HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 3 years

Due to its investment strategy, the Sub-Fund's value may vary considerably over the short time. You should therefore stay invested for at least 3 years to profit from gains on the longer term. If you disinvest earlier, there is a higher risk that you might get back only poor returns, or not even the sum you invested. The Sub-Fund is open-ended which means you can redeem money back at every NAV calculation and without having to pay penalties. If applicable to your Sub-Fund you will pay the exit fees only.
However, the Company may suspend the issue and redemption of shares if exceptional circumstances make this appear necessary in the interests of investors, or restrict redemptions if investors' redemption requests reach a predetermined threshold above which redemption requests can no longer be executed in the interests of investors as a whole. In order to manage liquidity risks, the Company may use procedures whereby the costs incurred by subscriptions or redemptions (e.g., transaction costs) are allocated to investors on a cost-allocation basis, thereby reducing the risk of dilution for the investors remaining in the sub-fund. The Company may spin off illiquid investments in the sub-fund portfolio in the interests of investors. The detailed redemption procedure for shares of the Sub-Fund is described in the prospectus.
