Q3 2024

Q3 ended with a marked drop in inflation, signs of an economic slowdown and changes in monetary policies by the central banks. The US economy, which had surprised with its resilience for several quarters, started to show signs of weakness. The market has factored in the risk of recession. Europe, notably Germany, started to disappoint with a lack of dynamism translating into very sluggish growth. Financial markets, despite strong volatility in August, bounced back at the end of the quarter, fuelled by expectations of a cut in interest rates and the Chinese economy recovery plan. This quarter has also been marked by political uncertainty, above all the coming US elections, the ongoing conflict in Ukraine and the risk of all-out war in the Middle East. Gold hit record highs, above $2600 an ounce.

United States

The US economy showed signs of slowing and inflation continued to ease. The consumer price index (CPI) dropped from 3% in June to 2.5% in August on an annual basis and the PCE inflation measure used by the Federal Reserve (Fed) fell to 2.2% (2.7% for the core index). Forecasts indicate a return to the 2% target in 2025. The main change came from the labour market with worse-than-expected unemployment figures in August and signs of fragility persisting in September. Job creation slowed, while unemployment claims increased slightly, creating uncertainty about the strength of the US economy. Moreover, the manufacturing sector continued to contract, with the ISM index falling to 47.2 in August, marking the fifth consecutive month of contraction in activity. Household consumption also showed signs of slowing, particularly due to the drop in consumer confidence, impacted by fears of a downturn in the labour market.
The downward trend in inflation combined with a deterioration in the labour market convinced the Fed to change course. Its president, Jerome Powell, prepared people for this at the Jackson Hole Symposium. In September, the Fed reduced its key rates by 50 basis points, from 5.25% to 4.75%, confirming its intent to support the economy and ensure full employment.
The US elections on 5 November are adding a dose of uncertainty. Kamala Harris has successfully transitioned as successor to Joe Biden. She has given a new boost to the Democrat campaign and is now neck and neck with Donald Trump. The former president has been the victim of two assassination attempts, which has exacerbated tensions in an already deeply divided country. Candidate proposals, particularly on taxation, economic regulation and environmental policies, are being closely scrutinised by investors. The environmental policies proposed by Harris, and Trump's promise of tax cuts, could have a powerful influence on the country's economic trajectory.

Eurozone

In Europe Q3 saw consolidation of the recovery that began in the spring. However, growth remains modest. Eurozone GDP only advanced 0.6% in August, with significant divergence between the main economies. Forecast surveys such as the HCOB PMI (Hamburg Commercial Bank PMI) are now pointing to a contraction in activity with a negative shift in services. Germany, the eurozone's largest economy, continues to show signs of weakness, with near-zero growth and a sluggish industrial sector. The Bundesbank thinks that the economy is close to recession. The German manufacturing PMI continued its slump in August from 42.4 to 40.3. Things are more positive in France and Spain, where domestic consumption has sustained growth, above all in the tourism and consumer sectors (helped by the "Olympics effect" for France)
Eurozone inflation continued its downward trend, with an average rate of 2.2% in August, compared to 2.6% in July. Underlying inflation remains stable at 2.8% and the services sector remains the main source of inflationary pressure, whereas manufactured goods and energy are contributing to the decline. At the end of September, the French inflation figure was largely below expectations at 1.5% on an annual basis, compared to the 2% forecast by economists (the European measure).
Against this backdrop of weak growth and ongoing falling inflation, the European Central Bank (ECB) cut its key interest rates again in September, reducing the deposit rate from 3.75% to 3.5%. However, Christine Lagarde warned that the extent of future reductions would depend on how inflation evolved, and wage dynamics.

Emerging Markets

In China, data fell short of expectations in Q3, with industrial production growing 4.5% instead of the 4.7% expected in August, and retail sales disappointing. The real estate market remains the heart of the problem, with falling prices and declining transaction volumes. This situation is weighing on consumption and employment. In an attempt to revive depressed domestic demand, Beijing announced several strong measures at the end of September to stimulate mortgage credit, consumption and to support the Chinese stock market.
In India, activity remains dynamic with growth of 6.7% between April and June and an expected trajectory above 6% this year, but is lower than the previous year. Economic reforms and interior demand are supporting this dynamic, although inflationary pressures persist, particularly in the food sector. The other emerging markets posted contrasting results, particularly Latin America, where inflation remains a major headache. In Brazil the central bank wants to tighten financial conditions, contrary to the government's advice.

Rates

The third quarter of 2024 marked a turning point for bond markets with the start of the central bank rate-cutting cycle. In the US, bond yields fell, with the 10-year rate initially rising to 4.5% before falling straight back to around 3.75%. Yields on 2-year Treasury notes, which are more sensitive to Fed decisions, fell from 4.8% to 3.6% between June and September. This movement has been accelerated with disappointing employment data and the re-emergence of recession risk, with the market pricing in more Fed rate cuts. We are therefore seeing a steepening of the American yield curves as the Fed reduces its balance sheet and the market anticipates cuts in its key rates.
In Europe, rate-cutting moves have been less aggressive but the trend remains the same. The German 10-year rate fell back to around 2.1%, joined by the 2-year yield, while the French rate hovered below 3%, penalised by the downgrade in the country's credit rating, a notable deterioration in the 2024 deficit approaching 6.3% of GDP and strong uncertainty over the budget in the absence of a majority government. Rate spreads between European countries remained relatively stable, but the France-Germany spread jumped to around 80 basis points. Credit markets are still volatile, but performance has been positive. Investors are paying particular attention to balance sheet quality and margin developments, in an economic environment that is now more uncertain.

