Incorporation

abrdn SICAV II (the "Company") was incorporated as a "société d'investissement à capital variable" (SICAV) on 16 November 2000 for an unlimited period and commenced operations on 1 December 2000. It is registered under number B 78.797 with the Luxembourg Trade and Companies Register.

As at 31 December 2024, the Company has issued shares in the following sub-funds:

Emerging Market Local Currency Debt Fund
Euro Corporate Bond Fund
Euro Corporate Sustainable Bond Fund
European Smaller Companies Fund
Global Corporate Bond Fund
Global High Yield Bond Fund
Global Impact Equity Fund
Global Income Bond Fund
Global Inflation-Linked Government Bond Fund
Global Real Estate Securities Sustainable Fund
Global Risk Mitigation Fund
Global Short Dated Corporate Bond Fund
Global Smaller Companies Fund
Macro Fixed Income Fund

The full name of each sub-fund is constituted by the name of the Company, abrdn SICAV II, followed by a hyphen and then the specific name of the sub-fund. Throughout the Financial Statements, the sub-funds are referred to by their short names as indicated above.

No subscriptions can be received on the basis of this document. Subscriptions are only valid if made on the basis of the current prospectus or on the Key Information Document, accompanied by a copy of the latest annual report or of the subsequent semi-annual report if it has been published.

Please see the Notes to the Financial Statements for changes during the year.

Statement of Changes in Portfolio

A statement giving the changes in the Schedule of Investments for the year ended 31 December 2024 can be obtained free of charge from the registered office of the Company.

Report of the Board of Directors

As at 31 December 2024, the total net assets of abrdn SICAV II (the "Company") stood at USD 10,659,530,000.

The Company aims to provide the shareholder with a choice of professionally managed sub-funds investing in a wide range of transferable securities and/or other permitted assets in order to achieve an optimum return from capital invested, while reducing investment risk through diversification. As at 31 December 2024, there are 14 active sub-funds in total, each with its own specific investment objectives and individual portfolios, offering investors the opportunity of exposure to selected areas or to conveniently build a diversified global stock and bond portfolio to meet specific investment goals.

The overall strategy of the Company and the separate sub-funds is to seek diversification through investment primarily in transferable securities.

The Board of Directors adheres to the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds (revised June 2022). The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds. The Board considers that it has been in compliance with the Principles of the Code in all material respects for the year ended 31 December 2024.

The Board of Directors

Luxembourg, 26 March 2025

Report of the réviseur d'entreprises agréé

To the Shareholders of
abrdn SICAV II
35a, avenue John F. Kennedy
L-1855 Luxembourg

Opinion

We have audited the financial statements of abrdn SICAV II and each of its sub-funds ("the Fund"), which comprise the Statement of Net Assets and the Schedule of Investments as at 31 December 2024 and the Statement of Operations and Changes in Net Assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the audit of the financial statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Report of the réviseur d'entreprises agréé (continued)

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements (continued)

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Overview

Global equities

Global stock markets rose strongly over the 12 months. Central banks had previously raised interest rates faster and further than expected to tackle multi-decade-high inflation, which gradually eased throughout 2024. Global economic growth proved more resilient than anticipated, although US recession fears intensified in the latter half of the year before subsiding somewhat. Equities performed well in early 2024, buoyed by strong economic data, but weakened in April as persistent inflation reignited fears that interest rates might remain elevated for longer. By May, renewed optimism about rate cuts and strong corporate earnings provided support for equities. Although equities experienced a sell-off from mid-July to early August amid recession concerns, they recovered after reassuring economic data. Donald Trump's November election win, with its pro-growth agenda, initially lifted equities on expectations of economic stimulus. However, his proposed measures sparked inflationary concerns, leading to weaker equity performance as investors reassessed the pace of future monetary easing.

UK

The UK stock market, as represented by the FTSE All-Share Index, recorded a gain over the period. The FTSE 100 Index, home to multinational companies, outperformed the FTSE 250 Index, which contains smaller companies typically more focused on the domestic UK economy. The performance of the FTSE 100 Index lagged those of many overseas markets given it is home to a large number of defensive shares. However, it also contains several energy and mining companies, which supported the index's return as commodity prices ended the period above where they were after the outbreak of the war in Eastern Europe in early 2022. Meanwhile, smaller UK companies performed well as the outlook for the domestic economy improved. In late May, Prime Minister Rishi Sunak announced a snap UK general election for 4 July, as he looked to capitalise on an improving economic environment. However, the Labour Party subsequently secured a substantial majority, as anticipated. In October, the new government's first Budget featured approximately £40 billion in tax increases aimed at strengthening fiscal stability, along with a commitment to increased borrowing intended to stimulate growth. Long-dated gilt yields remained elevated due to concerns about future debt issuance and higher forecast inflation, which could delay rate cuts. The Bank of England (BoE) kept its Bank Rate unchanged for most of the period before cutting it by 25 basis points (bps) in both August and November, bringing it to 4.75%. The headline rate of UK annual consumer inflation rose from 2.3% in October to 2.6% in November, meeting expectations but remaining above the BoE's 2% target.

US

US share prices, as measured by the broad S&P 500 Index, rose notably over the 12 months. In particular, there was a strong performance by the technology sector, especially artificial intelligence-related stocks, such as NVIDIA, Microsoft and Alphabet. These stocks are especially sensitive to the end of monetary tightening and the prospect of rate cuts due to the favourable effect on their future discounted earnings. Faced with a relatively robust economy, the US Federal Reserve (Fed) continued to maintain a restrictive policy stance for much of the period. However, after a sustained fall in annual inflation and some mixed US economic data, it lowered the target range for the federal funds rate by 50 bps in September, then by 25 bps in both November and December, taking it to 4.25–4.50%. US equities performed well over the first quarter of 2024 as encouraging inflation trends led to optimism about future interest-rate cuts. However, equities weakened in April on fears of interest rates staying higher for longer. Equities rebounded in May and June, though, due to fresh hopes of interest-rate cuts, as well as better-than-expected corporate earnings. Fears of a US recession caused a sell-off in equities from mid-July to the start of August. However, equities resumed their upward trend towards the end of the period, supported in November by Donald Trump's election win, given his pro-growth agenda of tax cuts, deregulation and increased infrastructure spending. Nevertheless, concerns about interest rates staying higher for longer resurfaced in December, leading to a weak month for equities.

Europe

Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose over the 12 months. However, concerns about the eurozone economy and political instability in both France and Germany weighed on investor sentiment. As fears of further monetary tightening eased, European equities trended upwards in the first quarter of 2024. While equities weakened in April on fears of prolonged high rates, they rose in May, driven by hopes of rate cuts and robust earnings. French equities suffered a sharp sell-off in June after President Emmanuel Macron called a snap election following his centrist alliance's shock defeat to Marine Le Pen's National Rally in the European Parliament elections. However, markets steadied in July as the National Rally's gains were smaller than expected. European equities faltered again from mid-July to early August on US recession fears but recovered initially. Towards the end of the period, German Chancellor Olaf Scholz lost a no-confidence vote after the collapse of his coalition government, meaning that there will be a federal election in February. Moreover, the French government collapsed after Prime Minister Michel Barnier resigned following a no-confidence vote over his budget proposal aimed at reducing the country's high debt burden. President Emmanuel Macron appointed veteran politician and centrist ally François Bayrou as Barnier's successor. Such political uncertainty caused volatility in European equities near the end of the period. Encouraged by signs of disinflation, the

Global Overview (continued)

European Central Bank (ECB) cut its deposit facility rate by 25 bps in each of June, September, October and December, taking it to 3.00%.

Asia Pacific

Stock markets in the Asia Pacific (excluding Japan) region advanced over the 12 months. Investor sentiment was supported by signs that high annual inflation globally was beginning to subside, with diminishing fears that the world economy could be tipped into a recession by interest-rate hikes. As disinflation became more apparent, investors began anticipating major central banks cutting rates later in 2024, with the ECB leading the way with a rate reduction in June. Chinese share prices lagged for much of the period. This was due to growing risks in the country's highly indebted property sector, ongoing geopolitical tensions with the US and a regulatory crackdown. As a result, Chinese authorities initially announced various stimulus measures aimed at boosting investor sentiment, which helped to a degree. Chinese equities then surged in September after the People's Bank of China surprisingly announced a raft of planned monetary support measures, including another 50-bp cut to banks' reserve requirement ratios and further reductions in loan prime rates. It also aimed to boost the property market, small business lending and investor sentiment. However, investors were disappointed by the details of the Chinese government's 10 trillion yuan fiscal package, which focused on restructuring local government debt rather than directly stimulating consumer demand or supporting the property sector. Meanwhile, the Taiwanese stock market performed strongly over the period, supported by its relatively high weighting in the technology sector. While the Indian market fared well as investors were encouraged by the resilience of the local economy, signs of slowing growth weighed on sentiment towards the end of the period.

The Japanese stock market, as measured by the TOPIX Index, recorded a double-digit gain over the 12-month period. Solid company results and an increased focus by Japanese companies on shareholder returns helped share prices climb higher over the period. Facing milder inflationary pressures than the world's other major central banks, the Bank of Japan (BoJ) left its key interest rate unchanged at -0.1% and the target for the 10-year government bond yield at around 0% at the start of the period. However, with annual core inflation still above the 2% target, the BoJ raised its key short-term interest rate from -0.1% to 0.0-0.1% at its March meeting. The central bank also finally ended its yield-curve-control policy. At its July meeting, it then hiked rates again, to around 0.25%, and announced a plan to reduce its monthly bond purchases from early 2026. This caused the previously weak yen to strengthen, resulting in a plunge in Japanese equities before they recovered over the rest of the period. However, the resignation of Fumio Kishida as prime minister in August and his replacement by Shigeru Ishiba in October led to heightened political uncertainty and further yen weakness, with Japan's ruling coalition losing its parliamentary majority in a snap election. Anticipation of further BoJ tightening then saw the yen strengthen slightly in November before it continued to weaken in December. Meanwhile, according to a preliminary estimate, the Japanese economy expanded by 0.3% in the third quarter of 2024, as expected, having grown by 0.5% over the previous three months.

Emerging markets

Emerging-market equities rose over the year, but they trailed developed markets. Share-price divergence within countries and sectors characterised emerging-market performance over the period. Technology companies did well, especially those in Taiwan, riding the wave of the 'Magnificent Seven' stocks in the US. However, markets such as Brazil and Mexico fell sharply due to concerns over fiscal discipline and potentially slowing economic prospects. China saw a late-year surge thanks to a slew of government stimulus measures in September, which signalled a shift towards a pro-growth stance. Meanwhile, the Fed lowered interest rates for the first time in four years but hinted at a slower pace of easing in 2025.

Separately, several major emerging economies held elections in 2024, including India, where the ruling Bharatiya Janata Party lost its parliamentary majority and had to rely on allies to remain in power. In Mexico, the ruling left-wing party won a landslide victory. The year concluded with former President Donald Trump's re-election in the US, raising questions about the implications for emerging markets.

Bond markets

Global government bonds had a mostly negative performance. With disinflation underway, the Fed, ECB and BoE all started easing policy, with investors looking ahead to further potential rate cuts in 2025. However, most major central banks are now pursuing a data-dependent approach, as they remain wary of lingering inflationary pressures. Moreover, some of Donald Trump's policies are seen as potentially inflationary, leading investors to anticipate a more measured pace of easing from the Fed in the months ahead. Against this backdrop, the Fed maintained the target rate for the federal funds rate at 5.25-5.50% for much of the period before announcing a 50-bp cut in September then further 25-bp cuts in November and December, bringing the current range to 4.25-4.50%. The BoE kept the Bank Rate at 5.25% for much of the period. As annual inflation approached its 2% target, the UK's central bank announced 25-bp cuts in both August and November, bringing the rate to 4.75%. With annual inflation around its 2% target, the ECB announced 25-bp cuts in its deposit facility rate in June, September, October and December, taking it to 3.00%. Meanwhile, the Japanese central bank

Global Overview (continued)

moved away from its ultra-loose monetary policy but maintained an overall accommodative stance in the face of only a moderate economic recovery. At its March meeting, the BoJ raised its key short-term interest rate from -0.1% to 0-0.1% (the first increase in 17 years) and ended its yield-curve-control policy for 10-year government bonds. The BoJ, at its July meeting, increased the rate again to about 0.25% and announced that it planned to reduce its monthly bond purchases.

