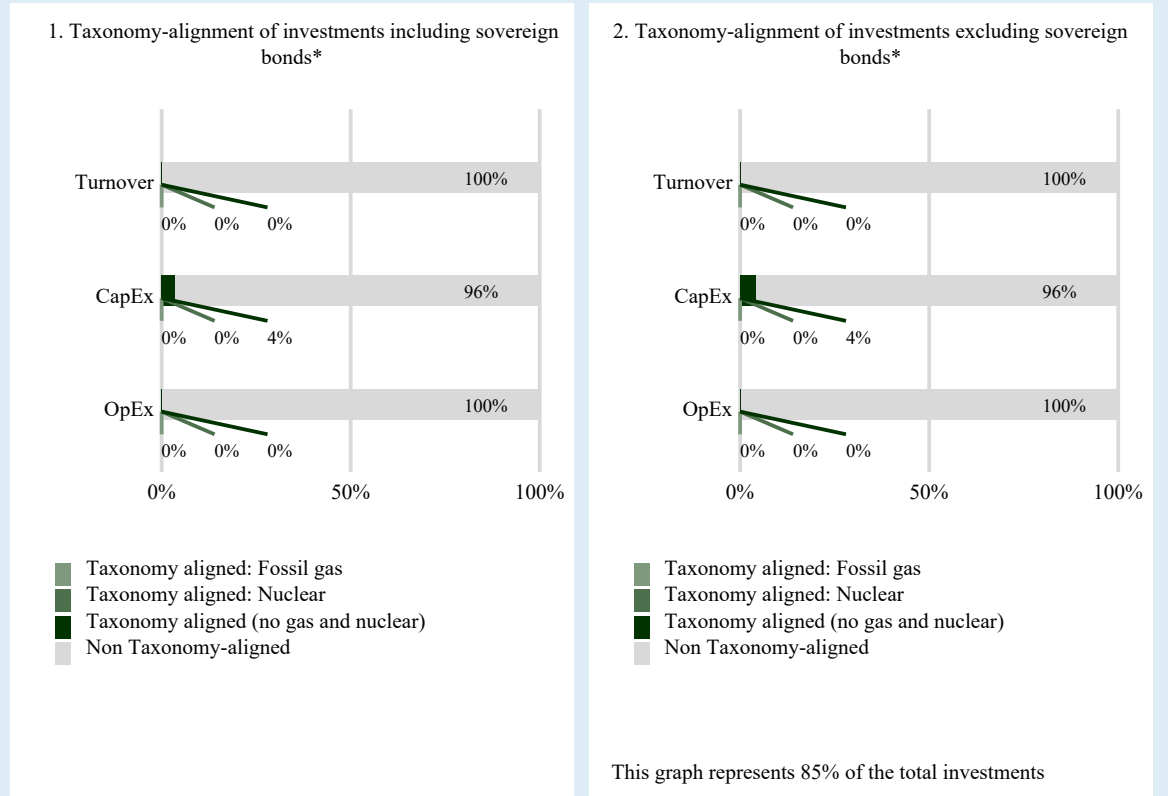

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	0	0
Investments aligned with the EU taxonomy (enabling activities)	N/A	0	0
Investments aligned with the EU taxonomy (transitional activities)	N/A	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity .

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 0 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Danish Mortgage Bond

Legal entity identifier: 549300B6KUUT2F7KZP39

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	0
Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 89% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	0 / 60%	1 / 62%	1 / 67%

26	Average rule of law score	3 / 100%	3 / 100%	3 / 100%

### **Actions taken in relation to indicators on investee companies**

#### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 0 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded.

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator.

#### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators.

#### **Social and Employee matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended

sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 0 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators.

#### Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 0 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	99	99	99
#2 Other	1	1	1
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	55.73%
Financials	Thriffs & Mortgage Finance	34.85%
Government bonds		9.42%
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

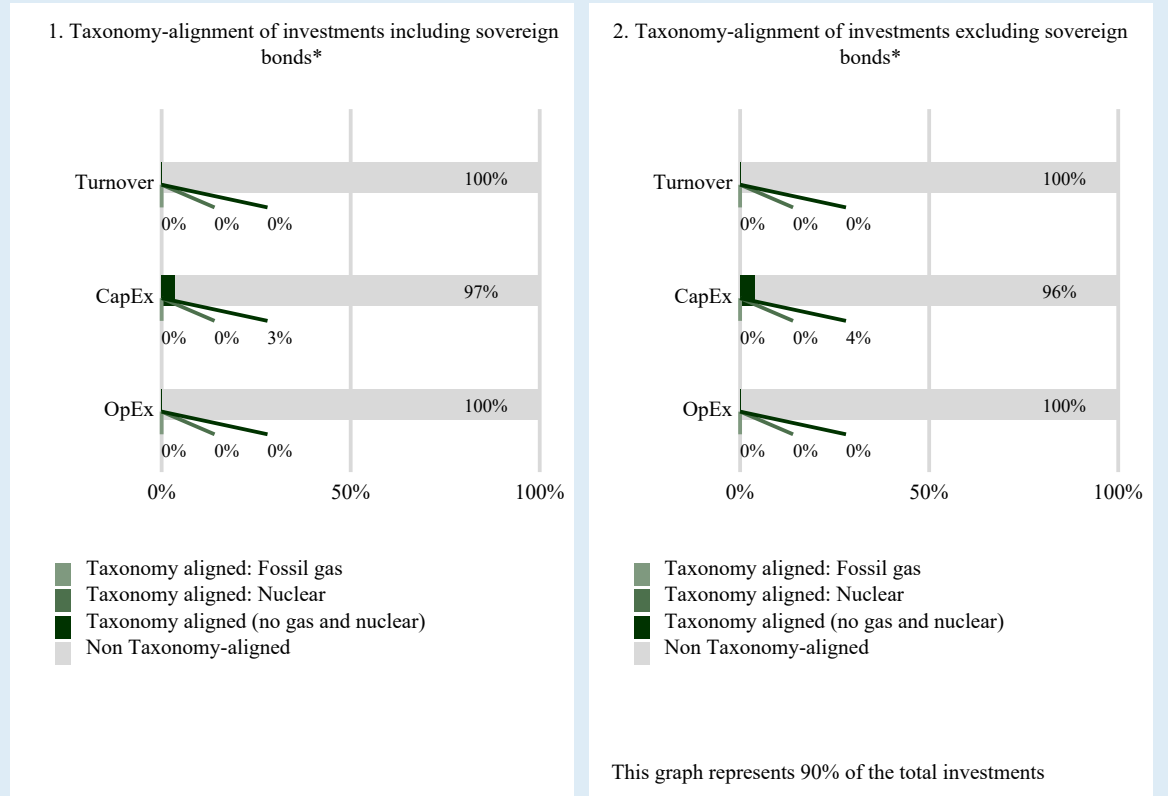

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	0	0
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity .

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 0 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Denmark Focus

Legal entity identifier: 549300XWJ5OKA3UNM348

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

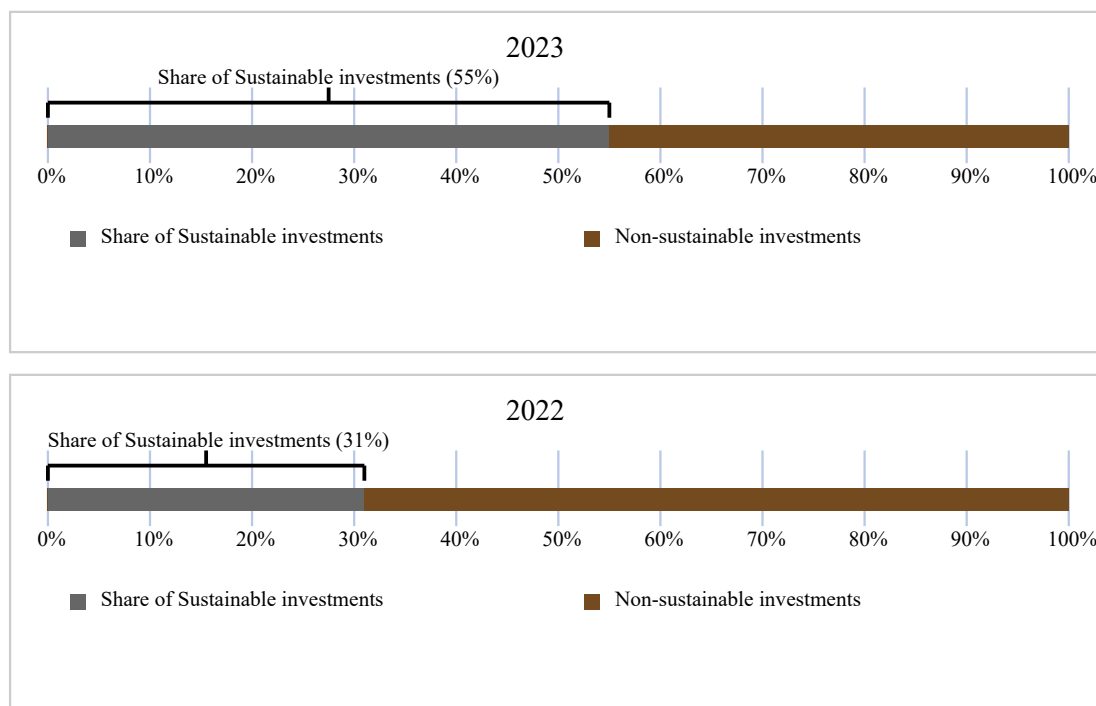

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 15% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0

Statens pensjonsfond utland	177	1	0.4%	0
Tar sands	53	0	0.0%	0
Tobacco	120	1	0.4%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services ("product lines") identified as contributing to one or more SDGs according to Danske Bank's SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see "Product lines aligned with the UN SDGs").

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?"). The reported share of economic activities aligned with the EU Taxonomy of 7% as based on revenue can be attributed with 4.3% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 99% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,874 / 99%	1,926 / 99%	4,185 / 100%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	75 / 99%	75 / 99%	176 / 100%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	71,568 / 99%	9,721 / 99%	49,458 / 100%
04	Total GHG emissions (tons)	73,517 / 99%	11,722 / 99%	53,819 / 100%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	2,317 / 99%	386 / 99%	664 / 100%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	3,069 / 99%	651 / 99%	1,456 / 100%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	9% / 99%	9% / 99%	6% / 100%
08	Share of non-renewable energy – Consumption	54% / 78%	52% / 61%	79% / 62%
09	Share of non-renewable energy – Production	<1% / 99%	<1% / 99%	<1% / 100%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	85%	83%	51%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 99%	0% / 99%	0% / 100%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	2% / 91%	5% / 96%	5% / 99%
17	Unadjusted gender pay gap (average)	6% / 10%	11% / 4%	8% / 9%
18	Board gender diversity (Average ratio of female to male)	40% / 99%	40% / 99%	41% / 100%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 99%	0% / 99%	0% / 100%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 95%	0% / 96%	0% / 85%
21	Lack of human rights policy (Share of investments without a human rights policy)	15% / 95%	30% / 96%	0% / 99%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 35 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 6 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 18 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Danske Bank	DK0010274414	Financials	9.7%	DK
Novo Nordisk B	DK0062498333	Health Care	9.4%	DK
Vestas Wind Systems	DK0061539921	Industrials	8.4%	DK
Ap Moller - Maersk B	DK0010244508	Industrials	6.7%	DK
Dsv	DK0060079531	Industrials	6.2%	DK
Iss	DK0060542181	Industrials	5.4%	DK
Nkt	DK0010287663	Industrials	5.2%	DK
Novonosis (Novozymes) B	DK0060336014	Materials	5.1%	DK
Royal Unibrew	DK0060634707	Consumer Staples	5.1%	DK
Flsmidth & Co.	DK0010234467	Industrials	5.1%	DK
Orsted	DK0060094928	Utilities	4.9%	DK
Alk-Abello B	DK0061802139	Health Care	4.7%	DK
Gn Store Nord	DK0010272632	Health Care	4.5%	DK
Alm Brand	DK0015250344	Financials	4.3%	DK
Coloplast B	DK0060448595	Health Care	4.2%	DK

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 59% in sustainable investments.

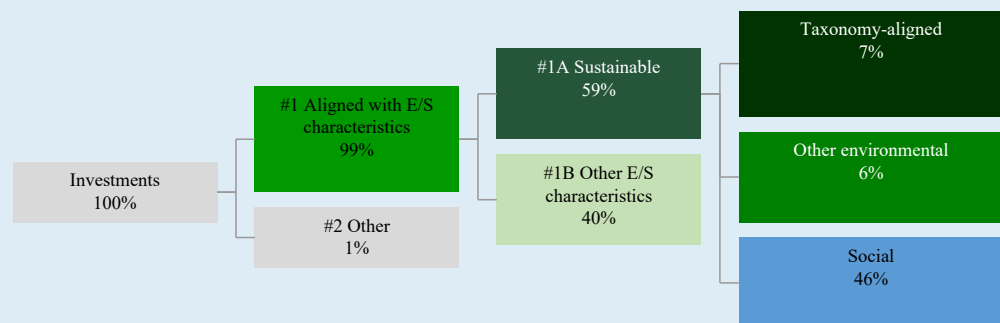

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	99	98	99
#2 Other	1	2	1
#1A Sustainable	31	55	59
#1B Other E/S Characteristics	68	43	40
Taxonomy-aligned	7	10	7
Other environmental	5	6	6
Social	19	39	46

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	13.21%
Health Care	Pharmaceuticals	12.40%
Industrials	Marine Transportation	7.21%
Consumer Staples	Brewers	6.99%
Financials	Property & Casualty Insurance	5.70%
Industrials	Air Freight & Logistics	5.66%
Industrials	Diversified Support Services	5.27%
Industrials	Construction Machinery & Heavy Transportation Equipment	4.64%
Industrials	Construction & Engineering	3.94%
Health Care	Health Care Supplies	3.66%
Health Care	Biotechnology	3.39%

Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported shared of economic activities aligned with the EU Taxonomy of 7% as based on revenue can be attributed with 4.3% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	7	10	7
Investments aligned with the EU taxonomy (enabling activities)	4	7	4
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 6 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 46 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 35 engagements have been registered on climate/GHG related topics, 6 for biodiversity, 1 on hazardous waste and water emissions, and 18 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Eastern Europe Class WA d

Legal entity identifier: 549300V39DJD5D10CB80

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not take into account principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not able to monitor, prioritise or report on principal adverse impacts.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Yandex Nv Class A	NL0009805522	Communication Services	41.2%	RU
Vk Ipjsc	RU000A106YF0	Communication Services	25.6%	RU
Gazprom Adr (Gb)	US3682872078	Energy	23.1%	RU
Capitea S.A.	PLGTBCK00297	Financials	3.0%	PL
Novatek Pjsc (Gdr)	US6698881090	Energy	0.5%	RU

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments. **What was the asset allocation?**

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	N/A	27	33
#2 Other	N/A	73	67
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Information Technology	Systems Software	73.05%
Energy	Integrated Oil & Gas	24.91%
Financials	Specialized Finance	2.04%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as KPI.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	N/A	0	0
Investments aligned with the EU taxonomy (enabling activities)	N/A	0	0
Investments aligned with the EU taxonomy (transitional activities)	N/A	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity .

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 0 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Emerging Markets Debt Hard Currency  
Legal entity identifier: 5493008AKHKXYZJ7FL19

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	3	0.7%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	1	0.7%	1
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	1	0.3%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 24% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	3,111 / 15%	3,802 / 21%	8,038 / 17%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1,187 / 15%	711 / 21%	1,592 / 17%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	15,516 / 15%	11,522 / 21%	39,913 / 17%
04	Total GHG emissions (tons)	19,814 / 15%	16,035 / 21%	49,544 / 17%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	1,698 / 15%	917 / 21%	1,989 / 17%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	2,973 / 15%	2,181 / 21%	3,296 / 17%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	2% / 14%	6% / 21%	7% / 16%

20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	7% / 11%	0% / 18%	0% / 7%
21	Lack of human rights policy (Share of investments without a human rights policy)	87% / 11%	64% / 18%	20% / 14%

<b>The indicators below apply only to sovereigns and supranationals (represents 59% of the total investments)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
22	GHG intensity of investee countries (Emissions / GDP)	457 / 80%	438 / 80%	564 / 80%
23	Investee countries subject to social violations (percentage)	55 (98%) / 80%	51 (96%) / 80%	48 (96%) / 80%
24	Average Corruption Score	1 / 80%	1 / 80%	1 / 80%
25	Non-cooperative tax jurisdictions	2 / 80%	<1 / 80%	<1 / 80%
26	Average rule of law score	1 / 80%	1 / 80%	1 / 80%

### **Actions taken in relation to indicators on investee companies**

#### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 4 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded.

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 2 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator.

#### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 2 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators.

#### **Social and Employee matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended

sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 2 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators.

#### Indicators applicable to sovereigns and supranationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 11 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

### What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	81	82	83
#2 Other	19	18	17
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Multi-Sector Holdings	8.44%
Financials	Diversified Banks	6.80%
Energy	Integrated Oil & Gas	2.00%
Utilities	Electric Utilities	1.18%
Industrials	Rail Transportation	1.00%
Energy	Oil & Gas Refining & Marketing	0.94%
Information Technology	Application Software	0.94%
Materials	Diversified Metals & Mining	0.77%
Consumer Discretionary	Household Appliances	0.56%
Consumer Discretionary	Leisure Facilities	0.49%
Industrials	Construction & Engineering	0.39%
Consumer Discretionary	Homebuilding	0.33%
Industrials	Passenger Airlines	0.26%
Financials	Life & Health Insurance	0.22%
Industrials	Airport Services	0.18%
Utilities	Renewable Electricity	0.18%
Government bonds		44.80%
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Storage & Transportation	No investments
No sector data		30.51%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

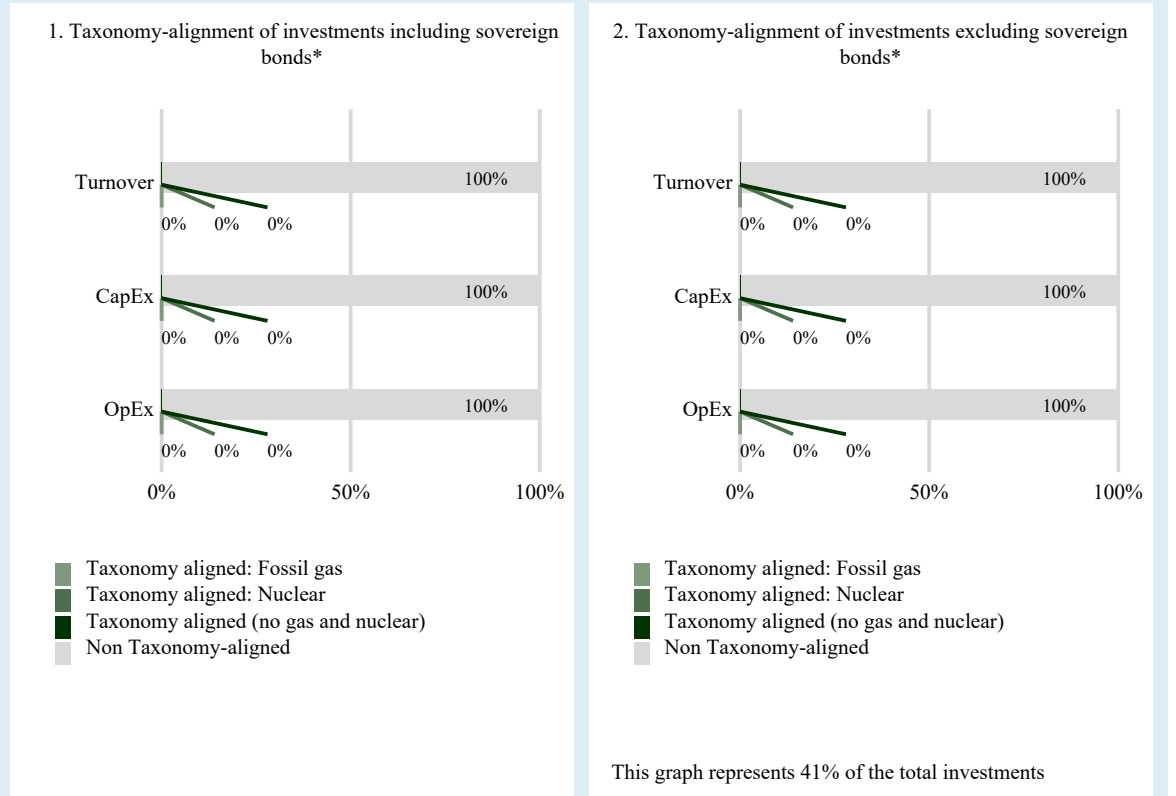

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	0	0
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 11 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 4 engagements have been registered on climate/GHG related topics, 2 for

biodiversity, 2 on hazardous waste and water emissions, and 2 on social and employee matters.

### **How did this financial product perform compared to the reference benchmark?**

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name: Danske Invest SICAV Emerging Markets Sustainable Future**  
**Legal entity identifier: 549300EKECJZY2H6FG16**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: 32%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: 64%

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### To what extent was the sustainable investment objective of this financial product met?

The objective of the sustainable investments of the fund was to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that

are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the breakdown below (see “Product lines aligned with the SDGs”).

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

### Breakdown of the sustainable investments’ contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown demonstrates the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "How did the sustainability indicators perform?") which is generally based on average values for the year.

### Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
2. Environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
3. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
4. Certain minimum environmental safeguards through exclusions.
5. Certain minimum ethical and social safeguards through exclusions.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies, including through voting.

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the sustainable investment objective and other environmental and/or social characteristics of the fund. The indicators are reported as an annual average value unless otherwise stated herein. In relation to active ownership values are reported as the accumulated value end of year.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the SFDR Reading Guide in this report and the document “Sustainability-related disclosure”, which is available under the heading “Sustainability-related disclosures for our funds” at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable Investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank’s SDG Model, which measures a company’s positive contribution to the SDGs on the basis of the issuer’s revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund’s allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see “To what extent was the sustainable investment objective of this financial product met?”.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

**Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 98%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

## Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 81%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the the fund or benchmark.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	15	0.7%	0
Thermal coal	372	48	1.5%	0
Controversial weapons	64	2	0.0%	0
Commercial gambling	301	3	0.4%	0
Good governance (Enhanced Sustainability Standards)	28	4	0.1%	0
Military equipment	205	10	0.2%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	59	2.9%	0
Fossil Fuel	2149	121	6.8%	0
PAI (Do No Significant Harm)	786	60	10.0%	0

Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	51	2.6%	0
Tar sands	53	0	0.0%	0
Tobacco	120	4	0.1%	0

## Engagements

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers on issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Votings

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

under the heading “Sustainability-related disclosures on our funds”.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles’ on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

### How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the SFDR Reading Guide.

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 97% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	550 / 100%	2,602 / 100%	2,911 / 92%

21	Lack of human rights policy (Share of investments without a human rights policy)	53% / 88%	52% / 87%	49% / 55%

### Actions taken in relation to indicators on investee companies

#### Greenhouse Gas Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels, and 53 on the list for tar sands.

5 engagement activities were logged for issuers in the fund for issues relating to these indicators.

The sustainable investments of the the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”

#### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity.

1 engagement activities were logged for issuers in the fund relating to this indicator.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste.

0 engagement activities were logged for issuers in the fund in this regard.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### Social and Employee Matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 11 engagement activities were logged for issuers in the fund in relation to these issues.

The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The "asset allocation" chart below demonstrates the extent to which the fund invested in sustainability-related investments. As reported the fund invested 97% of its investments in sustainable investments.

### What was the asset allocation?

The fund has invested in sustainable investments in support of its sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "non-sustainable investments".

The asset allocation is calculated against the total market value of the fund's investments. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

For asset allocation in previous reference periods, see the table below the chart.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

Asset allocation of the fund compared to previous reference periods	2022 (%)	2023 (%)	2024 (%)
#1A Sustainable	91	97	97
#2 Not sustainable	10	3	3
Environmental	34	36	32
Social	57	62	64
Taxonomy aligned	2	1	1
#2 Other Environmental	31	35	32

### In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Information Technology	Semiconductors	14.97%
Financials	Diversified Banks	12.67%
Financials	Life & Health Insurance	7.62%

Information Technology	Technology Hardware, Storage & Peripherals	7.52%
Industrials	Electrical Components & Equipment	6.13%
Communication Services	Integrated Telecommunication Services	3.84%
Health Care	Pharmaceuticals	3.57%
Communication Services	Wireless Telecommunication Services	3.27%
Consumer Discretionary	Household Appliances	3.12%
Consumer Discretionary	Automobile Manufacturers	2.65%
Information Technology	IT Consulting & Other Services	2.63%
Financials	Property & Casualty Insurance	2.54%
Financials	Financial Exchanges & Data	2.47%
Information Technology	Electronic Components	2.31%
Industrials	Industrial Machinery & Supplies & Components	2.04%
Industrials	Heavy Electrical Equipment	1.89%
Consumer Staples	Drug Retail	1.87%
Health Care	Health Care Facilities	1.87%
Financials	Multi-line Insurance	1.80%
Consumer Staples	Packaged Foods & Meats	1.77%
Health Care	Health Care Equipment	1.44%
Consumer Staples	Personal Care Products	1.35%
Utilities	Renewable Electricity	1.14%
Health Care	Life Sciences Tools & Services	0.99%
Information Technology	Electronic Manufacturing Services	0.97%
Information Technology	Systems Software	0.86%
Materials	Specialty Chemicals	0.84%
Communication Services	Interactive Media & Services	0.75%
Health Care	Biotechnology	0.69%
Consumer Discretionary	Education Services	0.64%
Real Estate	Real Estate Development	0.61%
Industrials	Industrial Conglomerates	0.51%
Information Technology	Semiconductor Materials & Equipment	0.47%
Health Care	Managed Health Care	0.39%
Real Estate	Industrial REITs	0.39%
Materials	Diversified Metals & Mining	0.38%
Industrials	Rail Transportation	0.38%
Industrials	Construction & Engineering	0.35%
Consumer Discretionary	Leisure Products	0.29%
Financials	Diversified Financial Services	0.01%
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Integrated Oil & Gas	No investments

Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy for the reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy. The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG."

The reported share of economic activities aligned with the EU Taxonomy of 0.5% as based on revenue can be attributed with 0.5% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

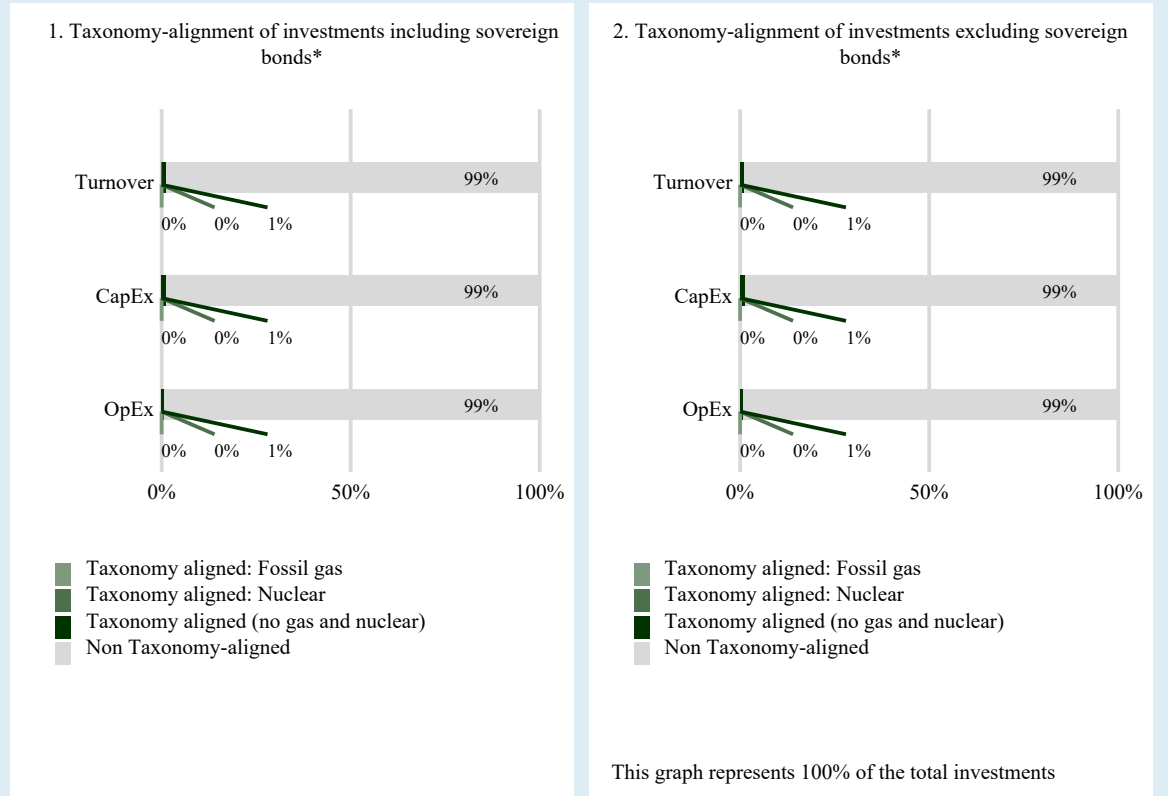

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	1	1
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities) - Fund	1	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 32%.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 64%.