Equities

On the stock markets the quarter was marked by increased volatility, particularly in the technology sector. There was a short correction in early August following the unexpected rate hike by the Bank of Japan and disappointing US unemployment statistics. The semi-conductor sector also suffered a severe correction after the perceived disappointing results of Nvidia in August, one of the backbones of the sector. Moreover, doubts are being raised about the profitability of massive investments in AI. But the S&P 500 (in USD) continues its progression, supported by the health and consumer staples sectors (+20% since the start of the year). We are seeing a rebalancing of performance across sectors and styles.
In Europe, the Euro Stoxx 50 saw a sharp rise, thanks to a strong rebound in luxury goods stocks, driven at the end of the quarter by the Chinese economic recovery plan which suggests better data in terms of consumption. The banking sector continued its growth over the quarter against a background of steepening yield curves. The CAC 40 is slightly catching up at the end of the period, encouraged by the luxury sector. The German Dax 30 and the UK FTSE 100 finished the period up.
In Japan, share indices, weighed down the rapid revaluation of the yen and the mini stock-market crash at the beginning of August, following the surprise rate hike by the Bank of Japan, finished the period in sharp decline. After months of under-performing and indices being at their lowest for 5 years, Chinese stocks rebounded very strongly at the end of September, gaining 20% in a few sessions, following announcements by the central bank and market support measures. For its part, India continues breaking records, with a significant rise in the NIFTY 50, the main Indian share index, which was up 7.5% over the quarter.

Q4 2024

The fourth quarter of 2024 was marked by Donald Trump's Republican victory in the US and America's continued growth. This momentum is in contrast to the weakness in Europe and China. Central banks continued with their rate-reduction cycles while remaining vigilant about the risk of a resurgence of inflation. Geopolitical risks are still very present. Financial markets have generally continued their positive trends, and 2024 will ultimately be a good year for investors.

The figures stated in this report are historical and not necessarily indicative of future performance.

Macro Economy

US: political changeover and economic resilience

The US economy once again showed resilience in Q4, even if certain weaknesses persist. GDP growth bounced back by 2.8% in Q3, confirming its positive trend for 2024. Leading indicators, such as the ISM manufacturing index, remained in contraction territory at 48.4 in November, reflecting a lack of dynamism in industry, but improved in December (49.3). However, the services sector which had held up well until then, is showing signs of weakness. The ISM services index stood at 52.1 in November, down from the 56 recorded in October, disappointing for a consensus of 55.5. Consumption, a key driver of the economy, remains strong thanks to stable household incomes, but it faces persistent inflationary pressures. Consumer sentiment remains high, as shown by the Michigan Consumer Sentiment index, which rose 2.8 points in December compared to November. In the labour market, job creation significantly exceeded expectations, reaching 227,000 positions in November, demonstrating remarkable resilience and contributing to the positive consumer outlook. However, the unemployment rate rose slightly, reaching 4.2% (up 0.1% over the period), but remains under control.

The consumer price index stopped falling at the end of the year, rising to 2.6% in October and 2.7% in December, and underlying pressures remain high. But the Federal Reserve continued with its policy of gradually reducing rates, lowering its key rate by 0.5 percentage points to 4.5% over the quarter. The Fed no longer considers the labour market to be an inflationary factor and that the contribution of housing is a delayed effect that will fade. But it still remains cautious as its favourite inflation measure, the Core PCE index, remains at 2.8%. The Fed is looking to return to neutral while monitoring the risk of a return of inflation with the implementation of customs and immigration policies by the new Trump administration.

Europe: weak growth and political instability

Europe continues to navigate a gloomy economic environment, marked by weakened external demand, growing trade tensions, internal economic divergences and relative political instability. Growth momentum improved with the publication of Eurozone GDP for Q3 confirmed as being up 0.9% year-on-year. The labour market continued to improve with the Eurozone unemployment rate at 6.3%. Leading indicators (HCOB) for the manufacturing sector in the Eurozone remained contracted and were below expectations when released at the end of the year. There was also disappointment regarding services, which are heading for a short-term slowdown. Germany remains in recession for the second consecutive year, with GDP contracting by 0.3% year-on-year in Q3. The industrial sector, the mainstay of the German economy, is facing sluggish demand, exacerbated by trade tensions with China and the US. The automotive sector has been particularly affected, and is witnessing increasing job cuts. Olaf Scholz's government has lost its majority, leading to new legislative elections on 23 February, 2025. In France, the "Olympics effect" has faded, giving way to political uncertainty. Forecasts for the public deficit continue to deteriorate, reaching 6.1% of GDP in 2024. The Barnier government, which failed to pass the 2025 budget, has been criticised. French debt was ultimately downgraded by Moody's a few hours after the nomination of F. Bayrou as prime minister.
While inflation ticked up from 2% in October to 2.3% in November (annual variation of the harmonised price index) the European Central Bank lowered its key rates by 50 basis points over the quarter, bringing the deposit rate to 3.00%. The Bank of England lowered its key rate by 25 basis points to 4.75%.

Emerging markets:

In China, the government continued its support for the real estate sector, focussing its efforts on cleaning up bank balance sheets and local public finances. However, the weakness in the real estate sector continues to weigh on household confidence. China is also confronted with the risk of deflation (inflation at 0.3% in October then 0.2% in November, year-on-year) as export momentum runs out of steam and could deteriorate further with a rise in US customs tariffs with Donald Trump's return to power. This environment continues to put the brakes on growth, and it will probably be lower than the 5% target.
In India overall economic momentum remains positive (supported by major investments in infrastructure) despite disappointing Q3 2024 GDP of 5.4% compared to the expectation of 6.5%. Tensions in the labour market and a slowdown in some strategic sectors such as technology, are reducing the outlook for growth.
In Brazil, sustained growth continues, leading the International Monetary Fund to increase its forecast for 2024 from 2.1% to 3%. The central bank, facing a resurgence in inflation, has raised its interest rates 50 points to bring the Selic rate to 12%.

