\*Please refer to Note 1 for fund events.

The following table reports the collateral held as at June 30, 2025 to reduce counterparty exposure on reverse repurchase agreements.

| Fund                                              | Counterparty             | Collateral currency | Cash held as collateral | Sovereign Bonds held as collateral |
|---------------------------------------------------|--------------------------|---------------------|-------------------------|------------------------------------|
| Franklin U.S. Dollar Short-Term Money Market Fund | Barclays                 | USD                 | –                       | 102,052,150                        |
| Franklin U.S. Dollar Short-Term Money Market Fund | MUFG Securities EMEA PLC | USD                 | –                       | 102,016,804                        |

### Distressed Securities

In line with the prospectus definition, distressed securities are to be understood as including defaulted securities, and securities that are being rated CCC or below by at least 2 ratings agencies, or if unrated, their equivalent and have a credit spread above 1,000 bps. However, with respect to securities with a credit spread higher than 1000 bps (irrespective of their credit rating), the Investment Manager will proceed to additional analyses and verifications notably based on the evolution of the security's credit spread and the rating provided by other credit agencies in order to assess whether this security should be requalified as a distressed security. This procedure is further described in the Management Company's risk management process.

The exposure to distressed securities as at June 30, 2025 is as follows:

| Funds                                                           | Exposure in % of Net Assets |
|-----------------------------------------------------------------|-----------------------------|
| Franklin Emerging Market Corporate Debt Fund                    | 2.21                        |

### Portfolio Turnover Ratio

The portfolio turnover ratio, expressed as a percentage, is equal to the total of purchases and sales of securities netted against the total value of subscriptions and redemptions, over average net assets of the Fund for the 12 months period. It is effectively a measure of how frequently a Fund buys or sells securities.

The portfolio turnover ratio calculation is not applicable to Liquid Reserve and Money Market Funds, as such a ratio is not relevant to such Funds due to the short-term nature of the investments.

| Funds                                                           | Portfolio Turnover Ratio |
|-----------------------------------------------------------------|--------------------------|
| Franklin Alternative Strategies Fund*                           | 87.32%                   |
| Franklin Biotechnology Discovery Fund                           | (7.47)%                  |

## Remuneration

Franklin Templeton International Services S.à r.l. ("FTIS"), as UCITS licensed management company (the "Management Company") has a remuneration policy (the "Policy") in place which applies to all UCITS funds (each a "UCITS" and together the "UCITS") under its management. The Policy has been designed to discourage excessive risk taking, integrating in its performance management systems risk criteria specific to the business units it covers. The policy has a governance structure aimed at preventing internal conflicts of interest.

There are defined procedures in place for the creation, update, review and approval of the Policy as well as for communication and implementation of the Policy. Senior Management, Human Resources, Compliance and other functions are all involved in this process and the Policy is approved by Senior Management and the Board of Directors of the Management Company.

Fixed remuneration is defined as base salary plus other benefits which may include pension contributions, life assurance premiums or private medical insurance premiums. Levels of fixed remuneration are set with reference to job complexity, level of responsibility, performance and market benchmarking data. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses, long term awards in the form of performance share grants or sales bonus payments. Levels of variable remuneration are set with reference to overall corporate and business unit performance as well as individual performance.

The full Policy is available at the registered office of the Management Company. Quantitative information relevant to the Franklin Templeton Investment Funds is outlined below.

*\*\*\*Delegates are Investment Management entities which are subject to regulatory requirements that are equally as effective as those under Article 69(3)(a) of the UCITS Directive.*

## Audited annual report and unaudited semi-annual reports

The audited annual reports and unaudited semi-annual reports will be available on the local Franklin Templeton website, [www.franklintempleton.lu](http://www.franklintempleton.lu) or may be obtained, free of charge, on request at the registered office of the Company. They are only distributed to registered shareholders in those countries where local regulation so requires. The complete audited annual reports and unaudited semi-annual reports are available at the registered office of the Company.

**Appendix: Sustainable Finance Disclosure Regulation  
(unaudited)**

**Transparency of the promotion of environmental or social  
characteristics and of sustainable investment objectives in periodic  
reports**

The Sustainable Finance Disclosure Regulation ((EU) 2019/2088, the “SFDR”) requires the Company to include a description in its periodic reports of the extent to which any Fund classified pursuant to Article 8 of the SFDR (an “Article 8 Fund”) has met its environmental or social characteristics or classified pursuant to Article 9 of the SFDR (an “Article 9 Fund”) has met its sustainable investment objective. The SFDR also empowers the European Banking Authority, the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority (collectively “ESAs”) to develop draft regulatory technical standards (“RTS”) to specify the information and presentation format in the periodic reports. The following SFDR Article 8 Fund’s and Article 9 Fund’s periodic disclosures have been prepared using the common set of sustainability disclosures or reporting requirements of the RTS which came into effect on 1 January 2023. The asset classifications in the following disclosures are based upon MSCI and may differ to the classification of the securities in the Schedule of Investments.

The disclosures for each classification are outlined as follows:

| <b>Sub-Fund Name</b>                                 | <b>SFDR<br/>Classification</b> |
|------------------------------------------------------|--------------------------------|
| Franklin Alternative Strategies Fund                 | Article 8                      |

# Franklin Alternative Strategies Fund (the “Fund”)

Legal Entity Identifier: 54930062LATFG8YHK918

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund encouraged at portfolio level minimum environmental, social and governance (the "ESG") standards by targeting a weighted average ESG score greater than i) the median MSCI ESG score of the investment universe; or ii) an MSCI ESG score of 5.25, whichever was higher, based on the long exposure in the portfolio of rated securities.

Thereby, the Fund promoted environmental and social characteristics which include inter alia actions to combat climate change, reduction of pollution and waste and/or human rights.

The investment universe was defined as all issuers with a current MSCI ESG score. Holdings without MSCI attributed ESG score did not contribute to the ESG score of the Fund or its investment universe.

In addition, the Fund implemented negative screens as part of its investment process.

In this regard, the Fund allocated 57.80% of its assets to investments aligned with the E/S characteristics during the reference period.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

- The weighted average MSCI ESG score of the portfolio; and
- The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions described in the Fund's pre-contractual disclosure.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| The weighted average MSCI ESG score of the portfolio                                                                | 6.36                                     | 6.22  | 6.00  |
| The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions | 0.00                                     | 0.00  | 0.00  |

### ... And compared to previous periods?

The weighted average MSCI ESG score of the portfolio has increased overtime, while the portfolio has maintained zero exposure to the investment companies in excluded sectors.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts (the "PAIs") were integrated into K2/D&S Management Co., L.L.C. (the "Investment Manager") proprietary scoring model, the ESG 360 Dashboard. This ESG modelling tool takes in position level scoring from MSCI ESG and produces sleeve and portfolio scores.

The following PAIs were considered in relation to the Fund:

- Exposure to companies active in the fossil fuel sector;
- Violations of United Nations Global Compact principles (the "UNGC Principles") and Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons.

The Fund monitors exposure to companies active in fossil fuels sector and targets 0% long exposure to companies which generate more than 30% of their revenues from coal production or distribution.

The Fund committed to have less than 1% long exposure in the portfolio to equities and corporate credit that violated the UNGC Principles without positive perspective. The Fund limited exposure to equities and corporate credit that violated the UNGC Principles without positive perspective to 0.31%. Furthermore, the Fund considered Violations of UN Global Compact and OECD Guidelines as part of the assessment of investee companies good governance. The Investment Manager screened the long holdings to identify securities which failed the UNGC or OECD Guidelines. The Investment Manager engaged with the Investment Co-Managers to understand the investment proposition of the security which were flagged as violating UN Global Compact or OECD Guidelines and performed an assessment of the underlying company's governance. If it was determined that the security indeed had poor governance, the security was added to the Fund's restricted list, leading the Investment Manager to divest within 90 days.

The Fund limited exposure to controversial weapons to 0%.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                                | Sector       | % of Assets | Country            |

## What was the proportion of sustainability-related investments?

The Fund did not make sustainable investments during the reference period.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

57.80% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (42.20%) was not aligned with E/S characteristics and consisted primarily of asset types and securities which were considered ineligible assets within the MSCI ESG Ratings methodology.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |

| Internet                  | 2.89%       |
| Food                      | 2.62%       |
| Telecommunications        | 2.27%       |
| Diversified Finan Serv    | 2.17%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 42.20% and included asset types and securities that were considered ineligible assets within the MSCI ESG Ratings methodology. This included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), foreign exchange and foreign exchange derivatives, interest rate swaps and UCITs eligible commodities. In addition, the Fund invested in assets that are eligible under MSCI ESG Ratings methodology, but which are not covered for the purpose of calculating an overall Fund ESG score. These assets included structured credit and short derivative positions. Lastly, no environmental and/or social safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy can be summarized as follows:

1. The Fund committed and succeeded to reach a weighted average ESG score greater than i) the median MSCI ESG score of the investment universe; or ii) an MSCI ESG score of at least 5.25, whichever is higher. If the Fund's score fell below 5.25, the Investment Manager rebalanced across the Investment Co-Manager's sleeves to achieve a Fund score of 5.25 or better within 90 days.

The weighted average MSCI ESG score of the portfolio was 6.36 (and the median MSCI ESG score of the investment universe was 5.55); and

2. the Fund excluded certain sectors and companies with respect to the following criteria:

- 0% exposure to controversial weapons;
- Less than 1% long exposure to securities which fail the UNGC Principles without positive perspective;
- Less than 5% long exposure to MSCI CCC-rated securities;
- The Fund targets 0% long exposure in aggregate to (i) companies which generate more than 5% of their revenues from tobacco production or distribution and (ii) companies which generate more than 30% of their revenues from coal production or distribution. At no time will this exposure exceed 1% of long positions, and should it exceed 0%, the positions in violation of these thresholds will be removed from the Fund by the end of the calendar month following the month in which the issue is identified by the Investment Manager.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Biotechnology Discovery Fund (the “Fund”)

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social (“E/S”) characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, drug affordability and pricing, diversity and inclusion, employee satisfaction/well-being and/or environmental-related aspects (e.g., reduction of greenhouse gas (“GHG”) emissions). Franklin Advisers, Inc. (the “Investment Manager”) sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology.

The Fund allocated 97.22% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager’s proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager’s analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |       |       |

### ... And compared to previous periods?

The performance of the sustainability indicators was consistent with the prior period.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTi) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments           | Sector      | % of Assets | Country        |
|-------------------------------|-------------|-------------|----------------|
| AMGEN INC                     | Health Care | 7.01%       | United States  |
| VERTEX PHARMACEUTICALS INC    | Health Care | 6.50%       | United States  |
| GILEAD SCIENCES INC           | Health Care | 6.20%       | United States  |
| REGENERON PHARMACEUTICALS INC | Health Care | 5.63%       | United States  |
| ASCENDIS PHARMA A/S           | Health Care | 3.51%       | Denmark        |
| Argenx SE                     | Health Care | 3.45%       | Netherlands    |
| JAZZ PHARMACEUTICALS PLC      | Health Care | 3.38%       | United States  |
| INSMED INC                    | Health Care | 3.11%       | United States  |
| Merus NV                      | Health Care | 2.87%       | Netherlands    |
| PTC THERAPEUTICS INC          | Health Care | 2.56%       | United States  |
| NEUROCRINE BIOSCIENCES INC    | Health Care | 2.49%       | United States  |
| ASTRAZENECA PLC               | Health Care | 2.46%       | United Kingdom |
| Benitec Biopharma Inc         | Health Care | 2.36%       | United States  |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 34.20%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.22% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.78%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 97.22%                                 | 99.20%                    | 97.04%                    |
| #2 Other                            | 2.78%                                  | 0.80%                     | 2.96%                     |

| #1B Other E/S characteristics       | 63.02%                                 | 99.20%                    | 97.04%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |
| Other environmental                 | 3.55%                                  | N/A                       | N/A                       |
| Social                              | 30.65%                                 | N/A                       | N/A                       |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                       | % of Assets |
|----------------------------------|-------------|
| Health Care                      | 97.22%      |
| Top sub-sector                   | % of Assets |
| Biotechnology                    | 79.95%      |
| Pharmaceuticals                  | 12.82%      |
| Life Sciences Tools & Services   | 2.71%       |
| Health Care Providers & Services | 1.74%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

3.55%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

30.65%

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.78% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective). For that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective**: 0.00%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective**: 0.00%

☒ NO

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions and water usage). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.76% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |       |

### ... And compared to previous periods?

Compared to the previous periods, the sustainability indicators were generally very similar.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believes it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund engaged with investee companies, prioritizing those where relevant greenhouse gas emissions data indicates that engagement is most impactful, to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund remained committed to engaging with companies that lacked any gender diversity, but during the reporting period no company in the portfolio was identified as laggard in terms of board diversity. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded from its investments companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments   | Sector                 | % of Assets | Country       |
|-----------------------|------------------------|-------------|---------------|
| AMAZON.COM INC        | Consumer Discretionary | 8.91%       | United States |
| SHOPIFY INC           | Information Technology | 6.79%       | Canada        |
| Doordash Inc          | Consumer Discretionary | 6.30%       | United States |
| COSTCO WHOLESALE CORP | Consumer Staples       | 4.57%       | United States |
| MERCADOLIBRE INC      | Consumer Discretionary | 4.42%       | Uruguay       |
| Booking Holdings Inc  | Consumer Discretionary | 4.20%       | United States |
| UBER TECHNOLOGIES INC | Industrials            | 3.35%       | United States |

| Meta Platforms Inc    | Communication Services | 3.16%       | United States |
| MASTERCARD INC        | Financials             | 2.87%       | United States |
| WW GRAINGER INC       | Industrials            | 2.72%       | United States |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.76% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.24%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Food Products                          | 0.70%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.24% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Diversified Balanced Fund (the “Fund”)

Legal Entity Identifier: 549300JXYTI61NAIZV57

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas (“GHG”) emissions and increase in board gender diversity in the Fund’s portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund’s exclusions were also adhered to over the period.

On average, over the reference period:

- 72.53% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 94.00% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 7 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

### ... And compared to previous periods?

During the reference period, the Fund achieved the environmental and social characteristics outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, though declined slightly on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, decreased from ten to nine compared to the previous year; however, there was a meaningful increase in percentage terms.

Total new engagement activities were lower year-on-year, with an increase in engagements focused on GHG emissions and a decrease regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

| Largest investments                                            | Sector                 | % of Assets | Country        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

During the reference period, 86.77% of the Fund's portfolio based on market value was aligned with the E/S characteristics promoted by the Fund. The remaining portion (13.23%) was not aligned with the promoted characteristics and consisted primarily of liquid assets, index derivatives, certain collective investment management schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund.

| Investment Category                 | Asset Allocation historical comparison |                           |

| Electric Utilities                         | 1.40%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 13.23% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 7 engagements focused on initiatives to reduce GHG emissions and 3 engagements focused on strengthening board gender diversity.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Diversified Conservative Fund (the “Fund”)

Legal Entity Identifier: 5493006BH1R540WJNR89

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas (“GHG”) emissions and increase in board gender diversity in the Fund’s portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund’s exclusions were also adhered to over the period.

On average, over the reference period:

- 74.36% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 97.50% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 7 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

### ... And compared to previous periods?

During the reference period, the Fund achieved the environmental and social characteristics outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, though declined on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, decreased from ten to nine compared to the previous year; however, there was an increase in percentage terms.

Total new engagement activities were lower year-on-year, with an increase in engagements focused on GHG emissions and a decrease regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

| Largest investments                                              | Sector           | % of Assets | Country  |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

During the reference period, 88.15% of the Fund's portfolio based on market value was aligned with the E/S characteristics promoted by the Fund. The remaining portion (11.85%) was not aligned with the promoted characteristics and consisted primarily of liquid assets, index derivatives, certain collective investment management schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund.

|                                     | Asset Allocation historical comparison |                           |

| Capital Markets                          | 0.92%       |
| Multi-Utilities                          | 0.91%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 11.85% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 7 engagements focused on initiatives to reduce GHG emissions and 3 engagements focused on strengthening board gender diversity.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Diversified Dynamic Fund (the “Fund”)

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, during the reference period:

- 71.84% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 99.23% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

Over the reference period:

- There were 7 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

### ... And compared to previous periods?

During the reference period, the Fund achieved the environmental and social objectives outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, though declined slightly on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, decreased from ten to nine compared to the previous year; however, there was a meaningful increase in percentage terms.

Total new engagement activities were lower year-on-year, with an increase in engagements focused on GHG emissions and a decrease regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

| Largest investments                   | Sector                 | % of Assets | Country        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

During the reference period, 88.13% of the Fund's portfolio based on market value was aligned with the E/S characteristics promoted by the Fund. The remaining portion (11.87%) was not aligned with the promoted characteristics and consisted primarily of liquid assets, index derivatives, certain collective investment management schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund.

| Investment Category                 | Asset Allocation historical comparison |        |
|-------------------------------------|----------------------------------------|--------|
|                                     | 2025                                   | 2024   |
| Proportion of Investments           | Proportion of Investments              |        |
| #1 Aligned with E/S characteristics | 88.13%                                 | 95.20% |
| #2 Other                            | 11.87%                                 | 4.80%  |
| #1A Sustainable                     | N/A                                    | N/A    |
| #1B Other E/S characteristics       | 88.13%                                 | 95.20% |
| Taxonomy-aligned                    | N/A                                    | N/A    |
| Other environmental                 | N/A                                    | N/A    |
| Social                              | N/A                                    | N/A    |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector                                 | % of Assets |
|--------------------------------------------|-------------|
| Information Technology                     | 20.10%      |
| Financials                                 | 13.35%      |
| Consumer Discretionary                     | 10.43%      |
| Health Care                                | 9.66%       |
| Government Bonds                           | 8.08%       |
| Industrials                                | 8.03%       |
| Communication Services                     | 7.24%       |
| Consumer Staples                           | 4.03%       |
| Energy                                     | 2.66%       |
| Materials                                  | 2.14%       |

| Health Care Equipment & Supplies           | 2.03%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 11.87% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 7 engagements focused on initiatives to reduce GHG emissions, and 3 engagements focused on strengthening board gender diversity.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

| <input type="radio"/> YES                                                                                                | <input checked="" type="radio"/> NO                                                                                                                                                                                             |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics. The below presents the degree of success for each. The following characteristics:

- reduction of greenhouse gas emissions (GHG emissions) and facilitation of the development of sustainability-oriented financial markets in emerging economies, especially promoting transparent disclosure practices and issuance of securities with robust sustainability attributes:

In order to promote the reduction of GHG emissions, the Fund committed to engage with the issuers falling within the bottom 20% of their peer group, as determined by the proprietary tools, as measured by their greenhouse gas emissions and greenhouse gas intensity. As a part of this commitment, the Investment Managers initiated the engagement process with 16 issuers by e-mails and online meetings. During the engagement process the Investment Managers monitored the engaged position's emissions status and their efforts in meeting the presented targets.

The Fund refrained from investing in issuers whose exposure to fossil fuel extraction exceeded the Investment Managers' acceptable limit, as described in the Fund's pre-contractual disclosure: any company, which derives more than 5% of its revenue from thermal coal production is deemed not investable.

Additionally, the Fund invested in ESG themed bonds, which drives the demand for these instruments, influencing the development of sustainability-oriented financial markets in emerging economies.

The Investment Managers dispatched annual written communications to issuers, encouraging them to voluntarily report Principal Adverse Impact (PAI) indicators for year 2024 and is on target with their commitment to engage with issuers that were failing to disclose mandatory PAIs indicators for year 2025. Such reporting translates into increased market transparency, which is especially important in jurisdictions with weaker regulatory reporting requirements. In addition, to the committed GHG engagement and letters related to PAIs reporting, the Investment Managers conducted various engagements with issuers related to other topics, such as biodiversity and water management, amongst others.

- Fair and sound labour practices:

The Investment Managers observed the issuers against repeated and serious violations of the United Nations Global Compact (UNGC) principles, Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations (UN) Guiding Principles on Business and Human Rights, by monitoring factors including labour practices

and responsible corporate governance. In addition, Investment Managers monitored child labour violations. There were no issuers identified within the Fund that were potentially involved in such violations.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the E/S characteristics promoted performed as follows:

| Sustainability KPI Name                                                                                                          | Value  |
|----------------------------------------------------------------------------------------------------------------------------------|--------|
| Percentage of the Fund's net assets invested in green bonds                                                                      | 10.83% |
| Percentage of the Fund's net assets invested in social bonds                                                                     | 0.00%  |
| Percentage of the Fund's net assets invested in sustainability bonds                                                             | 2.45%  |
| Percentage of the Fund's net assets invested in sustainability-linked bonds, or Sustainable Development Goals (the "SDGs") bonds | 4.94%  |
| Percentage of the Fund's net assets invested in issuers falling under ESG exclusions                                             | 0.72%  |
| The number of issuers with which the Investment Managers engage                                                                  | 40.00  |

### ... And compared to previous periods?

In the current reference period that concluded on 30 June 2025, the Fund's average allocation into the ESG-themed bonds slightly decreased compared to the previous reference period. The ESG-themed bonds allocation as of 30 June 2024, stood at 18.78%, while as of 30 June 2025, it was 18.22%.

Overall, the percentage of investment in green, social and sustainable bonds on 30 June 2024 was 11.07%, while the average allocation increased to 13.28% in the fiscal year ending 30 June 2025. As of 30 June 2024, the average allocation of green bonds stood at 9.12%. Over the fiscal year ending 30 June 2025, this allocation increased to 10.83%. Similarly, for sustainability bonds, the average allocation as of 30 June 2024, was 1.95%, which also saw a rise to 2.45% throughout the fiscal year ending on 30 June 2025. Additionally, the average allocation of sustainability-linked bonds as of 30 June 2024, stood at 7.71%, and throughout the year it decreased resulting in the average allocation of 4.94% as of 30 June 2025.

At the end of the previous reference period, the fund had no exposure to, or tying with excluded sectors and additional exclusions. At the end of the current reference period, the fund had 0.72% exposure to, or tying with excluded sectors and additional exclusions. Considering that this event took place at the conclusion of the current reference period, the Investment Managers will proceed to divest from such security as soon as reasonably practicable. This action will be taken in the best interest of the Shareholders and in accordance with the binding date stipulated in the pre-contractual disclosure.

During both reference periods, the Investment Managers have been active in the field of sustainability engagement, with 93 issuers engaged in the previous reference period and 40 in the current reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, impact on biodiversity; or
- The development of a circular economy;

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport, pollution prevention and control and efficient buildings among others. Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

Power Finance Corporation Ltd. (PFC) has actively facilitated the financing of renewable energy assets in accordance with the "Eligible Projects" criteria outlined within its Green Bond Framework. Notably, PFC has played a pivotal role in supporting the growth of India's renewable energy sector by underwriting and disbursing funding for large-scale solar and wind installations with an aggregate installed capacity of 9,324 MW. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of production of renewable energy and reduction of greenhouse gas emissions.

Another example is the green bond issued by the Pakistan Water and Power Development Authority (WAPDA). WAPDA has advanced renewable energy finance through strategic hydropower development. The commissioning of the Tarbela Fourth Extension (T4) project has resulted in an estimated avoidance of 20 million tonnes of CO<sub>2</sub> equivalent (CO<sub>2</sub>e) emissions, while the Dasu Hydropower Project (HPP) is projected to achieve a cumulative CO<sub>2</sub>e avoidance of approximately 233 million tonnes. These initiatives underscore WAPDA's instrumental contribution to sustainable infrastructure development and emissions reduction. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of production of renewable energy and reduction of greenhouse gas emissions.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used proprietary tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

The "Investment Universe" was defined as primarily fixed and floating rate debt securities and debt obligations which were located in emerging market countries and/or deriving a significant proportion of their economic activity from developing or emerging countries.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining (quasi- and sub-sovereign) issuers in the universe according to their environmental performance including greenhouse gas emissions and intensity.