## What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

## What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 5 engagements have been logged on climate/GHG related topics, 1 for biodiversity, 0 on hazardous waste and water emissions, and 11 on social and employee matters.

### **How did this financial product perform compared to the reference sustainable benchmark?**

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Euro High Yield Bond

Legal entity identifier: 549300WCB1N51WML0156

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

*Exclusions on Fossil Fuel was added in November 2024*

*Exclusions on Alcohol was added in November 2024*

*Exclusions on Commercial gambling was added in November 2024*

*Exclusions on Military Equipment was added in November 2024*

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other

international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.

5. Certain minimum environmental safeguards through exclusions.
6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 25% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**Inclusions – Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 68%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 70%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio

Alcohol	295	0	0.0%	0
Thermal coal	372	2	0.8%	0
Controversial weapons	64	1	1.4%	0
Commercial gambling	301	5	1.6%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	13	5.2%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	1	0.6%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 3% as based on revenue can be attributed with 1.4% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 97% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	208 / 76%	97 / 79%	138 / 72%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	74 / 76%	44 / 79%	61 / 72%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	4,491 / 76%	2,660 / 79%	883 / 72%
04	Total GHG emissions (tons)	4,773 / 76%	2,801 / 79%	1,081 / 72%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	1,557 / 76%	1,467 / 79%	316 / 72%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,874 / 76%	1,632 / 79%	748 / 72%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	3% / 68%	3% / 74%	2% / 66%
08	Share of non-renewable energy – Consumption	53% / 34%	56% / 35%	76% / 22%
09	Share of non-renewable energy – Production	0% / 66%	1% / 74%	1% / 66%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	42%	49%	23%
	Agriculture, forestry and fishing	0	0	0
	Mining and quarrying	0	0	0
	Manufacturing	<1	1	<1
	Electricity, gas, steam and air conditioning supply	0	1	3
	Water supply; sewerage, waste management and remediation activities	0	0	0
	Construction	0	0	<1
	Wholesale and retail trade; repair of motor vehicles and motorcycles	<1	0	0
	Transportation and storage	1	0	<1
	Real estate activities	1	1	0
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	44% / 76%	46% / 79%	44% / 72%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 68%	0% / 74%	0% / 66%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 2%	0 / 0%	0 / 1%

14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	3.69 / 30%	<1 / 25%	1 / 1%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 76%	0% / 79%	0% / 72%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	8% / 57%	9% / 60%	13% / 57%
17	Unadjusted gender pay gap (average)	23% / 9%	17% / 10%	14% / 7%
18	Board gender diversity (Average ratio of female to male)	41% / 47%	37% / 57%	39% / 56%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 68%	0% / 74%	0% / 66%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 55%	0% / 59%	0% / 55%
21	Lack of human rights policy (Share of investments without a human rights policy)	46% / 55%	42% / 60%	22% / 57%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 1 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 1 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the

thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 1 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Abanca Corp Bancaria Sa 23.09.2033	ES0265936049	Financials	4.7%	ES
Nexans Sa 5.5% 05.04.2028	FR001400H0F5	Industrials	4.6%	FR

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 35% in sustainable investments.

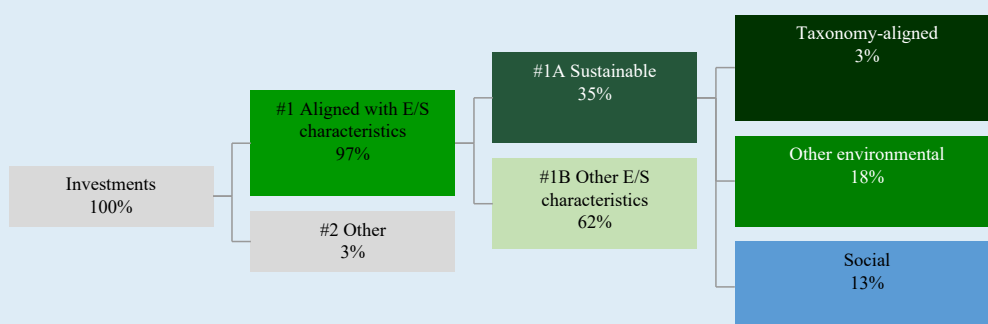

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	95	97	97
#2 Other	5	3	3
#1A Sustainable	21	31	35
#1B Other E/S Characteristics	74	66	62
Taxonomy-aligned	2	2	3
Other environmental	14	15	18
Social	5	14	13

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Multi-Sector Holdings	8.59%

Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
No sector data		14.66%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported shared of economic activities aligned with the EU Taxonomy of 3% as based on revenue can be attributed with 1.4% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

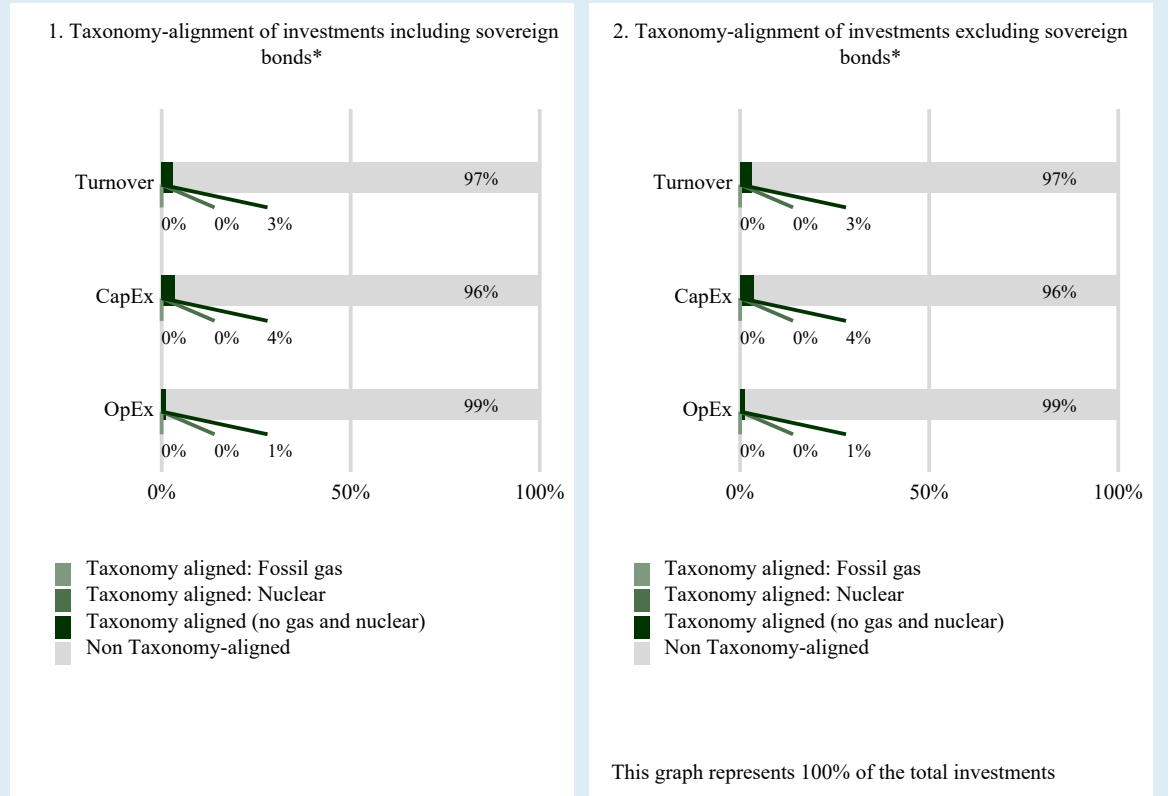

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	2	3
Investments aligned with the EU taxonomy (enabling activities)	0	0	2
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 13 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 1 engagements have been registered on climate/GHG related topics, 1 for biodiversity, 0 on hazardous waste and water emissions, and 1 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Euro Investment Grade Corporate Bond

Legal entity identifier: 549300YC7ESBZ6ZJRV49

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

## 6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 25% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### Inclusions – Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 86%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 84%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Exclusions

Indicator: The number of excluded investments in the fund’s portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund’s investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank’s exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
-----------	-----------------------------------------	---------------------------------	-----------------------	-------------------------------------------------

Thermal coal	372	9	0.6%	0
Controversial weapons	64	2	0.5%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	2	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	9	1.2%	0
Tar sands	53	4	0.2%	0
Tobacco	120	8	0.8%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### **...and compared to previous periods?**

The charts above provide as relevant historical comparisons against previous reporting periods.

### **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 3% as based on revenue can be attributed with 1.7% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	15,876 / 85%	23,899 / 87%	12,531 / 83%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	3,393 / 85%	4,014 / 87%	3,402 / 83%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	217,157 / 85%	217,262 / 87%	127,464 / 83%
04	Total GHG emissions (tons)	236,426 / 85%	245,175 / 87%	143,396 / 83%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	482 / 85%	507 / 87%	347 / 83%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,149 / 85%	1,157 / 87%	758 / 83%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 21 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 3 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 3 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 24 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 57% in sustainable investments.

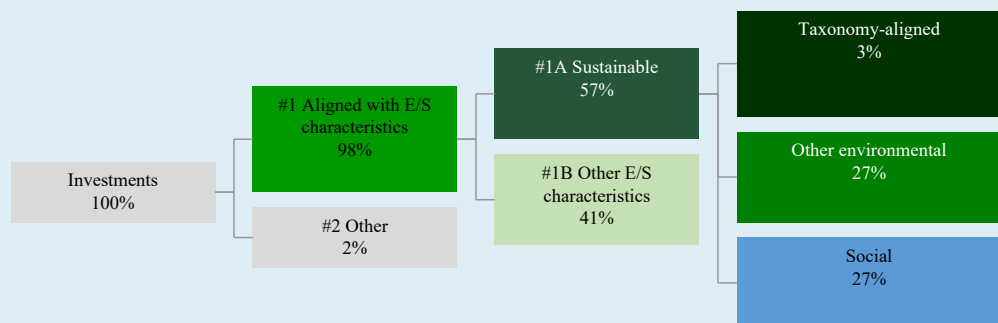

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	98	96	98
#2 Other	2	4	2
#1A Sustainable	40	54	57
#1B Other E/S Characteristics	58	42	41
Taxonomy-aligned	2	2	3
Other environmental	31	34	27
Social	7	18	27

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 3% as based on revenue can be attributed with 1.7% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

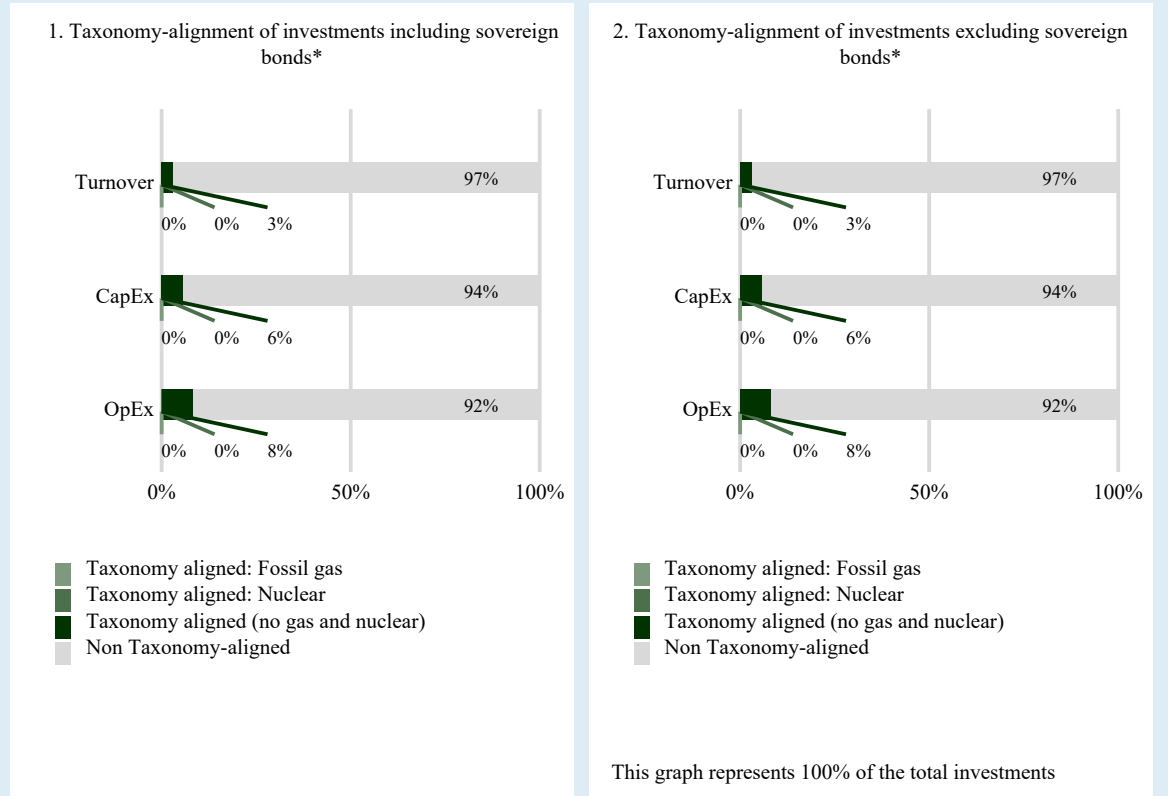

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

## What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	2	3
Investments aligned with the EU taxonomy (enabling activities)	0	1	1
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 27 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 21 engagements have been registered on climate/GHG related topics, 3 for biodiversity, 3 on hazardous waste and water emissions, and 24 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe  
Legal entity identifier: 549300BRKYYP5GO124

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 25% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**Inclusions – Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 96%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

## Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 97%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	2	0.7%	0
Controversial weapons	64	3	1.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	1	0.6%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	7	4.2%	0
Tar sands	53	0	0.0%	0
Tobacco	120	2	1.2%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

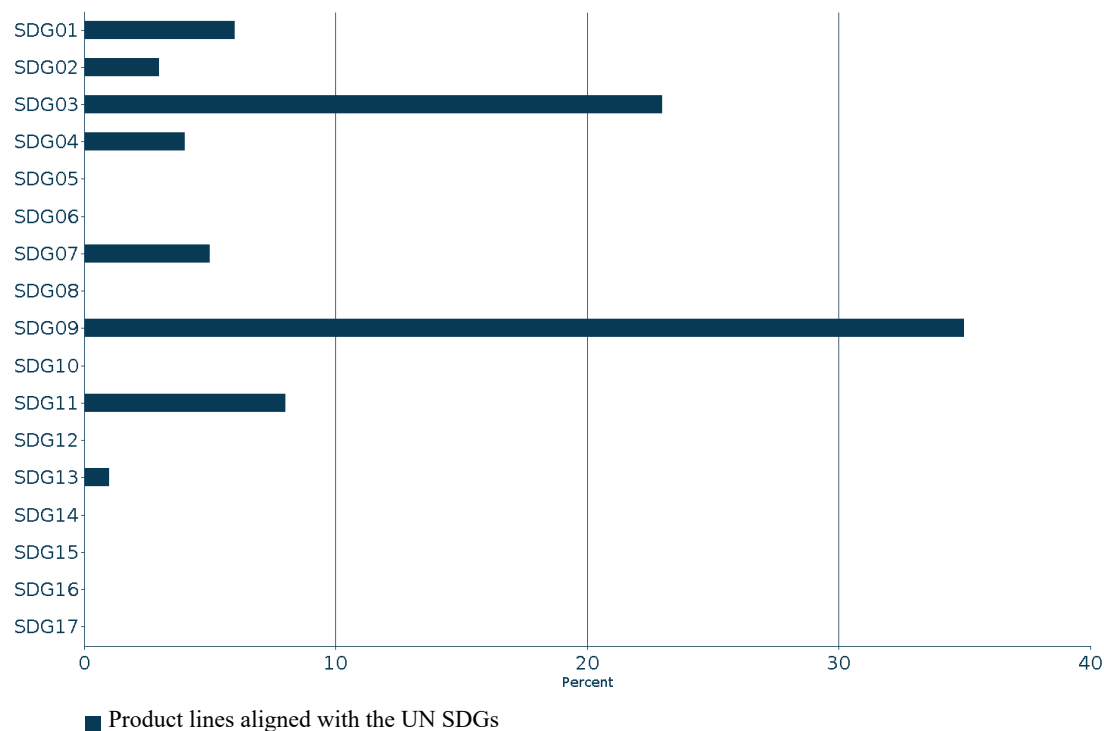

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services ("product lines") identified as contributing to one or more SDGs according to Danske Bank's SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see "Product lines aligned with the UN SDGs").

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?"). The reported share of economic activities aligned with the EU Taxonomy of 4% as based on revenue can be attributed with 2.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,945 / 100%	2,094 / 100%	3,020 / 100%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	713 / 100%	777 / 100%	1,165 / 100%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	53,991 / 100%	55,932 / 100%	57,979 / 100%
04	Total GHG emissions (tons)	57,649 / 100%	58,803 / 100%	62,165 / 100%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	705 / 100%	519 / 100%	503 / 100%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,519 / 100%	1,163 / 100%	1,361 / 100%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	11% / 100%	8% / 100%	8% / 100%
08	Share of non-renewable energy – Consumption	50% / 88%	59% / 85%	74% / 63%
09	Share of non-renewable energy – Production	4% / 91%	4% / 98%	4% / 98%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	97%	96%	63%
	Agriculture, forestry and fishing	0	0	0
	Mining and quarrying	1	1	1
	Manufacturing	<1	1	<1
	Electricity, gas, steam and air conditioning supply	2	1	3
	Water supply; sewerage, waste management and remediation activities	0	0	0
	Construction	0	0	0
	Wholesale and retail trade; repair of motor vehicles and motorcycles	<1	0	0
	Transportation and storage	<1	<1	0
	Real estate activities	0	0	0
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	17% / 100%	20% / 100%	31% / 100%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 100%	0% / 100%	0% / 100%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 8%	0 / 11%	0 / 16%

<b>Waste – Hazardous waste and radioactive waste ratio</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	1.42 / 70%	<1 / 55%	81 / 25%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 100%	0% / 100%	0% / 100%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	4% / 100%	5% / 100%	4% / 100%
17	Unadjusted gender pay gap (average)	5% / 15%	-3% / 8%	9% / 16%
18	Board gender diversity (Average ratio of female to male)	42% / 100%	42% / 100%	40% / 100%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 100%	0% / 100%	0% / 100%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 100%	0% / 100%	0% / 100%
21	Lack of human rights policy (Share of investments without a human rights policy)	13% / 100%	29% / 100%	3% / 100%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 35 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 10 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 5 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 22 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Novo Nordisk B	DK0062498333	Health Care	6.9%	DK
Asml Holding Nv	NL0010273215	Information Technology	6.4%	NL
Nestle S.A.	CH0038863350	Consumer Staples	4.4%	CH
Sap Se	DE0007164600	Information Technology	3.9%	DE
Astrazeneca Plc	GB0009895292	Health Care	3.8%	GB
Shell Plc	GB00BP6MXD84	Energy	3.8%	GB
Novartis Ag	CH0012005267	Health Care	3.6%	CH
Lvmh Moet Hennessy Louis Vuitton	FR0000121014	Consumer Discretionary	3.6%	FR
3i Group Plc	GB00B1YW4409	Financials	3.4%	GB
Deutsche Telekom Ag	DE0005557508	Communication Services	3.3%	DE
Muenchener Rueckversicherungs-	DE0008430026	Financials	3.3%	DE
Schneider Electric Se	FR0000121972	Industrials	3.2%	FR
Totalenergies Se	FR0000120271	Energy	3.2%	FR
Unilever Plc	GB00B10RZP78	Consumer Staples	3.1%	GB
Siemens Ag	DE0007236101	Industrials	3.0%	DE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 57% in sustainable investments.

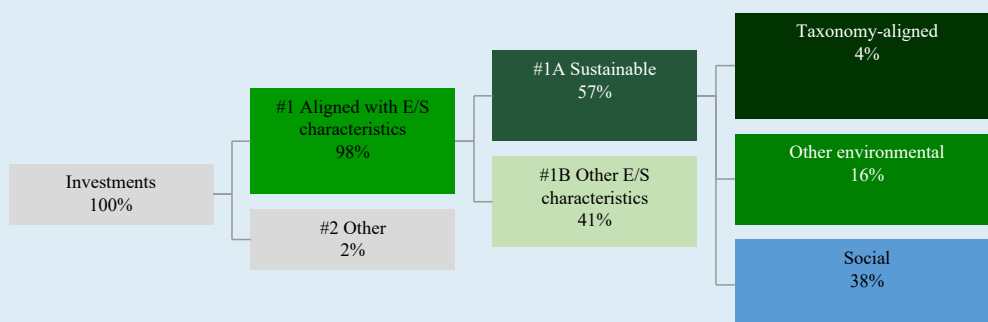

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	98	99	98
#2 Other	2	1	2
#1A Sustainable	33	62	57
#1B Other E/S Characteristics	65	37	41
Taxonomy-aligned	1	2	4
Other environmental	11	23	16
Social	21	37	38

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Health Care	Pharmaceuticals	13.27%
Financials	Diversified Banks	11.08%
Information Technology	Semiconductor Materials & Equipment	5.87%
Energy	Integrated Oil & Gas	4.94%
Industrials	Industrial Machinery & Supplies & Components	4.73%
Consumer Staples	Personal Care Products	4.67%
Consumer Discretionary	Apparel, Accessories & Luxury Goods	4.30%
Communication Services	Integrated Telecommunication Services	4.01%
Information Technology	Application Software	3.93%
Utilities	Electric Utilities	3.55%
Financials	Asset Management & Custody Banks	3.41%
Financials	Reinsurance	3.38%
Industrials	Electrical Components & Equipment	3.04%
Industrials	Airport Services	2.77%
Industrials	Building Products	2.57%
Communication Services	Advertising	2.22%
Industrials	Industrial Conglomerates	2.17%
Consumer Staples	Food Retail	2.10%
Consumer Staples	Packaged Foods & Meats	2.10%
Materials	Diversified Metals & Mining	2.05%
Financials	Multi-line Insurance	2.02%
Consumer Discretionary	Restaurants	1.58%
Materials	Construction Materials	1.57%
Materials	Industrial Gases	1.49%
Real Estate	Real Estate Operating Companies	1.47%

Utilities	Multi-Utilities	1.44%
Consumer Discretionary	Tires & Rubber	1.26%
Consumer Discretionary	Automobile Manufacturers	1.14%
Materials	Paper & Plastic Packaging Products & Materials	0.99%
Industrials	Research & Consulting Services	0.86%
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Coal & Consumable Fuels	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported shared of economic activities aligned with the EU Taxonomy of 4% as based on revenue can be attributed with 2.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\* the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	2	4
Investments aligned with the EU taxonomy (enabling activities)	1	2	2
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 38 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 35 engagements have been registered on climate/GHG related topics, 10 for biodiversity, 5 on hazardous waste and water emissions, and 22 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe High Dividend

Legal entity identifier: 549300DBINW48CGYX190

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 15% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	2	0.7%	0
Controversial weapons	64	3	1.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	1	0.6%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0

Statens pensjonsfond utland	177	7	4.2%	0
Tar sands	53	0	0.0%	0
Tobacco	120	2	1.2%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services ("product lines") identified as contributing to one or more SDGs according to Danske Bank's SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see "Product lines aligned with the UN SDGs").

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?"). The reported shared of economic activities aligned with the EU Taxonomy of 6% as based on revenue can be attributed with 4.5% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 100% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,771 / 98%	1,255 / 100%	843 / 100%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	621 / 98%	476 / 100%	301 / 100%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	39,708 / 98%	23,066 / 100%	12,187 / 100%
04	Total GHG emissions (tons)	42,101 / 98%	24,797 / 100%	13,331 / 100%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	924 / 98%	954 / 100%	701 / 100%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,446 / 98%	1,486 / 100%	1,392 / 100%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	25% / 98%	29% / 100%	25% / 100%
08	Share of non-renewable energy – Consumption	67% / 70%	64% / 73%	83% / 44%
09	Share of non-renewable energy – Production	15% / 95%	18% / 96%	11% / 100%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	95%	99%	88%
	Agriculture, forestry and fishing	0	0	0
	Mining and quarrying	1	1	1
	Manufacturing	1	<1	1
	Electricity, gas, steam and air conditioning supply	2	1	2
	Water supply; sewerage, waste management and remediation activities	0	0	0
	Construction	0	0	0
	Wholesale and retail trade; repair of motor vehicles and motorcycles	<1	<1	<1
	Transportation and storage	0	0	0
	Real estate activities	0	0	0
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	31% / 98%	38% / 100%	37% / 100%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 98%	0% / 100%	0% / 100%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 8%	0 / 11%	0 / 21%

<b>Waste – Hazardous waste and radioactive waste ratio</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	0.77 / 67%	1 / 57%	<1 / 13%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 98%	0% / 100%	0% / 100%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	0% / 98%	5% / 100%	5% / 100%
17	Unadjusted gender pay gap (average)	8% / 25%	-3% / 17%	6% / 22%
18	Board gender diversity (Average ratio of female to male)	41% / 98%	41% / 100%	39% / 99%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 98%	0% / 100%	0% / 100%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 98%	0% / 100%	0% / 100%
21	Lack of human rights policy (Share of investments without a human rights policy)	10% / 98%	35% / 100%	3% / 100%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 21 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 5 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 2 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 14 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Unilever Plc	GB00B10RZP78	Consumer Staples	4.5%	GB
Totalenergies Se	FR0000120271	Energy	4.2%	FR
Zurich Insurance Group Ag	CH0011075394	Financials	4.1%	CH
Siemens Ag	DE0007236101	Industrials	4.1%	DE
Iberdrola S.A.	ES0144580Y14	Utilities	4.1%	ES
Caixabank S.A.	ES0140609019	Financials	4.0%	ES
Cie Generale Des Etablissement	FR001400AJ45	Consumer Discretionary	4.0%	FR
E.On Se	DE000ENAG999	Utilities	4.0%	DE
Novartis Ag	CH0012005267	Health Care	3.9%	CH
Roche Holding Ag	CH0012032048	Health Care	3.9%	CH
Allianz Se	DE0008404005	Financials	3.9%	DE
National Grid Plc	GB00BDR05C01	Utilities	3.9%	GB
Skf Ab B	SE0000108227	Industrials	3.8%	SE
Stellantis Nv	NL00150001Q9	Consumer Discretionary	3.8%	NL
Axa S.A.	FR0000120628	Financials	3.8%	FR

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 60% in sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund’s environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	100	100	100
#2 Other	0	0	0
#1A Sustainable	31	58	60
#1B Other E/S Characteristics	69	42	40
Taxonomy-aligned	2	5	6
Other environmental	10	20	11
Social	19	33	43

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	18.41%
Health Care	Pharmaceuticals	12.77%
Financials	Multi-line Insurance	12.60%
Utilities	Multi-Utilities	6.45%
Utilities	Electric Utilities	5.93%
Energy	Integrated Oil & Gas	5.17%
Communication Services	Integrated Telecommunication Services	4.80%
Consumer Staples	Personal Care Products	4.01%
Consumer Staples	Household Products	3.19%
Consumer Staples	Packaged Foods & Meats	3.16%
Consumer Staples	Food Retail	3.11%
Consumer Discretionary	Tires & Rubber	3.10%
Industrials	Construction Machinery & Heavy Transportation Equipment	2.95%
Industrials	Industrial Machinery & Supplies & Components	2.79%
Financials	Property & Casualty Insurance	2.69%
Materials	Paper Products	2.49%
Industrials	Industrial Conglomerates	2.47%
Consumer Discretionary	Automobile Manufacturers	2.15%
Utilities	Gas Utilities	1.75%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Coal & Consumable Fuels	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 6% as based on revenue can be attributed with 4.5% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

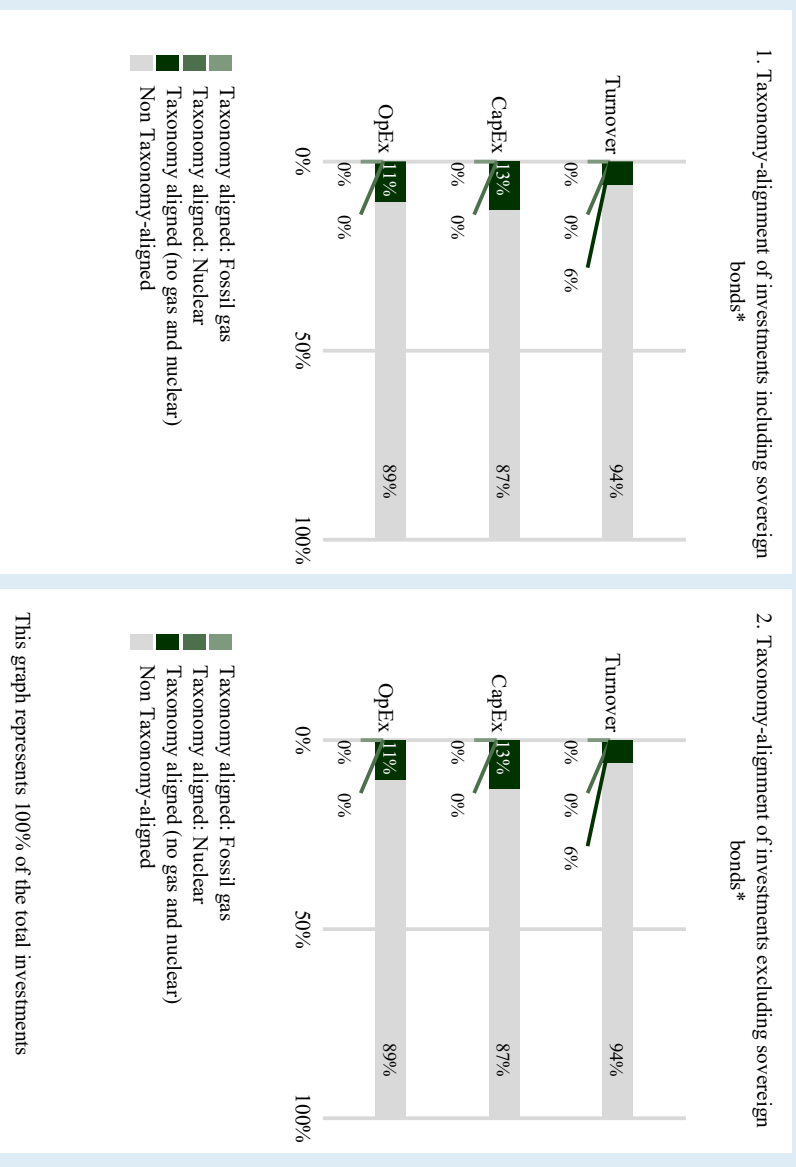

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\* the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	5	6
Investments aligned with the EU taxonomy (enabling activities)	0	3	4
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 43 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 21 engagements have been registered on climate/GHG related topics, 5 for biodiversity, 2 on hazardous waste and water emissions, and 14 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe Long-Short Equity Factors

Legal entity identifier: 549300KX95W1G0YGNP56

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

There was a commitment to conduct active ownership if prompted due to relevant processes and policies. The fund also invested in activities substantially contributing to one or more environmental objectives of the U Taxonomy (see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and "To what extent were the sustainable

investments with an environmental objective aligned with the EU Taxonomy?”).