Financial Markets

Bond Markets: Divergent trends between the US and Europe

In the US, Treasury bond yields continued to rise, reaching 4.58% at the end of the period. This trend is explained by the resilience of the US economy, and anticipation of a widening in the budget deficit, linked to the announcements of tax cuts by the future president, Donald Trump, as well as the risk of a return to inflation in 2025. 2-year, short-term rates have continued along a similar path, climbing to 4.36% in December, and reflecting a persistent inflationary environment, which limited the Fed's cycle of rate cuts.
In Europe the disparity is significant, against a background of a faster-than-expected decline in inflation and weak growth, suggesting additional rate cuts by the ECB. German 10-year bond yields moved back to 2.1%, while French bonds (OATs) reached 2.9%, before going back up to 3.20% at the end of the period. The spread between French and German bonds widened exceeding 80 basis points after the vote of censure of the Barnier government. Conversely, the spread between Italian and Spanish sovereign bond rates and those of Germany has narrowed, leading to a shift in French debt. Eurozone short-term rates are volatile: in Germany they fluctuated throughout the quarter, stabilising at 2.09% in December, while French rates ended the quarter at 2.28%. These movements reflect adjustments in the face of economic divergences between the member states and the accommodative policy of the ECB.

Share Markets: contrasting performances across the world

In the US stock market indices reached new highs, driven by expectations of a tax policy and deregulation favourable to American companies, and the performance of technology stocks. The S&P 500 crossed the 6,000-point threshold before dropping back, posting a gain in USD of 3.03% over the quarter. Mega Caps soared more than 14%, strongly driving the market. The Nasdaq — particularly exposed to the Big Tech companies and to Artificial Intelligence — outperformed, rising 6.27% (in USD). The Republican victory in the elections led to significant international flows into US stocks. These performances illustrate the pursuit of "Trump Trade" and renewed confidence in the American economy, as well as investors being attracted to growth stocks.
In Europe, indices were punished by political uncertainty and disappointing economic data. The Eurostoxx 50 ended the quarter down 1.17% (in EUR). Sector divergences were marked and European giants (the "Granolas") fell 7.6%. The CAC 40 closed down 2.55% over the quarter, due to disappointing performances from the luxury goods and automotive sectors, combined with a discount linked to political uncertainty. The German DAX, more exposed to technology and financials, stood out with a noteworthy positive performance of 3.8%.
In Asia, the Nikkei 225 fell 5.6% (in USD) in the fourth quarter, following Yen volatility and the unpredictability of the Bank of Japan's choices. The rebound in Chinese shares that began at the end of September, after the announcement of significant measures to stabilise the real estate sector, continued to the beginning of October, then faded. Investors are now waiting for concrete action. Yet this rebound illustrates a return of confidence in Beijing's ability to stabilise its economy after several quarters of slowdowns.

2025 Outlook

The beginning of 2025 will be shaped by Donald Trump's early policies. Depending on whether he favours a fiscal axis (massive tax cuts) and the deregulation of certain sectors, or reinforced protectionist and migration policies, the economic implications could be very different. Against this background the central banks, the Fed in particular, will remain cautious, while investors will have to deal with uncertain economic outlooks and increased volatility in financial markets.

The figures stated in this report are historical and not necessarily indicative of future performance.

Q1 2025

The US economy showed signs of weakness in Q1 2025, while the Fed kept rates unchanged in the face of a return of inflationary pressures. This benefited Europe, with the ECB continuing to lower its headline rates while at the same time governments coordinated their stimulus efforts. China also announced a plan to stimulate consumption. Financial markets have been unsettled by Donald Trump's assumption of office and his sometimes contradictory decision-making. After having broken records, US share indices consolidated and underperformed Europe and China. Long-term interest rates performed strongly in the Eurozone and have remained stable in the United States.

United States

After a near-euphoric phase following the election of Donald Trump, the US economy has maintained a positive pace, but is clearly showing signs of weakness, disrupted by a flood of sometimes contradictory decisions from the new administration. March marked a turning point with a downturn in household confidence, wage stabilisation and a sharp rise in inflation expectations.

Economic growth indicators such as the ISM and S&P PMI are contrasting, although we witnessed a slight improvement in the manufacturing sector's outlook at the end of the quarter. However, the trade war started by Washington is reducing visibility for business. The unemployment rate remained stable at 4.1%, but wage increases have slowed, due to a reduction in the Federal civil service workforce and the expulsion of millions of illegal workers, which is maintaining pressure on low-skilled employment.

Against this uncertain backdrop, the Fed is procrastinating, choosing to keep key rates unchanged, much to the dismay of president Trump. However, faced with volatility on the bond market, it has slowed down the speed of a reduction in its balance sheet. The March-end release of the PCE core inflation rate, the Fed's favourite benchmark, exceeded expectations at 2.8% on an annual basis, which should encourage it not to cut rates in April. Markets are anticipating two to three rate cuts in the second half of 2025.

Europe

The European economy is facing significant challenges, with weak growth and signs of a downturn in several countries in Q1. The HCOB PMI survey still indicates a contraction in the manufacturing sector but the outlook is clearly improving in Germany where industry has been stagnating since the pandemic.

European leaders have maintained their cohesion in the face of American protectionist measures and the risk of it withdrawing its military support for Ukraine. In an historic development, just a few days after the German legislative elections (23 February), the barriers to public spending were lifted, and the future Chancellor Mertz (CDU), supported by a coalition with the SPD and the Greens, launched a vast recovery plan. Out of the announced €500 billion investment in infrastructure, €100 billion will go to defence, which is a radical change. This unprecedented budgetary stroke should bolster Germany's potential growth, and with it, that of the Eurozone. As a result, economists who revised down their forecasts in January, raised them again in March.

Inflation in the Eurozone appeared to have resumed its downward trend and the harmonised price index (from February, released in March) fell back to 2.3% (2.4% in January). Inflation is still driven by services (3.7%) but the contribution of energy is now low. Core inflation is now at 2.4% and should reach 2% by the end of the year. Noting inflation's downward trend, and despite the risks linked to the trade war with the US, the European Central Bank (ECB) lowered its rates by 50 basis points over the quarter, the deposit rate dropping from 3% to 2.5% against a backdrop of a slowdown in the Eurozone, while warning that it remains vigilant about how inflation will evolve.

The Bank of England (BoE) reduced its interest rates by 25 bp, bringing them back to 4.5%. The move follows downward revisions to growth forecasts, with the BoE lowering its projections for 2025 from 1.5% to 0.75%.

Asia

The Japanese economy continued to show encouraging signs with an uptick in consumption and dynamic exports (before US tariffs), and inflation stabilising despite a falling index. The Bank of Japan maintained its headline rates unchanged but normalisation is not complete.