Corporate bond prices performed solidly over the 12 months, with both investment-grade and, especially, riskier high-yield bonds faring well due to the former's higher interest-rate sensitivity (as central banks started easing monetary policy) and the latter's exposure to a more robust economic environment than feared, which supported credit fundamentals. This positive performance was largely driven by investor confidence in the stability of corporate earnings. Also, income-oriented investors were drawn to corporate bonds because of their historically attractive yields. Market conditions were challenging for much of 2023 due to continued interest-rate hikes by central banks, stubbornly high annual inflation and an uncertain economic outlook. Indeed, over the first quarter of 2024, government bond yields reverted to their upward trend due to fears that stubborn inflation could lead to rates staying higher for longer. The shift in government bond yields contributed to increased volatility in the corporate bond market. This weighed on corporate bonds before growing expectations that global inflation pressures could be peaking again led investors to anticipate further rate cuts over the course of 2024, on top of those already announced by central banks in the first half of the year. Against this backdrop, credit spreads – the yield premium received by investors in return for the typically greater risk of lending to companies rather than governments – generally tightened, although they did widen notably from late July to early August because of US recession fears. However, corporate bond yields picked up towards the end of the period as inflationary concerns resurfaced, reigniting fears of rates remaining higher for longer.

Outlook

US President-elect Donald Trump took office in late January, and investors will be keeping a keen eye on any policies he introduces regarding tax cuts, deregulation and trade tariffs – as these are likely to affect global market dynamics. Investors will also be monitoring how Trump's policies affect US inflation and how this influences the Fed's rate-cutting cycle in 2025.

In Europe, political instability in both Germany and France is at the forefront of investors' minds. Germany is heading towards an election in February after its coalition government collapsed, while in France, following Michel Barnier's government being ousted in a vote of no confidence, President Macron has now appointed his new prime minister François Bayrou.

In the UK, the Governor of the BoE Andrew Bailey has indicated the BoE would employ a "gradual approach" to further easing. The Bank's next meeting is in early February.

Performance History (continued)

Fund returns: Source: Factset, Basis: performance is calculated over the stated period on the share price performance basis, based on the noted share class, net of annual charges and inclusive of reinvested income. Exceptions being the Euro Government All Stocks Fund which is based gross of fees.

Benchmark returns: Source: Individually disclosed, Basis: The benchmark returns are quoted gross and contain no adjustment for fees. Exception being the Global Real Estate Securities Sustainable Fund which has a benchmark quoted net of fees.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

The performance data does not take account of the commissions and costs incurred on the subscription and redemption of shares.

Performance is calculated at each period end unless otherwise stated.

The Morningstar Analyst Rating for Funds is a forward-looking analysis of a fund. Morningstar has identified five key areas crucial to predicting the future success of a fund: People, Parent, Process, Performance, and Price. The pillars are used in determining the Morningstar Analyst Rating for a fund. Morningstar Analyst Ratings are assigned on a five-tier scale running from Gold to Negative. The top three ratings, Gold, Silver, and Bronze, all indicate that our analysts think highly of a fund; the difference between them corresponds to differences in the level of analyst conviction in a fund's ability to outperform its benchmark and peers through time, within the context of the level of risk taken over the long term. Neutral represents funds in which our analysts don't have a strong positive or negative conviction over the long term and Negative represents funds that possess at least one flaw that our analysts believe is likely to significantly hamper future performance over the long term. Long term is defined as a full market cycle or at least five years. Past performance of a security may or may not

Performance History (continued)

be sustained in future and is no indication of future performance. **Aberdeen Group plc (previously known as: abrdn plc) means the relevant member of abrdn group, being Aberdeen Group plc (previously known as: abrdn plc) together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

- ¹ The sub-fund was transferred out of abrdn SICAV II into abrdn SICAV I on 23 November 2023. Figures shown for 2023 are from 1 January 2023 to 31 October 2023 and show the performance on the A Acc USD share class, previous years are on the D Acc USD.
- ² The sub-fund closed on 10 March 2021. Figures shown for 2021 are from 1 January 2021 to 28 February 2021.
- ³ The sub-fund closed on 28 September 2022. Figures shown for 2022 are from 1 January 2022 to 31 August 2022.
- ⁴ The sub-fund closed on 4 July 2023. Figures shown for 2023 are from 1 January 2023 to 30 June 2023.
- ⁵ The sub-fund closed on 23 November 2022. Figures shown for 2022 are from 1 January 2022 to 31 October 2022. The primary share class changed to B Acc GBP in 2022, previous year is on the A Acc USD share class.
- ⁶ Figures for previous years are on the D Acc EUR share class.
- ⁷ The sub-fund closed on 21 August 2024. Figures shown for 2024 are from 1 January 2024 to 31 July 2024.
- ⁸ Figures for previous years are net of annual charges.
- ⁹ The sub-funds closed on 4 October 2023. Figures shown for 2023 are from 1 January 2023 to 30 September 2023.
- ¹⁰ The sub-fund closed on 14 December 2022. Figures shown for 2022 are from 1 January 2022 to 30 November 2022.
- ¹¹ Figures for previous years are gross of annual charges.
- ¹² The sub-fund was transferred out of abrdn SICAV II into abrdn SICAV I on 23 November 2023. Figures shown for 2023 are from 1 January 2023 to 31 October 2023 and show the performance on the A Acc EUR share class. Performance for previous years are on quoted as D Acc EUR in 2022 and Z Acc in 2021.
- ¹³ Figures for previous years are on the D Acc USD share class.
- ¹⁴ The sub-fund closed on 26 October 2022. Figures shown for 2022 are from 1 January 2022 to 30 September 2022.
- ¹⁵ The sub-fund closed on 23 November 2022. Figures shown for 2022 are from 1 January 2022 to 31 October 2022.
- ¹⁶ The sub-fund was transferred out of abrdn SICAV II into abrdn SICAV I on 2 December 2022. Figures shown for 2022 are from 1 January 2022 to 30 November 2022.
- ¹⁷ The index was previously known as Bloomberg Barclays Global High Yield Corporate Index.
- ¹⁸ The sub-fund was transferred out of Aberdeen Standard SICAV III into abrdn SICAV II on 25 November 2022. Figures shown for 2022 are from 25 November 2022 to 31 December 2022. Historic performance is reported from the donor fund pre-transfer for reference only.
- ¹⁹ Figures for previous years are on the D Acc Hedged GBP share class.
- ²⁰ Effective 30 January 2023 the benchmark of the sub-fund moved from a gross to a net basis.
- ²¹ The sub-fund launched on 10 June 2022. Figure shown for 2022 is from 10 June 2022 to 31 December 2022.
- ²² Figures for previous years are on the D Acc GBP share class.
- ²³ The sub-fund launched on 7 July 2021. Figures shown for 2021 are from 7 July 2021 to 31 December 2021. The sub-fund closed on 12 September 2024. Figures shown for 2024 are from 1 January 2024 to 31 August 2024. Figures for previous years are on the B Acc EUR share class.
- ²⁴ The sub-fund launched on 23 September 2021. Figures shown for 2021 are from 23 September 2021 to 31 December 2021. The sub-fund closed on 27 September 2023. Figures shown for 2023 are from 1 January 2023 to 31 August 2023.

[^] This sub-fund is not authorised in Hong Kong and is not available to Hong Kong residents.

[†] Source: Aberdeen Group plc (previously known as: abrdn plc).

The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Key Information Document will be updated to reflect current changes.

¹ See note 12.

* A perpetual bond is a bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

† Managed by subsidiaries of Aberdeen Group plc (previously known as: abrdn plc).

Currently forward positions are not collateralised.

The accompanying notes form an integral part of these financial statements.

Notes to the Financial Statements

1. Presentation

a) Organisation

abrdn SICAV II (the "Company") was incorporated under the laws of the Grand Duchy of Luxembourg on 16 November 2000 as a "Société d'Investissement à Capital Variable" ("SICAV") with multiple sub-funds for an unlimited period.

The Company has received approval from the Luxembourg authorities for registration under Part I of the law of 17 December 2010, as amended, relating to Undertakings for Collective Investment in Transferable Securities (the "UCITS Law") in conformity with Directive 2009/65/EC (the "UCITS Directive"). The Company is not a self-managed SICAV. A management company was appointed on 1 July 2013.

The legal notice ("notice légale") required by Luxembourg laws in connection with the issue and sale of shares in the Company has been deposited with the Registrar of the District Court of Luxembourg (the "Registrar"). The Company's articles of incorporation have also been deposited with the Registrar and have been published in the Recueil des Sociétés et Associations (the "Mémorial") on 19 December 2000. The Company has been registered under number B 78.797 at the Luxembourg Trade and Companies Register.

The Company's financial year starts on 1 January and ends on 31 December of each year.

As at 31 December 2024, there were 14 separate active sub-funds, providing shareholders with the opportunities for investment in a wide variety of markets, securities, and currencies.

b) Presentation of the financial statements

The accompanying financial statements present the assets and liabilities of the individual sub-funds and of the Company taken as a whole. The financial information of each individual sub-fund is expressed in the currency designated in the prospectus for that particular sub-fund and the combined statements of the Company are expressed in US Dollars ("USD"). The financial statements have been prepared in accordance with Luxembourg GAAP, applicable to Undertakings for Collective Investment Funds, and with the format prescribed by the Luxembourg authorities for Luxembourg investment companies.

The combined statements were calculated on the basis of aggregation of individual sub-funds statements with no elimination of cross-investments if any. As of 31 December 2024, the cross-investments within the Company represent USD 6,584,076, or 0.06% of the combined net asset value of the Company.

The NAVs disclosed in the financial statements are the dealing Net Asset Value calculated on 31 December 2024 based on intra-day stock market prices as of 31 December 2024. If the NAVs had been calculated based on closing stock market prices, the NAVs of the sub-funds would not have been materially different.

The financial statements of the sub-funds have been prepared on a going concern basis, except for the sub-funds closed to investors during the year (disclosed in the table below) which have been prepared on a non-going concern basis:

Sub-fund	Base currency	Closure date
Euro Government All Stocks Fund	EUR	21 August 2024
Multi-Asset Climate Opportunities Fund	EUR	12 September 2024

As at 31 December 2024, the liquidation of the above sub-funds is not complete. There are remaining cash balances that will be used to cover outstanding liabilities, as follows:

Sub-fund	Base currency	Cash balance
Euro Government All Stocks Fund	EUR	213,350
Multi-Asset Climate Opportunities Fund	EUR	83,939

2. Accounting policies

a) Accounting convention

These financial statements are prepared in accordance with Luxembourg regulations applicable to Undertakings for Collective Investment Funds. The financial statements have been prepared under the historical cost convention modified by the revaluation of investments.

Notes to the Financial Statements (continued)

2. Accounting policies (continued)

b) Investment valuation

In determining the value of the assets of the Company, each security and money market instrument listed on a recognised stock exchange or dealt on any other regulated market that operates regularly, is recognised and is open to the public, will be valued at their intra-day prices. In the event there should be several such markets, they will be valued on the basis of the intra-day price on the main market for the relevant security.

Securities and money market instruments not listed or traded on a stock exchange or not dealt on another regulated market will be valued at their fair value at which it is expected they may be resold as determined prudently and in good faith by the Board of Directors. Suspended or delisted securities held at 31 December 2024 have been valued at fair value as instructed by the Valuation and Pricing Committee, details of these securities are included in Schedule of Investments.