Another tool, ESG Credit App ranked the corporate issuers based on their greenhouse gases emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gas emission, the emitters historic trajectories, Science Based Targets initiative (SBTi) targets, etc.

Additionally, quasi- and sub-sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in green bond whose use of proceeds targeted the development of renewable energy sources, e.g. (solar, PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

## **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For bonds issued by quasi- and sub-sovereign entities, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible, the Investment Managers did not invest or, if already invested, the Investment Managers divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- Guiding thematic engagement; and
- Applying exclusions.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage with corporate issuers actively held by the Fund, which were considered as laggards and scored in the bottom 20% of the investment universe within their sector in terms of greenhouse gas emission and greenhouse gas intensity metrics, with the aim to improve the risk-management they apply in these areas. In addition,

the Investment Managers are on target with their commitment to engage with issuers that were failing to disclose mandatory PAIs indicators by sending yearly written requests.

#### Applying exclusions

The Fund considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions as detailed in the pre-contractual disclosure of the Fund.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 13.28%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

99.33% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.67%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund, as well as derivatives held for hedging, efficient portfolio management or, on an ancillary basis, for investment purposes. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 99.33% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 13.28% of its portfolio in sustainable investments.

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                          | % of Assets |
|-----------------------------------------------------|-------------|
| Financials                                          | 25.36%      |
| Government Bonds                                    | 17.38%      |
| Utilities                                           | 12.74%      |
| Energy                                              | 11.14%      |
| Materials                                           | 9.50%       |
| Industrials                                         | 7.46%       |
| Communication Services                              | 5.33%       |
| Consumer Discretionary                              | 4.86%       |
| Consumer Staples                                    | 3.38%       |
| Real Estate                                         | 1.88%       |
| Health Care                                         | 0.29%       |
| Top sub-sector                                      | % of Assets |
| Government Bonds                                    | 17.38%      |
| Banks                                               | 16.21%      |
| Oil, Gas & Consumable Fuels                         | 11.14%      |
| Electric Utilities                                  | 9.26%       |
| Financial Services                                  | 8.48%       |

| Wireless Telecommunication Services                 | 3.09%       |
| Independent Power & Renewable Electricity Producers | 2.85%       |
| Ground Transportation                               | 2.66%       |
| Diversified Telecommunication Services              | 2.24%       |
| Paper & Forest Products                             | 2.20%       |
| Chemicals                                           | 2.19%       |
| Consumer Staples Distribution & Retail              | 1.76%       |
| Automobiles                                         | 1.69%       |
| Broadline Retail                                    | 1.64%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.92%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.35%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.67% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management purposes, or, on an ancillary basis, for investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 99.33% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders, among others. By employing these methods, the Fund has effectively attained its committed environmental and social characteristics.

The aforementioned actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were as follows:

1. The Fund allocated a portion of its net assets to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application), which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then included in an engagement process.
3. The Fund applied to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. The Investment Managers actively incorporated environmental and/or social considerations into the Fund’s sustainability strategy through a structured engagement. Engagement activities were conducted with issuers using a variety of methods including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled “How did the sustainability indicators perform?” reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Euro Government Bond Fund (the “Fund”)

Legal Entity Identifier: 0YX4QFLYLSHIYAKFZJ30

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective**: 0.00%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective**: 0.00%

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 89.64% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 46.75%.

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe.

The average GHG intensity of the investee countries (Principal Adverse Impact ("PAI") indicator 15) for the Fund was 191.55, while the benchmark was 177.85. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 236.26.

To further promote these characteristics, the Investment Manager engaged with various sovereign issuers to discuss the reduction of GHG emissions in their national economy.

(iii) biodiversity protection:

The Investment Manager has actively engaged with a range of sovereign issuers to emphasize the critical need for the conservation and protection of biodiversity, including engagements with SSA issuers. The Investment Manager, furthermore, has actively promoted best practices in biodiversity protection by investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Moreover, the Fund avoided investment in sovereign issuers that lacked a strong governance structure (based on World Bank governance indicators), were not a party to certain landmark international agreements, had not ratified or implemented key labour and human rights conventions, had been considered deficient in anti-money laundering and counter-terrorist financing measures, or scored poorly on Transparency International's Corruption Perceptions Index.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Government Bond Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.

| Sustainability KPI Name                                                                            | Sustainability KPI historical comparison |        |        |

## ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. This change primarily results from amendments to the Prospectus, in which the Fund increased its commitment to a minimum proportion of sustainable investments from 30% to 50%. Additionally, due to the amendments, the Fund now includes types of bonds (not use of proceeds bonds) issued by sovereign issuers meeting specific budgetary requirements outlined in the following section, when calculating the proportion of sustainable investment.

As of 30 June 2024, the average allocation of green bonds stood at 46.81%. Over the fiscal year ending 30 June 2025, this allocation increased to 54.19%. Similarly, for social bonds, the average allocation as of 30 June 2024, was 5.66%, which also saw a rise to 6.40% throughout the fiscal year ending on 30 June 2025. The aforementioned bonds issued by sovereign issuer stood at 29.05%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 53.17%, while the average allocation increased to 89.64% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 23.76%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 46.75%.

At the end of the current and previous reference periods the weighted average ESG score of the Fund was performing better than the weighted average ESG score of the investment universe. As of 30 June 2024, the average ESG score of the portfolio was 6.65 while the ESG average score of the investment universe was 6.39. Where throughout the fiscal year ending on 30 June 2025, the average ESG score of the portfolio was 6.72, while the average ESG score of the investment universe was 6.65.

At the end of the current and previous reference periods, the Fund had no exposure to issuers that failed under any of the ESG exclusions.

During both reference periods, the Investment Manager has been active in the field of sustainability engagement, with 10 issuers engaged in the previous reference period and 16 in the current reference period.

### **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration and community development;
- Good labour relations;
- Social protection of the most vulnerable community members including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- Universal access to basic social infrastructure, quality education and healthcare; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards. The Investment Manager also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. Finally, it was ensured that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m<sup>3</sup> capacity and plans to scale to 100,000 m<sup>3</sup>, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions.

Another example is a green bond issued by the Republic of Italy with a particularly interesting projects to shift freight transport from road to rail with sophisticated environmental design techniques. The Trento Railway Bypass Project aims to boost freight capacity along the Scandinavian-Mediterranean Corridor, primarily via an underground route. Its focus is on shifting freight from road to rail to cut CO<sub>2</sub> emissions and support sustainable logistics. The project features thorough environmental assessments, including noise, biodiversity, and landscape impacts, with strong mitigation measures like reusing 93% of excavated materials. Designed to complement local sustainability initiatives, the bypass is expected to reduce road traffic and emissions while aiding urban regeneration. Thanks to the proceeds to date, 3,074,000 tonnes of CO<sub>2</sub> per year have been avoided. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of greenhouse gas emissions.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers subject to social violations, which were excluded by the Investment Manager from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix. Issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

Secondly, the Investment Manager considered the mandatory and other relevant PAI indicators of Table 1 of Annex I of the SFDR RTS, as applicable to the asset class and according to the Investment Manager's analysis, when assessing whether a sustainable investment might be causing potential harm. For investments in use of proceeds instruments, the Investment Manager assessed the potential for significant harm at the level of the projects funded and at the level of the issuer.

Additionally, where the Fund was proposing to consider as sustainable investments bonds issued by sovereign issuers which are not use of proceeds instruments, certain issuers were excluded to ensure compliance with the DNSH principle. In particular, the Investment Manager considered a range of factors including (but not limited to) whether the issuer:

- lacked a strong governance structure (based on World Bank governance indicators),
- was not a party to certain landmark international agreements,
- had not ratified or implemented key labour and human rights conventions,
- had been considered deficient in anti-money laundering and counter-terrorist financing measures,
- scored poorly on Transparency International's Corruption Perceptions Index,

or

- was deemed "Not Free" by Freedom House

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments in the Fund's portfolio were solely bonds issued by governments, government-related entities and supranational entities and the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting the Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund invested in bonds issued by governments, government-related, and supranational issuers deemed by the Investment Manager to be Environmental Champions.

Environmental Champions were identified using a proprietary ESG ranking. The Energy and Environmental Transition Index (the "EETI") ranked sovereign issuers based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix.

Restricting the Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI were excluded from the Fund's portfolio.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions.

Across the entire portfolio (excluding liquid assets and derivatives used for hedging and efficient portfolio management purposes and as applicable to the asset class), The Fund also considered social violations for the purpose of applying specific ESG exclusions.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                                             | Sector           | % of Assets | Country     |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 89.64%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.83% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.17%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging and efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 89.64% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
|                                     | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 98.83%                                 | 97.85%                    | 99.07%                    |
| #2 Other                            | 1.17%                                  | 2.15%                     | 0.93%                     |
| #1A Sustainable                     | 89.64%                                 | 53.17%                    | 34.96%                    |
| #1B Other E/S characteristics       | 9.19%                                  | 44.68%                    | 64.11%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |
| Other environmental                 | 54.19%                                 | 46.81%                    | 31.52%                    |
| Social                              | 35.45%                                 | 6.36%                     | 3.44%                     |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector         | % of Assets |
|--------------------|-------------|
| Government Bonds   | 96.62%      |
| Financial Services | 2.21%       |
| Top sub-sector     | % of Assets |
| Government Bonds   | 96.62%      |
| Financial Services | 2.21%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 54.19%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 35.45%

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.17% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging and efficient portfolio management purposes.

No minimum environmental and/or social safeguards have been put in place with respect to (i) cash and other liquid assets and (ii) derivatives used for hedging and efficient portfolio management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. Additionally, the Fund also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. These themes included, but were not limited to, pollution abatement, protection of biodiversity and landscape, environmental protection, housing development, community development, water supply, medical products, hospital services, public health services, education, sickness and disability, old age support, family and children, unemployment. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Manager used proprietary ESG IT solutions (including the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.
5. The Fund maintained its ESG score at Fund level higher than the ESG score of the investment universe throughout the entire fiscal year period described.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Euro High Yield Fund (the “Fund”)

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 12.91% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

#### (i) reduction of greenhouse gas (GHG) emissions:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 21.99%.

Moreover, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the Fund's average GHG intensity of the investee companies – Principal Adverse Impact (PAI) indicator 3 (Scope 1, 2 and 3 emissions) - was 597.29, while for the benchmark it was 905.24. The average Scope 1 + 2 GHG intensity for the Fund was 92.91, compared to 156.09 for the benchmark. Therefore, the portfolio's GHG intensity—both in terms of total emissions and Scope 1+2 emissions—is lower than its benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Managers regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

To further promote these environmental characteristics, the Investment Managers actively engaged with issuers to encourage reduction of GHG emissions.

#### (ii) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations (UN) Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

(iii) products and services without negative societal effects:

The Investment Managers included a negative screen and set of exclusions as part of the investment process to assess the investments toward to societal effects these could have. The issuers were screened toward protection of international human rights; no complicity in human rights violations; respect for freedom of association and the right to collective bargaining; elimination of forced labour; abolition of child labour; elimination of discrimination in respect of employment and occupation; working and/or standing up against corruption in all its forms; manufacture or distribute nuclear weapons or controversial weapons defined as anti-personnel mines, biological & chemical weaponry; or those that manufacture components intended for use in such weapons; manufacture conventional weapons; those that derive revenue from such products that exceeds the Investment Managers' threshold (5%); manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds the Investment Managers' thresholds (5%); adhere to the bespoke list of gambling companies, that are set according to the bespoke gambling policy. The Investment Managers have monitored the issuers in respect to the abovementioned exclusions and confirmed that no security is breaching any of the specific factors on a pre-deal basis and during the time the security is a part of the portfolio.

In terms of related PAI metrics, the average violations of the UNGC Principles and OECD Guidelines (PAI indicator 10) of the Fund's portfolio indicated no violations recorded for the covered companies, compared to 0.01 for the benchmark. The average exposure to controversial weapons of investee companies (PAI indicator 14) indicated no exposure recorded for both the Fund and the benchmark. Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers considers stronger performance of both PAI indicators 10 and 14 compared to the benchmark as a favourable contribution towards promoting social characteristics.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark ICE BofA Euro High Yield Constrained. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represents the performance of the indicators during the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

### ● ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

The Fund maintained its percentage allocation in sustainable investments with a slightly higher average allocation at the end of the current reference period.

As of 30 June 2024, the average allocation of green bonds stood at 9.90%. Over the fiscal year ending 30 June 2025, this allocation increased to 11.22%. For social bonds, the average allocation as of 30 June 2024, was 1.16%, which saw a slight decline to 1.04% throughout the fiscal year ending on 30 June 2025.

Overall, the percentage of investment in green, social and sustainable bonds at 30 June 2024 was 12.35%, while the average allocation increased to 12.91% in the fiscal year ending 30 June 2025.

As of 30 June 2024, the exposure to Environmental Champions was at 24.01%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 21.99%.

At the end of the current and previous reference periods, the Fund had no exposure to, or tying with excluded sectors and additional exclusions.

During both reference periods, the Investment Managers have been active in the field of sustainability engagement, with 118 issuers engaged in the previous reference period and 54 in the current reference period.

At the end of the current and previous reference periods the weighted average ESG score of the Fund was performing better than the weighted average ESG score of the investment universe. As of 30 June 2024, the average ESG score of the portfolio was 6.32, while the ESG average score of the investment universe was 5.85. Where throughout the fiscal year ending on 30 June 2025, the average ESG score of the portfolio was 6.49, while the average ESG score of the investment universe was 5.93. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either: • The efficient use of energy, raw materials, water, and land;

- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

The sustainable investments supported these objectives by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, reduce GHG emissions, lower impact of economic activities on biodiversity, foster social cohesion, build good labour relations, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

The first example is the social bond issued by the Spanish multinational bank CaixaBank SA. Through the financing of projects aligned with the bond's framework, an estimated 10,341,912 individuals have reportedly benefited—gaining access to job support, education, healthcare services, and other essential resources. Bank financing is pivotal in fostering the growth of micro, small, and medium-sized businesses in Spain's most economically disadvantaged regions. By targeting areas in the bottom 30th percentile or those with high unemployment rates, this support helps uplift local economies. Through loans to NGOs and private social projects, these initiatives aim to create a more inclusive society. By enhancing access to public or subsidized healthcare services, emergency medical care, and disease control programs, as well as training professionals in these sectors, these efforts contribute to healthier communities. MicroBank's Family Microcredit program, updated annually based on economic indicators, stands out as a testament to empowering low-income families through tailored financial solutions. Through these concerted efforts, financing local social projects embodies a commitment to positive social change, fostering sustainable growth, and reducing disparities across various facets of society. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of tackling inequalities and fostering social cohesion, social integration, good labour relations; and investments in human capital, including disadvantaged communities.

Another example is a green bond issued by Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Fund, the company consulted over 500 individuals, whose insights were key in shaping the fund's criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as social integration and community development.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the Investment Managers did not invest or, if already invested, the Investment Managers divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

*The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Guiding thematic engagement; and
- Applying exclusions

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using a proprietary ESG ranking:

- The ESG Credit App ranked corporate issuers based on their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gas emissions, emitters' historic trajectories, Science Based Targets initiative (SBTi) targets, etc.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

| Largest investments                                                   | Sector                 | % of Assets | Country        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 12.91%.

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

95.77% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (4.23%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), and derivatives held for hedging purposes, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 95.77% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 12.91% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.22%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.69%

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 4.23% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives for hedging, efficient portfolio management purposes and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 95.77% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used a proprietary IT tool (the ESG Credit App), which identified the issuers determined as the so called Environmental Champions. Environmental Champions are defined as corporate issuers ranked within the top 20% of their peer industry group by the ESG Credit App
4. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
5. The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and distribution of questionnaires as part of broader cross-sectional engagement. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.
6. The Fund maintained its ESG score at Fund level higher than the ESG score of the investment universe throughout the entire fiscal year period described.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin European Corporate Bond Fund (the “Fund”)

Legal Entity Identifier: 0JRKFOGJGO9U5HR6QY84

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.13% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 35.72%.

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2, 3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 476.42, while for the benchmark it was 791.17. The average Scope 1+2 GHG intensity for the Fund was 46.03, compared to 110.79 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Managers have actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 40.88%, compared to 40.27% for the benchmark. The average unadjusted gender pay gap (PAI indicator 12) of investee companies was 14.06% for the Fund and 13.80% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers consider the stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. With respect to the PAI indicator 12, Investment Managers view the difference as tolerable, particularly given that this factor is subject to data quality. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 15.50%.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro-Aggregate: Corporates Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

| Sustainability KPI Name                                                                            | Sustainability KPI historical comparison |        |        |

### ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

During both reference periods, the Fund maintained its percentage allocation in sustainable investments, with a slightly lower average allocation at the end of the current reference period. As of 30 June 2024, the average exposure to green bonds was

28.98%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 27.00%. The average exposure to social bonds decreased from 5.97% in the previous reporting period to 5.89% at the end of the current period.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 35.91%, while the average allocation decreased to 33.13% in the fiscal year ending 30 June 2025. Despite the decline, the Investment Managers note that the average exposure to remains above 30%.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 30% of portfolio in sustainable investments as stipulated in precontractual disclosure.

As of 30 June 2024, the exposure to Environmental Champions was at 39.33%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 35.72%.

At the end of the current and previous reference periods, the fund had no exposure to, or tying with excluded sectors and additional exclusions.

The number of issuers that Investment Managers engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

## **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments.

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the energy company Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Community Benefit Fund, the company consulted over 500 individuals, whose insights were key in shaping its criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. With the proceeds to date, a total of 6,100,000 people have benefited from them. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as fostering social cohesion.

Next, Telia. Telia's smart public transport project exemplifies the green digital solution category that brings benefits to passengers, drivers, and operators. It's a comprehensive solution using the Telia IoT Edge onboard processor and a cloud-based platform to deliver a suite of digital services. These services aim to make public transport more efficient, sustainable, and user-friendly for all. A pioneering example funded under the umbrella is its "5G ride" project in Stockholm in collaboration with partners like Ericsson and Keolis. Telia deployed 5G connected autonomous electric minibuses. Telia's high-speed, low latency 5G network was crucial for enabling safe real-time communication between self-driving vehicles and a remote-control tower, demonstrating a key step towards future autonomous public transport systems. With the proceeds to date, 61,000 MWh of energy has been saved annually. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of greenhouse gas emissions.

## **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gases emissions, emitters' historic trajectories, Science Based Targets

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

initiative ("SBTi") targets. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights. Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

### **Identifying best-in-class issuers**

The Fund sought exposure to bonds issued by corporates deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using proprietary ESG rankings: the ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gas emissions, emitters' historic trajectories, SBTi targets.

### **Restricting Fund's investable universe**

Issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

### **Guiding thematic engagement**

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

### **Applying exclusions**

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 33.13%

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

99.34% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.66%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 99.34% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 33.13% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector                             | % of Assets |
|----------------------------------------|-------------|
| Financials                             | 49.75%      |
| Industrials                            | 9.04%       |
| Utilities                              | 8.20%       |
| Consumer Staples                       | 7.42%       |
| Health Care                            | 5.73%       |
| Communication Services                 | 5.30%       |
| Consumer Discretionary                 | 4.65%       |
| Real Estate                            | 4.45%       |
| Materials                              | 1.97%       |
| Government Bonds                       | 1.83%       |
| Information Technology                 | 0.99%       |
| Top sub-sector                         | % of Assets |
| Banks                                  | 31.15%      |
| Financial Services                     | 8.80%       |
| Insurance                              | 5.65%       |
| Beverages                              | 4.91%       |

| Pharmaceuticals                        | 2.62%       |
| Capital Markets                        | 2.49%       |
| Health Care Equipment & Supplies       | 2.12%       |
| Construction & Engineering             | 2.00%       |
| Building Products                      | 1.93%       |
| Government Bonds                       | 1.83%       |
| Electrical Equipment                   | 1.65%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.24%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 5.89%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.66% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund and derivatives held for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 99.34% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period, the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled “How did the sustainability indicators perform?” reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

254900RZI399MM1QMA22

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

| <input checked="" type="checkbox"/> YES                                                                                                                                                                                                                                                                                                                                                                      | <input type="checkbox"/> NO                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

### To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised social bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with a social objective. This objective was predominantly met by investing in social bonds, which constituted 90.43%. Through these investments, the Fund supported various positive social outcomes, such as, but not limited to, social cohesion, social integration, labour relations, and investments in economically or socially disadvantaged communities. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 836 people benefiting from social projects, c. 424 people benefiting from access to healthcare services, c. 236 people benefiting from access to transport, c.76 people benefiting from access to water or sanitation, c.34 students benefiting from access to education, c.33 people from underprivileged areas, c.10 people benefiting from access to power, as well as c.71 jobs saved or maintained per every million of Euro invested (data as of 31 Dec 2024).

The top five Sustainable Development Goals ("SDGs") to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 3 Good Health and Well-Being (71%), SDG 10 Reduced Inequalities (71%), SDG 8 Decent Work and Economic Growth (60%), SDG 1 No Poverty (60%), and SDG 4 Quality Education (54%) (as of 31 December 2024).

The first example is the social bond issued by the Spanish multinational bank CaixaBank SA. Through the financing of projects aligned with the bond's framework, an estimated 10,341,912 individuals have reportedly benefited—gaining access to job support, education, healthcare services, and other essential resources. Bank financing is pivotal in fostering the growth of micro, small, and medium-sized businesses in Spain's most economically disadvantaged regions. By targeting areas in the bottom 30th percentile or those with high unemployment rates, this support helps uplift local economies. Through loans to NGOs and private social projects, these initiatives aim to create a more inclusive society. By enhancing access to public or subsidized healthcare services, emergency medical care, and disease control programs, as well as training professionals in these sectors, these efforts contribute to healthier communities. MicroBank's Family Microcredit program, updated annually based on economic indicators, stands out as a testament to empowering low-income families through tailored financial solutions. Through these concerted efforts, financing local social projects embodies a commitment to positive social change, fostering sustainable growth, and reducing disparities across various facets of society. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of tackling inequalities and fostering social cohesion, social integration, good labour relations; and investments in human capital, including disadvantaged communities.

Another illustrative example is the social bond issued by the African Development Bank, a multilateral development finance institution dedicated to promoting economic development and social progress across the African continent. Through investments in both public and private sectors, the bank pursues its mission of alleviating poverty and improving living conditions in Africa's most vulnerable communities.

The bank's strategic agenda, encapsulated in the "High 5s" priorities, seeks to accelerate inclusive, rapid, and sustainable growth. By focusing on core areas such as energy, food security, industrialization, regional integration, and quality of life, these efforts aim to transform the lives of millions.

As a result of the initiatives supported by the bond, more than 10.5 million individuals have reportedly benefited. These outcomes include the creation of over 1,155,000 jobs and expanded access to digital technologies for more than 487,000 people, contributing to digital inclusion and economic empowerment.

Through this bond, the African Development Bank exemplifies how targeted financing can catalyse social progress, reduce inequality, and foster long-term resilience across African societies.

## ● **How did the sustainability indicators perform?**

| Sustainability KPI Name                                                                                             | Sustainability KPI historical comparison |        |        |

## ● **... And Compared to Previous Periods?**

Please note that due to a change in methodology in 2024, some sustainability indicators (social bonds and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to social bonds was 93.60%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 90.43%.