The economic outlook continues to deteriorate in China. Recent PMI data, down from December, indicates a further weakening of the economy. In response, the National People's Congress outlined plans to support the economy through budgetary spending, monetary support and the allocation of additional resources to domestic demand. These decisions involved an upward revision in the growth outlook for 2025 and 2026. Nevertheless, the risk of a slowdown in Q2, with weak consumption and the negative impact of US tariffs, should encourage the PBoC to act.

In India, the reduction in public spending has slightly reduced growth prospects. Inflation was lower than expected in February, at 3.6%, a deceleration from 4.3% in January. This decline is mainly due to a sharp slowdown in food prices. The Reserve Bank of India may cut rates earlier than expected, starting from April.

Equities

The MSCI ACWI fell 2% over the quarter (in USD). The rotation initiated at the end of 2024 in favour of Europe (MSCI Europe up 10%) and China (MSCI China up 14.5%) continued at the start of this year, while major US stocks were consolidating (MSCI USA down 5%).

After having posted a new high of 6,144 points on 19 February, the S&P 500 ended the quarter down 4.6% and the Nasdaq 100 was down 8%. On the other hand, European shares posted positive performance; the Eurostoxx 50 was up 7.2% and there was clear outperformance in Germany, the DAX 30 was up 11.3%. There was equally positive performance from emerging markets (MSCI EM up 2%), driven by China.

The underperformance by US shares can be explained by several factors: (1) a collapse in the values of the "Magnificent Seven", which lost close to 16% over the quarter; (2) the divergence of the paths of the Fed and the ECB and (3) the stimulus plans in Germany and China, which boosted profit expectations in the short and medium term. Lastly, the prospect of a ceasefire in Ukraine could lower the risk premium on European assets and lead to markets repositioning.

Moreover, the avalanche of sometimes contradictory announcements from Donald Trump generated increased volatility, pushing the VIX up to 22% (+ 5 points). Investors have revised their forecasts in the face of new trade tariffs, which has led to a fall in the automotive sector, particularly in Japan and Korea (Nikkei down 11%). In response to the risk of the US withdrawing from Ukraine, massive investment in rearming Europe, notably the ReArm Europe plan for €800 billion, has shored up the defence sector.

Bonds

The first quarter was marked by high volatility in interest rates, with long-term rates in the Eurozone rising in March, while US yields generally fell. We are witnessing a convergence of long-term rates.

Yields on 2- and 10-year US Treasury bonds, which had risen sharply in late 2024, fell by 36 bp each, finishing at 3.8% and 4.2% respectively, as investors now anticipate a decline in growth.

In the Eurozone the downward trend of interest rates has reversed after the announcement of an increase in the German budget deficit and the expectation of a rise in bond issues. 10-year Bund rates rose by more than 37 bp, but the short end remained anchored at 2%, in anticipation of the ECB's key rate cuts. The steepening of the Eurozone curves has therefore increased. Spreads remain stable with an 11 bp narrowing of the spread between the French OAT and the German 10-year Bund. Credit initially proved resilient in this period of sovereign rate volatility, but then spreads began to widen, particularly on US high yields, with equities falling and volatility rising.

Foreign exchange, gold and oil

The foreign exchange market has been volatile in relation to movements in interest rates. The prospect of divergence between the Fed and the ECB initially strengthened the dollar (EUR/USD 1.02) before the sharp rise in German long-term rates brought the euro back to 1.08 against the dollar.

The geopolitical situation and the fall in the dollar have favoured gold, which rose 19% and reached an historic high of $3,124 an ounce.

Oil prices fell by 5% amid expectations of increased production from OPEC and the United States, as well as a halt to fighting in the Middle East, only to rise again amid new sanctions against Russia.

The figures stated in this report are historical and not necessarily indicative of future performance.

Q2 2025

The quarter has been marked by a trade war by the US. This darkened growth prospects and heightened fears of inflation taking hold again. The Fed took a wait-and-see approach while the ECB pursued lowering headline rates. China's response and the about-turns by Washington fuelled uncertainty on financial markets, marked by a significant decline in the dollar and in shares, and strong pressure on long-term interest rates. Military operations between Israel/United States and Iran caused significant volatility in oil prices. Despite this turmoil, markets have proved resilient and generally held up well.

Macro economy

United States

Donald Trump's announcement on 2 April of prohibitive tariffs for the majority of the US's trade partners has been a shock for businesses, consumers and investors. After the downturn in markets and the dollar, the suspension of this decision for 90 days from 9 April helped to reduce tensions, but the growth outlook for the US economy was revised downwards. The release of the growth figure, GDP, for the first quarter confirmed the slowdown by contracting 5%. The Federal Reserve is now predicting growth of 1.4% for 2025. The IMF forecasts 1.8% and the World Bank 1.4%, which signals significant uncertainty among economists. The new budget, the "Big Beautiful Bill", being negotiated with Congress, is expected to cut taxes by $4.5 trillion and increase the national debt by $3.3 trillion.
Household consumption, supported by a still-resilient jobs market, remains solid, but is showing signs of weakness. Net job creation is slowing but the unemployment rate remains stable at 4.2%. Advanced indicators (manufacturing ISM[1] stable at 48.5 and non-manufacturing ISM down at 49.5) nevertheless confirm a deterioration in the outlook. At the end of the quarter, cyclical data shows a slowdown in consumption and industrial production: US retail sales fell 0.9% in May compared to April; industrial production was almost stagnant in May and new construction is down.
Inflation measures have given mixed signals. The core consumer price index for May came in below expectations at 2.4% (vs. 2.5% expected). However, PCE inflation, the Fed's preferred gauge, appears to be picking up again. Core PCE inflation came out up 2.7% on an annual basis, as against the 2.6% expected by consensus opinion. Against this background, the Fed decided to wait and see, and kept key rates unchanged, between 4.25% and 4.50%, despite a great deal of pressure from the White House.