All other securities and other assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors.

In the event that the intra-day price does not, in the opinion of the Board of Directors, truly reflect the fair market value of the relevant securities and money market instruments, the value of such securities will be defined by the Board of Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith.

In accordance with the Company prospectus, the fair value adjustment mechanism is applicable whenever a triggering event occurs. During the year, no fair value adjustments were applied to any of the sub-funds.

Mortgage and other asset backed securities are independently priced using appropriate models and certain corporate bonds may be priced using indicative broker quotes.

The liquidating value of future, forward or options contracts, if any, traded on exchanges or on other regulated markets shall be based upon the last available settlement prices of these contracts on exchanges and regulated markets on which the particular future, forward or options contracts are traded by the Company; provided that if a future, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable.

c) Investment income

Interest is accrued on a day-to-day basis. In the case of debt securities issued at a discount or premium to maturity value, the total income arising on such securities, taking into account the amortisation of such discount or premium on an effective interest rate basis, is spread over the life of the security.

Interest income on bonds may be received either in cash or as a Payment in Kind ("PIK"). Where a PIK bond settles physically (either because it matures, or it pays interest) the interest income is recognised as the lower of the market value and the nominal value of the settlement.

In the event where there is no physical settlement, the factor change on that holding is recognised as interest income in the Statement of Operations and Changes in Net Assets at the point when the factor change occurs.

Dividends are accounted for on an ex-dividend basis. Interest and dividend income are stated net of irrecoverable withholding taxes, if any.

Bank interest income is accounted for on an accrual basis. It is composed of interest on bank account and interest on term deposits.

d) Foreign exchange

The books and records of each sub-fund are denominated in the base currency of the corresponding sub-fund. Amounts denominated in other currencies are translated into the base currency on the following basis:

- (i) investment valuations and other assets and liabilities initially expressed in other currencies are converted on each business day into the base currency using exchange rates prevailing on each business day; and
- (ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

The combined statements correspond to the sum of the statements of each sub-fund, converted to USD. The combined figures in the Statement of Operations and Changes in Net Assets have been calculated using the exchange rates ruling at the year-end date. The resulting foreign exchange adjustment of USD (424,691,000) represents the movement in

Notes to the Financial Statements (continued)

2. Accounting policies (continued)

d) Foreign exchange (continued)

exchange rates between 31 December 2023 and 31 December 2024. This is a notional amount, which has no impact on the net assets of the individual sub-funds.

Realised and unrealised exchange differences on the revaluation of foreign currencies are taken to the Statement of Operations and Changes in Net Assets.

Main exchange rates used as at 31 December 2024 are as follows:

1 USD =	1.615117	AUD	1 USD =	1,472.146979	KRW
1 USD =	6.177835	BRL	1 USD =	524.658972	KZT

1 USD =	157.160055	JPY	1 USD =	18.870061	ZAR
1 USD =	129.349373	KES			

e) Realised gains and losses on investments

A realised investment gain or loss is the difference between the historic average cost of the investment and the sale proceeds. These are converted into the base currency using currency exchange rates prevailing on the respective dates of the sale transactions.

f) Forward foreign exchange contracts

Unsettled forward foreign exchange contracts are valued using forward rates of exchange applicable at the year-end date for the remaining period until maturity. All unrealised gains and losses are recognised in the Statement of Operations and Changes in Net Assets. Currently forward positions are not collateralised.

The quoted leverage excludes the impact of the foreign exchange forwards used in currency hedged share classes which are held for those shareholders only. It also excludes the temporary impacts that arise when renewing currency forwards and when closing some exchange cleared derivatives. Although the renewal of currency forwards and closure of exchange traded derivatives results in no change or a reduction in market exposure, gross derivative leverage would increase because new equal and offsetting derivative contracts are traded to facilitate this efficiently. The offsetting contracts are held to their maturity date, which is less than 5 working days for currency forwards.

g) Futures

Futures contracts are valued at the exchange quoted intra-day price. Initial margin deposits are made in cash upon entering into futures contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised gains and losses by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading.

Notes to the Financial Statements (continued)

2. Accounting policies (continued)

g) Futures (continued)

Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. Variation margin payments are recorded in the amounts held at futures clearing house and brokers account in the Statement of Net Assets and related movements on unrealised results are recorded in the Statement of Operations and Changes in Net Assets. When the contract is closed, the sub-fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

h) Swap/Option contracts

Sub-funds may enter into swap agreements such as credit default swaps, interest rate swaps, swaptions, overnight index swaps and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and Changes in Net Assets. Swaps are valued at the fair value intra-day price using external independent third party supplied prices as determined in good faith, pursuant to procedures established by the Board of Directors.

Any outstanding interest accrual on swaps is recorded as either a net receivable or net payable in the Statement of Net Assets. Similarly, the interest received or paid on swaps is disclosed as a net amount in the Statement of Operations and Changes in Net Assets.

Sub-funds may enter into the purchase of call and put options. Gains or losses resulting from option contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets. Options are valued at the exchange quoted intra-day price.

3. Share Class Information

a) General

Within each sub-fund, the Company is entitled to create different share classes. These are distinguished by their distribution policy or by any other criteria stipulated by the Directors. Please refer to the prospectus for further details. For a list of current live share classes please visit abrdn.com.

The sub-funds are valued at 1:00 pm Luxembourg time on each dealing day.

b) UK Reporting Fund Regime

UK Reporting Fund Regime Status is granted prospectively by the UK taxation authorities. It is the intention of the Board of Directors to continue to comply with the requirements of the Reporting Fund Regime for certain share classes.

Equalisation applies only to shares purchased during the distribution period (Group 2 shares).

It is the average amount of income included in the purchase price of Group 2 shares.

Annually and within six months of the year end, the Manager will publish the UK Reporting Regime Report to investors for all share classes granted reporting Fund status on its website (abrdn.com).

The UK Reporting Regime Report to investors for each share class can also be requested in writing by contacting the Shareholder Service Centre as detailed in the Management and Administration section of this report.

c) Switches

Except in relation to Global Risk Mitigation Fund, shares in one sub-fund may be exchanged or switched into shares of the same or a different class in another sub-fund or of a different class in the same sub-fund, subject to the qualifications for investment being met, on any dealing day for the relevant sub-funds. Shares of Global Risk Mitigation Fund may be switched into shares of the same or a different class in the same sub-fund. Shares in the same class may be switched between accumulation and distribution shares within the same class. Investors may switch either a specific number of shares or shares of a specified value. For full details on switching contact the Global Distributor, UK Distributor, Transfer Agent or asi.luxembourg@abrdn.com.

d) Swing pricing adjustment

Frequent subscriptions and redemptions can potentially have a dilutive effect on the sub-fund's NAV per share and be detrimental to the long-term investors as a result of the transaction costs that are incurred by the sub-fund in relation to the trades undertaken by the Investment Manager.

Notes to the Financial Statements (continued)

3. Share Class Information (continued)

d) Swing pricing adjustment (continued)

The Board of Directors' current policy through delegation to the Investment Managers' Investor Protection Committee (IPC) is to apply a swing pricing adjustment to the NAV of each share class of all sub-funds. A swing factor is applied whenever net subscriptions or redemptions exceed a certain threshold determined by the Board of Directors (having considered prevailing market conditions).

The swing pricing adjustment will be recorded in the relevant sub-fund's NAV and becomes part of the sub-fund's relevant dealing NAV.

The swing pricing adjustment is a percentage adjustment applied to each share class in a sub-fund on a dealing day determined on the basis of estimates of any dealing charges (including commission and/or other costs) and/or any bid/offer spread that the Board of Directors believes are appropriate to take into account in respect of that sub-fund. Such dealing charges will reflect costs and liabilities not included in the calculation of the NAV of the relevant share class. The adjustment is recorded in the Statement of Net Assets and Statement of Operations and Changes in Net Assets as "adjustment due to swing pricing".

The net asset values as at 31 December 2024 disclosed in this report do not include any swing pricing adjustments. Had there been a swing at the year-end then the values disclosed may differ from those published on 31 December 2024 for dealing into the sub-funds. There was no swing applied as at 31 December 2024.

The maximum swing factor rate applied on net subscriptions/redemptions exceeding a certain threshold during the year ended 31 December 2024 was 0.90%. There is no pre-set maximum swing factor, the Directors can raise this limit if necessary to protect the interests of investors.

Further information can be found at www.abrdn.com.

e) Equalisation on the subscription and redemption of shares

Equalisation is operated in connection with the subscription and redemption of shares. It represents the income element included in the price for the subscription and redemption of shares.

4. Expenses

a) Investment management fees

The Investment Managers receive fees for the provision and co-ordination of investment services to the Company, which shall not exceed 3% of the NAV of each sub-fund. The fees are calculated as a percentage of the NAV of each sub-fund.

For the purpose of the calculation, the value of each sub-fund (and the value attributable to each share class) is taken as at the NAV per share on the previous dealing day, taking into account any subscriptions and/or redemptions on that day.

These fees are accrued daily and are paid monthly in arrears to the Investment Managers. abrdn Investments Limited pays the fees of the Sub-Investment Managers. For certain classes of shares, the Investment Managers reserve the right, at their discretion, to reallocate any investment management fee they receive to certain recognised financial intermediaries or institutions in compliance with applicable laws and regulations.

Where a sub-fund invests in an open-ended collective investment scheme which is operated or managed by the Investment Manager or an associate of the Investment Manager, no additional annual management charge is incurred by the sub-fund on such an investment.

The following investment management fees rates were applicable during the year and as at 31 December 2024:

Sub-fund	Share classes %							
	Class A	Class B	Class D	Class J	Class K	Class S	Class T	Class Z
Emerging Market Local Currency Debt Fund	1.40	0.65	0.65	–	0.45	–	–	0.00

Multi-Asset Climate Opportunities Fund	1.00	0.50	0.50	–	0.30	–	–	0.00

b) Management Company charge

The Company pays an annual charge to the Management Company up to a maximum of 0.05% of the NAV of each sub-fund.

For the purpose of the calculation, the value of each sub-fund (and the value attributable to each share class) is taken as at the NAV per share on the previous dealing day, taking into account any subscriptions and/or redemptions on that day.

The Management Company charge shall be accrued daily and payable monthly in arrears. The current Management Company charge is an annual rate of 2.5 basis points (0.025%).

The Management Company charge shall be used to pay the Management Company for the services it provides to the Company (in particular the performance of its monitoring role) and shall include reimbursement for any additional regulatory capital costs incurred by the Management Company by reason of its appointment per annum.

c) Transaction costs

Transaction costs may arise on the acquisition and disposal of investments and these costs may include fees and commissions paid to agents, advisors, brokers, and dealers. These are included in "Net realised gain/(loss) on Investments" in the Statement of Operations and Changes in Net Assets.

Dealing commission is usually paid for transactions in securities and derivatives over an exchange (e.g., equities). Transaction costs may not be separately identifiable for transactions that do not occur over an exchange as the costs may be included in the transaction price (e.g., bonds and money market instruments).

During the year ended 31 December 2024, the sub-funds incurred commission expenses relating to the sale and purchase of Future contracts which have been included in the Statement of Operations and Changes in Net Assets as "Net realised gain/(loss) on Future contracts".

During the year ended 31 December 2024, there were no transaction costs incurred relating to the trading of swaps and options.

For the year ended 31 December 2024, the sub-funds incurred transaction fees which have been defined as commissions and tax relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets as follows:

Sub-fund	Currency	Commissions '000	Taxes '000	Total '000
Emerging Market Local Currency Debt Fund	USD	(6)	(11)	(17)
Euro Corporate Bond Fund	EUR	23	–	23

Multi-Asset Climate Opportunities Fund	EUR	3	2	5

Notes to the Financial Statements (continued)

4. Expenses (continued)

d) General administration charges ("GAC")

Effective 1 June 2024 a general administration charge ("GAC") rate of 0.08% was applied, prior to this the GAC rate was 0.07%.