Overall, the percentage of investment in other eligible bonds on 30 June 2024 was 5.58%, while the average allocation increased to 5.66% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has declined, the Fund has maintained its commitment of investing at least 90% of portfolio in sustainable investments as stipulated in precontractual disclosure.

## ● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Corporate issuers were monitored using the principal adverse impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuer from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Manager applied additional qualitative assessment (based on internal research or external second party opinion) of the issuers and the project's DNSH eligibility.

## ----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

While assessing eligible bonds, the Investment Manager reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

For bonds and/or instruments issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Manager.

Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- performing the DNSH test;
- guiding thematic engagement; and
- applying exclusions.

Performing the DNSH test

The Investment Manager used proprietary data tools and qualitative research to ensure alignment of bonds invested in with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App. The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, such as but not limited to United Nations principles.

## **What were the top investments of this financial product?**

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2024-07-01 – 2025-06-30.

**Asset allocation**  
describes the share  
of investments in  
specific assets.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 96.09%.

### What was the asset allocation?

96.09% of the Fund's portfolio contributed to the sustainable investment objective. The remaining portion (3.91%) did not contribute to such objective and consisted of derivative instruments used for hedging purposes as well as liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) which did not qualify as sustainable investments. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 96.09% portion, where the Investment Manager has confirmed that such instruments were aligned with social sustainable objective of the Fund.

|                     | Asset Allocation historical comparison |                           |                           |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector                           | % of Assets |
|--------------------------------------|-------------|
| Government Bonds                     | 66.64%      |
| Financials                           | 25.70%      |
| Real Estate                          | 3.74%       |
| Top sub-sector                       | % of Assets |
| Government Bonds                     | 66.64%      |
| Banks                                | 20.37%      |
| Financial Services                   | 5.33%       |
| Real Estate Management & Development | 2.62%       |
| Diversified REITs                    | 1.12%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- Yes  
☐ In fossil gas ☐ In nuclear energy
- No  
☒

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 96.09%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivative instruments used for hedging purposes was 3.91%.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 96.09% portion, where the Investment Manager has confirmed that such instruments are aligned with social sustainable objective of the Fund.

The Investment Manager ensured that the underlying asset of any derivatives used for efficient portfolio management qualified as a sustainable investment.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for placement of deposits and for derivatives contracts meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund on continuous basis.

## What actions have been taken to attain the sustainable investment objective during the reference period?

Over the reference period, the Investment Manager continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to social objectives, ensuring that investments avoided significant harm while their issuers adhere to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods.

1. The Fund allocated its portion to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive social impacts. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

3. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated social objective into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

# Franklin European Total Return Fund (the “Fund”)

Legal Entity Identifier: 4HIOY1ECMPB3YDFIY329

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.13% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 43.81%.

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Manager's acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from unconventional oil and gas extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2, 3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 397.28, while for the benchmark it was 778.56. The average Scope 1+2 GHG intensity for the Fund was 30.25, compared to 104.29 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries (PAI indicator 15) for the Fund was 208.34, while the benchmark was 184.56. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average in the previous year, when it stood at 245.36.

To further promote these characteristics, the Investment Manager engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Manager has actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Moreover, the Fund avoided investment in sovereign issuers that lacked a strong governance structure (based on World Bank governance indicators), were not a party to certain landmark international agreements, had not ratified or implemented key labour and human rights conventions, had been considered deficient in anti-money laundering and counter-terrorist financing measures, or scored poorly on Transparency International's Corruption Perceptions Index.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment. In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 41.03%, compared to 39.87% for the benchmark. The average unadjusted gender pay gap of investee companies (PAI indicator 12) was 15.12% for the Fund and 13.71% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Manager considers the stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. With respect to the PAI indicator 12, Investment Manager views the difference as tolerable, particularly given that this factor is subject to data quality. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 15.48%.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Aggregate Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

| Sustainability KPI Name                                                                            | Sustainability KPI historical comparison |        |        |

● ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. This change primarily results from amendments to the Prospectus, in which the Fund increased its commitment to a minimum proportion of sustainable investments from 30% to 50%. Additionally, due to the amendments, the Fund now includes types of bonds (not use of proceeds bonds) issued by sovereign issuers meeting specific budgetary requirements outlined in the following section, when calculating the proportion of sustainable investment.

For social bonds, the average allocation as of 30 June 2024, was 5.66%, which saw a rise to 6.09% throughout the fiscal year ending on 30 June 2025. While the average exposure to green bonds decreased from 41.27% in the previous reporting period to 38.90% at the end of the current period. The other forms of bonds considered as sustainable investments stood at 19.14%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 47.55%, while the average allocation increased to 64.13% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 36.24%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 43.81%.

At the end of the current and previous reference periods, the Fund had no exposure to issuers that failed under any of the ESG exclusions.

The number of issuers that the Investment Manager engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

## **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration and community development;
- Good labour relations;
- Social protection of the most vulnerable community members including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- Universal access to basic social infrastructure, quality education and healthcare; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards. The Investment Manager also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. Finally, it was ensured that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the energy company Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Community Benefit Fund, the company consulted over 500 individuals, whose insights were key in shaping its criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. With the proceeds to date, a total of 6,100,000 people have benefited from them. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as social integration and community development.

Another example is a green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m<sup>3</sup> capacity and plans to scale to 100,000 m<sup>3</sup>, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

Firstly, all issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify corporate issuers and sovereign issuers involved in harmful economic activities and/or controversies, which are excluded by the Investment Manager from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix. Sovereign issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

Another tool, ESG Credit App ranked the corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Targets initiative ("SBTi") certification. Corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Secondly, the Investment Manager considered the mandatory and other relevant PAI indicators of Table 1 of Annex I of the SFDR RTS, as applicable to the asset class and according to the Investment Manager's analysis, when assessing whether a sustainable investment might be causing potential harm. For investments in use of proceeds instruments, the Investment Manager assessed the potential for significant harm at the level of the projects funded and at the level of the issuer.

Additionally, where the Fund was proposing to consider as sustainable investments bonds issued by sovereign issuers which are not use of proceeds instruments, certain issuers were excluded to ensure compliance with the DNSH principle. In particular, the Investment Manager considered a range of factors including (but not limited to) whether the issuer:

- lacked a strong governance structure (based on World Bank governance indicators),
- was not a party to certain landmark international agreements,
- had not ratified or implemented key labour and human rights conventions,
- had been considered deficient in anti-money laundering and counter-terrorist financing measures,
- scored poorly on Transparency International's Corruption Perceptions Index,
- was deemed "Not Free" by Freedom House.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

## **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For securities issued by corporate issuers, the sustainable investments were assessed for alignment with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

These guidelines and principles were not applicable to investment in securities issued by sovereign countries.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the Investment Manager did not invest or, if already invested, the Investment Manager divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

#### Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Manager to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix; and
- The ESG Credit App ranked corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Targets initiative ("SBTi") certification

#### Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

#### Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

#### Applying exclusions.

Across the entire portfolio (excluding liquid assets and derivatives used for hedging and efficient portfolio management purposes and as applicable to the asset class), the Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, United Nations principles, and, where applicable, national law.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

| Largest investments                                                        | Sector           | % of Assets | Country        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 64.13%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

96.16% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (3.84%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging and efficient portfolio management purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 96.16% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 64.13% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector                                          | % of Assets |
|-----------------------------------------------------|-------------|
| Government Bonds                                    | 58.07%      |
| Financials                                          | 26.73%      |
| Utilities                                           | 3.51%       |
| Industrials                                         | 1.93%       |
| Consumer Staples                                    | 1.62%       |
| Health Care                                         | 1.32%       |
| Communication Services                              | 1.21%       |
| Real Estate                                         | 0.72%       |
| Consumer Discretionary                              | 0.69%       |
| Materials                                           | 0.20%       |
| Information Technology                              | 0.15%       |
| Top sub-sector                                      | % of Assets |
| Government Bonds                                    | 58.07%      |
| Banks                                               | 16.47%      |

| Health Care Equipment & Supplies                    | 0.65%       |
| Multi-Utilities                                     | 0.58%       |
| Beverages                                           | 0.57%       |
| Consumer Staples Distribution & Retail              | 0.53%       |
| Building Products                                   | 0.52%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38.90%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 25.23%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 3.84% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging and efficient portfolio management purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 96.16% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place with respect to (i) cash and other liquid assets and (ii) derivatives used for hedging and efficient portfolio management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period, the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive environmental or social impacts. Additionally, the Fund also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund’s sustainable investments, based on EUROSTAT data. These themes included, but were not limited to, pollution abatement, protection of biodiversity and landscape, environmental protection, housing development, community development, water supply, medical products, hospital services, public health services, education, sickness and disability, old age support, family and children, unemployment. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe

3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled “How did the sustainability indicators perform?” reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Euro Short Duration Bond Fund (the “Fund”)

Legal Entity Identifier: 549300WUQJDZB0YAUO10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.49% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 43.22%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Manager's acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from unconventional oil and gas extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2, 3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 502.61, while for the benchmark it was 743.20. The average Scope 1+ 2 GHG intensity for the Fund was 42.83, compared to 75.57 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries (PAI indicator 15) for the Fund was 189.59, while the benchmark was 182.89. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 217.61.

To further promote these characteristics, the Investment Manager engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Manager has actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Moreover, the Fund avoided investment in sovereign issuers that lacked a strong governance structure (based on World Bank governance indicators), were not a party to certain landmark international agreements, had not ratified or implemented key labour and human rights conventions, had been considered deficient in anti-money laundering and counter-terrorist financing measures, or scored poorly on Transparency International's Corruption Perceptions Index.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 39.67 %, compared to 39.57% for the benchmark. The average unadjusted gender pay gap (PAI indicator 12) of investee companies was 14.68% for the Fund and 14.02% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Manager considers the stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. With respect to the PAI indicator 12, Investment Manager views the difference as tolerable, particularly given that this factor is subject to data quality. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 18.85%.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Aggregate (1-3Yr) Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

### ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. This change primarily results from amendments to the Prospectus, in which the Fund increased its commitment to a minimum proportion of sustainable investments from 30% to 50%. Additionally, due to the amendments, the Fund now includes other forms of bonds (not use of proceeds bonds) issued by sovereign issuers meeting specific budgetary requirements outlined in the following section, when calculating the proportion of sustainable investment.

For social bonds, the average allocation as of 30 June 2024, was 5.76%, which increased to 5.78% throughout the fiscal year ending on 30 June 2025. While the average exposure to green bonds decreased from 32.83% in the previous reporting period to 26.23% at the end of the current period. The other forms of bonds considered as sustainable investments at 22.91%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 38.65%, while the average allocation increased to 55.49% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 30.78%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 43.22%.

At the end of the previous reference period, the Fund had 0.16% exposure to issuers that failed under any of the ESG exclusions. Securities for which the percentage of revenue from the excluded sectors and/or additional exclusion rose above the limits required by the prospectus after the initial purchase triggered a plan to divest the securities in a timely manner, taking into account the best interests of Shareholders, and were sold.

At the end of the current reference period, the Fund had no exposure to issuers that failed under any of the ESG exclusions.

The number of issuers that the Investment Manager engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration and community development;
- Good labour relations;
- Social protection of the most vulnerable community members including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- Universal access to basic social infrastructure, quality education and healthcare; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards. The Investment Manager also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. Finally, it was ensured that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the energy company Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Community Benefit Fund, the company consulted over 500 individuals, whose insights were key in shaping its criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the Community Benefit Fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. With the proceeds to date, a total of 6,100,000 people have benefited from them. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as social integration and community development.

Next, Allied Irish Banks. AIB's Green Bond financing has played a key role in Ireland's Deposit Return Scheme (DRS), launched in February 2024 to support circular economy goals. It also helps to meet environmental targets under the Directive (EU) 2019/904 of the European Parliament and of the Council of 5 June 2019 on the reduction of the impact of certain plastic products on the environment ("EU Single-Use-Plastic Directive") and the national goal of collecting 90% of plastic drinks containers by 2029. The DRS adds a refundable deposit to drink containers, encouraging returns via Reverse Vending Machines (RVMs) installed in 180 Lidl's stores across the country. By September 2024, Lidl's contribution involved handling 100 million recurrent bottles and cans, issuing over €17 million back to customers. Nationally, the DRS saw more than 500 million containers returned, significantly advancing environmental targets. Thanks to the proceeds that have supported DRS project to date, 1,248 tonnes of waste per year have been treated/prevented. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of waste and the development of a circular economy.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

Firstly, all issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify corporate issuers and sovereign issuers involved in harmful economic activities and/or controversies, which are excluded by the Investment Manager from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix. Sovereign issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Another tool, ESG Credit App ranked the corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Target initiative ("SBTI") certification. Corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Secondly, the Investment Manager considered the mandatory and other relevant PAI indicators of Table 1 of Annex I of the SFDR RTS, as applicable to the asset class and according to the Investment Manager's analysis, when assessing whether a sustainable investment might be causing potential harm. For investments in use of proceeds instruments, the Investment Manager assessed the potential for significant harm at the level of the projects funded and at the level of the issuer.

Additionally, where the Fund was proposing to consider as sustainable investments bonds issued by sovereign issuers which are not use of proceeds instruments, certain issuers were excluded to ensure compliance with the DNSH principle. In particular, the Investment Manager considered a range of factors including (but not limited to) whether the issuer:

- lacked a strong governance structure (based on World Bank governance indicators),
- was not a party to certain landmark international agreements,
- had not ratified or implemented key labour and human rights conventions,
- had been considered deficient in anti-money laundering and counter-terrorist financing measures,
- scored poorly on Transparency International's Corruption Perceptions Index,
- was deemed "Not Free" by Freedom House.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For securities issued by corporate issuers, the sustainable investments were assessed for alignment with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

These guidelines and principles were not applicable to investment in securities issued by sovereign countries.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the Investment Manager did not invest or, if already invested, the Investment Manager divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund invested in bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix; and
- The ESG Credit App ranked corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Targets initiative ("SBTI") certification

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

#### Applying exclusions

Across the entire portfolio (excluding liquid assets and derivatives used for hedging, efficient portfolio management and investment purposes and as applicable to the asset class), The Fund also considered UNGC violations exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, United Nations principles, and, where applicable, national law.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                                                                        | Sector           | % of Assets | Country  |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 55.49%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

99.07% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.93%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 99.07% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 55.49% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |

| Independent Power & Renewable Electricity Producers | 0.52%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 26.23%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 29.26%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.93% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 99.07% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place with respect to (i) cash and other liquid assets and (ii) derivatives used for hedging and efficient portfolio management purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period, the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive environmental or social impacts. Additionally, the Fund also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund’s sustainable investments, based on EUROSTAT data. These themes included, but were not limited to, pollution abatement, protection of biodiversity and landscape, environmental protection, housing development, community development, water supply, medical products, hospital services, public health services, education, sickness and disability, old age support, family and children, unemployment. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.

3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled “How did the sustainability indicators perform?” reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Genomic Advancements Fund (the “Fund”)

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, drug affordability and pricing, diversity and inclusion, employee satisfaction/well-being and/or environmental-related aspects (e.g., reduction of greenhouse gas ("GHG") emissions). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.36% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |        |

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments           | Sector      | % of Assets | Country        |
|-------------------------------|-------------|-------------|----------------|
| NATERA INC                    | Health Care | 5.41%       | United States  |
| VERTEX PHARMACEUTICALS INC    | Health Care | 4.93%       | United States  |
| Krystal Biotech Inc           | Health Care | 4.28%       | United States  |

| Biontech SE                   | Health Care | 2.47%       | Germany        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.36% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.64%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                       | % of Assets |
|----------------------------------|-------------|
| Health Care                      | 93.24%      |
| Materials                        | 2.72%       |
| Information Technology           | 2.20%       |
| Real Estate                      | 0.21%       |
| Top sub-sector                   | % of Assets |
| Biotechnology                    | 46.77%      |
| Life Sciences Tools & Services   | 33.97%      |
| Pharmaceuticals                  | 8.64%       |
| Health Care Providers & Services | 2.86%       |
| Chemicals                        | 2.72%       |
| Software                         | 2.20%       |
| Health Care Technology           | 0.99%       |
| Health Care REITs                | 0.21%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.64% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective). For that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Global Corporate Investment Grade Bond Fund (the “Fund”)

Legal Entity Identifier: 549300WDS73FHS1LLT86

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.63% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 33.67%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (scope 1,2,3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 598.02, while for the benchmark it was 1,054.26. The average Scope 1 + 2 GHG intensity for the Fund was 70.46, compared to 228.59 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Managers regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries for the Fund was 238.87, while the benchmark was 539.36. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 246.08.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Managers have actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 36.21%, compared to 36.18% for the benchmark. The average unadjusted gender pay gap of investee companies (PAI indicator 12) was 14.35% for the Fund and 15.05% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers consider stronger performance of both PAI indicator 12 and PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 17.25%.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Global Aggregate Credit Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represents the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous year.

### ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund maintained its percentage allocation in sustainable investments, with a slightly higher average allocation at the end of the current reference period.

As of 30 June 2024, the average allocation of green bonds stood at 10.15%. Over the fiscal year ending 30 June 2025, this allocation increased to 14.17%. Similarly, for social bonds, the average allocation as of 30 June 2024, was 1.04%, which also saw a rise to 1.46% throughout the fiscal year ending on 30 June 2025. Regarding the sustainability bonds, the average allocation as of 30 June 2024 was 1.21% while as of 30 June 2025, the average allocation was 0%.

Overall, the percentage of investment in green, social and sustainable bonds on 30 June 2024 was 12.40%, while the average allocation increased to 15.63% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 27.92%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 33.67%.

At the end of the previous reference period, the Fund had no exposure to, or tying with excluded sectors and additional exclusions.

By the close of the current reference period, the Fund had 1.44% exposure to, or tying with excluded sectors and additional exclusions. Considering that this event took place at the conclusion of the current reference period, the Investment Managers will proceed to divest from such security as soon as reasonably practicable. This action will be taken in the best interest of the Shareholders and in accordance with the binding date stipulated in the pre-contractual disclosure.

The number of issuers that the Investment Managers engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport including electric vehicles, affordable housing, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

A prominent example is the green bond issued by Bank of Ireland; a leading Irish financial institution committed to supporting sustainable economic growth and the transition to a low-carbon economy. Through its lending activities and sustainable finance initiatives, the bank aims to finance and refinance projects that contribute not only to the transition to a low-carbon economy, but also to the development of sustainable infrastructure and cleaner urban environments.

This bond has contributed to achieving significant environmental results, including the avoidance of approximately 185,886 tonnes of CO<sub>2</sub> equivalent emissions, the addition of 1,672 megawatts of renewable energy capacity through newly constructed or rehabilitated facilities, and annual energy savings of 325,343 megawatt-hours.

By issuing this green bond, Bank of Ireland demonstrates how targeted sustainable financing can deliver measurable environmental impact while fostering the transition to a more sustainable and resilient economy.

Another striking example is the green bond issued by SUEZ, a leading French company specializing in water and waste management. The company is one of the global leaders in environmental services, particularly in drinking water and wastewater treatment, solid waste management, recycling, and circular economy solutions.

This bond has contributed to achieving significant environmental results, including the avoidance of approximately 3,456,968 tonnes of CO<sub>2</sub> equivalent emissions and the generation of 1,584,604 MWh of renewable energy annually. The initiatives supported by this financing have enabled the collection, treatment, and disposal of 6,257,093 tonnes of waste per year, benefiting more than 70 million people.

This green bond demonstrates how SUEZ leverages targeted sustainable financing to deliver measurable environmental benefits, enhance resource management, and improve quality of life, supporting the transition to a more sustainable and resilient future.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and exclude such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe.

Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions, emitters' historic trajectories, Science Based Targets initiative (SBTi) targets. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

*The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various references that included energy efficiency, natural capital conservation, renewable energy performance, including greenhouse gas intensity (emissions normalized by gross domestic product, CO<sub>2</sub>e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi targets.

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund considered UNGC violations, negative impact on biodiversity-sensitive areas and exposure to controversial weapons for the purpose of applying specific ESG exclusions as described in the investment strategy section.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                                                | Sector           | % of Assets | Country        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 15.63%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

95.90% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (4.10%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as financial derivatives instruments for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 95.90% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund. The Fund invested 15.63% of its portfolio in sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Proportion of Investments           | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 95.90%                                 | 95.37%                    |
| #2 Other                            | 4.10%                                  | 4.63%                     |
| #1A Sustainable                     | 15.63%                                 | 12.40%                    |
| #1B Other E/S characteristics       | 80.27%                                 | 82.97%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 14.17%                                 | 11.36%                    |
| Social                              | 1.46%                                  | 1.04%                     |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                             | % of Assets |
|----------------------------------------|-------------|
| Financials                             | 36.40%      |
| Health Care                            | 12.91%      |
| Communication Services                 | 9.49%       |
| Consumer Staples                       | 9.10%       |
| Utilities                              | 8.72%       |
| Industrials                            | 4.88%       |
| Information Technology                 | 4.46%       |
| Energy                                 | 2.73%       |
| Government Bonds                       | 2.18%       |
| Materials                              | 1.91%       |
| Consumer Discretionary                 | 1.62%       |
| Real Estate                            | 1.51%       |
| Top sub-sector                         | % of Assets |
| Banks                                  | 16.03%      |
| Capital Markets                        | 8.95%       |
| Insurance                              | 5.54%       |
| Electric Utilities                     | 4.17%       |
| Health Care Providers & Services       | 3.79%       |
| Pharmaceuticals                        | 3.74%       |
| Diversified Telecommunication Services | 3.61%       |
| Consumer Staples Distribution & Retail | 3.59%       |
| Financial Services                     | 3.52%       |
| Oil, Gas & Consumable Fuels            | 2.73%       |
| Media                                  | 2.39%       |
| Consumer Finance                       | 2.36%       |
| Biotechnology                          | 2.32%       |
| Food Products                          | 2.31%       |
| Government Bonds                       | 2.18%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.17%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.46%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 4.10% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, portfolio management purposes, and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 95.90% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund applied to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. The investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

| <input checked="" type="checkbox"/> YES                                                                                                                                                                                                                                                                                                                                                                                             | <input type="checkbox"/> NO                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

### To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised green bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with an environmental objective. This objective was predominantly met by investing in green bonds, which constituted 97.30%. The proceeds from these investments were utilised to finance initiatives such as renewable energy deployment, energy efficiency, clean transportation, circular economy and green buildings. Additionally, proceeds from these investments also financed projects in relation to waste and wastewater treatments as well as environmentally sustainable management of living natural resources and land use.

The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 654 tons of CO<sub>2</sub>e avoided or reduced, c. 748 MWh of renewable energy produced, c. 287 m<sup>2</sup> of green buildings constructed or renovated, c.76 electric vehicles deployed, c. 10,990 m<sup>3</sup> of water saved or treated and c 74 tons of waste prevented, collected and treated, reused, recycled or disposed per every million of Euro invested (data as of 31st Dec 2024).

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 7 Affordable and Clean Energy (85%), SDG 13 Climate Action (78%), SDG 11 Sustainable Cities and Communities (78%), SDG 9 Industry, Innovation and Infrastructure (73%), and SDG 12 Responsible Consumption and production (59%) (as of 31 December 2024).

An example of the bond supporting the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions is the green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This project funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m<sup>3</sup> capacity and plans to scale to 100,000 m<sup>3</sup>, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually and 1,281,883 tonnes of CO<sub>2</sub> per year have been avoided.

Furthermore, in support of the Fund's sustainable investment objective to support a low carbon future, the Investment managers engaged with portfolio investees regarding greenhouse gas emission reductions.