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

The reported share of economic activities aligned with the EU Taxonomy of 4% is based on revenue as the selected key KPI. The taxonomy-alignment of the fund can be attributed with 2.1% of activities in support of the climate change mitigation objective; 0.0% of activities in support of the climate change adaptation objective; 0.0% of activities in support of sustainable use and protection of water and marine resources, 0.0% of activities in support of pollution prevention and control; and 0.0% of activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities no data is available in relation to which of the environmental objectives the activities of these investments contribute to.

## **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. As the fund's sustainable investments were investments aligned with the EU Taxonomy, the requirements of the EU Taxonomy in relation to environmentally sustainable activities not having a significant harm to other environmental objectives of the EU Taxonomy further safeguarded the requirements in relation to sustainable investments of the fund. In respect to minimum social safeguards, please see the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

For the assessment of alignment with the EU Taxonomy the fund applied the do no significant harm screening criteria of the EU Taxonomy, which do not include separate considerations in relation to the indicators for assessing principal adverse impacts on sustainability factors. These indicators have been addressed in accordance with the general approach of the fund as detailed in the section "How did this financial product consider principal adverse impacts on sustainability factors?".

## **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a ‘do no significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not take into account principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not able to monitor, prioritise or report on principal adverse impacts.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Cfd On Iveco Group Nv (It)	NL0015000LU4	Industrials	1.4%	GB
Stellantis Nv	NL00150001Q9	Consumer Discretionary	1.4%	NL
Daimler Truck Holding Ag	DE000DTR0CK8	Industrials	1.4%	DE
Rockwool B Old	DK0010219153	Industrials	1.2%	DK
Holcim Ag	CH0012214059	Materials	1.2%	CH
Banca Intesa Spa	IT0000072618	Financials	1.2%	IT
Industria De Diseno Textil S.A.	ES0148396007	Consumer Discretionary	1.2%	ES
Drax Group Plc	GB00B1VNSX38	Utilities	1.2%	GB
Hafnia Ltd.	BMG4233B1090	Energy	1.2%	SG
Ssab Ab B	SE0000120669	Materials	1.1%	SE
Novo Nordisk B	DK0062498333	Health Care	1.1%	DK
National Grid Plc	GB00BDR05C01	Utilities	1.1%	GB
Azimut Holding Spa	IT0003261697	Financials	1.1%	IT
Buzzi Spa	IT0001347308	Materials	1.1%	IT
Heidelberg Materials Ag	DE0006047004	Materials	1.1%	DE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

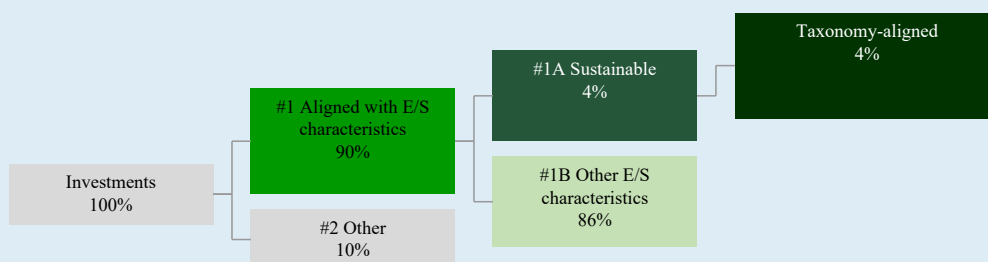

The fund did not invest through a commitment to make sustainable investments. As the fund had 4% investments aligned with the EU-Taxonomy based on revenue, the fund reports those investments as sustainable in the asset allocation graph below.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	N/A	89	90
#2 Other	N/A	12	10
#1A Sustainable	N/A	3	4
#1B Other E/S Characteristics	N/A	86	86
Taxonomy-aligned	N/A	3	4
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 4% as based on revenue can be attributed with 2.1% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\* the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	N/A	3	4
Investments aligned with the EU taxonomy (enabling activities)	N/A	1	2
Investments aligned with the EU taxonomy (transitional activities)	N/A	1	1

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 25 engagements have been registered on climate/GHG related topics, 13 for biodiversity, 6 on hazardous waste and water emissions, and 16 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe Small Cap  
Legal entity identifier: 549300ZMX501C56DA227

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	3	0.3%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	5	0.5%	0
Good governance (Enhanced Sustainability Standards)	28	1	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	1	0.2%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0

Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	2	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	1	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services ("product lines") identified as contributing to one or more SDGs according to Danske Bank's SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see "Product lines aligned with the UN SDGs").

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?"). The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.6% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	298 / 91%	417 / 84%	376 / 74%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	319 / 91%	364 / 84%	321 / 74%

14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	0.18 / 21%	<1 / 14%	<1 / 2%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 91%	0% / 84%	0% / 74%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	18% / 55%	22% / 46%	14% / 29%
17	Unadjusted gender pay gap (average)	-4% / 1%	8% / 2%	9% / 3%
18	Board gender diversity (Average ratio of female to male)	35% / 88%	33% / 84%	32% / 74%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 85%	0% / 79%	0% / 69%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	2% / 60%	4% / 50%	2% / 30%
21	Lack of human rights policy (Share of investments without a human rights policy)	85% / 60%	76% / 50%	56% / 29%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 4 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 2 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 3 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns or supranationals.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Boku Inc.	USU7744C1063	Information Technology	3.9%	US
Jtc Plc	JE00BF4X3P53	Financials	3.5%	JE
Diploma Plc	GB0001826634	Industrials	3.5%	GB
Teqnon Ab	SE0012308088	Industrials	3.2%	SE
Robertet S.A.	FR0000039091	Materials	3.0%	FR
Jdc Group Ag	DE000A0B9N37	Financials	3.0%	DE
Yougov Plc	GB00B1VQ6H25	Communication Services	3.0%	GB
Alpha Group International Plc	GB00BF1TM596	Financials	3.0%	GB
Games Workshop Group Plc	GB0003718474	Consumer Discretionary	2.6%	GB
Niox Group Plc	GB00BJVD3B28	Health Care	2.5%	GB
Dermapharm Holding Se	DE000A2GS5D8	Health Care	2.5%	DE
Addtech Ab B	SE0014781795	Industrials	2.4%	SE
Discoverie Group Plc	GB0000055888	Industrials	2.4%	GB
Pharmanutra Spa	IT0005274094	Consumer Staples	2.3%	IT
Medcap Ab	SE0009160872	Health Care	2.3%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 40% in sustainable investments.

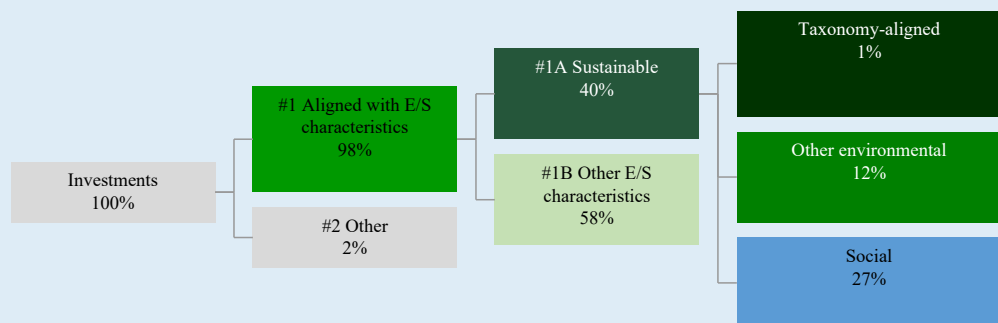

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	96	97	98
#2 Other	4	3	2
#1A Sustainable	6	31	40
#1B Other E/S Characteristics	90	66	58
Taxonomy-aligned	0	1	1
Other environmental	2	12	12
Social	4	19	27

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Information Technology	Application Software	11.64%
Industrials	Trading Companies & Distributors	8.52%
Information Technology	Electronic Equipment & Instruments	7.24%
Health Care	Life Sciences Tools & Services	6.12%
Consumer Discretionary	Leisure Products	5.91%
Financials	Investment Banking & Brokerage	5.71%
Consumer Staples	Personal Care Products	4.94%

Materials	Commodity Chemicals	0.77%
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Coal & Consumable Fuels	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported shared of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.6% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

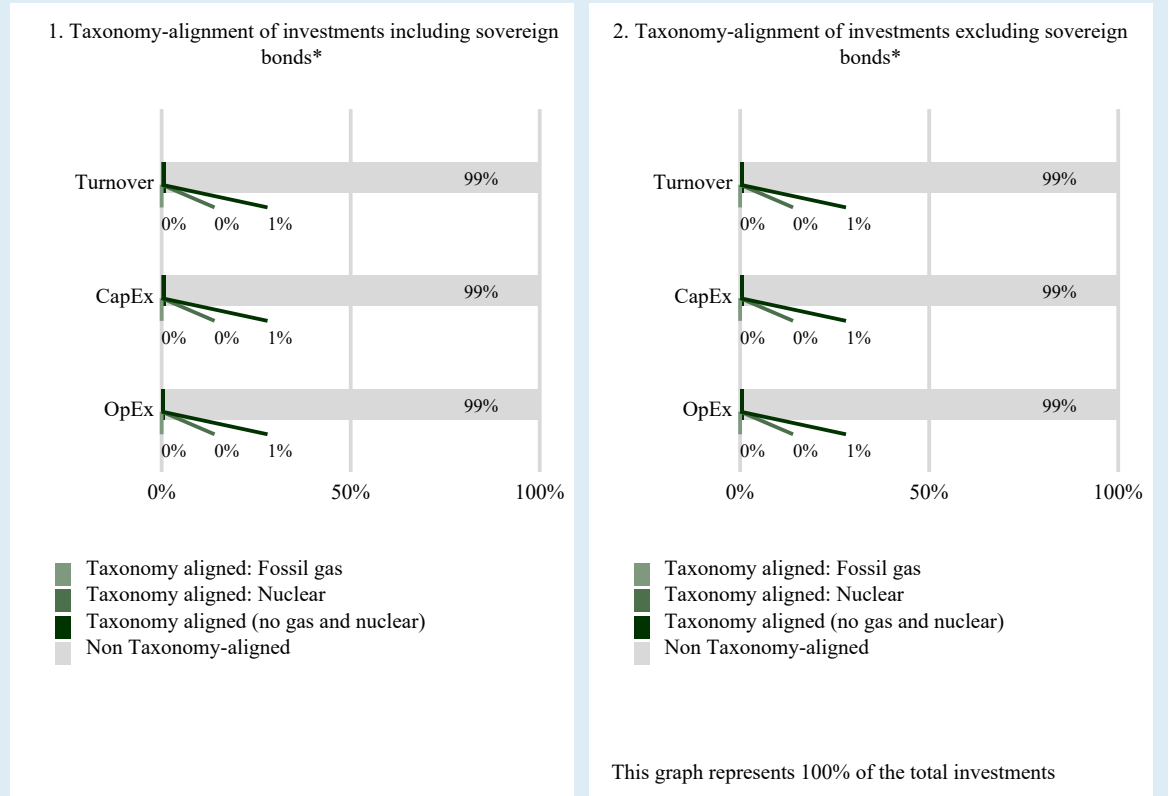

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	1	1
Investments aligned with the EU taxonomy (enabling activities)	0	0	1
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 27 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 4 engagements have been registered on climate/GHG related topics, 2 for biodiversity, 1 on hazardous waste and water emissions, and 3 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name: Danske Invest SICAV European Corporate Sustainable Bond**  
**Legal entity identifier: 5493004X6FWMGJNRJS88**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: 62%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: 36%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### To what extent was the sustainable investment objective of this financial product met?

The objective of the sustainable investments of the fund was to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that

are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the breakdown below (see “Product lines aligned with the SDGs”).

- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects. .

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

### Breakdown of the sustainable investments’ contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown demonstrates the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "How did the sustainability indicators perform?") which is generally based on average values for the year.

## Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
2. Environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
3. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
4. Certain minimum environmental safeguards through exclusions.
5. Certain minimum ethical and social safeguards through exclusions.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the sustainable investment objective and other environmental and/or social characteristics of the fund. The indicators are reported as an annual average value unless otherwise stated herein. In relation to active ownership values are reported as the accumulated value end of year.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the SFDR Reading Guide in this report and the document “Sustainability-related disclosure”, which is available under the heading “Sustainability-related disclosures for our funds” at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable Investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.
- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see “To what extent was the sustainable investment objective of this financial product met?”.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable

Sustainability indicators measure how the sustainable objectives of this financial product are attained

investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

**Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 79%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

### Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 82%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

### Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the the fund or benchmark.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	8	2.1%	0

Thermal coal	372	9	0.6%	0
Controversial weapons	64	2	0.5%	0
Commercial gambling	301	1	0.1%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	2	0.2%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	2	0.0%	0
Fossil Fuel	2149	59	9.0%	0
PAI (Do No Significant Harm)	786	4	0.7%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	4	0.5%	0
Tar sands	53	4	0.2%	0
Tobacco	120	0	0.0%	0

## Engagements

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers on issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the SFDR Reading Guide.

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	11,326 / 80%	13,371 / 82%	18,818 / 82%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	4,285 / 80%	6,579 / 82%	6,721 / 82%
03 Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	280,566 / 80%	368,240 / 82%	117,794 / 82%
04 Total GHG emissions (tons)	296,177 / 80%	388,190 / 82%	143,333 / 82%
05 Carbon footprint (tCO <sub>2</sub> e / m€ invested)	597 / 80%	764 / 82%	323 / 82%

### **Actions taken in relation to indicators on investee companies**

#### **Greenhouse Gas Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels, and 53 on the list for tar sands.

14 engagement activities were logged for issuers in the fund for issues relating to these indicators.

The sustainable investments of the the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity.

4 engagement activities were logged for issuers in the fund relating to this indicator.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste.

1 engagement activities were logged for issuers in the fund in this regard.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Social and Employee Matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 12 engagement activities were logged for issuers in the fund in relation to these issues.

The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Indicators applicable to sovereigns and supranationals**

The fund did not invest in sovereigns and supranationals.

## What was the proportion of sustainability-related investments

The "asset allocation" chart below demonstrates the extent to which the fund invested in sustainability-related investments. As reported the fund invested 98% of its investments in sustainable investments.

### What was the asset allocation?

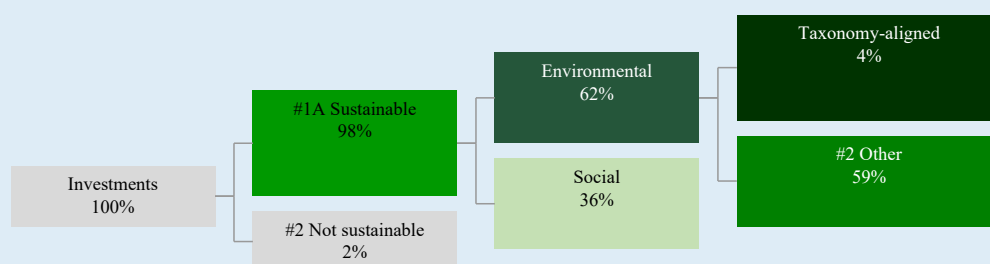

The fund has invested in sustainable investments in support of its sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "non-sustainable investments".

The asset allocation is calculated against the total market value of the fund's investments. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

For asset allocation in previous reference periods, see the table below the chart.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

Asset allocation of the fund compared to previous reference periods	2022 (%)	2023 (%)	2024 (%)
#1A Sustainable	91	95	98
#2 Not sustainable	9	5	2
Environmental	78	70	62
Social	14	25	36
Taxonomy aligned	7	4	4
#2 Other Environmental	71	66	59

### In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy for the reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy. The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG."

The reported shared of economic activities aligned with the EU Taxonomy of 3.6% as based on revenue can be attributed with 2.6% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\* the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	7	4	4
Investments aligned with the EU taxonomy (enabling activities)	1	2	2
Investments aligned with the EU taxonomy (transitional activities) - Fund	0	0	0

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 59%.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 36%.

## What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

## What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 14 engagements have been logged on climate/GHG related topics, 4 for biodiversity, 1 on hazardous waste and water emissions, and 12 on social and employee matters.

### **How did this financial product perform compared to the reference sustainable benchmark?**

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

**ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name: Danske Invest SICAV European Corporate Green Bond**  
**Legal entity identifier: 549300UVDV4FV60VIO93**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: 73%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: 23%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### To what extent was the sustainable investment objective of this financial product met?

*On 22 November 2024, the investment strategy of the fund was changed into a commitment of the fund to solely invest in sustainable investments through investments in green sustainability-labelled bonds meeting the sustainable investment criteria for labelled bonds as defined by Danske Bank. Up until that date the sustainable investment objective of the fund could be met by investing broadly in support of the UN SDGs and in that utilise both the SDG Model of Danske Bank as well as the labelled bond criteria. As this annual report covers the full reference year, it reflects the fact that throughout the year, the fund has invested mainly through a combination of the SDG Model as well as investing in labelled bonds impacting all values reported as an average for year (including sustainability indicators and asset allocation). The breakdown of the SDGs reported in this section is based on end-of-year values, and demonstrates that by end of year the fund was solely invested into labelled bonds per the updated strategy.*

*As a result of the updated strategy, the reference index (benchmark) of the fund was changed to a green bond index, why reporting on exclusions in the benchmark for previous reference periods is not representative to the development of the benchmark.*

The objective of the sustainable investments of the fund was to contribute to one or more of the UN SDGs. The

UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the breakdown below (see “Product lines aligned with the SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects. .

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

### **Breakdown of the sustainable investments’ contributions to the UN SDGs**

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown demonstrates the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "How did the sustainability indicators perform?") which is generally based on average values for the year.

**Other environmental/social characteristics**

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
2. Environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
3. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
4. Certain minimum environmental safeguards through exclusions.
5. Certain minimum ethical and social safeguards through exclusions.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the sustainable investment objective and other environmental and/or social characteristics of the fund. The indicators are reported as an annual average value unless otherwise stated herein. In relation to active ownership values are reported as the accumulated value end of year.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the SFDR Reading Guide in this report and the document “Sustainability-related disclosure”, which is available under the heading “Sustainability-related disclosures for our funds” at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable Investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.
- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see “To what extent was the sustainable investment objective of this financial product met?”.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

**Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 82%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

## Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 81%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the the fund or benchmark.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	0	0.0%	0
Thermal coal	372	1	1.6%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	11	12.9%	0
PAI (Do No Significant Harm)	786	0	0.0%	0

Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	1	1.6%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

## Engagements

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers on issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## ...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the SFDR Reading Guide.

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 97% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	437 / 86%	419 / 84%	667 / 86%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	191 / 86%	188 / 84%	208 / 86%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	7,232 / 86%	17,880 / 84%	8,067 / 86%
04	Total GHG emissions (tons)	7,860 / 86%	18,487 / 84%	8,942 / 86%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	363 / 86%	715 / 84%	311 / 86%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,445 / 86%	1,562 / 84%	1,004 / 86%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	5% / 85%	4% / 83%	8% / 86%

19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 85%	0% / 83%	0% / 86%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	1% / 82%	0% / 80%	0% / 79%
21	Lack of human rights policy (Share of investments without a human rights policy)	32% / 82%	41% / 80%	13% / 85%

#### **Actions taken in relation to indicators on investee companies**

##### **Greenhouse Gas Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels, and 53 on the list for tar sands.

8 engagement activities were logged for issuers in the fund for issues relating to these indicators.

The sustainable investments of the the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”

### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity.

3 engagement activities were logged for issuers in the fund relating to this indicator.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste.

5 engagement activities were logged for issuers in the fund in this regard.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee Matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 13 engagement activities were logged for issuers in the fund in relation to these issues.

The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Erste Group Bank Ag 16.01.2031	AT0000A32562	Financials	4.0%	AT

## What was the proportion of sustainability-related investments

The “asset allocation” chart below demonstrates the extent to which the fund invested in sustainability-related investments. As reported the fund invested 97% of its investments in sustainable investments.

### What was the asset allocation?

The fund has invested in sustainable investments in support of its sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "non-sustainable investments". Throughout the reference year, the fund has been obligated to invest sustainable investments contributing broadly to both the environmental and social objectives of the UN SDGs. However, by end of the reference year the investment strategy of the fund was adjusted for the product to invest solely in green labelled bonds and by that only pursue an environmental objective. Also, end of reference year, a commitment for the fund was introduced to invest minimum 1% of its investments to support activities substantially contributing to the environmental objectives of the EU Taxonomy. As the asset allocation indicates an average exposure for the year, the fund therefore reports a share of its investments in sustainable investments contributing to a social objective even though the fund by end of year only targetted environmentally sustainable investments. This also implies that the minimum objective of the fund to invest 80% in environmentally sustainable investments has not been met when based on an average calculation for the year.

The asset allocation is calculated against the total market value of the fund's investments. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

For asset allocation in previous reference periods, see the table below the chart.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1A Sustainable	87	94	97
#2 Not sustainable	13	6	3
Environmental	71	69	73
Social	16	25	23
Taxonomy aligned	5	2	1
#2 Other Environmental	66	68	72

### **In which economic sectors were the investments made?**

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	43.68%
Utilities	Electric Utilities	17.71%
Industrials	Rail Transportation	4.33%

Financials	Multi-Sector Holdings	4.13%
Financials	Multi-line Insurance	4.03%
Real Estate	Specialized REITs	3.34%
Consumer Staples	Food Retail	3.12%
Materials	Paper Products	2.93%
Communication Services	Integrated Telecommunication Services	2.53%
Materials	Paper & Plastic Packaging Products & Materials	2.28%
Real Estate	Real Estate Operating Companies	2.25%
Real Estate	Industrial REITs	2.15%
Consumer Discretionary	Leisure Facilities	1.11%
Financials	Life & Health Insurance	0.96%
Real Estate	Office REITs	0.32%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
No sector data		5.13%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy for the reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy. The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG."

The reported shared of economic activities aligned with the EU Taxonomy of 1.3% as based on revenue can be attributed with 1.1% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes  
 In fossil gas  
 In nuclear energy  
 No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

■ Taxonomy aligned: Fossil gas  
■ Taxonomy aligned: Nuclear  
■ Taxonomy aligned (no gas and nuclear)  
■ Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds\*

■ Taxonomy aligned: Fossil gas  
■ Taxonomy aligned: Nuclear  
■ Taxonomy aligned (no gas and nuclear)  
■ Non Taxonomy-aligned

This graph represents 100% of the total investments

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	5	2	1
Investments aligned with the EU taxonomy (enabling activities)	1	1	1
Investments aligned with the EU taxonomy (transitional activities) - Fund	0	0	0

### How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 72%.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 23%.

### **What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 8 engagements have been logged on climate/GHG related topics, 3 for biodiversity, 5 on hazardous waste and water emissions, and 13 on social and employee matters.

### **How did this financial product perform compared to the reference sustainable benchmark?**

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Emerging Markets

Legal entity identifier: 549300SMAVZ8H285LJ95

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	48	1.5%	0
Controversial weapons	64	2	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	4	0.1%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	59	2.9%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	51	2.6%	0
Tar sands	53	0	0.0%	0
Tobacco	120	4	0.1%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	6,954 / 99%	19,737 / 100%	14,660 / 100%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	3,993 / 99%	4,962 / 100%	3,717 / 100%

### Actions taken in relation to indicators on investee companies

#### GHG Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 14 engagement activities were logged for issuers in the fund for issues relating to these indicators.

#### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others

associated to biodiversity. 3 engagement activities were logged for issuers in the fund relating to this indicator.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 2 engagement activities were logged for issuers in the fund in this regard.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 27 engagement activities were logged for issuers in the fund in relation to these issues.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	95	96	98
#2 Other	5	4	2
#1A Sustainable	2	N/A	N/A

Taxonomy-aligned	2	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

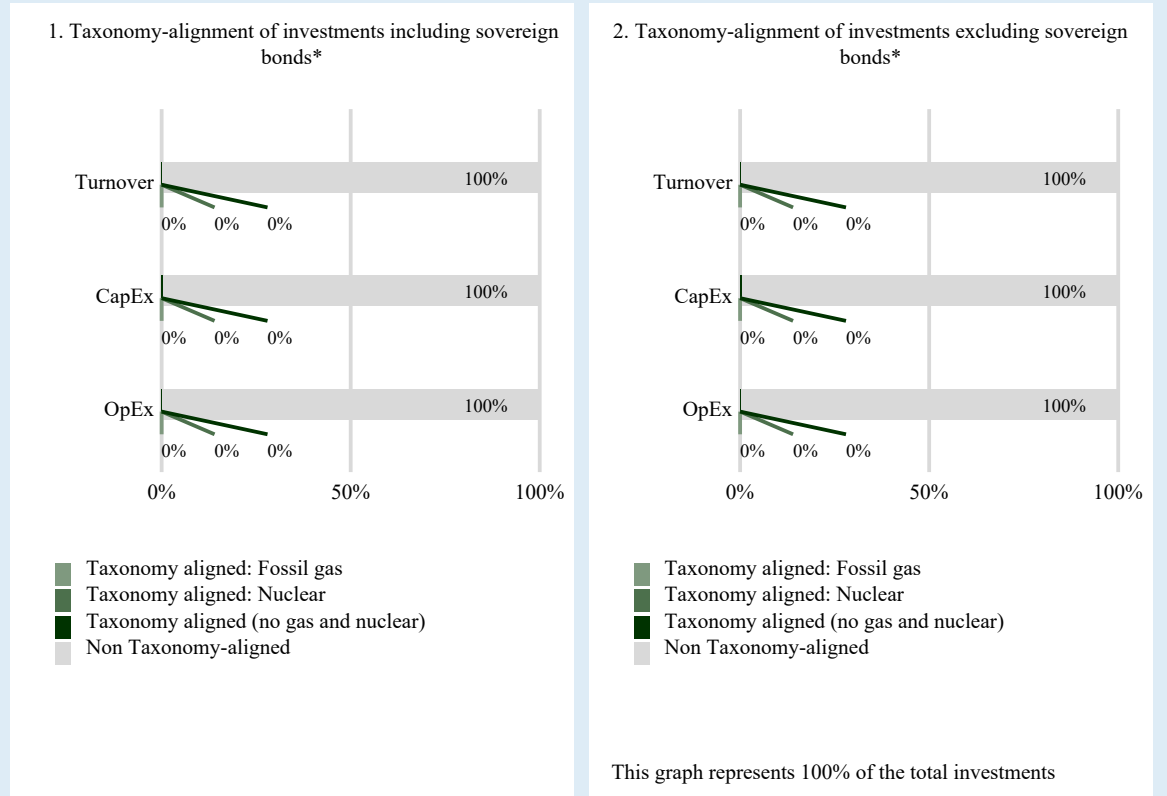

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	0	0
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 14 engagements have been registered on climate/GHG related topics, 3 for biodiversity, 2 on hazardous waste and water emissions, and 27 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Emerging Markets Small Cap

Legal entity identifier: 549300U0S0UWX7E6XL91

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 99% of the total investments)</b>

19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 97%	0% / 95%	0% / 87%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 32%	7% / 28%	0% / 8%
21	Lack of human rights policy (Share of investments without a human rights policy)	71% / 32%	90% / 28%	51% / 25%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 1 engagement activities were logged for issuers in the fund for issues relating to these indicators.

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others

associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 1 engagement activities were logged for issuers in the fund in relation to these issues.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	98	98	99
#2 Other	2	2	1

#1B Other E/S Characteristics	97	N/A	N/A
Taxonomy-aligned	1	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

## In which economic sectors were the investments made?

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	0	0
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 1 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 1 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Fixed Income Solution

Legal entity identifier: 984500CEA66F09FDA391

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	0
Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 17% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	6 / 56%	N/A	N/A

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands.

### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers.

### Indicators applicable to sovereigns and supranationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	N/A	N/A	99
#2 Other	N/A	N/A	1

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	9.45%
Government bonds		53.16%
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
No sector data		37.38%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

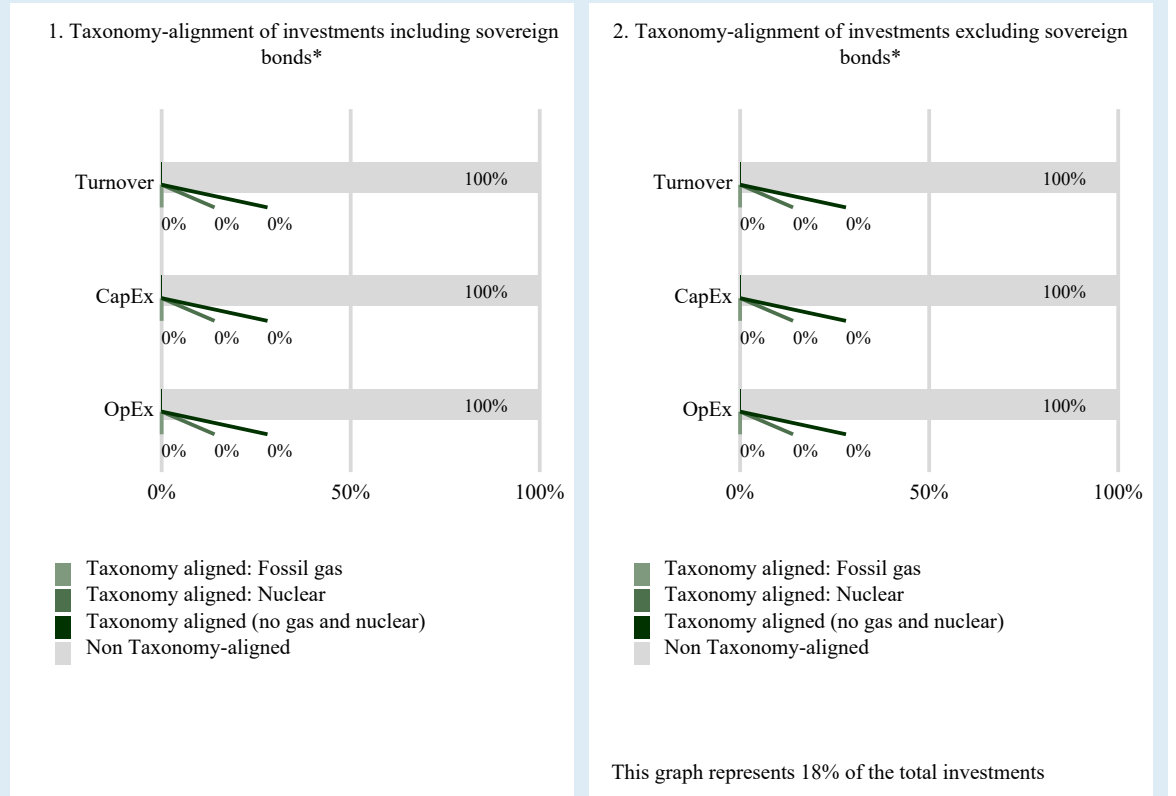

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	N/A	N/A	0
Investments aligned with the EU taxonomy (enabling activities)	N/A	N/A	0
Investments aligned with the EU taxonomy (transitional activities)	N/A	N/A	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 1 engagements have been registered on climate/GHG related topics, 0 for

biodiversity, 0 on hazardous waste and water emissions, and 1 on social and employee matters.

### **How did this financial product perform compared to the reference benchmark?**

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Index  
Legal entity identifier: 5493002GPY5GWYKQ0R14

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report. The fund also invested in activities substantially contributing to one or more environmental objectives of the U Taxonomy (see "What were

the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?").

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	29	1.1%	0
Controversial weapons	64	11	0.7%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	22	1.8%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	39	2.8%	0
Tar sands	53	6	0.2%	0
Tobacco	120	5	0.6%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

The reported share of economic activities aligned with the EU Taxonomy of 1% is based on revenue as the selected key KPI. The taxonomy-alignment of the fund can be attributed with 0.5% of activities in support of the climate change mitigation objective; 0.0% of activities in support of the climate change adaptation objective; 0.0% of activities in support of sustainable use and protection of water and marine resources, 0.0% of activities in support of pollution prevention and control; and 0.0% of activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities no data is available in relation to which of the environmental objectives the activities of these investments contribute to.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. As the fund's sustainable investments were investments aligned with the EU Taxonomy, the requirements of the EU Taxonomy in relation to environmentally sustainable activities not having a significant harm to other environmental objectives of the EU Taxonomy further safeguarded the requirements in relation to sustainable investments of the fund. In respect to minimum social safeguards, please see the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.

### How were the indicators for adverse impacts on sustainability factors taken into account?

For the assessment of alignment with the EU Taxonomy the fund applied the do no significant harm screening criteria of the EU Taxonomy, which do not include separate considerations in relation to the indicators for assessing principal adverse impacts on sustainability factors. These indicators have been addressed in accordance with the general approach of the fund as detailed in the section "How did this financial product consider principal adverse impacts on sustainability factors?".

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

Indicators for investments in investee companies (represents 100% of the total investments)				
	Greenhouse gas emissions (GHG)	2024 Impact / Coverage	2023 Impact / Coverage	2022 Impact / Coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	100,765 / 100%	117,641 / 100%	89,373 / 100%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	24,820 / 100%	28,966 / 100%	23,954 / 100%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	1,744,000 / 100%	1,524,370 / 100%	953,949 / 100%
04	Total GHG emissions (tons)	1,869,585 / 100%	1,670,977 / 100%	1,067,276 / 100%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	463 / 100%	464 / 100%	394 / 100%

06	GHG intensity of investee companies (tCO2e / m€ of revenue)	1,112 / 100%	1,255 / 100%	1,281 / 100%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	11% / 100%	11% / 100%	10% / 100%
08	Share of non-renewable energy – Consumption	53% / 71%	55% / 75%	69% / 61%
09	Share of non-renewable energy – Production	2% / 96%	2% / 96%	2% / 96%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	83%	87%	37%
	Agriculture, forestry and fishing	<1	<1	0
	Mining and quarrying	1	1	<1
	Manufacturing	1,074	1	<1
	Electricity, gas, steam and air conditioning supply	1	2	1
	Water supply; sewerage, waste management and remediation activities	1	1	<1
	Construction	<1	1	<1
	Wholesale and retail trade; repair of motor vehicles and motorcycles	<1	<1	<1
	Transportation and storage	1	1	1
	Real estate activities	<1	<1	0
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	41% / 100%	42% / 100%	46% / 100%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 100%	0% / 100%	0% / 100%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 3%	0 / 4%	0 / 5%
<b>Waste – Hazardous waste and radioactive waste ratio</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	0.46 / 47%	1 / 47%	14 / 20%
<b>Social and employee matters</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 100%	<1% / 100%	<1% / 100%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	16% / 100%	34% / 100%	23% / 100%
17	Unadjusted gender pay gap (average)	5% / 11%	3% / 7%	5% / 8%
18	Board gender diversity (Average ratio of female to male)	37% / 94%	36% / 93%	35% / 93%

19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 100%	0% / 100%	0% / 100%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	<1% / 100%	1% / 100%	<1% / 93%
21	Lack of human rights policy (Share of investments without a human rights policy)	36% / 100%	50% / 100%	28% / 100%

### Actions taken in relation to indicators on investee companies

#### GHG Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 154 engagement activities were logged for issuers in the fund for issues relating to these indicators.

#### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 49 engagement activities were logged for issuers in the fund relating to this indicator.

#### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 32 engagement activities were logged for issuers in the fund in this regard.

#### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 283 engagement activities were logged for issuers in the fund in relation to these issues.

#### Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns or supranationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Apple Inc.	US0378331005	Information Technology	5.5%	US
Nvidia Corp.	US67066G1040	Information Technology	4.8%	US

Unitedhealth Group Inc.	US91324P1021	Health Care	0.8%	US
Visa Inc. A	US92826C8394	Information Technology	0.8%	US
Novo Nordisk B	DK0062498333	Health Care	0.7%	DK

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

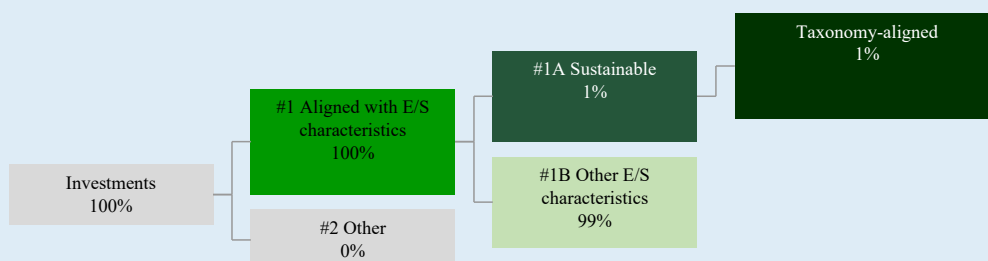

The fund did not invest through a commitment to make sustainable investments. As the fund had 1% investments aligned with the EU-Taxonomy based on revenue, the fund reports those investments as sustainable in the asset allocation graph below.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	100	100	100
#2 Other	0	0	0
#1A Sustainable	3	1	1
#1B Other E/S Characteristics	97	99	99
Taxonomy-aligned	3	1	1
Other environmental	N/A	N/A	14
Social	N/A	N/A	33

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.5% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

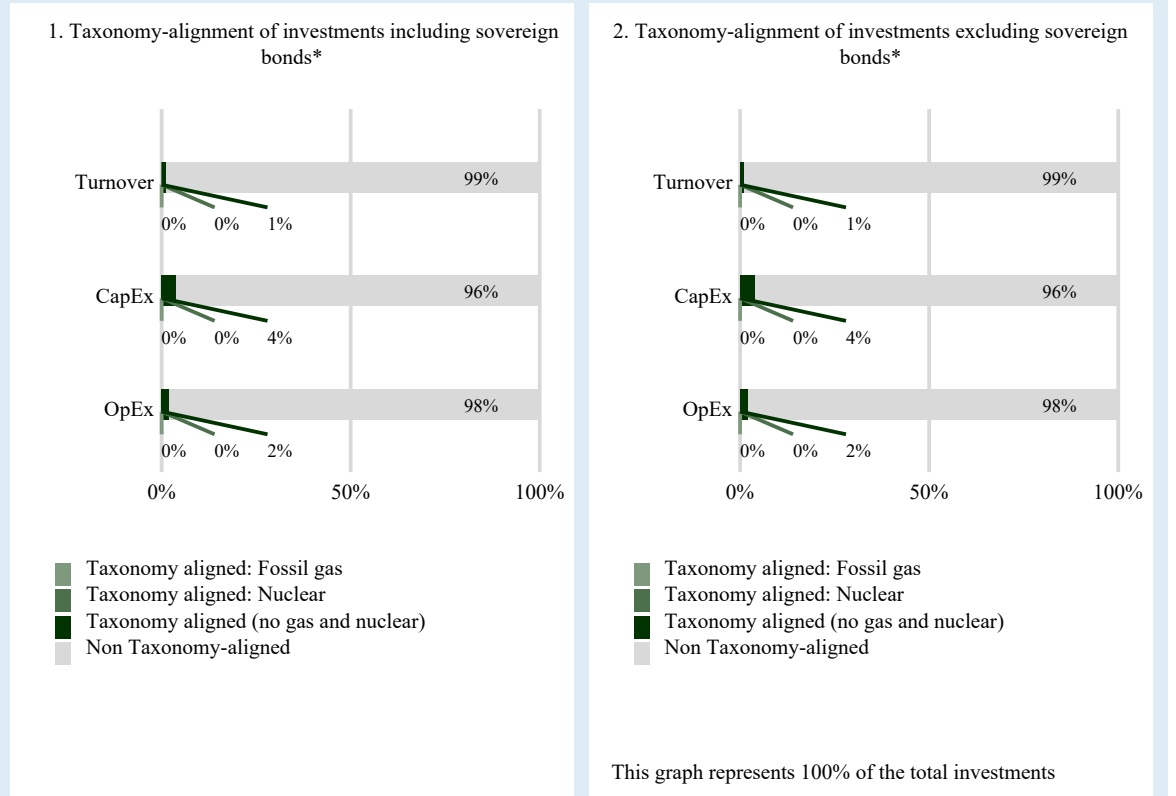

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	3	1	1
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 154 engagements have been registered on climate/GHG related topics, 49 for biodiversity, 32 on hazardous waste and water emissions, and 283 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name: Danske Invest SICAV Global Index Restricted**  
**Legal entity identifier: 54930030765BBI8ZA803**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: 100%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### To what extent was the sustainable investment objective of this financial product met?

The fund had as its sustainable investment objective to reduce carbon emissions and by that contribute to the transition to a lower-carbon economy in alignment with the ambitions of the Paris Agreement.

The fund applied a designated reference benchmark, MSCI World Climate Paris Aligned Index, for the attainment of its sustainable investment objective. MSCI World Climate Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 (EU Benchmark Regulation).

The methodology description for the reference index is available at:

<https://www.msci.com/our-solutions/indexes/index-profile-tool/>

As a Paris Aligned benchmark, the methodology of the benchmark is constructed in accordance with the Paris Agreement with underlying assets selected, weighted or excluded in line with 10% "self-carbonization" rate year by year (based on base date calculations) (see "How did this financial product perform compared with the broad market index?").

The benchmark also commits to a minimum reduction in weighted average greenhouse gas intensity/weighted average carbon intensity (WACI) relative to the broad market index (parent index) of 50%. By tracking the benchmark, the WACI of the fund within the reference period was 77,2% below the broad market index.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

### **Other environmental/social characteristics**

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies, including through voting.

The fund's own exclusions overlap and supplement those applied for the designated reference benchmark. For further information on the exclusions applied by the benchmark see refer to the reference index methodology paper.

### **How did the sustainability indicators perform?**

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the sustainable investment objective and other environmental and/or social characteristics of the fund. The indicators are reported as an annual average value unless otherwise stated herein. In relation to active ownership values are reported as the accumulated value end of year.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the SFDR Reading Guide in this report and the document “Sustainability-related disclosure”, which is available under the heading “Sustainability-related disclosures for our funds” at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### **Sustainable Investments**

Indicator: Reduction of CO<sub>2</sub>-emissions compared to the reference benchmark (as measured on basis of weighted average carbon intensity "WACI"). The graph below demonstrates the weighted average of the fund's investments tracking the reference benchmark. For further information on the performance of the fund and the reference benchmark, please see "How did this financial product perform compared to the reference sustainable benchmark?".

Binding element: The fund follows MSCI World Climate Paris Aligned Index as a binding element of the investment strategy to attain the sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. Impact is demonstrated through a comparison to the reference benchmark and the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund. Exclusions applied for the reference benchmark is not reported through this table. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the the fund or benchmark.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	7	0.4%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	4	0.1%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	4	0.6%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	3	0.1%	0
PAI (Do No Significant Harm)	786	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

## Engagements

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers on issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Votings

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

This consideration was managed through criteria of the reference benchmark, including in particular exclusions, and own exclusions of the fund supplementing and overlapping those of benchmark.

For further information on excluded issuers, see the section "How did the sustainability indicators perform?" above.

The fund further applied thresholds for indicators on principal adverse impacts on sustainability factor. See the section "How were the indicators for adverse impacts on sustainability factors taken into account?". For minimum social safeguards, reference is made to the section "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to the sustainable objective of the fund and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the SFDR Reading Guide.

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 100% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,177 / 100%	2,169 / 100%	2,291 / 100%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1,095 / 100%	1,911 / 100%	1,941 / 100%
03 Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	61,703 / 100%	104,547 / 100%	123,415 / 100%
04 Total GHG emissions (tons)	63,974 / 100%	108,627 / 100%	127,648 / 100%

20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	1% / 100%	1% / 100%	0% / 94%
21	Lack of human rights policy (Share of investments without a human rights policy)	42% / 100%	54% / 100%	31% / 100%

### **Actions taken in relation to indicators on investee companies**

#### **Greenhouse Gas Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels, and 53 on the list for tar sands.

51 engagement activities were logged for issuers in the fund for issues relating to these indicators.

The sustainable investments of the the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity.

15 engagement activities were logged for issuers in the fund relating to this indicator.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste.

15 engagement activities were logged for issuers in the fund in this regard.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Social and Employee Matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 130 engagement activities were logged for issuers in the fund in relation to these issues.

The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Indicators applicable to sovereigns and supranationals**

The fund did not invest in sovereigns and supranationals.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>

## What was the proportion of sustainability-related investments

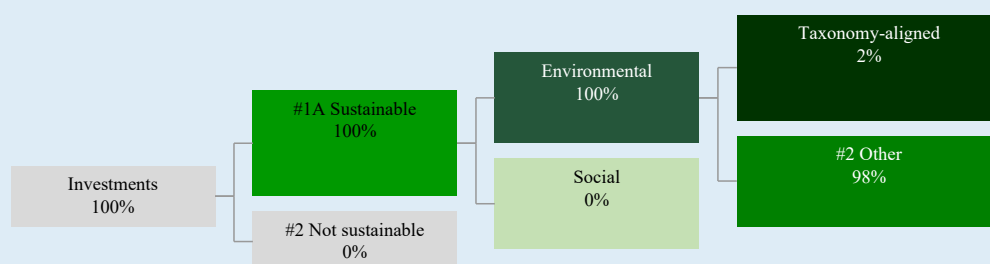

The "asset allocation" chart below demonstrates the extent to which the fund invested in sustainability-related investments. As reported the fund invested 100% of its investments in sustainable investments.

### What was the asset allocation?

The fund has invested in sustainable investments in support of its environmental sustainable investment objective. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "Non-sustainable investments".

The reported share on taxonomy-alignment is based on reported revenue figures from investee companies. For a historical comparison of the asset allocation compared to previous reference years, see the overview below the asset allocation chart.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

Asset allocation of the fund compared to previous reference periods	2022 (%)	2023 (%)	2024 (%)
#1A Sustainable	100	100	100
#2 Not sustainable	0	0	0
Environmental	100	100	100
Social	0	0	0
Taxonomy aligned	5	2	2
#2 Other Environmental	94	98	98

### In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Information Technology	Semiconductors	9.21%
Information Technology	Systems Software	6.20%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy for the reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy. The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG."

The reported shared of economic activities aligned with the EU Taxonomy of 2.4% as based on revenue can be attributed with 1.8% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

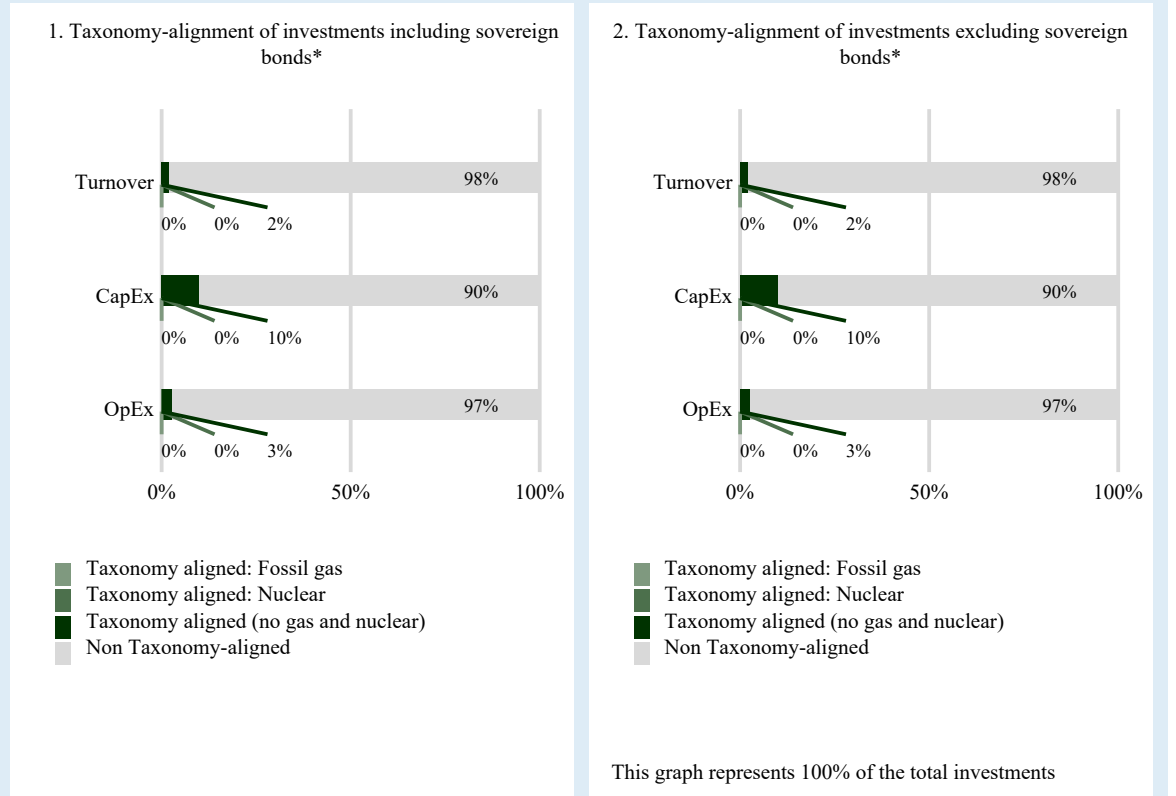

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	5	2	2
Investments aligned with the EU taxonomy (enabling activities)	3	2	2
Investments aligned with the EU taxonomy (transitional activities) - Fund	1	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 98%.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 0%.

## What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund did not make any investments not aligned to those of the reference benchmark, which are considered sustainable investments in accordance with the methodology and approach applied by the fund.

## What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 51 engagements have been logged on climate/GHG related topics, 15 for biodiversity, 15 on hazardous waste and water emissions, and 130 on social and employee matters.

## How did this financial product perform compared to the reference sustainable benchmark?

### How did the reference benchmark differ from a broad market index?

The reference benchmark is a EU Paris Aligned Benchmark that meets the minimum requirements of Delegated Regulation (EU) 2020/1818 to the Benchmark Regulation. Paris-aligned benchmarks are indices whose total emission levels are aligned with the Paris Agreement, which sees to limit the rise in global temperatures to well below 2°C above pre-industrial levels, and to pursue efforts to keep the rise to 1.5°C.

For further information on the methodology of the reference benchmark, please see:

<https://www.msci.com/our-solutions/indexes/index-profile-tool/>

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The graph below demonstrates how the reference benchmark was aligned with the sustainable investment objective by indicating the weighted average carbon intensity (WACI) of the reference benchmark compared to previous years.

The reference benchmark aligns with the sustainable investment objective of the fund through the year on year decarbonisation. The annual decarbonisation is measured against the base year 2021. The decarbonisation can vary annually provided that the average trajectory from the base year is kept. For a comprehensive overview of the reference benchmark's decarbonisation compared to the fund, the broad market benchmark, and the target for the reference benchmark, please refer to the "Measured Carbon Intensity" summary at the bottom of this section.

### How did this financial product perform compared with the reference benchmark?

The graph below demonstrates how the fund performed against the reference benchmark in relation to the weighted average carbon intensity (WACI) as reported for the reference year and preceding reporting years.

The fund applies certain exclusions that supplement those of the reference benchmark meaning that certain investments of the reference benchmark are not replicated for the fund. As a result there may be certain deviations to the emission profile of the fund compared to that of the reference benchmark. An optimisation was therefore introduced in 2023 which ensures that any reweighting of investments in the fund does not negatively impact the GHG emission profile compared to that of the reference benchmark. This constraint may imply that the fund from time to time outperforms the reference benchmark in relation to the measured carbon intensity.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

### How did this financial product perform compared with the broad market index?

Below graph demonstrates how the fund performed compared to the broad market index as measured on basis of the weighed average carbon intensity in the reference period and the previous year.

### Measured Carbon Intensity

	2022	2023	2024
Sub-Fund	182	154	137
Broad benchmark	175	157	141
Market index	717	618	602
Target	175	157	142

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Inflation Linked Bond

Legal entity identifier: 5493007HF4IS7X8ODT09

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund’s portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund’s portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund’s portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

	<b>The indicators below apply only to sovereigns and supranationals (represents 100% of the total investments)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
22	GHG intensity of investee countries (Emissions / GDP)	365 / 100%	356 / 100%	314 / 100%
23	Investee countries subject to social violations (percentage)	1 (14%) / 100%	1 (17%) / 100%	1 (17%) / 100%
24	Average Corruption Score	2 / 100%	2 / 100%	2 / 100%
25	Non-cooperative tax jurisdictions	0 / 100%	0 / 100%	0 / 100%
26	Average rule of law score	2 / 100%	2 / 100%	2 / 100%

#### Actions taken in relation to indicators on investee companies

The fund did not invest in investee companies.

#### Indicators applicable to sovereigns and supranationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 0 engagement activities were logged for issuers in the fund in relation to these indicators.