The operating expenses incurred by the Company are generally paid out of the assets of the relevant sub-fund. To seek to minimise the variability of these expenses, for a number of these operating expenses, a fixed rate charge of up to a maximum of 0.10% is charged to each share class.

The level of the effective GAC below this maximum level may vary at the Board of Directors' discretion, as agreed with the Management Company, and different rates may apply across the sub-funds and share classes. The Board of Directors may amend the maximum fixed level of the GAC applicable to each share class at any time at its discretion upon prior notice to the relevant shareholders.

The effective GAC is calculated in the same way as the investment management fee set out in 4.a) above.

The effective GAC is disclosed as part of the other operating charges of a share class in the relevant PRIIP KID.

Full details of the GAC and the expenses that are included within the charges, can be found within the prospectus of the Company.

e) Expense cap

As at 30 April 2024 the maximum expense caps on the applicable share classes are listed below. Effective 1 May 2024, all expense caps were removed. All expense caps accrued up to and including 30 April 2024 have been crystallised and will be paid post the completion of the 2024 audit.

Amounts receivable resulting from the application of expense caps for the period will be paid annually by the Investment Manager.

Sub-fund	Share classes %							
	Class A	Class B	Class D	Class J	Class K	Class S	Class T	Class Z
Euro Corporate Bond Fund	1.11	0.56	0.57	0.34	0.25	–	0.34	0.07
Euro Corporate Sustainable Bond Fund	1.21	0.71	0.62	–	0.25	–	0.34	–
Euro Government All Stocks Fund	–	–	–	–	–	–	–	0.07
Global Corporate Bond Fund	1.11	–	0.57	0.41	–	0.37	–	0.07
Global High Yield Bond Fund	1.48	–	0.69	–	–	–	–	0.09
Global Risk Mitigation Fund	–	1.10	1.01	–	–	0.91	–	0.11
Global Short Dated Corporate Bond Fund	–	–	–	–	–	0.35	–	0.10
Macro Fixed Income Fund	1.39	0.79	0.70	–	–	–	–	0.10

f) Depositary fees

The depositary fees are calculated at a rate determined by the territory or country in which the sub-fund assets are invested. Currently, the lowest rate is 0.0042% and the highest rate is 0.0272% of the NAV of the relevant sub-fund annually.

g) Bank interest

Bank interest expenses arise if there are negative interest rates on deposits and also owing to overdrafts that may arise from time to time.

5. Dividend distribution

The Directors declared monthly dividends for the sub-funds as listed below, for the year ended 31 December 2024, to all shareholders on record on the last day of the relevant month.

6. Taxation

a) Taxe d'abonnement

Under legislation and regulations prevailing in Luxembourg, the sub-funds are subject to the "taxe d'abonnement" (subscription tax) at the rate of 0.05% per annum, except for the share classes which benefit from a reduced tax rate of 0.01% being the classes of shares dedicated to institutional investors. The tax is payable quarterly on the basis of the value of the net assets of the sub-funds at the end of the relevant calendar quarter. For sub-funds with investment in funds already subject to taxe d'abonnement there are exemptions available. For more information, please refer to the prospectus.

b) Withholding tax reclaims

Where possible, withholding tax reclaims have been filed in respect of the withholding tax applied on dividends and interests on bonds received during recent years. Receivables with respect to the potential refunded amounts are only booked when they are virtually certain.

c) Provision for foreign taxes

Capital gains, dividends and interest on securities received from other countries may be subject to withholding or capital gains taxes imposed by such countries. It is the Company's policy to provide for any material liability to foreign capital gains and income taxes.

7. Soft commission/commission sharing

The Investment Manager did not enter into any soft commission/commission sharing arrangements with brokers during the financial year in relation to the Company. Neither the Investment Manager nor any of its connected persons have, or are entitled to, retain any cash rebates from any broker or dealer in consideration of directing transactions on behalf of

Notes to the Financial Statements (continued)

7. Soft commission/commission sharing (continued)

the sub-funds to that broker or dealer. In any such cases rebates received shall be held for the accounts of the relevant sub-funds.

8. Directors' interests and remuneration

None of the Directors were materially interested in any contracts of significance subsisting with the Company either during the year or at 31 December 2024.

The collective remuneration of the Board of Directors charged to the Company amounts to USD 144,970 for the year ended 31 December 2024.

9. Transactions with connected persons

a) Cross trades

Transactions with connected parties during the year were entered into in the ordinary course of business and on normal commercial terms between the sub-funds and the Management Company, Investment Manager, Investment Adviser, and any entity in which those parties or their connected persons (as defined in the Code on Unit Trusts and Mutual Funds issued by the Securities and Futures Commission of Hong Kong) have a material interest. To the best of the Management Company's knowledge, the sub-funds' portfolios do not have any other transactions with connected persons except for those disclosed below:

Sub-fund	Currency	Value of Transactions enacted through Citigroup brokers entities '000	Aggregate value of all transactions '000	Transactions enacted through Citigroup broker entities as a % of total transactions	Commissions paid to Citigroup broker entities '000	Average Citigroup broker rate of commission %

^A There were no commissions paid to Citigroup broker entities for the year ended 31 December 2024.

^B The unrounded commissions paid to Citigroup broker entities for the year ended 31 December 2024 was EUR 2.

Notes to the Financial Statements (continued)

9. Transactions with connected persons (continued)

b) Connected transactions

During the year the Investment Manager undertook certain sale and purchase transactions which were enacted through broker entities forming part of the same group of companies as the Depositary, Citibank, and the details of these are included in the table above. Such transactions were carried out on an arm's length basis at current market value and market rates, and consistent with and the best interests of the Company. To the best of the Investment Manager's knowledge as at the date of preparing this annual report, there are no transactions between the sub-funds' portfolios and the Management Company, the Investment Manager or any of their connected persons as principal.

c) Related party transactions

Transactions with connected persons outlined in the Expenses Note 4 have been entered into in the ordinary course of business and on normal commercial terms. At the reporting date, the Management Company, abrdn Investments Luxembourg S.A. was a subsidiary of Aberdeen Group plc (previously known as: abrdn plc).

As at 31 December 2024 other Funds/Trusts and mandates managed by Aberdeen Group plc (previously known as: abrdn plc) held investments in the Company valued at USD 5,308,404,776.

10. Collateral

The Company paid/received cash collateral from the counterparties to the OTC financial derivative instruments in order to reduce the counterparty exposure, as detailed below:

Sub-fund	Counterparty	Local currency	Local collateral received from the broker '000	Base currency	Base collateral received from the broker '000	Collateral expressed as a percentage of total net assets %

11. Securities lending

The Company has entered into a securities lending program for a number of equity and fixed income sub-funds. In return for making securities available for loan throughout the year, the sub-funds participating in the programs received fees which are reflected in the Financial Statements of each participating sub-fund under the "Securities lending income" caption. The Company has appointed Securities Finance Trust Company (the operating arm of eSec Lending) as agent for the equity and fixed income lending program. As remuneration for this agency role, Securities Finance Trust Company receives 10% of the fees from the securities lending program, abrdn Investments Limited (the Investment manager) receives 5% from the securities lending program and the Company receives 85% of the fees.

Collateralisation in the form of Government Bonds must be with a minimum issuer rating of AA (S&P rating) or Aa3 (Moody's rating). With respect to a government issuer that is rated by both Moody's and S&P, the lower of those two ratings shall apply.

Notes to the Financial Statements (continued)

11. Securities lending (continued)

A minimum over-collateralisation of 102% of the value of the underlying securities. The haircut for all eligible collateral will vary between 0 and 2% so that the minimum over-collateralisation of the value of the underlying securities will never fall below 100%.

The following countries may be accepted as collateral:

Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Japan, Luxembourg, Netherlands, New Zealand, Norway, Sweden, Switzerland, United Kingdom & United States.

Collateralisation in the form of equities must be from the listed equities from the following indices. Please refer to the prospectus for further details.

Index	Country
S&P 500	United States
FTSE 100	United Kingdom
CAC 40	France
DAX	Germany
S&P/TSX 60	Canada
AEX	Netherlands
BEL 20	Belgium
OMX Stockholm 30	Sweden
OMX Copenhagen 20	Denmark

c) Ukraine conflict

The military offensive from Russia against Ukraine since February 2022 continues to pose widespread sanctions on Russian assets. Geopolitical events can adversely affect assets of sub-funds and performance thereon. To ensure the fair treatment of investors, abrdn's Investor Protection Committee (IPC) undertakes regular reviews of market liquidity across each asset class and sub-fund, making appropriate adjustments where necessary.

abrdn's Valuation and Pricing Committee (VPC) also continue to review the valuation of assets and the recoverability of income from those assets, making appropriate adjustments where necessary. The VPC is made up of a wide range of specialists across abrdn with a wide range of experience in asset pricing.

As at 31 December 2024, the securities issued by Russian companies are valued at 'nil' in the portfolio statements of the respective sub-funds exposed to such securities. This nil value may not reflect the intrinsic value of those companies but rather reflect the fact that those securities are not tradable as of 31 December 2024.

d) Director changes

Xavier Meyer was appointed as a Director of the Board of Directors, effective 1 February 2024.

Stephen Bird resigned as a Director of the Board of Directors, effective 14 June 2024.

Emily Smart was appointed as a Director of the Board of Directors, effective 12 August 2024.

Notes to the Financial Statements (continued)

12. Significant events during the reporting year (continued)

e) Prospectus changes

New visa stamped prospectuses were issued in May, September and December 2024.

f) Service provider changes

Effective 1 October 2024 International Financial Data Services (Luxembourg) S.A took over the Registrar and Transfer Agent services from abrdn Investments Luxembourg S.A..

Effective 1 October 2024 FIRST INDEPENDENT FUND SERVICES LTD took over as Swiss Representative and NPB Neue Privat Bank AG took over as Swiss Paying Agent from BNP Paribas who previously provided both services.

g) Other significant events

On 1 May 2024 the expenses caps were removed in their entirety.

On 1 June 2024 the general administration charge rate was increased from 0.07% to 0.08%.

13. Subsequent events

Effective 14 March 2025 abrdn plc changed name to Aberdeen Group plc.

There are no other subsequent events to be reported after the year ended 31 December 2024.

14. SFDR disclosure

Information on the environmental/social characteristics for sub-funds disclosing under Article 8 of SFDR, or information on sustainable investments for sub-funds disclosing under Article 9 of SFDR, respectively, is made available in the annex to the annual report from pages 145 to 249, as part of Appendix 4 which is unaudited.

General Information

Further information on abrdn SICAV II can be obtained from:

abrdn Investments Luxembourg S.A.

35a, avenue John F. Kennedy
L-1855 Luxembourg
Grand Duchy of Luxembourg

You can find further information about the Company, all available funds within the Company and share classes at www.abrdn.com. The Prospectus, the PRIIPS KIDs, the Articles of Incorporation, the audited annual report and the unaudited semi-annual report of abrdn SICAV II may be obtained free of charge and in paper form from the Transfer Agent or the local paying agents, representatives and information agents. Please refer to the Prospectus for the contact address of the addresses of the local paying agents, representatives and information agents.

For investors located in EU/EEA countries, and where the Company is registered for distribution, and unless otherwise specified, facilities according to Article 92(1)(a) of the EU Directive 2009/65/EC (as amended by Directive 2019/1160) are available from the Transfer Agent.

The following facilities according to Article 92(1)(b) to (e) of the EU Directive 2009/65/EC (as amended by Directive 2019/1160) are available at www.eifs.lu/abrdn.

1. Information on how orders (subscription, repurchase and redemption) can be made and how repurchase/redemption proceeds are paid;
2. Information and access to procedures and arrangements relating to investors' rights and complaints handling;
3. The latest Prospectus, the Articles of Incorporation, the annual and semi-annual reports, net asset value as well as the key information documents.

Subscription and Redemption of Shares

Applications for subscription, redemption and conversion of Shares should be sent to the Transfer Agent.