Europe

Europe's accelerated growth appears thwarted by the American trade war, despite the unprecedented increase in public spending in Germany. Growth for the first quarter in the Eurozone was above expectations at 1.5% on an annual basis. Growth prospects for 2025 have now been revised upwards by the European Central Bank (ECB) to 0.9% for 2025. The strength of the labour market, with an unemployment rate at an historically low level of 6.3% should stimulate consumption and support growth. After the fall in April, surveys show good resilience in the Eurozone. The outlook for the manufacturing sector has stabilised, with the HCOB PMI[2] survey reaching 50.2 in June, compared to 49.4 in May, signalling a slight improvement in manufacturing orders. In Germany, the ZEW index rose sharply in June, climbing 22.3 points in relation to May, to reach 47.5, indicating an improvement in expectations, confirmed by the IFO business climate index. We see weakness in France, while the outlook is improving in Germany. This deterioration in French prospects was confirmed by the Bank of France's quarterly survey.
The new German government has adopted a 2025 budget project and ambitious budget plans for the medium term. The measures focus on tax breaks for companies and support for the energy price for households and businesses, which aims to boost confidence and improve the economy's growth potential. The 2025 budget deficit is expected to reach 3.2% of GDP.
The slowdown in inflation in the Eurozone was confirmed by May's data, with an increase of only 1.9%, the services sector being the main contributor. The ECB revised down its inflation forecast for 2026 to 1.6%, then 2% in 2027, and has cut its deposit rate by 50 bp over the quarter.
In the United Kingdom, the Bank of England (BoE), maintained the status quo, leaving its key rate unchanged at 4.25%. Nevertheless, the slowdown in property prices coupled with weak consumer confidence, may prompt the BoE to lower its rates in the third quarter.

Asia

Japan saw a contraction in GDP in the first quarter and movement during May remained weak. GDP fell by 0.2% quarter-on-quarter, penalised by weak exports. This figure still does not fully reflect the impact of US trade tariffs. Underlying inflation accelerated in April to 3.5% year-on-year (compared to 3.2% in March) However, weak growth heralds a very gradual recovery. The Bank of Japan (BoJ) kept its key rate at 0.5% due to the slowdown in the Japanese economy and inflation. No imminent rate hike has been announced, except perhaps in January 2026 if the cyclical recovery is confirmed. Moreover, in order to limit the volatility of long-term rates, the BoJ has decided to reduce its balance sheet more slowly. Finally, the Finance Minister announced a reduction in the issue of very long maturities to take pressure off the 30-year bond.
The trade war with the United States has affected the economic outlook in China. The Caixin manufacturing sector index released in early June was below expectations at 48.9, anticipating further deterioration. The services sector has expanded only slightly. However, the decline in property prices continues, prompting the authorities to further support the market. The official unemployment rate is stable at 5.1% and retail sales up 6.4% were reported. Yet deflation has been confirmed. Producer prices fell by 3.3% and consumer prices were also down by 0.1% for May. As a result, the central Chinese bank (PBoC) resumed its monetary easing against a backdrop of trade uncertainty, lowering its 1-year rate to 3% and the 5-year rate to 3.5%. Moreover, the trade surplus remained largely unchanged at 750 billion yuan in May and the country is facing two targets — maintaining urban unemployment at around 5-5.5% on the one hand and on the other creating 12 million jobs by the end of the year.
In India the economic outlook remains solid and the composite HSBC survey for June was above expectations at 61, versus the expected 59,4. The fall in inflation persists, reaching its lowest level for 6 years. It was at 2.8% year-on-year in May, compared to 3.2% in April, due to the slowdown in food prices. Underlying inflation is also down. This environment allowed the Reserve Bank of India (RBI) to lower its headline rate by 50 basis points. The next meeting will be held in early August and will see the announcement of a probable pause in monetary policy.

Financial markets

Equities

Equities markets experienced extreme volatility at the beginning of April following the announcement of tariffs, and then their postponement, but performances have been positive over the quarter. In May, US markets outperformed Europe and Asia, driven by good results for the "Magnificent Seven". This trend was confirmed in June when US indices posted historic highs. The S&P 500 gained 10.6% at the end of March and the Nasdaq 100 rose 17.6%. In contrast, in the Eurozone the Eurostoxx 50 only gained 1%, driven by the DAX 30 (up 7.9%) but dragged down by the CAC 40 (down 1.6%). On the currency side, the euro again appreciated, by 9% this quarter against the dollar, bringing its increase to 13% since the beginning of the year. Therefore, when denominated in euros, the United States' market performance has been mediocre. After exceeding 50% in April, the volatility index, the VIX, returned below 17% at the end of the period, reflecting the return of some optimism. Emerging markets rose 11.5% in dollars. In Asia the trend is positive overall, notably in Korea and Taiwan. The Chinese market remained volatile and ended the quarter down an average of 2% in dollars, due to the lack of fiscal stimulus.

Bonds

The second quarter saw a fall in short-term rates and strong volatility in the long US rates. The movement in short-term rates is linked to the expectation of rate cuts by the Fed and the ECB, a fall in inflation and an outlook of a slowdown in global growth. Bond volatility remains high, in particular for US Treasuries, fuelled by

[1] An ISM index above 50% indicates expansion in manufacturing activity compared to the previous month. An ISM index below 50% suggests contraction in manufacturing activity compared to the previous month.
[2] The HCOB PMI® Germany Services Activity index is based on a single question: comparing the level of activity with that of the previous month. An index less than 50.0 indicates a contraction, and the further below 50.0 it is, the faster the rate of decline.

The figures stated in this report are historical and not necessarily indicative of future performance.

(geo)political and budgetary uncertainties. In the US the 10-year rate ended the quarter at around 4.23% in mid-June, after a rise to 4.6%. The 2-year rate ended at 3.72%. Investors are expecting monetary easing in the second half of the year and a slowdown in US nominal growth. In the Eurozone, the 10-year German Bund reached 2.61% and the 2-year fell 22 bp compared to the end of the year (and by 19 bp compared to the end of March) to reach 1.86%, while the ECB continues with its cycle of cuts, bringing back its deposit rates to 2%. Sovereign rate spreads in the Eurozone remain stable, except Italy's, which dropped 26 bp. Corporate bonds maintained their positive performance, in particular those with high yields.