Another example of a bond supporting renewable energy development is the green bond issued in 2024 by Ørsted. Projects financed by the bond proceeds have contributed to achieving a total renewable energy capacity of 13 GW. Beyond advancing scalable renewable energy solutions that generate green energy and reduce emissions throughout the asset life cycle, Ørsted's bond proceeds also deliver a net-positive impact on biodiversity and provide tangible benefits to local communities.

One notable project funded is the launch of the Hornsea 3 Community Benefit Fund. Prior to its launch, Ørsted engaged with over 500 local stakeholders, whose feedback shaped the fund's criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund awarded GBP 249,000 to 21 local organizations aiming to enhance community well-being and resilience. Funded projects include educational programs, environmental conservation efforts, and initiatives to improve public health and social cohesion.

Investing in this green bond supports Ørsted's sustainable investment objectives by promoting renewable energy production, reducing greenhouse gas emissions, minimizing economic activities' impact on biodiversity, and fostering social integration and community development.

## ● How did the sustainability indicators perform?

| Sustainability KPI Name                                                                                                                                                                                                                                                                                                                                                                                              | Sustainability KPI historical comparison |        |        |

## ● ... And Compared to Previous Periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (percentage of investment in green and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a slightly lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 99.54%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 97.30%.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 90% of the portfolio in sustainable investments as stipulated in precontractual disclosure.

## ● How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle across the portfolio.

Corporate issuers were monitored using the Principal Adverse Impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuer from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Managers applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

## -----How were the indicators for adverse impacts on sustainability factors taken into account?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

For bonds and/or instruments issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

## **How did this financial product consider principal adverse impacts on sustainability factors?**

PAI indicators were considered for the purpose of:

- performing the DNSH test;
- guiding thematic engagement; and
- applying exclusions.

### **Performing the DNSH test**

The Investment Managers used proprietary data tools and qualitative research to ensure alignment of bonds invested in with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App. The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests based on their greenhouse gas emissions, political liberties and/or corruption.

### **Guiding thematic engagement**

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

### **Applying exclusions**

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, such as but not limited to United Nations principles.

## **What were the top investments of this financial product?**

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2024-07-01 – 2025-06-30.

**Asset allocation**  
describes the share  
of investments in  
specific assets.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 97.30%.

### What was the asset allocation?

97.30% of the Fund's portfolio contributed to the sustainable investment objective. The remaining portion (2.70%) did not contribute to such objective and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as derivatives used for hedging purposes. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 97.30% portion, where the Investment Managers have confirmed that such instruments were aligned with social sustainable objective of the Fund.

| Specialized REITs                                   | 1.04%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 97.30%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of socially sustainable investments?

Consistent with its intentions, as set out in the Supplement, the Fund did not invest in sustainable investments with a social objective.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day flow management and liquidity requirements of the Fund as well as derivative instruments used for hedging purposes was 2.70%.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 97.30% portion, where the Investment Managers have confirmed that such instruments are aligned with social sustainable objective of the Fund.

For derivatives, the Investment Managers determined what was the underlying asset and if applicable, subject this asset to all relevant ESG screenings depending on the underlying asset's nature. For the avoidance of doubt, the Investment Managers ensured that the underlying asset of any derivatives used for efficient portfolio management qualified as a sustainable investment.

The Investment Managers applied minimum environmental and social safeguards by verifying that the counterparties used for placement of deposits and for derivatives contracts meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund on continuous basis.

## What actions have been taken to attain the sustainable investment objective during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to environmental objectives, ensuring that investments avoided significant harm while their issuers adhered to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental impacts. Additionally, the Fund invested in other eligible bonds deemed to be supportive of reducing and elimination carbon emissions and other environmental objectives. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

3. The investment Managers are on a target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental objective into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

# Franklin Global Multi-Asset Income Fund (the “Fund”)

Legal Entity Identifier: 549300A75JSDJHNO0S41

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas (“GHG”) emissions and increase in board gender diversity in the Fund’s portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund’s exclusions were also adhered to over the period.

On average, over the reference period:

- 72.16% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 93.7% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 4 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

### ... And compared to previous periods?

During the reference period, the Fund achieved the environmental and social characteristics outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, and stayed consistent on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, increased from nine to ten compared to the previous year, which also represented a meaningful increase in percentage terms.

Total new engagement activities were slightly lower year-on-year, with one less engagement focused on GHG emissions but stable numbers regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

During the reference period, 84.19% of the Fund's portfolio based on market value was aligned with the E/S characteristics promoted by the Fund. The remaining portion (15.81%) was not aligned with the promoted characteristics and consisted primarily of liquid assets, index derivatives, certain collective investment management schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector                                 | % of Assets |
|--------------------------------------------|-------------|
| Government Bonds                           | 18.05%      |
| Financials                                 | 14.43%      |
| Information Technology                     | 12.70%      |
| Health Care                                | 7.27%       |
| Communication Services                     | 6.02%       |
| Consumer Discretionary                     | 5.81%       |
| Industrials                                | 5.60%       |
| Real Estate                                | 3.30%       |
| Energy                                     | 3.23%       |
| Consumer Staples                           | 3.14%       |
| Utilities                                  | 2.36%       |
| Materials                                  | 2.28%       |
| Top sub-sector                             | % of Assets |
| Government Bonds                           | 18.05%      |
| Banks                                      | 8.09%       |
| Semiconductors & Semiconductor Equipment   | 4.97%       |
| Pharmaceuticals                            | 3.48%       |
| Oil, Gas & Consumable Fuels                | 3.18%       |
| Software                                   | 3.14%       |
| Insurance                                  | 2.34%       |
| Interactive Media & Services               | 2.31%       |
| Technology Hardware, Storage & Peripherals | 2.17%       |
| Diversified Telecommunication Services     | 2.17%       |
| Biotechnology                              | 2.03%       |
| Financial Services                         | 1.94%       |
| Automobiles                                | 1.77%       |
| Machinery                                  | 1.76%       |
| Capital Markets                            | 1.55%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 15.81% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 3 engagements focused on initiatives to reduce GHG emissions, 2 engagements focused on strengthening board gender diversity and 1 engagement covered both issues.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin India Fund (the “Fund”)

Legal Entity Identifier: OC1U08GHHGVUW7N3I686

FRANKLIN  
TEMPLETON

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

☐ YES

- ☐ It made sustainable investments with an environmental objective: 0.00%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made sustainable investments with a social objective: 0.00%

☒ NO

- ☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.60% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the “Investment Manager”) attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund’s benchmark (MSCI India Index), referenced in Appendix F to the Prospectus (“the Benchmark”),
- Implementing negative screens as part of its investment process, as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager’s analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager’s proprietary ESG methodology;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                               | 2025                                     | 2024   |

| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology        | 0.00%                                    | 0.00%  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology        | 45.87%                                   | 43.40% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 45.49%                                   | 47.70% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 7.00%                                    | 6.60%  |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%                                    | 0.00%  |
| The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology              | 5.99                                     | 5.60   |
| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 4.45                                     | 4.50   |

### ... And compared to previous periods?

Compared to the previous periods, the sustainability indicators were generally similar.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

## **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                 | Sector                 | % of Assets | Country       |
|-------------------------------------|------------------------|-------------|---------------|
| HDFC BANK LTD                       | Financials             | 8.17%       | India         |
| ICICI BANK LTD                      | Financials             | 7.26%       | India         |

| Tata Consumer Products Ltd          | Consumer Staples       | 2.15%       | India         |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 57.60%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.36% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.64%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 57.60% of its net assets in sustainable investments, all towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 98.36%                                 | 97.76%                    |

| Electrical Equipment                 | 2.12%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 57.60% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 1.64% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 38.09% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social (“E/S”) characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the “Investment Manager”) sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.46% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager’s proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager’s analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |       |        |

### ... And compared to previous periods?

The performance of the sustainability indicators was consistent with the prior period.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTi) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments | Sector                 | % of Assets | Country       |
|---------------------|------------------------|-------------|---------------|
| NVIDIA CORP         | Information Technology | 9.35%       | United States |
| AMAZON.COM INC      | Consumer Discretionary | 8.04%       | United States |
| MICROSOFT CORP      | Information Technology | 7.63%       | United States |
| Meta Platforms Inc  | Communication Services | 5.34%       | United States |
| Broadcom Inc        | Information Technology | 4.87%       | United States |
| ALPHABET INC        | Communication Services | 4.57%       | United States |
| MASTERCARD INC      | Financials             | 3.60%       | United States |
| SERVICENOW INC      | Information Technology | 3.53%       | United States |
| APPLE INC           | Information Technology | 2.29%       | United States |
| TESLA INC           | Consumer Discretionary | 2.22%       | United States |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 38.09%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

99.46% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.54%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments | Proportion of Investments |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

27.10%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

10.99%

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.54% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Intelligent Machines Fund (the “Fund”)

Legal Entity Identifier: 254900ZZRM3C21CZ625

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective**: 0.00%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective**: 0.00%

☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 97.19% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |        |

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                       | Sector                 | % of Assets | Country                   |
|-------------------------------------------|------------------------|-------------|---------------------------|
| NVIDIA CORP                               | Information Technology | 9.12%       | United States             |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.19% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.81%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

|                                     | Asset Allocation historical comparison |                           |

| Ground Transportation                          | 0.76%       |
| Health Care Technology                         | 0.76%       |
| Household Durables                             | 0.37%       |
| Automobile Components                          | 0.28%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.81% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Mutual European Fund (the "Fund")

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund include, among other things, the reduction of greenhouse gas ("GHG") intensity and board gender diversity. Since these commitments have been made, the Investment Manager attained these characteristics by:

- Maintaining lower portfolio GHG intensity (scope 1+2) compared to both the MSCI Europe Value Index (the "Benchmark") and MSCI All Country Europe Index (the "Investment Universe");
- Committing to engage with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable; and
- Implementing negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the Fund's prospectus.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

- For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund's weighted GHG intensity (scope 1+2) was at least 20% below both the Benchmark and Investment Universe.
- The percentage of investments in companies having exposure to, or ties with excluded sectors and/or with additional exclusions as further detailed in section "What investment strategy does this financial product follow?" in the Fund's prospectus have been 0%.
- The percentage of the Fund's votes in favour of separation of the roles of CEO and Chair of the Board of Directors of the invested companies, when presented with the opportunity, has been 100%.
- The percentage of investments in companies that have less than one female director on the board of directors has been 0%, while also engaging with certain investee companies to promote Board diversification towards at least

two female directors, or 30% of the board, whichever is greater.

| Percentage of investments in companies with less than two or 30% female directors                                                                                        | 3.03%                                    | 3.95%   |

### ... And compared to previous periods?

The Fund was not aligned with Article 8 objectives throughout the full period of 2024, making comparisons with prior periods incomplete. However, the portfolio's sustainability indicators remain consistent with the Fund's commitments.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Greenhouse gas intensity
- Board gender diversity
- Controversial weapons

Greenhouse gas (GHG) intensity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund committed to maintaining a portfolio GHG intensity (scope 1+2), at least 20% below that of the Benchmark and of the Investment Universe, whichever was the lowest.

Board gender diversity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Investment Manager engaged with the investee companies to encourage a minimum of 2 females, or 30% of the board, whichever was greater, as a minimum board gender diversity threshold (below referred to as "2 or 30%" threshold). The Fund did not invest in companies which had no female directors. In cases where the company had at least one female director but did not meet the "2 or 30%" threshold, the Investment Manager has committed that it will engage with the company and may vote against key committee members unless the company was in the process of rectifying the shortcoming. Failure to achieve, or present a clear and credible plan to achieve, the "2 or 30%" threshold within 3 years from establishment of the position would result in divestment from this company as soon as practicably possible. Divestment would normally occur within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

Controversial weapons

The Fund did not invest in companies that were involved in the production or distribution of controversial weapons.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                                     | Sector                 | % of Assets | Country        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.31% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.69%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as securities held for diversification purposes which were involved in special situations, such as merger arbitrage and stressed or distressed credit.

| Investment Category                 | Asset Allocation historical comparison |                           |

| Household Products                     | 2.05%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

## What was the share of investments made in transitional and enabling activities?

Not applicable.

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.69% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as securities held for diversification purposes which were involved in special situations, including merger arbitrage, stressed and distressed debt issuers. No minimum environmental or social safeguards were put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund has:

- Maintained at least a 20% lower portfolio GHG intensity (scope 1+2) compared to both the MSCI Europe Value Index (the "Benchmark") and MSCI All Country Europe Index (the "Investment Universe");
- Implemented negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the Fund's prospectus;
- Avoided investment in companies without at least one female board director and committed to engage with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable;
- Voted to separate the roles of CEO and Chair of the Board of Directors of the investee companies, when presented the opportunity.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund include, among other things, the reduction of greenhouse gas ("GHG") intensity and board gender diversity. Since these commitments have been made, the Investment Manager attained these characteristics by:

- Maintaining lower portfolio GHG intensity (scope 1+2) compared to both the MSCI World Value Index (the "Benchmark") and MSCI All Country World Index (the "Investment Universe");
- Committing to engage with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable; and
- Implementing negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the Fund's prospectus.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund's weighted GHG intensity (scope 1+2) was at least 20% below both the Benchmark and Investment Universe.
- The percentage of investments in companies having exposure to, or ties with excluded sectors and/or with additional exclusions as further detailed in section "What investment strategy does this financial product follow?" in the Fund's prospectus have been 0%.
- The percentage of Fund's votes in favour of separation of the roles of CEO and Chair of the board of directors of the invested companies, when presented with the opportunity, has been 100%.
- The percentage of investments in companies that have less than one female director on the board of directors has been 0%, while also engaging with certain investee companies to promote board diversification towards at least two

female directors, or 30% of the board, whichever is greater.

### ... And compared to previous periods?

The Fund was not aligned with Article 8 objectives throughout the full period of 2024, making comparisons with prior periods incomplete. However, the portfolio's sustainability indicators remain consistent with the Fund's commitments.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Greenhouse gas intensity
- Board gender diversity
- Controversial weapons

Greenhouse gas (GHG) intensity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund committed to maintaining a portfolio GHG intensity (scope 1+2), at least 20% below that of the Benchmark and of the Investment Universe, whichever was the lowest.

Board gender diversity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Investment Manager engaged with the investee companies to encourage a minimum of 2 females, or 30% of the board, whichever was greater, as a minimum board gender diversity threshold (below referred to as "2 or 30%" threshold). The Fund did not invest in companies which had no female directors. In cases where the company had at least one female director but did not meet the "2 or 30%" threshold, the Investment Manager has committed to engage with the company and may vote against key committee members unless the company was in the process of rectifying the shortcoming. Failure to achieve, or present a clear and credible plan to achieve, the "2 or 30%" threshold within 3 years from establishment of the position would result in divestment from this company as soon as practicably possible. Divestment would normally occur within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

Controversial weapons

The Fund did not invest in companies that were involved in the production or distribution of controversial weapons.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.44% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.56%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as securities held for diversification purposes which were involved in special situations, such as merger arbitrage and stressed or distressed credit.

| Investment Category                 | Asset Allocation historical comparison |                           |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.56% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as securities held for diversification purposes which were involved in special situations, including merger arbitrage, stressed and distressed debt issuers. No minimum environmental or social safeguards were put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund has:

- Maintained at least a 20% lower portfolio GHG intensity (scope 1+2) compared to both Benchmark and the Investment Universe;
- Implemented negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the precontractual disclosure of the Fund's prospectus;
- Avoided investment in companies without at least one female board director and committed to engage with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable;
- Voted to separate the roles of CEO and Chair of the Board of Directors of the investee companies, when presented the opportunity.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental impact (e.g., carbon emissions). The Investment Manager sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology. As part of its proprietary ESG methodology, the Investment Manager also uses binding criteria for the selection of portfolio securities.

The Fund allocated 98.59% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

| The share of companies in the portfolio that have developed and are tracking an employee satisfaction or employee engagement survey            | 80.98% |
| The share of companies in the portfolio having exposure to ESG-based exclusions, with a commitment of strict adherence to the said exclusions. | 0.00%  |

### ... And compared to previous periods?

Not applicable.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund were in equity securities issued by companies which:

- derived at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals ("UN SDGs") (source: MSCI); or
- gained and maintained SBTi approved carbon emission reduction targets and were thus considered as contributing to fighting against climate change.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments caused significant harm to any sustainable investment objective.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion were not invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

Exceptions could only be made after formal review of alleged violations was carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or determined that the company made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observed international conventions.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- board gender diversity;
- exposure to controversial weapons; and
- Violation of the UNGC Principles.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believed that these PAIs are applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to encourage them to establish and commit to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up the scale of committing to align with net zero targets, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believes this helps them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and to engage with companies that are laggards relative to their industry peers.

At the time of new investments for the above PAIs, the Investment Manager baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, are aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund's initial commitment was to engage with all companies that lack any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement. If a decision to divest occurred, divestment normally occurred within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

Finally, the Fund was committed to excluding investments in companies that produced or distributed controversial weapons or who failed to comply with the UNGC Principles without positive outlook for remediation.

More information on how the Fund considered its PAIs may be found in the annual report of the Company.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-11-18 - 2025-06-30.

| Largest investments                    | Sector                 | % of Assets | Country       |
|----------------------------------------|------------------------|-------------|---------------|
| MICROSOFT CORPORATION                  | Information Technology | 4.69%       | United States |
| Sika AG                                | Materials              | 3.30%       | Switzerland   |
| SAP SE                                 | Information Technology | 3.25%       | Germany       |
| Amadeus IT Group, S.A.                 | Consumer Discretionary | 3.18%       | Spain         |
| MercadoLibre, Inc.                     | Consumer Discretionary | 3.17%       | Uruguay       |
| TE CONNECTIVITY PUBLIC LIMITED COMPANY | Information Technology | 3.09%       | Ireland       |
| DSV A/S                                | Industrials            | 3.07%       | Denmark       |
| MASTERCARD INCORPORATED.               | Financials             | 3.04%       | United States |
| SYNOPSYS, INC.                         | Information Technology | 3.03%       | United States |
| ASML Holding N.V.                      | Information Technology | 2.96%       | Netherlands   |
| ADVANCED MICRO DEVICES, INC.           | Information Technology | 2.90%       | United States |
| EXPERIAN PLC                           | Industrials            | 2.90%       | Ireland       |
| VERALTO CORPORATION                    | Industrials            | 2.77%       | United States |
| TYLER TECHNOLOGIES, INC.               | Information Technology | 2.76%       | United States |
| ZSCALER, INC.                          | Information Technology | 2.74%       | United States |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 57.20%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.59% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.41%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                     | % of Assets |
|------------------------------------------------|-------------|
| Information Technology                         | 35.11%      |
| Health Care                                    | 15.10%      |
| Industrials                                    | 14.24%      |
| Financials                                     | 14.00%      |
| Consumer Discretionary                         | 11.70%      |
| Materials                                      | 7.77%       |
| Communication Services                         | 0.66%       |
| Top sub-sector                                 | % of Assets |
| Software                                       | 18.56%      |
| Capital Markets                                | 8.60%       |
| Semiconductors & Semiconductor Equipment       | 7.73%       |
| Professional Services                          | 5.59%       |
| Electronic Equipment, Instruments & Components | 5.51%       |
| Hotels, Restaurants & Leisure                  | 5.47%       |
| Chemicals                                      | 5.28%       |
| Broadline Retail                               | 5.08%       |
| Health Care Equipment & Supplies               | 4.78%       |
| Pharmaceuticals                                | 4.61%       |
| Life Sciences Tools & Services                 | 4.22%       |
| IT Services                                    | 3.32%       |
| Air Freight & Logistics                        | 3.07%       |
| Financial Services                             | 3.04%       |
| Electrical Equipment                           | 2.81%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18.52%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 38.68%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.41% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The portfolio had a weighted average MSCI ESG rating above the weighted average MSCI ESG rating of the benchmark (MSCI World Index).

The fund used engagement to encourage certain companies to meet environmental and/or social characteristics during the reference period. Engagement was also used to acquire information to determine if companies were meeting environmental and/or social characteristics.

The Fund also applied specific ESG-based exclusions and did not invest in companies which according to the Investment Manager’s analysis:

- violated the UNGC Principles or the Organization for OECD Guidelines for Multinational Enterprises (without positive perspective for improvement)
- derived 10% or more of their revenues from the production and/or distribution of weapons;
- were involved in the production, distribution, or wholesale trading of dedicated and/or key components of controversial weapons (i.e., antipersonnel mines, biological and chemical weaponry and cluster munitions);
- were involved in the manufacture, distribution, or wholesale trading of tobacco or tobacco products;
- derived 15% or more of their revenues from nuclear power generation.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin Technology Fund (the "Fund")

Legal Entity Identifier: 549300P9XZCZFA3DI319

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.55% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.46% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |        |        |

### ... And compared to previous periods?

The performance of the sustainability indicators was consistent with the prior period.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTi) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                       | Sector                 | % of Assets | Country                   |
|-------------------------------------------|------------------------|-------------|---------------------------|
| NVIDIA CORP                               | Information Technology | 9.21%       | United States             |
| MICROSOFT CORP                            | Information Technology | 8.22%       | United States             |

| INTUIT INC                                | Information Technology | 2.03%       | United States             |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 43.55%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.46% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.54%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 98.46%                                 | 98.02%                    | 98.56%                    |
| #2 Other                            | 1.54%                                  | 1.98%                     | 1.44%                     |
| #1A Sustainable                     | 43.55%                                 | N/A                       | N/A                       |
| #1B Other E/S characteristics       | 54.91%                                 | 98.02%                    | 98.56%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |

| Banks                                      | 0.42%       |
| Automobile Components                      | 0.34%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

35.33%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

8.22%

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.54% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Franklin U.S. Opportunities Fund (the “Fund”)

Legal Entity Identifier: YWFJZZO29TGGRF43SH58

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.67% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, support of human capital, diversity and inclusion, employee satisfaction and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.16% of its assets to investments aligned with E/S characteristics.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

| Sustainability KPI Name                                         | Sustainability KPI historical comparison |        |        |

### ... And compared to previous periods?

The performance of the sustainability indicators were largely consistent with the prior period. The portfolio's allocation to the highest rated names (AAA) declined slightly due to the closure of some positions in AAA names in favour of increasing positions in AA rated securities. These moves were driven by assessments of risk/reward and relative valuation, rather than ESG concerns.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTi) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments    | Sector                 | % of Assets | Country       |
|------------------------|------------------------|-------------|---------------|
| NVIDIA CORP            | Information Technology | 7.48%       | United States |
| Meta Platforms Inc     | Communication Services | 6.70%       | United States |
| AMAZON.COM INC         | Consumer Discretionary | 6.50%       | United States |
| APPLE INC              | Information Technology | 5.24%       | United States |
| MICROSOFT CORP         | Information Technology | 5.11%       | United States |
| MASTERCARD INC         | Financials             | 3.22%       | United States |

| AXON ENTERPRISE INC    | Industrials            | 2.54%       | United States |
| NETFLIX INC            | Communication Services | 2.13%       | United States |
| ALPHABET INC           | Communication Services | 2.08%       | United States |
| SERVICENOW INC         | Information Technology | 1.94%       | United States |
| INTUITIVE SURGICAL INC | Health Care            | 1.77%       | United States |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 33.67%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

99.16% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.84%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 99.16%                                 | 98.78%                    | 99.07%                    |
| #2 Other                            | 0.84%                                  | 1.22%                     | 0.93%                     |
| #1A Sustainable                     | 33.67%                                 | N/A                       | N/A                       |
| #1B Other E/S characteristics       | 65.49%                                 | 98.78%                    | 99.07%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |
| Other environmental                 | 24.76%                                 | N/A                       | N/A                       |
| Social                              | 8.90%                                  | N/A                       | N/A                       |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                 | % of Assets |
|--------------------------------------------|-------------|
| Information Technology                     | 38.45%      |
| Communication Services                     | 13.83%      |
| Consumer Discretionary                     | 12.59%      |
| Health Care                                | 11.08%      |
| Industrials                                | 10.93%      |
| Financials                                 | 6.71%       |
| Consumer Staples                           | 2.75%       |
| Materials                                  | 2.26%       |
| Real Estate                                | 0.55%       |
| Top sub-sector                             | % of Assets |
| Software                                   | 17.42%      |
| Semiconductors & Semiconductor Equipment   | 13.48%      |
| Interactive Media & Services               | 9.68%       |
| Broadline Retail                           | 6.50%       |
| Technology Hardware, Storage & Peripherals | 5.24%       |
| Entertainment                              | 3.51%       |
| Capital Markets                            | 3.49%       |
| Aerospace & Defense                        | 3.27%       |
| Financial Services                         | 3.22%       |
| Health Care Equipment & Supplies           | 2.96%       |
| Pharmaceuticals                            | 2.90%       |
| Hotels, Restaurants & Leisure              | 2.75%       |
| Health Care Providers & Services           | 2.62%       |
| Specialty Retail                           | 2.10%       |
| Life Sciences Tools & Services             | 1.99%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

24.76%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of socially sustainable investments?