Furthermore, any additional information which is available at the registered office of the Company will also be available at the Transfer Agent.

Share Price Publication

Subscription prices and redemption prices are available at www.abrdn.com and are also available at the offices of the Transfer Agent.

Taxation

Tax regulations and the practices of financial authorities are constantly subject to change. Because of the complexity of tax laws in different jurisdictions, it is recommended that investors contact a tax adviser regarding the effect on their individual tax situation.

Additional Information for investors in Germany

The below sub-funds are not distributed in the Federal Republic of Germany. Shares of these sub-funds may NOT be publicly offered to investors within the scope of the German Investment Code (KAGB).

- Euro Government All Stocks Fund
- Global Short Dated Corporate Bond Fund
- Emerging Market Local Currency Debt Fund

Communications to investors will be sent by mail in the following cases:

- a. suspension of the redemption of the shares,
- b. termination of the management of the sub-fund or its liquidation,
- c. any amendments to the sub-fund rules which are inconsistent with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,

General Information (continued)

Additional Information for investors in Germany (continued)

d. merger of the sub-funds with one or more other sub-funds, and

e. the change of the Company into a feeder fund or the modification of a master fund.

The following sub-funds qualify as equity sub-funds within the meaning of GITA as they continuously invest more than 50% of their gross assets in equity securities (as defined by GITA).

- European Smaller Companies Fund
- Global Impact Equity Fund
- Global Smaller Companies Fund

Additional Information for investors in Switzerland

1. Representative

Until 30 September 2024: The representative in Switzerland is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich, Switzerland.

Starting 1 October 2024: The representative in Switzerland is FIRST INDEPENDENT FUND SERVICES LTD, Feldeggstrasse 12, 8008 Zurich, Switzerland.

2. Paying agent

Until 30 September 2024: The paying agent in Switzerland is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich, Switzerland.

Starting 1 October 2024: The paying agent in Switzerland is NPB Neue Privat Bank AG, Limmatquai 1, 8001 Zurich, Switzerland.

3. Place where the relevant documents may be obtained

The Prospectus, the PRIIP KIDs, the Articles of Incorporation, the annual and semi-annual reports and a schedule of purchases and sales for the sub-funds can be obtained free of charge from the Swiss representative.

4. Publications

Publications in respect of abrdn SICAV II are published on the electronic platform of fundinfo AG Zurich (www.fundinfo.com). The subscription and redemption prices or the NAV with indication of "excluding commissions" are published on a daily basis on www.fundinfo.com.

5. Payment of retrocessions and rebates

In connection with distribution in Switzerland, abrdn Investments Luxembourg S.A. or its affiliates may pay retrocessions in order to cover the distribution and procurement activities of shares. These activities include but are not limited to the organisation of road shows, the attendance of events and fairs, the production of marketing material and the training of distribution collaborators. The recipients of the retrocessions must ensure transparent disclosure and inform investors, unsolicited and free of charge, about the amount of remuneration they may receive for distribution. On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the sub-funds of the investors concerned. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors. Rebates may also be paid directly to the investors in order to reduce the fees and cost attributed to the sub-fund, as long as they:

- are paid from fees which have been charged to the assets of the sub-fund and not in addition;
- are paid on the basis of objective criteria;
- are paid to all investors fulfilling the objective criteria in the same amount and at the same time.

Rebates can only be paid if the following preconditions are fulfilled:

- The minimum investment in a collective investment scheme or in a range of collective investment schemes;
- The amount of fees resulting from the investment;
- The expected duration of the investment;

General Information (continued)

Additional Information for investors in Switzerland (continued)

5. Payment of retrocessions and rebates (continued)

- The readiness of the investor to support the launch of the sub-fund.

At the request of the relevant investor receiving such rebate, abrdn Investments Luxembourg S.A. or its affiliates must disclose the amount free of charge.

6. Place of performance and jurisdiction

The place of performance and jurisdiction for the shares distributed in or from Switzerland is at the registered office of the representative.

Appendix 1: Risk Management (Unaudited)

The market risk measurement and monitoring of the sub-funds is carried out using either the Commitment approach or the Value at Risk (VaR) approach.

Sub-funds which do not make significant use of financial derivative instruments and/or limit their use of financial derivative instruments to efficient portfolio management or hedging strategies are monitored using the Commitment approach.

Sub-funds which utilise financial derivative instruments for efficient portfolio management purposes and/or for investment purposes in pursuing their investment objective (in addition to those used for hedging purposes) are monitored using either the relative or absolute VaR approach.

Risk Type

The Management Company uses the Commitment approach and the VaR approach for the abrdn SICAV II sub-funds as detailed below.

Commitment approach

The Commitment approach is based on the positions of financial derivative instruments, converted into their corresponding underlying equivalents as per ESMA Guidelines 10-788 – BOX 2.

Netting and hedging might be considered for financial derivatives and their underlying assets. The sum of these underlying equivalents must not exceed the NAV of the sub-fund.

The global risk on derivatives has been determined according to the commitment approach during the reporting year.

Global Exposure: Commitment Approach

Sub-fund

European Smaller Companies Fund

Global Impact Equity Fund

Global Real Estate Securities Sustainable Fund

Global Smaller Companies Fund

Value at Risk (VaR) approach

In accordance with CSSF Circular 11/512, the regulatory VaR limit associated with a sub-fund's total portfolio positions must not exceed two times (i.e. 200%) the VaR of its assigned Risk Benchmark for sub-funds under Relative VaR approach or 20% VaR (99% confidence level, 20-day holding period) for sub-funds monitored under the absolute VaR approach.

The VaR model used is a MonteCarlo Simulation model with historical observation period of risk factors of 3 years.

The tables below show the sub-funds under VaR approach and relative VaR approach and the related Risk Benchmark for each sub-fund.

VaR Table

The average leverage figures below have been compiled based on the daily figures from the period 2 January 2024 to 31 December 2024.

Global Exposure: Absolute VaR	Min Absolute VaR	Max Absolute VaR	Average Absolute VaR
Regulatory Limit: 20%	%	%	%
Global Income Bond Fund ¹	2.50	4.00	3.30
Global Risk Mitigation Fund	5.30	9.50	7.50
Macro Fixed Income Fund ¹	0.70	3.10	1.70
Multi-Asset Climate Opportunities Fund ¹	5.60	6.60	6.00

Global Exposure: Relative VaR	Min Relative VaR	Max Relative VaR	Average Relative VaR
Regulatory Limit: 200%	%	%	%
Emerging Market Local Currency Debt Fund	90.30	109.10	102.80
Euro Corporate Bond Fund	98.00	108.60	102.90
Euro Corporate Sustainable Bond Fund	100.00	108.80	104.00
Euro Government All Stocks Fund ¹	95.00	108.10	102.80
Global Corporate Bond Fund	94.90	106.30	102.90
Global High Yield Bond Fund	93.10	107.40	99.60
Global Inflation-Linked Government Bond Fund	92.10	105.50	100.40
Global Short Dated Corporate Bond Fund	98.00	111.00	104.30

Leverage

For sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company also determines the sum of the nominal values or equivalent values of all the relevant derivatives and estimates in this regard a degree of the expected average value (leverage).

The expected levels of leverage indicated below reflect the use of all derivative instruments within the portfolio of a given sub-fund. An expected level of leverage does not necessarily represent an increase of risk in the sub-fund as some of the financial derivative instruments used may even reduce the risk. Shareholders should note that the "Sum of Notionals" approach of the expected level of leverage does not make a distinction as to the intended use of a derivative e.g., being either hedging or investment purposes.

The "Sum of Notionals" calculation typically results in a higher leverage figure than for the commitment approach calculation predominantly due to the exclusion of any netting and/or hedging arrangements.

The average leverage figures below have been compiled based on the daily figures from the period 2 January 2024 to 31 December 2024.

Sub-fund	Global Exposure	Average Leverage Sum of Notional
		%
Emerging Market Local Currency Debt Fund	Relative VaR	35.00
Euro Corporate Bond Fund	Relative VaR	49.00
Euro Corporate Sustainable Bond Fund	Relative VaR	21.00
Euro Government All Stocks Fund ¹	Relative VaR	19.00
Global Corporate Bond Fund	Relative VaR	152.00
Global High Yield Bond Fund	Relative VaR	124.00
Global Income Bond Fund ¹	Absolute VaR	198.00
Global Inflation-Linked Government Bond Fund	Relative VaR	154.00
Global Risk Mitigation Fund	Absolute VaR	1,474.00
Global Short Dated Corporate Bond Fund	Relative VaR	155.00
Macro Fixed Income Fund ¹	Absolute VaR	339.00
Multi-Asset Climate Opportunities Fund ¹	Absolute VaR	154.00

¹ See note 12.

Appendix 2: Securities Financing Transactions (Unaudited)

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps in the framework of transparency of securities financing transactions and of reuse.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- repurchase/reverse repurchase agreement;
- securities or commodities lending and securities or commodities borrowing;
- buy-sell back transaction or sell-buy transaction;
- margin lending transaction.

As at 31 December 2024, the following sub-fund held total return swaps as a type of instrument under the scope of the SFTR:

- Global Risk Mitigation Fund.

As at December 31, 2024, the following sub-funds are engaged in securities lending under the scope of the SFTR:

- Euro Corporate Bond Fund;
- Euro Corporate Sustainable Bond Fund;
- Global Corporate Bond Fund;
- Global High Yield Bond Fund;
- Global Short Dated Corporate Bond Fund;
- Macro Fixed Income Fund.

The sub-funds did not enter into repos/reverse repos, buy/sell back transactions during the year ended 31 December 2024.

1. Total return swaps

Global Risk Mitigation Fund

The net unrealised depreciation of total return swaps held by Global Risk Mitigation Fund as a proportion of the sub-fund's NAV as at 31 December 2024 was 0.57%.

All the counterparties to the total return swaps have been disclosed in the table below:

Counterparty	Counterparty's country of incorporation	Local Currency	Total Return Swaps	Total Return Swaps
			Local Currency '000	USD '000
BNP Paribas	France	USD	16,825	16,825

The following tables provide an analysis of the maturity tenor of open OTC derivative transactions (including total return swaps) and associated collateral (provided)/received by the sub-fund, as at the statement of net assets date:

Maturity tenor	Local Currency	Total Return Swaps (net exposure)	Total Return Swaps (net exposure)
		Local Currency '000	USD '000
1 day	USD	-	-
2 to 7 days	USD	-	-
Open (> 7 days)	USD	16,825	16,825
Total		16,825	16,825

The above maturity tenor analysis has been based on the contractual maturity date of the relevant OTC derivative transaction (total return swaps).

Maturity tenor	Non-cash collateral (net exposure)	Cash collateral (net exposure)
	USD '000	USD '000
1 day	-	-
2 to 7 days	-	-
Open (> 7 days)	-	100
Total	-	100

Appendix 2: Securities Financing Transactions (Unaudited) (continued)

1. Total return swaps (continued)

Global Risk Mitigation Fund (continued)

The above maturity tenor analysis of cash and non-cash collateral is based the contractual maturity date of the security received/(provided) by the sub-fund as collateral.

There were no issuers of non-cash collateral as at 31 December 2024 for this sub-fund.

The table below discloses the cash collateral (provided)/received by the sub-fund in relation to OTC derivative contracts (including total return swaps) held as at statement of net assets date.

Counterparty	Local currency	Local cash collateral (provided)/received by the sub-fund '000	Base currency	Base cash collateral (provided)/received by the sub-fund '000	Collateral expressed as a percentage of total net assets %
BNP Paribas	USD	100	USD	100	0.59

As at the statement of net assets date, all of the cash collateral received by the sub-fund in respect of OTC derivative transactions (including total return swaps) is either held on deposit with Citibank or re-invested in the abrdn Liquidity Fund (Lux), a money market fund.