Foreign exchange and commodities

The euro strengthened by 9% against the dollar and emerged as a potential global alternative to the latter, rising from 1.08 to 1.18 over the quarter. Sterling also continues to appreciate against the greenback and is up nearly 6.5% since the end of March. The yuan remains stable near 7.2 against the dollar and the yen has strengthened slightly against the dollar.

Gold confirmed its status as a safe haven, breaking records, with an ounce touching 3,450 dollars in April and May, and stabilising at $3,303 per ounce at the end of June. Gold has risen 25.9% since the start of the year.

The price of a barrel of oil has been very volatile over the period, due to the war between Israel/United States and Iran. But the price of oil has fallen significantly over the quarter due to the deterioration in economic prospects, but mainly due to an increase in OPEC production quotas, in particular Saudi Arabia. A barrel of Brent lost $10 (down 9.5%) over the quarter, ending at around $68, having brushed the symbolic $60 mark, on 5 May, its lowest level since February 2021, but was $80 at the beginning of June.

1 INTRODUCTION

Amundi Funds (the "Fund") is organised as a "Société d'Investissement à Capital Variable" ("SICAV") under the laws of the Grand Duchy of Luxembourg. The Fund, initially Groupe Indosuez Funds FCP, an unincorporated mutual investment fund ("Fonds Commun de Placement") created on 18 July 1985, was transformed, in accordance with Article 110 (2) of the law of 30 March 1988 on Undertakings for Collective Investment, and renamed GIF SICAV II on 15 March 1999. The deed of transformation and the Articles of Incorporation (the "Articles") were published in the Mémorial, Recueil des Sociétés et Associations on 28 April 1999. The name of the Fund was then changed to GIF SICAV on 1st December 1999, to Crédit Agricole Funds on 8 December 2000 and to CAAM Funds on 1st July 2007. As at 2 March 2010, in accordance with the decision taken by the shareholders in the framework of the Extraordinary General Meeting held on 23 November 2009 and with the decision of the Board of Directors taken on 23 December 2009, CAAM Funds was renamed Amundi Funds.

The amendments to the Articles have been published in the Mémorial, Recueil des Sociétés et Associations respectively on 14 January 2000, on 17 January 2001, and on 13 June 2007 for the first three name changes and on 3 April 2010 for the last one. A latest amendment to the Articles has been made on 14 March 2012 and has been published in the Mémorial, Recueil des Sociétés et Associations - C, number 943 and dated 12 April 2012. The Fund is subject to Part I of the amended law of 17 December 2010 on Undertakings for Collective Investment (the "2010 law").

The following Sub-Funds have been launched during the year:
Amundi Funds China New Energy on 24 September 2024
Amundi Funds India Equity Contra on 25 February 2025

The following Sub-Funds have been renamed on 12 September 2024:
Amundi Funds Euro Government Bond into Amundi Funds Euro Government Bond Responsible

The following Sub-Fund has been renamed on 16 May 2025:
Amundi Funds Target Coupon into Amundi Funds Euro Bond Income and has been defeederized from its Master Amundi Revenus.

The following Sub-Funds have been liquidated during the year:
Amundi Funds Global Macro Bonds & Currencies Low Vol on 22 July 2024
Amundi Funds Climate Transition Global Equity on 06 December 2024

As per Depositary confirmation, the following balances are present as at 30 June 2025 for the liquidated Sub-Funds, including those liquidated in prior years:
- Amundi Funds Equity Korea : USD 11,814.03 and EUR -1,200.00
- Amundi Funds Equity Emerging Conservative : USD 20,349.81
- Amundi Funds Global Macro Bonds & Currencies : EUR 35,834.65
- Amundi Funds Climate Transition Global Equity : EUR 2,724.61 and USD 45.86
- Amundi Funds Global Macro Bonds & Currencies Low Vol : EUR 6,300.83

The objective of Amundi Funds Protect 90 is to provide a participation in financial markets evolution while also providing permanent partial protection of your investment over any given 3-year period. Specifically, the Sub-Fund is designed to ensure that its share price does not fall below 90% of the highest net asset value reached since the last business day of the preceding month of April, as per prospectus.

Considering the cumulated relevant portion of Russian and Ukrainian securities in portfolio and following decision of the Board of Directors of the SICAV:
- Amundi Funds Russian Equity: the NAV calculations has been suspended on 28 February 2022 and the last available official NAV is dated 25 February 2022. After that date, no further subscriptions or redemptions have been accepted for this Sub-Fund.
- Amundi Funds Emerging Europe Middle East and Africa: the segregated class (ISIN LU2600584523) created on 11 April 2023, where all the illiquid Russian asset and liabilities have been transferred, is still existing.
The class is still under liquidation and subscriptions and redemptions are still not accepted. All the related fees are still waived or borne by the Management Company. No advance on liquidation proceeds have been anticipated to the shareholders.