#### What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Australian Government 2.5% 20.09.2030	AU0000XCLWV6	Government bonds	12.0%	AU

Australian Government 0.75% 21.11.2027	AU000XCLWAV1	Government bonds	4.5%	AU

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

### What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	100	100	100
#2 Other	0	0	0
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Government bonds		93.92%
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments
No sector data		6.08%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

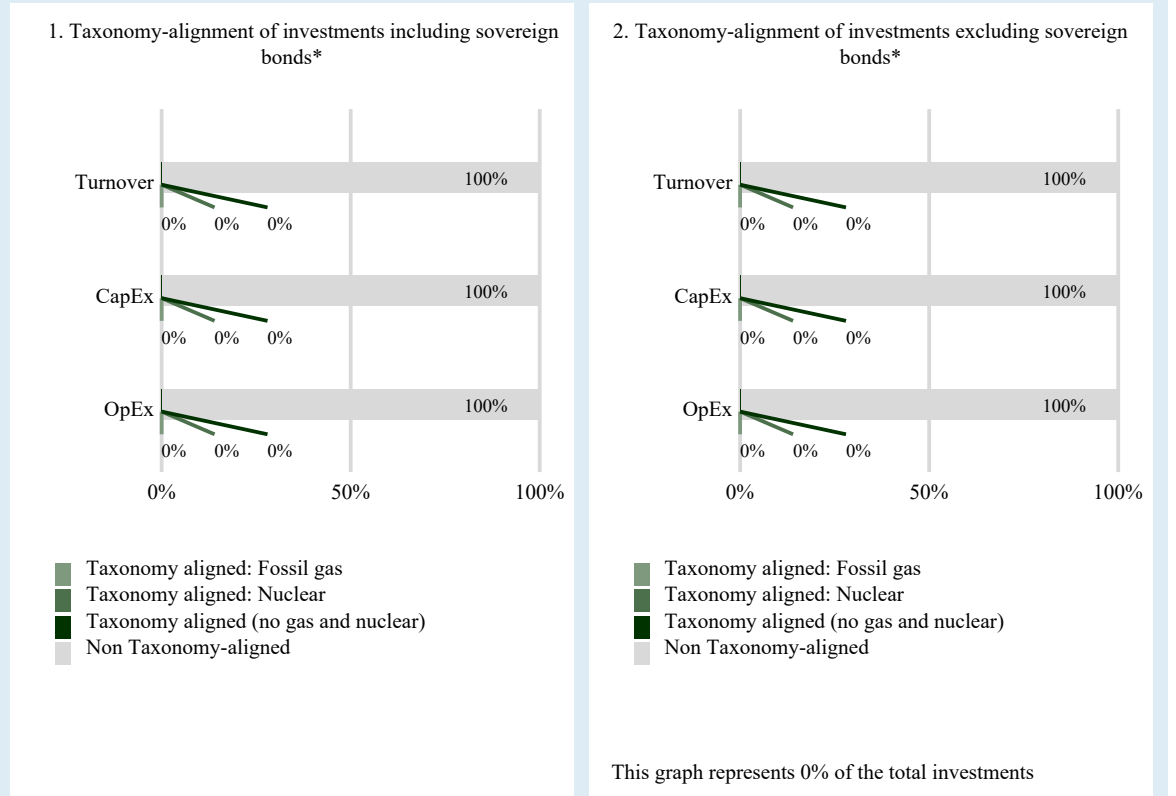

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	0	0
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Inflation Linked Bond Short Duration  
Legal entity identifier: 549300EQVW3W2DDA9C96

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 2% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	0 / 0%	0 / 0%	0 / 0%

25	Non-cooperative tax jurisdictions	0 / 100%	0 / 100%	0 / 100%
26	Average rule of law score	2 / 100%	2 / 100%	2 / 100%

### **Actions taken in relation to indicators on investee companies**

#### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 0 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded.

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator.

#### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators.

#### **Social and Employee matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended

sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 0 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators.

#### Indicators applicable to sovereigns and supranationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 1 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Tsy Infl Ix N/B 1.125% 15.01.2033	US91282CGK18	Government bonds	3.9%	US

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

### What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	100	100	100
#2 Other	0	0	0
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Government bonds		97.56%
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments
No sector data		2.44%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

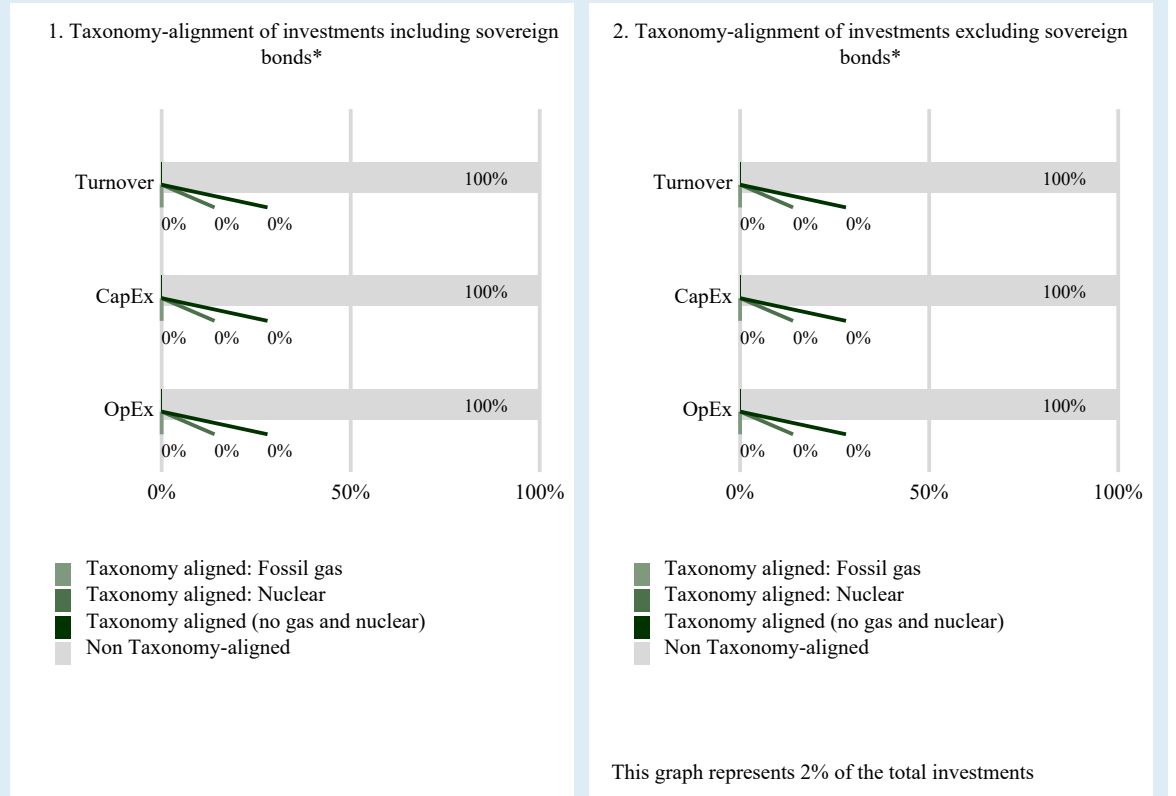

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	0	0
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 1 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 0 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Balanced

Legal entity identifier: 5493001EOHUS6IRLM853

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

## 6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**Inclusions – Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 62%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 61%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio

Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	1
Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy. This includes voting conducted at the level of underlying funds.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.4% on activities in support of the climate change mitigation

objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

### Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund applied exclusions that prevented the fund from investing in certain issuers that cause significant harm to social and environmental objectives, including for sustainable investments. In addition, sustainable investment methodologies applied for the fund incorporated criteria to address these aspects, including PAI thresholds (see "How were the indicators for adverse impacts on sustainability factors taken into account?") and ("Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data

coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 67% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	41,988 / 94%	45,063 / 94%	33,372 / 92%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 321 engagement activities were logged for issuers in the fund for issues relating to these indicators. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 95 engagement activities were logged for issuers in the fund relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

## Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 62 engagement activities were logged for issuers in the fund in this regard. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 505 engagement activities were logged for issuers in the fund in relation to these issues. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 25 engagement activities were logged for issuers in the fund in relation to these indicators.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 33% in sustainable investments.

## What was the asset allocation?

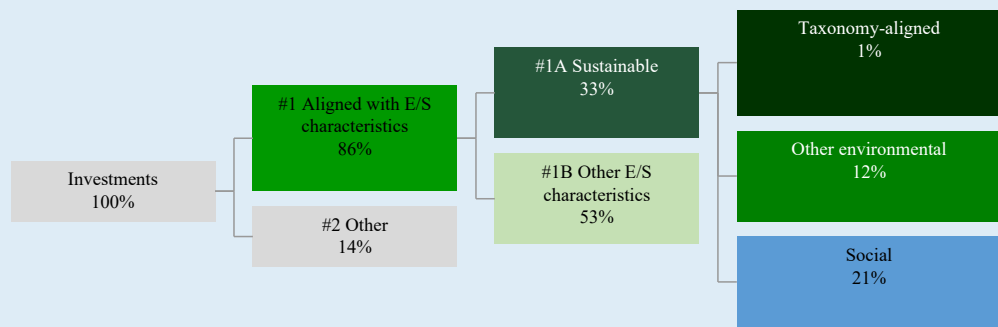

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	85	85	86
#2 Other	15	15	14
#1A Sustainable	29	32	33
#1B Other E/S Characteristics	56	53	53
Taxonomy-aligned	2	1	1
Other environmental	22	15	12
Social	5	16	21

## **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.4% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

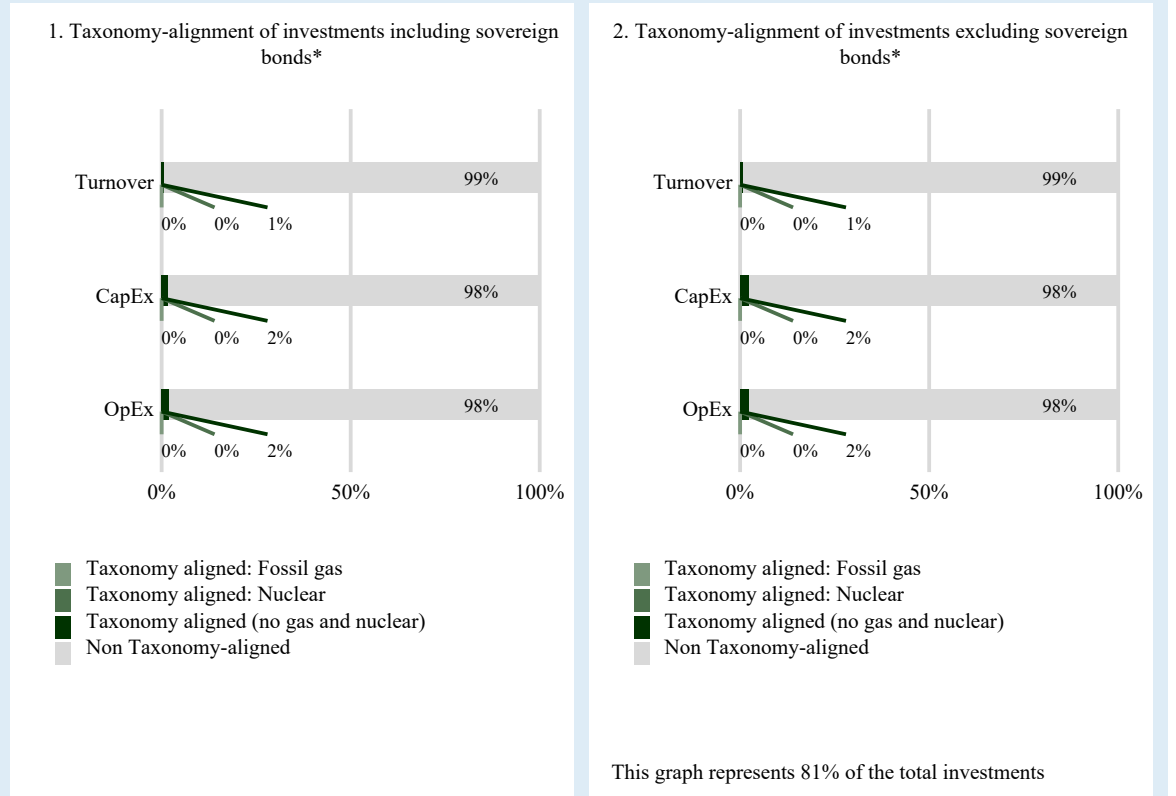

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	1	1
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 21 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 25 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 321 engagements have been registered on climate/GHG related topics, 95 for biodiversity, 62 on hazardous waste and water emissions, and 505 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Defensive

Legal entity identifier: 549300MGJZ0TCOWNH176

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	1

Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund applied exclusions that prevented the fund from investing in certain issuers that cause significant harm to social and environmental objectives, including for sustainable investments. In addition, sustainable investment methodologies applied for the fund incorporated criteria to address these aspects, including PAI thresholds (see "How were the indicators for adverse impacts on sustainability factors taken into account?") and ("Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

the current thresholds, please refer to the sustainability-related disclosures of the fund in the document “Sustainability-related disclosure”, available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading “Sustainability-related disclosures on our funds”.

The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund’s exclusions based on Danske Bank’s enhanced sustainability standards screening.

The EU Taxonomy sets out a ‘do no significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 47% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>

01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	10,566 / 89%	10,202 / 88%	6,663 / 88%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	2,570 / 89%	2,243 / 88%	1,792 / 88%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	160,499 / 89%	115,677 / 88%	69,775 / 88%
04	Total GHG emissions (tons)	173,634 / 89%	128,123 / 88%	78,230 / 88%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	620 / 89%	573 / 88%	411 / 88%

16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	17% / 85%	26% / 83%	18% / 85%
17	Unadjusted gender pay gap (average)	6% / 9%	7% / 7%	5% / 7%
18	Board gender diversity (Average ratio of female to male)	36% / 81%	35% / 81%	35% / 82%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 88%	0% / 86%	0% / 87%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	<1% / 84%	1% / 84%	<1% / 76%
21	Lack of human rights policy (Share of investments without a human rights policy)	39% / 84%	50% / 84%	25% / 85%

<b>The indicators below apply only to sovereigns and supranationals (represents 39% of the total investments)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
22	GHG intensity of investee countries (Emissions / GDP)	343 / 98%	336 / 98%	322 / 99%
23	Investee countries subject to social violations (percentage)	59 (85%) / 98%	56 (82%) / 98%	53 (79%) / 99%
24	Average Corruption Score	2 / 98%	2 / 98%	1 / 99%
25	Non-cooperative tax jurisdictions	<1 / 98%	0 / 98%	0 / 99%
26	Average rule of law score	2 / 98%	2 / 98%	2 / 99%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 277 engagement activities were logged for issuers in the fund for issues relating to these indicators. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 81 engagement activities were logged for issuers in the fund relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 56 engagement activities were logged for issuers in the fund in this regard. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

## Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 427 engagement activities were logged for issuers in the fund in relation to these issues. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

### Indicators applicable to sovereigns and supranationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 25 engagement activities were logged for issuers in the fund in relation to these indicators.

Bundesrepub. Deutschland 1% 15.08.2025	DE0001102382	Government bonds	3.2%	DE
Us Treasury N/B 0.25% 15.03.2024	US91282CBR16	Government bonds	3.2%	US

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

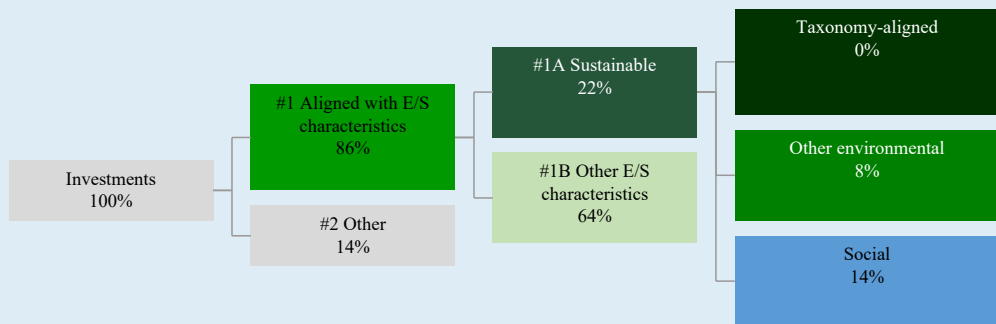

The fund invested 22% in sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund’s environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	87	88	86
#2 Other	13	12	14
#1A Sustainable	16	18	22
#1B Other E/S Characteristics	71	70	64
Taxonomy-aligned	1	0	0
Other environmental	12	9	8
Social	3	9	14

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

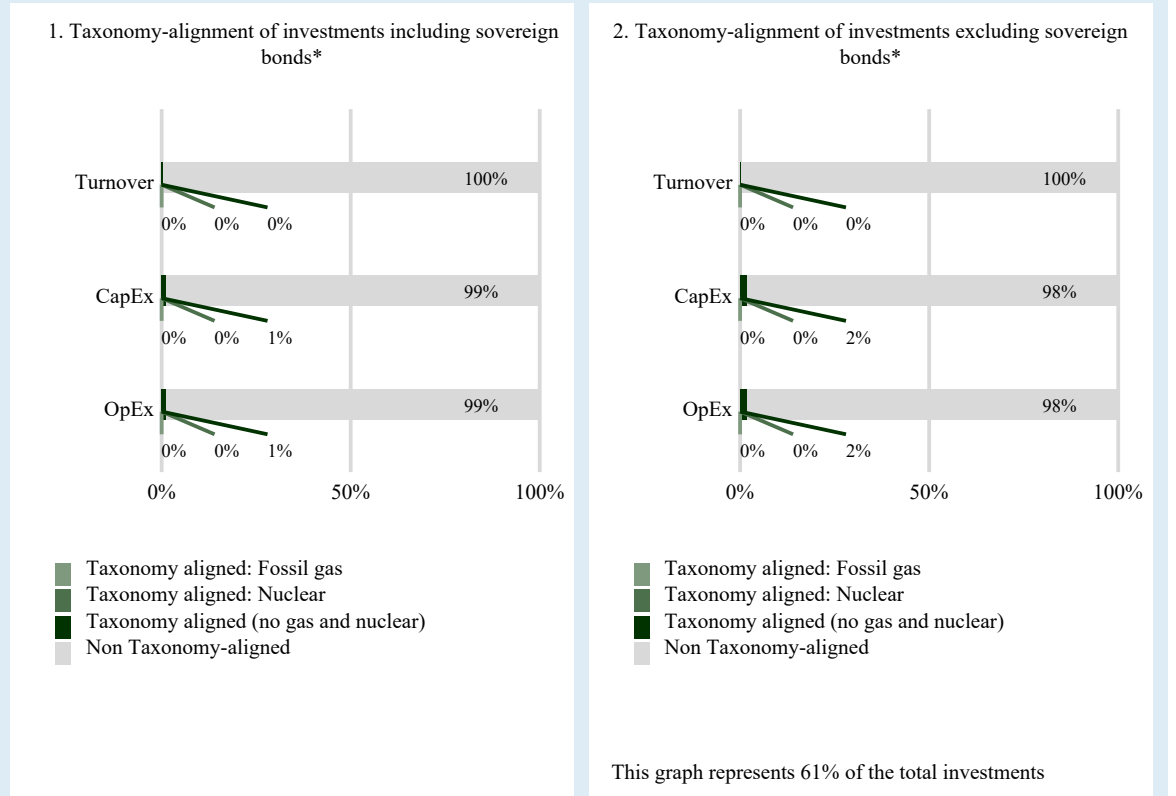

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	0	0
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 14 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 25 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 277 engagements have been registered on climate/GHG related topics, 81 for biodiversity, 56 on hazardous waste and water emissions, and 427 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Growth

Legal entity identifier: 549300B65BU74MZQ2P61

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

## 6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**Inclusions – Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 57%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

## Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 56%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	1
Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.4% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies’ reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund applied exclusions that prevented the fund from investing in certain issuers that cause significant harm to social and environmental objectives, including for sustainable investments. In addition, sustainable investment methodologies applied for the fund incorporated criteria to address these aspects, including PAI thresholds (see "How were the indicators for adverse impacts on sustainability factors taken into account?") and ("Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data

coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 60% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	580 / 91%	400 / 90%	368 / 94%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	142 / 91%	93 / 90%	112 / 94%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	8,963 / 91%	4,752 / 90%	4,189 / 94%
04	Total GHG emissions (tons)	9,684 / 91%	5,245 / 90%	4,669 / 94%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	596 / 91%	543 / 90%	374 / 94%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,275 / 91%	1,524 / 90%	1,154 / 94%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	9% / 90%	9% / 89%	6% / 94%
08	Share of non-renewable energy – Consumption	54% / 60%	56% / 63%	69% / 53%
09	Share of non-renewable energy – Production	2% / 86%	2% / 86%	2% / 92%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	71%	75%	35%
	Agriculture, forestry and fishing	<1	<1	<1
	Mining and quarrying	1	2	1
	Manufacturing	417	1	<1
	Electricity, gas, steam and air conditioning supply	2	3	2
	Water supply; sewerage, waste management and remediation activities	1	1	1
	Construction	<1	1	<1
	Wholesale and retail trade; repair of motor vehicles and motorcycles	<1	<1	<1
	Transportation and storage	1	1	1
	Real estate activities	<1	1	0
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	45% / 91%	44% / 90%	49% / 94%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 90%	0% / 90%	0% / 94%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 2%	0 / 3%	0 / 4%

<b>Waste – Hazardous waste and radioactive waste ratio</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	0.47 / 39%	1 / 41%	50 / 18%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 91%	0% / 90%	<1% / 94%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	17% / 87%	27% / 87%	21% / 92%
17	Unadjusted gender pay gap (average)	6% / 9%	6% / 7%	5% / 7%
18	Board gender diversity (Average ratio of female to male)	36% / 83%	35% / 84%	34% / 89%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 90%	0% / 90%	0% / 94%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	<1% / 87%	1% / 87%	<1% / 81%
21	Lack of human rights policy (Share of investments without a human rights policy)	39% / 87%	51% / 87%	27% / 92%

<b>The indicators below apply only to sovereigns and supranationals (represents 23% of the total investments)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
22	GHG intensity of investee countries (Emissions / GDP)	353 / 97%	364 / 94%	344 / 96%
23	Investee countries subject to social violations (percentage)	59 (89%) / 97%	55 (92%) / 94%	52 (88%) / 96%
24	Average Corruption Score	2 / 97%	2 / 94%	2 / 96%
25	Non-cooperative tax jurisdictions	<1 / 97%	<1 / 94%	0 / 96%
26	Average rule of law score	2 / 97%	2 / 94%	2 / 96%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 283 engagement activities were logged for issuers in the fund for issues relating to these indicators. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 78 engagement activities were logged for issuers in the fund relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

## Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 55 engagement activities were logged for issuers in the fund in this regard. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 412 engagement activities were logged for issuers in the fund in relation to these issues. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 24 engagement activities were logged for issuers in the fund in relation to these indicators.

Us Treasury N/B 2.75% 31.08.2025	US9128284Z04	Government bonds	3.0%	US

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 28% in sustainable investments.

## What was the asset allocation?

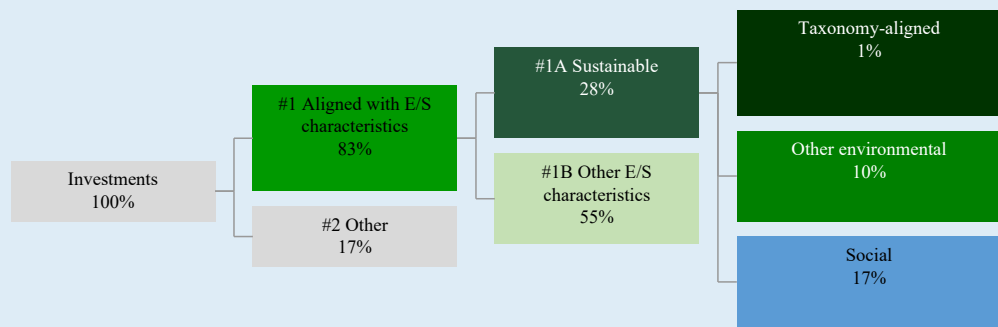

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	83	76	83
#2 Other	17	24	17
#1A Sustainable	39	27	28
#1B Other E/S Characteristics	44	49	55
Taxonomy-aligned	2	1	1
Other environmental	31	12	10
Social	5	15	17

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.4% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

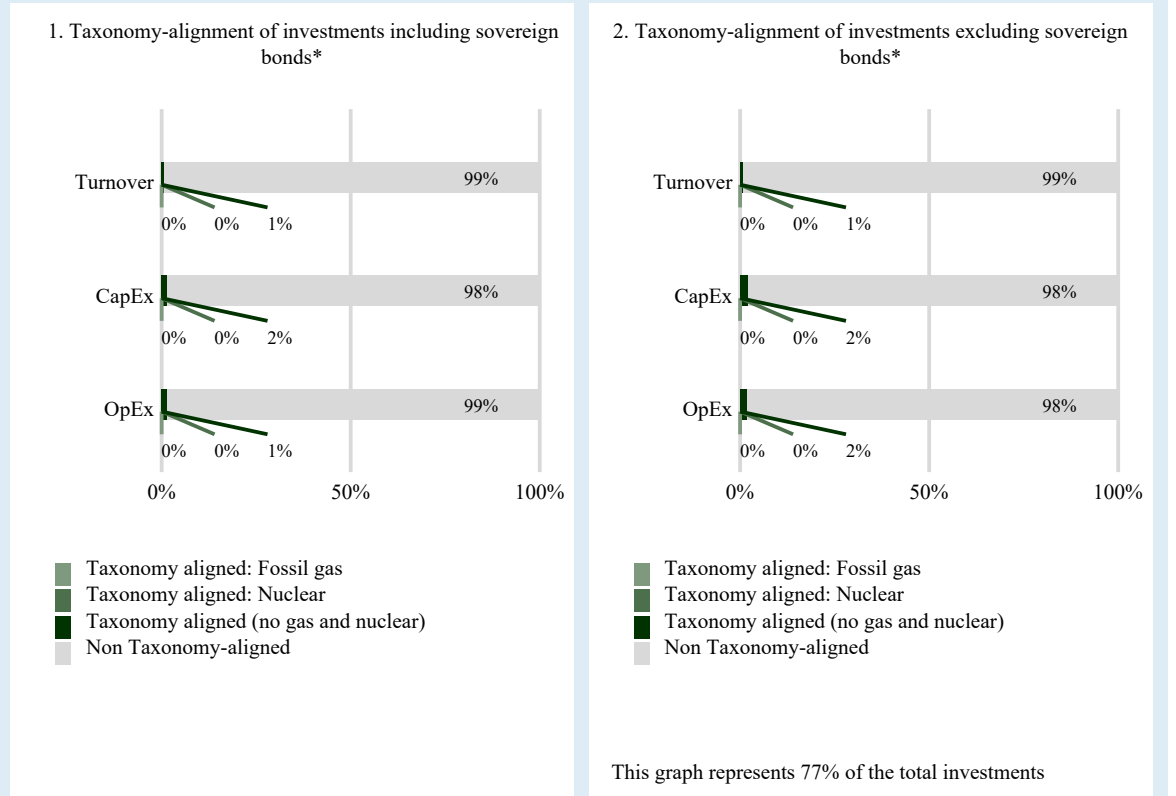

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	1	1
Investments aligned with the EU taxonomy (enabling activities)	2	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 17 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 24 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 283 engagements have been registered on climate/GHG related topics, 78 for biodiversity, 55 on hazardous waste and water emissions, and 412 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Opportunity

Legal entity identifier: 549300ZHHC41G2BKHF76

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

## 6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**Inclusions – Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 57%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 56%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
-----------	-----------------------------------------	---------------------------------	-----------------------	-------------------------------------------------

Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	1
Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.4% on activities in support of the climate change mitigation

objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

### Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund applied exclusions that prevented the fund from investing in certain issuers that cause significant harm to social and environmental objectives, including for sustainable investments. In addition, sustainable investment methodologies applied for the fund incorporated criteria to address these aspects, including PAI thresholds (see "How were the indicators for adverse impacts on sustainability factors taken into account?") and ("Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data

coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 64% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	17,846 / 94%	15,688 / 93%	13,129 / 94%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	4,431 / 94%	3,829 / 93%	3,863 / 94%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	285,310 / 94%	192,647 / 93%	147,052 / 94%
04	Total GHG emissions (tons)	307,587 / 94%	212,164 / 93%	164,045 / 94%

24	Average Corruption Score	2 / 97%	2 / 97%	2 / 97%
25	Non-cooperative tax jurisdictions	<1 / 97%	<1 / 97%	0 / 97%
26	Average rule of law score	2 / 97%	2 / 97%	2 / 97%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 311 engagement activities were logged for issuers in the fund for issues relating to these indicators. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 92 engagement activities were logged for issuers in the fund relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

## Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 62 engagement activities were logged for issuers in the fund in this regard. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 492 engagement activities were logged for issuers in the fund in relation to these issues. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?".

## Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 25 engagement activities were logged for issuers in the fund in relation to these indicators.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 31% in sustainable investments.