8.90%

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.84% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton All China Equity Fund (the “Fund”)

Legal Entity Identifier: 254900LVVE1QC2PFO824

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.98% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the “Investment Manager”) attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund’s benchmark (MSCI China All Shares 10/40 Index), referenced in Appendix F to the Prospectus (“the Benchmark”),
- Implementing negative screens as part of its investment process, as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager’s analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager’s proprietary ESG methodology;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                               | 2025                                     | 2024   |
| Sustainability KPI Name                                                                                       | Value                                    | Value  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology      | 19.78%                                   | 19.60% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology        | 56.10%                                   | 55.10% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology | 22.15%                                   | 21.50% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology        | 0.00%                                    | 0.00%  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology        | 17.04%                                   | 20.20% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 37.78%                                   | 42.60% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 43.20%                                   | 33.40% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%                                    | 0.00%  |
| The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology              | 5.57                                     | 4.80   |
| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 3.77                                     | 3.20   |

### ... And compared to previous periods?

Compared to the previous periods, the sustainability indicators were generally similar.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement are considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                       | Sector                 | % of Assets | Country |
|-------------------------------------------|------------------------|-------------|---------|
| TENCENT HOLDINGS LTD                      | Communication Services | 9.50%       | China   |
| ALIBABA GROUP HOLDING LTD                 | Consumer Discretionary | 7.56%       | China   |
| Xiaomi Corp                               | Information Technology | 6.64%       | China   |
| Meituan                                   | Consumer Discretionary | 4.71%       | China   |
| CHINA CONSTRUCTION BANK CORP              | Financials             | 4.38%       | China   |
| KWEICHOW MOUTAI CO LTD                    | Consumer Staples       | 3.67%       | China   |
| Focus Media Information Technology Co Ltd | Communication Services | 3.60%       | China   |
| CHINA YANGTZE POWER CO LTD                | Utilities              | 3.06%       | China   |
| Trip.Com Group Ltd                        | Consumer Discretionary | 2.80%       | China   |
| BYD CO LTD                                | Consumer Discretionary | 2.74%       | China   |
| Jiangsu Hengrui Pharmaceuticals Co Ltd    | Health Care            | 2.71%       | China   |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 53.98%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.02% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.98%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 53.98% of its net assets in sustainable investments, with a 13.11% allocation of net assets towards environmental objectives and 40.87% towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 98.02%                                 | 96.21%                    |
| #2 Other                            | 1.98%                                  | 3.79%                     |
| #1A Sustainable                     | 53.98%                                 | 55.00%                    |
| #1B Other E/S characteristics       | 44.04%                                 | 41.21%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 13.11%                                 | 9.00%                     |
| Social                              | 40.87%                                 | 46.00%                    |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                          | % of Assets |
|-----------------------------------------------------|-------------|
| Consumer Discretionary                              | 36.35%      |

| Independent Power & Renewable Electricity Producers | 3.06%       |
| Pharmaceuticals                                     | 2.71%       |
| Electronic Equipment, Instruments & Components      | 2.69%       |
| Entertainment                                       | 2.50%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 13.11% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 40.87% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 1.98% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") attained these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings to exclude them from the Fund's investment universe dedicated to corporate bonds;
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");

- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio were constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 61.68 and the investment universe average base ESG score was 50.85 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promotes.

In this regard, the Fund allocated 94.24% of its assets to investments aligned with the E/S characteristics. This included currency-related derivatives.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated.

| Sustainability KPI Name                                                                                                 | Sustainability KPI historical comparison |       |       |
|-------------------------------------------------------------------------------------------------------------------------|------------------------------------------|-------|-------|
|                                                                                                                         | 2025                                     | 2024  | 2023  |
|                                                                                                                         | Value                                    | Value | Value |
| The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions | 0.00%                                    | 0.00% | 0.00% |
| Share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact                | 0.00%                                    | N/A   | N/A   |

#### ● **... And compared to previous periods?**

The values were in line with previous periods.

#### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

#### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

#### ----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

#### ----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points

Social violations by the investee countries were monitored as part of the Investment Manager's proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments   | Sector           | % of Assets | Country     |
|-----------------------|------------------|-------------|-------------|
| MALAYSIA GOVT         | Government Bonds | 20.59%      | Malaysia    |
| INDIA GOVERNMENT BOND | Government Bonds | 19.89%      | India       |
| KOREA TREASURY BOND   | Government Bonds | 19.34%      | South Korea |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

94.24% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (5.76%) included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
| Proportion of Investments           | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 94.24%                                 | 95.50%                    | 96.41%                    |
| #2 Other                            | 5.76%                                  | 4.50%                     | 3.59%                     |
| #1A Sustainable                     | N/A                                    | N/A                       | N/A                       |
| #1B Other E/S characteristics       | 94.24%                                 | 95.50%                    | 96.41%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |
| Other environmental                 | N/A                                    | N/A                       | N/A                       |

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector       | % of Assets |
|------------------|-------------|
| Government Bonds | 94.24%      |
| Top sub-sector   | % of Assets |
| Government Bonds | 94.24%      |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 5.76% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives for which there were no minimum environmental or social safeguards.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund did not own any corporate bonds over the reference period

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

| <input type="radio"/> YES                                                                                                | <input checked="" type="radio"/> NO                                                                                                                                                                                             |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI All Country Asia ex-Japan 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                               | 2025                                     | 2024   |

| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 4.46                                     | 4.00   |

### ... And compared to previous periods?

For comparisons to previous periods, please refer to the table provided in the previous question.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                       | Sector                 | % of Assets | Country                   |
|-------------------------------------------|------------------------|-------------|---------------------------|

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 77.40%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

99.17% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.83%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 77.40% of its net assets in sustainable investments, with a 26.44% allocation of net assets towards environmental objectives and 50.96% towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 99.17%                                 | 98.80%                    |
| #2 Other                            | 0.83%                                  | 1.20%                     |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 26.44% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 50.96% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 0.83% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FRANKLIN  
TEMPLETON

## Environmental and/or social characteristics

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

| <div> <div></div> <div>YES</div> </div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <div> <div></div> <div>NO</div> </div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology:

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

|                                                                                                               | Sustainability KPI historical comparison |        |

### ... And compared to previous periods?

Compared to the previous periods, the sustainability indicators were generally similar.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                           | Sector                 | % of Assets | Country                   |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 55.59%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

95.54% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.46%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 55.59% of its net assets in sustainable investments, with a 12.61% allocation of net assets towards environmental objectives and 42.98% towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 95.54%                                 | 96.20%                    |
| #2 Other                            | 4.46%                                  | 3.80%                     |
| #1A Sustainable                     | 55.59%                                 | 52.60%                    |
| #1B Other E/S characteristics       | 39.95%                                 | 43.60%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 12.61%                                 | 13.80%                    |
| Social                              | 42.98%                                 | 38.80%                    |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                     | % of Assets |
|------------------------------------------------|-------------|
| Information Technology                         | 23.45%      |
| Financials                                     | 21.71%      |
| Consumer Discretionary                         | 18.81%      |
| Health Care                                    | 7.86%       |
| Industrials                                    | 7.15%       |
| Consumer Staples                               | 5.24%       |
| Materials                                      | 5.24%       |
| Communication Services                         | 2.23%       |
| Real Estate                                    | 2.19%       |
| Utilities                                      | 1.67%       |
| Top sub-sector                                 | % of Assets |
| Semiconductors & Semiconductor Equipment       | 11.05%      |
| Banks                                          | 10.24%      |
| Electronic Equipment, Instruments & Components | 6.30%       |
| IT Services                                    | 6.09%       |
| Financial Services                             | 6.07%       |
| Hotels, Restaurants & Leisure                  | 4.98%       |
| Transportation Infrastructure                  | 4.46%       |
| Broadline Retail                               | 4.27%       |
| Insurance                                      | 4.25%       |
| Specialty Retail                               | 4.22%       |
| Food Products                                  | 4.13%       |
| Textiles, Apparel & Luxury Goods               | 3.50%       |
| Pharmaceuticals                                | 2.75%       |
| Biotechnology                                  | 2.73%       |
| Chemicals                                      | 2.56%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 12.61% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 42.98% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 4.46% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund applied ESG exclusions further described in the section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton China A-Shares Fund (the “Fund”)

Legal Entity Identifier: 5493009XRQ09Z4RT5K40

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.31% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the

Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the “Investment Manager”) attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund’s benchmark (MSCI China A Onshore Index), referenced in Appendix F to the Prospectus (“the Benchmark”),
- Implementing negative screens as part of its investment process, as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager’s analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager’s proprietary ESG methodology;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                               | 2025                                     | 2024   |
| Sustainability KPI Name                                                                                       | Value                                    | Value  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology      | 28.68%                                   | 33.40% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology        | 34.66%                                   | 37.90% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology | 32.66%                                   | 20.60% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology        | 0.00%                                    | 0.00%  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology        | 13.34%                                   | 18.80% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 24.58%                                   | 36.20% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 58.08%                                   | 36.90% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%                                    | 0.00%  |
| The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology              | 5.74                                     | 4.80   |
| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 3.09                                     | 2.50   |

### ... And compared to previous periods?

For comparisons to previous periods, please refer to the table provided in the previous question

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement are considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                              | Sector                 | % of Assets | Country |
|--------------------------------------------------|------------------------|-------------|---------|
| CHINA CONSTRUCTION BANK CORPORATION              | Financials             | 9.45%       | China   |
| Midea Group Co., Ltd.                            | Consumer Discretionary | 6.92%       | China   |
| China Merchants Bank Co., Ltd.                   | Financials             | 5.45%       | China   |
| China Yangtze Power Co., Ltd.                    | Utilities              | 5.40%       | China   |
| FUYAO GLASS INDUSTRY GROUP CO., LTD.             | Consumer Discretionary | 5.31%       | China   |
| Kweichow Moutai Co., Ltd.                        | Consumer Staples       | 4.61%       | China   |
| Ping An Insurance (Group) Company of China, Ltd. | Financials             | 4.48%       | China   |
| Focus Media Information Technology Co., Ltd.     | Communication Services | 4.33%       | China   |
| Yantai China Pet Foods Co Ltd                    | Consumer Staples       | 4.11%       | China   |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 47.31%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

96.00% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.00%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 47.31% of its net assets in sustainable investments, with a 18.64% allocation of net assets towards environmental objectives and 28.67% towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 96.00%                                 | 91.87%                    |
| #2 Other                            | 4.00%                                  | 8.13%                     |

| Automobiles                                         | 2.70%       |
| Health Care Equipment & Supplies                    | 1.33%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 18.64% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 28.67% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 4.00% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

| <input type="radio"/> YES                                                                                                | <input checked="" type="radio"/> NO                                                                                                                                                                                             |

|                                                                                                                          | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the “Investment Manager”) attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund’s benchmark (MSCI China 10/40 Index), referenced in Appendix F to the Prospectus (“the Benchmark”),
- Implementing negative screens as part of its investment process, as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager’s analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager’s proprietary ESG methodology;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                               | 2025                                     | 2024   |

| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 37.42%                                   | 38.40% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 44.19%                                   | 38.30% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%                                    | 0.00%  |
| The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology              | 5.55                                     | 4.90   |
| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 3.77                                     | 3.20   |

### ... And compared to previous periods?

Compared to the previous periods, the sustainability indicators were generally similar.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                          | Sector                 | % of Assets | Country   |
|----------------------------------------------|------------------------|-------------|-----------|

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 60.07%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

96.97% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.03%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 60.07% of its net assets in sustainable investments, with a 10.46% allocation of net assets towards environmental objectives and 49.61% towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 96.97%                                 | 95.78%                    |
| #2 Other                            | 3.03%                                  | 4.22%                     |
| #1A Sustainable                     | 60.07%                                 | 62.50%                    |
| #1B Other E/S characteristics       | 36.90%                                 | 33.28%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 10.46%                                 | 9.70%                     |
| Social                              | 49.61%                                 | 52.80%                    |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                     | % of Assets |
|------------------------------------------------|-------------|
| Consumer Discretionary                         | 40.50%      |
| Communication Services                         | 16.11%      |
| Financials                                     | 15.53%      |
| Information Technology                         | 8.93%       |

| Household Durables                             | 1.99%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 10.46% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 49.61% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 3.03% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") attained these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings to exclude them from the Fund's investment universe dedicated to corporate bonds;
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");

- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio were constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 50.55 and the investment universe average base ESG score was 49.02 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promotes.

In that regard, the Fund allocated 94.30% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency-related derivatives.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated.

| Sustainability KPI Name                                                                                                  | Sustainability KPI historical comparison |       |       |
|--------------------------------------------------------------------------------------------------------------------------|------------------------------------------|-------|-------|
|                                                                                                                          | 2025                                     | 2024  | 2023  |
|                                                                                                                          | Value                                    | Value | Value |
| The shares of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions | 0.00%                                    | 0.00% | 0.00% |
| The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact             | 0.00%                                    | N/A   | N/A   |

### ● **... And compared to previous periods?**

The values were in line with previous periods.

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

#### -----**How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

#### -----**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries were monitored as part of the Investment Manager's proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

The Fund effectively held 0% in corporate bonds over the reference period.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                   | Sector           | % of Assets | Country       |
|---------------------------------------|------------------|-------------|---------------|
| Uruguay Government International Bond | Government Bonds | 9.31%       | Uruguay       |
| MALAYSIA GOVT                         | Government Bonds | 8.90%       | Malaysia      |

| INTERNATIONAL BANK RECON & DEV        | Government Bonds | 5.09%       | United States |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

94.30% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (5.70%) includes liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector                          | % of Assets |
|-------------------------------------|-------------|
| Government Bonds                    | 94.28%      |
| Communication Services              | 0.01%       |
| Top sub-sector                      | % of Assets |
| Government Bonds                    | 94.28%      |
| Wireless Telecommunication Services | 0.01%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 5.70% and consisted of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivative.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund effectively held 0% in corporate bonds over the reference period.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Emerging Markets ex-China Fund (the “Fund”)

Legal Entity Identifier: 254900RZ0VV5XKE48T32

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 85.63% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the “Investment Manager”) attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund’s benchmark (MSCI Emerging Markets ex China 10/40 Index), referenced in Appendix F to the Prospectus (“the Benchmark”),
- Implementing negative screens as part of its investment process, as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager’s analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager’s proprietary ESG methodology;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

| Sustainability KPI Name                                                                                       | Value  |
|---------------------------------------------------------------------------------------------------------------|--------|
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology      | 35.33% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology        | 52.45% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology | 10.12% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology        | 0.00%  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology        | 25.32% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 48.68% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 23.90% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%  |
| The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology              | 6.58   |
| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 5.23   |

### ... And compared to previous periods?

Not applicable.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was only made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-10-22 - 2025-06-30.

| Largest investments                          | Sector                 | % of Assets | Country                   |
|----------------------------------------------|------------------------|-------------|---------------------------|
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 9.31%       | Taiwan, Province Of China |
| NASPERS LIMITED                              | Consumer Discretionary | 5.14%       | South Africa              |
| HDFC BANK LIMITED                            | Financials             | 4.57%       | India                     |
| Samsung Electronics Co., Ltd.                | Information Technology | 4.35%       | South Korea               |
| Grupo Financiero Banorte, S.A.B. de C.V.     | Financials             | 4.06%       | Mexico                    |
| SK hynix Inc.                                | Information Technology | 4.04%       | South Korea               |
| ICICI BANK LIMITED                           | Financials             | 3.69%       | India                     |
| NAVER Corporation                            | Communication Services | 3.23%       | South Korea               |
| Itau Unibanco Holding S.A.                   | Financials             | 2.47%       | Brazil                    |
| Petroleo Brasileiro S.A. (Petrobras)         | Energy                 | 2.26%       | Brazil                    |
| MediaTek Inc.                                | Information Technology | 2.22%       | Taiwan, Province Of China |
| INFOSYS LIMITED                              | Information Technology | 2.19%       | India                     |
| BAJAJ FINANCE LIMITED                        | Financials             | 2.16%       | India                     |
| HYUNDAI MOTOR COMPANY                        | Consumer Discretionary | 2.07%       | South Korea               |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 85.63%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.90% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.10%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 85.63% of its net assets in sustainable investments, with a 27.73% allocation of net assets towards environmental objectives and 57.90% towards social objectives.

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                     | % of Assets |
|------------------------------------------------|-------------|
| Financials                                     | 30.16%      |
| Information Technology                         | 29.78%      |
| Consumer Discretionary                         | 11.57%      |
| Industrials                                    | 5.44%       |
| Health Care                                    | 4.34%       |
| Consumer Staples                               | 4.13%       |
| Materials                                      | 3.35%       |
| Utilities                                      | 3.30%       |
| Communication Services                         | 3.23%       |
| Energy                                         | 2.26%       |
| Real Estate                                    | 0.34%       |
| Top sub-sector                                 | % of Assets |
| Banks                                          | 24.86%      |
| Semiconductors & Semiconductor Equipment       | 15.57%      |
| Technology Hardware, Storage & Peripherals     | 5.33%       |
| Broadline Retail                               | 5.14%       |
| Hotels, Restaurants & Leisure                  | 4.35%       |
| Electronic Equipment, Instruments & Components | 3.69%       |
| IT Services                                    | 3.51%       |
| Health Care Providers & Services               | 3.50%       |

| Consumer Staples Distribution & Retail         | 2.66%       |
| Industrial Conglomerates                       | 2.56%       |
| Oil, Gas & Consumable Fuels                    | 2.26%       |
| Consumer Finance                               | 2.16%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 27.73% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 57.90% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 2.10% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Emerging Markets Fund (the “Fund”)

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.75% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the “Investment Manager”) attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund’s benchmark (MSCI Emerging Markets Index), referenced in Appendix F to the Prospectus (“the Benchmark”),
- Implementing negative screens as part of its investment process, as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the “ESG”) profile, as captured by the Investment Manager’s proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager’s analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager’s proprietary ESG methodology;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                               | 2025                                     | 2024   |
| Sustainability KPI Name                                                                                       | Value                                    | Value  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology      | 25.82%                                   | 22.80% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology        | 60.11%                                   | 59.50% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology | 12.34%                                   | 13.90% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology        | 0.00%                                    | 0.00%  |
| The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology        | 26.31%                                   | 28.40% |
| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 43.01%                                   | 35.80% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 28.93%                                   | 32.00% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%                                    | 0.00%  |
| The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology              | 6.49                                     | 6.40   |
| The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology                            | 4.53                                     | 4.10   |

### ... And compared to previous periods?

For comparisons to previous periods, please refer to the table provided in the previous question.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                          | Sector                 | % of Assets | Country                   |
|----------------------------------------------|------------------------|-------------|---------------------------|
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 9.99%       | Taiwan, Province Of China |
| ICICI BANK LIMITED                           | Financials             | 5.08%       | India                     |
| Prosus N.V.                                  | Consumer Discretionary | 4.77%       | Netherlands               |
| ALIBABA GROUP HOLDING LTD                    | Consumer Discretionary | 4.21%       | China                     |
| SAMSUNG ELECTRONICS CO LTD                   | Information Technology | 3.77%       | South Korea               |
| SK hynix Inc.                                | Information Technology | 3.66%       | South Korea               |
| Tencent Holdings Limited                     | Communication Services | 3.59%       | China                     |
| MediaTek Inc.                                | Information Technology | 2.85%       | Taiwan, Province Of China |
| HDFC BANK LIMITED                            | Financials             | 2.84%       | India                     |
| Petroleo Brasileiro S.A. (Petrobras)         | Energy                 | 2.49%       | Brazil                    |
| HON HAI PRECISION INDUSTRY CO., LTD.         | Information Technology | 2.23%       | Taiwan, Province Of China |
| Grupo Financiero Banorte, S.A.B. de C.V.     | Financials             | 2.16%       | Mexico                    |
| NAVER Corporation                            | Communication Services | 2.14%       | South Korea               |
| Samsung Life Insurance Co., Ltd.             | Financials             | 2.01%       | South Korea               |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 82.75%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.26% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.74%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes is not aligned with the promoted characteristics. Furthermore, the Fund invested 82.75% of its net assets in sustainable investments, with a 27.83% allocation of net assets towards environmental objectives and 54.91% towards social objectives.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 98.26%                                 | 96.25%                    |
| #2 Other                            | 1.74%                                  | 3.75%                     |
| #1A Sustainable                     | 82.75%                                 | 79.80%                    |
| #1B Other E/S characteristics       | 15.52%                                 | 16.45%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 27.83%                                 | 28.30%                    |
| Social                              | 54.91%                                 | 51.50%                    |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                                     | % of Assets |
|------------------------------------------------|-------------|
| Information Technology                         | 27.76%      |
| Financials                                     | 26.39%      |
| Consumer Discretionary                         | 13.96%      |
| Communication Services                         | 9.01%       |
| Industrials                                    | 7.92%       |
| Health Care                                    | 3.77%       |
| Consumer Staples                               | 3.24%       |
| Energy                                         | 2.71%       |
| Materials                                      | 2.31%       |
| Utilities                                      | 0.89%       |
| Real Estate                                    | 0.29%       |
| Top sub-sector                                 | % of Assets |
| Banks                                          | 20.33%      |
| Semiconductors & Semiconductor Equipment       | 16.83%      |
| Broadline Retail                               | 9.18%       |
| Interactive Media & Services                   | 7.96%       |
| Insurance                                      | 5.00%       |
| Technology Hardware, Storage & Peripherals     | 4.06%       |
| Electronic Equipment, Instruments & Components | 3.70%       |
| Machinery                                      | 3.40%       |
| Oil, Gas & Consumable Fuels                    | 2.71%       |
| IT Services                                    | 2.67%       |
| Hotels, Restaurants & Leisure                  | 2.49%       |
| Industrial Conglomerates                       | 2.18%       |
| Professional Services                          | 1.94%       |
| Beverages                                      | 1.77%       |
| Pharmaceuticals                                | 1.65%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 27.83% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 54.91% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 1.74% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology.
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund. The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

| Sustainability KPI Name                                                                                       | Sustainability KPI historical comparison |        |

| The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology          | 48.71%                                   | 48.70% |
| The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology   | 40.48%                                   | 42.50% |
| The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology          | 0.00%                                    | 0.00%  |

### ... And compared to previous periods?

Compared to the previous periods, the sustainability indicators were generally similar.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                           | Sector                 | % of Assets | Country                   |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 59.99%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.64% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.36%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 59.99% of its net assets in sustainable investments, with a 11.14% allocation of net assets towards environmental objectives and 48.85% towards social objectives.

| Investment Category                 | Asset Allocation historical comparison |                           |

| Top sub-sector                                 | % of Assets |
| Banks                                          | 10.62%      |
| Semiconductors & Semiconductor Equipment       | 8.59%       |
| Financial Services                             | 5.72%       |
| IT Services                                    | 5.52%       |
| Electronic Equipment, Instruments & Components | 5.22%       |
| Hotels, Restaurants & Leisure                  | 4.59%       |
| Health Care Providers & Services               | 4.25%       |
| Pharmaceuticals                                | 4.21%       |
| Textiles, Apparel & Luxury Goods               | 4.11%       |
| Transportation Infrastructure                  | 3.93%       |
| Capital Markets                                | 3.77%       |
| Broadline Retail                               | 3.65%       |
| Specialty Retail                               | 3.43%       |
| Food Products                                  | 3.34%       |
| Insurance                                      | 3.09%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 11.14% sustainable investments with an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The Fund invested in 48.85% sustainable investments with a social objective.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 2.36% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund applied ESG exclusions further described in the section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

**FRANKLIN  
TEMPLETON**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

## Sustainable investment objective

| <input checked="" type="checkbox"/> YES                                                                                             | <input type="checkbox"/> NO                                                                                                                                                                                        |

|                                                                                                                                     | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>                                                                                                      |

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

- 50%+ of revenues: 85.79
- 25-49% of revenues: 10.02
- 10-24% of revenues: 0.0

- 0-9% of revenues: 0.0
- Cash: 4.20

Portfolio breakdown by internal ESG rating (%)

- AAA: 27.40
- AA: 54.86
- A: 13.54
- BBB: 0.00
- BB: 0.00
- B: 0.00
- CCC: 0.00
- Cash: 4.20

The Fund did not use derivatives to attain its sustainable investment objective. Additionally, the Fund did not use a reference benchmark to attain its sustainable investment objective.

## ● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of the sustainable investment objective are:

1. exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security; and
2. exposure to companies with alignment to the United Nations Sustainable Development Goals ("UN SDGs").

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

1. Portfolio breakdown by contribution to positive outcome area (%):

Social

- Basic Needs: 14.02
- Wellbeing: 16.00
- Decent Work: 28.85

Environmental

- Healthy Ecosystems: 0.00
- Climate Stability: 36.45
- Resource Security: 0.48

Cash: 4.20

2. Portfolio breakdown by alignment to the UN SDGs (%):

- SDG 1: No Poverty, 4.55
- SDG 3: Good Health and Well-Being, 12.41
- SDG 7: Affordable and Clean Energy, 2.00
- SDG 8: Decent Work and Economic Growth, 24.06
- SDG 9: Industry, Innovation, and Infrastructure, 31.25
- SDG 10: Reduced Inequalities, 12.80
- SDG 11: Sustainable Cities and Communities, 0.27
- SDG 12: Responsible Consumption and Production, 0.48
- SDG 13: Climate Action, 7.98
- Cash: 4.20

| Sustainability KPI Name                                                                                                                                                                           | Sustainability KPI historical comparison |        |        |

|                                                                                                                                                                                                   | 2025                                     | 2024   | 2023   |
|                                                                                                                                                                                                   | Value                                    | Value  | Value  |
| Exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security | 95.80%                                   | 95.60% | 95.48% |
| Exposure to companies with alignment to the UN SDGs.                                                                                                                                              | 95.80%                                   | 95.60% | 95.48% |

## ● **... And Compared to Previous Periods?**

Here is a comparison of this year's average figures vs. last year's figures:

1. Portfolio breakdown by contribution to positive outcome area (%):

Social

- Basic Needs: 14.02 (14.3)
- Wellbeing: 16.00 (13.4)

- Decent Work: 28.85 (27.5)

#### Environmental

- Healthy Ecosystems: 0.0 (0.0)
- Climate Stability: 36.45 (39.6)
- Resource Security: 0.48 (0.8)

Cash: 4.20 (4.5)

#### 2. Portfolio breakdown by alignment to the UN SDGs (%):

- SDG 1: No Poverty, 4.55 (4.9)
- SDG 3: Good Health and Well-Being, 12.41 (12.8)
- SDG 7: Affordable and Clean Energy: 2.00 (0.0)
- SDG 8: Decent Work and Economic Growth, 24.06 (22.2)
- SDG 9: Industry, Innovation, and Infrastructure, 31.25 (33.7)
- SDG 10: Reduced Inequalities, 12.80 (10.0)
- SDG 11: Sustainable Cities and Communities, 0.27 (0.0)
- SDG 12: Responsible Consumption and Production, 0.48 (0.8)
- SDG 13: Climate Action, 7.98 (11.2)
- Cash: 4.20 (4.4)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Do No Significant Harm ("DNSH") assessment has been integrated into the strategy through environmental, social and governance ("ESG") minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Managers examined negative externalities by screening for severe environmental and social controversies through third party Environmental, Social and Governance data provided by MSCI). All stocks had to pass the ESG minimum standards set for DNSH i.e., they did not exhibit severe environmental or social controversies that had not been resolved or without a positive forward-looking view. Additionally, negative externalities were captured and formed part of the Fund's Intentionality pillar assessment as defined below to ensure there were no severe negative environmental or social externalities.

Lastly, as part of their DNSH test for the Fund, the Investment Managers (i) applied exclusions and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment with the relevance and materiality of the PAI indicators varying across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis and hence all holdings qualified sustainable investments.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, the Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights).

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As part of the research process, the Investment Managers adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Managers took a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Managers and defined below, the Investment Managers monitored and engaged to encourage the company to adequately set emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold has been set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified three companies where further analysis was required. On these three names, the Investment Managers have conducted deeper research and continued to dialogue with each company to further understand their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund did not invest in companies that do not observe the main international conventions. Except for cases referred to in section above (where exceptions can be made following the Investment Manager's further analysis), if MSCI has deemed a company in violation of UNGC Principles, the Fund did not invest in the company.

This condition was met.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Managers' controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

This condition was met.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2024-07-01 – 2025-06-30.

| Largest investments                       | Sector                 | % of Assets | Country                   |
|-------------------------------------------|------------------------|-------------|---------------------------|
| TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD | Information Technology | 9.20%       | Taiwan, Province Of China |

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 95.80%.

### What was the asset allocation?

95.80% of the portfolio contributed to the sustainable investment objective of the Fund, measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period. The remaining portion (4.20%) did not contribute to the sustainable investment objective and consisted of liquid assets held for liquidity purposes of the Fund. The Fund did not utilize derivatives during the reporting period.

| Investment Category | Asset Allocation historical comparison |                           |                           |

| Software                                            | 1.70%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

### What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The Fund committed to a minimum 25% of sustainable investments with an environmental objective aligned with the SFDR. Using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period, 36.93% of the portfolio was invested in companies with sustainable environmental objectives that are

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

not aligned with EU Taxonomy. These investments could be aligned with the Taxonomy Regulation, but the Investment Managers are not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

For avoidance of doubt, all companies in the portfolio are required to meet either a social or environmental sustainable objective under sustainable investment definition of SFDR. The allocation has been disclosed in this report.

## What was the share of socially sustainable investments?

The Fund committed to a minimum 25% of sustainable investments with a social objective. Using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period, 58.87% of the portfolio is invested in companies that are socially sustainable investments, across the three social positive outcome areas.

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Not sustainable" was 4.20% and comprised of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes of the Fund.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under "#2 Not sustainable" and the applicable minimum safeguards do not affect the delivery of the sustainable investment objectives of the Fund on a continuous basis.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy can be summarized as follows:

1. the Fund only invested in companies which (i) scored a minimum percentage of net contribution on the "Alignment Pillar", and (ii) scored an A or above on the combined 3-pillar ESG assessment; and
2. the Fund did not invest in companies which according to the Investment Managers' analysis:
  - Repeatedly and/or seriously violate the UNGC Principles, without positive perspective;
  - Manufacture or distribute nuclear weapons or controversial weapons defined as anti-personnel mines, biological & chemical weaponry, depleted uranium, and cluster munitions or those that manufacture components intended for use in such weapons. Companies that derive more than 5% revenue from any other weapons will also be excluded;
  - Manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds 5%;
  - Derive more than 5% of their revenue from thermal coal extraction or unconventional oil & gas extraction;
  - Derive more than 5% of their revenue from gambling or adult entertainment;
  - Which appears as excluded on the Norges Bank Investment Management (NBIM) exclusion list.

Ensuring the binding elements have been applied to portfolio selection and monitoring, the Fund has been able to attain its sustainable investment objective.

## How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.46% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, environmental positive outcomes (e.g., reduction of greenhouse gas emissions, waste management, natural resource conservation, energy use) as well as social positive outcomes (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity).

The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good and improving environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 97.09% of its assets to investments aligned with E/S characteristics.

Each company holding was assigned a measurable improvement target, whose achievement will contribute to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The Fund also has a minimum allocation of 15% of its portfolio to sustainable investments with an environmental objective and 5% of its portfolio to sustainable investments with a social objective. Each sustainable investment is contributing to one of the above positive outcome areas.

The Fund also has a minimum allocation of 1% to sustainable investments with an environmental objective aligned with the EU Taxonomy, which is included in the minimum 15% allocation to sustainable investments with an environmental objective.

In this regard, the Fund allocated 62.46% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental and social outcomes, and the Fund's EU Taxonomy alignment was 7.03%.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund. No reference benchmark has been designated with the purpose of attaining the environmental or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                                                                                                       | Sustainability KPI historical comparison |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|---------|
|                                                                                                                                                                                                               | 2025                                     | 2024    |
|                                                                                                                                                                                                               | Value                                    | Value   |
| Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")                                                                 | 62.46%                                   | 55.00%  |
| Number of investee companies with which the Investment Manager engages                                                                                                                                        | 41.00                                    | 42.00   |
| Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology                                                                                                     | 1.30%                                    | 4.58%   |
| Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology                                                                                                   | 66.97%                                   | 70.02%  |
| Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology                                                                                                         | 31.72%                                   | 25.40%  |

| Percentage of investee companies held providing non-compensation benefits                                                                                                                                     | 100.00%                                  | 74.00%  |

### ... And compared to previous periods?

The Fund has slightly higher exposure to sustainable investments aligned with UN SDGs. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative. Other indicators were similar to the prior period.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments of the Fund also contributed to the environmental objectives of the EU Taxonomy Regulation.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
  - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting this criterion as of 30 June 2025. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative.

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage them to set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting these criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments      | Sector                 | % of Assets | Country        |
|--------------------------|------------------------|-------------|----------------|
| SSE PLC                  | Utilities              | 4.43%       | United Kingdom |
| CNH INDUSTRIAL NV        | Industrials            | 3.90%       | United Kingdom |
| VEOLIA ENVIRONNEMENT SA  | Utilities              | 3.76%       | France         |
| Sanofi SA                | Health Care            | 3.59%       | France         |
| STANDARD CHARTERED PLC   | Financials             | 3.52%       | United Kingdom |
| SWISS RE AG              | Financials             | 3.31%       | Switzerland    |
| ING GROEP NV             | Financials             | 3.29%       | Netherlands    |
| INFINEON TECHNOLOGIES AG | Information Technology | 3.22%       | Germany        |
| DEUTSCHE TELEKOM AG      | Communication Services | 3.20%       | Germany        |
| UNILEVER PLC             | Consumer Staples       | 3.19%       | United Kingdom |
| PERSIMMON PLC            | Consumer Discretionary | 2.97%       | United Kingdom |
| CARREFOUR SA             | Consumer Staples       | 2.88%       | France         |
| LLOYDS BANKING GROUP PLC | Financials             | 2.76%       | United Kingdom |
| REXEL SA                 | Industrials            | 2.72%       | France         |
| BP PLC                   | Energy                 | 2.70%       | United Kingdom |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 62.46%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.09% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.91%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 62.46% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
|                                     | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 97.09%                                 | 96.21%                    |
| #2 Other                            | 2.91%                                  | 3.79%                     |
| #1A Sustainable                     | 62.46%                                 | 69.11%                    |
| #1B Other E/S characteristics       | 34.63%                                 | 27.10%                    |
| Taxonomy-aligned                    | 7.03%                                  | 6.71%                     |
| Other environmental                 | 36.01%                                 | 48.64%                    |
| Social                              | 19.42%                                 | 13.76%                    |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                               | % of Assets |
|------------------------------------------|-------------|
| Industrials                              | 20.49%      |
| Financials                               | 15.34%      |
| Consumer Discretionary                   | 11.29%      |
| Health Care                              | 10.19%      |
| Consumer Staples                         | 8.87%       |
| Utilities                                | 8.19%       |
| Information Technology                   | 7.06%       |
| Materials                                | 6.75%       |
| Energy                                   | 5.71%       |
| Communication Services                   | 3.20%       |
| Top sub-sector                           | % of Assets |
| Banks                                    | 9.57%       |
| Machinery                                | 6.39%       |
| Oil, Gas & Consumable Fuels              | 5.71%       |
| Semiconductors & Semiconductor Equipment | 5.66%       |
| Pharmaceuticals                          | 5.44%       |
| Textiles, Apparel & Luxury Goods         | 4.73%       |
| Electric Utilities                       | 4.43%       |
| Metals & Mining                          | 4.20%       |
| Multi-Utilities                          | 3.76%       |
| Insurance                                | 3.31%       |
| Diversified Telecommunication Services   | 3.20%       |
| Personal Care Products                   | 3.19%       |
| Household Durables                       | 2.97%       |
| Consumer Staples Distribution & Retail   | 2.88%       |
| Health Care Equipment & Supplies         | 2.85%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 7.03% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The investments contributed primarily to the climate change mitigation objective, along with very small contributions to water, circular economy, and pollution prevention. The Taxonomy-alignment of the investments mentioned above has not been subject to an assurance provided by an auditor or a third-party.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- ☐ Yes
- ☒ No

### What was the share of investments made in transitional and enabling activities?

This has not been calculated.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage aligned with the EU Taxonomy increased slightly from the prior year.

|          | Percentage of taxonomy-aligned investments including sovereign bonds |       |
|----------|----------------------------------------------------------------------|-------|
|          | 2025                                                                 | 2024  |
| Turnover | 7.03%                                                                | 6.71% |
| CapEx    | 9.66%                                                                | 8.82% |
| OpEx     | 7.16%                                                                | 5.12% |

|          | Percentage of taxonomy-aligned investments excluding sovereign bonds |       |
|----------|----------------------------------------------------------------------|-------|
|          | 2025                                                                 | 2024  |
| Turnover | 7.03%                                                                | 6.71% |
| CapEx    | 9.66%                                                                | 8.82% |
| OpEx     | 7.16%                                                                | 5.12% |

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## ● What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 36.01%.

## ● What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 19.42%.

## ● What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 2.91% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for the placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager's proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager's proprietary ESG methodology, subject to the active engagement of those companies to drive an improvement in the scoring to a 3 within a three-year timeframe. No companies held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies reporting a deterioration in the targeted KPI. Failure to report an improvement within two full years after the first publication of the KPI deterioration will result in divestment. There were no prior reference periods to measure improvement, as this Fund adopted its current policies in 2025;
- The Fund committed to divest from companies that make no progress against sustainability KPIs over a three-year period. There were no prior reference periods to measure improvement;
- The Fund applied the ESG exclusions as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

The Fund committed to conduct engagement with a minimum of 50% of the portfolio, measured both in number of names and in AuM. During the past year, The Investment Manager engaged with 13 holdings, or 32% of equity assets under management (as of 30 June 2025) to influence positive change related to sustainability issues. The Investment Manager also conducted engagements for change or to develop insights during the year across 38 holdings representing 92% of equity assets under management (as of 30 June 2025). The latter included discussions to confirm the Fund's improvement targets were appropriate and consistent with the company's strategy.

## How did this financial product perform compared to the reference benchmark?

|                                                                                                                                                         |                 |

Legal Entity Identifier: 549300CMJWP941Z22112

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.91% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, environmental positive outcomes (e.g., reduction of greenhouse gas emissions, waste management and natural resource conservation, energy use) as well as social positive incomes (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity). The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good and improving environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 98.09% of its assets to investments aligned with E/S characteristics.

Each company holding was assigned a measurable improvement target, whose achievement will contribute to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The Fund also has a minimum allocation of 15% of its portfolio to sustainable investments with an environmental objective and 5% of its portfolio to sustainable investments with a social objective. Each sustainable investment is contributing to one of the above positive outcome areas.

The Fund also has a minimum allocation of 1% to sustainable investments with an environmental objective aligned with the EU Taxonomy, which is included in the minimum 15% allocation to sustainable investments with an environmental objective.

In this regard, the Fund allocated 57.91% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to environmental (33.02%) and social (19.72%) outcomes, and the Fund's EU Taxonomy alignment was 5.17%.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                                                                                     | Value   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")                                               | 57.91%  |
| Number of investee companies with which the Investment Manager engages                                                                                                                      | 41.00   |
| Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology                                                                                   | 1.31%   |
| Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology                                                                                 | 66.96%  |
| Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology                                                                                       | 31.73%  |
| Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology                                                                                          | 0.00%   |
| Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology                                                                                  | 0.00%   |
| Percentage of investee companies with GHG Intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of MSCI Europe | 1.81%   |
| Percentage of investee companies with no females on the board of directors                                                                                                                  | 0.00%   |
| Percentage of investee companies with emissions reduction targets                                                                                                                           | 100.00% |
| Percentage of investee companies having implemented a human rights policy                                                                                                                   | 100.00% |
| Weighted average percent of women in the workforce                                                                                                                                          | 36.28%  |
| Percentage of investee companies conducting employee satisfaction surveys                                                                                                                   | 100.00% |
| Percentage of investee companies providing non-compensation benefits                                                                                                                        | 100.00% |

### ... And compared to previous periods?

Not applicable as there were no prior reference periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund contributed to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice, and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments of the Fund also contributed to the environmental objectives of the EU Taxonomy Regulation.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### How were the indicators for adverse impacts on sustainability factors taken into account?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines;
- Exposure to controversial weapons.
  - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting this criterion as of 30 June 2025. The one holding with GHG intensity in the bottom quintile and above half the benchmark level has established emissions reduction targets validated by the Science Based Targets initiative.

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage them to set emission reduction targets and disclose their climate change strategies.

- Board gender diversity
- Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will take all reasonable means to divest within a 6-month period. There were no companies meeting these criteria.
- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-06-25 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                 | Sector                 | % of Assets | Country         |
|-------------------------------------|------------------------|-------------|-----------------|
| NOVO NORDISK A/S                    | Health Care            | 4.63%       | Denmark         |
| SSE PLC                             | Utilities              | 4.62%       | United Kingdom  |
| CNH Industrial N.V.                 | Industrials            | 3.75%       | United Kingdom  |
| LVMH MOET HENNESSY LOUIS VUITTON SE | Consumer Discretionary | 3.66%       | France          |
| UNILEVER PLC                        | Consumer Staples       | 3.53%       | United Kingdom  |
| STANDARD CHARTERED PLC              | Financials             | 3.34%       | United Kingdom  |
| ING Groep N.V.                      | Financials             | 3.16%       | The Netherlands |
| Swiss Re AG                         | Financials             | 2.95%       | Switzerland     |
| CARREFOUR SA                        | Consumer Staples       | 2.92%       | France          |
| ASM International N.V.              | Information Technology | 2.87%       | The Netherlands |
| SANOFI SA                           | Health Care            | 2.84%       | France          |
| SMITH & NEPHEW PLC                  | Health Care            | 2.69%       | United Kingdom  |
| Euronext N.V.                       | Financials             | 2.68%       | The Netherlands |
| VINCI SA                            | Industrials            | 2.64%       | France          |
| THALES SA                           | Industrials            | 2.62%       | France          |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 57.91%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

98.09% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.91%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 57.91% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                               | % of Assets |
|------------------------------------------|-------------|
| Industrials                              | 22.08%      |
| Financials                               | 16.34%      |
| Health Care                              | 11.73%      |
| Consumer Discretionary                   | 10.72%      |
| Consumer Staples                         | 8.59%       |
| Information Technology                   | 7.43%       |
| Materials                                | 6.95%       |
| Utilities                                | 6.14%       |
| Energy                                   | 5.61%       |
| Communication Services                   | 2.50%       |
| Top sub-sector                           | % of Assets |
| Banks                                    | 9.08%       |
| Pharmaceuticals                          | 7.47%       |
| Semiconductors & Semiconductor Equipment | 7.43%       |
| Oil, Gas & Consumable Fuels              | 5.61%       |
| Machinery                                | 5.25%       |
| Textiles, Apparel & Luxury Goods         | 4.89%       |
| Electric Utilities                       | 4.62%       |
| Capital Markets                          | 4.31%       |
| Aerospace & Defense                      | 4.27%       |
| Health Care Equipment & Supplies         | 4.25%       |
| Personal Care Products                   | 3.53%       |
| Electrical Equipment                     | 3.48%       |
| Insurance                                | 2.95%       |
| Consumer Staples Distribution & Retail   | 2.92%       |
| Construction & Engineering               | 2.64%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 5.17% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The investments contributed primarily to the climate change mitigation objective, along with very small contributions to water, circular economy, and pollution prevention. The Taxonomy-alignment of the investments mentioned above has not been subject to an assurance provided by an auditor or a third-party.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- ☐ Yes
- ☒ No

### What was the share of investments made in transitional and enabling activities?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 33.02%.

**What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 19.72%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 1.91% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for the placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager's proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager's proprietary ESG methodology, subject to the active engagement of those companies to drive an improvement in the scoring to a 3 within a three-year timeframe. No company(s) held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. The one holding with GHG intensity in the bottom quintile and above half the benchmark level has established emissions reduction targets validated by the Science Based Targets initiative. No other companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies reporting a deterioration in the targeted KPI, and to divest from companies who make no progress against sustainability KPIs over a three-year period. The Fund completed its first year tracking targeted KPI, and companies reporting a deterioration are now subject to engagement. The Fund will report on the results of this engagement next year;

The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund's pre-contractual disclosure.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Legal Entity Identifier: 549300E2K4E8O6FKNS31

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.91% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas (“GHG”) emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 97.41% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals (“UN SDGs”), are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth’s temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 28.91% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes.

The Fund does not commit to a minimum allocation of its portfolio to sustainable investments with a social objective. No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

### How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

|                                                                                                                                               | Sustainability KPI historical comparison |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                                                               | 2025                                     | 2024   |
| Sustainability KPI Name                                                                                                                       | Value                                    | Value  |
| Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs") | 28.91%                                   | 12.96% |
| Number of investee companies with which the Investment Manager engages                                                                        | 41.00                                    | 35.00  |

| Percentage of investee companies with no females on the board of directors                                                                    | 0.00%                                    | 0.00%  |

### ... And compared to previous periods?

The Fund increased its exposure to companies aligned with the United Nations Sustainable Development Goals over the period.

