This product is authorised in Luxembourg. Candriam is approved in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key information document is valid as at 2024-03-01.

WHAT IS THIS PRODUCT?

Type: This product is a share class (I) of a sub-fund (USD Sustainable) of an investment company with variable capital (SICAV) under Luxembourg law (Candriam Money Market), Undertakings for Collective Investment in Transferable Securities (UCITS).

Term: Open-ended.

Objectives:

Classification: Standard money market fund with variable net asset value

Principal assets traded:

Money market instruments and/or bonds with a residual maximum maturity of less than 397 days and with an interest rate that can be revised at least annually, denominated in US dollars and in currencies of member countries of the Organisation for Economic Co-operation and Development (OECD), and issued by all types of issuers rated at least A2/P2 (or equivalent) by one of the rating agencies (i.e. issuers considered good quality). Deposits.

Investment strategy:

The fund seeks to achieve capital growth, associated with a low risk level, by investing in the principal assets traded.

Within the limits of the fund's investment objective and policy, the management team makes discretionary investment choices in the portfolio based on its analyses of the characteristics and growth prospects of the assets traded.

The duration (Weighted Average Maturity - WAM), i.e. the sensitivity of the fund to changes in interest rates, will not exceed 6 months and the weighted average life of the fund assets (Weighted Average Life - WAL) will not exceed 12 months. The fund's sustainable investment objective is to contribute to a reduction in greenhouse gas emissions by means of specific objectives and by using climate-related indicators in the analysis of issuers and securities. The fund also aims to have a positive impact on environmental and social objectives in the long term. Precisely, the fund seeks to achieve a carbon footprint that is below a set absolute threshold (for GHG emitting companies). This threshold has been set to approximately 30% less than the investment universe and may be reviewed as the investment universe changes. Furthermore, private and sovereign issuers are assessed on the basis of an internal ESG analysis and are given a score, the aim being to maintain the fund portfolio's average weighted ESG score above a pre-set threshold.

To achieve these objectives, the fund uses a combination of positive selection of the best issuers according to ESG criteria, and exclusion of issuers which are detrimental to these objectives or considered to be controversial. Issuers undergo a double analysis which considers how the issuers' activities contribute to the achievement of sustainability objectives, and also how the issuers' operations and policies are aligned with the interests of their main stakeholders. The result of this analysis is used as a basis upon which the investment universe is defined and as a guide for fund managers when constructing the portfolio. Each time the fund invests in securities issued by sovereign issuers, these issuers will also have been selected based on their ESG rating as assessed by an internal analysis of how they manage their human, social, natural and economic capital. This analysis is accompanied by the results of dialogue conducted with the issuers.

This investment approach will cause the fund to avoid certain issuers due to their inadequate ESG quality or their inadequate contribution to the achievement of sustainability objectives. Although the asset manager considers that these issuers are likely to perform less well than more sustainable issuers over the long term, market volatility and short-term market trends may cause these issuers to do better than the more sustainable issuers over shorter periods.

The fund has not applied for the French SRI label.

The fund may only make use of derivative products for hedging purposes (to protect against future unfavourable financial events).

Benchmark: Effective Federal Funds Rate.

The fund is managed actively and the investment approach implies a reference to a benchmark (the index).

Benchmark definition:

The federal funds rate is the interest rate at which depository institutions transact federal funds (USD balances at Federal Reserve Banks) with each other on an overnight basis.

Use of the benchmark:

- to compare performance.

Repayment of shares: On demand, every day, at Luxembourg.

Allocation of income: Reinvestment.

Intended retail investor:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience who are looking for Capital Preservation. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 0.5 years. Investors should understand the product risks and only invest if they can bear a limited level of losses on the initial investment.

General information:

Depository bank: CACEIS Bank, Luxembourg Branch.

Other information:

This document provides a description of a share class of a sub-fund of Candriam Money Market. The prospectus and periodical reports are established for all the sub-funds. There are other share classes and these are listed in the prospectus.

Investors may apply for the conversion of their shares into shares of another class of the same sub-fund or into shares of a class of another sub-fund of the fund, based on the eligibility criteria and following the procedures available through their financial intermediary.

The sub-fund is only liable for the debts, liabilities and obligations that can be charged to it.

Additional information about the fund can be found in the prospectus and the periodical reports, which may be obtained free of charge on request from Candriam or viewed at any time on the website www.candriam.com. These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its shares or in a common language in the international finance sphere. All other practical information, in particular the latest share price, is available from the places shown above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 0.5 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 1 out of 7, which is the lowest risk class.

This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Other risk(s) materially relevant not included in the summary risk indicator: Credit. Counterparty.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 10/2021 and 04/2022.

Moderate: This type of scenario occurred for an investment between 10/2016 and 04/2017.

Favourable: This type of scenario occurred for an investment between 08/2023 and 01/2024.

Recommended holding period: Example Investment:		0.5 year 10 000 USD
		If you exit after 0.5 year
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	9 890 USD
	Average return each year	- 1.06%
Unfavourable	What you might get back after costs	9 990 USD
	Average return each year	- 0.08%
Moderate	What you might get back after costs	10 050 USD
	Average return each year	0.5%
Favourable	What you might get back after costs	10 280 USD
	Average return each year	2.81%

WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depositary, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depositary, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depositary.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

	If you exit after 0.5 year
Total costs	18.5 USD
Cost impact (*)	0.2%

* This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

Composition of Costs

One-off costs upon entry or exit		If you exit after 0.5 year
Entry costs	We do not charge any entry fee.	0 USD
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.26% of the value of your investment per year. This is an estimate based on actual costs over the last year.	13 USD
Transaction costs	0.11% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	6 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	N/A

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: **0.5 year**

The choice of recommended holding period depends on the types of the underlying investments and on the associated degree of risk, which may be higher or lower. For example "equity" type products (higher risk) generally have a recommended holding period of six years (long term), and "bonds or money market" type products (lower risk) have a shorter recommended holding period (generally between two and four years for bond products or less than one year for money market products - medium term/short term). "Mixed" type products generally have a recommended holding period of between three and five years depending on the weighting of the types of underlyings. "Alternative" type products generally have a recommended holding period of three years.

Investors may request redemption of their units at any time under the conditions set out in "What will this investment cost me? ". The shorter the holding period in relation to the recommended period, the greater the potential impact of any charges on the performance profile.

HOW CAN I COMPLAIN?

Complaints about this product or about the conduct of the product manufacturer or the person advising on, or selling, the product:

Postal address: Candriam, SERENITY – Bloc B, 19-21, route d'Arlon – L-8009 Strassen