The following table provides a currency analysis of the cash and non-cash collateral (provided)/received by the sub-fund, in respect of OTC derivative transactions (including total return swaps) as at the statement of net assets date.

Currency	Cash collateral received by the sub-fund USD '000	Cash collateral provided by the sub-fund USD '000	Non-cash collateral received by the sub-fund USD '000	Non-cash collateral provided by the sub-fund USD '000
USD	100	-	-	-
Total	100	-	-	-

There was no income earned/(paid) by the sub-fund from the reinvestment of cash collateral in money market funds for the year ended 31 December 2024.

There was no interest receivable/(payable) on cash collateral by the sub-fund as at 31 December 2024.

Investment grade is the type and quality of non-cash collateral (provided)/received by the sub-funds in respect of OTC derivative transactions (including total return swaps), as at the statement of net assets date.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency, Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no more than five equities combined represent more than 60% of the total index.

2. Securities lending

In accordance with Article 13 of the Regulation, the Company's involvement in and exposures related to securities lending for the accounting year 31 December 2024 are detailed below:

Absolute value of assets engaged in securities lending activity

Sub-fund	Market value of securities on loan USD '000	% of lendable assets	% of assets under management
Euro Corporate Bond Fund	15,871	0.82	0.80
Euro Corporate Sustainable Bond Fund	53,915	2.83	2.78
Global Corporate Bond Fund	17,977	0.81	0.81
Global High Yield Bond Fund	30,861	3.56	3.54
Global Short Dated Corporate Bond Fund	11,381	1.43	1.42
Macro Fixed Income Fund	3,122	1.28	1.06

Appendix 2: Securities Financing Transactions (Unaudited) (continued)

2. Securities lending (continued)

Non-cash collateral have been received in relation to the securities lending activity. The following table shows the non-cash collateral received broken down by issuers.

Top ten collateral issuers

Lending transactions operate on a rolling one day contract and can be recalled on demand.

Data on reuse of collateral

Collateral is held with a segregated account by the sub-funds' Custodian and will not be sold, re-invested or pledged.

Safekeeping of collateral granted

At the year-end there was no collateral posted by the sub-funds.

Received

As at the year-end date, collateral was received for securities lending transactions into a segregated account at the sub-funds' Custodian in the form of Government bonds valued at USD 142 million.

Return and cost per type of SFT

The revenues arising from securities lending is detailed in Note 11.

Appendix 3: Remuneration Policy (Unaudited)

Undertakings for Collective Investment Transferable Securities V Directive (UCITS V)

Remuneration Disclosure UCITS V Annual Report and Accounts

Remuneration Policy

The Aberdeen Group plc Remuneration Policy (the "Policy") applies with effect from 1 January 2024. The purpose of the Policy is to document clearly the remuneration policies, practices and procedures of Aberdeen as approved by the Aberdeen Group plc Remuneration Committee (the "Committee"). The Policy is available on request.

The Policy applies to employees of the Aberdeen group of companies ("Group" or "Aberdeen"), including UCITS V Management Companies ("ManCos") and the UCITS V funds that the ManCo manages.

Remuneration Principles

Aberdeen applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients/customers.
- Our remuneration structure is flexible to accommodate the different challenges and priorities across all businesses and functions as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy.
- Total remuneration delivered is affordable for the Group.

Remuneration Framework

Employee remuneration is composed of fixed and variable elements of reward as follows:

- a) Fixed remuneration (salary and cash allowances, where appropriate) and Benefits (including pension).
- b) Variable remuneration (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced; and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow Aberdeen to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and/or Group performance does not support such an award.

Base salary	Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.
Benefits (including retirement benefit where appropriate)	Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements. Retirement benefits are managed in line with the relevant legislative requirements and governance structures. In certain, very limited circumstances, a cash allowance may be offered in lieu of a retirement arrangement.

Appendix 3: Remuneration Policy (Unaudited) (continued)

Annual Awards	Performance	Bonus	Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year. Annual bonuses are based upon Group, Business, Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or Material Risk Takers ("MRTs"), is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors, incorporating consideration of all risk categories, including sustainability risks* (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations. abrdrn Investments Luxembourg S.A. has specific obligations to act in the best interests of the UCITS V funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Risk and Capital Committee and the Audit Committee formally advise the Committee as part of this process. The overall bonus pool is allocated to businesses and functions based on absolute and relative performance of each business and function and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision/team is determined on a discretionary basis by the business/function and regional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities. Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and non-financial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, to reflect input from the Risk and Capital Committee and the Audit Committee. Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements).
---------------	-------------	-------	---

*According to SFDR, sustainability risk means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

Appendix 3: Remuneration Policy (Unaudited) (continued)

Other elements of remuneration – selected employees	The following remuneration arrangements may be awarded in certain very limited circumstances: Carried Interest Plans – These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in private market funds established by the Group. Buy-Out Awards/Guaranteed Bonuses – These are intended to facilitate/support the recruitment of new employees. Buy-outs are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment. Retention and Special Performance Awards / LTIP – Supports retention and/or the delivery of specific performance outcomes and/or to incentivise senior employees to support the long-term, sustained performance of Aberdeen. The Company may determine that it is appropriate to grant such awards in limited circumstances. Awards are structured to deliver specific retention and/or performance outcomes. Retention and/or special performance awards comply with all relevant regulatory requirements. Severance Pay – Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee's remuneration is governed, as appropriate, by relevant plan or scheme rules.
---	---

Control Functions

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority and have their remuneration directly overseen by the Committee.

Conflicts of Interest

The Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions, then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group, this never relates to their own remuneration.

Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

UCITS V Identified Staff/MRTs

The 'Identified Staff' or MRTs of abrdn Investments Luxembourg S.A. are those employees who could have a material impact on the risk profile of abrdn Investments Luxembourg S.A. or the UCITS V funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

Quantitative Remuneration Disclosure

The table below provides an overview of the following:

- Aggregate total remuneration paid by abrdn Investments Luxembourg S.A. to its entire staff; and
- Aggregate total remuneration paid by abrdn Investments Luxembourg S.A. to its UCITS V 'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from 1 January 2024 to 31 December 2024 inclusive.

Appendix 3: Remuneration Policy (Unaudited) (continued)

	Headcount	Total Remuneration GBP'000
abrdn Investments Luxembourg S.A. staff¹	1,187	162,472
of which		
Fixed remuneration		125,039
Variable remuneration		37,433
abrdn Investments Luxembourg S.A. 'Identified Staff'²	90	43,847
of which		
Senior Management ³	38	28,375
Other 'Identified Staff'	52	15,472

¹ As there are a number of individuals indirectly and directly employed by abrdn Investments Luxembourg S.A. this figure represents an apportioned amount of Aberdeen's total remuneration fixed and variable pay, apportioned to the ManCo on an AUM basis. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis.

² The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the ManCo who are fully or partly involved in the activities of the ManCo.

³ Senior Management are defined in this table as ManCo Directors and members of the Aberdeen Group plc Board, together with its Executive and Group Operating Committees, Investment Executive members and the Chief Product and Marketing Officer.

Appendix 4: Sustainability Related Disclosures (Unaudited)

The EU Sustainable Finance Disclosure Regulation (SFDR) sets out in Articles 8 and 9 the sustainability-related reporting requirements, respectively for sub-funds that promote environmental or social characteristics and sub-funds that have sustainable investments as their objective. In addition, all financial products are required to disclose (see Company prospectus) their approach to integrating sustainability risks into the investment decision-making in line with Article 6 of the SFDR. The following table outlines the SFDR Article under which the sub-funds make sustainability-related reporting.

Sub-fund	SFDR Article (as at 31 December 2024)
Global Corporate Bond Fund	Article 6
Global High Yield Bond Fund	Article 6
Global Inflation-Linked Government Bond Fund	Article 6
Global Risk Mitigation Fund	Article 6
Macro Fixed Income Fund	Article 6
Emerging Market Local Currency Debt Fund	Article 8
Euro Corporate Bond Fund	Article 8
Euro Corporate Sustainable Bond Fund	Article 8
European Smaller Companies Fund	Article 8
Global Income Bond Fund	Article 8
Global Real Estate Securities Sustainable Fund	Article 8
Global Short Dated Corporate Bond Fund	Article 8
Global Smaller Companies Fund	Article 8
Global Impact Equity Fund	Article 9

The above Article 6 sub-funds do not promote environmental or social characteristics and have no sustainable investment objectives. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities. These sub-funds also do not consider principle adverse impacts.

The above Article 8 sub-funds promote environmental or social objectives. The "do no significant harm" principle applies only to those investments underlying the financial products that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

The above Article 9 sub-funds have sustainable investments as their objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Emerging Market Local Currency Debt Fund**

Legal entity identifier **549300M4GPJKY6QZ5W83**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ No

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 10.50% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the Fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – promoting sound energy management, renewable energy usage, and reducing greenhouse gas emissions, promoting good water, waste, and raw materials management, and addressing biodiversity/ecological impacts.

Social – effectively tackling corruption and inequality, promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, encouraging healthy relationships with communities, promoting social cohesion and integration, and encouraging investment in human capital.

Benchmark

This Fund used the JP Morgan GBI-EM Global Diversified Index as a financial benchmark. The benchmark was also used as a reference point for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining ESG characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. In line with the fund exclusions, no ESG high risk issuers are held.

ESG Screening Criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

For sovereign issuers, our proprietary ESGP Score, developed within the Emerging Markets Debt (EMD) team, is used to assess material sustainability risks and opportunities of all our investments, which may include among others: environmental risks, social inequalities, political risks and institutional quality and efficiency. The ESGP universe consists of Emerging Market countries with investable Fixed Income securities and an ESGP score is assigned to each country.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESGP Score and ESG House Score. This is implemented by excluding the bottom 5% of corporate issuers with an ESG House Score that are in the benchmark, as well as the bottom 15% of countries within the ESGP universe.

Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● ***...and compared to previous periods?***

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions - abrdn have identified a number of sectors which automatically do not qualify for inclusion

as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test - The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag - Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated

Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

The fund committed to a minimum of 70% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 5% in Sustainable Investments. The Fund invested a maximum of 30% of assets in the "Other" category, which may have included developed market government securities, cash, money-market instruments and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Unclassified	Unclassified	3.23
Utilities	Utilities	0.19
Energy	Integrated Oils	0.31
Government	Supranationals	1.66
Government	Sovereigns	93.81
Government	Government Development Banks	0.80

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 40% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 65%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 87% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- promoting good governance including social factors.

How did this financial product perform compared to the reference benchmark?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Euro Corporate Bond Fund**

Legal entity identifier **0C8VPGENNA8PSK0IU246**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ No

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.41% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the Fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – promoting sound energy management and reducing greenhouse gas emissions, promoting good water, waste, and raw materials management, and addressing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There is 1 high risk issuer held in the fund, the issuer is not high risk due to governance issues. Therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment. We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG Screening Criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 77%

Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● ***...and compared to previous periods?***

ESG Assessment Criteria: At the end of the previous year, 1 ESG high risk issuer was held in the fund. ESG Screening Criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period. During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark. Carbon Intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 77%. Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions - abrdn have identified a number of sectors which automatically do not qualify for inclusion

as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

- ii. DNSH Binary Test - The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

- iii. DNSH Materiality Flag - Using a number of additional screens and flags, abrdn consider the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
ELM FOR FIRMENICH INTERN 3.75%	Materials	0.91	Switzerland

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The fund committed to a minimum of 80% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 10% in Sustainable Investments. The Fund invested a maximum of 20% of assets in the "Other" category, which included cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Period	2024	2023
E/S Characteristics	99.22%	99.43%
Sustainable investment	42.41%	36.64%
Other environmental	30.37%	22.78%
Social	12.04%	13.86%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 30% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 12%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 57% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than benchmark,
- promoting good governance including social factors.