One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs") are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third-party global norms-based screening including UN Global Compact (UNGC) compliance, third party controversy scores, assessment of PAI and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process to review if investments cause significant harm to any sustainable investment objective. In addition, the Fund applied exclusions that further reduce the likelihood of issuers causing significant harm to be invested by the Fund.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to Controversial weapons.
  - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic. <https://franklin templetonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2025. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                 | Sector                 | % of Assets | Country        |
|-------------------------------------|------------------------|-------------|----------------|
| PAYPOINT PLC                        | Financials             | 4.23%       | United Kingdom |
| CNH INDUSTRIAL NV                   | Industrials            | 3.48%       | United Kingdom |
| SFC Energy AG                       | Industrials            | 3.34%       | Germany        |

| NOVO NORDISK A/S                    | Health Care            | 3.20%       | Denmark        |
| COATS GROUP PLC                     | Consumer Discretionary | 3.01%       | United Kingdom |
| Sanofi SA                           | Health Care            | 2.73%       | France         |
| WH SMITH PLC                        | Consumer Discretionary | 2.63%       | United Kingdom |
| NEWRIVER REIT PLC                   | Real Estate            | 2.32%       | United Kingdom |
| SSE PLC                             | Utilities              | 2.26%       | United Kingdom |
| BP PLC                              | Energy                 | 2.18%       | United Kingdom |
| Prosus NV                           | Consumer Discretionary | 2.08%       | Netherlands    |
| DASSAULT AVIATION SA                | Industrials            | 2.06%       | France         |
| LVMH MOET HENNESSY LOUIS VUITTON SE | Consumer Discretionary | 1.93%       | France         |
| GREGGS PLC                          | Consumer Discretionary | 1.91%       | United Kingdom |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 28.91%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

97.41% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.59%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging and/or efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 28.91% of its portfolio in sustainable investments.

|                                     | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 97.41%                                 | 95.18%                    |
| #2 Other                            | 2.59%                                  | 4.82%                     |
| #1A Sustainable                     | 28.91%                                 | 12.96%                    |
| #1B Other E/S characteristics       | 68.50%                                 | 82.22%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 28.91%                                 | 12.96%                    |
| Social                              | N/A                                    | N/A                       |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                               | % of Assets |
|------------------------------------------|-------------|
| Industrials                              | 21.20%      |
| Consumer Discretionary                   | 21.10%      |
| Financials                               | 13.97%      |
| Health Care                              | 8.17%       |

| Electric Utilities                       | 2.26%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 28.91%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 0%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 2.59% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No companies held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton European Small-Mid Cap Fund (the “Fund”)

Legal Entity Identifier: 549300U3RRXWK6GSP710

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.63% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas (“GHG”) emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 96.63% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals (“UN SDGs”), are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth’s temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 16.63% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes.

The Fund does not commit to a minimum allocation of its portfolio to sustainable investments with a social objective.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

### ● How did the sustainability indicators perform?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                                                                                                                   | Sustainability KPI historical comparison |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                                                                                                                                           | 2025                                     | 2024   |

### ... And compared to previous periods?

The Fund has increased its exposure to companies that are aligned to the United Nations Sustainable Development Goals.

6.98% of the Fund's equity weight was invested in companies with GHG intensity in the bottom 20% of their industry and greater than half the benchmark intensity. Each company has a quantitative emissions reduction target, two of which are validated by the Science Based Targets initiative. In addition, one company, representing 3.04% of the equity weight, has no emissions reduction target. The company is in the health care sector and has very low GHG intensity (<3 tons per million Euros in sales) and has committed to transition to 100% renewable energy across all its industrial sites by 2027.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive social and/or environmental outcomes. The three positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental areas, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and

Resource Security (preservation of natural resources through efficient and circular use).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
  - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Small-Mid Cap Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. 6.98% of the Fund was invested in companies with GHG intensity in the bottom 20% of their industry and greater than half the benchmark intensity. Each company has a quantitative emissions reduction target, two of which are validated by the Science Based Targets initiative..

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments      | Sector                 | % of Assets | Country        |
|--------------------------|------------------------|-------------|----------------|
| ROLLS-ROYCE HOLDINGS PLC | Industrials            | 3.86%       | United Kingdom |
| EURONEXT NV              | Financials             | 3.72%       | Netherlands    |

| GREGGS PLC               | Consumer Discretionary | 2.46%       | United Kingdom |
| Barratt Redrow PLC       | Consumer Discretionary | 2.36%       | United Kingdom |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 16.63%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

96.58% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.42%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 16.63% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
|                                     | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 96.58%                                 | 92.60%                    |
| #2 Other                            | 3.42%                                  | 7.40%                     |
| #1A Sustainable                     | 16.63%                                 | 13.29%                    |
| #1B Other E/S characteristics       | 79.95%                                 | 79.31%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 16.63%                                 | 13.29%                    |
| Social                              | N/A                                    | N/A                       |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                       | % of Assets |
|----------------------------------|-------------|
| Industrials                      | 33.35%      |
| Consumer Discretionary           | 16.26%      |
| Financials                       | 13.70%      |

| Textiles, Apparel & Luxury Goods | 2.58%       |
| Pharmaceuticals                  | 2.52%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 16.63%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 0%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 3.42% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for the placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No companies held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Small-Mid Cap Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ ☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 9.88% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, by using a proprietary environmental, social and governance (the "ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance, and excluding countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of the investment universe dedicated to supranational bonds of the Fund's portfolio was constructed by supranational issuers that have MSCI ESG ratings.

In addition, the Fund promoted positive environmental and/or social outcomes by investing at least 5% of its portfolio in green bonds, where the use of proceeds has been specified by the issuer and verified by a third party or Franklin Advisers, Inc. (the "Investment Manager"), to benefit underlying environmental projects.

The Fund's weighted average base ESG score was 63.50 and the investment universe average base ESG score was 53.92 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

In this regard, the Fund allocated 92.43% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency and interest rate-related derivatives.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators performed as anticipated.

| Sustainability KPI Name                                                                                      | Sustainability KPI historical comparison |       |        |
|--------------------------------------------------------------------------------------------------------------|------------------------------------------|-------|--------|
|                                                                                                              | 2025                                     | 2024  | 2023   |

| The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact | 0.00%                                    | N/A   | N/A    |
| The ESG score difference between the Fund's portfolio and the investment universe; and                       | 9.58                                     | 6.81  | 3.34   |
| The percentage of investments in green bonds.                                                                | 9.88%                                    | 9.92% | 10.28% |

### ... And compared to previous periods?

The values were in line with previous periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund invested 9.88% of its portfolio in green bonds, where the use of proceeds had been specified by the issuer, and verified by a third party or the Investment Manager, to benefit underlying environmental projects such as but not limited to:

- The efficient use of energy, raw materials, water and land;
- The production of renewable energy;
- The reduction of waste, greenhouse gas emissions and lower impact of economic activities on biodiversity; and
- The development of circular economy.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sovereign issuers, the relevant principal adverse impacts (the "PAIs") on social violations were assessed through a proprietary responsibility index that incorporated indicators on global cooperation, human rights, and civil liberties among others. For every sustainable investment targeted by the Investment Manager, an assessment of the materiality of PAIs to the underlying investment was made, documented and the probability of adverse impact was estimated. After this assessment, the Investment Manager determined whether an investment had no, low, moderate, severe or very severe adverse impact. The Investment Manager did not make investments that fell in the severe/very severe category.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments. While assessing eligible green bonds, the Investment Manager reviewed and documented the materiality of PAIs for the project.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries or supranational organisations. The Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

*The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

During the period, the following principal adverse impacts (the “PAIs”) were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                | Sector           | % of Assets | Country       |
|------------------------------------|------------------|-------------|---------------|
| NOTA DO TESOURO NACIONAL NTN       | Government Bonds | 9.58%       | Brazil        |
| TITULOS DE TESORERIA B             | Government Bonds | 9.36%       | Colombia      |
| MALAYSIA GOVT                      | Government Bonds | 8.52%       | Malaysia      |
| INTERNATIONAL BANK RECON & DEV     | Government Bonds | 7.64%       | United States |
| PANAMA REPUBLIC OF                 | Government Bonds | 5.51%       | Panama        |
| OMAN GOVERNMENT INTERNATIONAL BOND | Government Bonds | 5.43%       | Oman          |
| POLAND REPUBLIC OF                 | Government Bonds | 5.43%       | Poland        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 9.88%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

92.43% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (7.57%) included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 9.88% of its portfolio in sustainable investments over the reference period.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
|                                     | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 92.43%                                 | 89.42%                    | 94.22%                    |
| #2 Other                            | 7.57%                                  | 10.58%                    | 5.78%                     |
| #1A Sustainable                     | 9.88%                                  | 9.92%                     | 10.28%                    |
| #1B Other E/S characteristics       | 82.55%                                 | 79.50%                    | 83.94%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |
| Other environmental                 | 9.88%                                  | 9.92%                     | 10.28%                    |
| Social                              | N/A                                    | N/A                       | N/A                       |

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector       | % of Assets |
|------------------|-------------|
| Government Bonds | 92.43%      |
| Top sub-sector   | % of Assets |
| Government Bonds | 92.43%      |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 9.88% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy over the reference period.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What was the share of socially sustainable investments?

Not applicable.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 7.57% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives for which there were no minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds;
- The Fund invested more than 5% of the portfolio (9.88%) in green bonds qualifying as sustainable investments; and
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio is higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Global Bond Fund (the "Fund")

Legal Entity Identifier: 5SLKA4UT9B55J80BUH41

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ **NO**

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, by using a proprietary environmental, social and governance (the "ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio was constructed based on the universe of sovereign issuers with historic data of bond issuance, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universe dedicated to the supranational bonds of the Fund's portfolio was constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 62.71 and the investment universe average base ESG score was 53.92 over the reference period.

No reference benchmark was designated to attain the environmental and/or social characteristics promoted.

In this regard, the Fund allocated 84.02% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency and interest rate-related derivatives.

### How did the sustainability indicators perform?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as anticipated.

| Sustainability KPI Name                                                                                      | Sustainability KPI historical comparison |       |       |
|--------------------------------------------------------------------------------------------------------------|------------------------------------------|-------|-------|
|                                                                                                              | 2025                                     | 2024  | 2023  |

... And compared to previous periods?

The values were in line with previous periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries were monitored as part of Franklin Advisers, Inc. (the "Investment Manager")'s proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments              | Sector           | % of Assets | Country       |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

84.02% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (15.98%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, could not be aligned with the environmental and/or social characteristics promoted by the Fund.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

| Top sector       | % of Assets |
|------------------|-------------|
| Government Bonds | 84.02%      |
| Top sub-sector   | % of Assets |
| Government Bonds | 84.02%      |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 15.98% and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives. No minimum environmental and/or social safeguards have been put in place.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds; and
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

| <input checked="" type="checkbox"/> YES                                                                                             | <input type="checkbox"/> NO                                                                                                                                                                                        |

### To what extent was the sustainable investment objective of this financial product met?

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

To meet the sustainable investment objective, the Fund invested in companies that contribute towards climate change mitigation and adaptation as considered by the Paris Climate Agreement. In order to achieve the long-term global warming targets of the Paris Climate Agreement, the Fund pursued decarbonization through investments in solutions to reduce greenhouse gas emissions and in companies committed to aligning their own self-decarbonization trajectory with the 1.5-degree scenario.

The Fund did not use derivatives to attain its sustainable investment objective. Also, the Fund did not use a reference benchmark to attain its sustainable objective.

In this regard, 96.47% of the Fund's assets contributed to the sustainable investment objective.

#### How did the sustainability indicators perform?

The sustainable investment objective is considered as attained if:

1. The strategy invests in companies that reduce emissions, improve resource efficiency and limit the physical consequences of climate change. The Fund is invested in two main types of companies:

- **Solution providers:** More than 50% of the Fund is invested in companies with greater than 50% of revenues (or alternative metric such as assets) from directly or indirectly reducing emissions, resource use, climate related physical risk, e.g. renewable energy, energy efficiency, water and waste management, sustainable transportation, and sustainable forestry and agriculture.
- **Transitioning companies:** Up to 50% of the Fund is invested in companies with greater than 20% of revenues to directly or indirectly reducing emissions, resource use, and/or climate related physical risk, and are transitioning to solutions providers or enabling solutions companies through adjacent products and services.

2. The strategy's portfolio carbon impact is aligned with the Paris Climate Agreement. This is assessed using estimates of the avoided emissions resulting from climate solutions provided by companies in the strategy and the strategy's carbon intensity trajectory.

Avoided emissions are emissions that would have been released if a particular action or intervention had not taken place, which is why the Investment Manager refers to them as potentially avoided emissions. Emissions can be avoided through the use of a more efficient product or service, though this is conditional to consumer or market behaviour.

The potentially avoided emissions significantly exceeded the scope 1, 2 and 3 emissions.

The portfolio carbon intensity is projected to maintain a downward trajectory, based on company commitments and historical trends.

\*Please refer to the Fund's impact report for more details on calculation methodologies.

<https://www.franklintempleton.lu/download/en-lu/educational-material/d92b92b7-fbf5-4475-a00b-0edd483858ee/Templeton-global-climate-change-fund-quarterly-impact-report.pdf>

\*\*Carbon Intensity and Avoided Emissions Intensity were changed to Weighted Average Intensity to better align with the calculation methodology for the Principal Adverse Impact indicators in SFDR Annex 1. Previously, Carbon Intensity reflected the sum of Fund's ownership share, based on percent of equity market cap held, of the issuers' emissions divided by the sum of the Fund's ownership share of the issuers' sales. Avoided Emissions Footprint and Carbon Footprint are expressed as tCO<sub>2</sub>e/US\$1M EVIC. For June 30, 2023, this was reported as tCO<sub>2</sub>e/US\$1M invested. The calculation methodology remained the same, but we wished to clarify this represented the proportion of Enterprise Value Including Cash (EVIC).

| Sustainability KPI Name                                                                 | Sustainability KPI historical comparison |            |            |

... And Compared to Previous Periods?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund has slightly higher exposure to Sustainable Investments, due to lower cash. EU Taxonomy aligned revenues are higher, due to increases in reported alignment compared to the prior year.

The avoided emissions footprint and intensity are smaller than the prior period, due to lower estimated avoided emissions from holdings (energy efficiency solutions having a smaller impact due to lower carbon intensity of power generation in respective markets) and due to lower weights in companies with high avoided emissions. The latter is also consistent with a smaller amount of Renewable Energy generated by portfolio holdings compared to the prior period. The amount of avoided emissions varies significantly by company, so small changes in portfolio allocations can result in significant changes in the Fund's overall avoided emissions.

The Fund's total carbon footprint is lower due to lower scope 3 emissions footprint. The Funds weighted average carbon intensity (scope 1&2&3) is also lower.

The weighted average carbon intensity (scope 1&2) of current holdings has been reduced by a greater amount over the past five years compared to the prior period. The weighted average Fund carbon reduction target has also increased compared to the prior year. The portion of the portfolio with carbon reduction targets also increased.

### ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators and two additional indicators in its management of the Fund. The two additional indicators were:

- Environmental: Investments in companies without carbon emission reduction initiatives; and
- Social: Lack of a human rights policy.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Fund did not invest in companies that do not observe the main international conventions (UNGC Principles, Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund assessed and sought to mitigate the sustainability adverse impacts of investment decisions, such as a negative impact on the environment or employee safety, forced labour or bribery. Companies' strategies to reduce the adverse impact and increase the positive impact of their activities were incorporated into the ESG assessment and ratings, which may have influenced investment decisions. The Investment Manager worked to engage in efforts to address and mitigate these impacts.

For all companies, the Fund applies specific criteria to the following PAIs:

Greenhouse gas intensity;

Board gender diversity;

Exposure to fossil fuels;

Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises; and

Exposure to controversial weapons.

- Greenhouse gas intensity

As per Fund policy, companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World benchmark, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. There were no companies meeting these criteria.

- Board gender diversity

As per Fund policy, companies with no females on the board are addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest.

All companies had at least one female on the board, as of 30 June 2025. In addition, the Fund had greater board gender diversity than the benchmark, MSCI All Country World Index, and a level greater than 33%. The percent of women on board as of 30 June 2025 was 34.1%

- Exposure to fossil fuels

As per Fund policy, fossil fuel production activities were excluded, and companies that generated 5% or more of their revenues from oil services were excluded. The Fund also did not invest in companies that derived 5% of revenues or more from the generation of electricity from nuclear power, thermal coal or crude oil.

Among companies involved in power generation, the Investment Manager favoured companies with greater consumption and production of renewable energy. No portfolio companies have been structurally increasing production or capacity of coal-based or nuclear-based energy. All companies involved in power generation were increasing production or capacity of renewable energy sources or providing related dedicated equipment or services. All derived less than 50% of their revenues from electricity generation with a GHG intensity of more than 100 g CO<sub>2</sub>e/kWh. They also met at least one of the following criteria:

- \* Have a SBTi target set at well-below 2°C or 1.5°C, or have a SBTi 'Business Ambition for 1.5°C' commitment
- \* Have emissions intensity aligned with 1.5°C target based on a science-based alignment assessment
- \* Derive less than 5% of its revenues from non-renewable power or heat generation.
- \* Derive more than 50% of its revenues or CapEx from economic activities included in the EU Taxonomy or contribute to environmental or sustainable objectives.
- \* Their carbon intensity was lower than 374 gCO<sub>2</sub>/kWh in 2022, declining to 315 in 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund remained in compliance with its exclusion policy that prohibits investments in companies the Investment Manager considered to severely breach these international norms.

- Exposure to controversial weapons

The Fund remained in compliance with its exclusion policy that prohibits investments in cluster munitions, antipersonnel land mines and biological, chemical and nuclear weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is 2024-07-01 – 2025-06-30.

| Largest investments                     | Sector                 | % of Assets | Country        |
|-----------------------------------------|------------------------|-------------|----------------|
| SSE PLC                                 | Utilities              | 5.49%       | United Kingdom |

| Norsk Hydro ASA                         | Materials              | 3.24%       | Norway         |

**Asset allocation**  
describes the share  
of investments in  
specific assets.

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 96.47%.

### What was the asset allocation?

96.47% of the portfolio contributed to the sustainable investment objective of the Fund. The remaining portion (3.53%) did not contribute to the sustainable investment objective of the Fund and consisted of liquid assets held for liquidity purposes of the Fund.

|                     | Asset Allocation historical comparison |                           |                           |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 15.27% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The investments contributed primarily to the climate change mitigation objective, along with contributions to water, circular economy, and pollution prevention, of well below 1% each.

The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

## Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

## Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- ☐ Yes
- ☒ No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

This has not been calculated.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It increased to 15.27% from 12.31% in the prior period.

|          | Percentage of taxonomy-aligned investments including sovereign bonds |        |        |

| OpEx     | 15.80%                                                               | 9.18%  | 9.19%  |

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 81.20%.

● **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 0%

● **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 3.53% and comprised of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market Funds) held for liquidity purposes of the Fund. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for the placement of deposits met the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

1. The Fund reduced the investment universe by more than 20% by excluding companies with the worst climate scores according to the Investment Manager’s proprietary methodology.

2. The Investment Manager utilized its proprietary rating system to identify companies they believe are good stewards of their impact on social and environmental development. ESG ratings have been assigned for Environmental factors, Social factors and Governance factors, which are weighted based on industry relevance to produce an overall ESG rating. They consisted of five levels from 1 (best) to 5 (worst). Below the Fund’s portfolio breakdown by the ESG rating (excluding the assets qualifying as #2 Not sustainable):

1: (exceptional) 4.64%

2: (above average) 77.35%

3: (average) 18.01%

4: (poor) 0.00%

5: 0.00%

3. The Fund is bound to maintain a weighted average ESG rating higher than the average ESG rating of the companies in the investment universe, defined as MSCI ACWI Investable Market Index (the “MSCI ACWI IMI”), based on the MSCI ESG Rating, measured numerically by the MSCI ESG score. As of June 30, 2025, the Fund’s score of 7.70 exceeded the average for MSCI ACWI IMI of 5.54.

4. The Investment Manager continuously engaged with its portfolio companies. ESG engagement of the Investment Manager generally had one or more objectives:

- Develop insights into material financial, human and natural capital issues that could influence the Investment Manager's investment thesis
- Promote positive change that could lead to improved outcomes for shareholders and society

For more details on the Fund's engagement approach, please refer to the Stewardship & Sustainability Report. <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

5. The Fund did not invest in companies in violation of its exclusion policies, as outlined in the pre-contractual disclosure of the Fund.

6. The Fund considered all 14 mandatory PAIs, and two additional PAIs as part of investment analysis which included indicators on energy and water efficiency, pollution and biodiversity.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

# Templeton Global Fund (the “Fund”)

Legal Entity Identifier: 549300ERVWDEEGCMRK51

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.36% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, social impact (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity) as well as environmental impact (e.g., reduction of carbon emissions, waste management, natural resource conservation, energy use). The Investment Managers sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Managers as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds’ Investment Universe, defined as MSCI All Country World Investable Market Index.
- Committing to the exclusion of the bottom 20% of the Investment Universe based on ESG Score using the MSCI ESG Ratings Methodology

In this regard, the Fund allocated 95.33% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals (“UN SDGs”), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth’s temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 37.43% of its assets to environmentally sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes. The Fund also allocated 20.93% of its assets to socially sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive social outcomes.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Managers promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                                                                                                          | Sustainability KPI historical comparison |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|

| Share of investee companies having emissions reduction targets                                                                                                                                                   | 97.39%                                   | N/A    |

### ... And compared to previous periods?

The Fund continued to attain the environmental and social characteristics promoted, exceeding minimum criteria. Alignment with SDGs declined compared to last year due to an increase in industries considered to have more of a neutral impact on SDGs.

One holding has GHG Intensity in the bottom quintile of their industry and greater than half the level of MSCI All Country World Index. Such companies are required to establish emissions reduction targets. The company does have a target to achieve net zero by 2050 or sooner, which was validated by the Science Based Targets initiative.

### **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive social and/or environmental outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental areas, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Managers performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
  - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic, <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. 2.88% of assets were invested in Companies meeting this criterion, and the company has established emissions reduction targets.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

| Largest investments                       | Sector                 | % of Assets | Country                   |
|-------------------------------------------|------------------------|-------------|---------------------------|
| MICROSOFT CORP                            | Information Technology | 5.60%       | United States             |
| ASTRAZENECA PLC                           | Health Care            | 4.64%       | United Kingdom            |
| TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD | Information Technology | 3.70%       | Taiwan, Province Of China |
| ALPHABET INC                              | Communication Services | 3.59%       | United States             |
| UNITEDHEALTH GROUP INC                    | Health Care            | 3.07%       | United States             |
| SAP SE                                    | Information Technology | 3.04%       | Germany                   |
| WELLS FARGO & CO                          | Financials             | 3.02%       | United States             |
| CRH PLC                                   | Materials              | 2.75%       | Ireland                   |
| HCA HEALTHCARE INC                        | Health Care            | 2.69%       | United States             |
| Kenvue Inc                                | Consumer Staples       | 2.64%       | United States             |
| FREEPORT-MCMORAN INC                      | Materials              | 2.62%       | United States             |
| SUMITOMO MITSUI FINANCIAL GROUP INC       | Financials             | 2.55%       | Japan                     |
| NIKE INC                                  | Consumer Discretionary | 2.39%       | United States             |
| NVIDIA CORP                               | Information Technology | 2.30%       | United States             |
| TOKYO ELECTRON LTD                        | Information Technology | 2.28%       | Japan                     |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 58.36%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

95.33% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.67%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 58.36% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |
|-------------------------------------|----------------------------------------|---------------------------|
|                                     | 2025                                   | 2024                      |
|                                     | Proportion of Investments              | Proportion of Investments |
| #1 Aligned with E/S characteristics | 95.33%                                 | 95.08%                    |
| #2 Other                            | 4.67%                                  | 4.92%                     |
| #1A Sustainable                     | 58.36%                                 | 63.93%                    |
| #1B Other E/S characteristics       | 36.97%                                 | 31.15%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       |
| Other environmental                 | 37.43%                                 | 45.09%                    |
| Social                              | 20.93%                                 | 18.84%                    |

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                               | % of Assets |
|------------------------------------------|-------------|
| Information Technology                   | 24.92%      |
| Financials                               | 19.26%      |
| Health Care                              | 13.84%      |
| Consumer Discretionary                   | 8.49%       |
| Materials                                | 8.03%       |
| Communication Services                   | 6.72%       |
| Industrials                              | 6.21%       |
| Consumer Staples                         | 3.66%       |
| Energy                                   | 2.61%       |
| Utilities                                | 1.60%       |
| Top sub-sector                           | % of Assets |
| Semiconductors & Semiconductor Equipment | 12.32%      |
| Banks                                    | 12.06%      |
| Software                                 | 10.45%      |
| Pharmaceuticals                          | 6.03%       |
| Health Care Providers & Services         | 5.77%       |
| Interactive Media & Services             | 4.55%       |
| Capital Markets                          | 3.66%       |
| Textiles, Apparel & Luxury Goods         | 3.35%       |
| Metals & Mining                          | 3.32%       |
| Construction Materials                   | 2.75%       |
| Personal Care Products                   | 2.64%       |
| Machinery                                | 2.64%       |
| Oil, Gas & Consumable Fuels              | 2.61%       |
| Insurance                                | 2.26%       |
| Wireless Telecommunication Services      | 2.17%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 37.43%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 20.93%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 4.67% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Managers applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Managers, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No company held as of 30 June 2025 scored a 4;
- The Fund excluded the bottom 20% of the Investment Universe based on the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund maintained a weighted average ESG rating of 7.12, which is higher than the average ESG rating of the companies in the Investment Universe, 5.54, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. 2.88% of assets were invested in Companies meeting this criterion, and the company has established emissions reduction targets. No other companies held as of 30 June 2025 met this criterion
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Global Leaders Fund (the “Fund”)

Legal Entity Identifier: 549300F2SVSQKV30T396

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 45.94% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.