## What was the asset allocation?

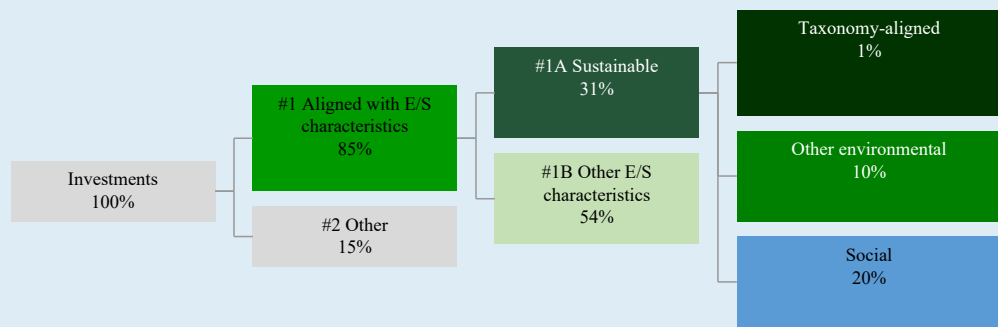

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	86	84	85
#2 Other	14	16	15
#1A Sustainable	35	30	31
#1B Other E/S Characteristics	51	54	54
Taxonomy-aligned	2	0	1
Other environmental	27	14	10
Social	6	15	20

## In which economic sectors were the investments made?

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.4% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

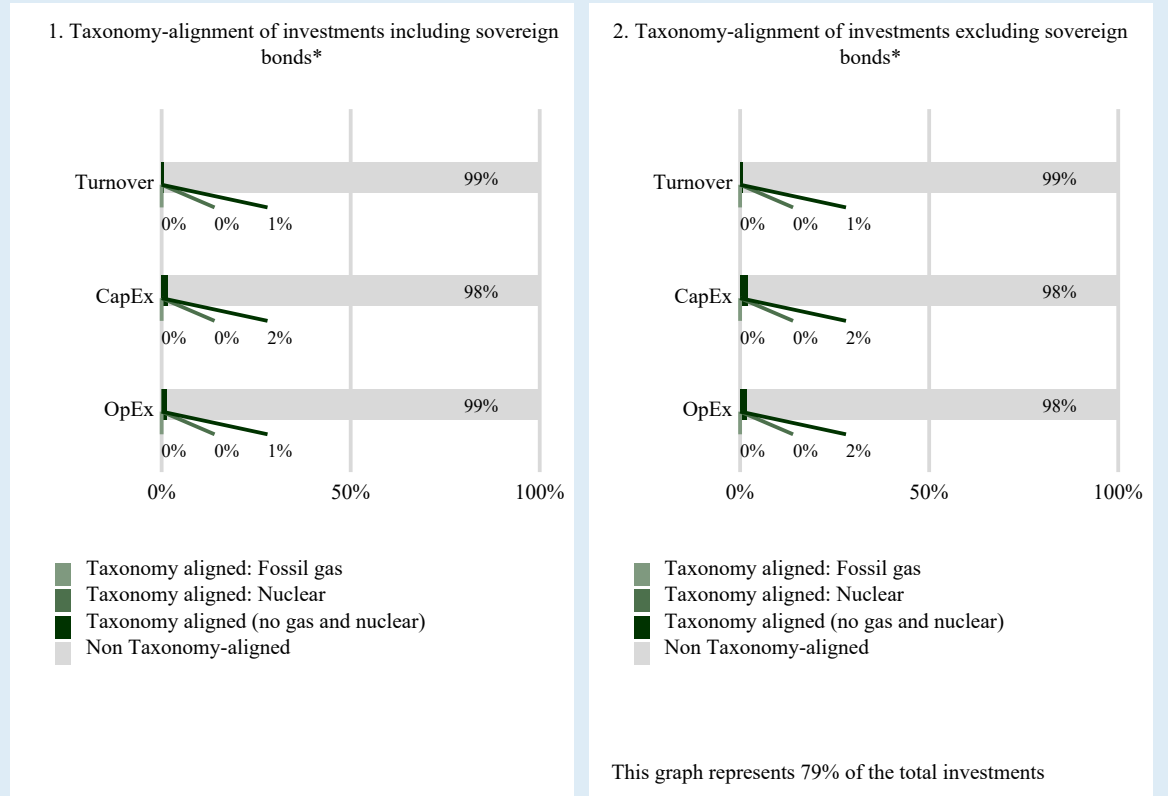

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	0	1
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 20 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 25 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 311 engagements have been registered on climate/GHG related topics, 92 for biodiversity, 62 on hazardous waste and water emissions, and 492 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Stable  
Legal entity identifier: 549300XSGI6UMI3LYG86

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 15% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	N/A	N/A	0
Controversial weapons	64	N/A	N/A	0
Good governance (Enhanced Sustainability Standards)	28	N/A	N/A	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	N/A	N/A	0
Peat-fired power generation	0	N/A	N/A	0
Pornography	11	N/A	N/A	0
Restricted Countries (Enhanced sustainability Standards)	27	N/A	N/A	1

Statens pensjonsfond utland	177	N/A	N/A	0
Tar sands	53	N/A	N/A	0
Tobacco	120	N/A	N/A	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

### **Breakdown of the sustainable investments’ contributions to the UN SDGs**

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see “To what extent were the environmental and/or social characteristics promoted by this financial product met?”) which is based on average values for the year.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund applied exclusions that prevented the fund from investing in certain issuers that cause significant harm to social and environmental objectives, including for sustainable investments. In addition, sustainable investment methodologies applied for the fund incorporated criteria to address these aspects, including PAI thresholds (see “How were the indicators for adverse impacts on sustainability factors taken into account?”) and (“Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”).

### How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund’s exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of ‘do no significant harm’. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document “Sustainability-related disclosure”, available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading “Sustainability-related disclosures on our funds”.

The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

level of the underlying funds.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 33% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	90 / 81%	86 / 82%	58 / 68%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	21 / 81%	17 / 82%	14 / 68%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	1,241 / 81%	899 / 82%	577 / 68%
04	Total GHG emissions (tons)	1,351 / 81%	1,002 / 82%	650 / 68%

### **Actions taken in relation to indicators on investee companies**

#### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 229 engagement activities were logged for issuers in the fund for issues relating to these indicators. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 56 engagement activities were logged for issuers in the fund relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 44 engagement activities were logged for issuers in the fund in this regard. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

#### **Social and Employee matters**

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 283 engagement activities were logged for issuers in the fund in relation to these issues. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of

whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

#### Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank’s enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 25 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

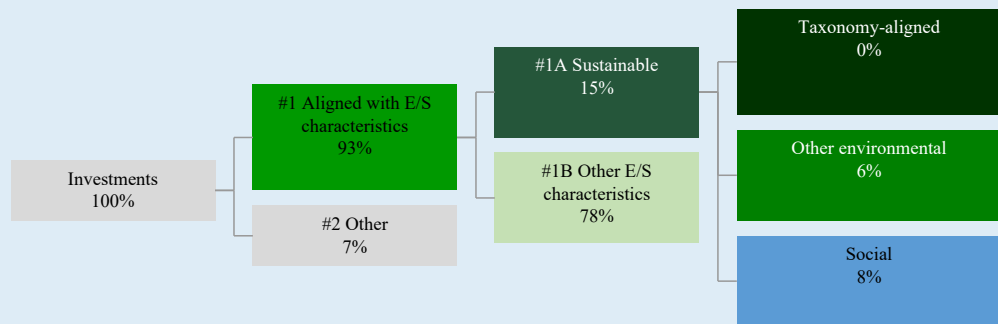

The fund invested 15% in sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund’s environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	93	91	93
#2 Other	7	9	7
#1A Sustainable	6	12	15
#1B Other E/S Characteristics	87	79	78
Taxonomy-aligned	0	0	0
Other environmental	4	6	6
Social	1	5	8

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

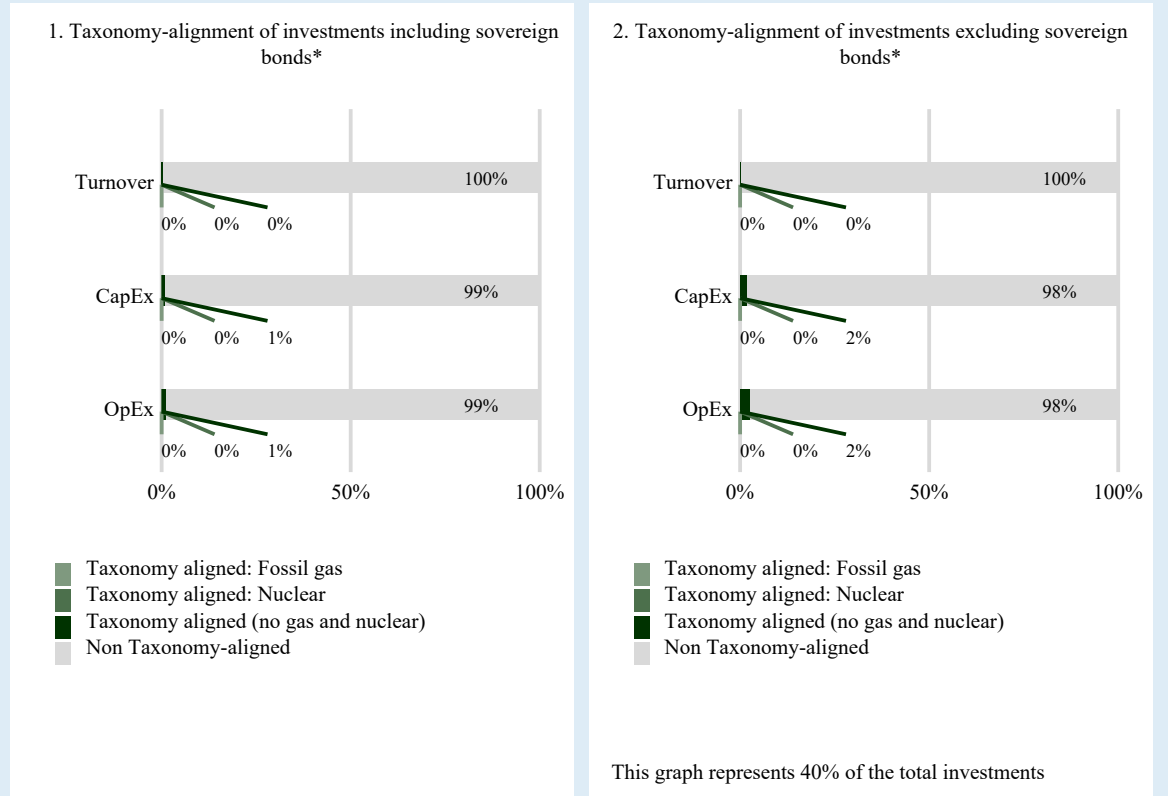

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	0	0	0
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 6 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 8 %.

### What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 25 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 229 engagements have been registered on climate/GHG related topics, 56 for biodiversity, 44 on hazardous waste and water emissions, and 283 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name: Danske Invest SICAV Global Sustainable Future**  
**Legal entity identifier: 549300HN1DPAOUTKSW13**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: 40%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: 59%

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### To what extent was the sustainable investment objective of this financial product met?

The objective of the sustainable investments of the fund was to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund contributed to the UN SDGs through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that

are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the breakdown below (see “Product lines aligned with the SDGs”).

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

### Breakdown of the sustainable investments’ contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown demonstrates the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "How did the sustainability indicators perform?") which is generally based on average values for the year.

### Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
2. Environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
3. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
4. Certain minimum environmental safeguards through exclusions.
5. Certain minimum ethical and social safeguards through exclusions.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies, including through voting.

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the sustainable investment objective and other environmental and/or social characteristics of the fund. The indicators are reported as an annual average value unless otherwise stated herein. In relation to active ownership values are reported as the accumulated value end of year.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the SFDR Reading Guide in this report and the document “Sustainability-related disclosure”, which is available under the heading “Sustainability-related disclosures for our funds” at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable Investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank’s SDG Model, which measures a company’s positive contribution to the SDGs on the basis of the issuer’s revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund’s allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

Investments of the fund that do not qualify as sustainable investments are marked “non-sustainable”.

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see “To what extent was the sustainable investment objective of this financial product met?”.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

**Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 98%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

## Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 98%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the the fund or benchmark.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	14	0.4%	0
Thermal coal	372	29	1.1%	0
Controversial weapons	64	11	0.7%	0
Commercial gambling	301	15	0.3%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	30	2.5%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	22	1.8%	0
Fossil Fuel	2149	126	6.3%	0
PAI (Do No Significant Harm)	786	20	1.1%	0

Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	39	2.8%	0
Tar sands	53	6	0.2%	0
Tobacco	120	5	0.6%	0

## Engagements

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers on issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Votings

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### ...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

under the heading “Sustainability-related disclosures on our funds”.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles’ on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

### How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the SFDR Reading Guide.

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 99% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	6,002 / 100%	11,403 / 100%	14,421 / 100%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	2,549 / 100%	3,662 / 100%	2,661 / 100%
03 Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	126,162 / 100%	242,646 / 100%	269,797 / 100%
04 Total GHG emissions (tons)	134,713 / 100%	257,710 / 100%	286,879 / 100%

19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 100%	0% / 100%	0% / 100%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 100%	0% / 100%	0% / 97%
21	Lack of human rights policy (Share of investments without a human rights policy)	31% / 100%	49% / 100%	24% / 100%

### Actions taken in relation to indicators on investee companies

#### Greenhouse Gas Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels, and 53 on the list for tar sands.

13 engagement activities were logged for issuers in the fund for issues relating to these indicators.

The sustainable investments of the the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”

#### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity.

4 engagement activities were logged for issuers in the fund relating to this indicator.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste.

6 engagement activities were logged for issuers in the fund in this regard.

The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### Social and Employee Matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 28 engagement activities were logged for issuers in the fund in relation to these issues.

The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?”.

#### Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Microsoft Corp.	US5949181045	Information Technology	8.6%	US
Alphabet Inc. A	US02079K3059	Communication Services	6.5%	US
Novo Nordisk B	DK0062498333	Health Care	5.1%	DK
Asml Holding Nv	NL0010273215	Information Technology	4.9%	NL
Visa Inc. A	US92826C8394	Information Technology	4.3%	US
Taiwan Semiconductor Manufactu (Adr)	US8740391003	Information Technology	4.2%	TW
Eli Lilly & Co.	US5324571083	Health Care	4.2%	US

Schneider Electric Se	FR0000121972	Industrials	3.3%	FR

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The "asset allocation" chart below demonstrates the extent to which the fund invested in sustainability-related investments. As reported the fund invested 99% of its investments in sustainable investments.

### What was the asset allocation?

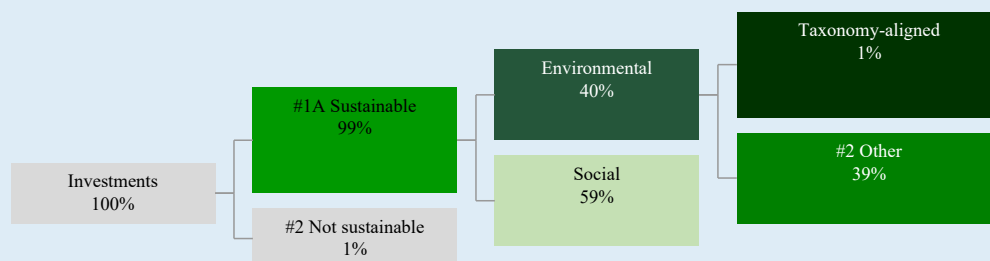

The fund has invested in sustainable investments in support of its sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "non-sustainable investments".

The asset allocation is calculated against the total market value of the fund's investments. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

For asset allocation in previous reference periods, see the table below the chart.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

Asset allocation of the fund compared to previous reference periods	2022 (%)	2023 (%)	2024 (%)
#1A Sustainable	98	98	99
#2 Not sustainable	2	2	1
Environmental	57	34	40
Social	40	64	59
Taxonomy aligned	3	1	1
#2 Other Environmental	55	33	39

### In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Information Technology	Systems Software	10.04%
Information Technology	Semiconductors	8.34%
Health Care	Pharmaceuticals	7.87%

Information Technology	Application Software	5.99%
Financials	Financial Exchanges & Data	5.82%
Financials	Diversified Banks	5.53%
Industrials	Industrial Machinery & Supplies & Components	5.53%
Communication Services	Interactive Media & Services	4.75%
Health Care	Health Care Equipment	4.67%
Industrials	Electrical Components & Equipment	4.35%
Financials	Insurance Brokers	3.98%

Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy for the reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy. The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG."

The reported shared of economic activities aligned with the EU Taxonomy of 1.2% as based on revenue can be attributed with 1.0% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

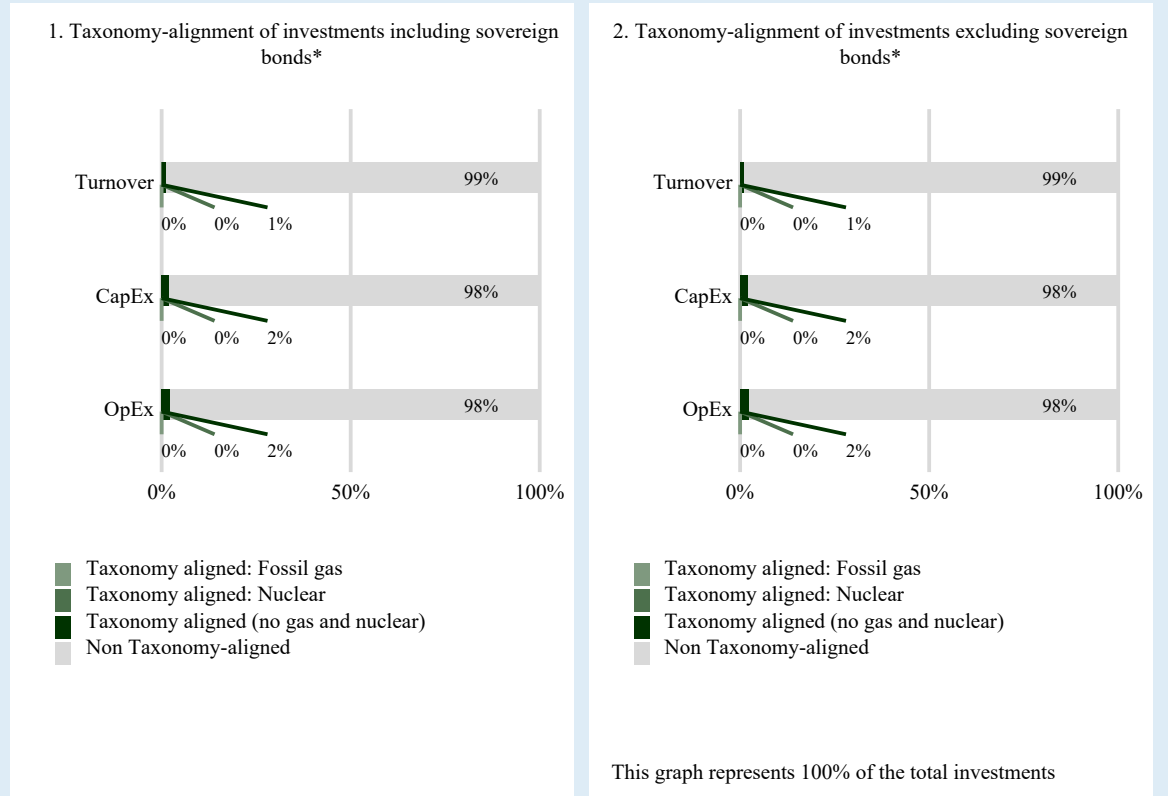

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	3	1	1
Investments aligned with the EU taxonomy (enabling activities)	1	0	1
Investments aligned with the EU taxonomy (transitional activities) - Fund	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 39%.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 59%.

## What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

## What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 13 engagements have been logged on climate/GHG related topics, 4 for biodiversity, 6 on hazardous waste and water emissions, and 28 on social and employee matters.

### **How did this financial product perform compared to the reference sustainable benchmark?**

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Tactical Allocation

Legal entity identifier: 549300MGJZ0TCOWNH176

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

There was a commitment to conduct active ownership if prompted due to relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	77	0.7%	0
Controversial weapons	64	13	0.4%	0
Good governance (Enhanced Sustainability Standards)	28	4	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	81	1.1%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	90	1.7%	0
Tar sands	53	6	0.1%	0
Tobacco	120	9	0.4%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

**...and compared to previous periods?**

The charts above provide as relevant historical comparisons against previous reporting periods.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not relevant.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not relevant.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Not relevant.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not take into account principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not able to monitor, prioritise or report on principal adverse impacts.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Bundesschatzanweisungen 2.8% 12.06.2025	DE000BU22015	Government bonds	9.8%	DE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

### What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	92	84	81
#2 Other	8	16	19
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Government bonds		100.00%
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

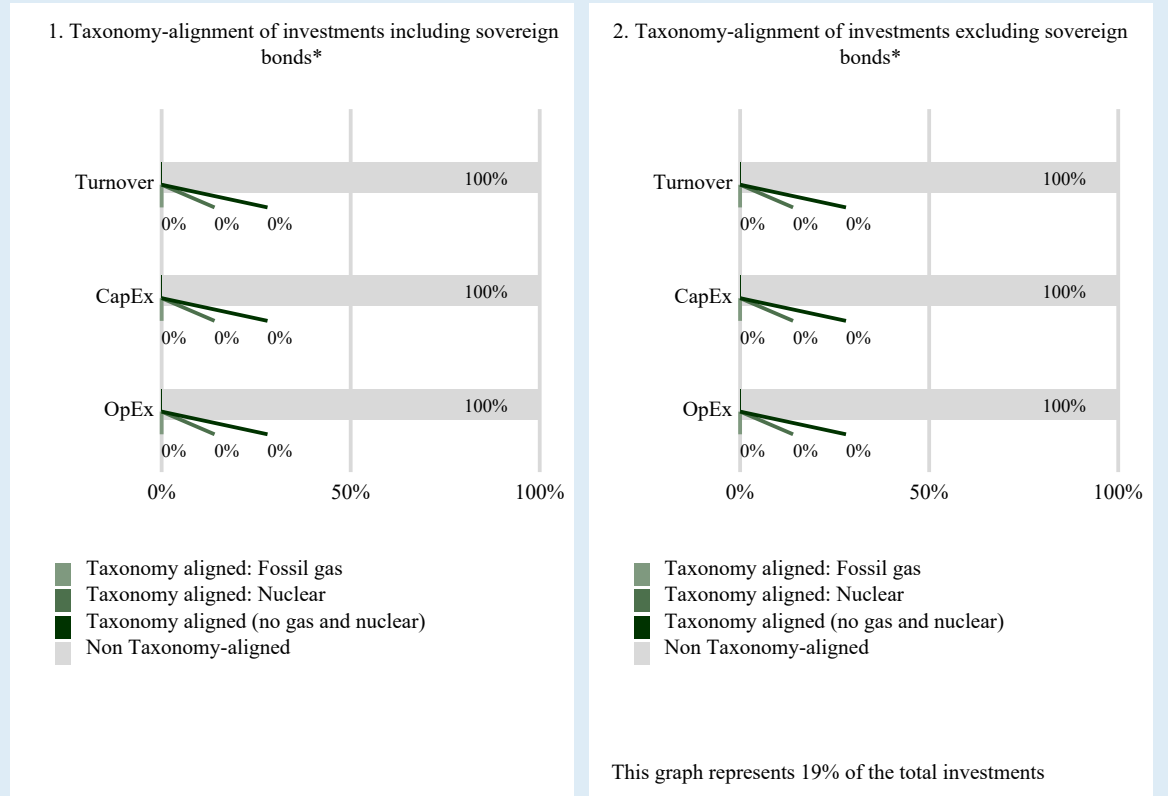

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	N/A	0	0
Investments aligned with the EU taxonomy (enabling activities)	N/A	0	0
Investments aligned with the EU taxonomy (transitional activities)	N/A	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 4 engagements have been registered on climate/GHG related topics, 1 for

biodiversity, 0 on hazardous waste and water emissions, and 3 on social and employee matters.

### **How did this financial product perform compared to the reference benchmark?**

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV India  
Legal entity identifier: 549300FEU53U3RCW4Q22

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	7	3.1%	0
Controversial weapons	64	2	2.1%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	8	4.2%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	13	8.6%	0
Tar sands	53	0	0.0%	0
Tobacco	120	1	1.1%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>

## Actions taken in relation to indicators on investee companies

### GHG Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 2 engagement activities were logged for issuers in the fund for issues relating to these indicators.

### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others

associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 4 engagement activities were logged for issuers in the fund in relation to these issues.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Hdfc Bank Ltd.	INE040A01034	Financials	8.5%	IN
Icici Bank Ltd.	INE090A01021	Financials	8.0%	IN
Infosys Ltd.	INE009A01021	Information Technology	5.8%	IN
Bharti Airtel Ltd.	INE397D01024	Communication Services	5.6%	IN

Vijaya Diagnostic Centre Ltd.	INE043W01024	Health Care	3.5%	IN

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	99	98	98
#2 Other	1	2	2
#1A Sustainable	1	N/A	N/A
#1B Other E/S Characteristics	98	N/A	N/A
Taxonomy-aligned	1	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

## In which economic sectors were the investments made?

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>

Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Coal & Consumable Fuels	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	0	0
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	1	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 2 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 1 on hazardous waste and water emissions, and 4 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Japan  
Legal entity identifier: 222100UVNL7Y92U46R39

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Thermal coal	372	4	0.7%	0
Controversial weapons	64	2	1.5%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	1	0.8%	0
Tar sands	53	0	0.0%	0
Tobacco	120	1	0.8%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 98% of the total investments)</b>			
<b>Greenhouse gas emissions (GHG)</b>	<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	863 / 100%	1,217 / 100%	1,330 / 100%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	934 / 100%	1,379 / 100%	1,297 / 100%
03 Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	29,852 / 100%	40,903 / 100%	41,072 / 100%
04 Total GHG emissions (tons)	31,650 / 100%	43,500 / 100%	43,698 / 100%
05 Carbon footprint (tCO <sub>2</sub> e / m€ invested)	955 / 100%	1,016 / 100%	970 / 100%
06 GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	958 / 100%	1,011 / 100%	991 / 100%
07 Exposure to companies active in the fossil fuel sector (Share of investments)	3% / 100%	6% / 100%	12% / 100%

19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 100%	0% / 100%	0% / 100%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	6% / 96%	14% / 92%	0% / 10%
21	Lack of human rights policy (Share of investments without a human rights policy)	19% / 96%	27% / 92%	37% / 83%

### **Actions taken in relation to indicators on investee companies**

#### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 16 engagement activities were logged for issuers in the fund for issues relating to these indicators.

#### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others

associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 28 engagement activities were logged for issuers in the fund in relation to these issues.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Honda Motor Co. Ltd.	JP3854600008	Consumer Discretionary	6.2%	JP
Mitsubishi Ufj Financial Group	JP3902900004	Financials	5.6%	JP
Nissan Motor Co. Ltd.	JP3672400003	Consumer Discretionary	5.3%	JP
Mitsubishi Estate Co. Ltd.	JP3899600005	Real Estate	4.7%	JP
Murata Manufacturing Co. Ltd.	JP3914400001	Information Technology	3.4%	JP
Mitsui Fudosan Co. Ltd.	JP3893200000	Real Estate	3.1%	JP
Softbank Group Corp.	JP3436100006	Communication Services	3.1%	JP
Koito Manufacturing Co. Ltd.	JP3284600008	Consumer Discretionary	2.8%	JP
Suzuki Motor Corp.	JP3397200001	Consumer Discretionary	2.6%	JP
Marubeni Corp.	JP3877600001	Industrials	2.5%	JP
Kddi Corp.	JP3496400007	Communication Services	2.5%	JP
Air Water Inc.	JP3160670000	Materials	2.3%	JP
Sumitomo Corp.	JP3404600003	Industrials	2.3%	JP
Asahi Kasei Corp.	JP3111200006	Materials	2.3%	JP
Mebuki Financial Group Inc.	JP3117700009	Financials	2.3%	JP

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	98	98	98
#2 Other	2	2	2
#1A Sustainable	1	N/A	N/A
#1B Other E/S Characteristics	97	N/A	N/A
Taxonomy-aligned	1	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

## **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>

Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as key KPI. The fund also reports exposures to the taxonomy through CAPEX and OPEX as supplementing KPIs, which however are not considered for the total weighted taxonomy alignment of the fund. Reference is made to the chart below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	0	0
Investments aligned with the EU taxonomy (enabling activities)	1	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 16 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 1 on hazardous waste and water emissions, and 28 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Nordic Corporate Bond

Legal entity identifier: 549300QFW4DLJQ5OPM36

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

## 6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 25% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### Inclusions – Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 72%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 71%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

### Exclusions

Indicator: The number of excluded investments in the fund’s portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund’s investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank’s exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
-----------	-----------------------------------------	---------------------------------	-----------------------	-------------------------------------------------

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### **...and compared to previous periods?**

The charts above provide as relevant historical comparisons against previous reporting periods.