In reference to the prospectus dated May 2025, the Fund consisted of 114 Sub-Funds in activity, each investing in a specific market or group of markets.
Equity Japan Target, Euroland Equity, Europe Equity Select, Euroland Equity Small Cap Select, Europe ex UK Equity, European Equity, Europe Equity Green Technology, European Equity Value, Europe Equity Income Select, European Equity Small Cap, Global Equity Responsible, Global Equity, Global Equity Select, Global Equity Income Select, Japan Equity Select, Japan Equity Value, Montpensier Great European Models SRI, Montpensier M Climate Solutions, Global Equity Climate, Europe Equity Climate, Polen Capital Global Growth, US Equity Dividend Growth, US Equity Select, US Equity Fundamental Growth, US Equity Research , US Equity Research Value, US Pioneer Fund, China New Energy, Asia Equity Focus, China A Shares, China Equity, Emerging Europe Middle East and Africa, Emerging Markets Equity Select, Emerging Markets Equity Focus, Emerging Markets Equity Focus ex China, Emerging World Equity, Equity MENA, Latin America Equity, Emerging Markets Equity Climate, Emerging Markets Equity Growth Opportunities, Russian Equity, SBI FM India Equity, India Equity Contra, Euroland Equity Dynamic Multi Factors, Euroland Equity Risk Parity, European Equity Conservative, European Equity Dynamic Multi Factors, Global Equity Conservative, Global Equity Dynamic Multi Factors, European Convertible Bond, Montpensier Global Convertible Bond, Euro Aggregate Bond, Euro Corporate Bond Select, Euro Government Bond Responsible, Euro Inflation Bond, Impact Euro Corporate Short Term Green Bond, Strategic Bond, Euro High Yield Bond, Euro High Yield Short Term Bond, Euro Subordinated Bond Responsible, Global High Yield Bond Responsible, Global Subordinated Bond, Pioneer Global High Yield Bond, US High Yield Bond, Global Aggregate Bond, Global Government Bond, Global Corporate Bond, Global Corporate Bond Select, Global High Yield Bond, Global Inflation Short Duration Bond, Global Short Term Bond, Global Bond Flexible, Impact Green Bond, Multi Sector Credit, Global Corporate Bond Climate, Optimal Yield, Optimal Yield Short Term, Strategic Income, US Corporate Bond Climate, US Bond, US Corporate Bond Select, US Short Term Bond , Asia Bond Income Responsible, China RMB Aggregate Bond, Emerging Markets Blended Bond, Emerging Markets Bond, Emerging Markets Corporate Bond, Emerging Markets Corporate High Yield Bond, Emerging Markets Green Bond, Emerging Markets Hard Currency Bond, Emerging Markets Local Currency Bond, Emerging Markets Short Term Bond, Asia Multi-Asset Target Income , Euro Multi-Asset Target Income, Global Multi-Asset, Global Multi-Asset Conservative, Global Multi-Asset Target Income, Income Opportunities, Multi-Asset Real Return, Multi-Asset Conservative Responsible, Multi-Asset Climate, Pioneer Flexible Opportunities, Real Assets Target Income, Euro Bond Income, Absolute Return Forex, Absolute Return Multi-Strategy, Absolute Return Global Opportunities Bond, Multi-Strategy Growth, Quantitative Global Absolute Return Bond , Volatility Euro, Volatility World, Protect 90, Cash EUR and Cash USD.

Within each Sub-Fund, the SICAV can create and issue share classes with various characteristics and investor eligibility requirements. Each share class is identified first by one of the base share class labels (described in the table below) and then by any applicable suffixes.

Classes Label (as from June 1, 2019)	Investors	Board approval needed	Minimum initial investment[1]	Maximum subscription fees[2]	Maximum switch fees[4]	Maximum redemption fees
Q-A	All investors	No[3]	-	4.50%	3.00%	-
Q-D	Existing Clients Only	No	-	3.00%	3.00%	-

For a complete list of Sub-Funds and share classes currently available, go to the website www.amundi.lu/amundi-funds.

[1] For purposes of minimum initial investment, we aggregate the investments of a given investor (or group of entities fully owned by the same parent company) across the entire SICAV (all share classes and all Sub-Funds). Minimums apply in USD or equivalent amount in any other currency.
[2] For Volatility Euro and Volatility World, may be up to 2.00% higher if the board determines that new investments may adversely affect the interests of existing shareholders.
[3] In I2 and A2 share classes, Board approval is not required.
[4] For A4 share classes, switch is only possible between A4 share classes of another Sub-Fund of the UCITS.

2 PRINCIPAL ACCOUNTING CONVENTIONS

PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with the legal and regulatory provisions in force in Luxembourg concerning undertakings for collective investment.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period. In accordance with the prospectus dated June 2025, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all Sub-Funds: official NAV dated 30 June 2025.

In the annual report as at 30 June 2025, the Sub-Funds merged or liquidated during this year are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

The financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis of accounting.

- **Cross Sub-Funds investments** - As at 30 June 2025, the value of the investments made by Sub-Funds in other Sub-Funds of the SICAV amounts to EUR 872,305,258.53 corresponding to 1.07% of the total net asset value. Therefore, the total combined NAV at the year end without those cross investments would amount to EUR 80,999,072,304.47.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.
- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year.
  Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial year. Currency differences resulting from these conversions are recorded under the caption "Reevaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.
- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Futures-style options contracts -** Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.
- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at year end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.
- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements". MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.

- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Broker and transaction fees" in Statement of Operations and Changes in Net Assets. Refer to note 23 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender.The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

3 EXCHANGE RATES USED AS OF 30 JUNE 2025

The exchange rates used for the combined figures are the following:

1 JPY = 0.005898 EUR
1 USD = 0.851898 EUR

4 MANAGEMENT FEES, ADMINISTRATION FEES AND DISTRIBUTION FEES

Fee structure - The Administration fee is a fee expressed as a percentage of the NAV of the Sub-Funds and classes of shares, including all the administrative expenses of the Fund.
Such fee includes the remuneration of the Administrative Agent, Domiciliary Agent, Transfer Agent and Registrar Agent for their services rendered to the Fund, the remuneration of the Custodian for its services rendered to the Fund as well as all other administrative expenses incurred in the operation of the Fund including but not limited to:

- the fees of auditors and legal advisers of the Fund (including costs associated with compliance with legal and regulatory requirements);
- the cost of translation, printing and distribution to investors of the annual and semi-annual reports, of the prospectus of the Fund, of the Key Information Document of each class of shares and of any supplement thereto as well as of any notice sent to the Investors' attention;
- any costs related to the information of the shareholders including costs related to the publication of prices of shares in the financial press, the production of information material for the subscribers and distributors;
- any fees and expenses involved in registering and maintaining the registration of the Fund with any governmental agency or stock exchange and to comply with any regulatory requirements and the reimbursement of such fees and expenses incurred by any local representative;
- the fees of any local representative/correspondent, of which the services are required pursuant to the applicable law;
- the costs related to extraordinary measures, in particular any expertise or trial aiming at the protection of the shareholders' interests;
- the costs related to the translation, distribution and publication of any notice to the shareholders.