These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs. The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Euro Corporate Sustainable Bond Fund**

Legal entity identifier **5493004ABG8CUCJM5548**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ No

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.36% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the Fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – promoting sound energy management and reducing greenhouse gas emissions, promoting good water, waste, and raw materials management, and addressing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. In line with the fund exclusions, no ESG high risk issuers are held.

ESG Screening Criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 10% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity: We confirm that during the reporting period the portfolio carbon intensity was in excess of 10% lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 59%.

ESG Rating: Using our proprietary house score, we confirm that during the reporting period the Fund achieved an ESG rating higher than the benchmark. As at year-end, the fund's position weighted ESG score was 65, compared to the benchmark's score of 61. We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

- **...and compared to previous periods?**

ESG Assessment Criteria: At the end of the previous year, no ESG high risk issuers were held in the fund. ESG Screening Criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period. During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 10% of issuers with an ESG House Score that are in the benchmark. Carbon Intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 59%. ESG Rating: Using our proprietary house score, during the previous reporting period the Fund achieved an ESG rating higher than the benchmark. Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- a quantitative methodology based on a combination of publicly available data sources; and
- using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- Sector Exclusions - abrdn have identified a number of sectors which automatically do not qualify for inclusion

as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

- DNSH Binary Test - The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag - Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
IBERDROLA INTL BV 1.874%	Utilities	1.16	Spain

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The fund committed to a minimum of 90% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 40% in Sustainable Investments. The Fund invested a maximum of 10% of assets in the "Other" category, which included government securities, cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Period	2024	2023
E/S Characteristics	99.75%	99.77%
Sustainable investment	51.36%	42.91%
Other environmental	39.63%	28.03%
Social	11.73%	14.88%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 40% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 12%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 48% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than benchmark,
- promoting good governance including social factors.

These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs. The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - European Smaller Companies Fund**

Legal entity identifier **IKNRVTZFJMXVU04INT73**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ No

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.46% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the fund:

Environment – reducing energy consumption and greenhouse gas emissions, increasing renewable energy usage/generation, reducing biodiversity/ecological impacts.

Social – labour practices and relations, employee health and safety, and supply chain management.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 31.12.2024

Q1 7%

Q2 50%

Q3 43%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 38.8 tCO/\$m

Benchmark: 91.0 tCO/\$m

ESG Fund Rating

The fund achieved a better than or equal ESG rating based on MSCI data when compared with the benchmark for a significant proportion of the reporting period. For the first three quarters of the year, the fund was in line or better than the benchmark. During the fourth quarter, the benchmark rating increased, and the fund's rating moved back down to the rating earlier in the year as a result of declining share price in one of the highest rated fund holdings. Since the end of the period, the fund has taken action to increase the MSCI rating to meeting the benchmark level increased the rating to AA, in line with the benchmark.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

Largest Investments	Sector	% Assets	Country
DIPLOMA PLC	Industrials	5.11	United Kingdom
MORGAN SINDALL GROUP PLC	Industrials	4.98	United Kingdom
CTS EVENTIM AG & CO KGAA	Consumer Discretionary	4.89	Germany
INTERMEDIATE CAPITAL GROUP	Financials	4.67	United Kingdom
ADDTECH AB-B SHARES	Industrials	4.29	Sweden
AZIMUT HOLDING SPA	Financials	4.24	Italy
GAZTRANSPORT ET TECHNIGA SA	Energy	4.03	France
HILL & SMITH PLC	Industrials	3.75	United Kingdom
GAMES WORKSHOP GROUP PLC	Consumer Discretionary	3.69	United Kingdom
GRAFTON GROUP PLC-UTS -CDI	Consumer Discretionary	3.50	United Kingdom
ROTORK PLC	Industrials	3.29	United Kingdom
BORREGAARD ASA	Materials	3.16	Norway
RATIONAL AG	Industrials	3.16	Germany
NEMETSCHEK SE	Technology	3.10	Germany
BRUNELLO CUCINELLI SPA	Consumer Discretionary	2.86	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The fund committed to a minimum of 70% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 10% in Sustainable Investments. The Fund invested a maximum of 30% of assets in the "Other" category, which included cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Period	2024	2023
E/S Characteristics	97.12%	96.10%
Sustainable investment	48.46%	40.14%
Other environmental	27.21%	22.22%
Social	21.25%	17.92%

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Utilities	Utilities	0.86
Energy	Oil & Gas	4.03
Health Care	Health Care	3.71
Consumer Discretionary	Consumer Discretionary Products	9.84
Consumer Discretionary	Consumer Discretionary Services	4.89
Consumer Discretionary	Retail & Whsle - Discretionary	6.36
Materials	Materials	6.72
Financials	Banking	2.23
Financials	Insurance	1.41
Financials	Financial Services	10.37
Consumer Staples	Retail & Wholesale - Staples	0.95
Consumer Staples	Consumer Staple Products	3.50
Industrials	Industrial Products	22.42
Industrials	Industrial Services	11.89
Technology	Software & Tech Services	6.19
Communications	Media	1.60

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 21%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 49% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Governance, Labour and Climate Change. Examples include:

Rational AG (Climate Change, Corporate Governance-Diversity): We had an ESG update through email with Rational IR. The company is working to setup their ESG strategy and that includes carbon reduction targets, while aiming to enhance general data transparency and disclosure. The lack of female representation unfortunately continues in the board. The challenges hiring a female board member they are facing are understood but we would hope to see the board having a better diversity. Milestones set continue. Will engage post the disclosure of the ESG strategy to understand the progress

Interparfums SA: We engaged with Interparfums on long standing milestones (Corporate Governance- Supply Chain). The company has progressed significantly and have improved the ESG profile. We discussed the matter of the Jasmine flower collection controversy in Egypt which did not impact Interparfums as well as their initiatives to increase visibility of their supply chain. We closed the pending milestone on better communication of initiatives whilst adding a new milestone on working with Interparfums Inc to improve their ESG reporting. Overall, very positive update and we are very pleased with the company's efforts.

Interpump Group Spa: We engaged with Interpump on long standing milestones (Corporate Governance- Supply Chain). There is significant progress with the milestones set. Outstanding milestones are remuneration and overall ESG disclosure improvements that could help boost a bit the third party ESG rating providers. In addition, we would like to see the whole of the supply chain being covered by mapping and auditing. This is a topic that requires time. CEO/Chairman role has been separated, this is a great development and well received action by the markets.

Intermediate Capital Group (Labour management): Priority engagement with Intermediate Capital to better understand the quality of human capital management strategy given the key importance to the evolution of the business, the company's activities on ESG matters and the respective visibility impactful ESG risks.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **abrdn SICAV II - Global Impact Equity Fund**

Legal entity identifier **213800A5KTINR38TJX25**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ ☒ **X** Yes

☒ It made **sustainable investments with an environmental objective**: 56.79%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It made **sustainable investments with a social objective**: 41.32%

☐ ☐ ☐ No

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective is to invest in companies listed globally that intentionally contribute to positive measureable environmental and/or social outcomes through their products. We use the United Nations' (UN) Sustainable Development Agenda and the associated Sustainable Development Goals (SDGs) to help us define environmental and social issues and determine a company's positive contribution. This is seen in our Impact Pillar Framework which maps the SDGs to eight investable themes: Circular Economy, Sustainable Energy, Food & Agriculture, Water & Sanitation, Health & Social Care, Financial Inclusion, Sustainable Real Estate & Infrastructure, Education & Employment. We also invest up to 10% of the Fund in 'Impact Leaders' which are companies that enable products in each of

our pillars as integral parts of pillar supply chains.

We use a 'theory of change' to identify potential investments, examining specific local, regional and/or global issues and how a company's inputs and activities deliver specific outputs and contribute to outcomes and ultimately impact. Our minimum criterion for investment is a company's input, or its 'intentionality'. We want to see a board level strategy as well as meaningful investment (a minimum of 30% of total budget) directed towards developing products that create positive measureable impacts.

All companies in the portfolio invested a minimum of 30% in the development of products and services that sit within one of our eight impact pillars. In reality, most companies invested materially more than 50%

of their budgets into products designed to deliver a positive impact. At the end of 2024, the Fund had exposure to all eight of the impact pillars.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

As at year-end, the fund's pillar exposure was:

Financial Inclusion	3%
Sustainable Real Estate & Infrastructure	25%
Water & Sanitation	7%
Sustainable Energy	21%
Education & Employment	8%
Circular Economy	7%
Health & Social Care	19%
Food and Agriculture	1%
Impact Leaders	8%

The Fund also excluded a minimum of 20% of the Fund's investment universe.

We also confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

● **...and compared to previous periods?**

End 2023 pillar exposures:• 19% Financial Inclusion• 5% Circular Economy• 17% Sustainable Energy• 8% Water & Sanitation• 8% Education & Employment• 14% Sustainable Real Estate & Infrastructure• 23% Health & Social Care• 6% Impact Leaders

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption

but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in

breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.

- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

Largest Investments	Sector	% Assets	Country
RELX PLC	Industrials	4.44	United Kingdom
UNITEDHEALTH GROUP INC	Health Care	4.23	United States of America

HUBBELL INC	Industrials	2.82	United States of America
EQUINIX INC	Real Estate	2.65	United States of America
ADVANCED DRAINAGE SYSTEMS IN	Materials	2.63	United States of America
INSULET CORP	Health Care	2.62	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to a minimum of 75% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives. The Fund invested a maximum of 25% of assets in the “Non-Sustainable” category, which is mainly made up of cash, money market instruments and derivatives.

Period	2024	2023
Sustainable investment	98.12%	95.91%
Other environmental	56.79%	45.10%
Social	41.32%	50.81%

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Utilities	Utilities	7.30
Energy	Renewable Energy	1.45
Health Care	Health Care	19.92
Consumer Discretionary	Consumer Discretionary Products	3.73
Consumer Discretionary	Consumer Discretionary Services	1.37
Consumer Discretionary	Retail & Whsle - Discretionary	1.68
Materials	Materials	8.81
Financials	Banking	3.43
Financials	Insurance	1.30
Financials	Financial Services	0.26
Consumer Staples	Retail & Wholesale - Staples	1.54
Industrials	Industrial Products	16.36
Industrials	Industrial Services	9.75
Technology	Software & Tech Services	6.17
Technology	Tech Hardware & Semiconductors	9.63
Real Estate	Real Estate	6.00

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 57% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 41%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2% of assets in the "not sustainable" category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

We aim to review the companies in the fund at least annually. Companies will be removed from the investable universe if:

- The company begins to pursue a strategy that does not align to one of our impact pillars.
- The company does not provide sufficient evidence of impact maturity progression over what we would

consider an appropriate timeline.

- Red flags, controversies and/or incidents emerge that highlight a persistent, structural ESG problem within the company's operations, strategy or culture, to which the company does not appropriately respond.

abrdn's Impact Management Group is the governing body that reviews new investment opportunities. This

Group peer reviews all new candidates for the impact fund and its investable universe. The Group meets regularly

and includes the fund's portfolio managers, analysts from across our global and regional equity teams, and senior members of the Investment Sustainability Group. In order for a company to be included in the investable universe, consensus must be reached by the Group.

Company self-disclosure is a crucial part of our approach to impact investing. We believe that if a company intends to deliver a product to address a specific environmental or social need, the impact must be reported. Therefore we heavily rely on engagement with companies and our conversations with the supervisory board, executive management teams, and divisional heads. Engagement examples from the past year have included:

Kingspan (social): The insulation business that was implicated in the Grenfell tower disaster. After the release of the second phase inquiry report, which gave independent credence to our view that Kingspan had limited liability in this tragic situation. Despite this there were some allegations regarding the misrepresentation of the testing some of their products underwent. We engaged with Professor Bisby, a key author on the report and professor at Edinburgh University to better understand this. Whilst mistakes were made at Kingspan, the regulatory framework in the UK was also not adequate. Kingspan have taken the necessary procedures to discipline the employees involved and have no longer sell the product in question.