### **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 5% as based on revenue can be attributed with 3.1% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 99% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,595 / 75%	1,716 / 80%	741 / 79%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	206 / 75%	207 / 80%	324 / 79%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	18,081 / 75%	13,655 / 80%	8,669 / 79%

20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	1% / 69%	<1% / 72%	0% / 64%
21	Lack of human rights policy (Share of investments without a human rights policy)	33% / 69%	44% / 72%	10% / 73%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, and 53 on the list for tar sands. 32 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 9 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 13 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 62% in sustainable investments.

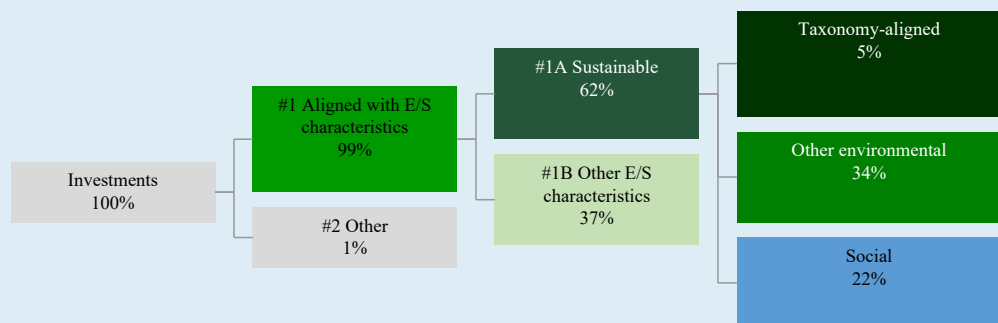

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	96	97	99
#2 Other	4	3	1
#1A Sustainable	41	63	62
#1B Other E/S Characteristics	55	34	37
Taxonomy-aligned	4	3	5
Other environmental	30	43	34
Social	7	17	22

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 5% as based on revenue can be attributed with 3.1% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\* the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	4	3	5
Investments aligned with the EU taxonomy (enabling activities)	1	1	1
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 22 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity and other investments used for hedging or risk management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 32 engagements have been registered on climate/GHG related topics, 9 for biodiversity, 1 on hazardous waste and water emissions, and 13 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Russia  
Legal entity identifier: 549300ZDQFYL6L4U6W11

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not relevant.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not relevant.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not relevant.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not take into account principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not able to monitor, prioritise or report on principal adverse impacts.

## What were the top investments of this financial product?

<b>Largest investments (as calculated on basis of largest investments of the year measured monthly)</b>	<b>ISIN</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
Yandex Nv Class A	NL0009805522	Communication Services	72.7%	RU
Vk Ipjsc	RU000A106YF0	Communication Services	60.1%	RU
Tes Group Holding Plc (Gdr)	US87238U2033	Financials	17.4%	CY
Ozon Holdings Plc (Adr)	US69269L1044	Consumer Discretionary	10.3%	RU
Novolipetsk Steel Gdr (Gb)	US67011E2046	Materials	2.0%	RU
Severstal Pao (Gdr)	US8181503025	Materials	0.6%	RU

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments. **What was the asset allocation?**

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	N/A	N/A	39
#2 Other	N/A	N/A	61
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S Characteristics	N/A	N/A	N/A
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Information Technology	Systems Software	93.07%
Financials	Diversified Banks	6.01%
Materials	Steel	0.92%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in environmentally sustainable economic activities aligned with the EU Taxonomy as measured through revenue as KPI.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	N/A	N/A	0
Investments aligned with the EU taxonomy (enabling activities)	N/A	N/A	0
Investments aligned with the EU taxonomy (transitional activities)	N/A	N/A	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity .

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 0 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige  
Legal entity identifier: 549300CXH1PTTFD73005

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion and weighting of issuers demonstrating responsible handling of environmental, social and governance aspects.
3. Sound environmental stewardship through inclusion and weighting of issuers demonstrating responsible handling of environmental matters assessed against climate-related parameters.
4. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
5. Certain minimum environmental safeguards through exclusions.

6. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 10% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

**Inclusions – Sound sustainability practices**

Indicator: Weighted ESG score of the portfolio. The ESG score is based on a model developed in-house. Data coverage for this indicator was 100%.

Binding element: Issuers are selected such that the fund on average has as an ESG score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

## Inclusions – Sound Environmental stewardship

Indicator: Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating by ISS ESG. Data coverage for this indicator was 100%.

Binding element: Issuers are selected such that the fund on average has a Carbon Risk Rating score of 40 or above. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	0	0.0%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	0	0.0%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0

Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Statens pensjonsfond utland	177	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services ("product lines") identified as contributing to one or more SDGs according to Danske Bank's SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see "Product lines aligned with the UN SDGs").

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?"). The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 1.0% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 100% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,069 / 100%	1,371 / 100%	1,685 / 98%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	837 / 100%	989 / 100%	1,525 / 98%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	182,789 / 100%	117,128 / 100%	137,419 / 98%
04	Total GHG emissions (tons)	184,695 / 100%	119,488 / 100%	140,629 / 98%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 9 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 4 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the

thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 6 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Atlas Copco Ab B	SE0017486897	Industrials	10.0%	SE
Investor Ab B	SE0015811963	Financials	10.0%	SE
Hexagon Ab B	SE0015961909	Information Technology	7.0%	SE
Assa Abloy Ab B	SE0007100581	Industrials	6.7%	SE
Volvo Ab B	SE0000115446	Industrials	6.2%	SE
Skandinaviska Enskilda Banken A	SE0000148884	Financials	5.3%	SE

Epiroc Ab B	SE0015658117	Industrials	4.4%	SE
Astrazeneca Plc	GB0009895292	Health Care	4.0%	GB
Essity Ab B	SE0009922164	Consumer Staples	4.0%	SE
Aak Ab	SE0011337708	Consumer Staples	3.5%	SE
Addtech Ab B	SE0014781795	Industrials	3.3%	SE
Lifco Ab B	SE0015949201	Industrials	3.3%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 58% in sustainable investments.

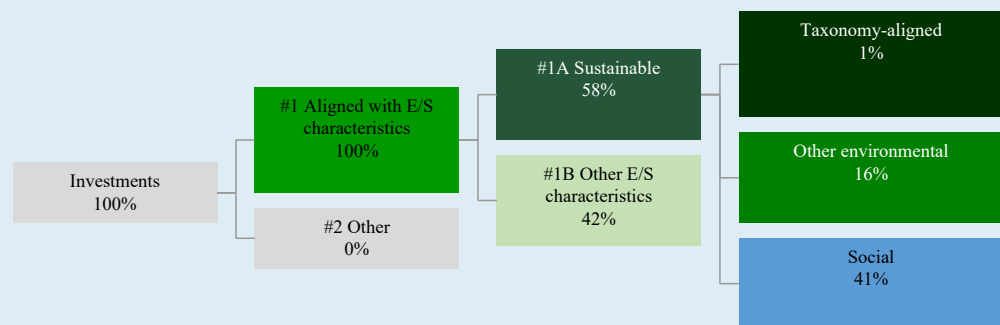

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund’s environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	98	99	100
#2 Other	2	1	0
#1A Sustainable	26	50	58
#1B Other E/S Characteristics	72	49	42
Taxonomy-aligned	2	1	1
Other environmental	13	28	16
Social	11	20	41

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Industrials	Industrial Machinery & Supplies & Components	13.81%
Financials	Multi-Sector Holdings	10.02%
Financials	Diversified Banks	9.97%
Industrials	Construction Machinery & Heavy Transportation Equipment	8.62%
Industrials	Trading Companies & Distributors	7.34%
Industrials	Building Products	6.64%
Real Estate	Real Estate Operating Companies	6.28%

Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 1.0% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
- In fossil gas
- In nuclear energy
- No

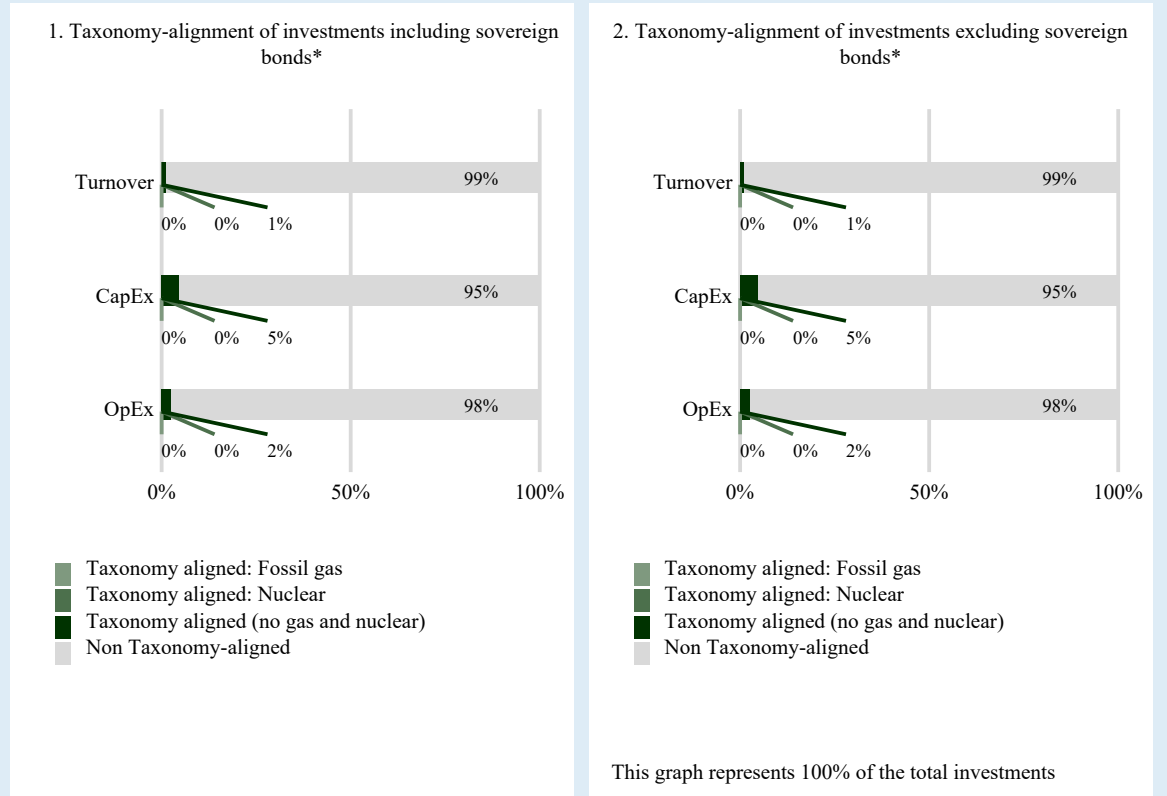

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	1	1
Investments aligned with the EU taxonomy (enabling activities)	1	1	2
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 41 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 9 engagements have been registered on climate/GHG related topics, 4 for biodiversity, 0 on hazardous waste and water emissions, and 6 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Beta

Legal entity identifier: 549300JJONK1X5R87Z42

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 2% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
2. Certain minimum environmental safeguards through exclusions.
3. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered the principal adverse impacts on sustainability factors as disclosed in this report. The fund also invested in activities substantially contributing to one or more environmental objectives of the U Taxonomy (see "What were

the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?").

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	0	0.0%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	2	2.4%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	1	1.1%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	2	0.1%	0
Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0

Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”).

The reported share of economic activities aligned with the EU Taxonomy of 2% is based on revenue as the selected key KPI. The taxonomy-alignment of the fund can be attributed with 2.0% of activities in support of the climate change mitigation objective; 0.0% of activities in support of the climate change adaptation objective; 0.0% of activities in support of sustainable use and protection of water and marine resources, 0.0% of activities in support of pollution prevention and control; and 0.0% of activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities no data is available in relation to which of the environmental objectives the activities of these investments contribute to.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. As the fund's sustainable investments were investments aligned with the EU Taxonomy, the requirements of the EU Taxonomy in relation to environmentally sustainable activities not having a significant harm to other environmental objectives of the EU Taxonomy further safeguarded the requirements in relation to sustainable investments of the fund. In respect to minimum social safeguards, please see the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.

### How were the indicators for adverse impacts on sustainability factors taken into account?

For the assessment of alignment with the EU Taxonomy the fund applied the do no significant harm screening criteria of the EU Taxonomy, which do not include separate considerations in relation to the indicators for assessing principal adverse impacts on sustainability factors. These indicators have been addressed in accordance with the general approach of the fund as detailed in the section "How did this financial product consider principal adverse impacts on sustainability factors?".

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 100% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,514 / 100%	2,545 / 100%	1,335 / 99%

20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	2% / 100%	2% / 100%	0% / 92%
21	Lack of human rights policy (Share of investments without a human rights policy)	41% / 100%	50% / 100%	5% / 99%

### Actions taken in relation to indicators on investee companies

#### GHG Emissions

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 14 engagement activities were logged for issuers in the fund for issues relating to these indicators.

#### Biodiversity

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 8 engagement activities were logged for issuers in the fund relating to this indicator.

#### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 1 engagement activities were logged for issuers in the fund in this regard.

#### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 10 engagement activities were logged for issuers in the fund in relation to these issues.

#### Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns or supranationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the allocation of investments used for attaining environmental and/or social characteristics and other investments. For information on asset allocation in previous reference periods, please refer to the table below the asset allocation chart.

The fund did not invest through a commitment to make sustainable investments. As the fund had 2% investments aligned with the EU-Taxonomy based on revenue, the fund reports those investments as sustainable in the asset allocation graph below.

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	100	100	100
#2 Other	0	0	0
#1A Sustainable	2	2	2
#1B Other E/S Characteristics	98	98	98
Taxonomy-aligned	2	2	2
Other environmental	N/A	N/A	16
Social	N/A	N/A	40

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 2% as based on revenue can be attributed with 2.0% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

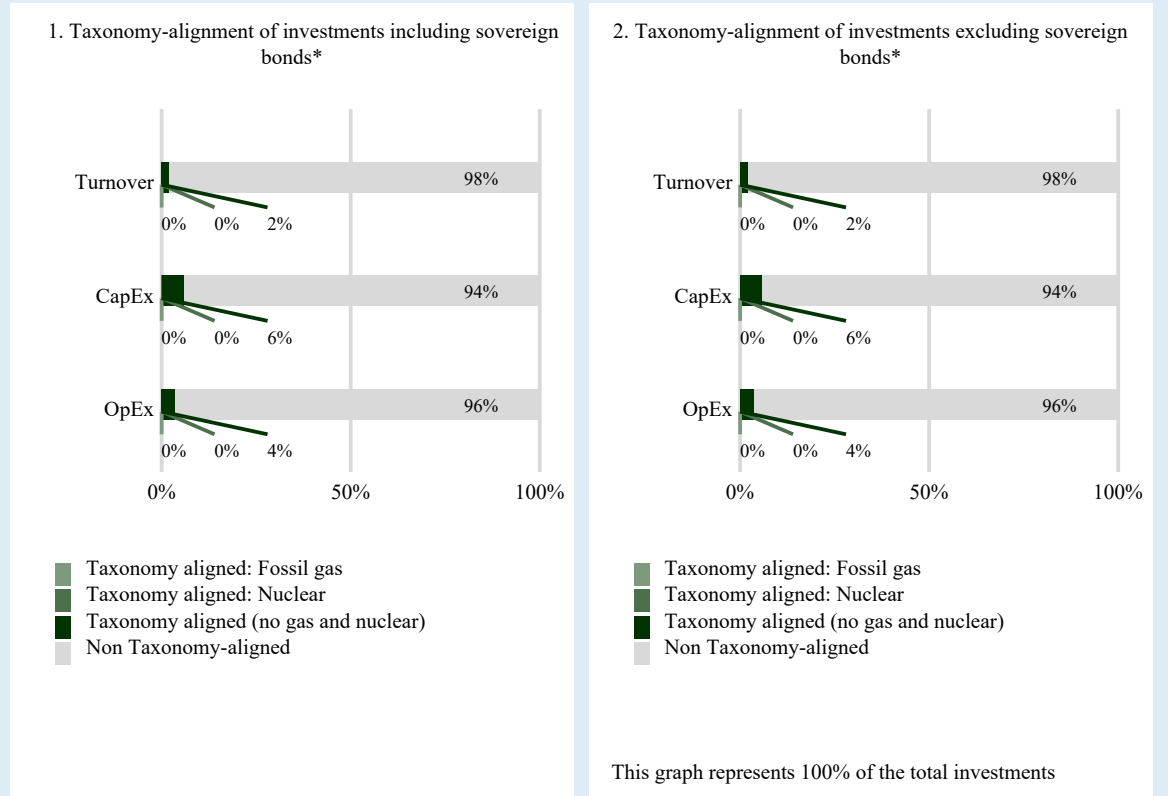

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	2	2	2
Investments aligned with the EU taxonomy (enabling activities)	1	1	2
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not relevant.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

N/A

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 14 engagements have been registered on climate/GHG related topics, 8 for biodiversity, 1 on hazardous waste and water emissions, and 10 on social and employee matters.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Kort Ränta

Legal entity identifier: 549300PQLXHY57M39Z35

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

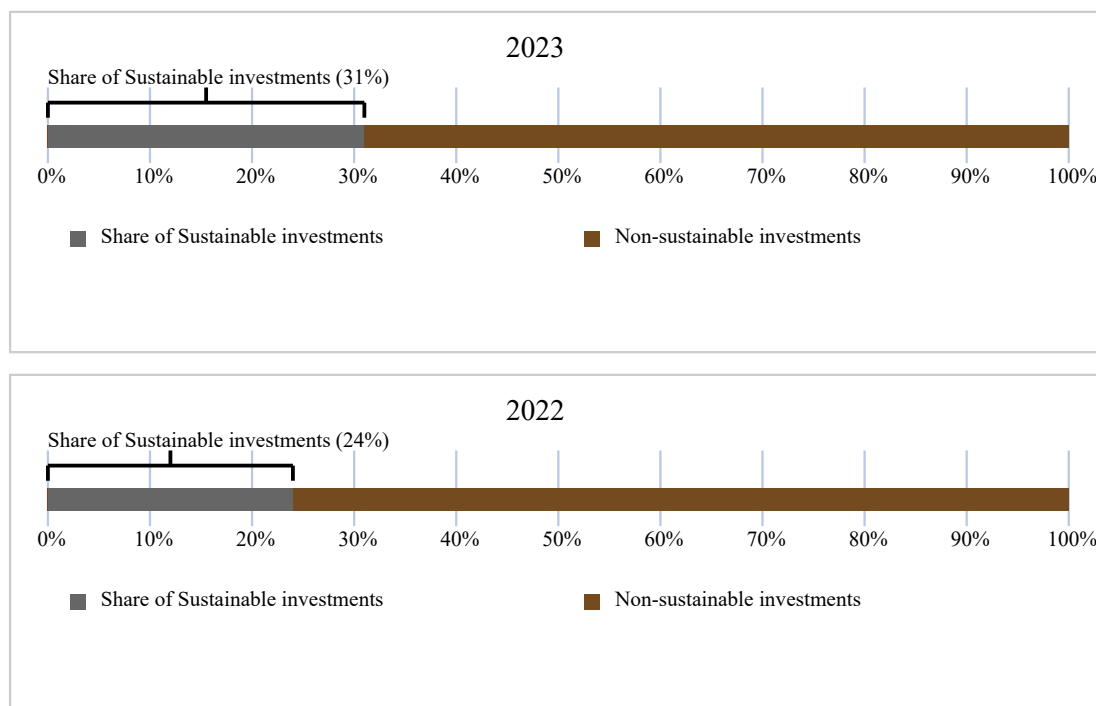

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 10% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	0	0.0%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	0	0.0%	0

Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### **...and compared to previous periods?**

The charts above provide as relevant historical comparisons against previous reporting periods.

### **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 2% as based on revenue can be attributed with 1.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 95% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,684 / 51%	4,934 / 45%	6,008 / 48%

22	GHG intensity of investee countries (Emissions / GDP)	220 / 100%	93 / 100%	99 / 100%
23	Investee countries subject to social violations (percentage)	0 (0%) / 100%	0 (0%) / 100%	0 (0%) / 100%
24	Average Corruption Score	3 / 100%	3 / 100%	4 / 100%
25	Non-cooperative tax jurisdictions	0 / 100%	0 / 100%	0 / 100%
26	Average rule of law score	3 / 100%	3 / 100%	3 / 100%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 4 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 0 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 2 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 0 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Stadshypotek Ab 1.5% 03.12.2024	SE0011643386	Financials	8.1%	SE
Stadshypotek Ab 0.5% 01.06.2026	SE0013882644	Financials	6.5%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 50% in sustainable investments.

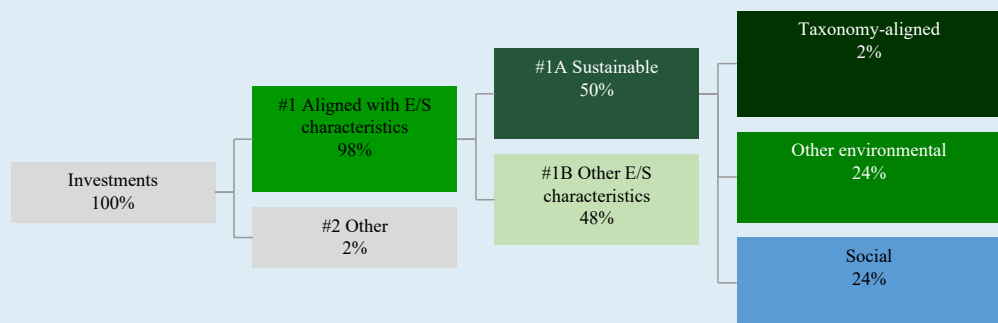

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The fund also made 'Other investments' that were not screened according to the processes used to attain environmental and social characteristics (see 'Which investments were included under "Other", what was their purpose, and were there any environmental or social minimum safeguards').

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund's environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	96	95	98
#2 Other	4	5	2
#1A Sustainable	24	31	50
#1B Other E/S Characteristics	72	64	48
Taxonomy-aligned	1	2	2
Other environmental	21	21	24
Social	2	7	24

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	39.91%
Real Estate	Real Estate Operating Companies	16.70%
Financials	Thriffs & Mortgage Finance	9.58%
Consumer Discretionary	Automobile Manufacturers	3.69%
Industrials	Building Products	3.54%
Financials	Multi-Sector Holdings	2.80%
Consumer Staples	Food Retail	2.52%
Industrials	Security & Alarm Services	2.18%
Industrials	Research & Consulting Services	2.17%
Materials	Forest Products	1.26%
Utilities	Electric Utilities	0.88%
Consumer Staples	Agricultural Products & Services	0.50%
Consumer Staples	Packaged Foods & Meats	0.45%
Industrials	Rail Transportation	0.25%
Industrials	Airport Services	0.24%
Communication Services	Wireless Telecommunication Services	0.23%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
No sector data		13.10%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 2% as based on revenue can be attributed with 1.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

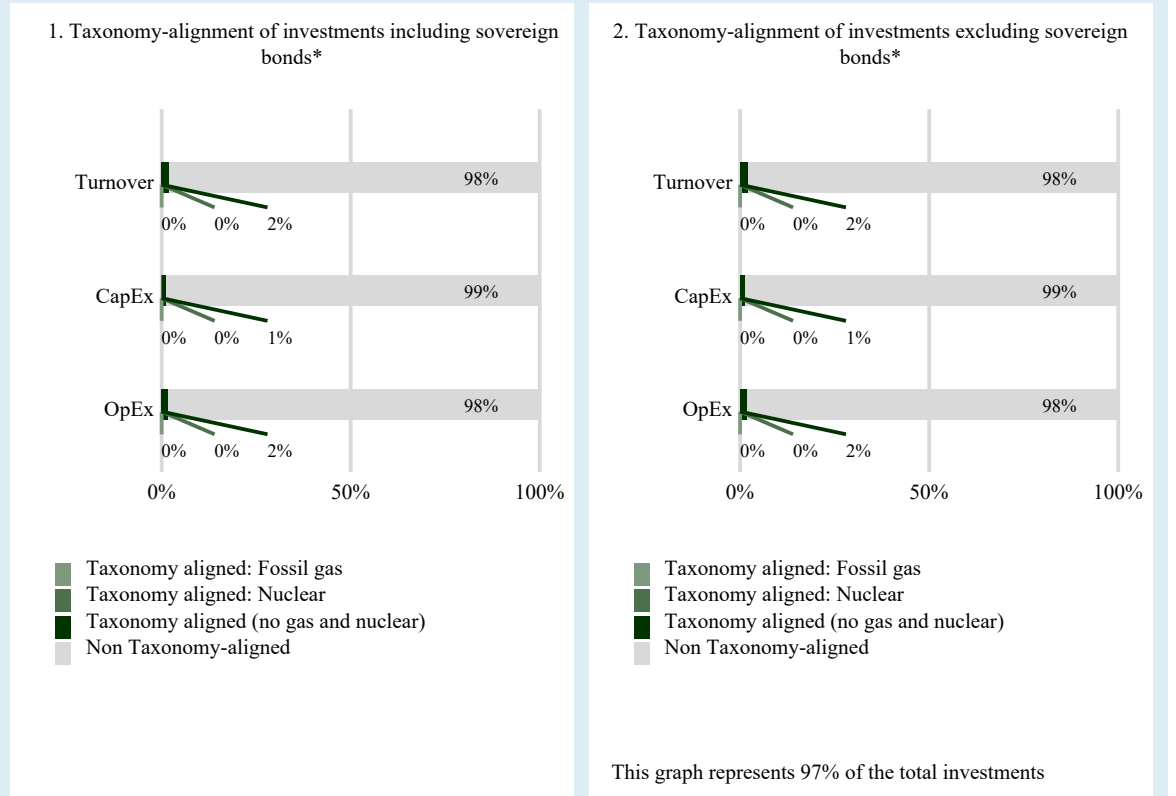

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	2	2
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 24 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's #Other investments include investments that did not contribute to the attainment of environmental and/or social characteristics of the fund. Other investments were not subject to minimum environmental and social standards and included cash held as ancillary liquidity .

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supnationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 4 engagements have been registered on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 2 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Rönta

Legal entity identifier: 549300DKUK3TPYXDJD76

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

## How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

## Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)
- Danske Bank's criteria for sustainability-labelled bonds, which assess the bonds on the basis of the framework criteria for the issuance (EU Green Bond Standard or ICMA) and allocation to projects that contribute to one or more SDGs.

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 5% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	0	0.0%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	0	0.0%	0
Good governance (Enhanced Sustainability Standards)	28	0	0.0%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	0	0.0%	0

Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

### **...and compared to previous periods?**

The charts above provide as relevant historical comparisons against previous reporting periods.

### **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).
- sustainability-labelled bond issuances adhering to framework requirements for labelled bonds of the International Capital Markets Association (ICMA), and where the issuance is allocated to financing projects contributing to one or more of the SDGs in accordance with Danske Bank’s sustainable investment criteria. The criteria were updated in 2024. The measured contributions to the individual SDGs are reported in the graph below (see “Use of Proceeds aligned with the UN SDGs”). The graph does not reflect contributions from issuances that have not yet been allocated to targeted projects.

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 92% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	273 / 65%	329 / 69%	585 / 66%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	118 / 65%	437 / 69%	861 / 66%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	90,628 / 65%	135,080 / 69%	90,416 / 66%
04	Total GHG emissions (tons)	91,020 / 65%	135,846 / 69%	91,863 / 66%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	162 / 65%	248 / 69%	172 / 66%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,363 / 65%	481 / 69%	468 / 66%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	0% / 65%	0% / 69%	0% / 66%
08	Share of non-renewable energy – Consumption	46% / 46%	36% / 52%	70% / 4%
09	Share of non-renewable energy – Production	0% / 65%	0% / 69%	0% / 66%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund’s climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 2 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 1 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an

environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Water and Waste

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 3 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The indicators on the GHG intensity of investee countries, investee countries associated with social rights violations, average corruption score, non-cooperative tax jurisdictions and average rule of law score formed part of the assessment related to country exclusions applied under Danske Bank's enhanced sustainability standards screening. During the reference period, 27 countries were on the exclusion list. 0 engagement activities were logged for issuers in the fund in relation to these indicators.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Stadshypotek Ab 2% 01.09.2028	SE0011062892	Financials	15.1%	SE
Nordea Hypotek Ab 1% 16.06.2027	SE0013358447	Financials	12.2%	SE
Danske Hypotek Ab 1% 17.12.2025	SE0013877214	Financials	10.2%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 56% in sustainable investments.