The Administration fee is paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and is calculated each day for each Sub-Fund and each class of shares.
The Management fees, expressed in percentages of the NAV, are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and calculated each day for each Sub-Fund on the basis of the daily NAV of each class of shares.
Amundi Luxembourg S.A. is responsible for paying commissions to Investment Managers.
In addition to the management fees paid by the Fund to Amundi Luxembourg S.A., the Sub-Funds investing part of their assets in other UCI's are also subject to the management fees charged to those Sub-Funds, except for cross Sub-Funds investments.
The Distribution fees are calculated and accrued on each Dealing Day at the below rates per annum and are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company. Amundi Luxembourg S.A. is responsible for the payment of fees to Distributors.
The Management Company can further decide to pay remuneration to Distributors out of its own fees.
The Management fees, Administration fees and Distribution fees, expressed as a percentage of the NAV, applicable at 30 June 2025 are the maximum rates set out on the website www.amundi.lu/Amundi-Funds, except for the Sub-Funds Amundi Funds Cash EUR and Amundi Funds Cash USD, for which the below rates per annum are applied:

The management fees rates and administration fees rates applied have changed during the year for the above Sub-Funds.

Following the suspension of NAV calculation for Amundi Funds Russian Equity, Amundi Luxembourg S.A. has decided to waive its management fees. The same waiver applies to the segregated share class (ISIN LU2600584523) of Amundi Funds Emerging Europe Middle East and Africa, to which all illiquid Russian assets and liabilities have been transferred.

In accordance with the article 46(3) of the law of 17 December 2010, the Management fee rates for the underlying funds of Amundi Funds Protect 90 whose guarantor is part of Crédit Agricole Group, are the following:

5 PERFORMANCE FEES

The performance fee is calculated separately for each Class of Shares. It shall be accrued daily, deducted and paid annually for each Class of Shares. The performance fee is calculated by comparing the NAV of the Sub-Fund relevant Class of Shares and the reference asset.
The mechanism applied is further detailed on the website www.amundi.lu/Amundi-Funds
The Sub-Funds and the Classes of Shares subject to a performance fee are listed on the website www.amundi.lu/Amundi-Funds.
For all the classes authorized in Hong Kong please note that no performance fees are applied.
Performance fees are included in the item “Performance fees” in the Statement of Operations and Changes in Net Assets and also available under the (unaudited) Performance fee regulation section.

6 TAXATION OF THE FUND

"Taxe d'abonnement"

The Fund is further liable in Luxembourg to a tax of 0.05% per annum in respect of the Equity Sub-Funds, Bond Sub-Funds, Multi Asset Sub-Funds, Protected Sub-Funds and Absolute Return Sub-Funds (except on investments by these Sub-Funds in other undertakings for collective investment established in Luxembourg and already subject to the *taxe d'abonnement* as per law and of 0.01% per annum in respect of the Cash Sub-Funds, the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category of all the Sub-Funds ("Taxe d'Abonnement"), such tax being payable quarterly on the basis of the NAV of the Fund at the end of the relevant calendar quarter. The benefit of the 0.01% per annum Taxe d'Abonnement is available to those Shareholders admitted in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Fund at the time of admission of an Investor in such class of shares.
However, no guarantee can be given for the past and for the future and such assessment is subject to interpretations on the status of an eligible Investor in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category by any competent authorities as will exist from time to time. Any such reclassification made by an authority as to the status of an Investor may submit the entire class of shares to a Taxe d'Abonnement rate of 0.05% per annum.

Indian Tax

Each sub-fund may be subject to corporation taxes in certain countries in which il invests. Capital gains realised when disposing of Indian securities held by a sub-fund are subject to capital gains tax in India, which is disclosed in the "Statement of operations and changes in net assets" under the heading 'Taxes". The tax is computed on net realised gains, and net realised losses in excess of gains at the end of the financial year in India may, under certain conditions, be carried forward for up to 8 subsequent financial years to offset against future gains. In this respect, short term capital losses (i.e when shares are held for less than 12 months) can be offset either against long term or short term capital gains whereas long term capital losses may only be offset against long term capital gains. Indian tax law imposes a tax of 20%[(1)] (plus additional surcharge and health and education cess) on net realised gains from ndian securities sold within one year from the date of purchase and a tax of 12.5%[(2)] (plus additional surcharge and health and education cess) if the Indian securities are sold more than 12 months after the acquisition. This tax of 12.5% on long term capital gains realised on Indian securities has been introduced with effect from 1 April 2018.

Decision to book provisions for Indian tax is captured, by sub-fund, in a detail procedure.

If applicable, daily provisions are booked in the accounts of the sub-fund and are presented in the caption "Other liabilities" of the Statement of net assets.

(1) 15% until 15 August 2024
(2) 10% until 15 August 2024

7 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly revenues from securities lending and recovery of provisions on performance fees.

8 OTHER EXPENSES

Balances for other expenses in the Statement of Operations and Changes in Net Assets mainly include other taxes and costs from securities lending.
Amounts of other expenses in the Statements of Operations and Changes in Net Assets in the Sub-Funds Amundi Funds Emerging Markets Equity Select, Amundi Funds Emerging Markets Equity Focus, Amundi Funds Emerging World Equity, Amundi Funds SBI FM India Equity, Amundi funds India Equity Contra, Amundi Funds Emerging Markets Blended Bond and Amundi Funds Multi-Asset Climate mainly include Indian Tax.

9 REVERSE REPURCHASE AGREEMENTS

During the financial year ending 30 June 2025, certain Sub-Funds entered into reverse repurchase contracts, the amount of which being disclosed below in the Sub-Funds currency, by which they lend a certain amount to financial institutions, guaranteed by collateral. On 30 June 2025, loans granted in accordance with these agreements were guaranteed by the following underlying assets.
Counterparty's countries are listed following the ISO 3166-1 standard.
The amount of Investment Grade is referred to bonds rated at least BBB- by S&P, Baa3 by Moody's.
Please refer to the note 17 for detailed collateral information.
