### 3. Performance and Volatility

#### Performance

Returns for periods greater than one year are annualised. SICAV performance includes reinvestment of income and is net of all expenses.

Past performance is no indication of current or future performance.

The performance data does not take into account the commissions and costs incurred on the issue and redemption of units.

#### Volatility

The standard deviation (D) of the price is calculated on a daily basis throughout the SICAV's financial year.

The details below relate to the period from 1 July 2023 to 31 December 2023.

If D is equal to or less than 0.1 then volatility will be Low.

If D is greater than 0.1 but less or equal to 1.0 then volatility will be Medium.

If D is greater than 1.0 but less than or equal to 2.4 then volatility will be High.

If D is greater than 2.4 then volatility will be Very High.