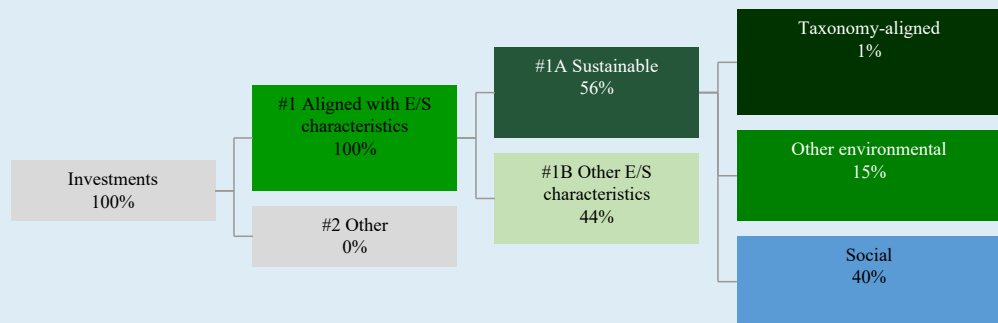

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund’s environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	99	99	100
#2 Other	1	1	0
#1A Sustainable	14	33	56
#1B Other E/S Characteristics	85	66	44
Taxonomy-aligned	1	2	1
Other environmental	9	12	15
Social	5	19	40

### **In which economic sectors were the investments made?**

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Financials	Diversified Banks	57.48%
Financials	Thriffs & Mortgage Finance	10.13%
Real Estate	Real Estate Operating Companies	3.23%
Financials	Multi-Sector Holdings	2.67%
Financials	Regional Banks	1.89%
Industrials	Research & Consulting Services	1.88%
Financials	Life & Health Insurance	1.84%
Industrials	Building Products	1.71%
Industrials	Security & Alarm Services	0.27%
Government bonds		8.66%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
No sector data		10.25%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 1% as based on revenue can be attributed with 0.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

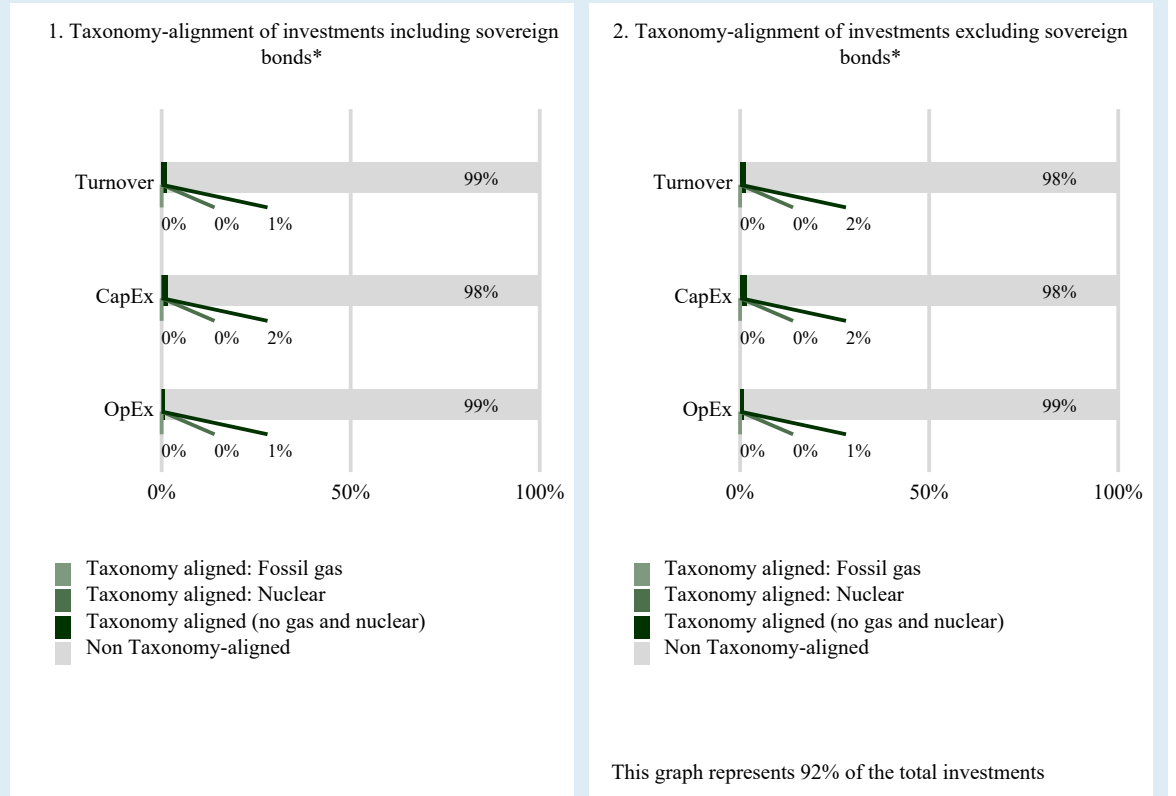

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	2	1
Investments aligned with the EU taxonomy (enabling activities)	0	0	0
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 40 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

For investee companies in the portfolio 2 engagements have been registered on climate/GHG related topics, 1 for biodiversity, 0 on hazardous waste and water emissions, and 3 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Småbolag

Legal entity identifier: 549300WL10NPBGIEPI36

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. The UN Sustainable Development Goals (the “SDGs”) by partially investing in sustainable investments contributing to the goals.
2. Adherence to the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, conventions adopted by the International Labour Organization (ILO) and other international minimum safeguards as well as good governance principles through an enhanced sustainability standards screening.
3. Certain minimum environmental safeguards through exclusions.
4. Certain minimum ethical and social safeguards through exclusions.

The fund was subject to the Active Ownership Policy of Danske Invest Management A/S with an obligation to exercise active ownership in line with the principles of the policy and underlying guidelines. The fund considered

the principal adverse impacts on sustainability factors as disclosed in this report.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

### How did the sustainability indicators perform?

The graphs below demonstrate the performance of the sustainability indicators measured in relation to the environmental and/or social characteristics of the fund. The indicators are reported as an annual average value.

The sustainability indicators are not subject to an assurance provided by an auditor or other review by a third party.

For additional information, please refer to the "SFDR Reading Guide" in this report and the document "Sustainability-related disclosure", which is available under the heading "Sustainability-related disclosures for our funds" at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

### Sustainable investments

Indicator: The weighted share of investments in the fund contributing to the UN SDGs and deemed to be sustainable investments on the basis of:

- Danske Bank's SDG Model, which measures a company's positive contribution to the SDGs on the basis of the issuer's revenue from activities contributing positively to one or more SDGs (the model applies to equity shares, credit bonds and similar listed securities)

The graph below demonstrates the weighted share of the fund's allocated sustainable investments. Investments of the fund that do not qualify as sustainable investments are marked "non-sustainable".

For information on the weighted measured contributions of the sustainable investments to each of the SDGs, see "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Binding element: The fund is committed to investing a minimum of 10% of its total investments in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of issuers on the exclusion list as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment to not invest in issuers subject to the exclusions applied, but they do not provide an indication of the impact the exclusion has had on the fund. The number of exclusions shown in the table and chart below are based on the aggregate number of exclusions on the exclusion list for the applicable exclusion categories at the end of the reference period. An issuer may be counted excluded in more than one exclusion category, meaning that the total number of exclusions in the chart is not necessarily representative to the total number of excluded issuers in the fund or benchmark. To the extent a reference benchmark exists, the number of excluded investments in the benchmark is shown. The benchmark is considered to be representative of the fund's investment universe in this respect.

Binding element: The fund excludes investments that are captured by its exclusion criteria.

Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM (number)	Weight of BM excluded	Total number of excluded companies in portfolio
Alcohol	295	0	0.0%	0
Thermal coal	372	0	0.0%	0
Controversial weapons	64	0	0.0%	0
Commercial gambling	301	1	0.5%	0
Good governance (Enhanced Sustainability Standards)	28	1	0.1%	0
Military equipment	205	0	0.0%	0
Incident & Event Based Breaches (Enhanced Sustainability Standards)	492	0	0.0%	0
Fossil Fuel	2149	1	0.0%	0

Peat-fired power generation	0	0	0.0%	0
Pornography	11	0	0.0%	0
Restricted Countries (Enhanced sustainability Standards)	27	0	0.0%	0
Tar sands	53	0	0.0%	0
Tobacco	120	0	0.0%	0

### Active ownership

Indicator: Number of engagement activities applied to issuers in the fund's portfolio. The graph below illustrates engagement activities registered by Danske Bank or delegated managers of issuers in the fund's portfolio. Engagements registered did not necessarily take place as part of the direct management of the fund.

Binding element: The fund is committed to ensuring engagement with issuers in the fund's portfolio in accordance with the Active Ownership Policy of Danske Invest Management A/S.

## Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to voting on proposals concerning environmental and/or social matters in accordance with the Active Ownership Policy.

### ...and compared to previous periods?

The charts above provide as relevant historical comparisons against previous reporting periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to one or more of the UN SDGs. The UN SDGs consist of 17 goals including underlying targets that contribute to social and environmental objectives. The individual SDGs are: SDG 1: No Poverty; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 5: Gender Equality; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 8: Decent Work and Economic Growth; SDG 9: Industry, Innovation and Infrastructure; SDG 10: Reduced Inequalities; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production; SDG 13: Climate Action; SDG 14: Life Below Water; SDG 15: Life On Land; SDG 16: Peace, Justice and Strong Institutions; and SDG 17: Partnerships for the Goals.

The fund's sustainable investments contributed to these objectives through investments in:

- issuers generating 50% or more of their revenue from products and services (“product lines”) identified as contributing to one or more SDGs according to Danske Bank’s SDG Model. An issuer may also meet the criteria for a sustainable investment if its activities predominantly contribute to environmental objectives that are aligned with the EU Taxonomy. However, the fund is under no obligation to make such investments. The SDG Model was updated in 2024. The measured contributions of the issuers to the individual SDGs are reported in the graph below (see “Product lines aligned with the UN SDGs”).

The fund also invested in activities substantially contributing to one or more of the environmental objectives of the EU Taxonomy (see “To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?”). The reported share of economic activities aligned with the EU Taxonomy of 3% as based on revenue can be attributed with 0.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support of sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

## Breakdown of the sustainable investments' contributions to the UN SDGs

This graph demonstrates a breakdown of how the sustainable investments of the fund contributed to the UN SDGs as based on the SDG Classification developed by Danske Bank. The breakdown is based on the contribution as measured by end-of-year. In that the approach applied for the breakdown is not equivalent to reporting on sustainability-related indicators (see "To what extent were the environmental and/or social characteristics promoted by this financial product met?") which is based on average values for the year.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited the fund from investing in issuers that cause significant harm to social and environmental objectives. The fund's methodology for sustainable investments also incorporated additional constraints, including by integrating indicators for the principal adverse impacts on sustainability factors as well as social minimum safeguards (see "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?").

For the 'do no significant harm' assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Do no significant harm considerations for the fund's sustainable investments were supplemented with thresholds on principal adverse impact indicators for investee companies relating to greenhouse gas emissions, sector exposure to fossil fuels, consumption and production of non-renewable energy sources, energy consumption intensity, investments in companies with no carbon emission reduction initiatives, activities adversely impacting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste, as well as social and employee matters. Even if an investment positively contributed to an environmental or social objective and was generally permitted according to the fund's exclusion criteria, the investment still had to comply with current PAI-indicator thresholds to be considered a sustainable investment. The thresholds are defined on the basis of assessments of when an exposure to any of these indicators has such an impact that it should be perceived per se as causing significant harm to environmental or social objectives. This assessment is revised continuously in step with improvements in underlying data and developments in the understanding of 'do no significant harm'. To see the current thresholds, please refer to the sustainability-related disclosures of the fund in the document "Sustainability-related disclosure", available at:

[https://www.danskeinvest.lu/page/responsible\\_investments\\_insight](https://www.danskeinvest.lu/page/responsible_investments_insight)

under the heading "Sustainability-related disclosures on our funds".

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. These principles were safeguarded through the fund's exclusions based on Danske Bank's enhanced sustainability standards screening.

The EU Taxonomy sets out a 'do no significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund has measured the principal adverse impacts on sustainability factors on the basis of the principal adverse impact indicators ("PAI indicators") defined in Commission Delegated Regulation (EU) 2022/1288.

The average performance measured for the PAI-indicators considered by the fund is outlined in the table below. The data coverage for the individual indicators varies greatly. For this reason, the measured impacts are supplemented with information on the coverage per indicator. Information on the data sources and calculation principles are available in the "SFDR Reading Guide".

The figures (including data coverage) have been recalculated for prior reference periods to ensure comparability with calculations performed for 2024.

"Coverage" in the table measures data coverage for eligible assets of investee companies or sovereigns. Where data coverage is not 100% for an indicator that is calculated using average weights, the investments with data coverage is applied as a proxy for the remaining investments eligible for that indicator. For illustration, this

implies for a portfolio containing 100% equities in investee companies with 50% data coverage, that the weighted average for the 50% of the portfolio with coverage will be representative for the 100% in relation to that indicator.

For further information on the actions taken in respect of the relevant indicators, please see the outline below the table.

<b>Indicators for investments in investee companies (represents 100% of the total investments)</b>				
<b>Greenhouse gas emissions (GHG)</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,549 / 94%	2,093 / 96%	1,423 / 91%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1,261 / 94%	1,776 / 96%	1,548 / 91%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	170,071 / 94%	114,788 / 96%	71,929 / 91%
04	Total GHG emissions (tons)	172,882 / 94%	118,656 / 96%	74,900 / 91%
05	Carbon footprint (tCO <sub>2</sub> e / m€ invested)	414 / 94%	341 / 96%	239 / 91%
06	GHG intensity of investee companies (tCO <sub>2</sub> e / m€ of revenue)	1,232 / 94%	847 / 96%	941 / 91%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	0% / 94%	0% / 96%	0% / 91%
08	Share of non-renewable energy – Consumption	60% / 50%	55% / 39%	80% / 20%
09	Share of non-renewable energy – Production	0% / 94%	0% / 96%	0% / 91%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)	61%	55%	14%
	Agriculture, forestry and fishing	0	0	0
	Mining and quarrying	0	0	0
	Manufacturing	<1	<1	<1
	Electricity, gas, steam and air conditioning supply	0	0	0
	Water supply; sewerage, waste management and remediation activities	0	0	0
	Construction	<1	0	0
	Wholesale and retail trade; repair of motor vehicles and motorcycles	<1	<1	0
	Transportation and storage	0	0	0
	Real estate activities	1	1	0
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	51% / 94%	62% / 96%	74% / 91%
<b>Biodiversity - Activities negatively affecting biodiversity-sensitive areas</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0% / 94%	0% / 96%	0% / 91%
<b>Water – Emissions to water</b>				
		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0 / 0%	0 / 0%	0 / 5%

<b>Waste – Hazardous waste and radioactive waste ratio</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	0.07 / 24%	<1 / 25%	<1 / 4%

<b>Social and employee matters</b>		<b>2024 Impact / Coverage</b>	<b>2023 Impact / Coverage</b>	<b>2022 Impact / Coverage</b>
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0% / 94%	0% / 96%	0% / 91%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	29% / 88%	33% / 89%	27% / 77%
17	Unadjusted gender pay gap (average)	7% / 4%	<1% / 3%	2% / 2%
18	Board gender diversity (Average ratio of female to male)	37% / 94%	38% / 96%	40% / 89%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0% / 94%	0% / 96%	0% / 91%
20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0% / 88%	3% / 89%	7% / 30%
21	Lack of human rights policy (Share of investments without a human rights policy)	72% / 88%	75% / 89%	21% / 77%

#### **Actions taken in relation to indicators on investee companies**

##### **GHG Emissions**

Indicators 1–11 concerning climate-related factors were prioritised through the fund's climate-related exclusions. During the reference period, 372 issuers were on the exclusion list for thermal coal, and 0 were on the list for peat-fired power generation, 2,150 on the list for fossil fuels and 53 on the list for tar sands. 14 engagement activities were logged for issuers in the fund for issues relating to these indicators. The fund applied pre-trade warnings relating to the PAI indicators. If a warning is raised in connection with a purchase of a listed security, it is an indication that the issuer has exceeded thresholds defined for the indicators. If the issuer has not been excluded, such investment may still be made if it is well-founded. The sustainable investments of the fund integrated the thresholds defined for the PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Biodiversity**

Indicator 12 concerning biodiversity was partly covered by the funds enhanced sustainability standards screening. During the reference period, more than 40 issuers were on the exclusion list due to matters among others associated to biodiversity. 2 engagement activities were logged for issuers in the fund relating to this indicator. The fund applied pre-trade warnings relating to this indicator. The sustainable investments of the fund integrated the thresholds for this PAI indicator in the assessment of whether the investment caused significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

##### **Water and Waste**

Indicators 13 and 14 regarding emissions to water and hazardous waste were partially covered by the fund's extended sustainability screening. During the reference period, there were more than 100 issuers on the exclusion list due to conditions related to harmful environmental practices, including in some cases related to emissions to water and hazardous waste. 0 engagement activities were logged for issuers in the fund in this regard. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the

thresholds for these PAI indicators in the assessment of whether the investment caused significant harm to an environmental objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Social and Employee matters

Indicators 15-21 regarding social and employee matters were partially covered by Danske Bank's extended sustainability screening and exclusions for controversial weapons. In the reference period, there were more than 100 issuers on the exclusion list for matters related to these topics, including exclusions due to specific breaches of human rights, good governance, labour rights, etc. The exclusion list for controversial weapons included 64 excluded issuers. 6 engagement activities were logged for issuers in the fund in relation to these issues. The fund applied pre-trade warnings relating to these indicators. The sustainable investments of the fund integrated the thresholds for these PAI indicators in the assessment of whether an issuer caused significant harm to a social objective. See “How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?”.

### Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns or supnationals.

## What were the top investments of this financial product?

Largest investments (as calculated on basis of largest investments of the year measured monthly)	ISIN	Sector	% Assets	Country
Sagax Ab B	SE0005127818	Real Estate	5.5%	SE
Beijer Ref Ab B	SE0015949748	Industrials	5.4%	SE
Aak Ab	SE0011337708	Consumer Staples	5.3%	SE
Addtech Ab B	SE0014781795	Industrials	4.6%	SE
Trelleborg Ab B	SE0000114837	Industrials	4.2%	SE
Np3 Fastigheter Ab	SE0006342333	Real Estate	4.2%	SE

Vitec Software Group Ab B	SE0007871363	Information Technology	4.1%	SE
Hexpol Ab B	SE0007074281	Materials	3.9%	SE
Bufab Ab	SE0005677135	Industrials	3.9%	SE
Sweco Ab B	SE0014960373	Industrials	3.8%	SE
Nordnet Ab Publ	SE0015192067	Financials	3.8%	SE
Lagercrantz Group Ab B	SE0014990966	Information Technology	3.6%	SE
Troax Group Ab	SE0012729366	Industrials	3.4%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2024 - 31 December 2024.

## What was the proportion of sustainability-related investments

The “asset allocation” chart shows the extent to which the fund invested in sustainability-related investments, the allocation of investments used for the attainment of environmental and/or social characteristics, as well as other investments.

The fund invested 32% in sustainable investments.

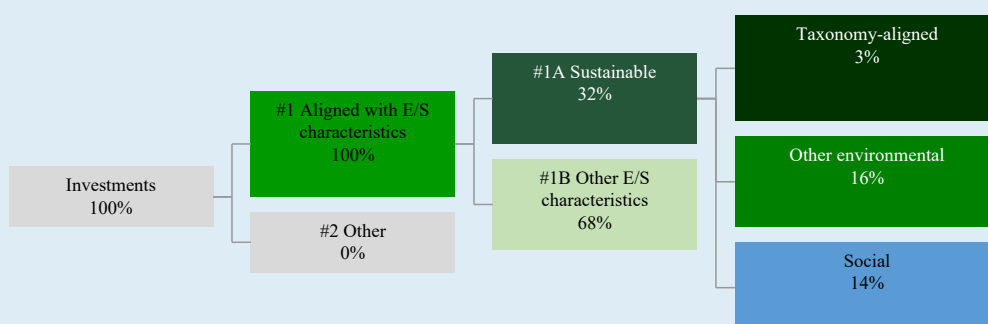

## What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening, which provided the foundation for its exclusions, sustainable investments and active ownership activities. The reported proportion of EU Taxonomy-aligned activities is based on revenue figures reported for these activities against the total value.

The “asset allocation” chart demonstrates the proportion of the fund’s investments that were aligned with the fund’s environmental and/or social characteristics in the reference period, as well as other investments. For asset allocation in previous reference periods, see the table below the chart.

The share of investments aligned with environmental and/or social characteristics is calculated against the total market value of the fund’s investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

<b>Asset allocation of the fund compared to previous reference periods</b>	<b>2022 (%)</b>	<b>2023 (%)</b>	<b>2024 (%)</b>
#1 Aligned with E/S Characteristics	96	98	100
#2 Other	4	2	0
#1A Sustainable	7	22	32
#1B Other E/S Characteristics	89	76	68
Taxonomy-aligned	1	2	3
Other environmental	5	15	16
Social	1	5	14

## In which economic sectors were the investments made?

The table is based on holdings with data coverage in respect to sector allocation. The share of investments for which such data does not exist is shown in the “No sector data” bar. Weights for cash and derivatives are not reported meaning that the exposure weights do not necessarily add up to 100%.

The table reports separately on the fund’s exposures to issuers in sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

<b>Sector</b>	<b>Sub-sector</b>	<b>Pct.</b>
Industrials	Trading Companies & Distributors	19.73%
Real Estate	Real Estate Operating Companies	16.84%
Information Technology	Application Software	12.16%
Industrials	Industrial Machinery & Supplies & Components	9.60%
Consumer Staples	Packaged Foods & Meats	5.00%
Health Care	Life Sciences Tools & Services	4.09%
Information Technology	IT Consulting & Other Services	3.73%
Financials	Investment Banking & Brokerage	3.72%
Information Technology	Electronic Equipment & Instruments	3.59%
Industrials	Construction & Engineering	3.58%
Health Care	Biotechnology	2.51%
Health Care	Health Care Technology	2.05%
Information Technology	Electronic Components	1.90%
Industrials	Building Products	1.86%
Industrials	Human Resource & Employment Services	1.84%
Industrials	Diversified Support Services	1.78%
Industrials	Aerospace & Defense	1.71%
Industrials	Industrial Conglomerates	1.56%
Information Technology	Communications Equipment	1.52%
Industrials	Environmental & Facilities Services	1.21%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments

Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not invest based on a commitment to invest in accordance with the EU Taxonomy. The fund's measured share of investments aligned with the EU Taxonomy in reference period is reported in the graph below. For the purposes of that calculation, the fund screened for activities aligned with the EU Taxonomy as based on the screening criteria set-out in Article 3 of the EU Taxonomy.

The reported share of economic activities aligned with the EU Taxonomy of 3% as based on revenue can be attributed with 0.9% on activities in support of the climate change mitigation objective; 0.0% on activities in support of the climate change adaptation objective; 0.0% on activities in support sustainable use and protection of water and marine resources, 0.0% activities in support of pollution prevention and control; and 0.0% on activities in support of protection and restoration of biodiversity and ecosystems. For some of the companies' reported taxonomy-aligned activities, there is no data on which of the environmental objectives the activities of these investments contribute to.

The measurement of taxonomy-aligned activities is based on company reported data made available through ISS ESG.

The extent to which the investments meet the screening criteria of the EU Taxonomy requirements is not subject to an assurance provided by an auditor.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy\*?

- Yes
  - In fossil gas
  - In nuclear energy
- No

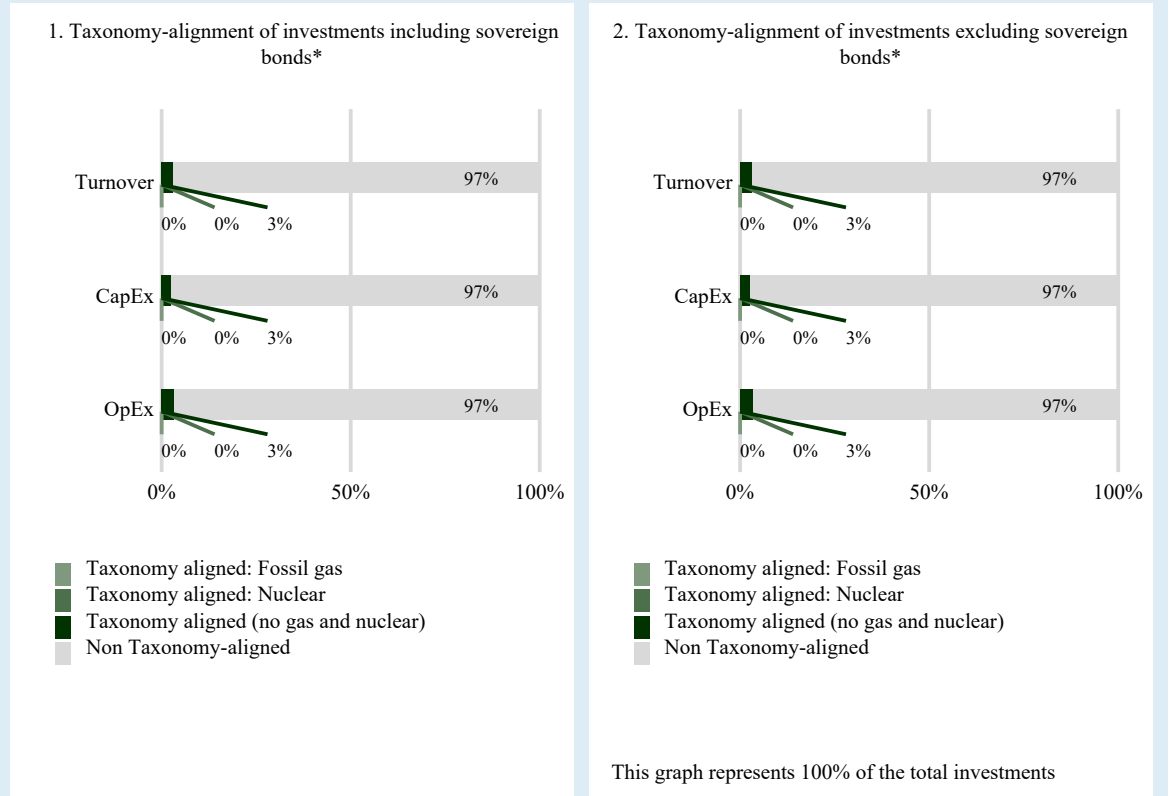

\*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emissions corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2022 (%)	2023 (%)	2024 (%)
Investments aligned with the EU taxonomy	1	2	3
Investments aligned with the EU taxonomy (enabling activities)	0	0	1
Investments aligned with the EU taxonomy (transitional activities)	0	0	0

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the reference year 2022, conservative estimates were used to measure and report the proportion of activities aligned with the EU Taxonomy. This approach differs from following reference years, where alignment with the EU Taxonomy is based solely on company-reported data made available through ISS ESG.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16 %.

The fund invested in these issuers outside the scope of the EU Taxonomy because investments in environmentally sustainable economic activities are not an active part of the fund's investment strategy. Also, the limited availability of data that allows the fund to determine the Taxonomy alignment of the activities of issuers in the fund's full investment universe remains a challenge.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 14 %.

## What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

Not relevant.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund managed the investment strategy in accordance with the binding elements relating to the attainment of the environmental and/or social characteristics, meaning that issuers were screened against applicable exclusions investments in sustainable investments and, where relevant, active ownership activities.

The fund is monitored to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 14 engagements have been registered on climate/GHG related topics, 2 for biodiversity, 0 on hazardous waste and water emissions, and 6 on social and employee matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## How did this financial product perform compared to the reference benchmark?

Not relevant

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