In this regard, the Fund allocated 95.49% of its assets to investments aligned with E/S characteristics, 33.80% of its assets to sustainable investments with an environmental objective, and 12.14% to sustainable investments with a social objective. The Fund converted to Article 8 status on 26 June 2025.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

### How did the sustainability indicators perform?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities. Companies in the bottom quintile of their industry sector on GHG intensity all have established quantitative emissions reduction targets, and most have targets validated by the Science Based Targets initiative. The Fund was converted to Article 8 status as of May 2025.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                              | Value  |
|--------------------------------------------------------------------------------------------------------------------------------------|--------|
| Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs") | 45.94% |
| Number of investee companies with which the Investment Manager engages                                                               | 43.00  |
| Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology                            | 2.70%  |
| Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology                          | 62.27% |
| Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology                                | 35.03% |
| Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology                                   | 0.00%  |
| Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology                           | 0.00%  |
| Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector                                      | 21.63% |
| Weighted average base ESG score of the portfolio as measured by MSCI ESG Rating Methodology                                          | 6.54   |
| Average ESG score of the Fund's Investment Universe, as measured by MSCI ESG Rating Methodology                                      | 5.54   |
| Share of investee companies with no females on the board of directors                                                                | 0.00%  |
| Share of investee companies having emissions reduction targets                                                                       | 97.82% |

### ... And compared to previous periods?

Not applicable as there were no prior reference periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund contributed to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice, and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
  - Board gender diversity;
  - Violations of UNGC or OECD Guidelines;
  - Exposure to controversial weapons.
- Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World Index, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. There were no companies meeting this criterion as of 30 June 2025. Companies in the bottom quintile of their industry sector on GHG intensity all have established quantitative emissions reduction targets, and most have targets validated by the Science Based Targets initiative.

The Fund targeted decreasing greenhouse gas intensity and emissions reduction targets, engaging with companies to encourage them to align their business models with science based long term goals of net-zero emissions, set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-06-26 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                          | Sector                 | % of Assets | Country        |
|----------------------------------------------|------------------------|-------------|----------------|
| MICROSOFT CORPORATION                        | Information Technology | 7.47%       | United States  |
| NVIDIA CORPORATION                           | Information Technology | 6.31%       | United States  |
| AMAZON.COM, INC.                             | Consumer Discretionary | 6.04%       | United States  |
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 4.89%       | Taiwan         |
| SAFRAN SA                                    | Industrials            | 3.98%       | France         |
| ROLLS-ROYCE HOLDINGS PLC                     | Industrials            | 3.40%       | United Kingdom |
| META PLATFORMS, INC.                         | Communication Services | 3.36%       | United States  |
| Airbus SE                                    | Industrials            | 3.13%       | Netherlands    |
| SALESFORCE, INC.                             | Information Technology | 3.05%       | United States  |
| WELLS FARGO & COMPANY                        | Financials             | 2.99%       | United States  |
| HCA HEALTHCARE, INC.                         | Health Care            | 2.86%       | United States  |
| SAP SE                                       | Information Technology | 2.77%       | Germany        |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 45.94%

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

95.49% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.51%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives used for hedging, efficient portfolio management and investment purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 45.94% of its portfolio in sustainable investments.

**In which economic sectors were the investments made?**

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                               | % of Assets |
|------------------------------------------|-------------|
| Information Technology                   | 28.31%      |
| Industrials                              | 20.38%      |
| Financials                               | 11.57%      |
| Consumer Discretionary                   | 11.40%      |
| Communication Services                   | 11.20%      |
| Health Care                              | 7.34%       |
| Materials                                | 3.88%       |
| Consumer Staples                         | 0.94%       |
| Energy                                   | 0.48%       |
| Top sub-sector                           | % of Assets |
| Software                                 | 15.40%      |
| Semiconductors & Semiconductor Equipment | 12.90%      |
| Aerospace & Defense                      | 11.53%      |
| Interactive Media & Services             | 8.90%       |
| Broadline Retail                         | 6.04%       |
| Banks                                    | 6.02%       |
| Pharmaceuticals                          | 3.51%       |
| Industrial Conglomerates                 | 3.43%       |
| Textiles, Apparel & Luxury Goods         | 3.27%       |
| Capital Markets                          | 3.26%       |
| Health Care Providers & Services         | 2.86%       |
| Construction Materials                   | 2.43%       |
| Construction & Engineering               | 2.40%       |
| Diversified Telecommunication Services   | 2.29%       |
| Financial Services                       | 2.28%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 33.80%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 12.14%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 4.51% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging, efficient portfolio management and investment purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. 0 companies held as of 30 June 2025 scored an overall 4;
- The Fund maintained a weighted average ESG rating of 6.54, higher than the average ESG rating of the companies in the Investment Universe, 5.54, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Global Total Return Fund (the "Fund")

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics which include:

- for sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- for corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro-ESG Index (the "TGM-ESG") to:

- screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reach 10% of the Fund's investment universe dedicated to sovereign bonds; and
- commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager sought to attain these characteristics by using MSCI ESG ratings to:

- screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings and exclude them from the Fund's investment universe dedicated to corporate bonds; and
- commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio has been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- with no current debt outstanding;
- recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- which do not have any debt in issuance denominated in euro or US dollar and does not have a local custodian entity

- meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- any country where foreign ownership of sovereign bonds is not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio was constructed by issuers that have MSCI ESG ratings.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics that the Fund promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated.

| Sustainability KPI Name                                                                                      | Value |
|--------------------------------------------------------------------------------------------------------------|-------|
| The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions    | 0.00% |
| The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact | 0.00% |
| The ESG score difference between the Fund's portfolio and the investment universe                            | 6.43  |

### ● **... And compared to previous periods?**

Not applicable.

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

#### ----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

#### ----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are considered for corporate issuers:

violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;

For Sovereigns:

- exposure to controversial weapons; and
- revenues from fossil fuels

for corporate bonds:

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises
- Exposure to controversial weapons

Revenues from fossil fuels

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-05-21 - 2025-06-30.

| Largest investments            | Sector           | % of Assets | Country      |
|--------------------------------|------------------|-------------|--------------|
| Kerajaan Malaysia              | Government Bonds | 10.70%      | Malaysia     |
| Republic of India              | Government Bonds | 10.47%      | India        |
| Republica Federativa do Brasil | Government Bonds | 10.32%      | Brazil       |
| Republic of South Africa       | Government Bonds | 6.75%       | South Africa |
| Arab Republic of Egypt         | Government Bonds | 5.43%       | Egypt        |
| Estados Unidos Mexicanos       | Government Bonds | 4.60%       | Mexico       |
| Republic of Kazakhstan         | Government Bonds | 4.56%       | Kazakhstan   |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

76.61% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (23.39%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector       | % of Assets |
|------------------|-------------|
| Government Bonds | 76.60%      |
| Top sub-sector   | % of Assets |
| Government Bonds | 76.60%      |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 23.39% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives, for which there were no minimum environmental or social safeguards.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, can be summarized as follows:

- the exclusion of countries and issuers that are subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC are excluded from the Fund's investment universe;
- the exclusion of government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reach 10% of the Fund's investment universe dedicated to sovereign bonds;
- the exclusion of corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings;
- the commitment to have a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- the commitment to have a weighted average base ESG score of the corporate bonds in the Fund's portfolio higher than the average base ESG score of the investment universe dedicated to corporate bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe was excluded.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ ☐ **YES**

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ ☒ **NO**

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.84% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Managers sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Managers as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.

In this regard, the Fund allocated 94.79% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 46.84% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive social and environmental outcomes.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

### How did the sustainability indicators perform?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Managers promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                                                                                                                  | Sustainability KPI historical comparison |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|
|                                                                                                                                                                                                                          | 2025                                     | 2024   |
| Value                                                                                                                                                                                                                    | Value                                    | Value  |
| Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")                                                                                     | 46.84%                                   | 38.34% |
| Number of investee companies with which the Investment Manager engages                                                                                                                                                   | 61.00                                    | 64.00  |
| Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology                                                                                                                | 2.29%                                    | 0.00%  |
| Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology                                                                                                              | 66.78%                                   | 61.96% |
| Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology                                                                                                                    | 30.93%                                   | 37.09% |
| Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology                                                                                                                       | 0.00%                                    | 1.05%  |
| Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology                                                                                                               | 0.00%                                    | N/A    |
| Percentage of investee companies with greenhouse gas intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of MSCI All Country World Index. | 1.99%                                    | 0.00%  |
| Weighted average base ESG score of the portfolio as measured by MSCI ESG Rating Methodology                                                                                                                              | 6.96                                     | 7.27   |
| Average ESG score of the Fund's Investment Universe as measured by MSCI ESG Rating Methodology                                                                                                                           | 5.54                                     | 5.39   |
| Share of investee companies with no females on the board of directors                                                                                                                                                    | 0.00%                                    | 0.00%  |
| Share of investee companies having emissions reduction targets                                                                                                                                                           | 98.21%                                   | N/A    |

### ... And compared to previous periods?

The Fund increased its exposure to companies aligned to the United Nations Sustainable Development Goals. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative. In addition, one holding, representing 1.79% of the equity weight, does not have emissions reduction targets, though it has very low carbon intensity of <4 tons per million Euros in sales.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Industry relevant impact indicators are compared to peers and the broad investment universe to identify potentially significant positive and negative impacts. The Investment Managers identified pertinent and significant sustainability risks and used its own qualitative judgement when reviewing the PAIs indicator data, where available, to assess whether investments cause any significant harm.

In addition, the Fund applied exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Managers performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

### **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
  - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic. <https://franklin templetonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2025. One holding had GHG intensity in the bottom quintile of its industry sector and emissions intensity greater than half that of the benchmark. The company has established emissions reduction targets validated by the Science Based Targets initiative.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                          | Sector                 | % of Assets | Country                   |
|----------------------------------------------|------------------------|-------------|---------------------------|
| MICROSOFT CORPORATION                        | Information Technology | 4.11%       | United States             |
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 3.04%       | Taiwan, Province Of China |
| ROLLS-ROYCE HOLDINGS PLC                     | Industrials            | 2.83%       | United Kingdom            |
| NVIDIA CORPORATION                           | Information Technology | 2.62%       | United States             |
| AMAZON.COM, INC.                             | Consumer Discretionary | 2.41%       | United States             |
| ASTRAZENECA PLC                              | Health Care            | 2.34%       | United Kingdom            |
| ALPHABET INC.                                | Communication Services | 2.30%       | United States             |

| UNITEDHEALTH GROUP INCORPORATED              | Health Care            | 2.30%       | United States             |
| Airbus SE                                    | Industrials            | 2.20%       | Netherlands               |
| BAE SYSTEMS PLC                              | Industrials            | 2.10%       | United Kingdom            |
| BOOKING HOLDINGS INC.                        | Consumer Discretionary | 2.08%       | United States             |
| WELLS FARGO & COMPANY                        | Financials             | 2.03%       | United States             |
| CNH Industrial N.V.                          | Industrials            | 2.01%       | United Kingdom            |
| UNILEVER PLC                                 | Consumer Staples       | 2.00%       | United Kingdom            |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 46.84%

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

94.79% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (5.21%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging and efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 46.84% of its portfolio in sustainable investments.

|                                     | Asset Allocation historical comparison |                           |

| Financial Services                         | 2.44%       |
| Technology Hardware, Storage & Peripherals | 2.19%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 28.38%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 18.46%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 5.21% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Managers applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Managers, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. The Fund maintained a weighted average ESG rating of 6.96 as of 30 June 2025, higher than the average ESG rating of the companies in the Investment Universe, 5.54, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Japan Fund (the "Fund")

Legal Entity Identifier: 549300H6F1GJEA2FHZ64

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.49% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' benchmark, which also represents its Investment Universe, defined as the Tokyo Stock Price Index (TOPIX).

In this regard, the Fund allocated 93.29% of its assets to investments aligned with E/S characteristics, 20.63% of its assets to sustainable investments with an environmental objective, and 6.86% to sustainable investments with a social objective.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

| Sustainability KPI Name                                                                                                              | Value  |
|--------------------------------------------------------------------------------------------------------------------------------------|--------|
| Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs") | 27.49% |
| Number of investee companies with which the Investment Manager engages                                                               | 29.00  |

| Sustainability KPI Name                                                                                                                                                  | Value  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology                                                                | 3.21%  |
| Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology                                                              | 60.20% |
| Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology                                                                    | 36.59% |
| Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology                                                                       | 0.00%  |
| Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology                                                               | 0.00%  |
| Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of the TOPIX | 2.05%  |
| Weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology                                                                             | 7.14   |
| Average ESG score of the Fund's Investment Universe, as measured by MSCI ESG Rating Methodology                                                                          | 5.55   |
| Share of investee companies with no females on the board of directors                                                                                                    | 0.00%  |

### ... And compared to previous periods?

Not applicable as there were no prior reference periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Fund contributed to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice, and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

### How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines;
- Exposure to controversial weapons.
  - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the TOPIX, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. 2.05% of assets were invested in Companies meeting this criterion, and these companies have established emissions reduction targets.

The Fund targeted decreasing greenhouse gas intensity and emissions reduction targets, engaging with companies to encourage them to align their business models with science based long term goals of net-zero emissions, set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-05-21 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                   | Sector                 | % of Assets | Country |
|---------------------------------------|------------------------|-------------|---------|
| EBARA CORPORATION                     | Industrials            | 7.06%       | Japan   |
| Mizuho Financial Group, Inc.          | Financials             | 5.86%       | Japan   |
| RYOHIN KEIKAKU CO., LTD.              | Consumer Discretionary | 5.40%       | Japan   |
| IHI Corporation                       | Industrials            | 4.97%       | Japan   |
| ASICS Corporation                     | Consumer Discretionary | 4.96%       | Japan   |
| GMO Payment Gateway, Inc.             | Financials             | 4.83%       | Japan   |
| SUGI HOLDINGS CO.,LTD.                | Consumer Staples       | 4.75%       | Japan   |
| TOYOTA MOTOR CORPORATION              | Consumer Discretionary | 4.75%       | Japan   |
| Tokyo Electron Limited                | Information Technology | 4.68%       | Japan   |
| Sumitomo Mitsui Financial Group, Inc. | Financials             | 4.43%       | Japan   |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 27.49%

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

93.29% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (6.71%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 27.49% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

 ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector                               | % of Assets |
|------------------------------------------|-------------|
| Industrials                              | 28.02%      |
| Consumer Discretionary                   | 21.52%      |
| Financials                               | 19.29%      |
| Information Technology                   | 8.24%       |
| Consumer Staples                         | 6.87%       |
| Communication Services                   | 6.74%       |
| Real Estate                              | 2.60%       |
| Top sub-sector                           | % of Assets |
| Machinery                                | 14.58%      |
| Banks                                    | 14.47%      |
| Consumer Staples Distribution & Retail   | 6.87%       |
| Construction & Engineering               | 6.12%       |
| Broadline Retail                         | 5.40%       |
| Textiles, Apparel & Luxury Goods         | 4.96%       |
| Financial Services                       | 4.83%       |
| Automobiles                              | 4.75%       |
| Semiconductors & Semiconductor Equipment | 4.68%       |
| Wireless Telecommunication Services      | 4.36%       |
| Specialty Retail                         | 3.41%       |
| Household Durables                       | 3.00%       |
| Real Estate Management & Development     | 2.60%       |
| Entertainment                            | 2.38%       |
| Industrial Conglomerates                 | 2.30%       |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 20.63%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 6.86%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 6.71% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. no company held scored a 4;
- The Fund maintained a weighted average ESG rating of 7.14, higher than the average ESG rating of the companies in the Investment Universe, 5.55, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the TOPIX (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. 2.05% of assets were invested in Companies meeting this criterion, and these companies have established emissions reduction targets. No other companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

# Templeton Sustainable Emerging Markets Local Currency Bond Fund (the "Fund")

Legal Entity Identifier: 549300JZLKKHCV5C9G20

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective?

☐ YES

- ☐ It made **sustainable investments with an environmental objective: 0.00%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective: 0.00%**

☒ NO

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.26% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. and Templeton Asset Management Limited (the "Investment Managers") attained these characteristics by using a proprietary environmental, social and governance ("ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debts of issuers that are in the bottom 10% based on MSCI ESG ratings and excluded them from the Fund's investment universe dedicated to corporate bonds; and
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance, and excluding issuers from countries:

- with no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in Euro or US dollar and did not have a local custodian entity

- meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of the investment universe dedicated to supranational bonds and corporate bonds of the Fund's portfolio was constructed by issuers that have MSCI ESG ratings.

In addition, the Fund promoted positive environmental and/or social outcomes by investing a minimum of 50% of its net assets in sustainable investments, all of which were use of proceeds bonds issued by sovereign issuers, with a minimum of 25% in green bonds.

The Fund's weighted average base ESG score was 55.33 and the investment universe average base ESG score was 49.02 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

In this regard, the Fund allocated 86.89% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency-related derivatives.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The sustainability indicators performed as anticipated. Note that the Fund increased its minimum commitments in sustainable investments to 50%, with a minimum of 25% in green bonds in June 2025. Although the quarterly averages were less than the new minimums, they were over 50% and 25%, respectively, as at 30 June 2025.

| Sustainability KPI Name                                                                                                 | Sustainability KPI historical comparison |        |        |
|-------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--------|--------|
|                                                                                                                         | 2025                                     | 2024   | 2023   |
|                                                                                                                         | Value                                    | Value  | Value  |
| The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions | 0.00%                                    | 0.00%  | 0.00%  |

### ... And compared to previous periods?

The values were in line with previous periods.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund invested 18.38% of its portfolio in green bonds over the reference period, where the use of proceeds had been specified by the issuer, and verified by a third party or the Investment Manager, to benefit underlying environmental projects such as but not limited to:

- The efficient use of energy, raw materials, water and land;
- The production of renewable energy;
- The reduction of waste, greenhouse gas emissions and lower impact of economic activities on biodiversity; and
- The development of circular economy.

The Fund also invested in social bonds, where the use of proceeds has been specified by the issuer to benefit underlying social objectives such as but not limited to:

- tackling inequalities and fostering social cohesion;
- social integration and community development;
- good labour relations;
- social protection of the most vulnerable community members, including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- universal access to basic social infrastructure, quality education and healthcare; or

investments in human capital, including disadvantaged communities.

**Principal adverse impacts** are the most significant negative

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

For sovereign issuers, the relevant principal adverse impacts (the "PAIs") on social violations were assessed through a proprietary responsibility index that incorporated indicators on global cooperation, human rights, and civil liberties among others. For every sustainable investment targeted by the Investment Manager, an assessment of the materiality of PAIs to the underlying investment was made, documented and the probability of adverse impact was estimated. After this assessment, the Investment Manager determined whether an investment had no, low, moderate, severe or very severe adverse impact. The Investment Manager did not make investments that fell in the severe/very severe category.

### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments. While assessing eligible green bonds, the Investment Manager reviewed and documented the materiality of PAIs for the project.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries or supranational organisations. The Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

## What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

| Largest investments                                   | Sector           | % of Assets | Country       |
|-------------------------------------------------------|------------------|-------------|---------------|
| Arab Republic of Egypt                                | Government Bonds | 8.57%       | Egypt         |
| Republic of India                                     | Government Bonds | 8.20%       | India         |
| Republica de Colombia                                 | Government Bonds | 6.84%       | Colombia      |
| Rzeczpospolita Polska                                 | Government Bonds | 5.94%       | Poland        |
| Republica Federativa do Brasil                        | Government Bonds | 5.16%       | Brazil        |
| Republic of Namibia                                   | Government Bonds | 4.66%       | Namibia       |
| Sultanate of Oman                                     | Government Bonds | 4.06%       | Oman          |
| International Bank for Reconstruction and Development | Government Bonds | 3.90%       | United States |
| Kerajaan Malaysia                                     | Government Bonds | 3.83%       | Malaysia      |

## What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 21.26%.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

93.69% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (6.31%) included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 21.26% of its portfolio in sustainable investments over the reference period.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

| Investment Category                 | Asset Allocation historical comparison |                           |                           |
|-------------------------------------|----------------------------------------|---------------------------|---------------------------|
|                                     | 2025                                   | 2024                      | 2023                      |
| Investment Category                 | Proportion of Investments              | Proportion of Investments | Proportion of Investments |
| #1 Aligned with E/S characteristics | 93.69%                                 | 93.51%                    | 92.15%                    |
| #2 Other                            | 6.31%                                  | 6.49%                     | 7.85%                     |
| #1A Sustainable                     | 21.26%                                 | 10.01%                    | 15.97%                    |
| #1B Other E/S characteristics       | 72.43%                                 | 83.50%                    | 76.18%                    |
| Taxonomy-aligned                    | N/A                                    | N/A                       | N/A                       |
| Other environmental                 | 18.38%                                 | 10.01%                    | 15.97%                    |
| Social                              | 2.88%                                  | N/A                       | N/A                       |

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

| Top sector       | % of Assets |
|------------------|-------------|
| Government Bonds | 93.69%      |
| Top sub-sector   | % of Assets |
| Government Bonds | 93.69%      |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>2</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Not applicable.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the**

## What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Regulation, 18.38% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy over the reference period.

Note that the Fund increased its minimum commitments to environmental objectives to 25% in June 2025. Although the quarterly average was less than the new minimum, it was over 25% as at 30 June 2025.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 2.88%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 6.31% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives for which there were no minimum environmental or social safeguards.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund invested more than 25% of the portfolio in green bonds qualifying as sustainable investments over the reference period; - Note that the Fund increased its minimum commitments to environmental objectives to 25% in June 2025. Although the quarterly average of 18.38% was less than the new minimum, it was over 25% as at 30 June 2025.
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund did not own corporate bonds over the reference period

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

### How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.