Autodesk (governance): We met with the Chair of Autodesk after allegation regarding management manipulation of finances to hit short term targets resulted in filings being delayed. We are confident that the internal investigation was extremely thorough and found no wrongdoing. We have encouraged them to improve their remuneration policy, transparency and communication with the market, and for the outgoing CFO's position to be more formally reviewed for the business going forward.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Global Income Bond Fund**

Legal entity identifier **549300O80EVHWW2VU007**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ No

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.49% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the Fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – promoting sound energy management and reducing greenhouse gas emissions, promoting good water, waste, and raw materials management, and addressing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund used the Bloomberg Global Aggregate Corporate BBB Index as a financial benchmark. However, the benchmark was not used as a reference point for portfolio construction, did not incorporate any sustainable criteria, and was not selected for the purpose of attaining ESG characteristics.

Whilst the Fund was unconstrained and did not refer to a benchmark index for portfolio construction, the following investment universe was used as an ESG comparator for the Fund's binding commitments:

50% Bloomberg Global High Yield Corporate Index

30% Bloomberg Global Aggregate Corporates Total Return Index

20% JP Morgan CEMBI Broad Diversified Index

This comparator did not incorporate any sustainable criteria and was not selected for the purpose of attaining ESG characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There is 1 high risk issuer held in the fund, the issuer is not high risk due to governance issues. Therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment. We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG Screening Criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 87%.

Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

ESG Assessment Criteria: At the end of the previous year, 1 ESG high risk issuer was held in the fund. ESG Screening Criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period. During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark. Carbon Intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 87%. Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions - abrdn have identified a number of sectors which automatically do not qualify for inclusion

as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

ii. DNSH Binary Test - The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag - Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are

captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring is in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.

- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
US TREASURY N/B 2.375% 04/30/2026	Government	1.76	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to a minimum of 70% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 10% in Sustainable Investments. The Fund invested a maximum of 30% of assets in the "Other" category, which may have included government securities, cash, money market instruments and derivatives.

Period	2024	2023
E/S Characteristics	94.26%	88.80%
Sustainable investment	34.49%	27.54%
Other environmental	22.67%	15.85%
Social	11.82%	11.69%

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Unclassified	Unclassified	9.66
Utilities	Utilities	5.11

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 12%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 60% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than benchmark,
- promoting good governance including social factors.

These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs. The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Global Real Estate Securities Sustainable Fund**

Legal entity identifier **JCSNRTX2P3VQCSCY9U38**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ **X** No

X It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.18% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

X with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – reducing energy consumption and greenhouse gas emissions, increasing renewable energy usage/generation, reducing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG screening criteria and ESG Performance: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of issuers with an ESG House Score that are in the benchmark.

Good governance and business quality: We confirm the Fund only owned companies with an ESG Q score of 1-3. As at year-end, 23.86% of the fund had an ESG Q score of 1, 38% had an ESG Q score of 2 and 30.34% had an ESG Q score of 3. The Q-score for 7.28% of the Fund is currently under review.

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk.

● ***...and compared to previous periods?***

ESG screening criteria & ESG performance: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period. During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of issuers with an ESG House Score by region that are in the benchmark. Good Governance and Business Quality: At the end of the previous year, 17.6% of the fund had an ESG Q score of 1, 38.3% had an ESG Q score of 2 and 41.2% had an ESG Q score of 3.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions - abrdn have identified a number of sectors which automatically do not qualify for inclusion

as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test - The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag - Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation. Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicator: GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon

benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to a minimum of 90% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 40% in Sustainable Investments. The Fund invested a maximum of 10% of assets in the "Other" category, which included cash, money market instruments and derivatives.

Period	2024	2023
E/S Characteristics	100.00%	90.00%
Sustainable investment	49.18%	43.29%
Other environmental	35.48%	29.62%
Social	13.70%	13.67%

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	0.71
Real Estate	Real Estate	97.02

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective. Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 14%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 512% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of regular meetings with investment companies, we discuss ways the companies can improve the environmental characteristics of their portfolios, including in relation to energy/carbon efficiency, water efficiency and waste management.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Global Short Dated Corporate Bond Fund**

Legal entity identifier **213800K8ASDBMGKRJ250**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ ☐ No

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.98% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the Fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – promoting sound energy management and reducing greenhouse gas emissions, promoting good water, waste, and raw materials management, and addressing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There were four high risk issuer held in the fund, the issuers were not high risk due to governance issues. Therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment. We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG Screening Criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 61%.

Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● ***...and compared to previous periods?***

ESG Assessment Criteria: At the end of the previous year, 4 ESG high risk issuers were held in the fund. ESG Screening Criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period. During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark. Carbon Intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 61%. Good Governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions - abrdn have identified a number of sectors which automatically do not qualify for inclusion

as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

- ii. DNSH Binary Test - The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

- iii. DNSH Materiality Flag - Using a number of additional screens and flags, abrdn consider the

additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The fund committed to a minimum of 70% of the Fund's assets aligning with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 10% in Sustainable Investments. The Fund invested a maximum of 30% of assets in the "Other" category, which included cash, money market instruments and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Period	2024	2023
E/S Characteristics	96.45%	96.88%
Sustainable investment	33.98%	29.70%
Other environmental	16.79%	14.18%
Social	17.19%	15.52%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 17% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 17%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 62% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than benchmark,
- promoting good governance including social factors.

These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs. The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Global Smaller Companies Fund**

Legal entity identifier **2138009F7X5MEWACXF49**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?	
☒ ☐ Yes ☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: %	☒ ☐ No ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.09% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

Avoided severe, lasting, or irremediable harm; and

Appropriately addressed adverse impacts on the environment and society; and

Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, it did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using its proprietary research framework, it aimed to promote the below characteristics within

the fund, although a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – reducing energy consumption and greenhouse gas emissions, increasing renewable energy usage/generation, reducing biodiversity/ecological impacts.

Social – labour practices and relations, employee health and safety, and supply chain management.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

ESG Assessment Criteria: Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 31.12.2024

Q1 6%

Q2 59%

Q3 35%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 29.7 tCO/\$m

Benchmark: 192.8 tCO/\$m

ESG Fund Rating We confirm that during the reporting period the Fund achieved a better than or equal ESG rating based on MSCI data when compared with the benchmark:

Fund: A

ESG Q Scores: Q1 12% Q2 62% Q3 26% ESG Screening criteria were also met in the prior period WACI Scope 1&2: Fund: 33.9 Benchmark: 198.9 ESG Fund Rating: Fund: A Benchmark: A

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- a quantitative methodology based on a combination of publicly available data sources; and
- using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities

in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

• UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

• Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

• Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis

- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 23%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 54% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Governance, Supply Chain Management and Climate Change. Examples include:

Interpump Group Spa (Corporate Governance, Supply Chain): There is significant progress with the milestones set. Outstanding milestones are remuneration and overall ESG disclosure improvements that could help boost a bit the third party ESG rating providers. In addition, we would like to see the whole of the supply chain being covered by mapping and auditing. This is a topic that requires time. CEO/Chairman role has been separated, this is a great development and well received action by the markets.

Steadfast Group Ltd: (Corporate Transparency)- Useful meeting with SDF addressing the allegations of ABC of misleading conduct. The company has taken actions to improve transparency in their contracts with the agents, which is to an extent reassuring. Given the continuous competition between their brokers it would be good to understand the culture of SDF in more detail going forward and monitor the progress of SDF. We will continue engaging with the company and update the milestone related to the Strata issue.

Intermediate Capital Group (Labour management): Priority engagement with Intermediate Capital to better understand the quality of human capital management strategy given the key importance to the evolution of the business, the company’s activities on ESG matters and the respective visibility impactful ESG risks

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV II - Multi-Asset Climate Opportunities Fund**

Legal entity identifier **213800FB19YE179R9797**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ Yes

☐ No

☐ It made **sustainable investments with an environmental objective:** 0.00%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** 0.00%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund has closed to all investors and held no investments at the year-end reporting date. We provide data to the last reported month-end point which was 31st August 2024.

We confirm that upto the closure of this Fund on 12th September 2024, the Fund fulfilled its sustainable investment objective to make a minimum of sustainable investments with an environmental objective of 75%, in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy, in the period under review. The primary indicator used for this purpose is corporate revenue alignment in activities identified by the EU Taxonomy as Sustainable Activities.

The investment objective of the Fund is to generate growth by investing in a diversified portfolio of equities and corporate bonds issued by companies whose core business enables the transition to a sustainable, low carbon economy. To achieve that objective, a key determinant of inclusion will be those activities

identified by the EU Taxonomy as Sustainable Activities. The Fund's Sustainable Investment figure as at 31st August 2024 was 91% of which the environmental objective was 82%, a very high alignment with the six objectives identified by the EU Taxonomy and above our minimum objective of 75%. This data is based on an assessment of the revenue exposure of these companies, alongside the use of proceeds for labelled bonds, to activities aligned with environmental objectives. Although these activities are mostly aligned with the Taxonomy's environmental objectives, we currently do not have the necessary DNSH (Do No Significant Harm) and Minimum Social Safeguards information to classify them as aligned with the EU Taxonomy, so, as a result, we classify them as environmental, but not aligned with the Taxonomy.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The fund has closed to all investors and holds no investments at the year end reporting date. Prior to closure as at 31st August, the fund achieved a high alignment with the environmental revenue indicators of 82%, above the Fund's target of 75%. Given our focus on labelled bonds, our credit allocation has approaching 100% Sustainable Investment, with infrastructure around 90% and equity above 75%.

The Fund aims to contribute to climate change by investing in renewable energy, energy efficiency, resource efficiency, low carbon transport, and adaptation companies and issuances. Companies exposed to these areas enable their customers to have low emissions but do not always have low emissions themselves (particularly those with manufacturing operations). As a result, the Fund does not aim to have extremely low carbon intensity, merely to be lower than typical equity benchmarks; we achieve this through optimisation processes and screening. The Fund succeeded in its objective.

The Fund's combined equity and credit allocation has a Scope 1 and 2 carbon intensity of 103tCO₂e/\$m rev vs 133tCO₂e/\$m rev for the MSCI All Companies World Index; the equity-only portion of the Fund is even lower at 99tCO₂e/\$m rev. It is important to note that the Fund is a multi-asset fund and does not have a benchmark, so comparisons are not straightforward.

The Fund's positive and negative screens exclude over 90% of the issuers in the MSCI ACWI equity benchmark, weighted by market capitalisation, which is in line with expectations.

● **...and compared to previous periods?**

The alignment with environmental revenue indicators in the previous reported period was 82%, the same as that reported in the reporting period to 31st August 2024. We expect the reported 'green' revenues to be consistently high, as the environmental revenue of green bonds & most renewable infrastructure are both classified as 100% environmental, with the average equity environmental revenue approximately 75%. Changes in reported figures are explained by shifts in asset allocation but are not expected to fluctuate considerably given the ranges expressed above.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable

investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has closed to all investors and holds no investments at the year end reporting date.

Prior to closure, the Fund committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/01/2024 - 31/12/2024

What were the top investments of this financial product?

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

The fund committed to a minimum of 75% in Sustainable Investments with an environmental objective. The Fund invested a maximum of 25% of assets in the "Non Sustainable" category, which is mainly made up of cash, money market instruments and derivatives.

Period	2024	2023
Sustainable investment	0.00%	89.81%
Other environmental	0.00%	82.09%
Social	0.00%	7.72%

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Financials	Financial Services	2.06
Financials	Real Estate	1.89
Financials	Banking	6.45
Financials	Funds & Trusts	0.82

Materials	Forest & Paper Products Manufacturing	1.84
Materials	Containers & Packaging	1.69
Communications	Wireline Telecommunications Services	1.79
Communications	Telecommunications	0.43
Government	Government Local	1.08

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – First Report

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 0%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0% of assets in the "not sustainable" category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund's extensive screening programme has ensured that the portfolio was focused exclusively on activities that drive the transition to a low carbon, sustainable economy.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable
