The Fund is actively managed. The Investment Adviser has

discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The ***Euro Investment Grade Fixed Maturity Bond Fund 2027 (1)*** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund uses a "buy and maintain" strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 4 years and 2 months comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund);
- ii) the "**Investment Period**": a period of 3 years immediately following the Pre Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the "**Ramp-up Period**"); and
- iii) the "**Post Investment Period**": a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the "**Maturity Date**").

During the Pre Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 75% of its Net Asset Value is invested in corporate fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets and denominated in Euro. Such fixed income securities shall, at the time of purchase, be rated investment grade; and
- up to 25% of the Fund's Net Asset Value is invested in global fixed income securities which, at the time of purchase, are rated non-investment grade.

Should the credit quality of fixed income securities held by the Fund deteriorate to below investment grade causing the Fund to hold below 75% of its Net Asset Value in investment grade (or deemed equivalent), and/or greater than 25% of its Net Asset Value in sub-investment grade or unrated, fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in securities which have average maturities of up to 4 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have average maturities of up to 3 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 2 months and the Maturity Date to be changed to a later date.

### **Subscriptions**

Shareholders may subscribe into the Fund during the Pre Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link <https://www.blackrock.com/lu/individual/products/product-list>.

Within 20 Business Days after the end of the Pre Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### **Redemptions**

Shareholders will be able to redeem their Shares in the Fund during the Pre Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

### **ESG Policy**

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including, but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

#### **The *Euro Investment Grade Fixed Maturity Bond Fund 2028***

seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund uses a "buy and maintain" strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 4 years and 5 months comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 5 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund);
- ii) the "**Investment Period**": a period of 3 years immediately following the Pre Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the "**Ramp-up Period**"); and
- iii) the "**Post Investment Period**": a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the "**Maturity Date**").

During the Pre Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents. The Fund may begin allocating to investment grade securities during the pre-investment period, at the discretion of the Investment Adviser.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 75% of its Net Asset Value is invested in corporate fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets and

denominated in Euro. Such fixed income securities shall, at the time of purchase, be rated investment grade; and

- up to 25% of the Fund's Net Asset Value is invested in global fixed income securities which, at the time of purchase, are rated non-investment grade.

Should the credit quality of fixed income securities held by the Fund deteriorate to below investment grade causing the Fund to hold below 75% of its Net Asset Value in investment grade (or deemed equivalent), and/or greater than 25% of its Net Asset Value in sub-investment grade or unrated, fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in securities which have average maturities of up to 4 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have average maturities of up to 3 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 2 months and the Maturity Date to be changed to a later date.

### Subscriptions

Shareholders may subscribe into the Fund during the Pre Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link <https://www.blackrock.com/lu/individual/products/product-list>.

Within 20 Business Days after the end of the Pre Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### Redemptions

Shareholders will be able to redeem their Shares in the Fund during the Pre Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. The Fund's total assets will be invested in accordance with the ESG Policy described below.

### Risk management measure used: Commitment Approach.

### ESG Policy

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g.

higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The **Euro Reserve Fund** seeks to offer returns in line with money market rates consistent with preservation of capital and liquidity. The Fund invests its assets exclusively in Euro denominated short-term assets and cash in accordance with the requirements of the MMF Regulations, as summarised in Appendix A. The Fund is a short-term money market fund.

The Fund may invest up to 15% of its total assets in securitisations and asset backed commercial paper ("ABCP") that are sufficiently liquid and have received a favourable assessment pursuant to the Internal Credit Quality Assessment Procedure.

At the discretion of the Investment Adviser, the Fund will invest in eligible reverse repurchase agreements for both liquidity management purposes and for permitted investment purposes.

The Fund may only use derivatives for the purpose of hedging the interest rate or exchange rate risks inherent in its investments. The underlying of the derivative instruments must consist of interest rates, foreign exchange rates, currencies or indices representing one of those categories.

The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.

**This Fund may have a material exposure to permitted securitisations and ABCPs and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments without reference to a benchmark. The Euro Short Term Rate (ESTR) should be used by investors to compare the performance of the Fund.

The ***Euro Short Duration Bond Fund*** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of total assets will be invested in fixed income transferable securities denominated in Euro with a duration of less than five years. The average duration is not more than three years. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 120% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and

issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined under the Benchmark use Section below) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.

The weighted average ESG rating of the corporate portion of the Fund will be higher than the ESG rating of the corporate portion of the ESG Reporting Index (as defined under the Benchmark use Section below).

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so the Investment Adviser will refer to the:

- (i) Bloomberg Euro-Aggregate 500mm 1-3 Years Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope, credit rating requirements and maturity requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.

- (ii) Bloomberg Euro-Aggregate Index (1-3 years) (80%) and the Bloomberg Global Aggregate Index (1-3 years) (20%) (the “ESG Reporting Index”) to assess the impact of ESG screening on the Fund’s investment universe. The ESG Reporting Index is not intended to be used when constructing the Fund’s portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at <https://www.bloomberg.com/company/press/bloomberg-completes-fixed-income-indices-rebrand/>.

The ***Euro-Markets Fund*** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in those EU Member States participating in EMU. Other exposure may include, without limitation, investments in those EU Member States that, in the opinion of the Investment Adviser, are likely to join EMU in the foreseeable future and companies based elsewhere that exercise the predominant part of their economic activity in EMU-participating countries.

The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund’s total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund’s investments. In doing so the Investment Adviser will refer to the MSCI EMU Index when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.

The ***European Equity Income Fund*** seeks an above average income from its equity investments without sacrificing long term capital growth and invest in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund’s total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and

may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs (generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may take into consideration the MSCI Europe Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **European Equity Transition Fund** seeks to maximise long-term total return. The Fund invests at least 70% of its total assets in a concentrated portfolio of equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. These companies will be selected by the Investment Adviser based on their fundamental merit, and their ability to act as enablers, improvers or leaders of the transition to a lower carbon economy.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below and at the levels set out in its SFDR Pre-Contractual Disclosure in Appendix H.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply the EU Climate Transition Benchmark Exclusions.

The Fund invests in equities or equity-related securities of companies, that contribute to the advancement of the transition theme. The Investment Adviser will identify a universe of potential investments within the following categories of companies – consistent with the principles of the transition theme:

Improvers: companies demonstrating positive progress or commitment to reducing the carbon emissions intensity of their operations;

Enablers: companies that enable and facilitate the transition to a lower carbon economy;

Leaders: companies that are already considered within their respective sectors as leaders in carbon reduction.

Having determined those companies which meet the principles of the transition theme, the Fund will further apply BlackRock's proprietary 'Transition Assessment' methodology to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Europe Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Euro Flexible Income Bond Fund** seeks to maximise income by primarily investing in debt and income-producing securities while seeking to maintain long term capital growth in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing. The Fund invests at least 70% of its total assets in fixed income transferable securities

denominated in various currencies, mainly in Euro denominated securities, issued by governments, agencies and companies worldwide. The full spectrum of available securities, including non-investment grade, may be utilised. The Fund's base currency is Euro and currency exposure is flexibly managed.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 60% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 10% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 200% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities including limiting direct investment in securities of issuers involved in the ownership or operation of gambling related activities or facilities, production, supply and mining activities related to nuclear power and production of adult entertainment materials.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. However, investors may use the Bloomberg Euro Aggregate Bond Index to compare the performance of the Fund vs. Euro bonds (and the Investment Adviser intends to include these comparisons in its reports on the Fund from time to time). Further details are available at the index providers website at: <https://www.bloomberg.com/company/press/bloomberg-completes-fixed-income-indices-rebrand/>.

The **European Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

**ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Europe Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and

policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **European High Yield Bond Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg Pan European High Yield 3% Issuer Constrained Index EUR Hedged as the appropriate benchmark.**

**Expected level of leverage of the Fund: 70% of Net Asset Value.**

**ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework,

which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg Pan European High Yield 3% Issuer Constrained Index EUR Hedged (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The *European Special Situations Fund* seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activities in, Europe.

The Fund places particular emphasis on "special situations" companies that, in the opinion of the Investment Adviser, are companies with potential for improvement that the market has failed to appreciate. Such companies generally take the form of small, mid or large capitalisation companies that are undervalued and exhibit growth investment characteristics, such as above-average growth rates in earnings or sales and high or improving returns on capital. In some cases such companies can also benefit from changes in corporate strategy and business restructuring.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Europe Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the

performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **European Sustainable Equity Fund** seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in Europe, in a manner consistent with the principles of sustainable investing.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced below will apply only to the underlying securities of derivatives used by the Fund.

**Risk management measure used: Commitment Approach.**

#### ESG Policy

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than its Index as defined below.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

Companies in the portfolio are then evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### Benchmark use

The Fund is actively managed. In doing so, the Investment Adviser will refer to the MSCI Europe Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. In the opinion of the Investment Adviser, the Index is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The Index measures the performance of large and mid-capitalisation companies in Europe. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **European Value Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. The Fund places particular emphasis on companies that are, in the opinion of the Investment Adviser, undervalued and therefore represent intrinsic investment value.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and

may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs (generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Europe Value Index (the “Index”) when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **FinTech Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied in financial services.

The Fund will focus on companies that generate revenues from the application of technology in the financial services industry sector and/or which aim to compete with traditional methods in the operation and distribution of financial products and services.

In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation that are involved in activities including the following: payment systems, banking, investments, lending, insurance and software. Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The MSCI All Countries World Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Fixed Income Global Opportunities Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in various currencies issued by governments, agencies and companies worldwide. The full spectrum of available securities, including non-investment grade, may be utilised. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 100% of its total assets in ABS and MBS. ABS and MBS are debt securities backed or collateralised by the income stream from an underlying pool of assets or mortgage loans respectively. It is anticipated that a large portion of the ABS and MBS held by the Fund will have an investment grade rating, but the Fund will be able to use the full spectrum of available ABS and MBS, including non-investment grade instruments. ABS and MBS held by the Fund may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The issuers of the ABS and MBS may be companies, governments or municipalities and, more particularly, the Fund may hold MBS issued by government-sponsored enterprises ("agency MBS"). The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). Although this will not typically be the case, the ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 500% of Net Asset Value. Leverage per se is not an accurate risk indicator as a higher degree of leverage does not necessarily imply a higher degree of risk. This Fund has a higher gross leverage figure than many of the other Funds due to the way in which it uses financial derivative instruments (for example, through its use of futures, swaps, options and forward contracts and short term interest rate derivatives, which can each contribute to increased leverage). In particular, short term interest rate derivatives can contribute to increased leverage due to the large notional values associated with these instruments relative to the duration exposure gained. As a result of its use of derivatives, this Fund may be more highly leveraged than other Funds. While leverage may present opportunities for increasing the Fund's total return, it also has the potential for increasing losses. The cumulative effect of the use of leverage by the Fund in a market that moves adversely to the Fund's investments could result in a loss to the Fund. Investors should note that the expected level of leverage can be exceeded in certain circumstances. Leverage, in this context is calculated as the sum or gross notional exposure created by the derivatives used.**

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. However, investors may use the Bloomberg Global Aggregate Bond Index (USD Hedged) (the "Index") to compare the performance of the Fund vs. global bonds (and the Investment Adviser intends to include these comparisons in its reports on the Fund from time to time).

The **Future Of Transport Fund** seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied to transport.

The Fund will focus on companies that generate revenues from the transition to a lower carbon transportation system such as electric, autonomous and/or digitally connected vehicles. The Fund's total assets will be invested in accordance with the ESG Policy described below.

Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced below will apply only to the underlying securities of derivatives used by the Fund.

### ESG Policy

The Fund will apply the EU Paris-Aligned Benchmark Exclusions.

In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation that are involved in activities including the following: raw materials (e.g. metals and battery materials), components and computer systems (e.g. batteries and cabling), technology (e.g. vehicle sensor technology) and infrastructure (e.g. vehicle battery charging stations). The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with renewable energy and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The weighted average ESG rating of the Fund will be higher than the ESG rating of the MSCI ACWI after eliminating at least 20% of the least well-rated securities from the index.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. In the opinion of the Investment Adviser, the MSCI All Countries World Index (MSCI ACWI) is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The MSCI ACWI measures the performance of large and mid-capitalisation stocks across developed and emerging markets countries. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The **Global Allocation Fund** seeks to maximise total return. The Fund invests globally in equity, debt and short term securities, of both corporate and governmental issuers, with no prescribed limits. In normal market conditions the Fund will invest at least 70% of its total assets in the securities of corporate and governmental issuers. The Fund generally will seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. The Fund may also invest a portion of its debt portfolio in high yield fixed income transferable securities. Currency exposure is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to

20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using 36% S&P 500 Index, 24% FTSE World Index (Ex-US), 24% ICE BofAML Current 5Yr US Treasury Index, 16% FTSE Non-USD World Government Bond Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 140% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to a composite benchmark comprising the S&P 500 (36%); FTSE World (ex-US) (24%); ICE BofAML Current 5 Yr US Treasury Index (24%) and FTSE Non-USD World Government Bond Index (16%) (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index should be used by investors to compare the performance of the Fund. In addition, given the fund's ability to invest in global stocks and global bonds, investors may use the FTSE World Index to compare the performance of the Fund vs. global equities and the FTSE World Government Bond Index to compare the performance of the Fund vs. global bonds (and the Investment Adviser intends to include these comparisons in its reports on the Fund from time to time).

Further details are available at the index providers website at [www.spglobal.com/spdji/](http://www.spglobal.com/spdji/), [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us) and [www.ice.com](http://www.ice.com).

The **Global Bond Income Fund** seeks to maximise income without sacrificing long term capital growth. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in various currencies issued by governments, government agencies, companies and supranationals worldwide, including in emerging markets. In order to maximise income the Fund will seek diversified income sources across a variety of such fixed income transferable securities. The full spectrum of available fixed income securities may be utilised, including investment grade, non-investment grade and unrated. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 60% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 200% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments without reference to a benchmark. However, investors may use the Bloomberg Global Aggregate Bond Index (USD Hedged) (the "Index") to compare the performance of the Fund vs. global bonds (and the Investment

Adviser intends to include these comparisons in its reports on the Fund from time to time).

The **Global Corporate Bond Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in investment grade corporate fixed income securities issued by companies worldwide. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 20% in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg Global Aggregate Corporate Bond USD Hedged Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 200% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg Global Aggregate Corporate Bond USD Hedged Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the

credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **Global Equity Income Fund** seeks an above average income from its equity investments without sacrificing long term capital growth in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets. Currency exposure is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such

companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI All Country World Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Global Government Bond Fund** seeks to maximise total return, in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing. The Fund invests at least 70% of its total assets in investment grade fixed income transferable securities issued by governments and their agencies worldwide. Currency exposure is flexibly managed.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond principles) and "Green, Social and Sustainability" (GSS) bonds issued by governments and agencies of, and companies, where the proceeds of such GSS bonds are tied to green and socially responsible projects.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 30% of the Fund's total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using FTSE World Government Bond USD Hedged Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 400% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the FTSE World Government Bond USD Hedged Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the credit rating and issuer requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **Global High Yield Bond Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally at least 70% of its total assets in high yield fixed income transferable securities. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using ICE BofA Merrill Lynch Global High Yield Constrained USD Hedged Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 60% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the ICE BofA Merrill Lynch Global High Yield Constrained USD Hedged Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ice.com](http://www.ice.com).

The **Global Inflation Linked Bond Fund** seeks to maximise real return. The Fund invests at least 70% of its total assets in inflation-linked fixed income transferable securities that are issued globally. The Fund may invest in fixed income transferable securities which are investment grade or non-investment grade (up to a limit of 10% of total assets). Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed

securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

It is intended that the maturity of the majority of the fixed income securities held by the Fund will be less than 20 years. However, since the Fund is actively managed, it still has the flexibility to invest in fixed income securities which have a maturity profile outside of the 1 to 20 years range.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg World Government Inflation-Linked 1-20yr Index USD Hedged as the appropriate benchmark.**

**Expected level of leverage of the Fund: 350% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg World Government Inflation-Linked 1-20yr Index USD Hedged (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **Global Listed Infrastructure Fund** seeks to maximise long term total returns. The Fund invests at least 70% of its total assets in infrastructure companies globally that are facilitating, enabling and leading the transition to a low carbon economy. The Fund's primary investment universe will be in the areas of electricity and gas networks, water networks, transportation infrastructure, renewable energy; and communications infrastructure (telecommunication towers, data centres and satellites).

Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may

also invest in emerging markets. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the transition criteria below.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below and at the levels set out in its SFDR Pre-Contractual Disclosure in Appendix H.

#### **Risk management measure used: Commitment Approach.**

##### **ESG Policy**

The Fund will invest in line with the principles of the transition theme as determined by the Investment Adviser (having regard to specialist third party information sources as appropriate). In normal market conditions the Fund will invest in a portfolio of equity securities of infrastructure companies with large, medium and small market capitalization. The Fund will invest at least 70% of its assets in equities or equity-related securities of infrastructure companies, that contribute to the advancement of the transition theme in any of these three categories:

**Improvers:** companies demonstrating positive progress or commitment to reducing the carbon emissions intensity of their operations;

**Solutions Providers:** companies that enable and facilitate the transition to a lower carbon economy. These companies may be assessed on how they facilitate the reduction of carbon (e.g. companies providing electricity grids that provide the transmission and distribution of renewable energy) or enable the transition to net zero. They may be assessed at an individual company level where such date is available, or they may be assessed at a global industry level on whether their industry enables other companies to transition;

**Peer Group Leaders:** companies that are already considered within their respective sectors as leaders in carbon reduction.

Further, the Fund will apply a custom ESG screen which incorporates multiple components. First, a screen is used to limit or exclude direct investment (as applicable) in corporate issuers which, in the opinion of the Investment Adviser: have any exposure to, or ties with, controversial weapons or conventional weapons; the production, distribution, licensing, retail or supply of tobacco or tobacco-related products; the production or distribution of firearms or small arms ammunitions intended for retail civilians; are deemed to have failed to comply with one or more of the ten United Nations Global Compact Principles ("UNGC"), which cover human rights, labour standards, the environment and anti-corruption. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in the extraction of, or the generation of power using, thermal coal or tar sands (also known as oil

sands). However, the Investment Adviser may invest in the securities of issuers with higher levels of revenue from these activities if the issuer has committed to a net zero transition plan and its forward-looking capital expenditure plans do not include investment in new coal- powered generation assets.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

##### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the FTSE Developed Core Infrastructure 50/50 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy.

The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.

The **Global Long-Horizon Equity Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally, with no prescribed country, regional or capitalisation limits, at least 70% of its total assets in equity securities. The Fund may invest in equity securities that, in the opinion of the Investment Adviser, have a sustained competitive advantage and will typically be held over a long-term horizon. Currency exposure is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

#### **Risk management measure used: Commitment Approach.**

##### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this

analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may refer to the MSCI All Country World Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Global Multi-Asset Income Fund** follows a flexible asset allocation policy that seeks an above average income without sacrificing long term capital growth. The Fund invests globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments. Currency exposure is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to

20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using 50% MSCI World Index / 50% Bloomberg Global Aggregate Bond Index USD Hedged as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed and the asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Adviser's discretion. The Investment Adviser may refer to a composite benchmark comprising MSCI World Index (50%) and Bloomberg Global Aggregate Bond Index USD Hedged (50%) (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. The components of the Index (i.e. MSCI World Index and Bloomberg Aggregate Bond Index USD Hedged) may be quoted separately in marketing material related to the Fund. Further details are available on the index provider websites at [www.msci.com](http://www.msci.com) and [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **Global Smaller Companies Fund** seeks to maximise long-term total returns. The Fund invests globally at least 70% of its total

assets in the equity securities of smaller capitalisation companies domiciled in or exercising the predominant part of their economic activity in developed markets which, in the opinion of the Investment Adviser, have above-average growth companies.

Smaller capitalisation companies are those whose market capitalisations (market capitalisation is the share price of the company multiplied by the number of shares issued) are lower than the largest company in the MSCI World Small Cap Index at the time of the Fund's investment.

An above-average growth company is a corporate issuer with an average annualized growth (employee or turnover) greater than 20 % per year over a three-year period.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may refer to the MSCI World Small Cap Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the market capitalisation requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index has been chosen by the Investment Adviser because it has determined it is representative of the investment universe of the Fund and should be used by investors to compare the performance of the Fund. Further details are available at the Index provider website at [www.msci.com](http://www.msci.com).

The **Global Securitised Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG")-focused investing. The Fund invests at least 80% of its total assets in tranches of global Securitised Assets (as defined below) that are rated investment grade at the time of purchase.

The Fund may hold up to 100% of its total assets in Securitised Assets. The types of Securitised Assets in which the Fund may invest include, but are not limited to, ABS, RMBS, Agency MBS, CMBS, and CLOs. The Fund may invest up to 30% of its total assets in CLOs.

The Fund will invest in both new issuances and secondary offerings of such Securitised Assets. The interest rate attached to Securitised Assets may be fixed or floating.

"Securitised Assets" are debt securities where the payment of interest and principal depends on the cash flows generated by a segregated pool of underlying assets. These underlying assets are secured or unsecured debt obligations such as residential mortgages, commercial real estate mortgages, auto loans, credit card receivables, corporate loans, and other types of debt.

Securitised Assets are normally issued with multiple classes of differing seniority (tranches) such that credit risk and weighted average life (or term) of the most senior class is typically less than the most junior tranche. Securitised Assets can include embedded derivatives, such as interest rate and foreign exchange swaps to hedge any mismatch between the underlying assets and the debt securities.

Where a Securitised Asset is subsequently downgraded it may, in the Investment Adviser's discretion, continue to be held by the Fund for a period to avoid a distressed sale.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund's currency exposure is flexibly managed. It is intended that the Fund will hedge non-USD exposure back to USD, the base currency of the Fund. It is possible that, from time to time, a significant portion of the Fund may be invested in securities from a particular geographical region.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**This Fund may have significant exposure to ABS, RMBS, Agency MBS, CMBS, and CLOs, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply an ESG investing policy (as described below) when selecting the securities to be held directly by the Fund, and in doing so, the Fund aims to meet the environmental and social criteria referred to below.

A minimum of 80% of the Fund's total assets will be invested in assets that are aligned with the environmental and/or social criteria.

A maximum of 20% of the portfolio may consist of assets that are not aligned with such environmental and social criteria. Such assets will include only cash and cash equivalents (other than the Institutional Cash Series plc LEAF), derivatives and Unscreened CLO Issuers (as later defined).

#### **Proprietary ESG externalities framework**

The Investment Adviser categorizes securities by their "externalities". Externalities are defined as the cost (or benefit) to a third party from an action undertaken by a different party. According to the Investment Adviser's proprietary ESG framework, the parties taking action are 'issuers' and the third party bearing the cost (or benefit) is broader society and the environment.

The four categories of issuers by their "externalities" are as follows:

- ▶ "Positive externalities" or "PEXT": Issuers or securities associated with some positive environmental or social impact,

highlighted as preferred holdings. Includes lower carbon emitting issuers and issuers with positive ESG credentials.

- ▶ “Baseline externalities” or “BEXT”: Issuers or securities that do not have any explicit positive impact characteristics but have no associated negative externalities either, are defined as neutral. Includes average carbon emitting issuers and those with neutral ESG credentials.
- ▶ “Discussion externalities” or “DEXT”: Where externalities of issuers or securities are unclear or potentially marginally negative (e.g. because of inadequate disclosures or limited track record),
- ▶ “Negative externalities” or “NEXT”: Issuers associated with manifestly negative environmental or social impact that are consequently avoided for ESG portfolios.

The Fund will invest at least 50% of its portfolio in securities classified by the Investment Adviser as PEXT or BEXT.

The Fund will not purchase securities classified by the Investment Adviser as “NEXT”. If a security held by the Fund is reclassified by the Investment Adviser as NEXT after the point of purchase, the Fund will divest of such security as soon as reasonably possible and practicable without requiring a forced or distressed sale.

Securities eligible for investment by the Fund that are not classified by the Investment Adviser as PEXT, BEXT or NEXT shall be classified as DEXT.

#### **Additional screens for CLOs:**

The Investment Adviser intends to limit, to the extent sufficient data is available to do so, direct investment in CLO issuers which are identified as being involved in certain activities as summarized below, namely CLO issuers which:

- ▶ are engaged in, or are otherwise exposed to, the production of controversial weapons (including cluster munitions, biological-chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons);
- ▶ derive any revenue from direct involvement in the production of nuclear weapons, nuclear weapon components or delivery platforms or the provision of auxiliary services related to nuclear weapons;
- ▶ Produce, or are exposed to issuers that produce, civilian firearms and/or civilian small arms ammunitions intended for retail to civilians;
- ▶ have themselves, or whose underlying issuers have, been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anticorruption);
- ▶ are engaged in the production of tobacco;
- ▶ have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from retail distribution of small arms intended for civilian use;

- ▶ have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from thermal coal extraction or power generation, or, oil tar sands production (also known as oil sands);
- ▶ have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from, tobacco distribution, retail, and supply of certain tobacco-related products; and
- ▶ have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from adult entertainment materials or services.

The additional screens for CLOs will be applied to CLO issuers only to the extent that sufficient ESG data is available. Where sufficient data is not available to screen a CLO issuer (an “**Unscreened CLO Issuer**”), the Fund may hold the Unscreened CLO Issuer provided such Unscreened CLO Issuers, together with cash, cash equivalents (excluding Institutional Cash Series plc LEAF) and derivatives do not comprise more than 20% of the assets of the Fund. In applying the ESG investing policy, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments without reference to any benchmark. The ICE BofA Fixed Rate ABS Master Index should be used by investors to compare the performance of the Fund.

The ***Global Unconstrained Equity Fund*** seeks to achieve long term capital growth. The Fund will take into account the principles of environmental social and governance (“ESG”) criteria in its investments selection.

The Fund invests at least 80% of its total assets in equity securities and equity-related securities (namely American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of companies domiciled in, or exercising a significant part of their economic activity in, global developed markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities. These instruments will be listed or traded on regulated markets.

The Fund's assets will be invested in accordance with the ESG Policy described below.

Although most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets and namely in:

- equity securities and equity related securities (namely ADRs and GDRs) of companies domiciled in, or exercising a significant part of their economic activity in, global emerging markets;
- cash and/or cash equivalents (such as term deposits and bank certificates), liquid government debt instruments and Money

Market Instruments (including certificates of deposit, commercial paper and bankers acceptances); and

- other CIS, including exchange-traded funds (where the objectives of such CIS are consistent with its objective or for efficiently managing cash holdings and/or collateral). The Fund may not invest more than 10% of its Net Asset Value in other CIS.

Investment decisions are based on company-specific research to identify and select equity securities that, in the opinion of the Investment Adviser, have a viable competitive advantage and the potential to produce attractive long-term capital growth. The Fund's portfolio is expected to be concentrated (i.e. it is expected to hold relatively few stocks in comparison to other funds), but there is no guarantee that this will always be the case.

The Fund may use derivatives for the purposes of efficient portfolio management.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Manager may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments). However, the Investment Adviser uses the MSCI World Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy (including, in particular, its unconstrained investment style). The Investment Adviser is not bound by the components or weighting of the Index when selecting investments, nor is the Index reflective of the Fund's ESG Policy. The Fund's portfolio holdings are expected to deviate materially from the Index. Further information on the Index can be found at [www.msci.com](http://www.msci.com). The Index should be used by investors to compare the performance of the Fund.

The **Impact Bond Fund** seeks to achieve capital growth and income over the long term (at least five consecutive years) by investing in a global portfolio of fixed income instruments which have a positive social and/or environmental impact.

The Fund invests globally at least 80% of its total assets in "impact" investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return. This includes, but is not limited to, "Green, Social and Sustainability" (GSS) bonds where the proceeds of such GSS bonds are tied to green and socially responsible projects. More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes including, but not limited to, bonds from companies which have social and/or environmental impact characteristics that the Investment Adviser has at its discretion deemed to be impactful and bespoke impact MBS pools. The Fund may invest in the full spectrum of available fixed income securities, including non-investment grade. Currency exposure is flexibly managed.

For the selection of GSS bonds, the Investment Adviser will analyse the use of proceeds of the issues and the issuer framework for alignment of the bonds with the Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability Bond Guidelines (SBG) of the International Capital Markets Association to determine suitability within the investment universe. Investment decisions will be based on issuer specific research (such as sovereign and credit analysis comprising a multi factor framework assessing global, country and issuer specific risk to determine issuers' ability and willingness to pay over the long term) to identify and select the GSS bonds and other fixed income securities that, in the opinion of the Investment Adviser, have the potential to produce attractive long-term returns whilst also being consistent with the United Nations Sustainable Development Goals ("UN SDGs"). The UN SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education, and economic growth, reduction in inequalities, all whilst tackling climate change and working to preserve the planet's oceans and forests, as set out in more detail on the UN website: <https://www.un.org/sustainabledevelopment/sustainable-development-goals>. The Fund will aim to diversify its investments across issuers that have an impact on people and the planet (the

"Impact Categories") across themes including, but not limited to, affordable housing, education and skilling, financial and digital inclusion, public health, safety and security, efficiency, electrification and digitalisation, green energy, pollution remediation and prevention, sustainable food, water and waste.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR. using ICE Green, Social & Sustainable Bond Index, EUR hedged as the appropriate benchmark.**

**Expected level of leverage of the Fund: 250% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS (including exchange traded funds) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments). The ICE Green, Social & Sustainable Bond Index, EUR hedged (the "Index") should be used by investors to compare the performance of the Fund over the long term. The Index measures the performance of GSS bonds across global markets. The Investment Adviser refers to the Index for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. Further details are available at the index provider website at [www.ice.com](http://www.ice.com).

The **India Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, India.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI India TR Net 10/40 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the

Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Japan Flexible Equity Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in, Japan. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund’s total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund’s investments. In doing so, the Investment Adviser will refer to the MSCI Japan Index (the “Index”) when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Japan Small & MidCap Opportunities Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in the equity securities of small and mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, Japan. Small and mid capitalisation companies are considered companies which, at the time of purchase, form the bottom 30% by market capitalisation of Japanese stock markets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund’s total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the S&P Japan Mid Small Cap Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and market capitalisation requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available on the index provider website at [www.spglobal.com/spdji/](http://www.spglobal.com/spdji/).

The **Latin American Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Latin America.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI EM Latin America 10/40 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index

should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **MENA Bond Fund** seeks to maximise total return. The Fund invests at least 80% of its total assets in the fixed income transferable securities (including Sukuk) of governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in eligible countries of the Middle East and North Africa (MENA) region which includes Saudi Arabia, United Arab Emirates, Qatar, Oman, Bahrain, Egypt, Kuwait, Morocco, Iraq, Jordan, Lebanon, Algeria, and Tunisia. The Fund invests at least 70% of its total assets in transferable securities denominated in US dollars. The Fund may invest in the full spectrum of available securities, including non-investment grade. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

As part of its overall fixed income strategy, the Fund may invest in Sukuk (including Sovereign Sukuk) which qualify as transferable securities within the meaning of the 2010 Law. The Fund is not managed in accordance with the Shari'ah.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using the Bloomberg Emerging Markets USD Aggregate: MENA Bond Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 150% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg Emerging Markets USD Aggregate: MENA Bond Index (the "Index") and will refer to the Index when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use

its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index has been chosen because the Investment Adviser has determined that it is representative of the investment universe of the Fund and should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices)

The **Multi-Theme Equity Fund** seeks to achieve capital growth over the long term (at least five consecutive years) in a manner consistent with the principles of environmental, social and governance (ESG) investing.

The Fund is an actively managed fund of funds. It will seek to achieve its investment objective by obtaining exposure, in respect of at least 80% of its total assets, to global equities and equity-related securities, both indirectly, through investment in units of UCITS managed by an affiliate of the BlackRock Group, and by investing directly in equity and equity-related securities and derivatives.

The Fund may invest in other Funds in the Company. The conditions applicable to investment in other Funds in the Company are set out in Appendix A, paragraph 2.4 of this Prospectus.

The Fund will not be subject to any geographic restrictions and may obtain indirect exposure to equities of companies located in developed markets and emerging markets globally. In practice the Fund may have a high allocation to particular countries or sectors at any one time.

The Fund will allocate strategically to longer-term investment opportunities intended to provide exposure to long-term themes (explained below) with the aim of gaining exposure to five global "Megatrends" (explained below) identified by the Investment Adviser. The Fund will maintain the ability to adjust these exposures tactically based on the Investment Adviser's assessment of market conditions.

The Fund will also allocate tactically to shorter-term investment opportunities on the basis of shorter-term thematic trends (explained below), where such investments may provide attractive risk and return characteristics or demonstrate better relative performance in the short term.

The five "Megatrends" are key transformative forces which are changing the global economy, in the opinion of the Investment Adviser. These are technological innovation (e.g. technology which aims to address large-scale challenges such as climate change or bring better alternatives to existing markets such as payments or streaming), demographics and social change (growth opportunities for businesses based on e.g. skills imbalance and ageing populations in advanced economies), rapid urbanization (growth opportunities for businesses arising from the significant needs of growing cities, e.g. communication networks and housing), climate change and resource scarcity (e.g. producers of sustainable energy and providers of substitutes to scarce materials) and emerging global wealth (growth opportunities for businesses arising from increasing consumer spending power in various parts of the world).

"Themes" and "Thematic trends" refers to major trends which may enable the identification of short-, medium- and long-duration

investment opportunities which are derived from fundamental (i.e. judgement-based) research into drivers of the global economy and interpretation of the major economic, political and social developments that may have an impact on asset risks and returns.

The Investment Adviser will refer to qualitative (i.e. judgement-based) and quantitative (i.e. mathematical or statistical) research analysing a wide range of economic data and market behaviour, with a focus on the five Megatrends and a range of other "thematic trends". The research may be produced by the Investment Adviser or another member of the BlackRock Group, or by a third party.

The currency exposure of the Fund is flexibly managed.

The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the QFI regime and/or via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the ESG criteria described below.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will invest at least 80% of total assets in CIS qualifying as Article 8 or 9 of the SFDR Regulation which pursue a positive ESG objective or outcome or comprised of bonds issued by governments that have an ESG sovereign rating of at least BB (as defined by third party ESG data vendors).

The Fund will seek to invest at least 20% of its total assets in Sustainable Investments. The Investment Adviser also intends the Fund to deliver exposure to Sustainable Investments that is higher than the MSCI All Countries World Index.

The Investment Adviser will analyse all the securities in the underlying investment universe to assess their contribution to environmental and social objectives. The assessment of the level of alignment in each activity is based on percentage of revenue and a defined total revenue threshold.

The Fund will maintain a minimum exposure to investments that specifically support climate objectives.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The MSCI All Countries World Index and the MSCI All Countries World Index Mid Cap Growth Net Index should be used by investors to compare the performance of the Fund. Investors may use the Index for the purposes of measuring performance of the Fund against the relevant commitments set out in the ESG policy. Further details are available on the index provider website at [www.msci.com](http://www.msci.com).

The **MyMap Cautious Fund** seeks to provide investors with a total return, taking into account both capital and income returns, through an actively managed, multi-asset portfolio, whilst targeting a cautious risk profile.

The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. Exposure to these asset classes will be achieved through investment in shares or units of a concentrated portfolio of CIS (which themselves invest in a diversified portfolio of assets), including, but not limited to, exchange traded funds and index funds managed by an affiliate of the BlackRock Group and where determined appropriate, the Fund may invest directly in derivatives and near-cash instruments.

The Fund will seek to maintain a cautious risk profile of the Fund's portfolio. The Fund will vary its underlying asset exposure in different market conditions. Given the cautious risk profile of the Fund, under normal market conditions the Fund will seek a lower exposure to equity securities, compared to a fund with a higher risk profile which would normally seek to have a lower exposure to fixed income securities. The fixed income exposure of the Fund will comprise mainly investment grade rated (but may also comprise non-investment grade or unrated) fixed and floating rate global government and corporate fixed income securities / bonds. The equity exposure will comprise mainly large and mid-capitalisation companies globally. It is not expected that the Fund's exposure to emerging markets will exceed 25% of its assets.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The **MyMap Growth Fund** seeks to provide investors with a total return, taking into account both capital and income returns, through an actively managed, multi-asset portfolio, whilst targeting a growth risk profile.

The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. Exposure to these asset classes will be achieved through investment in shares or units of a concentrated portfolio of CIS (which themselves invest in a diversified portfolio of assets), including but not limited to, exchange traded funds and index funds managed by an affiliate of the BlackRock Group and where determined appropriate, the Fund may invest directly in derivatives and near-cash instruments.

The Fund will seek to maintain a growth risk profile of the Fund's portfolio. The Fund will vary its underlying asset exposure in different market conditions. Given the growth risk profile of the Fund, under normal market conditions the Fund will seek a higher exposure to equity securities, compared to a fund with a lower risk profile which would normally seek to have a higher exposure to fixed income securities. The fixed income exposure of the Fund will comprise mainly investment grade rated (but may also comprise non-investment grade or unrated) fixed and floating rate global

government and corporate fixed income securities / bonds. The equity exposure will comprise mainly large and mid-capitalisation companies globally. It is not expected that the Fund's exposure to emerging markets will exceed 25% of its assets.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The **MyMap Moderate Fund** seeks to provide investors with a total return, taking into account both capital and income returns, through an actively managed, multi-asset portfolio, whilst targeting a moderate risk profile.

The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. Exposure to these asset classes will be achieved through investment in shares or units of a concentrated portfolio of CIS (which themselves invest in a diversified portfolio of assets), including but not limited to exchange traded funds and index funds managed by an affiliate of the BlackRock Group and where determined appropriate, the Fund may invest directly in derivatives and near-cash instruments.

The Fund will seek to maintain a moderate risk profile of the Fund's portfolio. The Fund will vary its underlying asset exposure in different market conditions. Given the moderate risk profile of the Fund, under normal market conditions the Fund will seek a higher exposure to equity securities, compared to a fund with a lower risk profile which would normally seek to have a higher exposure to fixed income securities. The fixed income exposure of the Fund will comprise mainly investment grade rated (but may also comprise non-investment grade or unrated) fixed and floating rate global government and corporate fixed income securities / bonds. The equity exposure will comprise mainly large and mid-capitalisation companies globally. It is not expected that the Fund's exposure to emerging markets will exceed 25% of its assets.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The **Natural Resources Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the natural resources sector, such as, but not limited to, companies engaged in mining, energy and agriculture.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

**Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the S&P Global Natural Resources Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available on the index provider website at [www.spglobal.com/spdji/](http://www.spglobal.com/spdji/).

The **Next Generation Health Care Fund** seeks to maximise total return by investing at least 80% of its total assets in the equity securities of companies globally that are involved with new and emerging themes in health care.

In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation across multiple industries including (without limitation) biotechnology, pharmaceuticals, life sciences tools and services, health care technology, health care equipment, medical devices and digital health care, and across multiple sub-themes including (without limitation) the following: genetic medicine, next generation diagnostics, immunotherapy, robotic-assisted surgery, biosensors and trackers, medical artificial intelligence applications and telehealth. The companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the next generation health care theme.

Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

**Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Investment Adviser will refer to the Stoxx Global Breakthrough Healthcare Index for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Stoxx Global Breakthrough Healthcare Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not

bound by the components or weighting of the Stoxx Global Breakthrough Healthcare Index when selecting investments. The MSCI All Countries World Index (MSCI ACWI) should be used by investors to compare the performance of the Fund. The MSCI ACWI measures the performance of large and mid-capitalisation stocks across developed and emerging markets countries. Investors should note that the Fund is not benchmarked against a specific Health Care focused benchmark since, as described above, it looks to give exposure to growth and innovation in the health care industry. The Fund is therefore likely to perform differently and have a different risk and volatility profile from products that do and so may generally perform better or worse than such a fund in different market conditions. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The **Next Generation Technology Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of new and emerging technology.

The Fund will focus on next generation technology themes including artificial intelligence, computing, automation, robotics, technological analytics, e-commerce, payment systems, communications technology and generative design.

In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation. Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

**ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Investment Adviser will refer to the MSCI ACWI SMID Growth/Information Technology Index for risk management purposes to ensure that the active risk (i.e. degree of deviation from the MSCI ACWI SMID Growth/Information Technology Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the MSCI ACWI SMID Growth/Information Technology Index when selecting investments. The MSCI All Countries World Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The **Sustainable Energy Fund** seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of sustainable energy companies. Sustainable energy companies are those which are engaged in alternative energy and energy technologies including: renewable energy technology; renewable energy developers; alternative fuels; energy efficiency; enabling energy and infrastructure. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with alternative energy and energy technologies and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced will apply only to the underlying securities of derivatives used by the Fund.

#### **ESG Policy**

The Fund will apply the EU Paris-Aligned Benchmark Exclusions.

The Fund will not invest in companies that are classified in the following sectors (as defined by Global Industry Classification Standard): coal and consumables; oil and gas exploration and production; and integrated oil and gas. The assessment of the level of engagement in each activity or sector may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The weighted average ESG rating of the Fund will be higher than the ESG rating of the MSCI ACWI after eliminating at least 20% of the least well-rated securities from the index.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. In the opinion of the Investment Adviser, the MSCI All Countries World Index (MSCI ACWI) is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The MSCI ACWI measures the performance of large and mid-capitalisation stocks across developed and emerging markets countries. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The **Sustainable Global Allocation Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing. The Fund invests globally in equity, debt and short term securities, of both corporate and governmental issuers, with no prescribed limits. In normal market conditions the Fund will invest at least 70% of its total assets in the securities of corporate and governmental issuers. The Fund generally will seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. The Fund may also invest a portion of its debt

portfolio in high yield fixed income transferable securities. Currency exposure is flexibly managed.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using 60% MSCI All Country World Index, 40% Bloomberg Global Aggregate Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 140% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to

investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The ESG policy reduces the investment universe of the Fund by 25%. For the purposes of measuring this reduction only, MSCI All Country World Index and Bloomberg Global Aggregate Index are used to define the investment universe and are reduced separately.

The Investment Adviser intends the Fund to have a lower carbon emissions intensity score than the Index.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to a composite benchmark comprising the MSCI All Country World Index (60%) and Bloomberg Global Aggregate Index (40%) (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. Further details are available at the index providers website at [www.msci.com](http://www.msci.com) and [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index should be used by investors to compare the performance of the Fund. In addition, given the fund's

ability to invest in global stocks and global bonds, investors may use the MSCI All Country World Index to compare the performance of the Fund vs. global equities and the Bloomberg Global Aggregate Index to compare the performance of the Fund vs. global bonds (and the Investment Adviser intends to include these comparisons in its reports on the Fund from time to time).

The ***Sustainable Global Dynamic Equity Fund*** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing. The Fund invests globally, with no prescribed country or regional limits, at least 70% of its total assets in equity securities. The Fund will generally seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. Currency exposure is flexibly managed.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund’s exposure to contingent convertible bonds is limited to 20% of total assets. The Fund’s exposure to Distressed Securities is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using MSCI All Countries World Index (MSCI ACWI) as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **ESG policy**

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to

manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials.

The ESG Policy reduces the investment universe of the Fund compared to the Index by at least 20%.

The Investment Adviser intends the Fund to have a carbon emissions intensity score that is lower than the Index.

At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund’s investments. In doing so, the Investment Adviser will refer to MSCI All Countries World Index (MSCI ACWI) (the “Index”) when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The ***Sustainable Global Infrastructure Fund*** seeks to maximise long term total return and invest at least 80% of its total assets in the equity securities of companies whose predominant economic activity is in the infrastructure sector and with a particular focus on companies aligned with and supporting the objectives of the UN Sustainable Development Goals (“UN SDGs”).

In normal market conditions the Fund will invest in a relatively concentrated portfolio of equity securities of companies with large, medium and small market capitalisation across a broad range of infrastructure sub-sectors including (without limitation) regulated utilities, renewables, transportation and communications. The Fund’s total assets will be invested in accordance with the ESG Policy described below.

Although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

## ESG Policy

The Fund will apply the EU Paris-Aligned Benchmark Exclusions.

In addition, the Investment Adviser will look at the targets and the indicators for certain UN SDG namely SDG3 (Good Health & Well-Being), SDG 6 (Clean Water & Sanitation) SDG 7 (Affordable & Clean Energy), SDG 9 (Industry, Innovation & Infrastructure) SDG 11 (Sustainable Cities & Communities) and SDG 13 (Climate Action) and identify those that are supported by the sustainable infrastructure theme. The Investment Adviser screens the investment universe to invest only in companies that align with and advance at least one of the UN SDGs.

As part of the climate objective of the Fund, the Investment Adviser seeks to invest in companies that enhance the energy transition in line with objectives SDG 7 (Affordable and Clean Energy) and SDG 13 (Climate Action). In both cases the assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

Secondly, the Investment Adviser evaluates companies aligned with key ESG credentials using data provided by external ESG data providers. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the infrastructure theme and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

The investment strategy reduces the investable universe of the Fund compared to all securities in the Fund's investment universe by at least 20%.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Risk management measure used: Commitment Approach.**

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the FTSE 50/50 Developed Core Infrastructure Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments.

The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. Further details are available at the index provider website at

[www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **Swiss Small & MidCap Opportunities Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of small and mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, Switzerland. Small and mid capitalisation companies are considered companies which, at the time of purchase, are not members of the Swiss Market Index.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs (generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the

Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the SPI Extra Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.six-group.com](http://www.six-group.com).

The **Systematic China A-Share Opportunities Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in a portfolio of equity securities of companies domiciled in, or exercising the predominant part of their activity in the People's Republic of China (PRC). The Fund is a QFI Access Fund and a Stock Connect Fund and may invest without limit in the PRC via the QFI regime and/or via the Stock Connects. For the purpose of the investment objective, the PRC excludes Hong Kong and Macau Special Administrative Regions and Taiwan and accordingly the Fund will invest only in onshore Chinese equity markets (A-Shares).

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

**Important Note: please note that the liquidity of Chinese equity markets is particularly unpredictable. Investors should read the "Liquidity Risk" and "Investments in the PRC" sections of the "Risk Considerations" section of this Prospectus and the "Suspension and Deferral" section of Appendix B of this Prospectus prior to investing in this Fund.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI China A Onshore Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Systematic China Environmental Tech Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or the main business of which is in, the People's Republic of China (PRC) in the industries and supply chain of new energy, carbon neutral, green energy, energy conservation and emission reduction themes. The Fund will have a flexible allocation between onshore and offshore Chinese equity markets. The Fund may invest in the Chinese equity markets through the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect. In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and a QFI Access Fund and may invest without limit in the PRC via the Stock Connects and/or via the QFI regime. The Fund will have a flexible allocation between onshore and offshore Chinese equity markets. Currency exposure is flexibly managed.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is

considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG score versus the Index.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to MSCI China All Share IMI Environmental 10/40 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The MSCI China All Shares Index should be used by investors to compare the performance of the Fund.

The **Systematic Multi Allocation Credit Fund** seeks to provide a positive return (net of fees) over a composite benchmark comprising (in equal proportion) Bloomberg Global Aggregate Corporate USD Hedged Index, Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index and J.P. Morgan EMBI ESG Global Diversified USD Hedged Index, by investing at least 70% of its total assets in a globally diversified range of investment grade and non-investment grade (i.e. securities which have a relatively low credit rating or which are unrated) fixed income securities (i.e. both government and corporate bonds).

The Fund may also invest in debt related securities (for example, credit bonds issued by government agencies, supranational entities (e.g. the International Bank for Reconstruction and Development) and local authorities, or hybrid securities (i.e. financial securities which combine both debt and equity characteristics such as convertible bonds). The Fund may also invest in other asset classes to give the Fund the best chance of achieving its investment objective and/or for liquidity purposes. These other asset classes include CIS, cash, assets that can be turned into cash quickly and deposits.

The Fund will use a broadly rules based active approach (i.e. an investment approach involving a clear set of pre-determined rules designed to ensure a consistent, transparent and disciplined investment process incorporating data-driven inputs (which may relate to economics, valuation, price and positioning)). The Investment Adviser will use macro-economic data (i.e. data based

on the whole economy as opposed to individual asset data), asset valuations and price and positioning based indicators (i.e. indicators employed by the Investment Adviser to analyse investor holdings and changes in these holdings over time, in order to assess investor demand and risk appetite in respect of specific asset classes) to determine asset allocation. The Investment Adviser will adjust the Fund's asset allocation (at its discretion), compared to the benchmark indices, in order to achieve the Fund's overall investment objective.

### ESG Policy

The Fund will apply the BlackRock EMEA Baseline Screens.

With respect to the investment grade and high yield corporate debt securities portion of the Fund's portfolio, the Investment Adviser will also apply additional ESG criteria when selecting the investments to be held by the Fund.

In relation with investment grade corporate debt securities, the ESG criteria applied by the Fund consists of (i) achieving a carbon emission intensity score lower and (ii) an ESG score higher than the Bloomberg Global Aggregate Corporate USD Hedged Index. The Bloomberg Global Aggregate Corporate USD Hedged Index represents the investment grade corporate debt securities portion of the Fund's index composite benchmark. In relation with high yield corporate debt securities, the criteria applied by the Fund consists of (i) achieving a carbon emission intensity score lower and (ii) an ESG score higher than the Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index. The Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index represents the high yield corporate debt securities portion of the Fund's index composite benchmark.

In relation to the emerging debt issuers, the Fund will invest in issuers that consists of the component securities of the J.P. Morgan ESG-Emerging Markets Bond Index Global Diversified Index (the Index). It is expected that this portion of the Fund's assets will be invested in either issuers within the Index or in issuers that meet the ESG selection criteria of the Index.

By investing in the constituents of the Index, the Fund's investment strategy enables it to comply with the ESG requirements of its Index as determined by the index provider. In the event that any investments cease to comply, the Fund may continue to hold such investments only until such time as the relevant issuers cease to form part of the Index and it is possible and practicable to liquidate the position.

The Fund's ESG score will be calculated as the total of each investment grade and high yield corporate debt securities' ESG score (where applicable), weighted by its market value. The ESG score of the respective benchmarks will be calculated using the ESG scores of the investment grade corporate debt securities portion of the Bloomberg Global Aggregate Corporate USD Hedged Index and the high yield corporate debt securities portion of the Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index. These scores may be quoted for individual asset classes or allocation weighted in marketing material.

The Fund's exposure to non-investment grade fixed income securities is limited to 90% of its total assets.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Risk management measure used: Relative VaR using Bloomberg Global Aggregate Corporate USD Hedged Index, Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index and J.P. Morgan EMBI ESG Global Diversified USD Hedged Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. A composite benchmark made up of the following indices in equal proportion: Bloomberg Global Aggregate Corporate USD Hedged Index, Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index and J.P. Morgan EMBI ESG Global Diversified USD Hedged Index should be used by investors to compare the performance of the Fund. The Investment Adviser may also refer to this composite benchmark for risk management purposes to ensure that the active risk (i.e. degree of deviation from the benchmark) taken by the Fund remains appropriate given the Fund's investment objective and policy. Further details are available at the index providers website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices) and [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs).

The **Systematic Global Equity High Income Fund** seeks to generate a high level of income. The Fund invests globally, with no prescribed country or regional limits, at least 70% of its total assets in equity securities.

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so may take into consideration the MSCI ACWI Minimum Volatility Index (the

"Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Systematic Global Income & Growth Fund** seeks to provide income and capital growth from its investments in a manner consistent with the principles of environmental, social and governance "ESG" focused investing.

In order to achieve its investment objective the Fund will invest globally, directly and indirectly, in the full spectrum of permitted investments including on average, typically two thirds of its total assets in equities and one third of its total assets in fixed income transferable securities (also known as debt securities which may include the Fund investing up to 20% of its total assets in some high yield fixed income transferable securities), as well as investing in units of CIS, cash, deposits and money market instruments. The Fund will not be subject to prescribed country or regional limits and although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

To evaluate a company at the time of purchase using the Fund's ESG methodology, multiple areas are focused on: environmental, social and governance outcomes, expected returns (including ESG return drivers), risk and transaction costs, as determined through proprietary research. In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic approach to stock selection. This means that stocks will be selected and weightings allocated based on their ESG attributes and on forecasts of return, risk and transaction costs.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Investment Adviser may also consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers depending on the particular ESG strategy applicable to the Fund.

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the Index and the weighted average ESG score of the Fund will be higher than the ESG score of the Index. The Investment Adviser also intends the Fund to have a lower carbon emissions intensity score by at least 30% relative to the Index.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may take into consideration a composite benchmark comprising 33.3% MSCI World Minimum Volatility Index, 33.3% MSCI All Country World Index, 16.7% BBG Global Aggregate Corporate Index and 16.7% BBG Global High Yield Corp ex Emerging Markets Index Hedged in USD (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components and weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. Further details are available at the index providers website at [www.msci.com](http://www.msci.com) and [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **Systematic Global SmallCap Fund** seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of smaller capitalisation companies in a manner consistent with the principles of ESG investing. Smaller capitalisation companies are considered companies which, at the time of purchase, form the bottom 20% by market capitalisation of global stock markets. Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in the emerging markets of the world. Currency exposure is flexibly managed.

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Fund will apply the BlackRock EMEA Baseline Screens and seeks to invest in Sustainable Investments. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's ESG score will be calculated as the total of each issuer ESG score (where applicable), weighted by its market value.

The Investment Adviser intends the Fund to have a lower carbon emissions intensity score than its Index.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

#### **Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may refer to the MSCI ACWI Small Cap Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the market capitalisation requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Systematic Islamic GCC Equity Fund** seeks to provide long term capital growth by investing at least 80% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in GCC countries.

The Fund will aim to invest in publicly listed equity securities within the Shari'ah-compliant investment universe of the Index (as defined below). The Fund may invest in initial public offerings (i) whose shares are not included in the investment universe of the Index at the time of investment, (ii) which the Investment Adviser has a reasonable expectation will be included into the Index in the near future. The Fund may also invest in other CIS, including exchanged traded funds which have been screened and approved by the Shari'ah Panel prior to such investments, ensuring compliance with the Shari'ah principles. While investing in securities not comprised in the Index, the Investment Adviser will ensure that these have been screened and approved by the Shari'ah Panel prior to such investments, ensuring compliance with the Shari'ah principles.

The Shari'ah Panel, appointed by the Investment Adviser, will be in charge of ascertaining the compliance of the Fund's operations with Shari'ah. All securities selected by the Investment Adviser within the investment universe of the Index are included within the Index according to the Shari'ah screening methodology used by the Index provider, as detailed in section "Investments in a Shari'ah Fund" of the Appendix A, and are deemed compliant with the Shari'ah principles.

The Fund may invest in Shari'ah-compliant derivatives for investment purposes or for efficient portfolio management purposes subject to approval by the Shari'ah Panel.

As the Fund is approved by the CMA as a Saudi Qualified Foreign Investors under the Saudi Qualified Foreign Investors Rules, it can invest in Saudi listed shares on the Saudi Stock Exchange subject to the applicable foreign ownership limits under the Saudi Qualified

Foreign Investors Rules and Saudi Capital Markets Law. As Approved Saudi Qualified Foreign Investors are not permitted under the current Saudi Qualified Foreign Investors Rules to also be the ultimate beneficial owners of Saudi-listed securities underlying derivatives (e.g. swaps or participation notes) traded through the Saudi swap framework, to the extent the Fund invests in derivatives, the Fund as a Saudi Qualified Foreign Investors will only be able to invest in derivatives that have non-Saudi listed securities as the underlying security.

**Risk management measure used: Commitment Approach.**

**Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the S&P GCC Composite Shariah Capped Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy will limit the extent to which the portfolio holdings will deviate from the Index. The Index has been chosen by the Investment Adviser because it has determined that it is representative of the investment universe of the Fund and should be used by investors to compare the performance of the Fund. Further details are available at the Index provider website at [www.spglobal.com/spdji/en/indices/equity/sp-saudi-arabia-domestic-shariah/#overview](http://www.spglobal.com/spdji/en/indices/equity/sp-saudi-arabia-domestic-shariah/#overview).

The **Systematic Islamic Saudi Arabia Equity Fund** seeks to provide long term capital growth by investing at least 80% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in Saudi Arabia.

The Fund will aim to invest in publicly listed equity securities within the Shari'ah-compliant investment universe of the Index (as defined below). The Fund may invest in initial public offerings (i) whose shares are not included in the investment universe of the Index at the time of investment, (ii) which the Investment Adviser has a reasonable expectation will be included into the Index in the near future. The Fund may also invest in other CIS, including exchanged traded funds which have been screened and approved by the Shari'ah Panel prior to such investments, ensuring compliance with the Shari'ah principles. While investing in securities not comprised in the Index, the Investment Adviser will ensure that these have been screened and approved by the Shari'ah Panel prior to such investments, ensuring compliance with the Shari'ah principles.

The Shari'ah Panel, appointed by the Investment Adviser, will be in charge of ascertaining the compliance of the Fund's operations with Shari'ah. All securities selected by the Investment Adviser within the investment universe of the Index are screened by the Index provider's methodology and are deemed compliant with the Shari'ah principles, as further detailed in section "Investments in a Shari'ah Fund" of the Appendix A.

The Fund may invest in Shari'ah-compliant derivatives for investment purposes or for efficient portfolio management purposes subject to approval by the Shari'ah Panel.

As the Fund is approved by the CMA as a Saudi Qualified Foreign Investors under the Saudi Qualified Foreign Investors Rules, it can invest in Saudi listed shares on the Saudi Stock Exchange subject to the applicable foreign ownership limits under the Saudi Qualified Foreign Investors Rules and Saudi Capital Markets Law. As Approved Saudi Qualified Foreign Investors are not permitted under the current Saudi Qualified Foreign Investors Rules to also be the ultimate beneficial owners of Saudi-listed securities underlying derivatives e.g. swaps or participation notes) traded through the Saudi swap framework, to the extent the Fund invests in derivatives, the Fund as a Saudi Qualified Foreign Investors will only be able to invest in derivatives that have non-Saudi listed securities as the underlying security.

**Risk management measure used: Commitment Approach.**

**Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the S&P Saudi Arabia Shariah Capped Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy will limit the extent to which the portfolio holdings will deviate from the Index. The Index has been chosen by the Investment Adviser because it has determined that it is representative of the investment universe of the Fund and should be used by investors to compare the performance of the Fund. Further details are available at the Index provider website at <https://www.spglobal.com/spdji/en/indices/equity/sp-saudi-arabia-shariah-5-10-40-capped-index>.

The **United Kingdom Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies incorporated or listed in the UK.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

**ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term

issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the FTSE All-Share Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **US Basic Value Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of

their economic activity in, the US. The Fund places particular emphasis on companies that are, in the opinion of the Investment Adviser, undervalued and therefore represent basic investment value.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

#### **Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Russell 1000 Value Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **US Dollar Bond Fund** seeks to maximise total return. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of the Fund's total assets are invested in fixed income transferable securities denominated in US dollars. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 100% of its total assets in ABS and MBS. ABS and MBS are debt securities backed or collateralised by the income stream from an underlying pool of assets or mortgage loans respectively. It is anticipated that a large portion of the ABS and MBS held by the Fund will have an investment grade rating but the Fund will be able to utilise the full spectrum of available ABS and MBS, including non-investment grade or not instruments. ABS and MBS held by the Fund may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The issuers of the ABS and MBS may be companies, governments or municipalities and, more particularly, the Fund may hold MBS issued by government-sponsored enterprises ("agency MBS"). The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). Although this will not typically be the

case, the ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg US Aggregate Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 300% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg US Aggregate Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the currency and credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **US Dollar High Yield Bond Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in high yield fixed income transferable securities denominated in US dollars. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed

securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg US High Yield 2% Constrained Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 20% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg US High Yield 2% Constrained Index (the "Index") when constructing the Fund's

portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the currency requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **US Dollar Reserve Fund** seeks to offer returns in line with money market rates consistent with preservation of capital and liquidity. The Fund invests its assets exclusively in US dollar denominated short-term assets and cash in accordance with the requirements of the MMF Regulations, as summarised in Appendix A. The Fund is a short-term money market fund.

The Fund may invest up to 15% of its total assets in securitisations and asset backed commercial paper ("ABCP") that are sufficiently liquid and have received a favourable assessment pursuant to the Internal Credit Quality Assessment Procedure.

At the discretion of the Investment Adviser, the Fund will invest in eligible reverse repurchase agreements for both liquidity management purposes and for permitted investment purposes.

The Fund may only use derivatives for the purpose of hedging the interest rate or exchange rate risks inherent in its investments. The underlying of the derivative instruments must consist of interest rates, foreign exchange rates, currencies or indices representing one of those categories.

The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.

**This Fund may have a material exposure to permitted securitisations and ABCPs and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments without reference to any benchmark. The Secured Overnight Financing Rate (SOFR) should be used by investors to compare the performance of the Fund.

The **US Dollar Short Duration Bond Fund** seeks to maximise total return. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of the Fund's total assets are invested in fixed income transferable securities denominated in US dollars with a duration of less than five years. The average duration is not more than three years. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in

Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 100% of its total assets in ABS and MBS whether investment grade or not. The ABS and MBS will generally be issued in the US, the securitised assets will be rated investment grade by at least one of the leading credit rating agencies and agency ABS and MBS will carry the same credit rating as the US Government. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 350% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the ICE BoAML 1-3 Year U.S. Government/Corporate Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the currency, credit rating and maturity requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ice.com](http://www.ice.com).

The **US Flexible Equity Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and

governance (“ESG”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants.

The Fund’s total assets will be invested in accordance with the ESG Policy described below.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has

discretion to select the Fund’s investments. In doing so, the Investment Adviser will refer to the Russell 1000 Index (the “Index”) when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **US Growth Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. The Fund places particular emphasis on companies that, in the opinion of the Investment Adviser, exhibit growth investment characteristics, such as above-average growth rates in earnings or sales and high or improving returns on capital.

The Fund’s total assets will be invested in accordance with the ESG Policy described below.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Russell 1000 Growth Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **US Mid-Cap Value Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, the US. Mid capitalisation companies are considered companies which, at the time of purchase, have market capitalisations in the range of companies included in the Russell Midcap Value Index.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

#### **Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Russell Midcap Value Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and market capitalisation requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by

investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **US Sustainable Equity Fund** seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in the United States, in a manner consistent with the principles of sustainable investing.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the Index as defined below.

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than its Index.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

Companies in the portfolio are then evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this

analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Russell 1000 Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. In the opinion of the Investment Adviser, the Index is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The Index measures the performance of large and mid-capitalisation companies in the United States. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **World Bond Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing. The Fund invests at least 70% of its total assets in investment grade fixed income transferable securities. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.

As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the

Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg Global Aggregate USD Hedged Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 350% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Bloomberg Global Aggregate USD Hedged Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **World Energy Fund** seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the exploration, development, production and distribution of energy.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI World Energy 30% Buffer 10/40 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **World Financials Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally at least 70% of its total assets in the equity securities of

companies whose predominant economic activity is financial services.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the

Investment Adviser will refer to the MSCI ACWI Financials Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **World Gold Fund** seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is gold-mining. It may also invest in the equity securities of companies whose predominant economic activity is other precious metal or mineral and base metal or mineral mining. The Fund does not hold physical gold or metal.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The FTSE Gold Mines Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **World Healthscience Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in healthcare, pharmaceuticals, medical technology and supplies and the development of biotechnology. Currency exposure is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing, the Investment Adviser will refer to the MSCI World Health Care Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **World Mining Fund** seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of mining and metals companies whose predominant economic activity is the production of base metals and industrial minerals such as iron ore and coal. The Fund may also hold the equity securities of companies whose predominant economic activity is in gold or other precious metal or mineral mining. The Fund does not hold physical gold or metal.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI ACWI Metals & Mining 30% Buffer 10/40 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **World Real Estate Securities Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the real estate sector. This may include residential and / or commercial real estate focused companies as well as real estate operating companies and real estate holding companies (for example, real estate investment trusts).

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The Fund promotes climate change mitigation efforts by seeking to achieve a reduction in one-year average carbon footprint compared to the corresponding average carbon footprint, three-years prior (e.g. the average carbon footprint in 2024 will be compared to the one in 2021). The carbon footprint is defined as the total carbon emissions (scope 1 and 2) of a portfolio normalized by its market value, represented in tons of CO<sub>2</sub> per million dollars invested.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the FTSE EPRA/Nareit Developed Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the industry sector requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **World Technology Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the technology sector.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

#### **New Funds or Share Classes**

The Directors may create new Funds or issue further Share Classes. This Prospectus will be supplemented to refer to these new Funds or Classes.

#### **Classes and Form of Shares**

Shares in the Funds are divided into Class A, Class AI, Class AJ, Class B, Class C, Class CI, Class D, Class DD, Class E, Class EI, Class I, Class J, Class S, Class SI, Class SR, Class X, Class Z and Class ZI Shares, all representing different charging structures. Shares are further divided into Distributing and Non-Distributing Share classes. Non-Distributing Shares do not pay dividends, whereas Distributing Shares pay dividends. See section "Dividends" for further information.

#### **Class A Shares**

Class A Shares are available to all investors as Distributing and Non-Distributing Shares and are issued in registered form and global certificate form. Unless otherwise requested, all Class A Shares will be issued as registered shares.

#### **Class AI Shares**

Subject to the discretion of the Management Company (taking into account local regulations), Class AI Shares are available only in Italy through specific distributors selected by the Management Company and the Principal Distributor (details of which may be obtained from the local Investor Servicing team). Class AI Shares are available as Distributing and Non-Distributing Shares and are issued as registered shares and global certificates. Unless otherwise requested, all Class AI Shares will be issued as registered shares.

#### **Class AJ Shares**

Subject to the discretion of the Management Company (taking into account local regulations), Class AJ Shares are available only through specific distributors and countries selected by the Management Company and the Principal Distributor (details of which may be obtained from the local Investor Servicing team).

Class AJ Shares are available as Distributing and Non-Distributing Shares and are issued as registered shares and global certificates. Unless otherwise requested, all Class AJ Shares will be issued as registered shares.

#### **Class B Shares**

Class B Shares are available as Distributing and Non-Distributing Shares to clients of certain distributors (which provide nominee facilities to investors) and to other investors at the discretion of the Management Company. Class B Shares are available as registered shares only.

A CDSC is charged on Class B Shares, as described in further detail in paragraph 19. of Appendix B.

Class B Shares will automatically convert without any fees into Class A Shares of the same Fund three years from the date of the original subscription in the relevant Class B Shares.

In addition, during the three years since the original subscription, Shareholders of the Class B Shares are entitled to exchange those Shares for Class B Shares of any other Fund without any CDSC fee.

For the purposes of determining the amount of the applicable CDSC, the length of time that the Shareholder has owned the Shares will be measured from the date they acquired the original Class B Shares subject to a CDSC and this will not be affected by a subsequent exchange in another Class B Share, as described in further detail in paragraph 19. of Appendix B.

### **Class C Shares**

Class C Shares are available as Distributing and Non-Distributing Shares to clients of certain distributors (which provide nominee facilities to investors) and to other investors at the discretion of the Management Company. Class C Shares are available as registered shares only.

A CDSC is charged on Class C Shares, as described in further detail in paragraph 19. of Appendix B.

### **Class CI Shares**

Class CI Shares are available as Distributing and Non-Distributing Shares to clients of certain distributors (which provide nominee facilities to investors) and to other investors at the discretion of the Management Company. Class CI Shares are available as registered shares only.

### **Class D Shares**

Subject to the discretion of the Management Company (taking into account local regulations), Class D Shares are intended for providers of independent advisory services or discretionary investment management, or other distributors who: (i) provide investment services and activities as defined by the MiFID II Directive; and (ii) have separate fee arrangements with their clients in relation to those services and activities provided; and (iii) do not receive any other fee, rebate or payment from the relevant Fund in relation to those services and activities. Class D Shares are not intended for providers of independent advisory services or discretionary portfolio management services that are subject to German law according to the German Banking Act (§ 32 KWG), in relation to those services conducted in Germany.

Class D Shares are available as Distributing and Non-Distributing Shares and are issued as registered shares and global certificates. Unless otherwise requested, all Class D Shares will be issued as registered shares.

### **Class DD Shares**

Subject to the discretion of the Management Company (taking into account local regulations), Class DD Shares are intended for providers of independent advisory services or discretionary portfolio management services that are subject to German Banking Act (§ 32 KWG), in relation to those services conducted in Germany.

Class DD Shares are available as Distributing and Non-Distributing Shares and are issued as registered shares and global certificates. Unless otherwise requested, all Class DD Shares will be issued as registered shares.

### **Class E Shares**

Class E Shares are available in certain countries, subject to the relevant regulatory approval, through specific distributors selected by the Management Company and the Principal Distributor (details of which may be obtained from the local Investor Servicing team). They are available as Distributing and Non-Distributing Shares, and are issued as registered shares and global certificates for all Funds. Unless otherwise requested, all Class E Shares will be issued as registered shares.

### **Class EI Shares**

Class EI Shares are available in certain countries, subject to the relevant regulatory approval, through specific distributors selected by the Management Company and the Principal Distributor (details

of which may be obtained from the local Investor Servicing team). They are available as Distributing and Non-Distributing Shares, and are issued as registered shares and global certificates for all Funds. Unless otherwise requested, all Class EI Shares will be issued as registered shares.

### **Class I Shares**

Class I Shares are available as Distributing and Non-Distributing Shares to Institutional Investors and are issued as registered shares and global certificates. Unless otherwise requested, all Class I Shares will be issued as registered shares. They are only available at the Management Company's discretion.

Class I Shares are only available to Institutional Investors within the meaning of Article 174 of the 2010 Law. Investors must demonstrate that they qualify as Institutional Investors by providing the Company and its Transfer Agent with sufficient evidence of their status.

On application for Class I Shares, Institutional Investors indemnify the Company and its functionaries against any losses, costs or expenses that the Company or its functionaries may incur by acting in good faith upon any declarations made or purporting to be made upon application.

### **Class J Shares**

Class J Shares are offered to funds established for the benefit of Japanese investors, or other funds at the discretion of the Management Company. Class J Shares are available as Distributing and Non-Distributing Shares. No management fees are payable in respect of Class J Shares (instead a fee will be paid to the Management Company or affiliates under an agreement). Unless otherwise requested, all Class J Shares will be issued as registered shares.

Class J Shares are only available to Institutional Investors within the meaning of Article 174 of the 2010 Law. Investors must demonstrate that they qualify as Institutional Investors by providing the Company and its Transfer Agent with sufficient evidence of their status.

On application for Class J Shares, Institutional Investors indemnify the Company and its functionaries against any losses, costs or expenses that the Company or its functionaries may incur by acting in good faith upon any declarations made or purporting to be made upon application.

### **Class K Shares**

Class K Shares are available as Distributing and Non-Distributing Shares to clients of certain Italian-based distributors (which provide nominee facilities to investors) and to other investors at the discretion of the Management Company. Class K Shares are available as registered shares only.

A CDSC is charged on Class K Shares. On redemption of Class K Shares, the relevant CDSC rate is charged on the price of the redeemed shares on the Dealing Day for redemption, calculated in the relevant Dealing Currency of the redeemed shares.

For the purposes of determining the amount of the applicable CDSC, the length of time that the Shareholder has owned the Shares will be measured from the date they acquired the original Class K Shares subject to a CDSC. As described in further detail in section "Fees, Charges and Expenses" sub-section "Contingent

Deferred Sales Charge” on page 166 of the Prospectus, the CDSC is levied by reference to the “Relevant Holding Period”, which is an aggregate of the periods during which (a) the redeemed shares, and (b) the shares from which they were derived (if any) as a result of conversion or exchange, were held in a “Fixed Maturity Fund.”

### **Class S Shares**

Subject to the discretion of the Management Company (taking into account local regulations), Class S Shares are intended for providers of independent advisory services or discretionary investment management, or other distributors who: (i) provide investment services and activities as defined by the MiFID II Directive; and (ii) have separate fee arrangements with their clients in relation to those services and activities provided; and (iii) do not receive any other fee, rebate or payment from the relevant Fund in relation to those services and activities. Class S Shares are not intended for providers of independent advisory services or discretionary portfolio management services that are subject to German law according to the German Banking Act (§ 32 KWG), in relation to those services conducted in Germany. Class S Shares are available as Distributing and Non-Distributing Shares and are issued as registered shares and global certificates. Unless otherwise requested, all Class S Shares will be issued as registered shares. Class S Shares are only available to investors who have entered into a separate agreement with the relevant entity of the BlackRock Group.

### **Class SI Shares**

Class SI Shares are available as Non-Distributing and Distributing Shares, to Institutional Investors and are issued as registered shares. Unless otherwise requested, all Class SI Shares will be issued as registered shares. They are only available at the Management Company’s discretion.

Class SI Shares are only available to Institutional Investors within the meaning of Article 174 of the 2010 Law. Investors must demonstrate that they qualify as Institutional Investors by providing the Company and its Transfer Agent with sufficient evidence of their status.

On application for Class SI Shares, Institutional Investors indemnify the Company and its functionaries against any losses, costs or expenses that the Company or its functionaries may incur by acting in good faith upon any declarations made or purporting to be made upon application.

### **Class SR Shares**

Subject to the discretion of the Management Company (taking into account local regulations), Class SR Shares are intended for providers of independent advisory services who: (i) provide investment services and activities as defined by the MiFID II Directive; and (ii) have separate fee arrangements with their clients in relation to those services and activities provided; and (iii) do not receive any other fee, rebate or payment from the relevant Fund in relation to those services and activities. Class SR Shares are not intended for providers of discretionary investment management.

### **Class X Shares**

Class X Shares are available as Non-Distributing Shares and Distributing Shares, and are issued as registered shares only at the discretion of the Investment Adviser and its affiliates. No management fees are payable in respect of Class X Shares (instead a fee will be paid to the Investment Adviser or affiliates under an agreement).

Class X Shares are only available to Institutional Investors within the meaning of Article 174 of the 2010 Law, and who have entered into a separate agreement with the relevant entity of the BlackRock Group. Investors must demonstrate that they qualify as Institutional Investors by providing the Company and its Transfer Agent with sufficient evidence of their status.

On application for Class X Shares, Institutional Investors indemnify the Company and its functionaries against any losses, costs or expenses that the Company or its functionaries may incur by acting in good faith upon any declarations made or purporting to be made upon application.

### **Class Z Shares**

Class Z Shares are available as Non-Distributing and Distributing Shares, and are only issued as registered shares. They are only available at the Management Company’s discretion.

### **Class ZI Shares**

Class ZI Shares are available as Distributing and Non-Distributing Shares to Institutional Investors and are issued as registered shares and global certificates. Unless otherwise requested, all Class ZI Shares will be issued as registered shares. They are only available at the Management Company’s discretion.

Class ZI Shares are only available to Institutional Investors within the meaning of Article 174 of the 2010 Law. Investors must demonstrate that they qualify as Institutional Investors by providing the Company and its Transfer Agent with sufficient evidence of their status.

On application for Class ZI Shares, Institutional Investors indemnify the Company and its functionaries against any losses, costs or expenses that the Company or its functionaries may incur by acting in good faith upon any declarations made or purporting to be made upon application. Class ZI Shares are only available to investors who have entered into a separate agreement with the relevant entity of the BlackRock Group.

### **Hedged Share Classes**

The hedging strategies applied to Hedged Share Classes will vary on a Fund by Fund basis. With the exception of BRL Hedged Share Classes (see further below), Funds will apply a hedging strategy which aims to mitigate currency risk between the Net Asset Value of the Fund and the currency of the Hedged Share Class, while taking account of practical considerations including transaction costs. All gains/losses or expenses arising from hedging transactions are borne separately by the Shareholders of the respective Hedged Share Classes.

Any over-hedged position arising in a Hedged Share Class is not permitted to exceed 105% of the Net Asset Value of that Hedged Share Class and any under-hedged position arising in a Hedged Share Class is not permitted to fall short of 95% of the Net Asset Value of that Hedged Share Class.

#### *BRL Hedged Share Classes*

BRL Hedged Share Classes, designated with the suffix “BRL Hedged”, are intended for Brazilian feeder funds only. A feeder fund is a CIS that invests all or nearly all of its assets in another single fund (sometimes referred to as a master fund). BRL Hedged Share Classes are available at the Management Company’s discretion.

BRL Hedged Share Classes aim to provide investors with currency exposure to BRL without using a Hedged Share Class denominated in BRL (i.e. due to currency trading restrictions on BRL).

The currency of a BRL Hedged Share Class will be the Base Currency of the relevant Fund. BRL currency exposure will be sought by converting the Net Asset Value of the BRL Hedged Share Class into BRL using financial derivative instruments (including currency forwards). The Net Asset Value of such BRL Hedged Share Class will remain denominated in the Base Currency of the relevant Fund (and the Net Asset Value per Share will be calculated in such Base Currency), however, due to the additional financial derivative instrument exposure, such Net Asset Value is expected to fluctuate in line with the fluctuation of the exchange rate between BRL and such Base Currency. This fluctuation will be reflected in the performance of the relevant BRL Hedged Share Class, and therefore the performance of such BRL Hedged Share Class may differ significantly from the performance of the other Share Classes of the relevant Fund. Profit or loss and costs and expenses resulting from this BRL Hedged Share Class hedging strategy will be reflected in the Net Asset Value of the relevant BRL Hedged Share Class. Risks in respect of BRL Hedged Share Classes will, for risk-management purposes, be measured and monitored in BRL.

#### **General**

Investors purchasing any Share Class through a distributor will be subject to the distributor's normal account opening requirements. Title to registered shares is evidenced by entries in the Company's Share register. Shareholders will receive confirmation notes of their transactions. Registered share certificates are not issued.

Global certificates are available under a registered common global certificate arrangement operated with Clearstream International and Euroclear. Global certificates are registered in the Company's share register in the name of Clearstream International and Euroclear's common depository. Physical share certificates are not issued in respect of global certificates. Global certificates may be exchanged for registered shares under arrangements between Clearstream International, Euroclear and the Central Paying Agent.

Information on global certificates and their dealing procedures is available on request from the local Investor Servicing team.

Any Shares that are listed will be listed on the Euro multi-lateral trading facility (MTF).

#### **Dealing in Fund Shares**

##### **Daily Dealing**

Dealing in Shares can normally be effected daily on any day that is a Dealing Day for the relevant Fund. Orders for subscription, redemption and conversion of Shares in all Funds except the Multi-Theme Equity Fund and a Shari'ah Fund should be received by the Transfer Agent before 12 noon Luxembourg time on the relevant Dealing Day (the "Cut-Off Point" for all Funds except the Multi-Theme Equity Fund and a Shari'ah Fund), and in respect of the Multi-Theme Equity Fund and a Shari'ah Fund, before 12 noon Luxembourg time one Business Day before the relevant Dealing Day (the "Cut-Off Point" for the Multi-Theme Equity Fund and a Shari'ah Fund). Such orders shall be processed on the relevant Dealing Day and the prices applied will be those calculated in the afternoon of the relevant Dealing Day. Any dealing orders received by the Transfer Agent after the Cut-Off Point will be dealt with on

the next available Dealing Day. At the discretion of the Company, dealing orders transmitted by a paying agent, a correspondent bank or other entity aggregating deals on behalf of its underlying clients before the Cut-Off Point but only received by the Transfer Agent after the Cut-Off Point may be treated as if they had been received before the Cut-Off Point. At the discretion of the Company, prices applied to orders backed by uncleared funds may be those calculated in the afternoon of the day following receipt of cleared funds. Further details and exceptions are described under the sections entitled "Application for Shares", "Redemption of Shares" and "Conversion of Shares" below. Once given, applications to subscribe and instructions to redeem or convert are irrevocable except in the case of suspension or deferral (see paragraphs 30. to 33. of Appendix B) and cancellation requests received before the Cut-Off Point.

Orders placed through distributors rather than directly with the Transfer Agent may be subject to different procedures which may delay receipt by the Transfer Agent. Investors should consult their distributor before placing orders in any Fund.

Shareholders should note that the Directors may determine to restrict the purchase of Shares in certain Funds, including, without limitation, where any such Fund, and/or the investment strategy of any such Fund, has become "capacity constrained", when it is in the interests of such Fund and/or its Shareholders to do so, including without limitation (by way of example), when a Fund or the investment strategy of a Fund reaches a size that in the opinion of the Management Company and/or Investment Advisers could impact its ability to implement its investment strategy, find suitable investments or manage efficiently its existing investments. When a Fund has reached its capacity limit, Shareholders will be notified accordingly, and the Directors are authorised from time to time at their discretion to resolve to close the Fund or any Share Class to new subscriptions in whole or in part (except those made through regular investment programs as agreed in advance with the Management Company at its discretion) either for a specified period or until they otherwise determine at their discretion. Should a Fund then fall beneath its capacity limit, including without limitation (by way of example), as result of redemptions or market movements, the Directors are permitted, in their absolute discretion, to re-open the Fund or any Share Class on a temporary or permanent basis. Information on whether the purchase of Shares in a Fund at a specific point in time is restricted in this way is available from the local Investor Servicing team.

##### **Non-Dealing Days**

Some Business Days will not be Dealing Days for certain Funds where, for example, a substantial amount of such Fund's portfolio is traded in market(s) which are closed. In addition, the day immediately preceding such a relevant market closure may be a non-Dealing Day for such Funds, in particular where the Cut-Off Point occurs at a time when the relevant markets are already closed to trading, so that the Funds will be unable to take appropriate actions in the underlying market(s) to reflect investments in or divestments out of Fund Shares made on that day. A list of the Business Days which will be treated as non-Dealing Days for certain Funds from time to time can be obtained from the Management Company upon request and is also available in the Library section at [www.blackrock.com/uk/individual/education/library](http://www.blackrock.com/uk/individual/education/library). This list is subject to change.

## General

Confirmation notes and other documents sent by post will be at the risk of the investor.

## Prices of Shares

All prices are determined after the deadline for receipt of dealing orders on the Dealing Day concerned, i.e. the Cut-Off Point (as set out in the section headed “Daily Dealing”, above). In the case of those Funds for which two or more Dealing Currencies are available, if an investor does not specify his choice of Dealing Currency at the time of dealing then the Base Currency of the relevant Fund will be used.

The previous Dealing Day's prices for Shares may be obtained during business hours from the local Investor Servicing team and are also available from the BlackRock website. They will also be published in such countries as required under applicable law and at the discretion of the Directors in a number of newspapers or electronic platforms worldwide. The Company cannot accept any responsibility for error or delay in the publication or non-publication of prices. Historic dealing prices for all Shares are available from the Fund Accountant.

Where Shareholders subscribe for or redeem Shares having a specific value, the number of Shares dealt in is calculated by dividing the specific value by the applicable Net Asset Value per Share (which may be rounded to up to four decimal places). Such rounding may result in a benefit to the Fund or the Shareholder. Confirmation of the Net Asset Value per Share for any transaction will be shown on your contract note.

## Class A, Class AI, Class AJ, Class D, Class DD, Class E, Class I, Class J, Class S, Class SI, Class SR, Class X, Class Z and Class ZI Shares

Class A, Class AI, Class AJ, Class D, Class DD, Class E, Class I, Class J, Class S, Class SI, Class SR, Class X, Class Z and Class ZI Shares may normally be acquired or redeemed at their Net Asset Value. Prices may include or have added to them, as appropriate: (i) an initial charge; (ii) a distribution fee; and (iii) in limited circumstances, adjustments to reflect fiscal charges and dealing costs (see paragraph 17.3 of Appendix B).

## Class B and Class C Shares

Class B and Class C Shares may normally be acquired or redeemed at their respective Net Asset Values. No charge is added to or included in the price payable on acquisition or redemption but, with the exception of Shares of the Reserve Funds, a CDSC, where applicable, will be deducted from the proceeds of redemption as described in the section “Fees, Charges and Expenses” and in paragraph 19. of Appendix B. Prices may include or have added to them, as appropriate, (i) a distribution fee; and (ii), in limited circumstances, adjustments to reflect fiscal charges and dealing costs (see paragraph 17.3 of Appendix B).

The specific levels of fees and charges that apply to each Share Class are explained in more detail in the section “Fees, Charges and Expenses” and in Appendices B, C and E.

## Application for Shares

### Applications

Initial applications for Shares must be made to the Transfer Agent on the application form. Certain distributors may allow underlying investors to submit applications through them for onward

transmission to the Transfer Agent. All initial applications for Shares must be made by completing the Application Form and returning it to the Transfer Agent by fax or via email, followed by original via post. Failure to provide the original Application Form along with all requested AML documentation will delay the completion of the transaction and consequently the ability to effect subsequent dealings in the Shares concerned. Subsequent applications for Shares may be made electronically through a ‘straight through process’ (STP) or by fax (followed by original via post) and the Management Company may, in its sole discretion, accept individual dealing orders submitted via other forms of electronic communication. Investors who do not specify a Share Class in the application will be deemed to have requested Class A Non-Distributing Shares.

All application forms and other dealing orders must contain all required information, including (but not limited to) Share Class specific information such as the International Securities Identification Number (ISIN) of the Share Class the investor wishes to deal in. Where the ISIN quoted by the investor is different from any other Share Class specific information provided by the investor with respect to such order, the quoted ISIN shall be decisive and the Management Company and the Transfer Agent may process the order accordingly taking into account the quoted ISIN only.

Applications for registered shares should be made for Shares having a specified value and fractions of Shares will be issued where appropriate. Global certificates will be issued in whole Shares only.

The right is reserved to reject any application for Shares or to accept any application in part only. In addition, issues of Shares of any or all Funds may be deferred until the next Dealing Day or suspended, where the aggregate value of orders for all Share Classes of that Fund exceeds a particular value (currently fixed by the Directors at 5% by approximate value of the Fund concerned) and the Directors consider that to give effect to such orders on the relevant Dealing Day would adversely affect the interests of existing Shareholders. This may result in some Shareholders having subscription orders deferred on a particular Dealing Day, whilst others do not. Applications for Shares so deferred will be dealt with in priority to later requests.

Investors must meet the investment criteria for any Share Class in which they intend to invest (such as minimum initial investment and specified investor type as set out under the section “Classes and Form of Shares”). If an investor purchases Shares in a Share Class in which that investor does not meet the investment criteria then the Directors reserve the right to redeem the investor's holding. In such a scenario the Directors are not obliged to give the investor prior notice of their actions. The Directors may also decide, upon prior consultation with, and the approval of, the investor who does not meet the investment criteria, to switch the investor into a more appropriate class in the relevant Fund (where available). If the Shareholder holds Class X Shares but has not entered into a separate agreement with the relevant entity of the BlackRock Group (as set out under the section “Classes and Form of Shares”) then the Directors reserve the right, subject to 30 calendar days' prior notice, to switch the Shareholder into a Share Class other than Class X in the relevant Fund, without prior consultation with or approval of the Shareholder.

## Data Protection

Prospective investors and investors are referred to the privacy notice of the Company and the Management Company, which is provided in the Application Form (the "Privacy Notice").

The Privacy Notice explains, among other things, how the Company and the Management Company process personal data about individuals who invest in the Company or apply to invest in the Company and personal data about the directors, officers, employees and ultimate beneficial owners of Institutional Investors.

The Privacy Notice may be updated from time to time. The latest version of the Privacy Notice is available at [www.blackrock.com](http://www.blackrock.com).

If you would like further information on the collection, use, disclosure, transfer or processing of your personal data or the exercise of any of the rights in relation to personal data as set out in the Privacy Notice, please address questions and requests to: The Data Protection Officer, BlackRock, 12 Throgmorton Avenue, London, EC2N 2DL.

## Settlement

For all Shares, settlement in cleared funds net of bank charges must be made within three Business Days of the relevant Dealing Day unless otherwise specified in the contract note in cases where the standard settlement date is a public holiday for the currency of settlement. As an exception, for a Shari'ah Fund, settlement in cleared funds net of bank charges must be made within two Business Days of the relevant Dealing Day unless otherwise specified in the contract note in cases where the standard settlement date is a public holiday for the currency of settlement. If timely settlement is not made (or a completed application form is not received for an initial subscription) the relevant allotment of Shares may be cancelled and an applicant may be required to compensate the relevant distributor and/or the Company (see paragraph 27. of Appendix B).

Payment instructions are summarised at the back of this Prospectus. Payments made by cash or cheque will not be accepted.

Settlement should normally be made in the Dealing Currency for the relevant Fund or, if there are two or more Dealing Currencies for the relevant Fund, in the one specified by the investor. Except when investing in Share Classes using SAR as Dealing Currency, an investor may, by prior arrangement with the Transfer Agent, provide the Transfer Agent with any major freely convertible currency and the Transfer Agent will arrange the necessary currency exchange transaction. Any such currency exchange will be effected at the investor's risk and cost. Investors seeking to invest in Share Classes using SAR as Dealing Currency will only be able to subscribe by using SAR.

The Management Company may, at its discretion, accept subscriptions in specie, or partly in cash and in specie, subject always to the minimum initial subscription amounts and the additional subscription amounts and provided further that the value of such subscription in specie (after deduction of any relevant charges and expenses) equals the subscription price of the Shares. Such securities will be valued on the relevant Dealing Day and, in accordance with Luxembourg law, may be subject to a special report of the Auditor. Further details of redemptions in specie are set out in paragraphs 24. and 25. of Appendix B.

## Minimum Subscription

The minimum initial subscription in respect of Class A, Class B, Class C, Class CI, Class E, Class EI Shares, and Class K Shares is currently USD5,000, for Class AI Shares USD25,000, for Class AJ USD10,000, for Class D Shares USD100,000, for Class DD Shares USD1 million, for Class I Shares, Class J Shares, Class X Shares and Class Z Shares USD10 million, for Class ZI Shares USD 25 million, for Class S Shares USD 50 million, and Class SR Shares, USD 250 million and for Class SI Shares USD 1billion. In all cases, the minimum subscription will also be accepted in the approximate equivalent in the relevant Dealing Currency. The minimum for additions to existing holdings of any Share Class of a Fund is USD1,000 or the approximate equivalent. These minima may be varied for any particular case or distributor or generally. Details of the current minima are available from the local Investor Servicing team.

## Compliance with Applicable Laws and Regulations

Investors who wish to subscribe for Shares must provide the Transfer Agent and/or the Management Company, the Depositary and/or a Distributor (as required) with all necessary information which they may reasonably require to verify the identity of the investor in accordance with applicable Luxembourg regulations on the prevention of the use of the financial sector for money laundering purposes and in particular in accordance with CSSF circular 13/556 as amended, restated or supplemented from time to time and in order to comply with screening requirements issued by any regulatory, governmental or other official authorities in respect of applicable international financial sanctions. Failure to do so may result in the Management Company rejecting a subscription order.

Furthermore, as a result of any other applicable laws and regulations, including but not limited to, other relevant anti-money laundering legislation, requirements in respect of applicable international financial sanctions including sanctions administered by the United States Office of Foreign Asset Control, European Union and United Nations, tax laws and regulatory requirements, investors may be required, in certain circumstances, to provide additional documentation to confirm their identity or provide other relevant information pursuant to such laws and regulations, as may be required from time to time, even if an existing investor. Any information provided by investors will be used only for the purposes of compliance with these requirements and all original documentation will be duly returned to the relevant investor. Until the Transfer Agent and/or the Management Company and/or the Depositary receives the requested documentation or additional information, subsequent redemption requests may be rejected or there may be a delay in processing these and the Management Company reserves the right in all cases to withhold redemption proceeds until such a time as the required documentation or additional information is received.

The Transfer Agent shall at all times comply with any obligations imposed by any applicable laws, rules and regulations with respect to money laundering prevention and, in particular, with the law of 12 November 2004 on the fight against money laundering and terrorist financing and CSSF Circular 13/556 of 16 January 2013, as amended, restated or supplemented from time to time. The Transfer Agent shall furthermore adopt procedures designed to ensure, to the extent applicable, that it and its agents shall comply with the foregoing undertaking. Moreover, the Transfer Agent is legally responsible for identifying the origin of monies transferred, provided that such duties may be delegated, always subject to the

responsibility and control of the Transfer Agent, to investment professionals and financial sector institutions required to enforce an identification procedure equal to that required under Luxembourg law. The Transfer Agent as well as the Depositary acting on behalf of the Company may require at any time additional documentation relating to the admission of an investor as a Shareholder.

## Redemption of Shares

### Applications to Redeem

**Instructions for the redemption of registered Shares should normally be given electronically through an approved 'straight through process' (STP) provider. If this option is unavailable then this can be completed by fax (followed by original via post) to the Transfer Agent and the Management Company may, at its sole discretion, accept individual dealing orders submitted via other forms of electronic communication. Instructions given by fax must be followed in each case by an email or a phone call to the local Investor Services teams on the same day before cut off, making sure fax instruction has been received by the Transfer Agent. Certain distributors may allow underlying investors to submit instructions for redemptions through them for onward transmission to the Transfer Agent. They may also be given to the Transfer Agent in original or by fax followed by confirmation via phone or email unless a coverall renunciation and fax indemnity including instructions to pay the redemption proceeds to a specified bank account has been agreed. Failure to provide original confirmations may delay settlement of the transaction (see also paragraph 27. of Appendix B). Redemption requests must include the full name(s) and address of the holders, the name of the Fund, the Class (including whether it is the Distributing or Non-Distributing Share Class), the value or number of Shares to be redeemed and full settlement instructions and must be signed according to the latest Authorized Signatory List (ASL) provided to the Transfer Agent. If a redemption order is made for a cash amount or for a number of Shares to a higher value than that of the applicant's account then this order will be automatically treated as an order to redeem all of the Shares on the applicant's account.**

Redemptions may be suspended or deferred as described in paragraphs 30. to 33. of Appendix B.

### Settlement

Subject to paragraph 23. of Appendix B, redemption payments will normally be despatched in the relevant Dealing Currency on the third Business Day after the relevant Dealing Day, provided that the relevant documents (as described above and any applicable money laundering prevention or international financial sanctions information) have been received. Except when investing in Share Classes using SAR as Dealing Currency, Shareholders may, on written request to the Transfer Agent, ask for redemption payments may be made in such other currency as may be freely purchased by the Transfer Agent with the relevant Dealing Currency and such currency exchange will be effected at the Shareholder's cost. Shareholders of Share Classes using SAR as Dealing Currency will only be able to receive SAR as payment for their redemption requests.

Redemption payments for Shares are made by telegraphic transfer to the Shareholder's bank account at the Shareholder's cost. Investors with bank accounts in the European Union must provide

the IBAN (International Bank Account Number) and BIC (Bank Identifier Code) of their account.

The Directors may, subject to the prior consent of a Shareholder and to the minimum dealing and holding amounts, effect a payment of redemption proceeds in specie. Such redemption in specie will be valued on the relevant Dealing Day and, in accordance with Luxembourg law, may be subject to a special report of the Auditor. Further details of redemptions in specie are set out in paragraph 25. of Appendix B.

## Conversion of Shares

### Switching Between Funds and Share Classes

Shareholders may request conversions of their shareholdings between the same Share Classes of the various Funds and thereby alter the balance of their portfolios to reflect changing market conditions.

Shareholders may also request conversion from one Share Class in a Fund to another Share Class of either the same Fund or a different Fund or between Distributing and Non-Distributing Shares of the same Class or between Hedged Share Classes and unhedged Shares of the same Class (where available).

Exceptions apply as follows:

- ▶ In the case of Shari'ah Funds, conversions are only permitted within the same Shari'ah Fund.
- ▶ For all Funds, conversions into or from any SAR-denominated Share Class may only be requested from or into another SAR-denominated Share Class.

In addition, investors may convert between any Class of UK Reporting Fund status Shares in one currency and the equivalent class of Distributing Shares in non-UK Reporting Fund status shares of the same currency. Investors should note that a conversion between a Share Class which has UK Reporting Fund status and a Share Class which does not have UK Reporting Fund status may cause the Shareholder to be subject to an "offshore income gain" on the eventual disposal of their interest in the Fund. If this is the case, any capital gain realised by investors on disposal of their investment (including any capital gain accruing in relation to the period where they held the UK Reporting Fund Share Class) may be subject to tax as income at their appropriate income tax rate. Investors should seek their own professional tax advice in this regard.

Investors should note that a conversion between Shares held in different Funds may give rise to an immediate taxable event.

As tax laws differ widely from country to country, investors should consult their tax advisers as to the tax implications of such a conversion in their individual circumstances.

Shareholders may request conversions of the whole or part of their shareholding provided that the Shareholder satisfies the conditions applicable to investment in the Share Class being converted into (see "Classes and Form of Shares" above). Such conditions include but are not limited to:

- ▶ satisfying any minimum investment requirement;

- ▶ demonstrating that they qualify as an eligible investor for the purposes of investing in a particular Share Class;
- ▶ the suitability of the charging structure of the Share Class being converted into; and by
- ▶ satisfying any conversion charges that may apply.

provided that the Management Company may, at its discretion, elect to waive any of these requirements where it deems such action reasonable and appropriate under the circumstances.

For holders of all Share Classes, there is normally no conversion charge by the Management Company. However, conversion charges may apply in some circumstances – see paragraphs 20. to 22. of Appendix B.

Subject to any exceptions and conditions applicable to Class B Shares as further described in the section “Classes and Form of Shares”, conversion from a Share Class carrying a CDSC, where the CDSC is still outstanding, will not be treated as a conversion but as a redemption thereby causing any CDSC due at the time of conversion to become payable. Conversion and investment into and out of certain Share Classes is at the discretion of the Management Company. At the Management Company’s discretion and provided always that the investor is an Institutional Investor, conversion from any Share Class into Class I, Class X or Class J Shares is permitted.

The Management Company may, at its discretion, refuse conversions in order to ensure that the Shares are not held by or on behalf of any person who does not meet the conditions applicable to investment in that Share Class, or who would then hold the Shares in circumstances which could give rise to a breach of law, or requirements of any country, government or regulatory authority on the part of that person or the Company or give rise to adverse tax or other pecuniary consequences for the Company, including a requirement to register under any securities or investment or similar laws or requirements of any country or authority. In addition, the Management Company may, at its discretion, refuse conversions between Share Classes if it presented currency conversion issues, for example, if the relevant currencies in respect of the conversion were illiquid at the time.

### Instructions to Convert

**Instructions for the conversion of registered shares should normally be given electronically through an approved ‘straight through process’ (STP) provider. If this option is unavailable then this can be completed by fax (followed by original via post) to the Transfer Agent and the Management Company may, at its sole discretion, accept individual conversion orders submitted via other forms of electronic communication. Instructions given by fax must be followed in each case by an email or a phone call to the local Investor Services teams on the same day before cut off, making sure fax instruction has been received by the Transfer Agent. Failure to provide adequate original confirmation may delay the conversion. Certain distributors may allow underlying investors to submit instructions for conversions through them for onward transmission to the Transfer Agent. Instructions may also be given in original to the Transfer Agent. Conversion requests (or original confirmations of such requests) must include the full name(s) and address of the holder(s), the name of the Fund, the Class (including whether**

**it is the Distributing or Non-Distributing Share class), the value or number of Shares to be converted and the Fund to be converted into (and the choice of Dealing Currency of the Fund where more than one is available) and whether or not they are UK Reporting Fund status Shares. Where the Funds to which a conversion relates have different Dealing Currencies, currency will be converted at the relevant rate of exchange on the Dealing Day on which the conversion is effected.**

Conversions may be suspended or deferred as described in paragraphs 30. to 33. of Appendix B and an order for conversion into a Fund constituting over 10% of such Fund’s value may not be accepted, as described in paragraph 32. of Appendix B.

### Exchange Privilege

Certain distributors allow Shareholders who have acquired Shares through it to exchange their Shares for shares with a similar charging structure of certain other funds, provided that the distributor believes that an exchange is permitted under applicable law and regulations. Details of this exchange privilege can be obtained from your financial advisor.

### Transfer of Shares

Shareholders holding Shares of any Class through a distributor or other intermediary may request that their existing holdings be transferred to another distributor or intermediary which has an agreement with the Principal Distributor. Any transfer of Class B and Class C Shares in this way is subject to the payment of any outstanding CDSC to the investor’s existing distributor or intermediary.

### Minimum Dealing & Holding Sizes

The Company may refuse to comply with redemption, conversion or transfer instructions if they are given in respect of part of a holding in the relevant Share Class which has a value of less than USD1,000 or the approximate equivalent in the relevant Dealing Currency or if to do so would result in such a holding of less than USD5,000 (except for Class D, Class DD, Class I, Class J, Class S, Class SI, Class SR, Class X, Class Z and Class ZI Shares where there is no on-going minimum holding size once the initial subscription amount has been made). These minima may be varied for any particular case or distributor or generally. Details of any variations to the current minima shown above are available from the local Investor Servicing team.

If as a result of a withdrawal, switch or transfer a small balance of Shares, meaning an amount of USD5 (or its currency equivalent) or less, is held by a Shareholder, the Management Company shall have absolute discretion to realise this small balance and donate the proceeds to a Luxembourg or UK registered charity selected by the Management Company.

### Dividend Policy

The Directors’ current policy depends on the Fund and Share Class.

#### a) Fund

The following Funds distribute income gross of expenses across all distributing share classes:

Asian Multi-Asset Income Fund  
 Dynamic High Income Fund  
 Emerging Markets Equity Income Fund  
 European Multi-Asset Income Fund  
 European Equity Income Fund  
 Global Equity Income Fund  
 Global Multi-Asset Income Fund  
 Natural Resources Fund  
 Systematic Global Equity High Income Fund  
 Systematic Global Income & Growth Fund

All distributing share classes of the above-named Funds have a “G” mentioned in their naming convention except for Distributing (S), (R), (T), (C) and (Y) Shares which are distributing gross income for all Funds. These Distributing Shares where income is distributed gross of expenses will also be referred to as Distributing (G) Shares e.g. Class A4(G). For the avoidance of doubt, Distributing (G) Shares may also be issued for Funds not named above.

If dividends calculated in respect of Distributing (Y) Shares are lower than the Dividend Threshold Amount, this will mean that there may be a shortfall which may need to be paid out of capital and therefore may have the effect of reducing capital. This risk to capital growth is particularly relevant for Distributing (Y), (T) and (C) Shares as, for these Share Classes, a material portion of any dividend payment may be made out of capital. Therefore, the capital that is returned via the dividend will not be available for future capital growth.

#### b) Share Class

The aim for all Distributing (M) and (Q) classes of the Systematic Global Equity High Income Fund and of the Systematic Global Income & Growth Fund is to maintain a stable yield for Shareholders. At the discretion of the Directors the dividend may include distributions from capital, net realised and net unrealised capital gains.

For Non-Distributing Share Classes the current policy is to retain and reinvest all net income. In this regard the income is retained in the Net Asset Value and reflected in the Net Asset Value per share of the relevant Class. For the Distributing Share Classes, the current policy is to distribute substantially all of the investment income (where available) for the period after deduction of expenses for Share Classes which distribute net or all of the investment income for the period, and potentially a portion of capital before deduction of expenses for Share Classes which distribute gross income or total return. Please refer to the “Calculation of Dividends” section below for further information regarding the distribution policies for each Distributing Share Class.

The Directors may also determine if and to what extent dividends may include distributions from both net realised and net unrealised capital gains. Where Distributing Share Classes pay dividends that include net realised capital gains or net unrealised capital gains, or, in the case of Funds which distribute income gross of expenses, dividends may include initially subscribed capital. Shareholders should note that dividends distributed in this manner may be taxable as income, depending on the local tax legislation, and should seek their own professional tax advice in this regard.

Where a Fund has UK Reporting Fund status and reported income exceeds distributions made then the surplus shall be treated as a deemed dividend and will be taxed as income, subject to the tax status of the Shareholder.

For those Funds which offer UK Reporting Fund status Share Classes, the frequency at which the dividend payment is generally made is determined by the Fund type as described in the section “Classes and Form of Shares”.

A list of Dealing Currencies, Hedged Share Classes, Distributing and Non-Distributing Share Classes and UK Reporting Fund status Classes is available from the Company’s registered office and the local Investor Servicing team.

Please refer to the table below entitled “Calculation of Dividends” which sets out the usual calculation methodology for the Distributing Share Classes. Please refer to the table below entitled “Declaration, Payment of Reinvestment of Dividend” which sets out the usual declaration, payment and reinvestment methodology for the Distributing Share Classes. The Directors may make additional dividend payments or amend the policy of a Distributing Share Class under certain circumstances.

Distributing Shares with alternative payment frequencies may be introduced at the Directors’ discretion. Confirmation of additional distribution frequencies and the date of their availability can be obtained from the Company’s registered office and the local Investor Servicing team. The Company may operate income equalisation arrangements with a view to ensuring that the level of net income accrued within a Fund (or gross income in the case of Distributing (G) Shares, Distributing (S) Shares, Distributing (T), Distributing (C) and Distributing (Y) Shares, and gross income and any Interest Rate Differential for Distributing (R) Shares) attributable to each Share is not affected by the issue, conversion or redemption of those Shares during an accounting period.

Where an investor buys Shares during an accounting period, the price at which those Shares were bought may be deemed to include an amount of net income accrued since the date of the last distribution. The result is that, in relation to Distributing (A) Shares, Distributing (M) Shares, Distributing (Q) Shares, Distributing (R) Shares, Distributing (S) Shares, Distributing (T) Shares, Distributing (Y) Shares or Distributing (C) Shares, the first distribution which an investor receives following purchase may include a repayment of capital. Non-Distributing Shares do not distribute income and so should not be impacted in the same way.

Where an Shareholder sells Shares during an accounting period the redemption price in relation to Distributing (A) Shares, Distributing (M) Shares or Distributing (Q) Shares, may be deemed to include an amount of net income accrued since the date of the last distribution. In the case of Distributing (G) Shares, Distributing (S) Shares, Distributing (T), Distributing (C) and Distributing (Y) Shares equalisation will be calculated on the gross income of the Fund, and in the case of Distributing (R) Shares, equalisation will be calculated on the gross income of the Fund and any Interest Rate Differential attributable to the Shares. Non-Distributing Shares do not distribute income and so should not be impacted in the same way.

The list of Funds operating income equalisation arrangements and the income element included in the daily price of Distributing (A) Shares, Distributing (M) Shares, Distributing (Q) Shares,

Distributing (R) Shares, Distributing (S) Shares, Distributing (T) Shares, Distributing (C) and Distributing (Y) Shares will be made available upon request from the Company's registered office.

## Calculation of Dividends

The usual calculation method for each type of Distributing Share Class is described below. The methodology may be changed at the Directors discretion.

|                                                                                                    | Calculation Method                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>Distributing (T) Shares</b><br><br><b>(which may be referred to using the number 10 e.g. A10)</b> | <p>The dividend is calculated at the discretion of the Directors on the basis of the expected gross total return over a given period (such period to be determined by the Directors from time to time) with a view to providing consistent monthly dividend distributions to Shareholders during such period.</p> <p>It is expected that the dividend may include distributions from capital and/or net realised and net unrealised capital gains and may at times exceed the increase in the NAV per Share from the net income and realised and unrealised gains of the Share Class. Where distributions are made from capital, this will have the effect of reducing capital and therefore will reduce the potential for future capital growth.</p> <p>The dividend is calculated monthly (on the last business day of each calendar month) and distributed to Shareholders based upon the number of Shares held at record date.</p> <p>In volatile or exceptional market conditions, the level of distributions may be permitted to fluctuate more and there may also be an increase in distributions from capital and/or net realised and net unrealised gains, at the discretion of the Directors, to manage consistency of distributions resulting in increased capital erosion when the fund's level of income falls.</p>                                                                                  |
| <b>Distributing (Q) Shares</b><br><br><b>(which may be referred to using the number 5 e.g. A5)</b>   | <p>The dividend is calculated quarterly based upon income accrued during the dividend period less expenses.</p> <p>The dividend is distributed to Shareholders based upon the number of Shares held at the declaration date.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Distributing (A) Shares</b><br><br><b>(which may be referred to using the number 4 e.g. A4)</b>   | <p>The dividend is calculated annually (on the last business day of each financial year) based upon income accrued during the dividend period less expenses.</p> <p>The dividend is distributed to Shareholders based upon the number of Shares held at record date.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Distributing (Y) Shares</b><br><br><b>(which may be referred to using the number 9 e.g. A9)</b>   | <p>The dividend is calculated at the discretion of the Directors on the basis of the expected gross income over a given period (such period to be determined by the Directors from time to time) with a view to providing quarterly dividend distributions to Shareholders which will on an annual basis be equal to, or greater than, the Dividend Threshold Amount. Quarterly dividend distributions may exceed the Dividend Threshold Amount, where underlying income generated on the Fund's assets is greater the Dividend Threshold Amount on an annual basis.</p> <p>At the discretion of the Directors the dividend may include distributions from capital and/or net realised and net unrealised capital gains in order to ensure that the dividend is on an annual basis at least equal to the Dividend Threshold Amount. This will have the effect of reducing the potential for capital growth.</p> <p>The dividend is calculated quarterly (on the last business day of each calendar quarter) and distributed to Shareholders based upon the number of Shares held at record date.</p> <p>In volatile or exceptional market conditions, there may be an increase in distributions from capital, net realised and net unrealised gains, at the discretion of the Directors, to manage consistency of distributions resulting in increased capital erosion when the fund's level of income falls.</p> |
| <b>Distributing (C) Shares</b><br><br><b>(which may be referred to using the number 11 e.g. A11)</b> | <p>The dividend is calculated at the discretion of the Directors with a view to providing consistent monthly dividend distributions to Shareholders over a given period (such period to be determined by the Directors from time to time) that may not be linked to income or capital gains.</p> <p>It is expected that the dividend will include distributions from capital and/or net realised and unrealised capital gains and may exceed the increase in the NAV per Share from the net income and realized and unrealized gains of the Share Class.</p> <p>Where distributions are made from capital, this will have the effect of reducing capital and therefore will reduce the potential for future capital growth.</p> <p>In volatile or exceptional market conditions, the level of distributions may be permitted to fluctuate more and there may also be an increase in distributions from capital and/or net realised and net unrealised gains, at the discretion of the Directors, to manage consistency of distributions resulting in increased capital erosion when the fund's level of income falls.</p> <p>The dividend is distributed to Shareholders based upon the number of shares held at record date.</p>                                                                                                                                                                                 |

Record date: only investors who are officially recorded as shareholders on this date will receive the distribution. Record date is one day prior to declaration date.

Non-Distributing Shares of any class are also referred to using the number 2 e.g. Class A2.

Where Distributing (G) Shares are issued for (D), (M), (Q) or (A) Shares, the calculation method set out above is amended to reflect that income is distributed gross of expenses. Distributing (G) Shares is the default Share Class issued in respect of the Equity Income Funds.

Most of the Funds deduct their charges from the income produced from their investments however some may deduct some or all of their charges from capital. Whilst this might allow more income to be distributed, it will also have the effect of reducing the potential for capital growth.

## Declaration, Payment of Reinvestment of Dividend

The chart below describes the usual process for the declaration and payment of dividends and the reinvestment options available to Shareholders. The declaration date frequency may change at the Directors discretion.

| Dividend Classification* | Declaration                                                                                                                                                                                                  | Payment                                                                                                                                                    | Automatic Dividend Reinvestment                                                                                                                                                                                                 | Payment Method                                                                                                                                                                                                                                                                                                                        |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Distributing (D) Shares  | Last Business Day of each calendar month in the Dealing Currency(ies) of the relevant Fund (or such other Business Day as the Directors may determine and notify to Shareholders, in advance if possible).   | Within 1 calendar month of declaration to Shareholders holding Shares during the period following the previous declaration.                                | Dividends will be automatically reinvested in further Shares of the same form of the same class of the same Fund, unless the Shareholder requests otherwise either in writing to the Transfer Agent or on the application form. | Dividends (where a Shareholder has notified the Transfer Agent or on the application form) are paid directly into the Shareholder's bank account by telegraphic transfer in the Shareholder's chosen dealing currency at the Shareholder's cost (except as otherwise agreed with by an underlying investor with his/her distributor). |
| Distributing (M) Shares  |                                                                                                                                                                                                              | Within 1 calendar month of declaration to Shareholders registered in the share register on the Business Day prior to the declaration date.                 |                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                       |
| Distributing (S) Shares  |                                                                                                                                                                                                              |                                                                                                                                                            |                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                       |

\* The options described in this chart will also apply to the respective class(es) of UK Reporting Fund status Shares and apply to both net and gross distributions.

No initial charge or CDSC is made on Class A Distributing Shares, issued by way of dividend reinvestment.

It should be borne in mind that re-invested dividends may be treated for tax purposes in most jurisdictions as income received by the Shareholder. **Investors should seek their own professional tax advice in this regard.**

## Fees, Charges and Expenses

### **Please see Appendix E for a summary of fees and charges.**

Further information on fees, charges and expenses is given in paragraphs 16. to 22. of Appendix C, and the following information must be read in conjunction with those paragraphs.

### **Management Fees**

The Company will pay the management fee at an annual rate as shown in Appendix E. The level of management fee varies according to which Fund and share class the investor buys. These fees accrue daily, are based on the Net Asset Value of the relevant Fund and are paid monthly. Certain costs and fees are paid out of the management fee, including the fees of the Investment Advisers.

To assist in achieving the investment objectives of the Reserve Funds, in certain circumstances, including where market conditions cause decreasing yields on the Fund's underlying investments, the Management Company may determine to waive its right to take the full amount of management fees to which it is entitled on any particular day or days. The Management Company may exercise its discretion to do this without prejudice to its entitlement to take the full amount of the management fee accruing on any future days.

In relation to the SR Share Class, a single fee is charged (which comprises the management fee and the Annual Service Charge) which forms part of the ongoing charges figure. Please refer to the applicable KID for the ongoing charges figure. Please note that this figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying CIS (if any).

### **Distribution Fees**

The Company pays annual distribution fees as shown in Appendix E. These fees accrue daily, are based on the Net Asset Value of the relevant Fund (reflecting, when applicable, any adjustment to the Net Asset Value of the relevant Fund, as described in paragraph 17.3 of Appendix B) and are paid monthly.

### **Securities Lending Fees**

The securities lending agent, BlackRock Advisors (UK) Limited, receives remuneration in relation to its activities. Such remuneration amounts to 37.5% of the gross revenue from the securities lending activities, with all direct and indirect costs borne out of BlackRock's share, including any third party operational and administrative costs, and will pay any third party operational and administrative costs associated with, and incurred in respect of, such activity, out of its fee. All revenue generated from securities lending activities net of the securities lending agent's fee will be returned to the Company. The relevant Funds receive 62.5% of the gross revenue from the securities lending activities.

The fee of the securities lending agent represents direct costs (and if relevant indirect operational costs/fees) of the Company's securities lending activities. To the extent that the securities lending costs payable to third parties exceed the fee received by the securities lending agent, the securities lending agent will discharge any excess amounts out of its own assets. Full financial details of the amounts earned, and expenses incurred with respect to securities lending for the Funds, including fees paid or payable, will also be included in the annual and semi-annual financial statements. The securities lending arrangements and associated costs will be reviewed at least annually.

The securities lending agent is a related party to the Management Company.

### **Annual Service Charge**

The Company pays an Annual Service Charge to the Management Company.

The level of Annual Service Charge may vary at the Directors' discretion, as agreed with the Management Company, and will apply at different rates across the various Funds and Share Classes issued by the Company. However, it has been agreed between the Directors and the Management Company that the Annual Service Charge currently paid shall not exceed 0.25% per annum. It is accrued daily, based on the Net Asset Value of the relevant Share Class and paid monthly.

The Directors and the Management Company set the level of the Annual Service Charge at a rate which aims to ensure that the ongoing charges of each Fund remain competitive when compared across a broad market of similar investment products available to Shareholders in the Funds, taking into account a number of criteria such as the market sector of each Fund and the Fund's performance relative to its peer group.

The Annual Service Charge is used by the Management Company to meet all fixed and variable operating and administrative costs and expenses incurred by the Company, with the exception of the Depositary fees, Distribution fees, Securities Lending fees, any fees arising from borrowings (including for the avoidance of doubt any commitment fee that may be due to the lender), any costs relating to (EU and non EU – see "Other Fees" further below) withholding tax reclaims (plus any taxes or interest thereon) and any taxes at an investment or Company level.

These operating and administrative expenses include all third party expenses and other recoverable costs incurred by or on behalf of the Company from time to time, including but not limited to, fund accounting fees, transfer agency fees (including sub-transfer agency and associated platform dealing charges), all professional costs, such as consultancy, legal, tax advisory and audit fees, Directors' fees (for those Directors who are not employees of the BlackRock Group), travel expenses, reasonable out-of-pocket expenses, printing, publication, translation and all other costs relating to Shareholder reporting, regulatory filing and licence fees, correspondent and other banking charges, software support and maintenance, operational costs and expenses attributed to the Investor Servicing teams and other global administration services provided by various BlackRock Group companies.

The Management Company bears the risk of ensuring that the Funds' ongoing charges remain competitive. Accordingly the Management Company is entitled to retain any amount of the Annual Service Charge paid to it which is in excess of the actual expenses incurred by the Company during any period whereas any costs and expenses incurred by the Company in any period which exceed the amount of Annual Service Charge that is paid to the Management Company, shall be borne by the Management Company or another BlackRock Group company.

### **Research Fees**

In accordance with new rules coming into force in January 2018 pursuant to EU Directive 2014/65/EU on markets in financial instruments referred to as "MiFID II", BlackRock Group will no

longer pay for external research via client trading commissions for its MiFID II-impacted funds ("MiFID II-impacted funds").

The BlackRock Group shall meet such research costs out of its own resources. MiFID II-impacted funds are those which have appointed a BlackRock Group MiFID firm as investment adviser or where investment management has been delegated by such firm to an overseas affiliate.

Funds which have directly appointed an overseas affiliate of the BlackRock Group within a third country (i.e. outside the European Union) to perform portfolio management are not in-scope for the purposes of MiFID II and will be subject to the local laws and market practices governing external research in the applicable jurisdiction of the relevant affiliate. This means that costs of external research may continue to be met out of the assets of such funds. A list of such funds is available on request from the Management Company or can be found on the BlackRock website: [www.blackrock.com/corporate/mifid/research/bgf](http://www.blackrock.com/corporate/mifid/research/bgf).

Where investments are made in non-BlackRock Group funds, they will continue to be subject to the external manager's approach to paying for external research in each case. This approach may be different from that of the BlackRock Group and may include the collection of a research charge alongside trading commissions in accordance with applicable laws and market practice. This means that the costs of external research may continue to be met out of the assets within the fund.

#### Other Fees

The Company also pays the fees of the Depositary and any professional costs relating to European Union withholding tax reclaims. Any commitment fees arising from borrowings or any costs relating to withholding tax reclaims will be allocated between the relevant Funds on a fair and equitable basis. Any costs relating to withholding tax reclaims outside of the EU (plus any taxes or interest thereon) will be paid by the Company and will be allocated between the relevant Funds on a fair and equitable basis. As the Company has had a good degree of success with its EU withholding tax reclaims (which are paid by the Company) to date, any costs associated with non-EU withholding tax reclaims will no longer be paid out of the Annual Service Charge and will now be paid by the Company and allocated between the relevant Funds on a fair and equitable basis.

These fees are normally allocated between the relevant Funds (plus any taxes thereon) on a fair and equitable basis at the Directors' discretion.

#### Initial Charge

On application for subscription of Shares an initial charge, payable to the Principal Distributor, of up to 5% may be added to the price of Class A Shares, Class AI, Class AJ Shares, Class D Shares and Class DD Shares. An initial charge of up to 3% may be added to the price of some Class E Shares (see Appendix E for details) subject to terms available from relevant distributors. No initial charge is levied on subscriptions into the Reserve Funds.

#### Contingent Deferred Sales Charge

If applicable, a decreasing CDSC of up to 3% may be deducted from redemption proceeds and paid on redemption of all Class B Shares of all Funds (except in the case of Reserve Funds) unless the Shares are held for more than three years. As further specified

below, the relevant CDSC will decrease on a quarterly basis by 0.25% until the expiry of the three-year period.

| Redemption Period                    | Contingent Deferred Sales Charge (% of Net Asset Value of the Shares on the date of redemption) |
|--------------------------------------|-------------------------------------------------------------------------------------------------|
| Within first 3 months                | 3.00                                                                                            |

| After 21 months and before 24 months | 1.25                                                                                            |
| After 24 months and before 27 months | 1.00                                                                                            |
| After 27 months and before 30 months | 0.75                                                                                            |
| After 30 months and before 33 months | 0.50                                                                                            |
| After 33 months and before 36 months | 0.25                                                                                            |
| After 36 months                      | 0.00                                                                                            |

If applicable, a fixed CDSC of 1% may be deducted from redemption proceeds and paid on redemption of all Class C Shares of all Funds (except in the case of Reserve Funds) unless the Shares are held for more than a year.

If applicable, a decreasing CDSC of up to 1.50%, 1.80%, 2.00 or 2.40%, calculated on the basis of the management fee per annum multiplied by the maturity term of the relevant Class, may be deducted from redemption proceeds and paid on redemption of all Class K Shares of all Funds unless the Shares are held until Fund's maturity (3 to 4 years). The relevant CDSC of Class K Shares will decrease on a quarterly basis, as further specified below:

| Redemption Period                    | Contingent Deferred Sales Charge (% of Net Asset Value of the Shares on the date of redemption) |      |       |      |
|--------------------------------------|-------------------------------------------------------------------------------------------------|------|-------|------|
| Within first 3 months                | 1.50                                                                                            | 1.80 | 2.00  | 2.40 |
| After 3 months and before 6 months   | 1.375                                                                                           | 1.65 | 1.875 | 2.38 |
| After 6 months and before 9 months   | 1.250                                                                                           | 1.50 | 1.750 | 2.25 |
| After 9 months and before 12 months  | 1.125                                                                                           | 1.35 | 1.625 | 2.13 |
| After 12 months and before 15 months | 1.00                                                                                            | 1.20 | 1.500 | 2.00 |
| After 15 months and before 18 months | 0.875                                                                                           | 1.05 | 1.375 | 1.88 |
| After 18 months and before 21 months | 0.750                                                                                           | 0.90 | 1.250 | 1.75 |
| After 21 months and before 24 months | 0.625                                                                                           | 0.75 | 1.125 | 1.63 |
| After 24 months and before 27 months | 0.500                                                                                           | 0.60 | 1.000 | 1.50 |
| After 27 months and before 30 months | 0.375                                                                                           | 0.45 | 0.875 | 1.38 |
| After 30 months and before 33 months | 0.250                                                                                           | 0.30 | 0.750 | 1.25 |

|                                      |              |              |       |      |
|--------------------------------------|--------------|--------------|-------|------|
| After 33 months and before 36 months | 0.125        | 0.15         | 0.625 | 1.13 |
| After 36 months and before 39 months | 0.00         | 0.00         | 0.500 | 1.00 |

| After 45 months and before 48 months |              |              | 0.125 | 0.63 |
| After 48 months                      |              |              | 0.00  | 0.00 |

The CDSC may be waived or reduced by the relevant distributor at its discretion or for Shareholders who, after purchasing Class K Shares, become US Persons and are required to redeem their Shares as a result (see paragraph 4. of Appendix B).

Further information on the CDSC is contained in the section "Classes and Form of Shares" as well as in paragraph 19. of Appendix B.

### Conversion Charges

Conversion charges may be applied by selected distributors, on conversion from a Reserve Fund into another of the Company's Funds, or on excessively frequent conversions. See paragraphs 20. to 22. of Appendix B for further details.

### Redemption Charges

A redemption charge of up to a maximum of 2% of the redemption proceeds can be charged to a Shareholder at the discretion of the Directors where the Directors, in their reasonable opinion, suspect that Shareholder of excessive trading as described in the section "Excessive Trading Policy". This charge will be made for the benefit of the Funds, and Shareholders will be notified in their contract notes if such a fee has been charged. This charge will be in addition to any applicable conversion charge or deferred sales charge.

### General

Over time, the different charging structures summarised above may result in different Share Classes of the same Fund, which were bought at the same time, producing different investment returns. In this context investors may also wish to consider the services provided by their distributor in relation to their Shares.

The Management Company may pay fees and charges to the Principal Distributor, which in turn may pay fees to other distributors as described in paragraph 20. of Appendix C where permitted by applicable local laws.

### Shari'ah Panel and Shari'ah Screening Provider Fees

The Investment Adviser will pay the Shari'ah Panel and Shari'ah Screening Provider an annual fee which will not exceed USD 20,000 per annum. A USD 25,000 one-time fee for the review and certification of each relevant Shari'ah Fund (Fatwa) by the Shari'ah Panel will also be charged.

### Taxation

The following summary is based on current law and practice, which is subject to change.

Shareholders should inform themselves of, and when appropriate consult their professional advisers on, the possible tax consequences of subscribing for, buying, holding, redeeming, converting or selling shares or the effects of any equalisation policy relevant in respect of shares, under the laws of their country of citizenship, residence or domicile. Investors should note that the levels and bases of, and relief from, taxation can change.

### Luxembourg

Under present Luxembourg law and practice, the Company is not liable to any Luxembourg income or capital gains tax, nor are dividends paid by the Company subject to any Luxembourg withholding tax. However, the Company is liable to a tax in Luxembourg of 0.05% per annum or, in the case of the Reserve Funds, Class I, Class J, Class SI and Class X Shares, 0.01% per annum of its Net Asset Value, payable quarterly on the basis of the value of the net assets of the respective Funds at the end of the relevant calendar quarter. No stamp or other tax is payable in Luxembourg on the issue of Shares.

The benefit of the 0.01% tax rate is available to Class I, Class J, Class SI, Class X and Class ZI Shares on the basis of Luxembourg legal, regulatory and tax provisions as known to the Company at the date of this Prospectus and at the time of admission of subsequent investors. However, such assessment is subject to interpretations on the status of an Institutional Investor by any competent authorities as will exist from time to time. Any reclassification made by an authority as to the status of an investor may submit all of Class I, Class J, Class SI, Class X and Class ZI Shares to a tax of 0.05%.

Under Luxembourg tax law in force at the time of this Prospectus, Shareholders are not subject to any capital gains, income, withholding, estate, inheritance or other taxes in Luxembourg (except for those domiciled, resident or having a permanent establishment in Luxembourg). Non-resident Shareholders are not subject to tax in Luxembourg on any capital gain realized from January 1, 2011, upon disposal of Shares held in the Company.

### United Kingdom

The Company is not resident in the UK for tax purposes and it is the intention of the Directors to continue to conduct the affairs of the Company so that it does not become resident in the UK. Accordingly it should not be subject to UK taxation (except in respect of income for which every investor is inherently subject to UK tax). Any gain realised by a UK resident shareholder on disposal of Shares in the Company that have not obtained UK Reporting Fund status would be expected to be an 'offshore income gain' subject to tax as income. UK residents are likely to be subject to income tax on any dividends declared in respect of such shares in the Company, even if they elect for such dividends to be reinvested.

Dividends from offshore funds received by investors subject to UK income tax will be taxed as dividends in the hands of the investor provided that the fund does not at any time during the distribution period hold more than 60% of its assets in interest-bearing (or economically similar) form. From 6 April 2016, there is no longer a notional 10% tax credit on dividend distributions. Instead, a £2,000 tax free dividend allowance has been introduced for UK individuals. Dividends received in excess of this threshold will be taxed at 7.5% for basic rate taxpayers, 32.5% for higher rate taxpayers and 38.1% for additional rate taxpayers.

If the fund holds more than 60% of its assets in interest-bearing (or economically similar) form, any distribution received by UK investors who are subject to income tax will be treated as a payment of yearly interest. The tax rates applying will be those applying to interest (section 378A ITTOIA 2005).

The attention of individuals resident in the UK is drawn to sections 714 to 751 of the Income Tax Act 2007, which contains provisions for preventing avoidance of income tax by transactions resulting in the transfer of income to persons (including companies) abroad and may render them liable to taxation in respect of undistributed income and profits of the Company.

The provisions of section 13 TCGA 1992 may apply to a holding in the Company. Where at least 50% of the Shares are held by five or fewer participators, then any UK person who (together with connected parties) holds more than 25% of the Shares may be taxed upon his proportion of the chargeable gain realised by the Fund as calculated for UK tax purposes.

On the death of a UK resident and domiciled individual shareholder, the shareholder's estate (excluding the UK Reporting Fund status Share Classes) may be liable to pay income tax on any accrued gain. Inheritance tax may be due on the value of the holding after deduction of income tax and subject to any available inheritance tax exemptions.

A UK corporate shareholder may be subject to UK taxation in relation to its holdings in the Fund. It may be required to apply fair value accounting basis in respect of its shareholding in accordance with provisions of Chapter 3 Part 6 Corporation Tax Act 2009 and any increases or decreases in value of the Shares may be taken into account as receipts or deductions for corporation tax purposes.

Corporate Shareholders resident in the UK for taxation purposes should note that the "controlled foreign companies" legislation contained in Part 9A of TIOPA 2010 could apply to any UK resident company which is, either alone or together with persons connected or associated with it for taxation purposes, deemed to be interested in 25 per cent or more of any chargeable profits of a non-UK resident company, where that non-UK resident company is controlled by residents of the UK and meets certain other criteria (broadly that it is resident in a low tax jurisdiction). "Control" is defined in Chapter 18, Part 9A of TIOPA 2010. A non-UK resident company is controlled by persons (whether companies, individuals or others) who are resident in the UK for taxation purposes or is controlled by two persons taken together, one of whom is resident in the UK for tax purposes and has at least 40 per cent of the interests, rights and powers by which those persons control the non-UK resident company, and the other of whom has at least 40 per cent and not more than 55 per cent of such interests, rights and powers. The effect of these provisions could be to render such Shareholders liable to UK corporation tax in respect of the income of the Fund.

It is the intention of the Company that assets held by the Funds will generally be held for investment purposes and not for the purposes of trading. Even if His Majesty's Revenue & Customs ("HMRC") successfully argued that a Fund is trading for UK tax purposes, it is expected that the conditions of the Investment Management Exemption ("IME") should be met, although no guarantee is given in this respect. Assuming that the requirements of the IME are satisfied, the Fund should not be subject to UK tax in respect of the

profits / gains earned on its investments (except in respect of income for which every investor is inherently subject to UK tax). This is on the basis that the investments held by the Funds meet the definition of a "specified transaction" as defined in The Investment Adviser (Specified Transactions) Regulations 2009. It is expected that the assets held by the Company should meet the definition of a "specified transaction", although no guarantee is given in this respect.

If the Company failed to satisfy the conditions of the IME or if any investments held are not considered to be a "specified transaction", this may lead to tax leakage within the Funds.

In addition to the above, if HMRC successfully argue that a Fund is trading for UK tax purposes, the returns earned by the Fund from its interest in the underlying assets may need to be included in the Fund's calculation of "income" for the purposes of computing the relevant amount to report to investors in order to meet the requirements for UK Reporting Fund status. However, it is considered that the investments held by the Funds should meet the definition of an "investment transaction" as defined by The Offshore Funds (Tax) Regulations 2009 ("the regulations") which came into force on 1 December 2009. Therefore, it is considered that these investments should be considered as "non-trading transactions" as outlined in the regulations. This assumption is on the basis that the Company meets both the "equivalence condition" and the "genuine diversity of ownership" condition as outlined in the regulations. On the basis that the Company is a UCITS fund, the first condition should be met. Shares in each of the Funds shall be widely available. The intended categories of investors for the Funds are retail and Institutional Investors. Shares in the Funds shall be marketed and made available sufficiently widely to reach the intended categories of investors, and in a manner appropriate to attract those categories of investors. On this basis, the second condition should also be met.

### UK Reporting Funds

In November 2009, the UK Government enacted Statutory Instrument 2009 / 3001 (The Offshore Funds (Tax) Regulations 2009) which provides for a new framework for the taxation of investments in offshore funds, and which operates by reference to whether a fund opts into a reporting regime ("UK Reporting Funds") or not ("Non- UK Reporting Funds"). Under the regime, investors in UK Reporting Funds are subject to tax on the share of the UK Reporting Fund's income attributable to their holding in the Fund, whether or not distributed, but any gains on disposal of their holding are subject to capital gains tax. The UK Reporting Funds regime has applied to the Company since 1 September 2010.

A list of the Funds which currently have UK Reporting Fund status is available at <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

Provided such certification is obtained, shareholders who are UK taxpayers (i.e. resident in the UK for tax purposes) will (unless regarded as trading in securities) have any gain realised upon disposal or conversion of the Company's Share treated as a capital gain which will be subject to UK capital gains tax. Otherwise any such gain would be treated as income subject to income tax. In the case of individuals domiciled for UK tax purposes outside the UK, the tax implications in relation to any gain on disposal will depend on whether or not the individual is subject to the remittance basis of taxation. Please note that the changes made in Finance Bill 2008 relating to the UK taxation of non-domiciled, UK resident

individuals are complex therefore investors subject to the remittance basis of taxation should seek their own professional advice.

In accordance with Regulation 90 of the Offshore Funds (Tax) Regulations 2009, shareholder reports are made available within six months of the end of the reporting period at [www.blackrock.com/uk/reportingfundstatus](http://www.blackrock.com/uk/reportingfundstatus). The intention of the Offshore Fund Reporting regulations is that reportable income data shall principally be made available on a website accessible to UK investors. Alternatively, the shareholders may if they so require, request a hard copy of the reporting fund data for any given year. Such requests must be made in writing to the following address:

Head of Product Tax, BlackRock Investment Management (UK) Limited, 12 Throgmorton Avenue, London EC2N 2DL.

Each such request must be received within three months of the end of the reporting period. Unless the Management Company is notified to the contrary in the manner described above, it is understood that investors do not require their report to be made available other than by accessing the appropriate website.

### **Hong Kong**

Hong Kong profits tax is charged on the Hong Kong sourced profits of an offshore fund that carries on a trade, business or profession in Hong Kong. The Fund believes that, as an offshore fund, it will be entitled to exemptions from this tax with respect to profits derived from (i) "specified transactions" (as defined in Revenue Ordinance 2006 (the "Ordinance")) arranged by BAMNA, a "specified person" (as defined in the Ordinance), and (ii) transactions "incidental" to carrying out specified transactions. However certain other types of transactions in which the Fund may engage may be subject to this tax, and if the Fund's "incidental" transactions exceed 5% of the total transactions effected, the incidental transactions will be subject to the profits tax.

### **People's Republic of China ("PRC")**

Under prevailing tax regulations, a 10% withholding income tax is imposed on PRC sourced dividends and interests from non-government bonds paid to the relevant Funds unless the rate is reduced under an applicable tax treaty.

On 14 November 2014, the Ministry of Finance, China Securities Regulatory Commission and the State Administration of Taxation, acting with State Council's approval, jointly released Circular 79, which temporarily exempts QFIs and QFIs from tax on capital gains derived from the trading of shares and other equity interest investments on or after 17 November 2014. Subsequently, Circulars 81 and 127 were issued to temporarily exempt tax on capital gains derived from trading of A-Shares through the Stock Connects.

From 1 May 2016, Value Added Tax ("VAT") is levied on certain income derived by the relevant Funds, including interest income from non-government bonds and trading gains, unless specifically exempted by the PRC tax authorities. VAT exemptions currently apply to trading of QFII and QFI products, A-Shares traded on the Stock Connects and debt securities traded in the China Interbank Bond Market.

On 22 November 2018, the Ministry of Finance and State Administration of Taxation jointly issued Circular 108 providing foreign Institutional Investors temporary exemption from

withholding income tax and VAT with respect to interests derived from non-government bonds in the domestic bond market for the period from 7 November 2018 to 6 November 2021. Circular 108 is silent on the PRC tax treatment with respect to non-government bond interest derived prior to 7 November 2018.

There is a risk the PRC tax authorities may withdraw the temporary tax exemptions in the future and seek to collect capital gains tax realised on the sale of A-Shares or withholding income tax and VAT on interest income from non-government bonds to the relevant Funds without giving any prior notice. If the tax exemptions are withdrawn, any taxes arising from or to the relevant Funds may be directly borne by or indirectly passed on to the Funds and may result in a substantial impact to their Net Asset Value. As with any Net Asset Value adjustment, investors may be advantaged or disadvantaged depending on when the investors purchased/subscribed and/or sold/redeemed the Shares of the Funds.

Any changes in PRC tax law, future clarifications thereof, and/or subsequent retroactive enforcement by the PRC tax authorities may result in a loss which could be material to the relevant Funds.

The Management Company will keep the provisioning policy for tax liability under review and may, in its discretion from time to time, make a provision for potential tax liabilities if in their opinion such provision is warranted or as further clarified by the PRC in notifications.

### **Foreign Account Tax Compliance Act ("FATCA") and other cross-border reporting systems**

The US-Luxembourg Agreement to Improve International Tax Compliance and to Implement FATCA (the "US-Luxembourg IGA") was entered into with the intention of enabling the Luxembourg implementation of the Foreign Account Tax Compliance Act provisions of the U.S. Hiring Incentives to Restore Employment Act ("FATCA"), which impose a reporting regime and potentially a 30% withholding tax on certain payments made from (or attributable to) US sources or in respect of US assets to certain categories of recipient including a non-US financial institution (a "foreign financial institution" or "FFI") that does not comply with the terms of FATCA and is not otherwise exempt. Certain financial institutions ("reporting financial institutions") are required to provide certain information about their US accountholders to the *Administration des contributions directes* (the "ACD") (which information will in turn be provided to the US tax authority) pursuant to the US-Luxembourg IGA. It is expected that the Company will constitute a reporting financial institution for these purposes. Accordingly, the Company is required to provide certain information about its direct and, in certain circumstances, its indirect US Shareholders to the ACD (which information will in turn be provided to the US tax authorities) and is also required to register with the US Internal Revenue Service. It is the intention of the Company and the Management Company to procure that the Company is treated as complying with the terms of FATCA by complying with the terms of the reporting system contemplated by the US-Luxembourg IGA. No assurance can, however, be provided that the Company will be able to comply with FATCA and, in the event that it is not able to do so, a 30% withholding tax may be imposed on payments it receives from (or which are attributable to) US sources or in respect of US assets, which may reduce the amounts available to it to make payments to its Shareholders.

A number of jurisdictions have entered into multilateral arrangements modelled on the Common Reporting Standard for Automatic Exchange of Financial Account Information published by the Organisation for Economic Co-operation and Development (OECD). This will require the Company to provide certain information to the ACD about its direct and, in certain circumstances, its indirect Shareholders from the jurisdictions which are party to such arrangements (which information will in turn be provided to the relevant tax authorities).

In light of the above, Shareholders in the Company will be required to provide certain information to the Company to comply with the terms of the reporting systems. Please note that the Directors have determined that US Persons are not permitted to own units in the Funds. Please see paragraph 4. of Appendix B below.

#### **Generally**

Dividends and interest received by the Company on its investments may be subject to withholding taxes in the countries of origin which are generally irrecoverable as the Company itself is exempt from income tax. Recent European Union case law may, however, reduce the amount of such irrecoverable tax.

Investors should inform themselves of, and when appropriate consult their professional advisers on, the possible tax consequences of subscribing for, buying, holding, redeeming, converting or selling Shares under the laws of their country of citizenship, residence or domicile. Investors should note that the levels and bases of, and reliefs from, taxation can change.

Under current Luxembourg tax law, there is no withholding tax on payments made by the Company or its paying agent to the Shareholders. Indeed, in accordance with the law of 25 November 2014, Luxembourg elected out of the withholding tax system in favour of an automatic exchange of information under the Council

Directive 2003/48/EC on the taxation of savings income (the "EU Savings Directive") as from 1 January 2015. The information to be automatically exchanged relates to the identity and the residence of the beneficial owner, the name or denomination and the address of the paying agent, the account number of the beneficial owner, or instead the identification of the debt claim generating the interests, and the total amount of interest or assimilated income generated.

The European Union has adopted a Directive repealing the EU Savings Directive from 1 January 2016 (1 January 2017 in the case of Austria) (in each case subject to transitional arrangements).

#### **Meetings and Reports**

##### **Meetings**

An annual general meeting of Shareholders of the Company is held in Luxembourg each year. Other general meetings of Shareholders will be held at such times and places as are indicated in the notices of such meetings. Notices are sent to registered Shareholders and (when legally required) published in such newspapers as decided by the Board of Directors and in the RESA in Luxembourg.

##### **Reports**

Financial periods of the Company end on 31 August each year. The annual report containing the audited financial accounts of the Company and of each of the Funds in respect of the preceding financial period is available within four months of the relevant year-end. An unaudited interim report is available within two months of the end of the relevant half-year. Copies of all reports are available upon request at the registered office of the Company and from the local Investor Servicing teams. Registered Shareholders will be sent a personal statement of account twice-yearly.

## Appendix A – Investment and Borrowing Powers and Restrictions

### Investment and Borrowing Powers

1. The Company's Articles of Association permit it to invest in transferable securities and other liquid financial assets, to the full extent permitted by Luxembourg law. The Articles have the effect that, subject to the law, it is at the Directors' discretion to determine any restrictions on investment or on borrowing or on the pledging of the Company's assets.

The Company's Articles of Association permit the subscription, acquisition and holding of securities issued or to be issued by one or more other Fund of the Company under the conditions set forth by Luxembourg laws and regulations.

### Investment and Borrowing Restrictions

2. The following restrictions of Luxembourg law and (where relevant) of the Directors currently apply to the Company:

- 2.1 The investments of each Fund shall consist of:

- 2.1.1 Transferable securities and money market instruments admitted to official listings on regulated stock exchanges in Member States of the European Union (the "EU"),

- 2.1.2 Transferable securities and money market instruments dealt in on other regulated markets in Member States of the EU, that are operating regularly, are recognised and are open to the public,

- 2.1.3 Transferable securities and money market instruments admitted to official listings on stock exchanges in any other country in Europe, Asia, Oceania, the American continents and Africa,

- 2.1.4 Transferable securities and money market instruments dealt in on other regulated markets that are operating regularly, are recognised and open to the public of any other country in Europe, Asia, Oceania, the American continents and Africa,

- 2.1.5 Recently issued transferable securities and money market instruments provided that the terms of the issue include an undertaking that application will be made for admission to the official listing on one of the stock exchanges as specified in 2.1.1 and 2.1.3 or regulated markets that are operating regularly, are recognised and open to the public as specified in 2.1.2 and 2.1.4 and that such admission is secured within a year of issue,

- 2.1.6 Units of UCITS and/or other undertakings for collective investment ("UCIs") within the meaning of Article 1(2), points (a) and (b) of Directive 2009/65/EC, as amended, whether they are situated in a Member State or not, provided that:

- ▶ such other UCIs are authorised under laws which provide that they are subject to supervision considered by CSSF to be equivalent to that laid down in EU law, and that cooperation between authorities is sufficiently ensured;
- ▶ the level of protection for Shareholders in the other UCIs is equivalent to that provided for Shareholders in a UCITS, and in particular that the rules on asset segregation, borrowing, lending, and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of Directive 2009/65/EC, as amended;
- ▶ the business of the other UCIs is reported in half-yearly and annual reports to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period;

- ▶ no more than 10% of the UCITS' or the other UCIs' assets (or of the assets of any sub-fund thereof, provided that the principle of segregation of liabilities of the different compartments is ensured in relation to third parties), whose acquisition is contemplated, can, according to their constitutional documents, be invested in aggregate in units of other UCITS or other UCIs;

- 2.1.7 deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institution has its registered office in an EU Member State or, if the registered office of the credit institution is situated in a non-Member State, provided that it is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law;

- 2.1.8 financial derivative instruments, including equivalent cash-settled instruments, dealt in on a regulated market; and/or financial derivative instruments dealt in OTC derivatives, provided that:

- ▶ the underlying consists of instruments described in subparagraphs 2.1.1 to 2.1.7 above and 2.1.9 below, financial indices, interest rates, foreign exchange rates or currencies, in which the Company may invest according to its investment objectives;
- ▶ the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the CSSF; and
- ▶ the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative;

- 2.1.9 money market instruments other than those dealt in on a regulated market, which fall under Article 1 of the 2010 Law, if the issue or issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are:

- ▶ issued or guaranteed by a central, regional or local authority or central bank of an EU Member State, the European Central Bank, the EU or the European Investment Bank, a non-Member State or, in the case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong; or
- ▶ issued by an undertaking any securities of which are dealt in on regulated markets referred to in subparagraphs 2.1.1, 2.1.2 or 2.1.3 above; or
- ▶ issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by EU law, or by an establishment which is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those laid down by EU law; or
- ▶ issued by other bodies belonging to the categories approved by the CSSF provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the issuer is a company whose capital and reserves amount to at least €10 million and which presents and publishes its annual accounts in accordance with Directive 78/660/EEC, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.

2.2 Furthermore, each Fund may invest no more than 10% of its net assets in transferable securities and money market instruments other than those referred to in sub-paragraph 2.1.1 to 2.1.9.

2.3 Each Fund may acquire the units of other Funds in the Company, UCITS and/or other UCIs referred to in paragraph 2.1.6 Each Fund's aggregate investment in UCITS, other Funds in the Company and other UCIs will not exceed 10% of its net assets in order that the Funds are deemed eligible investments for other UCITS funds provided that such restriction shall not be applied to the following Funds:

- ▶ MyMap Cautious Fund
- ▶ MyMap Moderate Fund
- ▶ MyMap Growth Fund
- ▶ Multi-Theme Equity Fund

In relation to the Climate Transition Multi-Asset Fund only, the 10% limit will not apply to the Fund until such time as the Fund's net asset value exceeds €100m (for the first time) and in relation to the China Multi-Asset Fund and Systematic Global Income & Growth Fund the 10% limit will not apply to the Fund until such time as the Fund's net asset value exceeds \$200m (for the first time).

In relation to Euro High Yield Fixed Maturity Bond Fund 2028, Euro High Income Fixed Maturity Bond Fund 2028, Euro High Income Fixed Maturity Bond Fund 2029, Euro Income Fixed Maturity Bond Fund 2029 and Euro Income Fixed Maturity Bond Fund 2030, each of the Funds will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents during its Pre-Investment Period.

In relation to the Circular Economy Fund only, of the 10% investment permitted in other UCIs referred to in paragraph 2.3, no more than 5% may be invested in eligible UCIs that are not listed on a stock exchange of a Member State of the OECD.

Each Fund may acquire the units of UCITS and/or other UCIs referred to in paragraph 2.1.6, provided that no more than 20% of such Fund's net assets are invested in the units of any single UCITS and/or other UCI. For the purpose of the application of this limit, each target UCITS or UCI sub-fund of an umbrella is to be considered as a separate issuer, provided that segregated liability in relation to third party claims between sub-funds is effective.

The maximum aggregate investment by a Fund in units of eligible UCIs other than UCITS may not exceed 30% of such Fund's net assets.

When each Fund has acquired shares of UCITS and/or other UCIs, the assets of the respective UCITS or other UCIs do not have to be combined for the purposes of the limits laid down in paragraph 2.6.

When a Fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same Investment Adviser or by any other company with which the Investment Adviser is linked by common management or control, or by a substantial direct or indirect holding, no subscription or redemption fees may be charged to the Company on its investment in the units of such other UCITS and/or UCIs. For further details please refer to the section entitled "Conflicts of interest from relationships within the BlackRock Group" of this Prospectus.

Where a Fund invests a substantial proportion of its net assets in other UCITS and other UCIs, the Investment Adviser will ensure that the total management fee (excluding any performance fee, if any) charged to such Fund (including management fees from other

UCITS and UCIs in which it invests) shall not exceed 1.50% of the net asset value of the Fund.

2.4 When a Fund invests (the "investor Fund") in shares of another Fund in the Company (the "target Fund"):

- ▶ the target Fund may not itself invest in the investor Fund;
- ▶ the target Fund may not invest more than 10% of its net assets in units of another Fund of the Company (as set out in paragraph 2.3 above);
- ▶ any voting rights which may be attached to the shares of the target Fund will be suspended for the investor Fund for the duration of the investment;
- ▶ any management fees or subscription or redemption fees payable in relation to the target Fund may not be charged to the investor Fund; and
- ▶ the net asset value of the shares of the target Fund may not be considered for the purpose of the requirement that the capital of the Company should be above the legal minimum as specified in the 2010 Law, currently €1,250,000.

2.5 A Fund may hold no more than 20% ancillary liquid assets (such as cash held in current accounts with a bank accessible at any time "Deposits at sight", in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets provided under article 41(1) of the 2010 Law, or for a period of time strictly necessary in case of unfavourable market conditions. This restriction may only be exceeded temporarily for a period of time strictly necessary if the Directors consider this to be in the best interest of the Shareholders (during exceptionally unfavourable market conditions such as a severe financial market collapse).

2.6 A Fund may not invest in any one issuer in excess of the limits set out below:

2.6.1 Not more than 10% of a Fund's net assets may be invested in transferable securities or money market instruments issued by the same entity.

2.6.2 Not more than 20% of a Fund's net assets may be invested in deposits made with the same entity.

2.6.3 By way of exception, the 10% limit stated in the first paragraph of this section may be increased to:

- ▶ a maximum of 35% if the transferable securities or money market instruments are issued or guaranteed by an EU Member State, by its local authorities, by a non-Member State or by public international bodies to which one or more Member States belong;
- ▶ a maximum of 25% in the case of certain bonds when these are issued by a credit institution which has its registered office in an EU Member State and is subject by law to special public supervision designed to protect bond holders. In particular, sums deriving from the issue of these bonds must be invested in conformity with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest. When a Fund invests more than 5% of its net assets in the bonds referred to in this paragraph and issued by one issuer, the total value of these investments may not exceed 80% of the value of the net assets of such Fund.

2.6.4 The total value of the transferable securities or money market instruments held by a Fund in the issuing bodies in each of which it invests more than 5% of its net assets must not then exceed 40% of the value of its net assets. This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision. The transferable securities and money market instruments limits referred to in the two indents of paragraph 2.6.3 above shall not be taken into account for the purpose of applying the limit of 40% referred to in this paragraph.

Notwithstanding the individual limits laid down in sub-paragraphs 2.6.1 to 2.6.4 above, a Fund may not combine:

- ▶ investments in transferable securities or money market instruments issued by a single entity; and/or
- ▶ deposits made with a single entity; and/or
- ▶ exposures arising from OTC derivative transactions undertaken with a single entity, in excess of 20% of its net assets.

When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of the above mentioned restrictions.

The limits provided for in sub-paragraphs 2.6.1 to 2.6.4 above may not be combined, and thus investments in transferable securities or money market instruments issued by the same entity or in deposits or derivative instruments made with this entity carried out in accordance with paragraphs 2.6.1 to 2.6.4 shall under no circumstances exceed in total 35% of the net assets of the Fund.

Companies which are included in the same group for the purposes of consolidated accounts, as defined in accordance with Directive 83/349/EEC or in accordance with recognised international accounting rules, are regarded as a single entity for the purpose of calculating the investment limits mentioned in sub-paragraphs 2.6.1 to 2.6.4 above.

The Fund may not invest cumulatively more than 20% of its net assets in transferable securities or money market instruments of the same group subject to restrictions 2.6.1 and the three indents under 2.6.4 above.

Without prejudice to the limits laid down in paragraph 2.8 below, the limit of 10% laid down in sub-paragraph 2.6.1 above is raised to a maximum of 20% for investment in equity and/or debt securities issued by the same body when the aim of the investment policy of a Fund is to replicate the composition of a certain equity or debt securities index which is recognised by the CSSF, on the following basis:

- ▶ the composition of the index is sufficiently diversified;
- ▶ the index represents an adequate benchmark for the market to which it refers;
- ▶ it is published in an appropriate manner;
- ▶ it is replicable;
- ▶ it is transparent, with the full calculation methodology and index performance published; and
- ▶ it is subject to independent valuation.

This limit is 35% where that proves to be justified by exceptional market conditions in particular in regulated markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

**By way of derogation, each Fund (including the Reserve Funds by virtue of Article 17.7 of the MMFR) is authorised to invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by an EU Member State, its local authorities, by another member state of the OECD or public international bodies of which one or more EU Member States are members, provided that (i) such securities are part of at least six different issues and (ii) securities from any one issue do not account for more than 30% of the net assets of such Fund.**

2.7 The Company may not invest in shares with voting rights enabling it to exercise significant influence over the management of the issuing body.

2.8 Each Fund may not:

2.8.1 acquire more than 10% of the shares with non-voting rights of one and the same issuer.

2.8.2 acquire more than 10% of the debt securities of one and the same issuer.

2.8.3 acquire more than 25% of the units of one and the same undertaking for collective investment.

2.8.4 acquire more than 10% of the money market instruments of any single issuer.

The limits stipulated in sub-paragraphs 2.8.2, 2.8.3 and 2.8.4 above may be disregarded at the time of acquisition if, at that time, the gross amount of debt securities or of the money market instruments, or the net amount of securities in issue cannot be calculated.

2.9 The limits stipulated in paragraphs 2.7 and 2.8 above do not apply to:

2.9.1 Transferable securities and money market instruments issued or guaranteed by an EU Member State or its local authorities;

2.9.2 Transferable securities and money market instruments issued or guaranteed by a non-EU Member State;

2.9.3 Transferable securities and money market instruments issued by public international institutions of which one or more EU Member States are members;

2.9.4 Transferable securities held by a Fund in the capital of a company incorporated in a non-Member State investing its assets mainly in the securities of issuing bodies having their registered offices in that State, where under the legislation of that State such a holding represents the only way in which such Fund can invest in the securities of issuing bodies of that State. This derogation, however, shall apply only if in its investment policy the company from the non-Member State complies with the limits laid down in Articles 43, 46 and 48(1) and (2) of the 2010 Law. Where the limits set in Articles 43 and 46 of the 2010 Law are exceeded, Article 49 shall apply mutatis mutandis; and

2.9.5 Transferable securities held by the Company in the capital of subsidiary companies carrying on only the business of management, advice or marketing in the country where the subsidiary is located, in regard to the repurchase of units at Shareholders' request exclusively on its or their behalf.

- 2.10 The Company may always, in the interest of the Shareholders, exercise the subscription rights attached to securities, which form part of its assets.

When the maximum percentages stated in paragraphs 2.2 through 2.8 above are exceeded for reasons beyond the control of the Company, or as a result of the exercise of subscription rights, the Company must adopt, as a priority objective, sales transactions to remedy the situation, taking due account of the interests of its Shareholders.

- 2.11 A Fund (with the exception of the Reserve Funds) may borrow to the extent of 10% of its total net assets (valued at market value) provided these borrowings are made on a temporary basis. However, the Company may acquire for the account of a Fund foreign currency by way of back-to-back loan. Any repayment of monies borrowed, together with accrued interest and any fees arising from the committed credit line (including for the avoidance of doubt any commitment fee that may be due to the lender), shall be paid out of the assets of the respective Fund. Any new Funds will not automatically be subject to a credit line and will therefore be required to be added by way of a joinder process. This process includes, inter alia, any necessary due diligence being carried out by the lenders in order to approve the addition of the new Funds. During this period, such Funds will not be subject to, or able to draw down on, any credit line. Furthermore, there is no guarantee that the addition of any new Funds will be approved by the lenders, or that credit will be available to a Fund since the credit line is subject to availability (on an equitable allocation basis) between the Funds and other BlackRock funds participating in the credit agreement. As such, certain Funds may not be subject to the credit line and will not incur any fees with respect to same.
- 2.12 The Company may not grant credit facilities nor act as guarantor on behalf of third parties, provided that for the purpose of this restriction (i) the acquisition of transferable securities, money market instruments or other financial investments referred to in sub-paragraphs 2.1.6, 2.1.8 and 2.1.9 above, in fully or partly paid form and (ii) the permitted lending of portfolio securities shall be deemed not to constitute the making of a loan.
- 2.13 The Company undertakes not to carry out uncovered sales transactions of transferable securities, money market instruments or other financial instruments referred to in sub-paragraphs 2.1.6, 2.1.8 and 2.1.9 above; provided that this restriction shall not prevent the Company from making deposits or carrying out accounts in connection with financial derivatives instruments, permitted within the limits referred to above.
- 2.14 The Company's assets may not include precious metals or certificates representing them, commodities, commodities contracts, or certificates representing commodities.
- 2.15 The Company may not purchase or sell real estate or any option, right or interest therein, provided that the Company may invest in securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein.
- 2.16 The Company will in addition comply with such further restrictions as may be required by the regulatory authorities in any country in which the Shares are marketed.
- 2.17 The Reserve Funds shall not undertake any of the activities set out in Article 9(2) of the MMF Regulations, including borrowing and lending cash.

### 3. Short Term VNAV Money-Market Funds

- 3.1 A Fund which is categorised in this Prospectus as a "Short Term VNAV Money-Market Fund" in accordance with the MMF Regulations will satisfy the conditions set out in this section:

- the Fund's primary investment objective is to maintain the principal and aim to provide a return in line with money-market rates;
- the Fund will invest only in the categories of financial assets set out in paragraph 3.2 below;
- the Fund will provide daily net asset value and price calculation and allow for daily subscription and redemption of units at a price equal to the Fund's NAV per unit, notwithstanding any permitted fees or charges as specified in this Prospectus; and
- the Fund will maintain a variable net asset value.

- 3.2 A MMF shall invest only in one or more of the following categories of financial assets and only under the conditions specified in the MMF Regulations:

- Money market instruments that fulfil the requirements set out in Article 10 of the MMF Regulations which can be summarised as follows: (a) they must fall within one of the categories of eligible MMIs provided for in the UCITS Directive; (b) they must have a legal maturity at issuance of 397 days or less; or have a residual maturity of 397 days or less. Standard MMFs are allowed to invest in MMIs with a residual maturity until the legal redemption date of less than or equal to two years, provided that the time remaining until the next interest rate reset date is 397 days or less.
- Eligible securitisations and asset-backed commercial paper ("ABCPs") that fulfil the requirements set out in Article 11 of the MMF Regulations which can be summarised as follows: the securitisation or ABCP is sufficiently liquid and is any of the following: (a) a securitisation that constitutes a "Level 2B Securitisation" under the Liquidity Coverage Ratio Commission Delegated Regulation (EU) 2015/611 made under the EU Capital Requirements Regulation (575/2013) ("CRR"); (b) an ABCP issued by an ABCP programme which (i) is fully supported by a regulated credit institution; (ii) is not a re-securitisation and the exposures underlying the securitisation at the level of each ABCP transaction do not include any securitisation position; and (iii) does not include a synthetic securitisation; or (c) a simple, transparent and standardised (STS) securitisation or ABCP.

A Short-Term MMF may invest in the securitisations or ABCPs referred to above provided any of the following conditions is met, as applicable: (i) the legal maturity at issuance of the securitisation referred to in point (a) above is two years or less and the time remaining until the next interest rate reset date is 397 days or less; (ii) the legal maturity at issuance or residual maturity of the securitisations or ABCPs referred to in points (b) and (c) above is 397 days or less; or (iii) the securitisations referred to in points (a) and (c) above are amortising instruments and have a WAL of two years or less.

A Standard MMF may invest in the securitisations or ABCPs referred to above provided any of the following conditions is met, as applicable: (i) the legal maturity at issuance or residual maturity of the securitisations and ABCPs referred to in points (a), (b) and (c) above is two years or less and the time remaining until the next interest rate reset date is 397 days or less; or (ii) the securitisations referred to in points (a) and (c) above are amortising instruments and have a WAL of two years or less.

- c) Deposits with credit institutions that fulfil the requirements of Article 12 of the MMF Regulations which can be summarised as: (a) a deposit that is repayable on demand or is able to be withdrawn at any time; (b) a deposit that it matures in no more than 12 months; and (c) a deposit that is made with an EU credit institution or a non-EU credit institution subject to prudential rules considered equivalent to those laid down in the CRR.
- d) Financial derivative instruments that fulfil the requirements of Article 13 of the MMF Regulations. which can be summarised as: (a) the underlying of the derivative consists of interest rates, foreign exchange rates, currencies or indices representing one of those categories; (b) the derivative serves only the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the MMF; (c) the counterparties to OTC derivative are institutions subject to prudential regulation and supervision and belonging to the categories approved by the competent authority of the MMF; and (d) an OTC derivative is subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the MMF's initiative.
- e) Repurchase agreements that fulfil the conditions set out in Article 14 of the MMF Regulations which can be summarised as follows: (a) they are used on a temporary basis only (for no more than seven working days) for liquidity management purposes and not for investment purposes other than as detailed in (c) below; (b) the counterparty is prohibited from selling, investing, pledging or otherwise transferring those assets without the MMF's prior consent; (c) the cash received is only (i) placed on deposit with eligible credit institutions pursuant to the UCITS Directive, or (ii) invested in liquid transferable securities or MMIs (other than eligible MMIs) where they are issued or guaranteed by certain public bodies; (d) the cash received by the MMF does not exceed 10% of its assets; and (e) the MMF has the right to terminate the agreement at any time upon giving prior notice of no more than two working days.
- f) Reverse repurchase agreements that fulfil the conditions set out in Article 15 of the MMF Regulations which can be summarised as follows: (a) the MMF has the right to terminate the agreement at any time upon giving prior notice of no more than two working days; (b) the market value of the assets received is at all times at least equal to the value of the cash paid out; (c) the assets received by a MMF are eligible MMIs as described above at paragraph 3.2(a); (d) the assets received are not sold, reinvested, pledged or otherwise transferred; (e) securitisations and ABCPs shall not be received by a MMF as part of a reverse repurchase agreement; (f) the assets received are sufficiently diversified with a maximum exposure to a given issuer of 15%, except where those assets take the form of MMIs issued or guaranteed by certain public bodies; and (g) the MMF is able to recall the full amount of cash at any time on either an accrued basis or a mark-to-market basis.
- g) Units or shares of other MMFs in accordance with the requirements set out in Article 16 of the MMF Regulations and as summarised in paragraphs 3.19 to 3.23 below.
- 3.3 A MMF may hold ancillary liquid assets in accordance with Article 41(2) of the 2010 Law.
- 3.4 A MMF shall invest no more than:
- a) 5% of its assets in money market instruments, eligible securitisations and ABCPs issued by the same body;
- b) 10% of its assets in deposits made with the same credit institution unless the structure of the banking sector in the Member State in which the MMF is domiciled is such that there are insufficient viable Credit Institutions to meet that diversification requirement and it is not economically feasible for the MMF to make deposits in another member state of the European Union, in which case up to 15% of its assets may be deposited with the same Credit Institution.
- 3.5 By way of derogation from paragraph 3.4(a), a VNAV MMF may invest up to 10% of its assets in money market instruments, eligible securitisations and ABCPs issued by the same body provided that the total value of such money market instruments, eligible securitisations and ABCPs held by the VNAV MMF in each issuing body in which it invests more than 5% of its assets does not exceed 40% of the value of its assets.
- 3.6 The aggregate of all of a MMF's exposures to eligible securitisations and ABCPs shall not exceed 15% of the assets of the MMF. As from the date of application of the delegated act referred to in Article 11(4) of the MMF Regulations, the aggregate of all of a MMF's exposures to eligible securitisations and ABCPs shall not exceed 20% of the assets of the MMF, whereby up to 15% of the assets of the MMF may be invested in eligible securitisations and ABCPs that do not comply with the criteria for the identification of simple, transparent and standardised ("STS") securitisations and ABCPs.
- 3.7 The aggregate risk exposure of a MMF to the same counterparty to OTC derivative transactions which fulfil the conditions set out in Article 13 of the MMF Regulations shall not exceed 5% of the assets of the MMF.
- 3.8 The cash received by the MMF as part of the repurchase agreement shall not exceed 10% of its assets.
- 3.9 The aggregate amount of cash provided to the same counterparty of a MMF in reverse repurchase agreements shall not exceed 15% of the assets of the MMF. Collateral received under reverse repurchase agreements must be comprised of eligible assets set out in paragraph 3.2 above, and comply with the diversification requirements in paragraphs 3.10 and 3.11 below.
- 3.10 Notwithstanding paragraphs 3.4 and 3.6 above, a MMF shall not combine, where to do so would result in an investment of more than 15% of its assets in a single body, any of the following:
- a) investments in money market instruments, securitisations and ABCPs issued by that body;
- b) deposits made with that body;
- c) OTC financial derivative instruments giving counterparty risk exposure to that body.
- 3.11 A MMF may invest up to 100% of its assets in different money market instruments issued or guaranteed separately or jointly by the Union, the national, regional and local administrations of the Member States or their central banks, the European Central Bank, the European Investment Bank, the European Investment Fund, the European Stability Mechanism, the European Financial Stability Facility, a central authority or central bank of a member state of the OECD, a G20 member country, Hong Kong and Singapore, the International Monetary Fund, the International Bank for Reconstruction and Development, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Bank for International Settlements, or any other relevant international financial institution or organisation to which one or more Member States belong.
- 3.12 Paragraph 3.11 shall only apply where all of the following requirements are met:

- a) the MMF holds money market instruments from at least six different issues by the issuer; and
  - b) the MMF limits the investment in money market instruments from the same issue to a maximum of 30% of its assets.
- 3.13 Notwithstanding the individual limits laid down in paragraph 3.4, a MMF may invest no more than 10% of its assets in bonds issued by a single credit institution that has its registered office in a Member State and is subject by law to special public supervision designed to protect bond-holders. In particular, sums deriving from the issue of those bonds shall be invested in accordance with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.
- 3.14 Where a MMF invests more than 5% of its assets in the bonds referred to in paragraph 3.13 issued by a single issuer, the total value of those investments shall not exceed 40% of the value of the assets of the MMF.
- 3.15 Notwithstanding the individual limits laid down in paragraph 3.4, a MMF may invest no more than 20% of its assets in bonds issued by a single credit institution where the requirements set out in point (f) of Article 10(1) or point (c) of Article 11(1) of Delegated Regulation (EU) 2015/61 are met, including any possible investment in assets referred to in paragraph 3.14.
- 3.16 Where a MMF invests more than 5% of its assets in the bonds referred to in paragraph 3.15 issued by a single issuer, the total value of those investments shall not exceed 60% of the value of the assets of the MMF, including any possible investment in assets referred to in paragraph 3.14, respecting the limits set out therein.
- 3.17 Companies which are included in the same group for the purposes of consolidated accounts under Directive 2013/34/EU of the European Parliament and of the Council or in accordance with recognised international accounting rules, shall be regarded as a single body for the purpose of calculating the limits referred to in paragraphs 3.4 to 3.10.
- 3.18 A MMF will invest only in securities with a maturity at issuance or residual term to maturity of 397 days or less. At least 7.5% of the Fund's assets will be daily maturing reverse repo contracts which are able to be terminated by giving prior notice of one working day or cash which is able to be withdrawn by giving prior notice of one working day and at least 15% of the Fund's assets will be weekly maturing assets, reverse repo contracts which are able to be terminated by giving prior notice of five working days or cash which is able to be withdrawn by giving prior notice of five working days. Money Market Instruments and units or shares in other money market funds may be included in the weekly maturity assets, up to 7.5%, provided they can be redeemed and settled within five working days). The Fund will maintain a weighted average maturity of 60 days or less and a weighted average life of 120 days or less. The calculation of both the weighted average maturity and the weighted average life of the Fund will take into account the impact of deposits and any hedging or repo contracts used by the Fund.
- 3.19 A MMF may acquire the units or shares of any other MMF ('targeted MMF') provided that all of the following conditions are fulfilled:
- a) no more than 10% of the assets of the targeted MMF are able, according to its fund rules or instruments of incorporation, to be invested in aggregate in units or shares of other MMFs;
  - b) the targeted MMF does not hold units or shares in the acquiring MMF.
- 3.20 A MMF whose units or shares have been acquired shall not invest in the acquiring MMF during the period in which the acquiring MMF holds units or shares in it.
- 3.21 A MMF may acquire the units or shares of other MMFs, provided that no more than 5% of its assets are invested in units or shares of a single MMF.
- 3.22 A MMF may, in aggregate, invest no more than 10% of its assets in units or shares of other MMFs.
- 3.23 Units or shares of other MMFs shall be eligible for investment by a MMF provided that all of the following conditions are fulfilled:
- a) the targeted MMF is authorised under the MMFR;
  - b) where the targeted MMF is managed, whether directly or under a delegation, by the same manager as that of the acquiring MMF or by any other company to which the manager of the acquiring MMF is linked by common management or control, or by a substantial direct or indirect holding, the manager of the targeted MMF, or that other company, is prohibited from charging subscription or redemption fees on account of the investment by the acquiring MMF in the units or shares of the targeted MMF;
  - c) Short-term MMFs may only invest in units or shares of other short-term MMFs.
- 3.24 With respect to MMFs, the Investment Adviser has established and implemented and consistently applies a credit analysis process agreed with the Management Company in determining the credit quality of money market instruments, securitisations and asset-backed commercial paper (ABCPs) in which it is intended that an Money Market Fund will invest, taking into account the issuer of the instruments and the characteristics of the instrument itself.
- 3.24.1 The credit quality assessment considers the following factors and general principles:
- (a) the quantification of the credit risk of the issuer and of the relative risk of default of the issuer and of the instrument;
  - (b) qualitative indicators on the issuer of the instrument, including in the light of the macroeconomic and financial market situation;
  - (c) the short-term nature of money market instruments;
  - (d) the asset class of the instrument;
  - (e) the type of issuer distinguishing at least the following types of issuers: national, regional or local administrations, financial corporations, and non-financial corporations;
  - (f) for structured financial instruments, the operational and counterparty risk inherent within the structured financial transaction and, in case of exposure to securitisations, the credit risk of the issuer, the structure of the securitisation and the credit risk of the underlying assets;
  - (g) the liquidity profile of the instrument with respect to the liquidity and solvency of the issuer.
- 3.24.2 The credit quality assessment includes a range of quantitative and qualitative indicators which are applied as appropriate depending on the type of security (i.e. money market instrument, securitisation or ABCP) and the type of issuer (e.g. a corporation, government or public entity) being considered.

3.24.3 For corporate issuers qualitative and quantitative indicators considered include: financial condition, liquidity resources, financial flexibility and vulnerability to event risk, competitor positioning, industry and company analysis, management, strategy, business model, event risk, disruption, legal and regulatory, statutory, capital structure, Shareholder activity, and environmental, social, and governance (ESG) factors, bond pricing information, including credit spreads and pricing of comparable fixed income instruments and related securities; pricing of money market instruments relevant to the issuer, instrument or industry sector; credit default-swap pricing information, including credit default-swap spreads for comparable instruments; default statistics relating to the issuer, instrument, or industry sector, financial indices relevant to the geographic location, industry sector or asset class of the issuer or instrument; pricing of new issues including the existence of more junior securities. In addition, analysis of relevant markets, including degree of volume and liquidity.

3.24.4 For national issuers, qualitative and quantitative indicators considered include: per capital income; GDP; inflation rate; economic development; current account; macroeconomic factors; political event risk; sources of revenue; ratio of debt/GDP; real exchange rate; default history; ratio of reserves/imports; corruption index; regulatory quality, accountability, rule of law and political stability; economic diversity; explicit and contingent liabilities; size of foreign exchange reserves versus foreign exchange liabilities.

For regional or local administrations, qualitative and quantitative indicators considered include: underlying credit fundamentals; revenue base and susceptibility to economic conditions; operational, administrative or financial linkages to a sovereign; economic importance of the issuer to a sovereign; estimates of government support (if any); guarantees (if any); credit strength of sovereign providing support; barriers to support; explicit and contingent liabilities; size of foreign exchange reserves/liabilities.

3.24.5 For structured financial instruments qualitative and quantitative indicators considered include: the operational and counterparty risk inherent within the structured financial transaction, and in the case of exposure to securitizations, the credit risk of the issuer, the structure of the securitization, and the credit risk of the underlying assets.

3.24.6 The management company shall ensure that the information used in applying the internal credit quality assessment procedure is of sufficient quality, up-to-date and from reliable sources. The internal credit quality assessment procedure shall be based on prudent, systematic and continuous assessment methodologies. The methodologies used shall be subject to validation by the management company based on historical experience and empirical evidence, including back testing. The management company shall ensure that the internal credit quality assessment procedure complied with all of the following general principles:

- (a) an effective process is to be established to obtain and update relevant information on the issuer and the instrument's characteristics;
- (b) adequate measures are to be adopted and implemented to ensure that the internal credit quality assessment is based on a thorough analysis of the information that is available and pertinent, and includes all relevant driving factors that influence the creditworthiness of the issuer and the credit quality of the instruments;
- (c) the internal credit quality assessment procedure is to be monitored on an ongoing basis and all credit quality assessments shall be received at least annually;
- (d) while there is to be no mechanistic over-reliance on external ratings in accordance with article 5a of Regulation (EC) N°

1060/2009, the management company shall undertake a new credit quality assessment for money market instruments, securitisations and ABCPs when there is a material change that could have an impact on the existing assessment of the instrument;

- (e) the credit quality assessment methodologies are to be reviewed at least annually by the management company to determine whether they remain appropriate for the current portfolio and external conditions. Where the management company becomes aware of errors in the credit quality assessment methodology or in its application, it shall immediately correct those errors; and
- (f) when methodologies, models or key assumptions used in the internal credit quality assessment procedure are changed, the management company shall review all affected internal credit quality assessments as soon as possible.

**The Company shall take the risks that it deems reasonable to reach the assigned objective set for each Fund; however, it cannot guarantee that it shall reach its goals given stock exchange fluctuations and other risks inherent in investments in transferable securities.**

#### 4. Financial Techniques and Instruments.

4.1 The Company must employ a risk-management process which enables it to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of the portfolio; it must employ a process for accurate and independent assessment of the value of OTC derivative instruments. It must communicate to the CSSF regularly and in accordance with the detailed rules defined by the latter, the types of derivative instruments, the underlying risks, the quantitative limits and the methods which are chosen in order to estimate the risks associated with transactions in derivative instruments.

4.2 In addition, the Company is authorised to employ techniques and instruments relating to transferable securities and to money market instruments under the conditions and within the limits laid down by the CSSF provided that such techniques and instruments are used for the purpose of efficient portfolio management or for hedging purposes.

4.3 When these operations concern the use of derivative instruments, these conditions and limits shall conform to the provisions laid down in the 2010 Law.

Under no circumstances shall these operations cause the Company to diverge from its investment policies and investment restrictions.

4.4 The Company will ensure that the global exposure of the underlying assets shall not exceed the total net value of a Fund. The underlying assets of index based derivative instruments are not combined to the investment limits laid down under sub-paragraphs 2.6.1 to 2.6.4 above.

- ▶ When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of the above-mentioned restrictions.
- ▶ The exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

#### 4.5 Efficient Portfolio Management – Other Techniques and Instruments

In addition to the investments in financial derivatives instruments, the Company may employ other techniques and instruments relating to transferable securities and money market instruments subject to the conditions set out in the CSSF Circular 08/356, as amended from time to time, and ESMA Guidelines ESMA/2012/832EL, such as repurchase/reverse repurchase transactions ("repo transactions") and securities lending.

Appendix G specifies, for each Fund, the maximum and expected proportion of the Net Asset Value that can be subject to securities lending and repo transactions. The expected proportion is not a limit and the actual percentage may vary over time depending on factors including, but not limited to, market conditions and borrowing demand in the market.

Techniques and instruments which relate to transferable securities or money market instruments and which are used for the purpose of efficient portfolio management, including financial derivatives instruments which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- 4.5.1 they are economically appropriate in that they are realised in a cost-effective way;
- 4.5.2 they are entered into for one or more of the following specific aims:
  - (a) reduction of risk;
  - (b) reduction of cost;
  - (c) generation of additional capital or income for the Company with a level of risk which is consistent with the risk profile of the Company and its relevant Funds and the risk diversification rules applicable to them;
- 4.5.3 their risks are adequately captured by the risk management process of the Company; and
- 4.5.4 they cannot result in a change to the Fund's declared investment objective or add significant supplementary risks in comparison to the general risk policy as described in the Prospectus and relevant KIDs.

Techniques and instruments (other than financial derivatives instruments) which may be used for efficient portfolio management purposes are set out below and are subject to the conditions set out below.

Moreover those transactions may be carried out for 100% of the assets held by the relevant Fund provided (i) that their volume is kept at an appropriate level or that the Company is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations; and (ii) that these transactions do not jeopardise the management of the Company's assets in accordance with the investment policy of the relevant Fund. Risks shall be monitored in accordance with the risk management process of the Company.

As part of the efficient portfolio management techniques the Funds may underwrite or sub-underwrite certain offerings from time to time through the Investment Advisers. The Management Company will seek to ensure that the relevant Funds will receive the commissions and fees payable under such contracts and all investments acquired pursuant to such contracts will form part of the relevant Funds' assets. Under the Luxembourg regulation, there is no requirement to require a prior consent of the trustee/depositary.

- 4.6 Securities lending transactions and related potential conflicts of interest.

Each Fund may conduct securities lending transactions in aggregate for up to such percentage of its Net Asset Value as disclosed in the table in Appendix G.

The Company may enter into securities lending transactions provided that it complies with the following rules:

- 4.6.1 the Company may lend securities either directly or through a standardised system organised by a recognised clearing institution or a lending program organised by a financial institution subject to prudential supervision rules which are recognised by the CSSF as equivalent to those laid down in EU law and specialised in this type of transactions;
- 4.6.2 the borrower must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law;
- 4.6.3 net exposures (i.e. the exposures of a Fund less the collateral received by a Fund) to a counterparty arising from securities lending transactions shall be taken into account in the 20% limit provided for in article 43(2) of the 2010 Law.
- 4.6.4 as part of its lending transactions, the Company must receive collateral, the market value of which, shall, at all times, be equal to at least the market value of the securities lent plus a premium;
- 4.6.5 such collateral must be received prior to or simultaneously with the transfer of the securities lent. When the securities are lent through an intermediary referred to under 4.6.1 above, the transfer of the securities lent may be effected prior to receipt of the collateral, if the relevant intermediary ensures proper completion of the transaction. The intermediary may, instead of the borrower, provide to the UCITS collateral in lieu of the borrower; and
- 4.6.6 the Company must have the right to terminate any securities lending arrangement which it has entered into at any time or demand the return of any or all of the securities loaned.

Counterparties for securities lending transactions are selected based on a rigorous credit assessment and in-depth review at the individual legal entity level at the outset of the trading relationship. Credit assessments include an evaluation of the legal entity corporate and/or ownership structure, regulatory regime, track record, financial health and any external agency ratings, where applicable.

All revenues from efficient portfolio management techniques will be returned to the Company, net of direct and indirect operational costs and fees (which do not include hidden revenue).

The Company shall disclose the global valuation of the securities lent in the annual and semi-annual reports. Please refer also to paragraph 11. ("The Depositary") in Appendix C for information on additional requirements pursuant to the UCITS Directive in relation to the reuse of assets held in custody by the Depositary.

There are potential conflicts of interests in managing a securities lending program, including but not limited to: (i) BlackRock as lending agent may have an incentive to increase or decrease the amount of securities on loan or to lend particular securities in order to generate additional risk-adjusted revenue for BlackRock and its affiliates; and (ii) BlackRock as lending agent may have an incentive to allocate loans to clients that would provide more revenue to Blackrock. As described further below, BlackRock seeks to mitigate this conflict by providing its securities lending clients with equal lending opportunities over time in order to approximate pro-rata allocation.

As part of its securities lending program, BlackRock indemnifies the Funds and certain other clients and/or funds against a shortfall in collateral in the event of borrower default. On a regular basis, BlackRock calculates the potential dollar exposure of collateral shortfall resulting from a borrower default ("shortfall risk") in the securities lending program. BlackRock established program-wide borrower limits ("credit limits") to actively manage the borrower-specific credit exposure. BlackRock oversees the risk model that calculates projected collateral shortfall values using loan-level factors such as loan and collateral type and market value as well as specific borrower counterparty credit characteristics. When necessary, BlackRock may adjust securities lending program attributes by restricting eligible collateral or reducing borrower credit limits. As a result, the management of the program-wide exposure as well as BlackRock-specific indemnification exposure may affect the amount of securities lending activity BlackRock may conduct at any given point in time by reducing the volume of lending opportunities for certain loans (including by asset type, collateral type and/or revenue profile).

BlackRock uses a predetermined systematic process in order to approximate pro-rata allocation over time. In order to allocate a loan to a portfolio: (i) BlackRock as a whole must have sufficient lending capacity pursuant to the various program limits (i.e. indemnification exposure limit and borrower credit limits); (ii) the lending portfolio must hold the asset at the time a loan opportunity arrives; and (iii) the lending portfolio must also have enough inventory, either on its own or when aggregated with other portfolios into one single market delivery, to satisfy the loan request. In doing so, BlackRock seeks to provide equal lending opportunities for all portfolios, independent of whether BlackRock indemnifies the portfolio. Equal opportunities for lending portfolios does not guarantee equal outcomes. Specifically, short and long-term outcomes for individual clients may vary due to asset mix, asset/liability spreads on different securities, and the overall limits imposed by the firm.

BlackRock may decline to make a securities loan on behalf of a Fund, discontinue lending on behalf of a Fund or terminate a securities loan on behalf of a Fund for any reason, including but not limited to regulatory requirements and/or markets rules, liquidity considerations, or credit considerations, which may impact Funds by reducing or eliminating the volume of lending opportunities for certain types of loans, loans in particular markets, loans of particular securities or types of securities, or for loans overall.

#### 4.7 Repo transactions

The Company may enter into:

- ▶ repurchase transactions which consist of the purchase or sale of securities with provisions reserving the seller the right or the obligation to repurchase from the buyer securities sold at a price and term specified by the two parties in their contractual arrangement; and
- ▶ reverse repurchase agreement transactions, which consist of a forward transaction at the maturity of which the seller (counterparty) has the obligation to repurchase the securities sold and the Company the obligation to return the securities received under the transaction.

Each Fund may conduct repurchase/reverse repurchase transactions in aggregate for up to such percentage of its latest available net asset value as disclosed in the table in Appendix G. All incremental incomes generated from such transactions will be accrued to the Fund.

- 4.7.1 The Company can act either as buyer or seller in repo transactions. Its involvement in such transactions is however subject to the following rules:

- (a) the fulfilment of the conditions 4.6.2 and 4.6.3;
- (b) during the life of a repo transaction with the Company acting as purchaser, the Company shall not sell the securities which are the object of the contract, before the counterparty has exercised its option or until the deadline for the repurchase has expired, unless the Company has other means of coverage;
- (c) the securities acquired by the Company under a repo transaction must conform to the Fund's investment policy and investment restrictions and must be limited to:
  - (i) short-term bank certificates or money market instruments as defined in Directive 2007/16/EC of 19 March 2007;
  - (ii) bonds issued by non-governmental issuers offering an adequate liquidity;
  - (iii) assets referred to under 4.8.2(b), 4.8.2(c) and 4.8.2(d) below; and

The Company shall disclose the total amount of the open repo transactions on the date of reference of its annual and interim reports.

- 4.7.2 Where the Company enters into repurchase agreements, it must be able at any time to recall any securities subject to the repurchase agreement or to terminate the repurchase agreement into which it has entered. Fixed-term repurchase agreements that do not exceed seven days should be considered as arrangements on terms that allow the assets to be recalled at any time by the Company.

- 4.7.3 Where the Company enters into reverse repurchase agreements, it must be able at any time to recall the full amount of cash or to terminate the reverse repurchase agreement on either an accrued basis or a mark-to-market basis. When the cash is callable at any time on a mark-to-market basis, the mark-to-market value of the reverse repurchase agreement should be used for the calculation of the net asset value. Fixed-term reverse repurchase agreements that do not exceed seven days should be considered as arrangements on terms that allow the assets to be recalled at any time by the Company.

- 4.8 Management of collateral for OTC financial derivative transactions and efficient portfolio management techniques.

- 4.8.1 Collateral obtained in respect of OTC financial derivative transactions and efficient portfolio management techniques ("Collateral"), such as a repo transaction or securities lending arrangement, must comply with the following criteria:

- (a) liquidity: Collateral (other than cash) should be highly liquid and traded on a regulated market or multi-lateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to its pre-sale valuation. Collateral received should also comply with the provisions of Article 48 of the 2010 Law;
- (b) valuation: Collateral should be capable of being valued marked to market on a daily basis and assets that exhibit high price volatility should not be accepted as Collateral unless suitably conservative haircuts are in place;
- (c) issuer credit quality: Collateral should be of high quality;
- (d) correlation: Collateral should be issued by an entity that is independent from the counterparty and is expected not to

display a high correlation with the performance of the counterparty;

- (e) diversification: Collateral should be sufficiently diversified in terms of country, markets and issuers with a maximum exposure to a given issuer of 20% of a Fund's Net Asset Value. When a Fund is exposed to different counterparties, the different baskets of Collateral should be aggregated to calculate the 20% limit of exposure to a single issuer. A Fund may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by a Member State, its local authorities, as well as non-Member States and public international bodies set out in Appendix A, paragraph 2.6.4. Such a Fund should receive securities from at least six different issues, but securities from any single issue should not account for more than 30% of the Fund's Net Asset Value; and
- (f) immediately available: Collateral must be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.

Counterparties for repurchase / reverse repurchase transactions are selected based on a rigorous credit assessment and in-depth review at the individual legal entity level at the outset of the trading relationship. Credit assessments include an evaluation of the legal entity corporate and/or ownership structure, regulatory regime, track record, financial health and any external agency ratings, where applicable.

4.8.2 Subject to the above criteria, Collateral must comply with the following criteria:

- (a) liquid assets such as cash, short term bank deposits, money market instruments as defined in Directive 2007/16/EC of 19 March 2007, letters of credit and guarantees at first demand issued by a first class credit institution not affiliated to the counterparty;
- (b) bonds issued or guaranteed by a Member State of the OECD or by their local authorities or supranational institutions and bodies of a community, regional or world-wide scope;
- (c) shares or units issued by money market-type UCIs calculating a daily net asset value and having a rating of AAA or its equivalent;
- (d) shares or units issued by UCITS investing mainly in bonds/shares mentioned under e) and f) hereunder;
- (e) bonds issued or guaranteed by first class issuers offering an adequate liquidity; or
- (f) shares admitted to or dealt in on a regulated market of a Member State of the European Union or on a stock exchange of a Member State of the OECD, provided that these shares are included in a main index.

4.8.3 Where there is title transfer, the Collateral received should be held by the Depositary, or its agent. This is not applicable in the event that there is no title transfer in which case the Collateral will be held by a third party custodian which is subject to prudential supervision, and which is unrelated to the provider of the Collateral.

4.8.4 When the Collateral given in the form of cash exposes the Company to a credit risk vis-à-vis the trustee of this Collateral, such exposure shall be subject to the 20% limitation as laid down in section 2.6 above.

4.8.5 During the duration of the agreement, non-cash Collateral cannot be sold, re-invested or pledged.

4.8.6 Cash received as Collateral may only be:

- (a) placed on deposit with entities prescribed in Article 50(f) of Directive 2009/65/EC;
- (b) invested in high quality government bonds;
- (c) used for the purpose of reverse repurchase agreements provided the transactions are with credit institutions subject to prudential supervision and the Company can recall at any time the full amount of the cash on an accrued basis; and
- (d) invested in short term money market funds as defined in the MMF Regulations.

Re-invested cash Collateral should be diversified in accordance with the diversification requirements applicable to non-cash Collateral.

4.8.7 The Company has implemented a haircut policy in respect of each class of assets received as Collateral in order to reduce exposure to trading counterparties for OTC Derivative, Securities Lending and Reverse Repurchase transactions. These transactions are executed under standardised legal documentation that include terms related to credit support and eligible collateral, including haircuts to be applied.

A haircut is a discount applied to the value of a Collateral asset to account for the fact that its valuation, or liquidity profile, may deteriorate over time. The haircut policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the Collateral, the price volatility of the Collateral and the results of any stress tests which may be performed in accordance with the collateral management policy. Subject to the framework of agreements in place with the relevant counterparty, which may or may not include minimum transfer amounts, it is the intention of the Company that any Collateral received shall have a value, adjusted in light of the haircut policy, which equals or exceeds the relevant counterparty exposure where appropriate.

The applicable haircuts for each of the relevant types of assets held as Collateral are specified below as a valuation percentage. Larger haircuts than those noted below may be applied at the sole discretion of the Company; larger haircuts may apply to certain counterparties, and/or to certain transactions (e.g. wrong way risk).

The Company reserves the right to vary this policy at any time in which case this Prospectus will be updated accordingly.

#### 4.8.8 Risk and potential Conflicts of Interest associated with OTC derivatives and efficient portfolio management

- (a) There are certain risks involved in OTC derivative transactions, efficient portfolio management activities and the management of Collateral in relation to such activities. Please refer to the sections of this Prospectus entitled “Conflicts of interest from relationships within the BlackRock Group” and “Risk Considerations” and, in particular but without limitation, the risk factors relating to derivatives, counterparty risk and counterparty risk to the Depositary. These risks may expose investors to an increased risk of loss.
- (b) The combined counterparty risk on any transaction involving OTC derivative instruments or efficient portfolio management techniques may not exceed 10% of the assets of a Fund when the counterparty is a credit institution domiciled in the EU or in a country where the CSSF considers that supervisory regulations are equivalent to those prevailing on the EU. This limit is set at 5% in any other case.
- (c) The Company’s delegates will continuously assess the credit or counterparty risk as well as the potential risk, which is for trading activities, the risk resulting from adverse movements in the level of volatility of market prices and will assess the hedging effectiveness on an ongoing basis. They will define specific internal limits applicable to these kinds of operations and monitor the counterparties accepted for these transactions.

#### 5. Investments in a Shari’ah Fund

Prospective investors should not rely on the Index provider’s screening methodology or on the pronouncement of the Shari’ah Panel on the compliance of a Shari’ah Fund with Shari’ah in deciding whether to become an investor. Prospective investors should consult their own Shari’ah advisors as to whether a Shari’ah Fund is compliant with Shari’ah. By becoming an investor, the investor shall be deemed to have represented that they are satisfied that a Shari’ah Fund does not contravene Shari’ah.

Where applicable, a Shari’ah Fund relies on the information of the Index provider for the determination of the universe of eligible component securities. Neither the Index provider, a Shari’ah Fund, the Management Company nor the Investment Adviser makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of such determinations. Although the Fund intends to observe Shari’ah principles at all times, no such assurance can be given as, for example, there may be occasions when a Shari’ah Fund’s investments do not fully comply with such criteria for factors outside the control of the Shari’ah Fund. Compliance with Shari’ah may result in a Shari’ah Fund’s changing its holdings with limited notice in which case the Investment Adviser may be required to dispose of investments in circumstances that are less advantageous than might otherwise be the case. Similarly, cash balances held by a Shari’ah Fund from time to time may be deposited on terms which shall grant no return on the sum deposited for the benefit of a Shari’ah Fund. In the event of any interest arising, such interest is intended to be donated to approved charities for purification purposes, as further detailed in section “Purification of non-Shari’ah compliant Income”.

A Shari’ah Fund must at all times comply with applicable Luxembourg laws and regulations and in case of discrepancies between Luxembourg laws and regulations and Shari’ah principles, Luxembourg laws and regulations shall prevail.

Prospective investors should also note that in seeking to be a Shari’ah-compliant Fund, any general provisions or references to investment methods or techniques stated in the Prospectus to be available to all Funds will not be availed of by a Shari’ah Fund to the extent they are not Shari’ah compliant.

The Investment Adviser may invest in securities that are selected either from the Index, or that are not comprised in the Index. While selecting securities that are not in the Index, the Investment Adviser ensures that these have been screened and approved by the Shari’ah Panel prior to such investments, ensuring compliance with the Shari’ah principles. While selecting Shari’ah Funds’ securities from the Index, the Investment Adviser will rely on the securities which have been selected by the Index provider pursuant to a Shari’ah screening methodology. This screening methodology is designed to evaluate and ensure that investments in equity instruments comply with Shari’ah principles and allows fund managers to identify permissible securities by applying a series of sector-based exclusions and financial ratio assessments. The methodology involves a thorough review of each company’s financial statements to exclude those engaged in non-compliant activities, such as alcohol, gambling, or interest-based financial services, as further detailed below. Additionally, it assesses financial ratios related to leverage and liquidity to ensure adherence to Shari’ah standards. A key component of this methodology is the “dividend purification ratio”, which calculates the proportion of income derived from non-Shari’ah compliant activities. This ratio will allow the Investment Adviser to purify the non-Shari’ah compliant income of the Shari’ah Funds by donating the corresponding amount to selected charities, thereby ensuring that their investments remain pure at all times, as further detailed in section “Purification of non-Shari’ah compliant Income”.

At the date of this Prospectus, the screening methodology provides that where a company derives less than 5% of its total business income from non-permissible business sectors, this deviation may be tolerated, and the

## Appendix A

company will still be deemed to have passed the screening process. The calculation of such total business income is the following:

Non-permissible income (including all interests deriving from these incomes) / revenue < 5%

During the selection process, each issuer's latest financial statement is reviewed by the Index provider to ensure that it is not involved in any non-Shariah compliant activities, regardless of whether the latest statement is a quarterly, semi-annual, or annual statement. If the latest statement is available in all three of these frequencies an annual statement will likely be used, as these are more likely to be audited. Those that are found to be non-compliant are screened out.

The following list of sectors will not be included in the Index and are therefore considered as non-Shariah-compliant:

1. Advertising
  - a. Advertisers of pork, alcohol, gambling, tobacco, and all other non-Islamic activities
  - b. Advertising means and modes which contravene the tenets of Islam
2. Media & Entertainment
  - a. Producers, distributors and broadcasters of music, movies, television shows and musical radio shows
  - b. Cinema operators
  - c. Exceptions:
    - News Channels
    - Newspapers
    - Sports Channels
    - Children's Channels
    - Educational Channels
3. Alcohol
4. Financial Services, except:
  - a. Islamic Banks
  - b. Islamic Financial Institutions
  - c. Islamic Insurance Companies

Defined as a company having:

- Shariah Committee or Shariah scholar to supervise all activities
- All products are Islamic
- All investments and non-operating business activities of the company are Islamic
- Passes accounting-based screens

5. Gambling
6. Pork related activities
7. Pornography
8. Tobacco and electronic cigarettes/vaping products
9. Recreational cannabis, including products derived from cannabis used recreationally
  - Cannabis-based products which are produced, sold and consumed under medical supervision for health reasons are considered compliant
10. Trading of gold and silver as cash on deferred basis

Investors seeking further details are invited to consult the screening methodology on the Index provider's website at <https://www.spglobal.com/spdji/en/index-family/equity/shariah/#overview>

## Appendix B – Summary of Certain Provisions of the Articles and of Company Practice

The below is a summary of the Articles. However, such summary does not purport to be complete. It is subject to and qualified in its entirety by reference to the contents of such Articles, the application forms and other documents and, accordingly, it should be reviewed for complete information concerning the rights, privileges and obligations of Shareholders in the Company. In the event that the description in or terms of this Prospectus are inconsistent with or contrary to the description in or terms of the Articles or the application forms, the Articles shall prevail and investors will be taken as having full knowledge of the Articles in applying for Shares.

### Articles of Association

1. Terms used in this summary that are defined in the Articles have the same meaning below.

#### 1.1 Corporate Existence

The Company is a company existing in the form of a société anonyme qualifying as a société d'investissement à capital variable (SICAV) under the name of BlackRock Global Funds with the status of a Part I Undertaking for Collective Investment in Transferable Securities (UCITS).

#### 1.2 Sole Object

The sole object of the Company is to place the funds available to it in one or more portfolios of transferable securities or other assets referred to in Article 41(1) of the 2010 Law and in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, where applicable, referred to as "Funds", with the purpose of spreading investment risks and affording to its shareholders the results of the management of the Company's Funds.

#### 1.3 Capital

The capital is represented by fully paid Shares of no par value and will at any time be equal to the aggregate value of the net assets of the Funds of the Company. Any variation of the Company's capital has immediate effect.

#### 1.4 Fractions

Fractions of Shares may be issued only as registered shares.

#### 1.5 Voting

In addition to the right to one vote for each whole Share of which he is the holder at general meetings, a holder of Shares of any particular Class will be entitled at any separate meeting of the holders of Shares of that Class to one vote for each whole Share of that Class of which he is the holder. The board of directors may suspend the voting rights attached to all Shares held by a Shareholder who is in breach towards the Company of his obligations as specified in the Articles or under any subscription or commitment agreement.

A Shareholder may individually undertake not to exercise, permanently or temporarily, all or part of its voting rights. Such a waiver binds the relevant Shareholder and the Company as from its notification to the Company.

#### 1.6 Joint Holders

The Company will register registered shares jointly in the names of not more than four holders should they so require. In such case the rights attaching to such a Share must be exercised jointly by all those parties in whose names it is registered except that verbal instructions will be accepted by the Company from any one joint holder in cases where verbal instructions are permitted pursuant to provisions of this Prospectus. Written instructions will be accepted by the Company from any one joint holder where all the holders have previously given written authority to the Transfer Agent to

accept those instructions. Instructions accepted on either of such bases will be binding on all the joint holders concerned.

#### 1.7 Allotment of Shares

The Directors are authorised without limitation to allot and issue Shares at any time at the current price per Share without reserving preferential subscription rights to existing shareholders.

#### 1.8 Directors

The Articles provide for the Company to be managed by a board of Directors composed of at least three persons. Directors are elected by the shareholders. The Directors are vested with all powers to perform all acts of administration and disposition in the Company's interest. In particular the Directors have power to appoint any person to act as a functionary to the Fund.

No transaction between the Company and any other party shall be affected or invalidated by the mere fact that a director (or, in case a director is a legal person, any one of its directors, managers, officers or employees), is a director, manager, associate, member, shareholder, officer or employee of that other party. Any person related as described above to any company or firm with which the Company shall contract or otherwise engage in business shall not, by reason of such affiliation, be prevented from considering, voting or acting upon any matters with respect to such contract or other business.

#### 1.9 Indemnity

The Company may indemnify any Director or officer against expenses reasonably incurred by him in connection with any proceedings to which he may be made a party by reason of such position in the Company or in any other company of which the Company is a shareholder or creditor and from which he is not entitled to be indemnified, except where due to gross negligence or wilful misconduct on his part.

#### 1.10 Winding up and Liquidation

The Company may be wound up at any time by a resolution adopted by a general meeting of shareholders in accordance with the provisions of the Articles. The Directors must submit the question of the winding up of the Company to a general meeting of shareholders if the corporate capital falls below two-thirds of the minimum capital prescribed by law (the minimum capital is currently the equivalent of EUR1,250,000).

On a winding up, assets available for distribution amongst the shareholders will be applied in the following priority:

- 1.10.1 first, in the payment of any balance then remaining in the relevant Fund to the holders of Shares of each Class linked to the Fund, such payment being made in accordance with any applicable rights attaching to those Shares, and otherwise in proportion to the total number of Shares of all the relevant Classes held; and
- 1.10.2 secondly, in the payment to the holders of Shares of any balance then remaining and not comprised in any of the Funds, such balance being apportioned as between the Funds pro rata to the Net Asset Value of each Fund immediately prior to any distribution to shareholders on a winding up, and payment being made of the amounts so apportioned to the holders of Shares of each Class linked to that Fund in such proportions as the liquidators in their absolute discretion think equitable, subject to the Articles and Luxembourg law.

Liquidation proceeds not claimed by shareholders at close of liquidation of a Fund will be deposited at the Caisse de Consignation in Luxembourg and shall be forfeited after thirty years.

#### 1.11 Unclaimed Dividends

If a dividend has been declared but not paid, and no coupon has

been tendered for such dividend within a period of five years, the Company is entitled under Luxembourg law to declare the dividend forfeited for the benefit of the Fund concerned. The Directors have, however, resolved as a matter of policy not to exercise this right for at least twelve years after the relevant dividend is declared. This policy will not be altered without the sanction of the shareholders in general meeting.

#### Company Practice

2. Shares will be divided into Classes each linked to a Fund. More than one Share Class may be linked to a Fund although, not all Share Classes are linked to each Fund. Currently, up to fifteen Share Classes (Class A, AI, B, C, D, DD, E, I, J, S, SI, SR, ZI, X and Z Shares) are available in Distributing and Non-Distributing format. They have no preferential or pre-emption rights and are freely transferable, save as referred to below. Non-Distributing Shares are referred to using the number 2. Distributing Shares are further referred to using the numbers 1 (distributing daily), 3 (distributing monthly), 4 (distributing annually), 5 (distributing quarterly), 6 (distributing monthly on the basis of expected gross income), 8 (distributing monthly on the basis of expected gross income and any Interest Rate Differential arising from Share Class currency hedging) and 9 (distributing quarterly on the basis of expected gross income and at least equal to, or greater than, the Dividend Threshold Amount on an annual basis) (See the section entitled "Class and Form of Shares" for further details).

#### Restrictions on Holding of Shares

3. The Directors may impose or relax restrictions (including restrictions on transfer and/or the requirement that Shares be issued only in registered form) on any Shares or Share Classes (but not necessarily on all Shares within the same Class) as they may think necessary to ensure that Shares are neither acquired nor held by or on behalf of any person in circumstances giving rise to a breach of the laws or requirements of any country or governmental or regulatory authority on the part of that person or the Company, or listed on EU and/or United States sanctions lists, or resident and established in countries and territories listed on EU and/or United States sanctions lists, or which might have adverse taxation or other pecuniary consequences for the Company, including a requirement to register under any securities or investment or similar laws or requirements of any country or authority. The Directors may in this connection require a shareholder to provide such information as they may consider necessary to establish whether he is the beneficial owner of the Shares that he holds. In addition to the foregoing, the Directors may determine to restrict the issue of shares when it is in the interests of the Fund and/or its Shareholders to do so, including when the Company or any Fund reaches a size that could impact the ability to find suitable investments for the Company or Fund. The Directors may remove such restriction at their discretion.

If the Company becomes aware that any Shares are owned directly or beneficially by any person in breach of any law or requirement of a country or governmental or regulatory authority, or otherwise in the circumstances referred to in this paragraph, the Directors may require the redemption of such Shares, decline to issue any Share and register any transfer of any Share or suspend the voting rights at any meeting of Shareholders of the Company of any person who is precluded from holding Shares at any meeting of the shareholders of the Company.

4. The Directors have resolved that no US Persons will be permitted to own Shares. The Directors have resolved that "US Person" means any US resident or other person specified in Regulation S under the US Securities Act of 1933 as amended from time to time and as may be further supplemented by resolution of the Directors.

If a shareholder currently resident outside the US becomes resident in the US (and consequently comes within the definition of a US Person), that shareholder will be required to redeem its Shares.

5. Class I Shares, Class J Shares, Class SI Shares and Class X Shares are only available to Institutional Investors within the meaning of Article 174 of the 2010 Law. As at the date of this Prospectus, Institutional Investors shall include:
  - 5.1 banks and other professionals of the financial sector, insurance and reinsurance companies, social security institutions and pension funds, industrial, charitable institutions, commercial and financial group companies, all subscribing on their own behalf, and the structures which such investors put into place for the management of their own assets;
  - 5.2 credit institutions and other professionals of the financial sector established in or outside Luxembourg investing in their own name but on behalf of Institutional Investors as defined above;
  - 5.3 credit institutions and other professionals of the financial sector established in or outside Luxembourg which invest in their own name but on behalf of their clients on the basis of a discretionary management mandate;
  - 5.4 CIS established in or outside Luxembourg;
  - 5.5 holding companies or similar entities, whether Luxembourg based or not, whose shareholders/beneficial owners are individual person(s) who are wealthy and may reasonably be regarded as sophisticated investors and where the purpose of the holding company is to hold important financial interests/investments for an individual or a family;
  - 5.6 a holding company or similar entity, whether Luxembourg based or not, which as a result of its structure, activity and substance constitutes an Institutional Investor;
  - 5.7 holding companies or similar entities, whether Luxembourg based or not, whose shareholders are Institutional Investors as described in the foregoing paragraphs; and/or
  - 5.8 national and regional governments, central banks, international or a supranational institutions and other similar organisations.

#### Funds and Share Classes

6. The Company operates separate investment "Funds" and within each Fund separate Share Classes are linked to that Fund. Pursuant to Article 181 of the 2010 Law, each Fund is only liable for the liabilities attributable to it.
7. Shares may be issued with or have attached thereto such preferred, deferred or other special rights, or such restrictions whether in regard to dividend, return of capital, conversion, transfer, the price payable on allotment or otherwise as the Directors may from time to time determine and such rights or restrictions need not be attached to all Shares of the same Class.
8. The Directors are permitted to create more than one Share Class linked to a single Fund. This allows, for example, the creation of accumulation and distribution Shares, Shares with different dealing currencies or Share Classes with different features as regards participation in capital and/or income linked to the same Fund; and also permits different charging structures. The Directors are also permitted, at any time, to close a particular Share Class, or, subject to at least 30 days' prior notice to the shareholders of the relevant Class, to decide to merge such Class with another Share Class of the same Fund. The Articles provide that certain variations of the rights attached to a Share Class may only be made with the sanction of a Class meeting of holders of Shares of that Class.
9. The Directors may require redemption of all the Shares linked to a particular Fund if the Net Asset Value of the relevant Fund falls below USD50 million (or the equivalent in any relevant Dealing

Currency). The Articles also permit the Directors to notify shareholders of the closure of any particular Fund where they deem it in the interests of the shareholders or appropriate because of changes in the economic or political situation affecting the Fund but in such circumstances the Directors intend as a matter of policy to offer holders of any Share Classes a free transfer into the same Share Class of other Funds. As described in more detail in the Company's Articles, the shareholders of a Fund may request the convening of a general meeting by a requisition of shareholders representing at least one tenth of the outstanding shares of such Fund to dissolve such Fund. As an alternative, the board of directors shall have the power, in accordance with the provisions of the 2010 Law, to merge a Fund, either as absorbing or as absorbed Fund, with another Fund of the Company or with another UCITS (or sub-fund thereof) (whether established in Luxembourg or another Member State and whether incorporated as a company or as a contractual type fund). The Company shall send a notice to the shareholders of the relevant Funds in accordance with the provisions of CSSF Regulation 10-5 as such regulation may be amended or replaced from time to time. Every shareholder of the relevant Funds shall have the opportunity of requesting the redemption or the conversion of his own shares without any cost (other than the cost of disinvestment) during a period of at least 30 days before the effective date of the merger, it being understood that the effective date of the merger takes place within five business days after the expiry of such notice period.

A Fund may be terminated in circumstances other than those mentioned above with the consent of a majority of the Shares present or represented at a meeting of all shareholders of the Share Classes of that Fund (at which no quorum requirement will apply). To the extent applicable, where a Fund is terminated the redemption price payable on termination will be calculated on a basis reflecting the realisation and liquidation costs on terminating the Fund.

The Directors have power to suspend dealings in the Shares linked to any Fund where it is to be terminated or merged in accordance with the above provisions. Such suspension may take effect at any time after the notice has been given by the Directors as mentioned above or, where the termination or merger requires the approval of a meeting of holders, after the passing of the relevant resolution. Where dealings in the Shares of the Fund are not suspended, the prices of Shares may be adjusted to reflect the anticipated realisation and liquidation costs or transaction costs mentioned above.

#### Valuation Arrangements

10. Under the Articles, for the purpose of determining the issue and redemption price per Share, the net asset value of Shares shall be determined as to the Shares of each Share Class by the Company from time to time, but in no instance less than twice monthly, as the Directors may direct.
11. The Directors' policy in respect of all Funds except the Multi-Theme Equity Fund, is normally to deal with requests received before 12 noon Luxembourg time on a Dealing Day (the "Cut-Off Point" for all Funds except the Multi-Theme Equity Fund) on that day; and other requests are normally dealt with on the next Dealing Day. The Directors' policy in respect of the Multi-Theme Equity Fund is normally that requests received before 12 noon Luxembourg time one Business Day before the relevant Dealing Day (the "Cut-Off Point" for the Multi-Theme Equity Fund) will be dealt with on such relevant Dealing Day; and requests received after this point will normally be dealt with on the next available Dealing Day. Forward dated requests will not be accepted and will be rejected or processed on the next Dealing Day at the discretion of the Directors.

#### Net Asset Value and Price Determination

12. All prices for transactions in Shares on a Dealing Day are based on the Net Asset Value per Share of the Share Classes concerned, as shown by a valuation made at a time or times determined by the

Directors. The Directors currently operate "forward pricing" for all Funds and Share Classes, i.e., prices are calculated on the Dealing Day concerned after the closing time for acceptance of orders (see section "Dealing in Fund Shares, Daily Dealing"). Prices in respect of a Dealing Day are normally published on the next Business Day. Neither the Company nor the Depositary can accept any responsibility for any error in publication, or for non-publication of prices or for any inaccuracy of prices so published or quoted. Notwithstanding any price quoted by the Company, by the Depositary or by any distributor, all transactions are effected strictly on the basis of the prices calculated as described above. If for any reason such prices are required to be recalculated or amended, the terms of any transaction effected on the basis of them will be subject to correction and, where appropriate, the investor may be required to make good any underpayment or reimburse any overpayment as appropriate. Periodic valuations of holdings in any Fund or Share Class may be supplied by arrangement with the local Investor Servicing teams.

13. The Net Asset Value of each Fund, calculated in its Base Currency, is determined by aggregating the value of securities and other assets of the Company allocated to the relevant Fund and deducting the liabilities of the Company allocated to that Fund. The Net Asset Value per Share of the Share Classes of a particular Fund will reflect any adjustment to the Net Asset Value of the relevant Fund described in paragraph 17.3) below and will differ as a result of the allocation of different liabilities to those Classes (see section "Fees, Charges and Expenses" and as a result of dividends paid).
14. In general, securities and other assets are valued as follows:

Foreign securities or assets denominated in another currency than the base currency of the relevant Fund are valued at the applicable foreign exchange rate against the Base Currency of each Fund.

The value of any securities (including listed derivatives) and other assets is determined by the last known prices upon close of the stock exchange on which those securities or assets are traded or admitted for trading.

The value of any securities or assets traded on any other regulated market is determined in the same way. Where such securities or other assets are quoted or dealt in on or by more than one stock exchange or regulated market the Directors may in their discretion select one of such stock exchanges or regulated markets for such purposes.

For securities or assets traded on markets closing after the time of the valuation, last known prices as of this time or such other time may be used. If net transactions in Shares of the Fund on any Dealing Day exceed the threshold referred to in paragraph 17.3 below, then additional procedures apply. Shares or units in investment funds managed by the Management Company or any of its associates shall be valued using prices based on the current day's net asset value where these are calculated and available prior to the valuation point. Where the net asset value is calculated after the valuation point, or the current day's net asset value is not available, the latest available published price will be used. If bid and offer prices are published, the mid of the bid price and discounted offer price will be used (the "mid-price"). For these purposes, the discounted offer price is the offer price less any discounted sales charge. Shares or units in other investment funds shall be valued at the last published net asset value or (if bid and offer prices are published) the mid-price. Where possible, swaps are marked to market based upon daily prices obtained from third party pricing agents and verified against the quotations of the actual market maker. Where third party prices are not available, swap prices are based upon daily quotations available from the market maker.

Cash, bills payable on demand and other debts and prepaid expenses are valued at their nominal amount, unless it appears unlikely that such nominal amount is obtainable.

Unlisted or over the counter derivatives prices are obtained from third party pricing vendors.

15. If a security is not traded on or admitted to any official stock exchange or any regulated market, or in the case of securities so traded or admitted the last known price is not considered to reflect their true value, the Directors will value the securities concerned with prudence and in good faith on the basis of their expected disposal or acquisition price.
16. If in any case a particular value is not ascertainable by the methods outlined above, or if the Directors consider that some other method of valuation more accurately reflects the fair value of the relevant security or other asset for the purpose concerned, the method of valuation of the security or asset will be such as the Directors in their absolute discretion decide. Discrepancies in the value of securities may result, for example, where the underlying markets are closed for business at the time of calculating the Net Asset Value of certain Funds or where governments chose to impose fiscal or transaction charges on foreign investment. The Directors may set specific thresholds that, where exceeded, result in adjustment to the value of these securities to their fair value by applying a specific index adjustment.

The Company makes use of the "BlackRock EMEA Pricing Committee" in the context of the performance and oversight of the pricing and valuation functions for the Funds. In the case of hard to price securities or assets, the process outlined above is used to determine the most appropriate fair values. The BlackRock EMEA Pricing Committee has safeguards in place to ensure the functional independence of the valuation task.

- 17.1 Under current procedures adopted by the Directors the price for all Share Classes of any Fund is the Net Asset Value per relevant Class of that Fund calculated to the nearest unit (rounded to up to four decimal places) of the relevant Dealing Currency.
- 17.2 For those Funds with more than one Dealing Currency, the additional Dealing Currency prices are calculated by converting the price at the relevant spot exchange rate at the time of valuation.
- 17.3 The Directors may adjust the Net Asset Value per Share for a Fund in order to reduce the effect of "dilution" on that Fund. Dilution occurs when the actual cost of purchasing or selling the underlying assets of a Fund deviates from the carrying value of these assets in the Fund's valuation, due to factors such as dealing and brokerage charges, taxes and duties, market movement and any spread between the buying and selling prices of the underlying assets. Dilution may have an adverse effect on the value of a Fund and therefore impact shareholders. By adjusting the Net Asset Value per Share this effect can be reduced or prevented and shareholders can be protected from the impact of dilution. The Directors may adjust the Net Asset Value of a Fund if on any Dealing Day the value of aggregated cash flows of all Share Classes of that Fund results in a net increase or decrease which exceeds one or more thresholds that are set by the Directors for that Fund. The amount by which the Net Asset Value of a Fund may be adjusted on any given Dealing Day is related to the anticipated cost of market dealing for that Fund. In such circumstances the Net Asset Value of the relevant Fund may be adjusted by an amount not exceeding 1.50%, or 3% in the case of fixed income Funds, of that Net Asset Value. Under exceptional circumstances the Directors may, in the interest of Shareholders, decide to temporarily increase the maximum swing factor indicated above and inform investors thereof. The adjustment will be an addition when the net movement results in an increase in the value of all Shares of the Fund and a deduction when it results in a

decrease. As certain stock markets and jurisdictions may have different charging structures on the buy and sell sides, particularly in relation to duties and taxes, the resulting adjustment may be different for net inflows than for net outflows. In addition, the Directors may also agree to include extraordinary fiscal charges in the amount of the adjustment. These extraordinary fiscal charges vary from market to market and are currently expected not to exceed 2.5% of that Net Asset Value. Where a Fund invests primarily in certain asset types, such as government bonds or money market securities, the Directors may decide that it is not appropriate to make such an adjustment. Shareholders should note that due to adjustments being made to the Net Asset Value per Share, the volatility of a Fund's Net Asset Value per Share may not fully reflect the true performance of the Fund's underlying assets.

18. This section 18 applies to the funds which are categorised as Short Term VNAV Money Market Funds under the MMF Regulations only. In accordance with the requirements of the MMF Regulations, the following shall apply:

The Assets of the relevant Fund shall be valued on at least a daily basis using mark-to-market process whenever possible. When using mark-to-market:

1. the relevant asset shall be valued at the more prudent side of bid and offer unless the asset can be closed out at mid-market;
2. only good quality market data shall be used; such data shall be assessed on the basis of all of the following factors:
  - (a) the number and quality of the counterparties;
  - (b) the volume and turnover in the market of the relevant asset;
  - (c) the issue size and the portion of the issue that the Fund plans to buy or sell.

Where use of mark-to-market is not possible or the market data is not of sufficient quality, an asset of a MMF shall be valued conservatively by using mark-to-model.

The model shall accurately estimate the intrinsic value of the asset of a MMF, based on all of the following up-to-date key factors:

1. the volume and turnover in the market of that asset;
2. the issue size and the portion of the issue that the MMF plans to buy or sell;
3. market risk, interest rate risk, credit risk attached to the asset.

When using mark-to-model, the amortised cost method shall not be used.

The NAV per unit or share shall be calculated as the difference between the sum of all assets of the relevant Fund and the sum of all liabilities of that Fund valued in accordance with mark-to-market or mark-to-model, or both, divided by the number of outstanding units or shares of that Fund.

The NAV per unit or share shall be rounded to the nearest basis point or its equivalent when the NAV is published in a currency unit.

The NAV per unit or share of the relevant Fund shall be calculated and published at least daily on the product pages of [www.blackrock.com](http://www.blackrock.com).

Shares of the MMFs shall be issued and redeemed at a price that is equal to the relevant Fund's NAV per share, notwithstanding permitted fees or charges as specified in this Prospectus.

### Redemption and Deferred Sales Charges

- 19.1 The Directors are entitled to levy a discretionary redemption charge on shareholders of all Share Classes where they believe that excessive trading is being practised.
- 19.2 On redemption of Class C Shares, the relevant CDSC rate is charged on the lower of (i) the price of the redeemed shares on the Dealing Day for redemption or (ii) the price paid by the shareholder for the original purchase of the redeemed shares or for the shares from which they were converted or exchanged, in either case calculated in the relevant Dealing Currency of the redeemed shares.
- 19.3 On redemption of Class B Shares, the relevant CDSC rate is charged on the price of the redeemed shares on the Dealing Day for redemption, calculated in the relevant Dealing Currency of the redeemed shares.
- 19.4 No CDSC will be levied on the redemption of (a) Class C Shares derived from reinvestment of dividends; or (b) Class C Shares in the Reserve Funds (provided they were not converted from Shares of a non-Reserve Fund).
- 19.5 The CDSC is levied by reference to the "Relevant Holding Period", which is an aggregate of the periods during which (a) the redeemed shares, and (b) the shares from which they were derived (if any) as a result of conversion or exchange, were held in any Fund except a Reserve Fund or any other exchangeable money market funds.

In cases where redeemed shares are only part of a larger holding of Class C Shares respectively, any Shares acquired by dividend reinvestment will be redeemed first; and where the holding consists of Class C Shares acquired at different times, it will be assumed that those acquired first are redeemed first (thus resulting in the lowest CDSC rate possible).

Where the redeemed shares have a different dealing currency to the Shares (or similar shares from which they were converted or exchanged) originally purchased, for purposes of determining the CDSC the price paid for the latter will be converted at the spot exchange rate on the Dealing Day for redemption.

The CDSC may be waived or reduced by the relevant distributor at its discretion or for shareholders who, after purchasing Class C Shares, become US Persons and are required to redeem their Shares as a result (see paragraph 4. above).

### Conversion

20. The Articles allow the Directors on issuing new Share Classes to impose such rights of conversion as they determine, as described in paragraph 7. above. The basis of all conversions is related to the respective Net Asset Values per Share of the relevant Class of the two Funds concerned.
21. The Directors have determined that the number of Shares of the Class into which a shareholder wishes to convert his existing Shares will be calculated by dividing (a) the value of the number of Shares to be converted, calculated by reference to the Net Asset Value per Share by (b) the Net Asset Value per Share of the new Class. This calculation will be adjusted where appropriate by the inclusion of a conversion charge (see paragraph 22. below) or a delayed initial charge on Class A, Class D, Class DD or Class E Shares (see paragraph 22. below). No conversion charge will be made when a delayed initial charge is payable. If applicable, the

relevant exchange rate between the relevant Dealing Currencies of the Shares of the two Funds will be applied to the calculation.

The Net Asset Value(s) per Share used in this calculation may reflect any adjustment(s) to the Net Asset Value(s) of the relevant Fund(s) described in paragraph 17.3 above.

22. Conversions are permitted between different Share Classes of the same Fund or of different Funds, subject to the limitations set out under the section "Switching Between Funds and Share Classes" and provided investors and/or the holding (as appropriate) meet the specific eligibility criteria for each Share Class set out above (see "Classes and Form of Shares").

Selected distributors may impose a charge on each conversion of those Shares acquired through it, which will be deducted at the time of conversion and paid to the relevant distributor. While other conversions between the same Share Class of two Funds are normally free of charge, the Management Company may, at its discretion (and without prior notice), make an additional conversion charge which would increase the amount paid to up to up to a maximum of 2% if excessively frequent conversions are made. Any such charges will be deducted at the time of conversion and paid to the relevant distributor or the Principal Distributor (as applicable).

When Class A, Class AI, Class D, Class DD or Class E Shares of a Reserve Fund resulting from a direct investment into that or any other Reserve Fund ("direct Shares") are converted for the first time into Class A, Class AI, Class D, Class DD or Class E Shares of a non-Reserve Fund, a delayed initial charge of up to 5% of the price of the new Class A Shares, Class AI, Class D or Class DD Shares or up to 3% of the price of the new Class E Shares (where applicable) may be payable to the Management Company. Where a Reserve Fund holding includes both direct Shares and Shares acquired as a result of a conversion from Shares in any Fund other than a Reserve Fund ("ordinary Shares") a partial conversion of the holding will be treated as a conversion of the direct Shares first and then of the ordinary Shares.

The Directors reserve the right to waive or vary these requirements and also to amend their policy if they consider it appropriate to do so, either generally or in particular circumstances.

### Settlement on Redemptions

23. Payment of an amount to a single shareholder in excess of USD500,000 may be deferred for up to seven Business Days beyond the normal settlement date. The redemption price may be payable in specie as explained in paragraph 25. below. As a result of money laundering prevention requirements and fight against terrorism financing, concerns related to international sanctions adherence, or in relation to fraud prevention, redemption proceeds may be withheld. The Company reserves the right to extend the period of payment of redemption proceeds to such period, not exceeding eight Business Days, as shall be necessary to repatriate proceeds of the sale of investments in the event of impediments due to exchange control requirements or similar constraints in the markets in which a substantial part of the assets of the Company are invested or in exceptional circumstances where the liquidity of the Company is not sufficient to meet the redemption requests.

### In Specie Applications and Redemptions

24. The Management Company may accept subscriptions in specie, or partly in cash and in specie, subject always to the minimum initial subscription amounts and the additional subscription amounts and provided further that the value of such subscription in specie (after deduction of any relevant charges and expenses) equals the subscription price of the Shares. Such securities will be valued on the relevant Dealing Day and, in accordance with Luxembourg law, may be subject to a special report of the Auditor.

25. The Management Company may, subject to the prior consent of a shareholder and to the minimum dealing and holding amounts, effect a payment of redemption proceeds in specie by allocating to the shareholder investments from the portfolio of the relevant Fund equal in value (calculated in the manner referred to in paragraphs 14. and 15. above) to the price of the relevant Shares to be redeemed (net of any applicable CDSC in the case of Class B and Class C Shares). The nature and type of asset to be transferred in such case will be determined on an equitable basis and without prejudicing the interests of the other holders of Shares of the same Class, and will be valued on the relevant Dealing Day. In accordance with Luxembourg law, such valuation may be subject to a special report of the Auditor. In specie applications and redemptions may attract transaction taxes depending on the assets in question. In the case of an in specie redemption these taxes will be at the charge of the investor. Investors should inform themselves of, and when appropriate consult their professional advisers on the possible tax consequences of redeeming their shareholding in this way, under the laws of their country of citizenship, residence or domicile. Investors should note that the levels and bases of, and relief from, taxation can change.

In specie applications and redemptions may not always be possible, practicable or cost efficient and may have an adverse impact on existing shareholders. The Management Company has sole discretion to refuse requests for in specie applications and redemptions.

#### Dealings in Shares by the Principal Distributor

26. The Principal Distributor, may as principal acquire and hold Shares and may at its sole discretion satisfy, in whole or in part, an application or request for the issue, redemption or conversion of such Shares by selling Shares to and/or buying them from the applicant, as appropriate, provided that the applicant consents to such transaction. Shareholders will be deemed to have consented to deal with the Principal Distributor unless they have expressly informed the Transfer Agent to the contrary. Any such transaction will be effected on the same terms as to price and settlement as would have applied in the case of a corresponding issue, redemption or conversion of Shares (as relevant) by the Company. The Principal Distributor is entitled to retain any benefit arising from these transactions.

#### Default in Settlement

27. Where an applicant for Shares fails to pay settlement monies on subscription or to provide a completed application form for an initial application by the due date, the Directors may, in accordance with the Company's Articles, cancel the allotment or, if applicable, redeem the Shares. Redemption or conversion instructions may be refused or treated as though they have been withdrawn if payment for the Shares has not been made or a completed initial application form has not been received by the Company. In addition, no dealings will be effected following a conversion instruction and no proceeds will be paid on a redemption until all documents required in relation to the transaction have been provided to the Company.
- An applicant may be required to indemnify the Company or, as described below, the Principal Distributor against any losses, costs or expenses incurred directly or indirectly as a result of the applicant's failure to pay for Shares applied for or to lodge the required documents by the due date.**

In computing any losses covered under this paragraph 27., account shall be taken, where appropriate, of any movement in the price of the Shares concerned between the transaction date and cancellation of the transaction or redemption of the Shares, and of the costs incurred by the Company or, if applicable, the Principal Distributor in taking proceedings against the applicant.

The Principal Distributor has agreed to exercise its discretion to take steps to avoid the Company suffering losses as a result of late settlement by any applicant. In cases where payment for Shares is not made on a timely basis, the Principal Distributor may assume

ownership of the Shares and it shall also have the right to give instructions to the Company to make any consequent alterations in its register of shareholders, delay the completion of the relevant transaction, redeem the Shares in question, claim indemnification from the applicant and/or take proceedings to enforce any applicable indemnity, all to the same extent that the Company itself may do so.

The Company has instructed the Depositary that any interest benefit that may arise as a result of the early settlement of Share subscriptions and late clearance of redemption proceeds may be set off against any interest obligation that the Principal Distributor may incur as a result of its arrangements to protect the Company from losses from the late settlement of Share subscriptions. The Principal Distributor will benefit from interest earned on any balances held in client money accounts. No interest is paid to shareholders by the Principal Distributor in respect of amounts relating to individual transactions.

#### Compulsory Redemption

28. If at any time the Net Asset Value of the Company is less than USD100 million (or equivalent), all Shares not previously redeemed may be redeemed by notice to all shareholders. There is a similar power to redeem Shares of any Class if the Net Asset Value of the Fund to which that Class is linked falls below USD50 million (or equivalent), or in the circumstances described in paragraphs 3., 4. and 9. above.

#### Limits on Redemption and Conversion

29. The Company will not be bound to redeem or convert on any one Dealing Day more than 10% of the value of Shares of all Classes of a Fund then in issue or deemed to be in issue, as described in paragraph 32. below.

#### Suspension and Deferrals

30. Valuations (and consequently issues, redemptions and conversions) of any Share Class of a Fund may be suspended in certain circumstances including:
- ▶ the closure (otherwise than for ordinary holidays) of or suspension or restriction of trading on any stock exchange or market on which are quoted a substantial proportion of the investments held in that Fund;
  - ▶ the existence of any state of affairs which constitutes an emergency as a result of which disposals or valuation of assets owned by the Company attributable to Share Classes would be impracticable;
  - ▶ any breakdown in the means of communication normally employed in determining the price or value of any of the investments of such Share Classes or the current price or values on any stock exchange or other market;
  - ▶ any period when the Company is unable to repatriate funds for the purpose of making payments on the redemption of such Shares or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of shares cannot in the opinion of the directors be effected at normal rates of exchange;
  - ▶ any period when the net asset value per share of any subsidiary of the Company may not be accurately determined;
  - ▶ where notice has been given or a resolution passed for the closure or merger of a Fund as explained in paragraph 9.;

- ▶ in respect of a suspension of the issuing of Shares only, any period when notice of winding up of the Company as a whole has been given;
- ▶ following a decision to merge a Fund or the Company, if justified with a view to protecting the interest of shareholders;
- ▶ in case a Fund is a Feeder of another UCITS (or a sub-fund thereof), if the net asset value calculation of the Master UCITS (or the sub-fund thereof) is suspended;
- ▶ in addition, in respect of Funds that invest a substantial amount of assets outside the European Union, the Management Company may also take into account whether local relevant local exchanges are open and may elect to treat such closures (including ordinary holidays) as non Business Days for those Funds. Please see definition of Business Day in the Glossary.

31. Each period of suspension shall be published, if appropriate, by the Company. Notice will also be given to any shareholder lodging a request for redemption or conversion of Shares.

32. The Company will also not be bound to accept instructions to subscribe for, and will be entitled to defer instructions to redeem or convert any Shares of a Fund on any one Dealing Day if there are redemption or outgoing conversion orders that day for all Share Classes of that Fund with an aggregate value exceeding a particular level (currently fixed at 10%) of the approximate value of that Fund. In addition, the Company may defer redemptions and conversions in exceptional circumstances that may, in the opinion of the Directors, adversely affect the interests of holders of any Class or Share Classes of that Fund. In either case, the Directors may declare that redemptions and conversions will be deferred until the Company has executed, as soon as possible, the necessary realisation of assets out of the Fund concerned or until the exceptional circumstances cease to apply. Redemptions and conversions so deferred will be done on a pro rata basis and will be dealt with in priority to later requests.

33. During a period of suspension or deferral a shareholder may withdraw his request, in respect of any transaction which is deferred or suspended, by notice in writing to the Company. Such notice will only be effective if received before the transaction is effected.

Shareholders may not redeem a holding of the Company's Shares unless and until cleared funds have been received by the Company in respect of that holding.

#### Transfers

34. The transfer of registered shares may normally be effected by delivery to the Transfer Agent of an instrument of transfer in appropriate form. If a transfer or transmission of Shares results in a holding on the part of the transferor or the transferee having a value of less than a prescribed minimum the Directors may require the holding to be redeemed. The current minimum is USD5,000 or equivalent, and, for Class ZI Shares, USD 25 million, except for Class D Shares, Class DD Shares, Class I Shares, Class J Shares, Class S Shares, Class SI Shares, Class X Shares and Class Z Shares, where there is no prescribed minimum holding size once the initial subscription amount has been made.

#### Probate

35. Upon the death of a shareholder, the Directors reserve the right to require the provision of appropriate legal documentation to evidence the rights of the shareholder's legal successor. Upon the death of a shareholder whose investment is held jointly with another shareholder, where permitted by applicable law, ownership of the investment will be transferred to the name of the surviving shareholder.

#### Dividends

36. The Articles impose no restriction on dividends other than the requirement to maintain the statutory minimum level of capital (currently the equivalent of EUR1,250,000). The Directors have the power to pay interim dividends in respect of any Fund. The current dividend policy of the Directors is explained in the section "Dividends".

#### Changes of Policy or Practice

37. Except as otherwise provided in the Articles, and subject to any legal or regulatory requirements, the Directors reserve the right to amend any practice or policy stated in this Prospectus. The Management Company may, in the interests of shareholders and subject to the discretion of the Directors, vary or waive the operational procedures of the Company.

#### Intermediary Arrangements

38. Where Shares are issued by the Company to financial institutions (or their nominees) which act as intermediaries, the benefits and obligations described in this Prospectus may be applied by the Company to each of the intermediary's clients as if such client were a direct shareholder.

#### Money Market Funds - Transparency

39. With respect to any funds subject to the MMF Regulations. The Management Company shall, at least weekly, make all of the following information available to the MMF's investors:

- (a) the maturity breakdown of the portfolio of the MMF;
- (b) the credit profile of the MMF;
- (c) the WAM and WAL of the MMF;
- (d) details of the 10 largest holdings in the MMF, including the name, country, maturity and asset type, and the counterparty in the case of repurchase and reverse repurchase agreements;
- (e) the total value of the assets of the MMF;
- (f) the net yield of the MMF.

## Appendix C – Additional Information

### History of the Company

1. The Company is registered under Number B.6317 at the Register of Commerce and Companies of Luxembourg where its Articles of Association are available for inspection and where copies thereof may be obtained upon request (and see also paragraph 27. below).
2. The Company's constitution is defined in the Articles. The original Articles were published in the Recueil des Sociétés et Associations du Mémorial of the Grand-Duchy of Luxembourg on 21<sup>st</sup> July 1962. The Articles have been amended and restated several times, most recently on 4 February 2019, with publication in the RESA on 25 February 2019.
3. The Company was incorporated as Selected Risk Investments S.A. on 14<sup>th</sup> June 1962.
4. With effect from 31<sup>st</sup> December 1985 the name of the Company was changed to Mercury Selected Trust, the Company adopted the legal status of a société d'investissement à capital variable (SICAV) and was reconstituted to enable it to issue different Share Classes. It qualifies as an Undertaking for Collective Investment in Transferable Securities.  
  
With effect from 1 July 2002 the name of the Company changed to Merrill Lynch International Investment Funds.  
  
With effect from 28 April 2008 the name of the Company changed to BlackRock Global Funds.  
  
With effect from 16 September 2005 the Company was submitted to Part I of the 20 December 2002 law that implemented Directives 2001/107/EC and 2001/108/EC.  
  
With effect from 16 September 2005 the Company has appointed BlackRock (Luxembourg) S.A. (previously named Merrill Lynch Investment Managers (Luxembourg) S.A.) as its management company.  
  
With effect from 4 February 2019 the Company's articles were amended to account for the provisions of the MMFR Regulations.
5. As from the date of this Prospectus, Shares are offered solely on the basis of this Prospectus, which supersedes all previous versions.

### Directors' Remuneration and Other Benefits

6. The Articles contain no express provision governing the remuneration (including pension or other benefits) of the Directors. The Directors receive fees and out-of-pocket expenses from the Company. For Directors who are not employees of the BlackRock Group, the annual fees received by them are from time to time disclosed in the annual report of the Company. The BlackRock Group employees serving as Directors of the Company are not entitled to receive fees.

### Auditor

7. The Company's auditor is Ernst & Young S.A., 35E avenue John F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg.

### Administrative Organisation

8. **The Investment Advisers and Sub-Investment Advisers**  
The Management Company is entitled to delegate its investment management functions to any of its subsidiaries or associates and any other person. The Management Company has delegated some functions to the Investment Advisers, BlackRock Financial Management, Inc., BlackRock Investment Management, LLC, BlackRock Investment Management (UK) Limited and BlackRock

(Singapore) Limited as described in the section "Investment Management of the Funds", "Management".

In the case of certain Funds, BlackRock Investment Management (UK) Limited has in turn sub-delegated some functions to BlackRock Japan Co., Ltd. whose registered office is at 1-8-3 Marunouchi, Chiyoda-ku, Tokyo 100-8217, Japan, BAMNA whose registered office is at 16/F Champion Tower, 3 Garden Road, Central Hong Kong, to BlackRock Investment Management (Australia) Limited Lv. 37 Chifley Tower, 2 Chifley Square, Sydney NSW 2000 Australia, and to BlackRock Saudi Arabia whose registered office is at Laysen Valley, Building 7976 Salim Ibn Abi Bakr Shaikan St West Umm Al Hamam District, 2223, Riyadh 12329, Saudi Arabia.

Information about the Investment Advisers and, if applicable, Sub-Advisers for a specific Fund is available upon request from the Company's registered office and the local Investor Servicing team.

### 9. The Principal Distributor

BlackRock Investment Management (UK) Limited is the Principal Distributor and was incorporated with limited liability in England on 16th May 1986 for an unlimited period. The Management Company has entered into an agreement with the Principal Distributor for the provision of distribution, promotion and marketing services.

The registered office of the Principal Distributor is at 12 Throgmorton Avenue, London EC2N 2DL, UK. The Principal Distributor is regulated by the Financial Conduct Authority.

The Principal Distributor has appointed BlackRock (Channel Islands) Limited, a company incorporated with limited liability in Jersey on 10th August 1972 for an unlimited period ("BCI") to carry out certain administration services.

The registered office of BCI is at Aztec Group House, 11-15 Seaton Place, St Helier, Jersey JE4 0QH, Channel Islands.

### 10. Investor Servicing

The Management Company has entered into an Agreement with various BlackRock Group companies for the provision of dealing facilities and related investor support functions.

### 11. The Depositary

The Company has entered into a Depositary Agreement with the Depositary whereby the Depositary has agreed to act as custodian of the assets of the Company and to assume the functions and responsibilities of a custodian under the 2010 Law and other applicable law. The Depositary will also act as depositary of the Company for the purposes of the UCITS Directive. The Depositary and Fund Accountant (see paragraph 12. below) is The Bank of New York Mellon SA / NV, Luxembourg Branch, incorporated with limited liability in Belgium on 30 September 2008 with registered capital of EUR 1,723,485,526.21 as at 31 December 2017. Its office / correspondence address is 2-4, rue Eugène Ruppert, L-2453 Luxembourg, Grand Duchy of Luxembourg and its registered office address is 2-4, rue Eugène Ruppert, L-2453 Luxembourg. Its ultimate holding company is The Bank of New York Mellon Corporation ("BNY") which is incorporated in the United States of America. The Depositary's and the Fund Accountant's principal business activity is the provision of custodial and investment administration services and treasury dealing.

### The Duties of the Depositary

The Depositary shall act as the depositary of the Funds for the purposes of the UCITS Directive and, in doing so, will comply with the provisions of the UCITS Directive. In this capacity, the Depositary's duties shall include, amongst others, the following:

- 11.1 ensuring that each Fund's cash flows are properly monitored, and that all payments made by or on behalf of Shareholders upon the subscription of units of the Funds have been received;
- 11.2 safekeeping the assets of the Funds, which includes (a) holding in custody all financial instruments that may be registered in a financial instruments account opened in the Depositary's books and all financial instruments that can be physically delivered to the Depositary; and (b) for other assets, verifying the ownership of such assets and maintaining a record accordingly (the "Safekeeping Function");
- 11.3 ensuring that the sale, issue, re-purchase, redemption and cancellation of units of each Fund are carried out in accordance with the applicable national law and the Articles;
- 11.4 ensuring that the value of the units of each Fund is calculated in accordance with the applicable national law and the Articles;
- 11.5 carrying out the instructions of the Management Company, unless they conflict with the applicable national law or the Articles;
- 11.6 ensuring that in transactions involving each Fund's assets any consideration is remitted to the relevant Fund within the usual time limits; and
- 11.7 ensuring that the Funds' income is applied in accordance with the applicable national law;
- 11.8 The Depositary will allocate the safekeeping function in relation to certain financial instruments and/or cash of a Fund (as appropriate) to Bank of New York Mellon SA/NV.

The Depositary will further ensure, in accordance with the requirements of the UCITS Directive, that the assets of the Funds held in custody by the Depositary shall not be reused by the Depositary or by any third party to whom the custody function has been delegated for their own account. Reuse comprises any transaction of assets of the Funds held in custody including, but not limited to, transferring, pledging, selling and lending. Assets of the Funds held in custody are only allowed to be reused where:

- (a) the reuse of the assets is executed for the account of the Funds;
- (b) the Depositary is carrying out the instructions of the Management Company;
- (c) the reuse is for the benefit of the Fund and in the interest of the Shareholders; and
- (d) the transaction is covered by high quality and liquid collateral received by the Fund under a title transfer arrangement with a market value at all times at least equivalent to the market value of the reused assets plus a premium.

The Depositary has entered into written agreements delegating the performance of its Safekeeping Function in respect of certain investments to the delegates listed in Appendix F.

As part of the normal course of global custody business, the Depositary may from time to time have entered into arrangements with other clients, funds or other third parties, including affiliates for the provision of safekeeping and related services and as a result, potential conflict of interest situations may, from time to time, arise between the Depositary and its safekeeping delegates, for example, where an appointed delegate is an affiliated group company and is providing a product or service to a fund and has a financial or business interest in such product or service or where an appointed delegate is an affiliated group company which receives

remuneration for other related custodial products or services it provides to the funds e.g. foreign exchange, securities lending, pricing or valuation services.

The Depositary also has in place policies and procedures in relation to the management of conflicts of interest between the Depositary, the Fund and the Management Company that may arise where a group link as defined in the applicable regulations exists between them. This may be the case where the Management Company has delegated certain administrative functions to an entity within the same corporate group as the Depositary.

In the event of any potential conflict of interest which may arise during the normal course of business, the Depositary will at all times have regard to its obligations under applicable laws. Additionally, in order to address any situations of conflicts of interest, the Depositary has implemented and maintains a management of conflicts of interest policy, with the aim of:

- (a) identifying and analysing potential situations of conflicts of interest;
- (b) recording, managing and monitoring the conflict of interest situations by:
  - ▶ relying on permanent measures to address conflicts of interest such as maintaining separate legal entities, segregating duties, separating reporting lines and maintaining insider lists for staff members; or
  - ▶ implementing appropriate procedures on a case-by-case basis, such as establishing new information barriers, ensuring that operations are carried out at arm's length and/or informing the concerned Shareholders of the Company.

The Depositary has established a functional and hierarchical separation between the performance of its UCITS depositary functions and the performance of other tasks on behalf of the Company.

Up-to-date information on the Depositary, its duties, any conflicts of interest that may arise, the safekeeping functions delegated by the Depositary, the list of delegates and sub-delegates and any conflicts of interest that may arise from such delegations will be made available to Shareholders on request.

## 12. The Fund Accountant

The Management Company has entered into an agreement with the Fund Accountant whereby the Fund Accountant has agreed to provide fund accounting, Net Asset Value determination and services related to these functions. Subject to Luxembourg law and regulation the Fund Accountant is entitled to delegate specific functions to any other person, firm or company (with the approval of the Management Company and the regulatory authority).

## 13. The Transfer Agent

The Management Company has entered into a Transfer Agency Agreement with the Transfer Agent whereby the Transfer Agent has agreed to provide all necessary transfer agency functions including application and transaction processing, maintaining the share register, and services related to these functions.

## 14. Relationship of Depositary and Fund Accountant with BlackRock Group

The Depositary's and Fund Accountant's associates provide custody and fund accounting services to BlackRock Investment Management (UK) Limited and some of its associates in respect of their investment management business generally. Under agreements between companies in the BNY group and some companies in the BlackRock Group relating to the provision of

these services, payments due from the relevant companies in the BlackRock Group to BNY companies will be abated by the fees paid by the Company to the Depositary and Fund Accountant in respect of depositary and fund accounting services.

### 15. The Paying Agents

The Company has appointed the following as Paying Agents:

#### *Austria*

Raiffeisen Bank International AG  
Am Stadtpark 9  
1030 Vienna

#### *Belgium*

J.P. Morgan Chase Bank, Brussels Branch  
Boulevard du Régent 35  
1000 Brussels  
Belgium

#### *Liechtenstein*

VP Bank AG  
9490 Vaduz, LIECHTENSTEIN  
(FL-0001.007.080-0)  
represented by  
VP Fund Solutions (Liechtenstein) AG  
9490 Vaduz, LIECHTENSTEIN  
(FL-0002.000.772-7)

VP Fund Solutions shall take receipt of investors' complaints relating to the Fund that are sent to the postal and/or e-mail addresses of VP Fund Solutions given above. Investors in the Principality of Liechtenstein wishing to receive Fund payments directly via the Paying Agent and to have Fund shares redeemed directly via the Paying Agent shall generally have the option of opening an account/deposit for that purpose with the Paying Agent. This account/deposit shall be subject to the standard checks (e.g. for legal compliance) carried out on all potential bank clients (investors) and their assets. To that extent it shall be at the discretion of the Paying Agent whether to enter into such a client relationship.

#### *Luxembourg*

(Central Paying Agent)  
J.P. Morgan SE, Luxembourg Branch

Hampshire Building, 1st Floor  
Chaseside  
Bournemouth  
BH7 7DA

### Fees, Charges and Expenses

16. The Management Company is remunerated from the management fees based on the Net Asset Value of each Fund, at an annual rate as shown in Appendix E.
17. The Depositary receives annual fees, based on the value of securities, which accrue daily, plus transaction fees. The annual custody safekeeping fees range from 0.001% to 0.45% per annum and the transaction fees range from USD3 to USD108 per transaction, all such fees to be subject to change without prior notice. The rates for both categories of fees will vary according to the country of investment and, in some cases, according to asset class. Investments in bonds and developed equity markets will be at the lower end of these ranges, while some investments in emerging or developing markets will be at the upper end. Thus the custody cost to each Fund will depend on its asset allocation at any time.

The Company pays an Annual Service Charge to the Management Company of up to 0.25% per annum. The level of Annual Service Charge may vary at the Directors' discretion, as agreed with the Management Company, across Funds and Share Classes. It is accrued daily, based on the Net Asset Value of the relevant Share Class and paid monthly. The Annual Service Charge is used by the Management Company to meet all fixed and variable operating and administrative costs and expenses incurred by the Company, with the exception of the Depositary fees, Distribution fees, Securities Lending fees, any fees arising from borrowings (including for the avoidance of doubt any commitment fee that may be due to the lender), and any legal costs relating to European Union and non-European withholding tax reclaims plus any taxes thereon and any taxes at an investment or Company level. In addition taxes payable by the Company such as subscription taxes remain payable by the Company. The Annual Service Charge shall not exceed 0.25% per annum and any costs and expenses in excess shall be borne by the Management Company or another BlackRock Group Company. For further details, please refer to the "Annual Service Charge" section

in the section entitled “Fees, Charges and Expenses” for further information.

18. The Principal Distributor is entitled to receive:

- ▶ the initial charge of up to 5% of the price of the Class A Shares, Class AI, Class AJ Shares, Class D Shares and Class DD Shares issued, where levied;
- ▶ the initial charge of up to 3% of the Net Asset Value of the Class E Shares issued, where applicable and levied;
- ▶ the CDSC on redemptions;
- ▶ any delayed initial charge on Class A, Class AI, Class AJ, Class D, Class DD or Class E Shares, respectively;
- ▶ (for the benefit of the relevant Fund) the Management Company's charge on excessively frequent conversions of any Share Class (see paragraph 22. of Appendix B); and
- ▶ any distribution fees.

19. Subject to the approval of the Directors, the combined management fee and Annual Service Charge for any Fund may be increased up to a maximum of 2.25% in total by giving Shareholders at least three months' prior notice. Any increase to the combined management fee and Annual Service Charge above this level would require approval of Shareholders at an extraordinary general meeting. At least one month's notice will be given to Shareholders of any increase in the rates of other fees and charges specified in this Prospectus, unless prior Shareholder consent is required under the Company's Articles when at least one month's notice will be given from the date of such consent.

20. The Principal Distributor is entitled, at its sole discretion and without recourse or cost to the Company, to waive any initial charge, in whole or in part, or determine to make a rebate payment in respect of the payment of any fees charged in respect of any holding of Shares to any investor (including discounts on charges to directors and employees of the Principal Distributor and its affiliates in the BlackRock Group) or its distributors, authorised intermediaries or other agents in respect of any subscriptions for, redemption or holdings of, Shares.

Rebates of any management fee or distribution fee will not exceed the amount of the management fee or distribution fee for each Fund as set out in Appendix E and will vary depending on the share class concerned, for instance, in respect of Class A Shares the average rebate will not exceed 45% of these fees although may be higher in respect of share classes which are available to certain distributors only. Rebates are not available for all share classes.

The terms of any rebate will be agreed between the Principal Distributor and the relevant investor from time to time. If so required by applicable rules, the investor shall disclose to any underlying clients the amount of any rebate on the management fee it receives from the Principal Distributor. The Management Company shall also disclose to Shareholders, upon request, details of any rebate paid by the Principal Distributor to an authorised intermediary in connection with a holding of Shares where the authorised intermediary has acted on behalf of that Shareholder. Payment of such rebates is subject to the Management Company and the Principal Distributor receiving their fees and charges from the Company.

As a result of the UK Regulator's Retail Distribution Review, neither the Management Company nor the Principal Distributor will be permitted to pay initial or renewal commission or rebate of the annual management charge to authorised intermediaries or to third

party distributors or agents in respect of any subscriptions for, or holdings of, units for any UK retail investors in respect of investments made as a result of the investor having received a personal recommendation on or after 31 December 2012.

21. If a Fund is closed at a time when any expenses previously allocated to that Fund have not been amortised in full, the Directors shall determine how the outstanding expenses should be treated, and may, where appropriate, decide that the outstanding expenses should be met by the Fund as a liquidation expense.
22. Italian investors subscribing for Shares through Regular Savings Plans should refer to the subscription form for Italy for further details on the initial charge.

### Conflicts of Interest

23. The Management Company and other BlackRock Group companies undertake business for other clients. BlackRock Group companies, their employees and their other clients face conflicts with the interests of the Management Company and its clients. BlackRock maintains a Conflicts of Interest Policy. It is not always possible for the risk of detriment to a client's interests to be entirely mitigated such that, on every transaction when acting for clients, a risk of detriment to their interests does not remain.

The types of conflict scenario giving rise to risks which BlackRock considers it cannot with reasonable confidence mitigate are disclosed below. This document, and the disclosable conflict scenarios, may be updated from time to time.

24. Conflicts of interest from relationships within the BlackRock Group.

### PA Dealing

BlackRock Group employees may be exposed to clients' investment information while also being able to trade through personal accounts. There is a risk that, if an employee could place a trade of sufficient size, this would affect the value of a client's transaction. BlackRock Group has implemented a Personal Trading Policy designed to ensure that employee trading is pre-approved.

### Employee Relationships

BlackRock Group employees may have relationships with the employees of BlackRock's clients or with other individuals whose interests conflict with those of a client. Such an employee's relationship could influence the employee's decision-making at the expense of clients' interests. BlackRock Group has a Conflicts of Interest Policy under which employees must declare all potential conflicts.

25. Conflicts of interest of the Management Company

### Provider Aladdin

BlackRock Group uses Aladdin software as a single technology platform across its investment management business. Custodial and fund administration service providers may use Provider Aladdin, a form of Aladdin software, to access data used by the Investment Adviser and Management Company. Each service provider remunerates BlackRock Group for the use of Provider Aladdin. A potential conflict arises whereby an agreement by a service provider to use Provider Aladdin incentivises the Management Company to appoint or renew appointment of such service provider. To mitigate the risk, such contracts are entered on an 'arm's length' basis.

### Distribution Relationships

The Principal Distributor may pay third parties for distribution and related services. Such payments could incentivise third parties to

promote the Company to investors against that client's best interests. BlackRock Group companies comply with all legal and regulatory requirements in the jurisdictions in which such payments are made.

### Dealing Costs

Dealing costs are created when investors deal into and out of the Fund. There is a risk that other clients of the Fund bear the costs of those joining and leaving. BlackRock Group has policies and procedures in place to protect investors from the actions of others including anti-dilution controls.

## 26. Conflicts of interest of the Investment Adviser

### Commissions & Research

Where permitted by applicable regulation (excluding, for the avoidance of doubt, any Funds which are in scope for MiFID II), certain BlackRock Group companies acting as investment adviser to the Funds may accept commissions generated when trading equities with certain brokers in certain jurisdictions. Commissions may be reallocated to purchase eligible research services. Such arrangements may benefit one Fund over another because research can be used for a broader range of clients than just those whose trading funded it. BlackRock Group has a Use of Commissions Policy designed to ensure only eligible services are purchased and excess commissions are reallocated to an eligible service provider where appropriate.

### Timing of Competing Orders

When handling multiple orders for the same security in the same direction raised at or about the same time, the Investment Adviser seeks to achieve the best overall result for each order equitably on a consistent basis taking into account the characteristics of the orders, regulatory constraints or prevailing market conditions. Typically, this is achieved through the aggregation of competing orders. Conflicts of interest may appear if a trader does not aggregate competing orders that meet eligibility requirements, or does aggregate orders that do not meet eligibility requirements; it may appear as if one order received preferential execution over another. For a specific trade instruction of the Fund, there may be a risk that better execution terms will be achieved for a different client. For example, if the order was not included in an aggregation. BlackRock Group has Order Handling Procedures and an Investment Allocation Policy which govern sequencing and the aggregation of orders.

### Concurrent Long and Short Positions

The Investment Adviser may establish, hold or unwind opposite positions (i.e. long and short) in the same security at the same time for different clients. This may prejudice the interests of the Investment Adviser's clients on one side or the other. Additionally, investment management teams across the BlackRock Group may have long only mandates and long-short mandates; they may short a security in some portfolios that are held long in other portfolios. Investment decisions to take short positions in one account may also impact the price, liquidity or valuation of long positions in another client account, or vice versa. BlackRock Group operates a Long Short (side by side) Policy with a view to treating accounts fairly.

### Cross Trading - Pricing Conflict

When handling multiple orders for the same security, the Investment Adviser may execute a client's order to buy the security by matching it with another client's order to sell the same security, a practice known as 'crossing'. When crossing orders, there is a risk that the execution may not be performed in the best interests of each client;

for example, in the event that the price at which a trade was executed did not constitute a fair and reasonable price. BlackRock manages this risk by implementing a Global Crossing Policy, which sets out – among other things – the methodology for pricing 'cross' trades.

### MNPI

BlackRock Group companies receive Material Non-Public Information (MNPI) in relation to listed securities in which BlackRock Group companies invest on behalf of clients. To prevent wrongful trading, BlackRock Group erects Information Barriers and restricts trading by one or more investment team(s) concerned in the security concerned. Such restrictions may negatively impact the investment performance of client accounts. BlackRock has implemented a Material Non-Public Information Barrier Policy.

### BlackRock's Investment Constraints or Limitations and its Related Parties

The Company may be restricted in its investment activities due to ownership threshold limits and reporting obligations in certain jurisdictions applying in aggregate to the accounts of clients of the BlackRock Group. Such restrictions may adversely impact clients through missed investment opportunities. BlackRock Group manages the conflict by following an Investment and Trading Allocation Policy, designed to allocate limited investment opportunities among affected accounts fairly and equitably over time.

### Investment in Related Party Products

While providing investment management services for a client, the Investment Adviser may invest in products serviced by BlackRock Group companies on behalf of other clients. BlackRock may also recommend services provided by BlackRock or its affiliates. Such activities could increase BlackRock's revenue. In managing this conflict, BlackRock seeks to follow investment guidelines and has a Code of Business Conduct and Ethics.

The entire proportion of a Fund's scheme property that may be invested in units of UCITS and/or other CIS may be sponsored or managed by the Management Company, Investment Adviser or an affiliate.

For investments in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the Management Company itself or by any other company with which the Management Company is linked by common management or control, or by a substantial direct or indirect holding of more than 10% of the capital or voting rights no management, subscription or redemption fees may be charged to the Company on its investment in the units of such other UCITS and/or other UCIs.

Companies of the BlackRock Group which provide investment advisory services to the Funds, other UCITS and/or other UCIs, may also cause the Funds through those investment services, other UCITS and/or other UCIs to seed other products (including the Funds) sponsored or managed by the BlackRock Group.

With reference to Paragraph 4.5 of Appendix A, the Company has appointed BlackRock Advisors (UK) Limited as securities lending agent, under the terms of a securities lending management agreement, which in turn may sub-delegate the provision of securities lending agency services to other BlackRock Group companies. BlackRock Advisors (UK) Limited has the discretion to arrange stock loans with highly rated specialist financial institutions (the "counterparties"). Such counterparties can include associates of BlackRock Advisors (UK) Limited. Collateral is marked to market on a daily basis and stock loans are repayable upon demand. Under

the terms of the securities lending management agreement, the securities lending agent is appointed to manage the Funds' securities lending activities and is entitled to receive a fee out of the income generated from securities lending. At the cost of the Company, BlackRock Advisors (UK) Limited receives remuneration in relation to its activities above. Such remuneration amounts to 37.5% of the gross revenue from the activities.

#### Investment Allocation and Order Priority

When executing a transaction in a security on behalf of a client, it can be aggregated and the aggregated transaction fulfilled with multiple trades. Trades executed with other client orders result in the need to allocate those trades. The ease with which the Investment Adviser can allocate trades to a certain client's account can be limited by the sizes and prices of those trades relative to the sizes of the clients' instructed transactions. A process of allocation can result in a client not receiving the whole benefit of the best priced trade. The Investment Adviser manages this conflict by following an Investment and Trading Allocation Policy, which is designed to ensure the fair treatment of all clients' accounts over time.

#### Fund Look Through

BlackRock Group companies may have an informational advantage when investing in proprietary BlackRock funds on behalf of client portfolios. Such an informational advantage may lead a BlackRock Group company to invest on behalf of its client earlier than the Investment Adviser invests for the Company. The risk of detriment is mitigated through BlackRock Group's pricing of units and anti-dilution mechanisms.

#### Side-by-Side Management: Performance fee

The Investment Adviser manages multiple client accounts with differing fee structures. There is a risk that such differences lead to inconsistent performances levels across client accounts with similar mandates by incentivising employees to favour accounts delivering performance fees over flat or non-fee accounts. BlackRock Group companies manage this risk through a commitment to a Code of Business Conduct and Ethics Policy.

### Statutory and Other Information

27. Copies of the following documents (together with a certified translation thereof where relevant) are available for inspection during usual business hours on any weekday (Saturdays and Public Holidays excepted) at the registered office of the Company and at the offices of BlackRock (Luxembourg) S.A., 35A, avenue J. F. Kennedy, L-1855 Luxembourg:

- 27.1 the Articles of Association of the Company; and
- 27.2 the material contracts entered into between the Company and its functionaries (as varied or substituted from time to time).

A copy of the Articles of Association of the Company may be obtained free of charge at the above addresses.

28. Shares in the Company are and will continue to be made widely available. The intended categories of investor include both the general public as well as Institutional Investors. Shares in the Company will be marketed and made available sufficiently widely to reach the intended categories of investors and in a manner appropriate to attract these investors.

## Appendix D – Authorised Status

**This Prospectus does not constitute, and may not be used for the purposes of an offer or an invitation to apply for any Shares by any person: (i) in any jurisdiction in which such offer or invitation is not authorised; or (ii) in any jurisdiction in which the person making such offer or invitation is not qualified to do so; or (iii) to any person to whom it is unlawful to make such offer or invitation. The distribution of this Prospectus and the offering of Shares in certain jurisdictions not listed below may be restricted. Accordingly, persons into whose possession this Prospectus comes are required to inform themselves about and observe any restrictions as to the offer or sale of Shares and the distribution of this Prospectus under the laws and regulations of any jurisdiction not listed below in connection with any applications for Shares in the Company, including obtaining any requisite governmental or other consent and observing any other formality prescribed in such jurisdiction. In certain jurisdictions no action has been taken or will be taken by the Company that would permit a public offering of Shares where action for that purpose is required, nor has any such action been taken with respect to the possession or distribution of this Prospectus other than in any jurisdiction where action for that purpose is required. The information below is for general guidance only and it is the responsibility of any prospective investor to comply with applicable securities laws and regulations.**

### Abu Dhabi Global Market

This Prospectus may not be distributed in or from the Abu Dhabi Global Market ("ADGM") except to such person which meet the Professional Client criteria set out in Rule 2.4.1 of the conduct of business rules (COBs) in the Financial Services Regulatory Authority of the Abu Dhabi Global Market ("FSRA") handbook. **This Prospectus may not be distributed to any investor who would be considered a retail client under COBs.**

This Prospectus relates to Funds which are not subject to any form of regulation or approval by the FSRA.

The FSRA accepts no responsibility for reviewing or verifying this Prospectus or any other related documents of the Funds. Accordingly, the FSRA has not approved this Prospectus or any other associated documents nor taken any steps to verify the information set out in the Prospectus of and has no responsibility for it.

The Units to which this Prospectus relates may be illiquid and/or subject to restrictions on its resale. Prospective purchasers should conduct their own due diligence on the Fund.

If you do not understand the contents of this Prospectus you should consult an authorised financial adviser.

### Australia

Investors must read this Prospectus or any other disclosure document before making a decision to acquire Shares in the Company. The Company which is the issuer of this Prospectus is not licensed to provide financial product advice, within the meaning of the Corporations Act 2001 (Cth) in Australia.

The Company is not available for investment by retail clients within the meaning of the Corporations Act 2001 (Cth) and accordingly there is no product disclosure statement or cooling off regime for the Company.

Please note:

- ▶ investment in the Company can be subject to investment risk, including possible delays in repayment and loss of income and principal invested; and
- ▶ unless otherwise specified in this Prospectus, no guarantee is provided by the Company in relation to the success of the Company or the achievement of a particular rate or return on income or capital.

By investing in the Company, you acknowledge that you have read and understood the above disclosures.

### Austria

The Company has notified the Financial Market Authority of its intention to distribute its Shares in Austria pursuant to Article 140 para 1 of the Investment Fund Act 2011 (InvFG 2011). This Prospectus is available in an English language version, which includes additional information for Austrian investors. The KIDs are also available in German.

### Bahrain

If you are in any doubt about the contents of this prospectus, you should seek independent professional financial advice. Remember that all investments carry varying levels of risk and that the value of your investment may go down as well as up. Investments in this collective investment undertaking are not considered deposits and are therefore not covered by the Kingdom of Bahrain's deposit protection scheme. The fact that this collective investment undertaking has been authorised by the Central Bank of Bahrain, does not mean that the CBB takes responsibility for the performance of these investments, nor for the correctness of any statements or representations made by the operator of this collective investment undertaking. The Central Bank of Bahrain and the Bahrain stock exchange assume no responsibility for the accuracy and completeness of the statements and information contained in this document and expressly disclaim any liability whatsoever for any loss howsoever arising from reliance upon the whole or any part of the contents of this document.

### Belgium

The Company has been registered with the Financial Services and Markets Authority in accordance with Article 154 of the Law of 3 August 2012 relating to certain forms of collective management of investment portfolios. A copy of the Prospectus of BlackRock Global Funds (in English and French), the Key Information Document (in English, French and Dutch), the Articles of Association (in English) and the latest periodical report (in English) can be obtained, free of charge, from the website [www.blackrock.com/be](http://www.blackrock.com/be), from BlackRock Luxembourg S.A. (35 A, avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg) or from the Investor Services Team at: [Investor.services@blackrock.com](mailto:Investor.services@blackrock.com), telephone: 00 44 (0)207 743 3300.

### Brunei

This Prospectus relates to a collective investment scheme which is not subject to any form of domestic regulation by the Brunei Darussalam Central Bank (the "Authority"). The Authority is not responsible for reviewing or verifying any prospectus or other documents in connection with this collective investment scheme. The Authority has not approved this Prospectus or any other associated documents nor taken any steps to verify the information set out in this Prospectus and is not responsible for it. The shares to which this Prospectus relates may be illiquid or subject to restrictions on their resale. Prospective purchasers should conduct their own due diligence on the shares. If you do not understand the contents of this Prospectus, you should consult a licensed financial adviser.

The Principal Distributor has appointed local distributors for distribution of the Shares of the Company in Brunei. Such Brunei distributors hold Capital Market Services Licences to distribute Shares of the Company pursuant to Section 156 of the Securities Market Order 2013. Shares in the Company may only be publicly distributed in Brunei by a person or entity licensed to sell investments or offerings in accordance with the Securities Market Order, 2013. The Brunei Filing Agent of the Company is YC Lee & Lee, Advocates & Solicitors, at 6th Floor, Kompleks Jalan Sultan, 51-55 Jalan Sultan, Bandar Seri Begawan BS8811, Brunei Darussalam. The Brunei distributors the Shares of the Company are: (1) Standard Chartered Securities (B) Sdn Bhd; and (2) Baiduri Capital Sdn Bhd.

### Canada

The Shares have not been, nor will they be, qualified for distribution to the public in Canada as no prospectus for the Fund has been filed with any securities commission or regulatory authority in Canada or any province or

territory thereof. This Prospectus is not, and under no circumstances is to be construed, as an advertisement or any other step in furtherance of a public offering of Shares in Canada. No Canadian resident may purchase or accept a transfer of Shares unless it is eligible to do so under applicable Canadian or provincial laws.

#### **Denmark**

Approval has been granted to the Company by the Danish Financial Supervisory Authority (Finanstilsynet) in accordance with Section 18 of the Danish Act on Investment Associations Etc. (Consolidation Act no. 333 of 20 March 2013) to market its Shares to retail investors and professional investors in Denmark. The KIDs for the Funds approved for marketing in Denmark are available in Danish.

#### **Dubai International Financial Centre (DIFC)**

This Prospectus relates to a Fund which is not subject to any form of regulation or approval by the Dubai Financial Services Authority ("DFSA"). The DFSA has no responsibility for reviewing or verifying any Prospectus or other documents in connection with this Fund. Accordingly, the DFSA has not approved this Prospectus or any other associated documents nor taken any steps to verify the information set out in this Prospectus, and has no responsibility for it. The Units to which this Prospectus relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers should conduct their own due diligence on the Units. If you do not understand the contents of this document you should consult an authorised financial adviser. This prospectus can be distributed to Professional Clients in and from the DIFC by BlackRock Advisors (UK) Limited - Dubai Branch which is regulated by the Dubai Financial Services Authority ("DFSA"). Where the prospectus or any fund within the prospectus is directed at 'Professional Clients', no other person should rely upon the information contained within it.

#### **Finland**

The Company has notified the Financial Supervision Authority in accordance with Section 127 of the Act on Common Funds (29.1.1999/48) as amended and by virtue of confirmation from the Financial Supervision Authority the Company may publicly distribute its Shares in Finland. Certain information and documents that the Company must publish in Luxembourg pursuant to applicable Luxembourg Law are translated into Finnish and are available for Finnish investors at the offices of the appointed distributors in Finland.

#### **France**

The Company has been authorised by the Autorité des Marchés Financiers (the "AMF") to market certain of its Funds in France. CACEIS Bank will perform the services of Centralising Correspondent in France. This Prospectus is available in a French language version that includes additional information for French investors. The additional information for French investors should be read in conjunction with this Prospectus. Documentation relating to the Company can be inspected at the offices of CACEIS Bank, the registered office of which is at 1/3, place Valhubert, F-75013 Paris, France, during normal business hours and copies of the documentation can be obtained from them if required.

The attention of investors is drawn to the fact that the Euro-Markets Fund is eligible to be held within the framework of a share savings plan ("plan d'épargne en actions" or "PEA") in France. In this context and subject to the risks described below, the Company has undertaken, pursuant to Article 91 quarter L of Annex II to the General Tax Code, that the above referenced Funds will invest on a permanent basis at least 75% of their assets in securities or rights listed in (a) or (b) of I, 1° of Article L.221-31 of the Monetary and Financial Code.

The PEA eligibility of this Fund results from, to the best knowledge of the Company, tax law and practices in force in France as at the date of this Appendix. Such tax law and practices may change from time to time and, therefore, the Funds which may currently be held within the framework of a PEA could lose their PEA eligibility.

Further, the Funds could lose their PEA eligibility due to changes impacting their investment universe or benchmark index.

If any Fund loses PEA eligibility, the Company will write to inform Shareholders and a notice will be published on the website of the Company. In such a case, the Shareholders should seek professional tax and financial advice.

#### **Germany**

The German Federal Financial Supervisory Authority has been notified of the intention to distribute certain Funds of the Company in the Federal Republic of Germany pursuant to § 310 German Capital Investment Act. The German language prospectus contains additional information for investors in the Federal Republic of Germany.

#### **Gibraltar**

The Company is a UCITS scheme which has been recognised by the Gibraltar Financial Services Commission in accordance with Section 34 & 35 of the Financial Services (Collective Investment Schemes) Act 2011 as a UCITS scheme which complies with the requirements of the Financial Services (Collective Investment Schemes) Regulations 2011 for the recognition of such schemes in Gibraltar. By virtue of such recognition by the Gibraltar Financial Services Commission, the Company may market its Shares in Gibraltar.

#### **Greece**

Approval has been granted to the Company by the Hellenic Capital Markets Committee in accordance with the procedures provided by Law 4099/2012, to register and distribute its Shares in Greece. This Prospectus is available in a Greek language translation. It must be noted that the relevant regulations provide that "SICAV Funds do not have a guaranteed return and that previous performance does not secure future performance".

#### **Hong Kong**

The Company is authorised as a collective investment scheme by the SFC. The SFC's authorisation is not a recommendation or endorsement of the Company nor does it guarantee the commercial merits of the Company or its performance. It does not mean the Company is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors. This Prospectus is available for Hong Kong residents in both English and Chinese. Please note that not all of the Funds are available for distribution to the public in Hong Kong and investors should read this Prospectus in conjunction with the Information for Residents of Hong Kong ("IRHK") and the Funds' Product Key Facts Statements, which contain additional information for Hong Kong residents. The Company's representative in Hong Kong is BAMNA.

#### **Hungary**

The Hungarian Financial Supervisory Authority authorized the Hungarian distribution of the Company's Shares pursuant to Section 288 (1) of the Hungarian Act CXX of 2001 on the Capital Market on 16 April 2007.

The distribution of the Shares issued by the Funds of the Company that had been launched subsequent to 1 January 2012 was authorized by the Commission de Surveillance du Secteur Financier (CSSF) of Luxembourg and this license was passported to Hungary in accordance with Section 98 of the Hungarian Act CXCV of 2011 on Investment Management Firms and the Collective Forms of Investment.

The distribution of the Shares issued by the Funds of the Company that had been launched subsequent to 15 March 2014 was authorized by the CSSF and this license was passported to Hungary in accordance with Section 119 of the Hungarian Act XVI of 2014 on the Collective Forms of Investments and Their Managers.

The KIDs for all of the Company's Shares are also available to investors in a Hungarian language version.

#### **Iceland**

The Company has notified the Icelandic Financial Supervisory Authority (*Fjármálaeftirlitid*) in accordance with the provisions of the Act No. 128/2011 on Undertakings for Collective Investment in Transferable Securities (UCITS) Investment Funds and Institutional Investment Funds regarding

## Appendix D

the offering of foreign UCITS-funds for sale in Iceland. By virtue of a confirmation from the Icelandic Financial Supervisory Authority, the following funds may be offered for sale in Iceland:

Asian Dragon Fund  
Continental European Flexible Fund  
Emerging Europe Fund  
Emerging Markets Fund  
Emerging Markets Ex-China Fund  
Emerging Markets Local Currency Bond Fund  
Euro Bond Fund  
Euro Short Duration Bond Fund  
Euro-Markets Fund  
European Fund  
Global Allocation Fund  
Global Government Bond Fund  
Global High Yield Bond Fund  
Global Long-Horizon Equity Fund  
Japan Small and Midcap Opportunities Fund  
Sustainable Energy Fund  
Sustainable Global Dynamic Equity Fund  
US Dollar Reserve Fund  
US Growth Fund  
World Bond Fund  
World Financials Fund  
World Gold Fund  
World Healthscience Fund

According to Article 13 e in Act No. 87/1992, as amended with Act no. 127/2011, Icelandic investors are prohibited from investing in securities, unit shares of UCITS and/or investment funds, money market instruments or other transferable financial instruments denominated in other currencies than Icelandic krona (ISK). However, parties that have invested in such financial instruments prior to 28 November 2008 are permitted to reinvest. Investors can apply for an exemption from these provisions.

The Company's local distributor in Iceland is responsible for arranging for all necessary information to be available for Icelandic retail investors, in accordance with the Act No. 128/2011 on Undertakings for Collective Investment in Transferable Securities (UCITS), Investment Funds and Institutional Investment Funds, as amended.

### India

Neither of the Shares nor the Funds are registered with the Securities and Exchange Board of India ("SEBI") or any other regulatory or governmental authority in India and no such authority has confirmed the accuracy or determined the adequacy of this Prospectus.

This Prospectus does not constitute an offer to sell or a solicitation of an offer to buy the Shares from any person other than the Company or the Management Company and subscription of the Shares shall not be accepted from a person to whom this Prospectus has not been addressed or sent by the Company or the Management Company. The Shares are not being offered for sale or subscription directly or indirectly in India or to the public in India. This Prospectus is not, and should not be construed as, a public offering of the Shares. This Prospectus is not a "prospectus" as construed under the (Indian) Companies Act, 2013.

Prospective investors must seek legal advice as to whether they are entitled to subscribe for or purchase the Shares being offered and comply with all relevant Indian laws in this respect. Any offer or its acceptance is subject to compliance in India with applicable Indian laws.

None of the Company, the Funds, the Management Company, their officers, employees or affiliates are, or are expected to be, registered with any regulatory or governmental authority in India with respect to their respective roles or functions in relation to the Company.

### Indonesia

The offering contained in this Prospectus does not constitute a public offering in Indonesia under Capital Markets Law No. 8 Year 1995. This

Prospectus may not be distributed in Indonesia and the securities may not be offered or sold, directly or indirectly, in Indonesia or to Indonesian citizens wherever they are domiciled, or to Indonesian residents, in a manner which constitutes a public offering under the laws and regulations of Indonesia.

### Ireland

The Management Company has notified the Central Bank of Ireland of its intention to publicly distribute Shares in certain Funds in Ireland. Blackrock Asset Management (Ireland) Limited will perform the services of facilities agent in Ireland. Documentation relating to the Company can be inspected at 1st Floor, 2 Ballsbridge Park, Ballsbridge, Dublin 4, D04 YW83 during normal business hours and copies of the documentation can be obtained if required. Blackrock Asset Management (Ireland) Limited will also forward any redemption or dividend payment requests or any complaints relating to the Company to the Transfer Agent.

### Italy

The Company has notified the intention to market in Italy certain Funds pursuant to article 42 of Legislative Decree no. 58 of 24 February 1998 and implementing regulations. The offering of the Funds can only be carried out by the appointed distributors indicated in the list referred to in the Italian wrapper (Subscription Form) in accordance with the procedures indicated therein. A Shareholder who makes a subscription or a redemption of Shares through the local Paying Agent or other entities responsible for processing Share transactions in Italy may be charged with the expenses linked to the activity carried out by such entities. In Italy, additional expenses incurred by the Italian Paying Agent(s) or other entities responsible for processing Share transactions for and on behalf of Italian Shareholders (for example for the cost of foreign exchange dealing and for intermediation in payments) may be charged to those Shareholders directly. Further details of any such additional charges will be provided in the Subscription Form for Italy. Investors in Italy may confer on the Italian Paying Agent a specific mandate empowering the latter to act in its own name and on behalf of the same investors. Under this mandate, the Italian Paying Agent in its own name and on behalf of the investors in Italy shall (i) transmit in aggregated form to the Company subscription /redemption/conversion orders; (ii) hold the Shares in the register of Shareholders of the Company and (iii) carry out any other administrative activity under the investment contract. Further details of such mandate will be provided in the subscription form for Italy.

In Italy investors may be able to subscribe for Shares through Regular Savings Plans. Under Regular Savings Plans may be also possible to periodically/regularly redeem and/or convert the Shares. Details of the Regular Savings Plans facilities offered will be provided in the subscription form for Italy.

### Jersey

The consent of the Jersey Financial Services Commission (the "Commission") has been obtained pursuant to the Control of Borrowing (Jersey) Order 1958, as amended, to raise money in the Island by the issue of Shares of the Company and for the distribution of this Prospectus. The Commission is protected by the Control of Borrowing (Jersey) Law 1947, as amended, against liability arising from the discharge of its functions under that law.

### Korea

For distribution and offering of the Shares in the Company to the public in South Korea. The Company has been registered with the Financial Services Commission (the "FSC") and the securities registration statement (as defined under the Financial Investment Services and Capital Market Act of Korea (the "FSCMA")) has been filed with the FSC in accordance with the FSCMA.

None of the Shares in the Company may be offered, sold or delivered, or offered or sold to any person for re-offering or resale, directly or indirectly, in South Korea or to any resident of South Korea except pursuant to applicable laws and regulations of South Korea. Furthermore, the Shares in the Company may not be re-sold to South Korean residents unless the purchaser of the Shares in the Company complies with all applicable

regulatory requirements (including, but not limited to, governmental approval requirements under the Foreign Exchange Transaction Law and its subordinate decrees and regulations) in connection with purchase of the Shares in the Company.

Recipients of this Prospectus are advised to exercise caution in relation to the offer, and should seek independent professional advice in connection with any purchase and the risks associated with such investment.

#### **Kingdom of Saudi Arabia (KSA)**

This document may not be distributed in the Kingdom of Saudi Arabia except to such persons as are permitted under the Investment Funds Regulations issued by the Capital Market Authority. The Capital Market Authority does not make any representation as to the accuracy or completeness of this document, and expressly disclaims any liability whatsoever for any loss arising from, or incurred in reliance upon, any part of this document. Prospective purchasers of the securities offered hereby should conduct their own due diligence on the accuracy of the information relating to the securities. If you do not understand the contents of this document you should consult an authorised financial adviser.

#### **Kuwait**

This prospectus is not for general circulation to the public in Kuwait. The Company has not been licensed for offering in Kuwait by the Kuwait Capital Markets Authority or any other relevant Kuwaiti government agency. The offering of the Company in Kuwait on the basis of a private placement or public offering is, therefore, restricted in accordance with Law No. 7 of 2010 and the bylaws thereto (as amended). No private or public offering of the Company is being made in Kuwait, and no agreement relating to the sale of the Company will be concluded in Kuwait. No marketing or solicitation or inducement activities are being used to offer or market the Company in Kuwait.

#### **Macau**

Authorisation is given by the Autoridade Monetaria De Macau ("AMCM") for the advertising and marketing the Company and certain registered Funds in Macau in accordance with Article 61 and 62 of Decree Law No. 83/99/M of 22 November 1999. Such advertising and marketing is undertaken by distributors duly licensed and registered with AMCM. This Prospectus is available to Macau residents in both English and Chinese.

#### **Malaysia**

No action has been, or will be, taken to comply with Malaysian laws for making available, offering for subscription or purchase, or issuing any invitation to subscribe for or purchase or sale of, the Shares in Malaysia or to persons in Malaysia as the Shares are not intended by the Company to be made available, or made the subject of any offer or invitation to subscribe or purchase, in Malaysia.

Neither this Prospectus nor any document or other material in connection with the Shares should be distributed, caused to be distributed or circulated in Malaysia. No person should make available or make any invitation or offer or invite to sell or purchase the Shares in Malaysia unless such person takes the necessary action to comply with Malaysian laws.

#### **Netherlands**

The Company may offer its Shares to the public in the Netherlands in accordance with Directive 2009/65/EC on undertakings for collective investment in transferable securities (UCITS), as implemented in the Netherlands Financial Markets Supervision Act (Wet op het financieel toezicht). Dutch translations of the KIDs and all information and documents that the Company must publish in Luxembourg pursuant to applicable Luxembourg laws are available from BlackRock Investment Management (UK) Limited, Amsterdam Branch.

#### **New Zealand**

The information contained in this Prospectus, or in any other associated disclosure document, is under no circumstances to be construed as a regulated offer of financial products under the Financial Markets Conduct

Act 2013 (the "FMCA"). Any offer of financial products will be made only in circumstances where there is no contravention of the FMCA.

Shares are only available for investment by a "wholesale investor" within the meaning of clause 3(2)(a), (c) or (d) of Schedule 1 of the FMCA, being a person who:

- ▶ is an "investment business"; or
- ▶ is "large"; or
- ▶ is a "government agency",

in each case, as defined in Schedule 1 of the FMCA.

The information contained in this Prospectus does not constitute the giving of financial advice for the purposes of New Zealand financial adviser legislation.

#### **Norway**

The Company has notified the Financial Supervisory Authority of Norway (Finanstilsynet) in accordance with applicable Norwegian Securities Funds legislation. By virtue of a confirmation letter from the Financial Supervisory Authority of Norway dated 5 March 2001 the Company may market and sell its Shares in Norway.

#### **Oman**

The information contained in this prospectus does not constitute a public offer of securities in the Sultanate of Oman as contemplated by the Commercial Companies Law of Oman (Royal Decree 4/74) or the Capital Market Law of Oman (Royal Decree 80/98). Due to legal restrictions, imposed by the Executive Regulations of the Capital Market Law issued by the Capital Market Authority of the Sultanate of Oman (the "CMA"), this prospectus is only available to individuals and corporate entities that fall within the description of "sophisticated investors" in Article 139 of the Executive Regulations to the Capital Market Law. The CMA is not liable for the correctness or adequacy of information provided in this prospectus or for identifying whether or not the security being offered pursuant to this prospectus is an appropriate investment for a potential investor. The CMA shall also not be liable for any damage or loss resulting from reliance placed on the prospectus.

#### **People's Republic of China (PRC)**

The Company's interests are not being offered or sold and may not be offered or sold, directly or indirectly within the PRC (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan), except as permitted by applicable laws and regulations of the PRC.

#### **Peru**

The Shares of the Company will not be registered before the Superintendencia del Mercado de Valores (SMV) in Peru, nor under Decreto Legislativo 862: Texto Unico Ordenado de la Ley del Mercado de Valores, as amended. Moreover, the SMV has not reviewed the information provided to the Institutional Investor. The Shares may only be offered and sold to Institutional Investors pursuant to a private placement. The Company has obtained registration in Peru of certain Funds with the Superintendencia de Banca, Seguros y AFP pursuant to Decreto Supremo 054-97-EF Texto Unico Ordenado de la Ley del Sistema Privado del Fondo de Pensiones, as amended, and the rules and regulations enacted thereunder which will allow Peruvian Private Pension Fund Managers (AFP) to acquire shares of such registered Funds.

#### **Philippines**

For Funds not registered with the Securities and Exchange Commission of the Philippines

Under Republic Act No. 8799, known as the Securities Regulation Code of the Philippines (the "Code"), and its implementing rules, securities, such as the Funds, are not permitted to be sold or offered for sale or distribution

## Appendix D

within the Philippines unless such securities are approved for registration by the Securities and Exchange Commission of the Philippines ("SEC") or are otherwise exempt securities or sold pursuant to an exempt transaction.

The offer and sale of the Funds qualify as an exempt transaction pursuant to section 10.1(l) of the Code and by purchase of the Fund(s), the investor will be deemed to acknowledge that the issue of, offer for subscription or purchase of, or invitation to subscribe for or purchase of such Fund(s) was made outside the Philippines. A confirmation of exemption from the SEC that the offer and sale of the Funds in the Philippines qualify as an exempt transaction under the Code is not required to be, and will not be, obtained.

**THE SECURITIES BEING OFFERED OR SOLD HEREIN HAVE NOT BEEN REGISTERED WITH THE SECURITIES AND EXCHANGE COMMISSION UNDER THE SECURITIES REGULATION CODE OF THE PHILIPPINES. ANY FUTURE OFFER OR SALE THEREOF IS SUBJECT TO REGISTRATION REQUIREMENTS UNDER THE CODE UNLESS SUCH OFFER OR SALE QUALIFIES AS AN EXEMPT TRANSACTION.**

### Poland

The Company has notified the Polish Financial Supervision Authority (Komisja Nadzoru Finansowego) of its intention to distribute its Shares in Poland under article 253 of an Act on investment funds and on management of alternative investment funds dated May 27<sup>th</sup> 2004 (Dz. U.2016.1896, as amended). The Company has established its representative and payment agent in Poland. This Prospectus and the KID are available in Polish as well as other documents and information required by the provisions of laws of the state where it maintains its head office. The Company distributes its Shares in Poland by authorised distributors only.

### Portugal

In Portugal, notification has been made to the Comissão do Mercado dos Valores Mobiliários for marketing of certain Funds by several distributors with whom the Principal Distributor has entered into distribution agreements, pursuant to Directive 2009/65/EC on undertakings for collective investment in transferable securities (UCITS), as implemented in Portugal by Decree-Law 63-A/2013, of 10 May (according to the list of Funds contained in the respective notification procedure).

### Qatar

The shares are only being offered to a limited number of investors who are willing and able to conduct an independent investigation of the risks involved in an investment in such shares. The prospectus does not constitute an offer to the public and is for the use only of the named addressee and should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof). The fund has not been and will not be registered with the Qatar Central Bank or under any laws of the State of Qatar. No transaction will be concluded in your jurisdiction and any inquiries regarding the shares should be made to the Company.

### Republic of South Africa

This prospectus is not intended and does not constitute an offer, invitation, or solicitation by any person to members of the public to invest or acquire shares in the Company. This prospectus is not an offer in terms of Chapter 4 of the Companies Act, 2008. Accordingly this prospectus does not, nor is it intended to, constitute a prospectus prepared and registered under the Companies Act. The Fund is a foreign collective investment scheme as contemplated by section 65 of the Collective Investment Schemes Control Act, 2002 and is not approved in terms of that Act.

### Singapore

Certain sub-funds of the Company (the "Restricted Sub-Funds") have been entered onto the list of restricted schemes maintained by the Monetary Authority of Singapore (the "MAS") for purpose of restricted offer in Singapore pursuant to section 305 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA") and the list of Restricted Sub-Funds

may be accessed at:

<https://masnetsvc2.mas.gov.sg/cisnetportal/jsp/list.jsp>.

In addition, certain sub-funds of the Company (including some of the Restricted Sub-Funds), have also been recognised in Singapore for retail distribution (the "Recognised Sub-Funds"). Please refer to the Singapore prospectus (which has been registered by the MAS) relating to the retail offer of the Recognised Sub-Funds for the list of sub-funds which are Recognised Sub-Funds. The registered Singapore prospectus may be obtained from the relevant appointed distributors.

A restricted offer or invitation of the shares (the "Shares") of each Restricted Sub-Fund is the subject of this Prospectus. Save for the Restricted Sub-Funds which are also Recognised Sub-Funds, the Restricted Sub-Funds are not authorised or recognised by the MAS and the Shares are not allowed to be offered to the retail public in Singapore. A concurrent restricted offer of Shares of each Recognised Sub-Fund is made under and in reliance of Sections 304 and/or 305 (including sub-section 305(3)(c)) of the SFA. The Shares of the Restricted Sub-Funds are capital markets products other than prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Specified Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

The offer or invitation of the Shares of the Restricted Sub-Funds is regulated by the CSSF under the Luxembourg law of 17 December 2010 on undertakings for collective investment, as amended, modified or supplemented from time to time. The contact details of the CSSF are as follows: Telephone: +352 26-251-1 (switchboard) Fax: +352 26-251-601. The Bank of New York Mellon SA/NV, Luxembourg Branch, being the custodian of the Restricted Sub-Funds, is regulated by the CSSF. The policy of each Restricted Sub-Fund and the Management Company is not to enter into any side letter arrangements that may result in differentiated or preferential treatment for certain classes of investors except as otherwise disclosed in this Prospectus. Investors in Singapore should note that if they wish to obtain information on the past performance of the Restricted Sub-Funds, they should contact BlackRock (Singapore) Limited at +65 6411-3000 to obtain such information. Other information required by the Monetary Authority of Singapore is contained elsewhere in the Prospectus of BlackRock Global Funds.

This Prospectus and any other document or material issued in connection with this restricted offer or sale of the Restricted Sub-Funds is not a prospectus as defined in the SFA and has not been registered as a prospectus with the MAS. Accordingly, statutory liability under the SFA in relation to the content of prospectuses would not apply. You should consider carefully whether the investment is suitable for you.

This Prospectus and any other document or material in connection with the restricted offer or sale, or invitation for subscription or purchase, of Shares may not be circulated or distributed, nor may Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, pursuant to this Prospectus whether directly or indirectly, to persons in Singapore other than (i) to an Institutional Investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where Shares are subscribed or purchased under Section 305 of the SFA by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities (as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Shares pursuant to an offer made under Section 305 of the SFA except:

1. to an Institutional Investor or to a relevant person defined in Section 305(5) of the SFA, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(i)(B) of the SFA;
2. where no consideration is or will be given for the transfer;
3. where the transfer is by operation of law;
4. as specified in Section 305A(5) of the SFA; or
5. as specified in Regulation 36 of the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulations 2005 of Singapore.

Investors should note further that the other sub-funds of the Company referred to in this Prospectus other than the Restricted Sub-Funds and/or the Recognised Sub-Funds, are not available to Singapore investors and references to such other Funds is not and should not be construed as an offer of shares of such other sub-funds in Singapore.

#### Spain

The Company is duly registered with the Comisión Nacional de Mercado de Valores in Spain under number 140.

#### Sweden

The Company has notified the Swedish Financial Supervisory Authority in accordance with Chapter 1, Section 7 of the Swedish Securities Funds Act 2004 (*Sw. lag (2004:46) om värdepappersfonder*) and by virtue of a confirmation from the Swedish Financial Supervisory Authority the Company may publicly distribute its Shares in Sweden.

#### Switzerland

The Swiss Financial Market Authority FINMA has authorised BlackRock Asset Management Switzerland Limited, as the Company's Swiss representative, to distribute the Shares of each of the Company's Funds in or from Switzerland in accordance with Article 123 of the Collective Investment Schemes Act of 23 June 2006. A German language version of this Prospectus is available which also includes the additional information for Swiss investors.

#### Taiwan

Certain Funds have been approved by the Financial Supervisory Commission (the "FSC"), or effectively registered with the FSC, for public offering and sale through the master agent and/or sales agents in Taiwan in accordance with the Securities Investment Trust and Consulting Act, Regulations Governing the Offshore Funds, and other applicable laws and regulations. Funds approved/registered in Taiwan will, subject to certain investment restrictions such as, among other things, the following: (1) no gold, real estate and commodities in the portfolio are allowed; (2) unless the derivatives waiver by FSC is otherwise granted, the total value of the open positions on derivatives for increasing investment efficiency held by each Fund shall not exceed 40% of its net asset value; and (3) total value of open short positions on derivatives for hedging purpose held by each Fund shall not exceed the total market value of the corresponding securities held by the Fund. Investors should read this Prospectus in conjunction with the investor brochure, which contains additional information for Taiwan residents. On December 31 2015, FSC granted the derivatives waivers to thirteen (13) BGF funds registered in Taiwan, which are: (1) Asian Tiger Bond Fund; (2) ESG Multi-Asset Fund; (3) Global High Yield Bond Fund; (4) Emerging Markets Bond Fund; (5) Global

Allocation Fund; (6) Global Corporate Bond Fund; (7) Euro Bond Fund; (8) Global Government Bond Fund; (9) Global Inflation Linked Bond Fund; (10) Emerging Markets Local Currency Bond Fund; (11) US Dollar High Yield Bond Fund; (12) US Dollar Core Bond Fund; and (13) World Bond Fund. In the derivatives waivers, FSC expressly indicated that each of the above thirteen (13) BGF funds' VaR shall not exceed two times of the reference portfolio's VaR of each fund. Investors should refer to Appendix A under the Investor Brochure which is prepared in accordance with the Taiwan laws and regulations for more details on the derivatives waivers of the above thirteen (13) funds. The FSC issued a letter ruling on January 29 2014 which permitted sales and consultation of unregistered offshore funds through the Taiwan offshore banking unit of a bank (including a foreign bank having branch in Taiwan) ("OBU") and the Taiwan offshore securities unit of a securities firm (including a foreign securities firm having branch in Taiwan) ("OSU"); provided that: (1) the clients of the Taiwan OBU/OSU are limited to offshore clients, including individuals holding foreign passport without domicile in Taiwan and legal entities registered offshore without any registration or branch in Taiwan; and (2) any offshore fund distributed through an Taiwan OBU or OSU cannot invest more than 30% of its net asset value in the Taiwan securities markets ("Taiwan OBU/OSU Fund Offering"). BlackRock Investment Management (Taiwan) Limited has obtained the FSC's approval to provide agent services, the scope of which is subject to the regulator's approval and rulings which may be amended from time to time, to Taiwan OBU/OSU on behalf of BlackRock (Luxembourg) S.A. for the Taiwan OBU/OSU Fund Offering."

#### Thailand

The Company's Shares have not been granted permission by the Securities and Exchange Commission (SEC) of Thailand to be publicly offered in Thailand. No interests in the Shares may be advertised or offered for sale to the general public in Thailand or marketed to the public in Thailand through any means of communication to any resident of Thailand to whom it is not addressed.

All the Shares' materials were prepared by the Company for informational purposes, and the contents of this Prospectus have not been reviewed by the SEC. The contents contained in these materials should not be construed as a public offer of the Shares in Thailand, and shall not be used as part of any prospectus, offering memorandum or other disclosure attributable to the Company.

This Prospectus is distributed on a confidential basis to the person to whom it is addressed. This Prospectus may not be reproduced in any form or transmitted to any person other than the person to whom it is addressed. Transmission of this Prospectus to the person to whom it is addressed shall not constitute solicitation in Thailand by the Company or any of its representatives or agents to invest in the Shares.

#### United Arab Emirates (UAE)

(excluding the Dubai International Financial Centre and the Abu Dhabi Global Market)

For Funds registered with the Securities and Commodities Authority in the United Arab Emirates (for use where the Fund is registered for public offer)

A copy of this Prospectus has been submitted to the United Arab Emirates (the "UAE") Securities and Commodities Authority (the "SCA"). The SCA assumes no liability for the accuracy of the information set out in this Prospectus, nor for the failure of any persons engaged in the investment fund in performing their duties and responsibilities. The relevant parties whose names are listed in this Prospectus shall assume such liability, each according to their respective roles and duties.

For Funds not registered with the Securities and Commodities Authority in the United Arab Emirates (for use in respect of unsolicited requests only)

This Prospectus, and the information contained herein, does not constitute, and is not intended to constitute, a public offer of securities in the UAE and accordingly should not be construed as such. The Shares are only being offered to a limited number of investors in the UAE who (a)

are willing and able to conduct an independent investigation of the risks involved in an investment in such Shares, and (b) upon their specific request. The Shares have not been approved by or licensed or registered with the UAE Central Bank, the SCA or any other relevant licensing authorities or governmental agencies in the UAE. The Prospectus is for the use of the named addressee only, who has specifically requested it on a cross-border basis, without a promotion effected by BlackRock, its promoters or the distributors of its Shares, and should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof). No transaction will be concluded in the UAE and any enquiries regarding the Shares should be made to the local Investor Servicing Team, telephone: +44 (0) 207 743 3300.

For Funds not registered with the Securities and Commodities Authority in the United Arab Emirates (for use in respect of Qualified Investor Exemption only)

This Prospectus, and the information contained herein, does not constitute, and is not intended to constitute, a public offer of securities in the UAE and accordingly should not be construed as such. The marketing of any funds in the UAE requires the prior approval of the Securities and Commodities Authority ("SCA") unless the exemptions to the regulations relating to promotion or offering of units in foreign funds or foreign shares (SCA Board of Directors Decision no 3/RM of 2017 concerning the organization of promotion and introduction, as further revised and updated) apply. Consequently, based on the mentioned exemption, the offering of Shares in the UAE will only be available to a limited number of exempt persons in the UAE who fall under one of the following categories of Exempt Qualified Investors: Corporate persons that are: (a) the federal government, local governments, and governmental entities, institutions and authorities, or companies wholly-owned by any of the aforementioned; (b) foreign governments, their respective entities, institutions and authorities or companies wholly owned by any such entities; (c) international entities and organisations; (d) entities licensed by the SCA or a similar regulator (i.e. a regulatory authority that is an ordinary or associate member of IOSCO) (a "Counterpart Authority"); or (e) a corporate person that meets, as at the date of its most recent financial statements, at least two of the following conditions: (i) it has a total assets of AED 75 million; (ii) it has a net annual income of AED 150 million; (iii) it has net equity or paid-up capital at the minimum of AED 7 million, or alternatively, a natural person licensed by the SCA or a Counterpart Authority to carry out any of the functions related to financial activities or services (each an "Exempt Qualified Investor").

The Shares have not been approved by or licensed or registered with the UAE Central Bank, the SCA, the Dubai Financial Services Authority, the Financial Services Regulatory Authority or any other relevant licensing authorities or governmental agencies in the UAE (the "Authorities"). The Authorities assume no liability for any investment that the named addressee makes as an Exempt Qualified Investor. The Prospectus is for the use of the named addressee only and should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof).

### United Kingdom

The contents of this Prospectus have been approved solely for the purposes of section 21 of the UK Financial Services and Markets Act 2000 (the "Act") by the Company's UK Distributor, BlackRock Investment Management (UK) Limited, 12 Throgmorton Avenue, London EC2N 2DL (which is regulated by the FCA in the conduct of investment business in the UK). The Company has obtained the status of "recognised scheme" for the purposes of the Act. Some or all of the protections provided by the UK regulatory system will not apply to investments in the Company. Compensation under the UK Investors Compensation Scheme will generally not be available. The Company provides the facilities required by the regulations governing such schemes at the offices of BlackRock Investment Management (UK) Limited, which acts as the UK facilities agent. UK investors can contact the UK facilities agent at the above address to obtain details regarding the prices of units, to redeem or arrange for the redemption of Shares, to obtain payment and to make a complaint. Details on the procedure to be followed in connection with the

subscription, redemption and switching of Shares are set out in this Prospectus. Copies of the following documents will be available (in English) for inspection and can be obtained at any time during normal business hours on any day (excluding Saturdays, Sundays and public holidays) free of charge at the above address of the UK Facilities Agent:

1. the Articles of Association;
2. the Prospectus, KID(s) and any supplement or addendum to the Prospectus; and
3. the most recently published annual and half yearly reports relating to the Company.

An applicant for Shares will not have the right to cancel his application under the UK FCA's Conduct of Business Rules. Further details on BlackRock Global Funds can be obtained from the local Investor Servicing Team, telephone: +44 (0)207 743 3300.

### USA

The Shares will not be registered under the US Securities Act of 1933, as amended (the "Securities Act") and may not be directly or indirectly offered or sold in the USA or any of its territories or possessions or areas subject to its jurisdiction or to or for the benefit of a US Person. The Company will not be registered under the US Investment Company Act of 1940. US Persons are not permitted to own Shares. Attention is drawn to paragraphs 3. and 4. of Appendix B which specify certain compulsory redemption powers and define "US Person".

### Generally

The distribution of this Prospectus and the offering of the Shares may be authorised or restricted in certain other jurisdictions. The above information is for general guidance only and it is the responsibility of any persons in possession of this Prospectus and of any persons wishing to make application for Shares to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdictions.

## Appendix E – Summary of Charges and Expenses

All Share Classes are also subject to an Annual Service Charge, which may be charged at a rate of up to 0.25% per annum.

\*A single fee is charged on Class SR Shares (which comprises the management fee and the Annual Service Charge). Please refer to the applicable KID for the ongoing charges figure. Please note that this figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying CIS (if any).

| AI Innovation Fund | Initial charge | Management Fee | Distribution Fee | CDSC  |

Note: Subject to the approval of the Directors, the combined Management Fee and Annual Service Charge for any Fund may be increased up to a maximum of 2.25% in total by giving Shareholders three months' prior notice in accordance with paragraph 19. of Appendix C. Any increase above this level would require approval of Shareholders at a general meeting.

## Appendix G – Securities Financing Transaction Disclosures

### General

Securities Financing Transactions (SFTs) such as securities lending, repurchase transactions, and total return swaps (TRS) will be used by the Funds at the discretion of the Investment Adviser (subject to their investment objective and policy) either to help meet the investment objective of a Fund and/or as part of efficient portfolio management.

TRSs involve the exchange of the right to receive the total return, coupons plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments. Where relevant, the Funds will enter into swaps as either the payer or receiver of payments under such swaps.

SFTs are defined as:

- (a) a repurchase transaction (which means a transaction governed by an agreement by which a counterparty transfers securities, commodities, or guaranteed rights relating to title to securities or commodities where that guarantee is issued by a recognised exchange which holds the rights to the securities or commodities and the agreement does not allow a counterparty to transfer or pledge a particular security or commodity to more than one counterparty at a time, subject to a commitment to repurchase them, or substituted securities or commodities of the same description at a specified price on a future date specified, or to be specified, by the transferor, being a repurchase agreement for the counterparty selling the securities or commodities and a reverse repurchase agreement for the counterparty buying them);
- (b) securities lending and securities borrowing (which means transactions governed by an agreement by which a counterparty transfers securities, or guaranteed rights relating to title to securities where that guarantee is issued by a recognised exchange which holds the rights to the securities and the agreement does not allow a counterparty to transfer or pledge a particular security to more than one counterparty at a time, subject to a commitment to repurchase them, or substituted securities of the same description at a specified price on a future date specified, or to be specified, by the transferor, being a repurchase agreement for the counterparty selling the securities and a reverse repurchase agreement for the counterparty buying them);
- (c) a buy-sell back transaction or sell-buy back transaction (which means transactions by which a counterparty buys or sells securities, commodities, or guaranteed rights relating to title to securities or commodities, agreeing, respectively, to sell or to buy back securities, commodities or such guaranteed rights of the same description at a specified price on a future date, that transaction being a buy-sell back transaction for the counterparty buying the securities, commodities or guaranteed rights, and a sell-buy back transaction for the counterparty selling them, such buy-sell back transaction or sell-buy back transaction not being governed by a repurchase agreement or by a reverse-repurchase agreement); and
- (d) a margin lending transaction (which means a transaction in which a counterparty extends credit in connection with the purchase, sale, carrying or trading of securities, but not including other loans that are secured by collateral in the form of securities).

Save as indicated in the paragraph below, the Funds do not currently use SFTs described in paragraphs (a), (c) and (d) above.

At the discretion of the Investment Adviser, the Euro Reserve Fund and the US Dollar Reserve Fund will invest in eligible reverse repurchase agreements for both liquidity management purposes and for permitted investment purposes. In accordance with Article 15 of MMFR, the assets received as part of a reverse repurchase agreement shall be sufficiently diversified with a maximum exposure to a given issuer of 15% of the

MMF's NAV, except where those assets take the form of money market instruments that fulfil the requirements of Article 17(7) of MMFR.

All the Funds, except the Euro Reserve Fund and the US Dollar Reserve Fund, will use securities lending, depending on market conditions as further described below.

The Funds will use the securities lending market to generate additional returns. A Fund seeks to generate additional income through the rate that it charges for lending securities.

The securities lending on-loan percentage of a fund can vary over time due to changes in borrowing demand for different securities, sectors, and asset classes. Changing market dynamics over time results in demand that cannot be forecasted precisely and requires maximum flexibility with respect to the allowed maximum disclosed in the table below in order to anticipate and answer positively to the need of market participants to enter into securities lending transactions with a Fund. These maxima are established by BlackRock's analyses of the borrowing demand of the underlying assets needed over time by the market, which can be lent by the Funds in compliance with local tax regulations. Where there is a borrowing demand for a certain type of security and a Fund does not have sufficient securities of said required type to lend, the demand will then be satisfied by another Fund of the same investment universe and so utilisation differences in similar funds can be observed across fund ranges due to their size. Although it is not anticipated that the permitted maximum will be reached in most of the cases, the Investment Adviser does not wish to prevent investors from benefitting from additional revenue by setting unduly low maximum figures.

The expected proportion of Net Asset Value indicated in the table below is based on historical data and hence indicates the expected range of securities lent that is likely to occur in future. However, past performance is not a guarantee of future results and should not be the sole factor of consideration when selecting a product or strategy. The expected proportion of the NAV of a Fund subject to securities lending may consist in a range rather than a bespoke figure because of the fluctuating demand of the market, it being understood that such a demand cannot be forecasted precisely and is not constant but highly dependent on market conditions as further described below.

### Market Conditions

Investors' attention is drawn to the fact that borrowing demand fluctuates over time and depends to a large extent on market factors and prevailing investor tax legislation in certain jurisdiction, neither of which can be forecasted precisely. Therefore, due to fluctuations in borrowing demand in the market, future lending volumes could fall outside of the range indicated in the expected proportion of the Net Asset Value in the table below. For the avoidance of doubt and based on historical data, the maximum proportion of the Net Asset Value of the Funds that can be subject to securities lending will typically range between 0% and 49% of the Net Asset Value, though past levels are no guarantee of future levels.

Demand is driven primarily by large banks and broker-dealers on behalf of their clients, including other banking institutions or hedge funds (all together "**Market Players**").

Securities lending can benefit investors in a number of ways:

- (a) Additional revenue;
- (b) Increased market liquidity, which can reduce trading costs;
- (c) Provide a mechanism for efficient price discovery reducing price volatility.

Market Players and end-clients may need to borrow securities and therefore engage into securities lending agreements with a Fund for various reasons such as, but not limited to:

## Appendix G

- (a) Take active positions or hedge against market risk vis-à-vis a short sale;
- (b) Collateral management;
- (c) Using borrowed securities to raise short-term finance;
- (d) Facilitating the settlement of financial contracts requiring the delivery of a security that could fail otherwise;
- (e) Market making.

Changes in a, b, c, d or e over time may trigger higher or lower borrowing demand and therefore lead to an increase or decrease in the exposure of a Fund to securities lending activities. Changes in demand for a, b, c, d or e may be cumulative or independent of each other.

The types of assets that may be subject to SFTs, total return swaps and include equity securities, fixed income securities, collective investment schemes, money market instruments and cash. Use of such assets is subject to a Fund's investment objective and policy.

### Counterparty Selection & Review

#### Repurchase transactions

The Investment Advisers select from an extensive list of full service and execution-only brokers and counterparties. All prospective and existing counterparties require the approval of the Counterparty Risk Group ("CRG"), which is part of BlackRock's independent Risk & Quantitative Analysis department ("RQA").

In order for a new counterparty to be approved, a requesting portfolio manager or trader is required to submit a request to the CRG. The CRG will review relevant information to assess the credit-worthiness of the proposed counterparty in combination with the type and settlement and delivery mechanism of the proposed security transactions. The counterparties to these transactions must be subject to prudential supervision rules considered by the CSSF to be equivalent to those prescribed by EU law. The counterparties will be entities with legal personality typically located in the EEA or in a country belonging to the Group of Ten or have at least an investment grade rating. The counterparties should be subject to ongoing supervision by a regulated authority. If the counterparty does not fulfil any of these criteria, equivalence to EU law will be demonstrated. A list of approved trading counterparties is maintained by the CRG and reviewed on an ongoing basis.

Counterparty reviews also require the Credit Research group to evaluate the capacity of each repurchase agreement counterparty or each security's issuer, to meet its financial obligations, and in doing so, generally considers, to the extent appropriate, the following factors: (1) financial condition (including an examination of recent financial statements, which should include consideration of trends relating to cash flow, revenue, expenses, profitability, short-term debt and total debt service coverage, and leverage, including financial and operating leverage); (2) sources of liquidity (including consideration of bank lines of credit and alternative sources of liquidity); (3) ability to react to future market-wide and issuer- or guarantor-specific events, including ability to repay debt in a highly adverse situation (which should in turn contain analysis of risk from various scenarios, including changes to the yield curve or spreads, especially in a changing interest rate environment); and (4) strength of the issuer or guarantor's competitive position within its industry (including the general consideration of diversification of sources of revenue, if applicable).

Counterparties are monitored on an ongoing basis through the receipt of audited and interim financial statements, via alert portfolios with market data service providers, and where applicable, as part of BlackRock's internal research process. Formal renewal assessments are performed on a cyclical basis.

The Investment Advisers select brokers based upon their ability to provide good execution quality (i.e. trading), whether on an agency or a principal basis; their execution capabilities in a particular market segment; and their operational quality and efficiency; and we expect them to adhere to regulatory reporting obligations.

Once a counterparty is approved by the CRG, broker selection for an individual trade is then made by the relevant dealer at the point of trade, based upon the relative importance of the relevant execution factors. For some trades, it is appropriate to enter into a competitive tender amongst a shortlist of brokers.

The Investment Advisers perform pre-trade analysis to forecast transaction cost and to guide the formation of trading strategies including selection of techniques, division between points of liquidity, timing and selection of broker. In addition, the Investment Advisers monitor trade results on a continuous basis.

Broker selection will be based on a number of factors including, but not limited to the following:

- ▶ Ability to execute and execution quality;
- ▶ Ability to provide liquidity/capital;
- ▶ Price and quote speed;
- ▶ Operational quality and efficiency; and
- ▶ Adherence to regulatory reporting obligations.

The Securities Financing Transaction Regulation 2015 (2015/2365) ("SFTR") contains requirements in relation to the selection of counterparties and the eligibility, safekeeping and reuse of collateral. These requirements are set out in Appendix A.

#### Securities Lending

The securities lending agent is authorised to lend to counterparties who have been approved by the CRG. The list of approved counterparties is maintained by the CRG and reviewed on an ongoing basis. The counterparties to these transactions must be subject to prudential supervision rules considered by the CSSF to be equivalent to those prescribed by EU law. The counterparties will be entities with legal personality typically located in the EEA or in a country belonging to the Group of Ten or have at least an investment grade rating. The counterparties should be subject to ongoing supervision by a regulated authority. If the counterparty does not fulfil any of these criteria, equivalence to EU law should be demonstrated. A list of approved trading counterparties is maintained by the CRG and reviewed on an ongoing basis.

Counterparty reviews take into account the fundamental creditworthiness (ownership structure, financial strength, regulatory oversight) and commercial reputation of specific legal entities in conjunction with the nature and structure of proposed trading activities. Counterparties are monitored on an ongoing basis through the receipt of audited and interim financial statements, via alert portfolios with market data service providers, and where applicable, as part of BlackRock's internal research process.

As securities lending does not involve the execution of orders to trade but rather the allocation of loan requests submitted by brokers, BlackRock agrees and settles a requested trade provided the broker has been approved, the value of the proposed transaction does not exceed the aggregate value of loans permitted, and any other execution factor considerations have been met.

#### Returns generated by SFTs

All returns generated from the use of repurchase transactions and total return swaps will be paid to the relevant Fund.

In relation to securities lending only, the securities lending agent, BlackRock Advisors (UK) Limited, receives remuneration in relation to its activities. Such remuneration amounts to 37.5% of the gross revenue from the securities lending activities, with all direct and indirect costs borne out of BlackRock's share. The relevant Funds receive 62.5% of the gross revenue from the securities lending activities. All revenue generated from securities lending activities net of the securities lending agent's fee will be returned to the Company. The fee of the securities lending agent represents direct costs (and if relevant indirect operational costs/fees) of the Company's securities lending activities. The securities lending agent is a related party to the Management Company.

#### Proportions of Fund property subject to SFTs

The table below specifies the maximum and expected proportion of the Net Asset Value of a Fund that can be subject to securities financing transactions for the purposes of the SFTR and is set at the discretion of the Investment Adviser. Investors should note that a limitation of maximum securities lending levels by a Fund, at a time when demand exceeds those maximum levels, may reduce potential income to a Fund that is attributable to securities lending. The expected proportion is not a limit and the actual percentage may vary over time depending on factors including, but not limited to, market conditions. The maximum figure is a limit.

| No. | FUND                                           | TRS (in aggregate*)<br>Maximum/Expected<br>proportion of<br>the NAV (%) | Securities Lending**<br>Maximum****/Expected<br>proportion of<br>the NAV (%) | Repurchase Transactions<br>Maximum/Expected<br>proportion of<br>the NAV (%) |

| 117. World Technology Fund                      | 40/0                                                                    | 49/ up to 19                                                                 | 0/0                                                                         |

## Appendix G

\*Within the total ranges noted above, the Funds' exposure TRS will vary. Further details of exposures to TRS can be obtained from the Company's registered office.

\*\*The maximum proportion of the Net Asset Value of the Funds that can be subject to securities lending is indicated in the table above. The demand to borrow securities and to comply with investor tax regulations in certain jurisdiction are significant drivers for the amount that is actually lent from a Fund at a given time. Borrowing demand fluctuates over time and depends to a large extent on market factors and prevailing investor tax legislation in certain jurisdiction, neither of which can be forecasted precisely. Due to fluctuations in borrowing demand in the market, future lending volumes could fall outside of the range indicated as the expected proportion of the Net Asset Value in the table above. For the avoidance of doubt and based on historical data, the maximum proportion of the Net Asset Value of the Funds that can be subject to securities lending will typically range between 0% and 49% of the Net Asset Value, though past levels are no guarantee of future levels.

\*\*\* In accordance with Article 15 of MMFR, the assets received as part of a reverse repurchase agreement shall be sufficiently diversified with a maximum exposure to a given issuer of 15% of the MMF's NAV, except where those assets take the form of money market instruments that fulfil the requirements of Article 17(7) of MMFR.

\*\*\*\* It is the intention of the Investment Adviser that maxima are strict limits. It should be noted that such maxima are based on past performances and such past performances can never guarantee future results. In this respect, these maxima may be temporally exceeded should the demand drastically and unpredictably shift to an upward trend in the conditions set forth in the section "Market Conditions" of this Appendix G.

---

## Summary of Subscription Procedure and Payment Instructions

### 1. **Application Form**

For initial subscriptions for Shares you must complete the Application Form which may be obtained from the Transfer Agent and the form must be signed by all joint applicants. Subsequent subscriptions may be made electronically via 'straight through process' (STP), or if this option is unavailable then by fax (followed by original via post) and the Management Company may, at its sole discretion, accept individual dealing orders submitted via other forms of electronic communication at, stating your registration details and the amount to be invested. If your application is being submitted by your professional adviser, section 5 of the Application Form should be completed. Completed application forms must be sent to the Transfer Agent.

### 2. **Money Laundering Prevention**

Please read the notes on the application form regarding the identification documents required and ensure that you provide these to the Transfer Agent or the Distributor (in the case of certain Polish investors) together with your application form.

### 3. **Payment**

A copy of your telegraphic transfer instructions should be supplied with your application (see sections 4 and 5 below).

### 4. **Payment by Telegraphic Transfer**

Payment by SWIFT/bank transfer in the relevant currency should be made to one of the accounts opposite. The SWIFT/bank transfer instruction should contain the following information:

- (i) Bank Name
- (ii) SWIFT Code or Bank Identifier
- (iii) Account (IBAN)
- (iv) Account Number
- (v) Account Reference – "BGF – Fund name subscribed into and BGF account number / contract reference number"
- (vi) By order of Shareholder name/agent name & Shareholder number/agent number

An applicant's obligation to pay for Shares is fulfilled once the amount due has been paid in cleared funds into this account.

### 5. **Foreign Exchange**

If you wish to make payment in a currency other than that in the Dealing Currency (or one of the Dealing Currencies) of your chosen Fund, this must be made clear at the time of application.

### 6. **Bank Details**

All information regarding bank details and settlement instructions can be found under the following links:

### Appendix H – SFDR Pre-Contractual Disclosure

This Appendix comprises the pre-contractual disclosure “PCDs” for those Funds classified as Article 8 or Article 9 products pursuant to the SFDR. These PCDs are intended to ensure that all sustainability claims of relevant Funds are supported with information and that this is done in a way that enables investors to compare funds. The form of disclosure is mandated by the European Commission and the Management Company is not permitted to amend or deviate from the template.

The PCDs introduce some new terms to the prospectus (some are described below) which should be read alongside the section of this prospectus entitled “Investment Objectives and Policies” and information available on the product pages of the BlackRock website, [www.blackrock.com/lu](http://www.blackrock.com/lu).

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. It is a term that is strictly defined by the SFDR and so even though an investment might, in everyday terms, be reasonably considered to be in sustainable asset it may not qualify as a Sustainable Investment under the technical definition in the SFDR. Investors should therefore make a personal assessment of the sustainable and ESG characteristics of a Fund prior to investing.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The EU Taxonomy is a classification system, establishing a list of environmentally sustainable economic activities. For the time being, it does not include a list of socially sustainable economic activities. Sustainable Investments with an environmental objective might be aligned with the Taxonomy or not.

The following Funds are covered in this Appendix:

Article 8 Funds: AI Innovation Fund, Asia Pacific Bond Fund, Asian Sustainable Equity Fund, Brown To Green Materials Fund, China Fund, China Innovation Fund, China Multi-Asset Fund, China Onshore Bond Fund, Climate Transition Multi-Asset Fund, Continental European Flexible Fund, Developed Markets Sustainable Equity Fund, Emerging Markets Corporate Advanced Bond Fund, Emerging Markets Fixed Maturity Bond Fund 2028, Emerging Markets Sustainable Equity Fund, ESG Emerging Markets Blended Bond Fund, ESG Emerging Markets Bond Fund, ESG Emerging Markets Local Currency Bond Fund, ESG Multi-Asset Fund, Euro High Yield Fixed Maturity Bond Fund 2027, Euro High Yield Fixed Maturity Bond Fund 2028, Euro High Income Fixed Maturity Bond Fund 2028, Euro High Income Fixed Maturity Bond Fund 2029, Euro Income Fixed Maturity Bond Fund 2029, Euro Income Fixed Maturity Bond Fund 2030, Euro Investment Grade Fixed Maturity Bond Fund 2027 (1), Euro Investment Grade Fixed Maturity Bond Fund 2028, Euro Bond Fund, Euro Corporate Bond Fund, Euro Short Duration Bond Fund, Euro-Markets Fund, European Equity Income Fund, European Equity Transition Fund, Euro Flexible Income Bond Fund, European Fund, European High Yield Bond Fund, European Multi-Asset Income Fund, European Special Situations Fund, European Sustainable Equity Fund, European Value Fund, FinTech Fund, Global Equity income Fund, Global Government Bond Fund, Global High Yield Bond Fund, Global Listed Infrastructure Fund, Global Long-Horizon Equity Fund, Global Securitised Fund, Global Unconstrained Equity Fund, Japan Flexible Equity Fund, Japan Small & MidCap Opportunities Fund, Multi-Theme Equity Fund, Next Generation Technology Fund, Sustainable Global Allocation Fund, Sustainable Global Dynamic Equity Fund, Swiss Small & MidCap Opportunities Fund, Systematic China A-Share Opportunities Fund, Systematic Multi Allocation Credit Fund, Systematic Global Income & Growth Fund, Systematic China Environmental Tech Fund, Systematic Global SmallCap Fund, United Kingdom Fund, US Dollar High Yield Bond Fund, US Sustainable Equity Fund, US Growth Fund, US Flexible Equity Fund, World Bond Fund, World Financials Fund, World Healthscience Fund, World Real Estate Securities Fund and World Technology Fund.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: AI Innovation Fund  
Legal entity identifier: 529900MOGOJJXYJ9XI15**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens using the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using the Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens using the Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to maximise total return and capital growth, and invest in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is the advancement, development and use of artificial intelligence (AI) technology. The Investment Adviser considers, in its discretion, that a company is an AI company if it is expected to derive future revenue from the advancement, development and use of AI Technology.

Such companies are generally expected to operate in one or more of the following areas: (i) computing and infrastructure (e.g., Graphics Processing Units (GPUs), cloud computing and data centers); (ii) foundational models; (iii) data (e.g., vertical industry data and proprietary data); (iv) software (e.g., enterprise applications); (v) services (e.g., information technology (“IT”) services); (vi) internet (e.g., chatbots or content creation); or (vii) hardware (e.g., robotics, smart glasses).

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Application of the BlackRock EMEA Baseline Screens using the Fundamental Insights Methodology described above.

### ● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments('#2 Other').

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Asia Pacific Bond Fund  
Legal entity identifier: 549300JZ0LV6GHH1FT27**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

Greenhouse gas emissions are categorised into three groups or “scopes” by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3 includes all other indirect emissions that occur in an issuer’s value chain. The Fund seeks to have a lower weighted average absolute Greenhouse Gas (GHG) emissions (excluding green and sustainable bonds), which is the estimated greenhouse gas (Scope 1 + Scope 2) emission that is 30% lower than the ESG Reporting Index. For the avoidance of doubt, Scope 3 is not currently considered for this calculation and only non-sovereign bonds are considered.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, iBoxx USD Asia-Pacific ex-Greater China Non-Sovereigns Investment Grade Capped Index (the “ESG Reporting Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's carbon emissions, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to maximise income without sacrificing long term capital growth. The Fund invests at least 70% of its total assets in fixed income transferable securities of issuers domiciled in, or exercising the predominant part of their economic activity in the Asia Pacific region.

The Fund will apply the BlackRock EMEA Baseline Screens.

the Investment Adviser intends the Fund to have a lower weighted average absolute GHG emissions (excluding green and sustainable bonds), which is the estimated greenhouse gas (Scope 1 + Scope 2) emission that is 30% lower than the ESG Reporting Index.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Application of the BlackRock EMEA Baseline Screens, described above.
- Maintain that the Fund's weighted average absolute GHG emission is 30% lower than the ESG Reporting Index as described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 30% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the iBoxx USD Asia-Pacific ex-Greater China Non-Sovereigns Investment Grade Capped Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middle-east-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Asian Sustainable Equity Fund  
Legal entity identifier: 5493001IS0X9SBX98411**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 40% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity relative to the Index, which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions based on the enterprise value including cash (EVIC) across the Fund's holding of capital invested in a company across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities; the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI AC Asia ex Japan Index (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's, environmental, social and governance (“ESG”) rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 40% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon Footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled, or whose main business is, in Asia (excluding Japan) in a manner consistent with the principles of sustainable investing.

The Investment Adviser applies the BlackRock EMEA Baseline Screens and other exclusionary criteria to the investable universe.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser uses fundamental analysis to map companies' revenues and activities to environmental and social objectives to identify Sustainable Investments.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Investment Adviser uses its analysis to create a portfolio that seeks to deliver:

1. a superior ESG outcome versus the Index;
2. a carbon emissions intensity score 20 % lower than the Index; and
3. an allocation to Sustainable Investments

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Investment Adviser ensures that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 40% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain the Fund's carbon emissions intensity as 20% lower than that of the Fund's Index.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 40% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the MSCI AC Asia ex Japan Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Brown To Green Materials Fund  
Legal entity identifier: 529900LYRM65RB7W2C49**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund promotes environmental and social characteristics by investing in assets that align to the principles of the transitioning materials theme (as defined in more detail below). As well as being aligned to the principles of the transitioning materials theme, at least 80% of the Fund's total assets will be invested in companies which qualify under BlackRock's 'Transition Assessment' methodology.

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

This Fund applies the EU Climate Transition Benchmark Exclusions.

The Fund promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Climate Transition Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments aligned to the transitioning materials theme and assessed using BlackRock's 'Transition Assessment' methodology, as described in more detail below.
- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Fund invests at least 20% of its holdings in Sustainable Investments. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

BlackRock makes use of internal analysis and third-party data sources to measure how issuers negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through its alignment to the transitioning materials theme and the application of its exclusionary policy.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests in the equity securities of companies globally that contribute to the transitioning materials theme. The transitioning materials theme covers the need for materials to build lower carbon technologies and efforts to reduce the emissions intensity of the materials sector.

The Investment Adviser will identify a universe of potential investments within the following categories of companies – consistent with the principles of the transitioning materials theme:

- **Emission Reducers:** suppliers of materials that have a plan to reduce their carbon emissions intensity over a defined period;
- **Enablers:** producers of materials that enable the world to transition to a lower carbon global economy (e.g. lithium) and companies providing solutions that enable materials companies to reduce their emissions intensity;
- **Green Leaders:** companies producing materials with below average carbon emissions intensity for their industry (e.g. within the steel sector).

References to materials above include materials that enable transition to a lower carbon economy and materials for which lower carbon technologies are not a key demand driver.

Having determined those companies which meet the principles of the transitioning materials theme, the Fund will further apply BlackRock's proprietary 'Transition Assessment' methodology to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.

Investments that qualify under BlackRock's 'Transition Assessment' methodology must demonstrate they are on a clear and measurable transition path, either because the issuer (1) provides products and services to facilitate low carbon transition in the broader economy; or (2) is on a low carbon transition itself. Such qualifying investments must meet one or more of the following criteria:

### Issuers facilitating low carbon transition

- Investee companies which earn at least 20% of their annual revenues from activities with positive environmental impact and / or align with climate mitigation and adaption. Qualifying revenue streams are based on data vendor methodologies and / or BlackRock research for sustainable revenue identification.  
*Example: issuers that gain sufficient revenue from the manufacture of solar panels, solar cells, generation of power from solar sources, or the production / mining of metal required in such process.*
- Investments in companies with business models well positioned for or are potential leaders in the low carbon transition.  
*Example: renewable energy producers, software enablers for transition*

### Transitioning issuers

- Investee companies decarbonising their operations and which have established climate targets and commitments using data from the Science Based Targets Initiative (SBTi); and/or Investee companies which have been determined by the Investment Adviser as credible carbon reducers and are expected to demonstrate significant progress towards decarbonizing their operations; and/or investee companies which have quantitative target identification data from data vendors – where such targets and commitments are monitored by accessing company data supplied by data vendors.  
*Example: companies at different stages of a Net Zero business plan with a validated target to improve their carbon emissions intensity.*
- Investee companies otherwise transitioning their business model and operations and identified through the use of well-established vendor data models as a company with implied temperature outcomes consistent with a clear and measurable path to transition.  
*Example: companies with lower implied temperature measures due to their projected trend of decarbonisation or current lower carbon economic activities.*

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
  - Maintain that the Fund holds at least 80% in investments which align to the BlackRock's 'Transition Assessment' methodology (as described above).
  - Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
  - Application of the exclusionary screens described above.
  - Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.
- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other investments**).

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: China Fund  
Legal entity identifier: 549300835EE70C7CKG16**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the People's Republic of China. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: China Innovation Fund  
Legal entity identifier: 549300LRPLM6J4CVQV44**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to achieve long-term capital growth and invest in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests at least 70% of its total assets in a portfolio of equity securities or equity-related securities (including derivatives) of, or giving exposure to companies domiciled in, or exercising the predominant part of their activity in, or from, Greater China and whose goods and services are contributing to Greater China’s competitive advantage through technology innovation, with a focus on companies that generate revenues from innovative technologies such as artificial intelligence, computing, automation, robotics, technological analytics, e-commerce, payment systems, electric and autonomous vehicles, communications technology and generative design. Greater China refers to the People’s Republic of China (PRC) and the Republic of China (Taiwan). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with Greater China innovation and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financials. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models. The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middle-east-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements. The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: China Multi-Asset Fund  
Legal entity identifier: 529900OA8MFVQWXPV58**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests in Collective Investment Schemes ("CIS") qualifying as Article 8 or 9 of the SFDR Regulation and investment strategies which pursue a positive ESG objective or outcome and do not adopt ESG exclusionary screens solely as their ESG policy, or, in the case of government bond exposures, track benchmark indices incorporating ESG requirements.

Where the Fund holds securities directly, it applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screensin-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings of underlying Collective Investment Schemes and investment strategies meeting the above criteria
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
3. For directly held securities, the Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund will invest at least 80% of total assets excluding cash and derivatives in CIS qualifying as Article 8 or 9 of the SFDR Regulation and investment strategies which pursue a positive ESG objective or outcome and do not adopt ESG exclusionary screens solely as their ESG policy, or, in the case of government bond exposures, track benchmark indices incorporating ESG requirements. Where determined appropriate, the Fund may invest directly in derivatives, cash and near-cash instruments.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining companies (i.e. those companies which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on their ability to manage the ESG related risks and opportunities associated with their business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of Collective Investment Schemes and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Where the Fund holds securities directly, the Fund will apply the BlackRock EMEA Baseline Screens.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Maintain that the Fund holds at least 80% of its holdings, excluding cash and derivatives, in Collective Investment Schemes and investment strategies meeting the above criteria.
2. Apply the BlackRock EMEA Baseline Screens to directly held securities.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Manager, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer. The Investment Manager may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 30% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: China Onshore Bond Fund  
Legal entity identifier: 549300Q3DMBDT56WEZ03**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 10% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Investors should please note in relation to the screen which covers the UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption) that at the time of the launch of this Fund coverage of the investable universe is limited but is expected to improve over time. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively).
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 10% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

#### **What investment strategy does this financial product follow?**

The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in Renminbi issued by entities exercising the predominant part of their economic activity in the PRC (through recognized mechanisms including (but not limited to) the Chinese Interbank Bond Market, the exchange bond market, quota system and/or through onshore or offshore issuances and/or any future developed channels and on a temporary basis for liquidity management purposes, the holdings of cash and near cash instruments.

The Fund will apply the BlackRock EMEA Baseline Screens. Investors should please note in relation to the screen which covers the UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption) that at the time of the launch of this Fund coverage of the investable universe is limited but is expected to improve over time.

The Investment Adviser also intends to invest at least 10% of the Fund's total assets in "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary

methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively).

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 10% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 0% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Application of the BlackRock EMEA Baseline Screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 10% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 0% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 30% of its total assets in other investments (**#2 Other**).

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 0% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Circular Economy Fund  
Legal entity identifier: 549300DE2JONQNR75**

**Sustainable investment objective**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☒ **Yes**

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 15%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ It will make a minimum of **sustainable investments with a social objective: 1%**

☐ ☐ ☐ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What is the sustainable investment objective of this financial product?**

The Fund invests at least 80% of its total assets in the equity securities of companies globally that benefit from, or contribute to, the advancement of the “Circular Economy”.

The Circular Economy concept recognises the importance of a sustainable economic system and represents an alternative economic model to the default “make-use-throw away” approach of consumption, which is believed to be unsustainable given scarce resources and the rising cost of managing waste. The Circular Economy concept promotes the redesign of products and systems to minimise waste and to enable greater recycling and reuse of materials.

The Fund invests a minimum of 80% of its total assets in Sustainable Investments, across environmental and social objectives. The minimum for each Sustainable Investment objective is set out in the box above. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) a minimum proportion of the issuer’s business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer’s business practices contribute to an Environmental and/or Social Objective.

The Fund considers key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI All Countries World Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's, environmental, social and governance ("ESG") rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

This Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

**What investment strategy does this financial product follow?**

The Fund will aim to invest in line with the principles of the Circular Economy as determined by the Investment Adviser (having regard to specialist third party information sources as appropriate). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation, across all industry sectors, that benefit from the Circular Economy and/or contribute to the advancement of the Circular Economy across three categories:

**Adopters:** Companies that are adopting 'circularity' in their business operations (e.g. companies involved in sustainable fashion or companies that have made a commitment to use recycled plastics in production processes).

**Enablers:** Companies that provide new, innovative solutions directly aimed at solving inefficient material use and pollution (e.g. companies involved in recycling of products, companies involved in reducing inputs such as water and energy and companies enabling sustainable transportation).

**Beneficiaries:** Companies that provide alternatives to materials that cannot be recycled or supply these to the extended value chain (e.g. companies that will see an increase in demand for their products from shifts towards more easily recyclable products and companies that offer natural or plant-based circular alternatives to non-recyclable and non-biodegradable products).

The assessment of a company's benefit from and/or contribution to the advancement of the Circular Economy in each of the above categories may be based on percentage of revenue, a defined total revenue threshold, or any connection to the Circular Economy regardless of the amount of revenue received. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the Circular Economy and on their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. The Investment Adviser considers such companies to be Sustainable Investments.

The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser uses its analysis to create a portfolio that has a higher ESG rating than the Index after eliminating at least 20% of the least well-rated securities from the Index.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The binding elements of the investment strategy are as follows:

- Maintain that all of the Fund's investments will be Sustainable Investments (save for instruments used for the purposes of liquidity management and/or hedging, which will not exceed 20% of the Fund's total assets). In relation to such Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.
- Application of the exclusionary screens described above.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation and the minimum share of sustainable investments?

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

All of the Fund's investments will be Sustainable Investments or instruments used for the purposes of liquidity management and/or hedging. Investments used for the purposes of liquidity management and/or hedging will not exceed 20% of the Fund's total assets.

A minimum of 80% of the Fund's total assets will be invested in Sustainable investments (#1 Sustainable).

In relation to these Sustainable Investments (#1 Sustainable), at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Not sustainable).

### ● How does the use of derivatives attain the sustainable investment objective?

Where derivatives are used for investment purposes, they are assessed against the criteria for Sustainable Investments. Derivatives may also be used for limited other purposes such as liquidity and hedging, and any ESG rating or analyses referenced above will apply only to the underlying investment in respect of such derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of sustainable investments with a social objective?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

The use of such investments does not affect the delivery of the sustainable investment objective, as these investments are used for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to meet the sustainable investment objective?**

No.

Please note that the MSCI All Countries World Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Climate Transition Multi-Asset Fund  
Legal entity identifier: 549300WXHUWHCE8DHR77**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund promotes environmental and social characteristics by investing at least 80% of its total assets in companies which qualify under BlackRock's 'Transition Assessment' methodology.

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the EU Climate Transition Benchmark Exclusions.

The Fund promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Climate Transition Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI All Country World All Cap Index 65% and Bloomberg Global Aggregate Bond Index (Hedged to EUR) 35% (the "ESG Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments assessed using BlackRock's 'Transition Assessment' methodology, as described in more detail below.
- The Fund's environmental, social and governance ("ESG") rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.
- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through its alignment to the transition theme and the application of its exclusionary policy.

The Fund takes into account the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund will apply BlackRock's proprietary 'Transition Assessment' methodology to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.

Investments that qualify under BlackRock's 'Transition Assessment' methodology must demonstrate they are on a clear and measurable transition path, either because the issuer (1) provides products and services to facilitate low carbon transition in the broader economy; or (2) is on a low carbon transition itself. Such qualifying investments must meet one or more of the following criteria:

### Issuers facilitating low carbon transition

- Investee companies which earn at least 20% of their annual revenues from activities with positive environmental impact and / or align with climate mitigation and adaptation. Qualifying revenue streams are based on data vendor methodologies and / or BlackRock research for sustainable revenue identification.  
*Example: issuers that gain sufficient revenue from the manufacture of solar panels, solar cells, generation of power from solar sources, or the production / mining of metal required in such process.*
- Investments in companies with business models which are well positioned for or potential leaders in the low carbon transition.  
*Example: renewable energy producers, software enablers for transition.*

### Transitioning issuers

- Investee companies decarbonising their operations which have established climate targets and commitments using data from the Science Based Targets Initiative (SBTi); and/or Investee companies which have been determined by the Investment Adviser as credible carbon reducers and are expected to demonstrate significant progress towards decarbonizing their operations; and/or investee companies have quantitative target identification data from data vendors – where such targets and commitments are monitored by accessing company data supplied by data vendors.  
*Example: companies at different stages of a Net Zero business plan with a validated target to improve their carbon emissions intensity.*
- Investee companies otherwise transitioning their business model and operations and identified through the use of well-established vendor data models as a company with implied temperature outcomes consistent with a clear and measurable path to transition.  
*Example: companies with lower implied temperature measures due to their projected trend of decarbonisation or current lower carbon economic activities*

For the avoidance of doubt, investments that qualify under BlackRock's "Transition Assessment" methodology also include "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond principles) and sustainability bonds. The use of proceeds of such bonds must be tied to environmental projects (green bonds) or a combination of both environmental and social projects (sustainability bonds).

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

The weighted average ESG rating of the Fund will be higher than the Index after eliminating at least 20% of the least well-rated securities from the Index. The weighted average ESG rating excludes certain asset classes, such as funds, that are not supported by ESG rating providers. In such cases, the Investment Adviser will assess these holdings to ensure they are in line with the Environmental objective of the Fund.

More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain that the Funds holds at least 80% in investments which align to the BlackRock's 'Transition Assessment' methodology (as described above).
- Application of the exclusionary screens described above.
- Ensure that more than 90% of issuers in which the Fund invests are ESG rated or have been analysed for ESG purposes.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

## ● *How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?*

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the MSCI All Country World All Cap Index 65% and Bloomberg Global Aggregate Bond Index (Hedged to EUR) 35% is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Continental European Flexible Fund  
Legal entity identifier: 549300EK4APWIQOV3Y73**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
3. The Fund's holdings of underlying MMFs meeting the above criteria

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to invest in Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe excluding the UK. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middle-east-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Developed Markets Sustainable Equity Fund  
Legal entity identifier: 549300RZN20CR9GE2N37**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 50% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3 includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity relative to the Index, which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions based on the enterprise value including cash (EVIC) across the Fund's holding of capital invested in a company across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production

and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities; the mining, production and supply activities related to nuclear power, the production of adult entertainment materials, unconventional oil and gas production, and, the production of conventional weapons. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI World Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 50% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

#### **What investment strategy does this financial product follow?**

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in, global developed markets in a manner consistent with the principles of sustainable investing.

The Investment Adviser applies the BlackRock EMEA Baseline Screens and other exclusionary criteria to the investable universe.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser uses fundamental analysis to map companies' revenues and activities to environmental and social objectives to identify Sustainable Investments.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Investment Adviser uses its analysis to create a portfolio that seeks to deliver:

- a lower carbon emissions intensity score at least 20% lower than the Index; and
- an allocation to Sustainable Investments

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 50% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain the Fund's carbon emissions intensity as 20% lower than that of the Fund's Index.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 50% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the MSCI World Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Diversified Tactical Fund  
Legal entity identifier: 529900ACHEKJL5V7RP74**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to achieve a positive absolute return through a combination of capital growth and income with a limited correlation to market movements. The Fund seeks to achieve its objective by investing globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), shares or units of CIS (including exchange-traded funds), Money Market Instruments, deposits, foreign currencies and cash, along with any other securities or instruments outlined in Appendix B to the Prospectus. The Fund will not have a geographical or sector focus but may have a high allocation to particular countries or sectors at any one time. The Fund may have exposure to both developed and emerging markets. The asset allocation of the Fund is intended to be flexible to allow the Fund to allocate across countries and maintain the ability to adjust its exposures as market conditions dictate.

The Fund will apply the BlackRock EMEA Baseline Screens.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Investment Adviser may also consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers depending on the particular ESG strategy applicable to the Fund. The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Application of the BlackRock EMEA Baseline Screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Adviser agrees with this external assessment, the Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Adviser's direct engagement with the issuer. The Adviser may also decide to reduce exposure to such issuers.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 0% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 0% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in

first paragraph, of Regulation (EU) 2020/852**

**Product name: Emerging Markets Corporate Bond Advanced Fund  
Legal entity identifier: 549300RP1XQIVCL46L82**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Advisor will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Advisor. The Investment Advisor will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity of the portfolio relative to the ESG Reporting Index, which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

At least 70% of the Fund's total assets are invested in the investable universe as defined by the Index. The Index uses JP Morgan's ESG ("JESG") methodology. Normalised JESG Index Scores for issuers are calculated daily, using data from Verisk Maplecroft (for sovereign issuers), RepRisk (for quasi-sovereign and corporate issuers), Sustainalytics, and Climate Bonds Initiative (CBI) as inputs. JESG construction takes into account the environmental and socio-ethical factors by excluding issuers operating in certain sectors, namely thermal coal, tobacco and weapons and any issuers in violation of the UN Global Compact principles. Sovereign issuers with JESG scores less than 30 are excluded from the benchmark. Quasi-sovereign and corporate issuers with JESG scores less than 20 are excluded from the benchmark. The methodology assigns an overweight to green bonds to incentivise sustainable financing aligned with climate change solutions.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, J.P. Morgan Corporate Emerging Market Bond Index Broad Diversified (the "ESG Reporting Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Advisor to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer’s business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer’s business practices contribute to an Environmental and/or Social Objective.; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock’s Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

***The EU Taxonomy sets out a ‘do not significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.***

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

***Any other sustainable investments must also not significantly harm any environmental or social objectives.***

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its carbon reduction target and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the fixed income transferable securities issued by companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets and included within the J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified (the "Index" and the securities comprised within it being the "Index Securities") in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing.

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described in the prospectus.

The Investment Adviser uses ESG analysis to help uncover material risks otherwise not frequently uncovered by conventional fundamental analysis. To undertake this analysis, the Investment Adviser leverages ESG insights from external providers such as MSCI and Sustainalytics, in conjunction with internal research that can involve issuer engagement to produce an internal ESG view and an ESG credit impact view that can be incorporated with credit fundamental assessments.

The Investment Adviser employs a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser seeks to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seeks to limit exposure to investments that are deemed to have associated negative externalities (e.g. issuers involved in controversial activities and issuers subject to UN sanctions).

To limit exposure to investments deemed to have associated negative externalities, the Investment Adviser applies exclusionary screens to the Fund's universe via the use of the JESG benchmark and EMEA baseline screens. The Investment Adviser also employs an ESG-focused qualitative and quantitative analysis to actively limit exposure to those investments.

To determine corporate issuers to have associated positive externalities, the Investment Adviser analyses issuers' s SDG revenue alignment. Use of proceeds instruments with positive environmental

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

and/or social impact such as green, social, and sustainable bonds are also deemed to have positive externalities.

All investable issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Advisor seeks to utilise the most relevant metrics, based on their expected materiality (i.e. the relevance that the metric can have on the issuer). Those indicators are analysed in parallel to fundamental qualitative analysis.

Analysis specific to EM sovereigns is incorporated to address biases, which can often be seen in traditional ESG Sovereign scoring. The Team focusses on (i) assessing countries vs. rating/income peers and (ii) looking for ESG improvers within peer groups. By focusing on peer groups and trends, the Investment Advisor seeks to reduce the bias that certain ESG metrics have in favour of countries with higher GDP per capita.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
- Application of the BlackRock EMEA Baseline Screens described above.
- Maintain that the Fund's carbon emissions intensity score is lower than that of the ESG Reporting Index.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Advisor, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Advisor agrees with this external assessment, the Investment Advisor is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Advisor's direct engagement with the issuer. The Investment Advisor may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the J.P. Morgan Corporate Emerging Market Bond Index Broad Diversified is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Emerging Markets Fixed Maturity Bond Fund 2027  
Legal entity identifier: 5299002WE7WDBUUFKW20**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. In addition, the Fund will seek to limit all exposure to issuers involved with the manufacturing and/or sale of conventional weapons. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
3. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)
- Energy consumption intensity per high impact climate sector
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing. The Fund uses a “buy and maintain” strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 50% of its Net Asset Value is invested in emerging markets corporate fixed income securities issued by companies domiciled in, or whose main business is in, emerging markets.
- up to 50% of the Fund's Net Asset Value can be invested in bonds and money market instruments (i.e. debt securities with short term maturities) that may be issued by governments and government agencies of, and supranationals domiciled in, or the main business of which is in, emerging markets.; and
- up to 50% of the Fund's Net Asset Value is invested in emerging markets fixed income securities which, at the time of purchase, are rated non-investment grade.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

1. Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
2. Application of the BlackRock EMEA Baseline Screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Emerging Markets Impact Bond Fund  
Legal entity identifier: 54930082CEG4U885EN40**

**Sustainable investment objective**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☒ **Yes**

☐ ☐ ☐ **No**

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 15%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What is the sustainable investment objective of this financial product?**

The Fund seeks to invest at least 80% of its total assets in a relatively concentrated global portfolio of “Green, Social and Sustainability” (GSS) bonds issued by governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets, where the proceeds of such GSS bonds are tied to green and socially responsible projects.

The Fund invests in “impact” investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return.

The Fund invests a minimum of 80% of its total assets in Sustainable Investments, across environmental and social objectives. The minimum for each Sustainable Investment objective is set out in the box above. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- minimum proportion of the issuer’s business activity contributes to an Environmental and/or Social Objective; or
- the issuer’s business practices contribute to an Environmental and/or Social Objective; or

- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

The Fund applies a set of exclusionary screens.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Investment Adviser intends to limit direct investment in securities of issuers which, in the opinion of the Investment Adviser: have any exposure to, or ties with, controversial weapons; derive more than five per cent of their revenue from the production, distribution, licensing, retail or supply of tobacco or tobacco-related products; the production or distribution of firearms or small arms ammunitions intended for retail civilians; are deemed to have failed to comply with one or more of the ten United Nation Global Compact Principles, which cover human rights, labour standards, the environment and anti-corruption.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.

- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— **How have the indicators for adverse impacts on sustainability factors been taken into account?**

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

This Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**What investment strategy does this financial product follow?**

The Fund invests in a relatively concentrated global portfolio of "Green, Social and Sustainability" (GSS) bonds issued by governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets, where the proceeds of such GSS bonds are tied to green and socially responsible projects.

The Fund invests in "impact" investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return. More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

For the selection of GSS bonds, the Investment Adviser will analyse the use of proceeds of the issues and the issuer framework for alignment of the bonds with the Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability Bond Guidelines (SBG) of the International Capital Markets Association to determine suitability within the investment universe.

For the entire portfolio, the Investment Adviser will base investment decisions on issuer specific research (such as sovereign and credit analysis comprising a multi factor framework assessing

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

global, country and issuer specific risk to determine issuers' ability and willingness to pay over the long term) to identify and select the GSS bonds and other fixed income securities that, in the opinion of the Investment Adviser, have the potential to produce attractive long-term returns whilst also being consistent with the United Nations Sustainable Development Goals ("UN SDGs"). The UN SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education, and economic growth, and a reduction in inequalities, all whilst tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: <https://www.un.org/sustainabledevelopment/sustainable-development-goals>).

For the selection of non-GSS bonds, including emerging market corporate bonds and sovereign bonds, the Investment Adviser will only invest in highly rated ESG bonds.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser also intends to limit direct investment in securities of issuers which, in the opinion of the Investment Adviser: have any exposure to, or ties with, controversial weapons; derive more than five per cent of their revenue from the production, distribution, licensing, retail or supply of tobacco or tobacco-related products; the production or distribution of firearms or small arms ammunitions intended for retail civilians; are deemed to have failed to comply with one or more of the ten United Nation Global Compact Principles ("UNGC"), which cover human rights, labour standards, the environment and anti-corruption.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The binding elements of the strategy are as follows:

- Maintain that all of the Fund's investments will be Sustainable Investments (save for instruments used for the purposes of liquidity management and/or hedging, which will not exceed 20% of the Fund's total assets). In relation to such Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Apply the exclusionary screens.
- Maintain that the investment strategy reduces the investment universe of the Fund by at least 20%. For the purposes of measuring this reduction only, a combination of the JP Morgan Emerging Markets Bond Index and JPMorgan Corporate Emerging Markets Bond Index is used to define the investment universe.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation and the minimum share of sustainable investments?

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

All of the Fund's investments will be Sustainable Investments or instruments used for the purposes of liquidity management and/or hedging. Investments used for the purposes of liquidity management and/or hedging will not exceed 20% of the Fund's total assets.

A minimum of 80% of the Fund's total assets will be invested in Sustainable Investments (#1 Sustainable). In relation to these Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Not sustainable).

### ● *How does the use of derivatives attain the sustainable investment objective?*

Where derivatives are used for investment purposes, they are assessed against the criteria for Sustainable Investments. Derivatives may also be used for limited other purposes such as liquidity and hedging, and any ESG rating or analyses referenced above will apply only to the underlying investment in respect of such derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of sustainable investments with a social objective?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

The use of such investments does not affect the delivery of the sustainable investment objective, as these investments are used for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to meet the sustainable investment objective?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Emerging Markets Sustainable Equity Fund  
Legal entity identifier: 549300LB6Q9I4FRKNM72**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 40% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity relative to the Index, which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions based on the enterprise value including cash (EVIC) across the Fund's holding of capital invested in a company across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities; the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI Emerging Markets Index (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's, environmental, social and governance (“ESG”) rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 40% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**What investment strategy does this financial product follow?**

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in, emerging markets in a manner consistent with the principles of sustainable investing.

The Investment Adviser applies the BlackRock EMEA Baseline Screens and other exclusionary criteria to the investable universe.

The Investment Adviser uses fundamental analysis to map companies' revenues and activities to environmental and social objectives to identify Sustainable Investments.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Investment Adviser uses its analysis to create a portfolio that seeks to deliver:

a superior ESG outcome versus the Index

a lower carbon emissions intensity score at least 20% lower than the Index; and

an allocation to Sustainable Investments

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes

The Investment Adviser ensures that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 40% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain the Fund's carbon emissions intensity as 20% lower than that of the Fund's Index.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 40% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What is the minimum share of socially sustainable investments?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

### Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No.

Please note that the MSCI Emerging Markets Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### Where can I find more product specific information online?

#### More product-specific information can be found on the website:

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: ESG Emerging Markets Blended Bond Fund  
Legal entity identifier: 549300QOEVPNM75H450**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Advisor will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Advisor. The Investment Advisor will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to J.P. Morgan Blended Emerging Market Bond Index (Sovereign) (the “ESG Reporting Index”) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power

generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

At least 70% of the Fund's total assets are invested in the investable universe as defined by the Index. The Index uses JP Morgan's ESG ("JESG") methodology. Normalised JESG Index Scores for issuers are calculated daily, using data from Verisk Maplecroft (for sovereign issuers), RepRisk (for quasi-sovereign and corporate issuers), Sustainalytics, and Climate Bonds Initiative (CBI) as inputs. JESG construction takes into account the environmental and socio-ethical factors by excluding issuers operating in certain sectors, namely thermal coal, tobacco and weapons and any issuers in violation of the UN Global Compact principles. Sovereign issuers with JESG scores less than 30 are excluded from the benchmark. Quasi-sovereign and corporate issuers with JESG scores less than 20 are excluded from the benchmark. The methodology assigns an overweight to green bonds to incentivise sustainable financing aligned with climate change solutions.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, J.P. Morgan Blended Emerging Market Bond Index (Sovereign) (the "ESG Reporting Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Advisor to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its exclusionary policy and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing.

The Fund invests at least 70% of its total assets in fixed income transferable securities issued by governments and government agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, denominated in both emerging market and non-emerging market currencies, and included within the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (the “Index”, and the securities comprised within it being the “Index Securities”).

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer’s ESG credentials within the Index and its broader ESG performance.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described in the prospectus.

ESG research is ingrained in research and in the security selection process. The Investment Adviser employs a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser seeks to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seeks to limit exposure to investments that are deemed to have associated negative externalities (e.g. issuers involved in controversial activities and issuers subject to UN sanctions).

To limit exposure to investments deemed to have associated negative externalities, the Investment Adviser applies exclusionary screens to the Fund’s universe via the use of the JESG benchmark and EMEA baseline screens.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Advisor also looks at a large number of ESG indicators and their direction, and uses proprietary frameworks comprised of qualitative and quantitative analysis to actively limit exposures to those investments.

To determine sovereign issuers deemed to have associated positive externalities, the Investment Adviser employs a framework specific to EM to assess sovereign issuers. Net-zero and governance-leading EM sovereigns are deemed to have positive externalities. Use of proceeds instruments with positive environmental and/or social impact such as green, social, and sustainable bonds are also deemed to have positive externalities.

All investable issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers including MSCI, Verisk Maplecroft, Sustainalytics, JP Morgan (JESG), BSSI, the UN and the World Bank, among others.

The Investment Advisor seeks to utilise the most relevant metrics, based on their expected materiality (i.e. the relevance that the metric can have on the issuer). Those indicators are analysed in parallel to fundamental qualitative analysis.

Analysis specific to EM sovereigns is incorporated to address biases, which can often be seen in traditional ESG Sovereign scoring. The Team focusses on (i) assessing countries vs. rating/income peers and (ii) looking for ESG improvers within peer groups. By focusing on peer groups and trends, the Investment Advisor seeks to reduce the bias that certain ESG metrics have in favour of countries with higher GDP per capita.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
- Apply the BlackRock EMEA Baseline Screens and exclusionary screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Advisor, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Advisor agrees with this external assessment, the Investment Advisor is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Advisor's direct engagement with the issuer. The Investment Advisor may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

## ● *How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?*

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What is the minimum share of socially sustainable investments?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

### Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No.

Please note that the J.P. Morgan Blended Emerging Market Bond Index (Sovereign) is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### Where can I find more product specific information online?

#### More product-specific information can be found on the website:

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: ESG Emerging Markets Bond Fund  
Legal entity identifier: 549300EJQVU7N2R7YO52**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Advisor will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Advisor. The Investment Advisor will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to J.P. Morgan Emerging Markets Bond Index Global Diversified (the “ESG Reporting Index”) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power

generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

At least 70% of the Fund's total assets are invested in the investable universe as defined by the Index. The Index uses JP Morgan's ESG ("JESG") methodology. Normalised JESG Index Scores for issuers are calculated daily, using data from Verisk Maplecroft (for sovereign issuers), RepRisk (for quasi-sovereign and corporate issuers), Sustainalytics, and Climate Bonds Initiative (CBI) as inputs. JESG construction takes into account the environmental and socio-ethical factors by excluding issuers operating in certain sectors, namely thermal coal, tobacco and weapons and any issuers in violation of the UN Global Compact principles. Sovereign issuers with JESG scores less than 30 are excluded from the benchmark. Quasi-sovereign and corporate issuers with JESG scores less than 20 are excluded from the benchmark. The methodology assigns an overweight to green bonds to incentivise sustainable financing aligned with climate change solutions.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, J.P. Morgan Emerging Markets Bond Index Global Diversified (the "ESG Reporting Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Advisor to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its exclusionary policy and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the fixed income transferable securities of governments and government agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, and included within the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (the “Index” and the securities comprised within it being “Index Securities”) in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing.

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer’s ESG credentials within the Index and its broader ESG performance.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described in the prospectus.

The Investment Adviser employs a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser seeks to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seeks to limit exposure to investments that are deemed to have associated negative externalities (e.g. issuers involved in controversial activities and issuers subject to UN sanctions).

To limit exposure to investments deemed to have associated negative externalities, the Investment Adviser applies exclusionary screens to the Fund’s universe via the use of the JESG benchmark and EMEA baseline screens.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Advisor also looks at a large number of ESG indicators and their direction, and uses proprietary frameworks comprised of qualitative and quantitative analysis to actively limit exposures to those investments.

To determine sovereign issuers deemed to have associated positive externalities, the Investment Adviser employs a framework specific to EM to assess sovereign issuers. Net-zero and governance-leading EM sovereigns are deemed to have positive externalities. Use of proceeds instruments with positive environmental and/or social impact such as green, social, and sustainable bonds are also deemed to have positive externalities.

All investable issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers.

The Investment Adviser seeks to utilise the most relevant metrics, based on their expected materiality (i.e. the relevance that the metric can have on the issuer). Those indicators analysed in parallel to fundamental qualitative analysis.

Analysis specific to EM sovereigns is incorporated to address biases, which can often be seen in traditional ESG Sovereign scoring. The Team focusses on (i) assessing countries vs. rating/income peers and (ii) looking for ESG improvers within peer groups. By focusing on peer groups and trends, the Investment Adviser seeks to reduce the bias that certain ESG metrics have in favour of countries with higher GDP per capita.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
- Apply the BlackRock EMEA Baseline Screens and exclusionary screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Advisor, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Advisor agrees with this external assessment, the Investment Advisor is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Advisor's direct engagement with the issuer. The Investment Advisor may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the J.P. Morgan Emerging Markets Bond Index Global Diversified is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Advisor will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Advisor. The Investment Advisor will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to J.P. Morgan -Government Bond Index Emerging Markets – Emerging Market Global Diversified (the “ESG Reporting Index”) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power

generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

At least 70% of the Fund's total assets are invested in the investable universe as defined by the Index. The Index uses JP Morgan's ESG ("JESG") methodology. Normalised JESG Index Scores for issuers are calculated daily, using data from Verisk Maplecroft (for sovereign issuers), RepRisk (for quasi-sovereign and corporate issuers), Sustainalytics, and Climate Bonds Initiative (CBI) as inputs. JESG construction takes into account the environmental and socio-ethical factors by excluding issuers operating in certain sectors, namely thermal coal, tobacco and weapons and any issuers in violation of the UN Global Compact principles. Sovereign issuers with JESG scores less than 30 are excluded from the benchmark. Quasi-sovereign and corporate issuers with JESG scores less than 20 are excluded from the benchmark. The methodology assigns an overweight to green bonds to incentivise sustainable financing aligned with climate change solutions.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, J.P. Morgan -Government Bond Index Emerging Markets – Emerging Market Global Diversified (the "ESG Reporting Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Advisor to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its exclusionary policy and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing.

The Fund invests at least 70% of its total assets in the fixed income transferable securities issued by governments of emerging markets, denominated in the local currency of such emerging markets countries and included within the J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (the “Index”), and the securities comprised within it being the “Index Securities”).

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer’s ESG credentials within the Index and its broader ESG performance.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described in the prospectus.

ESG research is ingrained in research and in the security selection process. The Investment Adviser employs a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser seeks to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seeks to limit exposure to investments that are deemed to have associated negative externalities (e.g. issuers involved in controversial activities and issuers subject to UN sanctions).

To limit exposure to investments deemed to have associated negative externalities, the Investment Adviser applies exclusionary screens to the Fund’s universe via the use of the JESG benchmark and EMEA baseline screens.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Advisor also looks at a large number of ESG indicators and their direction, and uses proprietary frameworks comprised of qualitative and quantitative analysis to actively limit exposures to those investments.

To determine sovereign issuers deemed to have associated positive externalities, the Investment Adviser employs a framework specific to EM to assess sovereign issuers. Net-zero and governance-leading EM sovereigns are deemed to have positive externalities. Use of proceeds instruments with positive environmental and/or social impact such as green, social, and sustainable bonds are also deemed to have positive externalities.

All investable issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers including MSCI, Verisk Maplecroft, Sustainalytics, JP Morgan (JESG), BSSI, the UN and the World Bank, among others.

The Investment Advisor seeks to utilise the most relevant metrics, based on their expected materiality (i.e. the relevance that the metric can have on the issuer). Those indicators are analysed in parallel to fundamental qualitative analysis.

Analysis specific to EM sovereigns is incorporated to address biases, which can often be seen in traditional ESG Sovereign scoring. The Team focusses on (i) assessing countries vs. rating/income peers and (ii) looking for ESG improvers within peer groups. By focusing on peer groups and trends, the Investment Advisor seeks to reduce the bias that certain ESG metrics have in favour of countries with higher GDP per capita.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Advisor, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Advisor agrees with this external assessment, the Investment Advisor is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Advisor's direct engagement with the issuer. The Investment Advisor may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the J.P. Morgan -Government Bond Index Emerging Markets – Emerging Market Global Diversified is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: ESG Multi-Asset Fund  
Legal entity identifier: 54930062W9V3JFFCZF32**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

Greenhouse gas emissions are categorised into three groups or "scopes" by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity of the portfolio relative to the Index (as defined below), which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund applies a set of exclusionary screens.

The Investment Adviser also intends to limit direct investment in securities of issuers that derive 5% or more of their revenue from the production of alcohol related products; the ownership or operation of gambling-related business activities; the production of adult entertainment material, or that generate 5% or more of total electricity from nuclear power in a given year, or have 5% or more of installed capacity attributed to nuclear sources in a given fiscal year. The Investment Adviser further intends to limit direct investment in securities of issuers that derive 15% or more

of aggregate revenue from (i) the production, distribution retail, and supply of alcohol-related products; (ii) from the production, distribution and retail of adult entertainment materials, (iii) from gambling-related business activities; (iv) from nuclear power activities. The Investment Adviser will exclude any issuer with a MSCI ESG rating below BBB. The Investment Adviser also intends to limit investments in companies within the Global Industry Classification Standard (GICS) Oil & Gas Exploration & Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets.

The Fund applies exclusionary screens in accordance with the French SRI label requirements (as described in the section headed “The French SRI label” of this Prospectus).

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, 25% MSCI World Index (hedged to EUR), 25% MSCI World Index and 50% Bloomberg Global Aggregate Bond Index (hedged to EUR) (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's, environmental, social and governance (“ESG”) rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

- ☒ Yes  
☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

The Fund achieves a better result than the Index for the following two PAIs:

GHG intensity of investee companies

Exposure to companies active in the fossil fuel sector

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund invests globally in the full spectrum of permitted investments including equities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments. The Fund follows an asset allocation policy that seeks to maximise total return in a manner consistent with the principles of ESG focused investing. The Investment Adviser seeks to invest in Sustainable Investments.

The Investment Adviser applies exclusionary screens to the portfolio. These encompass the BlackRock EMEA Baseline Screens in addition to limits on direct investment in securities of issuers involved in the production, distribution or licensing of alcoholic products; the ownership or operation of gambling-related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser also intends to limit investments in companies within the Global Industry Classification Standard (GICS) Oil & Gas Exploration & Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets.

More than 90% of the issuers of securities in which the Fund invests are ESG rated or have been analysed for ESG purposes

The weighted average ESG rating of the Fund will be higher than the ESG rating of the risk Index after eliminating at least 25% of the least well-rated securities from the Index. The Investment Adviser also intends the Fund to have a carbon emissions intensity score that is lower than the Index.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 25% of the lowest rated securities from the Index.
- Maintain that the Fund's carbon emissions intensity score is lower than that of the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.
- Limit investments in companies within the Global Industry Classification Standard (GICS) Oil & Gas Exploration & Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Please note that the 25% MSCI World Index (hedged to EUR), 25% MSCI World Index and 50% Bloomberg Global Aggregate Bond Index (hedged to EUR) is used to compare certain ESG characteristics promoted by the Fund.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Bond Fund  
Legal entity identifier: 549300KZI1OJWARMMP28**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers

involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, Bloomberg Euro-Aggregate Index (80%) and Bloomberg Global Aggregate Index (20%) (the “ESG Reporting Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund’s holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
2. The Fund’s ESG rating, which is the weighted average of ESG scores of the Fund’s holdings, as described above.
3. The Fund’s exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.
4. The Fund’s consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its exclusionary policy.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

### **What investment strategy does this financial product follow?**

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) investing.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.

The weighted average ESG rating of the corporate portion of the Fund will be higher than the ESG rating of the corporate portion of the ESG Reporting Index.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
2. Maintain weighted average ESG rating of the corporate portion of the Fund higher than the ESG rating of the corporate portion of the ESG Reporting Index.
3. Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
4. Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

Please note that the Bloomberg Euro-Aggregate Index (80%) and Bloomberg Global Aggregate Index (20%) are used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its exclusionary policy.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

#### **What investment strategy does this financial product follow?**

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") investing.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

#### **Good governance**

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

Please note that the Bloomberg Euro Corporate Index (80%) and Bloomberg US Corporate Index (20%) are used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### **Where can I find more product specific information online?**

#### **More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Flexible Income Bond Fund  
Legal entity identifier: 549300WDKF3XK5N3KS37**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers

involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

- ☒ Yes
- ☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its exclusionary policy and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What investment strategy does this financial product follow?**

The investment objective of the Fund is to maximize income by primarily investing in debt and income-producing securities while seeking to maintain long term capital growth in a manner that is consistent with the principles of ESG investing. The Fund is actively managed and the Investment Adviser has full discretion to select the Fund's investments.

To achieve this objective, the Fund's currency exposure will be flexibly managed, and the Fund invests at least 70% of its total assets in fixed income transferable securities denominated in various currencies, mainly in Euro denominated securities, issued by governments, agencies and companies worldwide. The Fund may invest in non-investment grade securities and may allocate up to 60% of its total assets in Asset-Backed securities (ABS) and Mortgage-Backed securities (MBS). The Fund may use derivatives for investment purposes and for efficient portfolio management.

The Fund's investment process relies on four key themes in its ESG investment approach. Firstly, BlackRock EMEA Baseline Screens are applied. Secondly, the Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities including limiting direct investment in securities of issuers involved in the ownership or operation of gambling related activities or facilities, production, supply and mining activities related to nuclear power and production of adult entertainment materials. The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials. Lastly, the Fund will maintain an allocation to green bonds as defined by the Investment Adviser's proprietary green bond methodology, which is guided by the ICMA Green Bond Principles. the Fund will maintain an allocation to green bonds as defined by the Investment Adviser's proprietary green bond methodology, which is guided by the ICMA Green Bond Principles.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities while limiting investments that are deemed to have associated negative externalities.
- Application of the BlackRock EMEA Baseline Screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**What is the asset allocation planned for this financial product?**

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 30% of its total assets in other investments ('#2 Other').

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro High Income Fixed Maturity Bond Fund 2028  
Legal entity identifier: 529900CQNRCTRR2VQM54**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Does this financial product consider principal adverse impacts on sustainability factors?**

- ☒ Yes
- ☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector

- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to provide a high level of income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 40% of its Net Asset Value is invested in high yield fixed income securities denominated in various currencies and issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe, which at the time of purchase, be rated B or BB or equivalent rating.

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
- Application of the BlackRock EMEA Baseline Screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro High Income Fixed Maturity Bond Fund 2029  
Legal entity identifier: 529900GSIZORIR8W9B61**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

- ☒ Yes  
☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector

- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to provide a high level of income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 40% of its Net Asset Value is invested in high yield fixed income securities denominated in various currencies and issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe, which at the time of purchase, be rated B or BB or equivalent rating. The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
- Application of the BlackRock EMEA Baseline Screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

#### Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

#### **What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro High Yield Fixed Maturity Bond Fund 2027  
Legal entity identifier: 529900M7BKCCZ7Z11H58**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. In addition, the Fund will seek to limit all exposure to issuers involved with the manufacturing and/or sale of conventional weapons. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
3. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)
- Energy consumption intensity per high impact climate sector
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What investment strategy does this financial product follow?**

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing. The Fund uses a “buy and maintain” strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period, at least 50% of its Net Asset Value is invested in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. Such fixed income securities shall, at the time of purchase, shall be rated B or BB or equivalent rating.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

1. Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
2. Application of the BlackRock EMEA Baseline Screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro High Yield Fixed Maturity Bond Fund 2028  
Legal entity identifier: 529900GNZ3XEVROLD577**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

- ☒ Yes  
☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector

- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG” focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 50% of its Net Asset Value is invested in high yield fixed income securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. Such fixed income securities shall, at the time of purchase, be rated B or BB or equivalent rating.

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
- Application of the BlackRock EMEA Baseline Screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Income Fixed Maturity Bond Fund 2029  
Legal entity identifier: 529900FQT8B9KGAZJZ96**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund seeks to address key environmental and social issues deemed to be relevant to sovereign bond issuers using the BlackRock Sovereign Sustainability Index ("BSSI") and the J.P. Morgan ESG ("JESG") sovereign scoring framework. The Fund will exclude sovereign bonds that score less than or equal to 2.0 in the BSSI or are in the bottom quintile of the JESG sovereign scoring framework.

The BSSI ranks sovereign debt issuers based on a country's overall sustainability measures from an environmental, social and governance perspective using UN Sustainable Development goals to guide factor selection. Environmental factors include carbon performance and climate policy as well as other environmental factors such as air quality and wastewater treatment. Social factors include equality, public health and other socioeconomic issues. The BSSI also incorporates factors such as peacefulness within its methodology.

The JESG sovereign scoring framework assesses countries based on a range of environmental, social and governance indicators, using data from international organisations and J.P. Morgan's own research. ESG scores are assigned to each country and reflect factors such as climate risk,

natural resource management, human development, institutional strength and corruption. Countries are ranked relative to a defined universe of sovereign issuers, and those in the lowest quintile are excluded from the Fund's investable universe.

The Fund also invests a minimum of 10% of its sovereign bond asset allocation in sustainable investments, across environmental and social objectives.

In respect of investments in fixed income securities other than sovereign bonds, the Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in corporate issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.
- ESG scores from the JESG sovereign scoring framework, with the bottom quintile of countries excluded from the investment universe.
- BSSI scores, with sovereign issuers scoring below 2.0 excluded.
- The proportion of sovereign holdings that qualify as sustainable investments, to ensure a minimum of 10% of net assets held in those securities are sustainable investments.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 10% of its holdings in sovereign issuers in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade. The fund will apply the following ESG policy following the Ramp-up Period.

In respect of investments in fixed income securities other than sovereign bonds, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- With respect to sovereign bonds, to maintain that the Fund holds at least 10% in Sustainable Investments in relation to such Sustainable Investments.
- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.

- Application to corporate issuers of the BlackRock EMEA Baseline Screens described above.
- The exclusion of sovereign issuers that have a BSSI score below 2.0 or are in the bottom quintile of the JESG sovereign scoring framework.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Income Fixed Maturity Bond Fund 2030  
Legal entity identifier: 529900FBODYYN89VZQ31**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund seeks to address key environmental and social issues deemed to be relevant to sovereign bond issuers using the BlackRock Sovereign Sustainability Index ("BSSI") and the J.P. Morgan ESG ("JESG") sovereign scoring framework. The Fund will exclude sovereign bonds that score less than or equal to 2.0 in the BSSI or are in the bottom quintile of the JESG sovereign scoring framework.

The BSSI ranks sovereign debt issuers based on a country's overall sustainability measures from an environmental, social and governance perspective using UN Sustainable Development goals to guide factor selection. Environmental factors include carbon performance and climate policy as well as other environmental factors such as air quality and wastewater treatment. Social factors include equality, public health and other socioeconomic issues. The BSSI also incorporates factors such as peacefulness within its methodology.

The JESG sovereign scoring framework assesses countries based on a range of environmental, social and governance indicators, using data from international organisations and J.P. Morgan's own research. ESG scores are assigned to each country and reflect factors such as climate risk,

natural resource management, human development, institutional strength and corruption. Countries are ranked relative to a defined universe of sovereign issuers, and those in the lowest quintile are excluded from the Fund's investable universe.

The Fund also invests a minimum of 10% of its sovereign bond asset allocation in sustainable investments, across environmental and social objectives.

In respect of investments in fixed income securities other than sovereign bonds, the Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in corporate issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.
- ESG scores from the JESG sovereign scoring framework, with the bottom quintile of countries excluded from the investment universe.
- BSSI scores, with sovereign issuers scoring below 2.0 excluded.
- The proportion of sovereign holdings that qualify as sustainable investments, to ensure a minimum of 10% of net assets held in those securities are sustainable investments.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 10% of its holdings in sovereign issuers in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade. The fund will apply the following ESG policy following the Ramp-up Period.

In respect of investments in fixed income securities other than sovereign bonds, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- With respect to sovereign bonds, to maintain that the Fund holds at least 10% in Sustainable Investments in relation to such Sustainable Investments.
- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.

- Application to corporate issuers of the BlackRock EMEA Baseline Screens described above.
- The exclusion of sovereign issuers that have a BSSI score below 2.0 or are in the bottom quintile of the JESG sovereign scoring framework.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. In addition, the Fund will seek to limit all exposure to issuers involved with the manufacturing and/or sale of conventional weapons. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
3. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)
- Energy consumption intensity per high impact climate sector
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What investment strategy does this financial product follow?**

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing. The Fund uses a “buy and maintain” strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 75% of its Net Asset Value is invested in corporate fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets and denominated in Euro. Such fixed income securities shall, at the time of purchase, be rated investment grade; and
- up to 25% of the Fund's Net Asset Value is invested in global fixed income securities which, at the time of purchase, are rated non-investment grade.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

1. Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
2. Application of the BlackRock EMEA Baseline Screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Short Duration Bond Fund  
Legal entity identifier: 549300JYR6VTF0DCD019**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers

involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, Bloomberg Euro-Aggregate Index (1-3 Years) (80%) and Bloomberg Global Aggregate Index (1-3 Years) (20%) (the “ESG Reporting Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund’s holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
2. The Fund’s ESG rating, which is the weighted average of ESG scores of the Fund’s holdings, as described above.
3. The Fund’s exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.
4. The Fund’s consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its exclusionary policy.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

### **What investment strategy does this financial product follow?**

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) investing.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.

The weighted average ESG rating of the corporate portion of the Fund will be higher than the ESG rating of the corporate portion of the ESG Reporting Index.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Enhancing exposure to investments that are deemed to have associated positive externalities, compared to the Fund's ESG Reporting Index while limiting investments that are deemed to have associated negative externalities.
2. Maintain weighted average ESG rating of the corporate portion of the Fund higher than the ESG rating of the corporate portion of the ESG Reporting Index.
3. Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
4. Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of investments in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the Bloomberg Euro-Aggregate Index (1-3 Years) (80%) and Bloomberg Global Aggregate Index (1-3 Years) (20%) are used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro-Markets Fund  
Legal entity identifier: 549300GXUXRC34JGKL97**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in those EU Member States participating in EMU. Other exposure may include, without limitation, investments in those EU Member States that, in the opinion of the Investment Adviser, are likely to join EMU in the foreseeable future and companies based elsewhere that exercise the predominant part of their economic activity in EMU-participating countries. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European Equity Income Fund  
Legal entity identifier: 549300EO4UBXXE7L7Y87**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in equity securities of companies domiciled in, or exercising the predominant part of their economic activity in Europe. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European Equity Transition Fund  
Legal entity identifier: 549300G4IU6YIF26IE36**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund promotes environmental and social characteristics by investing in assets that align to the principles of the transition theme (as defined in more detail below). As well as being aligned to the principles of the transition theme, at least 80% of the Fund's total assets will be invested in companies which qualify under BlackRock's 'Transition Assessment' methodology.

The Fund will invest in line with the principles of the transition theme as determined by the Investment Adviser (having regard to specialist third party information sources as appropriate). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalization. The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

This Fund applies the EU Climate Transition Benchmark Exclusions.

The Fund promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the

10 UN Global Compact Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Climate Transition Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI Europe Index TR (Net) (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments aligned to the transition theme and assessed using BlackRock's 'Transition Assessment' methodology as described in more detail below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.
- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through its alignment to the transition theme and the application of its exclusionary policy.

The Fund takes into account the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**What investment strategy does this financial product follow?**

The Fund invests in equities or equity-related securities of companies that contribute to the advancement of the transition theme.

The Investment Adviser will identify a universe of potential investments within the following categories of companies – consistent with the principles of the transition theme:

Improvers: companies demonstrating positive progress or commitment to reducing the carbon emissions intensity of their operations;

Enablers: companies that enable and facilitate the transition to a lower carbon economy;

Leaders: companies that are already considered within their respective sectors as leaders in carbon reduction.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

Having determined those companies which meet the principles of the transition theme, the Fund will further apply BlackRock's proprietary 'Transition Assessment' methodology to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.

Investments that qualify under BlackRock's 'Transition Assessment' methodology must demonstrate they are on a clear and measurable transition path, either because the issuer (1) provides products and services to facilitate low carbon transition in the broader economy; or (2) is on a low carbon transition itself. Such qualifying investments must meet one or more of the following criteria:

#### Issuers facilitating low carbon transition

- Investee companies which earn at least 20% of their annual revenues from activities with positive environmental impact and / or align with climate mitigation and adaption. Qualifying revenue streams are based on data vendor methodologies and / or BlackRock research for sustainable revenue identification.  
*Example: issuers that gain sufficient revenue from the manufacture of solar panels, solar cells, generation of power from solar sources, or the production / mining of metal required in such process.*
- Investments in companies with business models which are well positioned for or potential leaders in the low carbon transition.  
*Example: renewable energy producers, software enablers for transition.*

#### Transitioning issuers

- Investee companies decarbonising their operations which have established climate targets and commitments using data from the Science Based Targets Initiative (SBTi); and/or Investee companies which have been determined by the Investment Adviser as credible carbon reducers and are expected to demonstrate significant progress towards decarbonizing their operations; and/or investee companies have quantitative target identification data from data vendors – where such targets and commitments are monitored by accessing company data supplied by data vendors.  
*Example: companies at different stages of a Net Zero business plan with a validated target to improve their carbon emissions intensity.*
- Investee companies otherwise transitioning their business model and operations and identified through the use of well-established vendor data models as a company with implied temperature outcomes consistent with a clear and measurable path to transition.  
*Example: companies with lower implied temperature measures due to their projected trend of decarbonisation or current lower carbon economic activities.*

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

#### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 80% in investments which align to the BlackRock's 'Transition Assessment' methodology (as described above).
- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Application of the exclusionary screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No. Please note that MSCI Europe Index TR (net) is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European Fund  
Legal entity identifier: 549300NNK67YCMW4S660**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European High Yield Bond Fund  
Legal entity identifier: 549300IZEHZ1BN5OFU72**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.

The Fund will apply the BlackRock EMEA Baseline Screens.

Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European Multi-Asset Income Fund  
Legal entity identifier: 549300EH1PC6M8ZB0B86**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers

involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund applies a set of exclusionary screens.

The Investment Adviser will limit direct investment in securities of issuers involved in the ownership or operation of gambling-related activities or facilities; and production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, the investable universe is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share in non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund follows a flexible asset allocation policy that seeks an above average income without sacrificing long-term capital growth. The Fund seeks to invest at least 70% of its assets, directly and indirectly through permitted investments in securities of companies domiciled in or exercising the predominant part of their economic activity in Europe.

The Investment Adviser applies exclusionary screens to the portfolio. These encompass the BlackRock EMEA Baseline Screens in addition to limits on direct investment in securities of issuers involved in; the ownership or operation of gambling-related activities or facilities; and production of adult entertainment materials.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European Special Situations Fund  
Legal entity identifier: 549300HWH5C0EBD7MS76**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activities in, Europe. The Fund places particular emphasis on “special situations” companies that, in the opinion of the Investment Adviser, are companies with potential for improvement that the market has failed to appreciate. Such companies generally take the form of small, mid or large capitalisation companies that are undervalued and exhibit growth investment characteristics, such as above average growth rates in earnings or sales and high or improving returns on capital. In some cases such companies can also benefit from changes in corporate strategy and business restructuring. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: European Sustainable Equity Fund  
Legal entity identifier: 549300FPZK8Q36WIPB73**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 50% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3 includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity relative to the Index, which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions based on the enterprise value including cash (EVIC) across the Fund's holding of capital invested in a company across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production

and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities; the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI Europe Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Fund invests at least 50% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, other exclusionary screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock’s DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

### **What investment strategy does this financial product follow?**

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in Europe, in a manner consistent with the principles of sustainable investing.

The Investment Adviser applies the BlackRock EMEA Baseline Screens and other exclusionary criteria to the investable universe.

The Investment Adviser applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser uses fundamental analysis to map companies’ revenues and activities to environmental and social objectives to identify Sustainable Investments.

The investment decisions are based on the Investment Adviser’s fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser’s conviction to deliver the Fund’s investment objective.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. The Investment Adviser engages with companies to support improvement in their environmental, social and governance (“ESG”) credentials.

The Investment Adviser uses its analysis to create a portfolio that seeks to deliver:

a lower carbon emissions intensity score at least 20% lower than the Index; and

an allocation to Sustainable Investments

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 50% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain the Fund's carbon emissions intensity as 20% lower than that of the Fund's Index.
- Apply the BlackRock EMEA Baseline Screens and exclusionary screens.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 50% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other investments**).

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the MSCI Europe Index is to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). **Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. The Fund places particular emphasis on companies that are, in the opinion of the Investment Adviser, undervalued and therefore represent intrinsic investment value.

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: FinTech Fund  
Legal entity identifier: 549300QETL4YMSWPEO04**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied in financial services. The Fund will focus on companies that generate revenues from the application of technology in the financial services industry sector and/or which aim to compete with traditional methods in the operation and distribution of financial products and services. In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation that are involved in activities including the following: payment systems, banking, investments, lending, insurance and software. Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Future Of Transport Fund  
Legal entity identifier: 549300Y7OU6TK8YJHB08**

**Sustainable investment objective**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☒ **Yes**

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 15%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ It will make a minimum of **sustainable investments with a social objective: 1%**

☐ ☐ ☐ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What is the sustainable investment objective of this financial product?**

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied to transport.

The Fund will focus on companies that generate revenues from the transition to a lower carbon transportation system such as electric, autonomous and/or digitally connected vehicles.

The Fund invests a minimum of 80% of its total assets in Sustainable Investments, across environmental and social objectives. The minimum for each Sustainable Investment objective is set out in the box above. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) a minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

The Fund considers key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and

management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI All Countries World Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's ESG rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

- **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

This Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

#### **What investment strategy does this financial product follow?**

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied to transport.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund will focus on companies that generate revenues from the transition to a lower carbon transportation system such as electric, autonomous and/or digitally connected vehicles.

In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation that are involved in activities including the following: raw materials (e.g. metals and battery materials), components and computer systems (e.g. batteries and cabling), technology (e.g. vehicle sensor technology) and infrastructure (e.g. vehicle battery charging stations). The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with renewable energy and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. The Investment Adviser considers such companies to be Sustainable Investments.

The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fund adopts a “best in class” approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Investment Adviser uses its analysis to create a portfolio that has a higher ESG rating than the Index after eliminating at least 20% of the least well-rated securities from the Index.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The binding elements of the investment strategy are as follows:

- Maintain that all of the Fund's investments will be Sustainable Investments (save for instruments used for the purposes of liquidity management and/or hedging, which will not exceed 20% of the Fund's total assets). In relation to such Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.
- Application of the exclusionary screens described above.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation and the minimum share of sustainable investments?

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

All of the Fund's investments will be Sustainable Investments or instruments used for the purposes of liquidity management and/or hedging. Investments used for the purposes of liquidity management and/or hedging will not exceed 20% of the Fund's total assets.

A minimum of 80% of the Fund's total assets will be invested in Sustainable Investments (#1 Sustainable). In relation to these Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Not sustainable).

### ● *How does the use of derivatives attain the sustainable investment objective?*

Where derivatives are used for investment purposes, they are assessed against the criteria for Sustainable Investments. Derivatives may also be used for limited other purposes such as liquidity and hedging, and any ESG rating or analyses referenced above will apply only to the underlying investment in respect of such derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of sustainable investments with a social objective?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

The use of such investments does not affect the delivery of the sustainable investment objective, as these investments are used for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to meet the sustainable investment objective?**

No.

Please note that the MSCI All Countries World Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global Equity Income Fund  
Legal entity identifier: 5493003EIFVTQB3EDS83**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
3. The Fund's holdings of underlying MMFs meeting the above criteria.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to invest in Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets.

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 30% of its total assets in other investments (#2 Other investments).

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middle-east-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global Government Bond Fund  
Legal entity identifier: 549300ZROVR8S4X5V054**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 10% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment

in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, FTSE World Government Bond USD Hedged Index (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings in Sustainable Investments, as described above.
2. The Fund's holdings in use-of-proceeds bonds, including “green bonds”, “sustainable bonds” and “social bonds” (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
3. The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities, as described above.
4. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
5. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Fund invests at least 10% of its holdings in Sustainable Investments. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its exclusionary policy and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What investment strategy does this financial product follow?**

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond principles) and "Green, Social and Sustainability" (GSS) bonds issued by governments and agencies of, and companies, where the proceeds of such GSS bonds are tied to green and socially responsible projects.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Maintain that the Fund holds at least 10% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
2. Enhancing exposure to investments that are deemed to have associated positive externalities while limiting investments that are deemed to have associated negative externalities, compared to the Fund's investment universe.
3. Apply the BlackRock EMEA Baseline Screens and exclusionary screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**What is the asset allocation planned for this financial product?**

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 10% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 30% of its total assets in other investments (#2 Other investments).

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of investments in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

- **What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the FTSE World Government Bond USD Hedged Index is to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not applicable.

- **How does the designated index differ from a relevant broad market index?**

Not applicable.

- **Where can the methodology used for the calculation of the designated index be found?**

Not applicable.

### **Where can I find more product specific information online?**

#### **More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global High Yield Bond Fund  
Legal entity identifier: 549300FVQG82AXR0U687**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests globally at least 70% of its total assets in high yield fixed income transferable securities. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.

The Fund will apply the BlackRock EMEA Baseline Screens.

Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global Listed Infrastructure Fund  
Legal entity identifier: 529900C4E5S48ZMHTN20**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests at least 70% of its total assets in infrastructure companies globally that are facilitating and enabling the transition to a low carbon economy.

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund applies a set of exclusionary screens.

The Fund will apply a custom ESG screen which incorporates multiple components. First, a screen is used to limit or exclude direct investment (as applicable) in corporate issuers which, in the opinion of the Investment Adviser: have any exposure to, or ties with, controversial weapons or conventional weapons; the production, distribution, licensing, retail or supply of tobacco or tobacco-related products; the production or distribution of firearms or small arms ammunitions intended for retail civilians; are deemed to have failed to comply with one or more of the ten United Nation Global Compact Principles ("UNGC"), which cover human rights, labour standards, the environment and anti-corruption.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in the extraction of, or the generation of power using, thermal coal or tar sands (also known as oil sands).

The Investment Adviser may invest in the securities of issuers with higher levels of revenue from these activities if the issuer has committed to a net zero transition plan and forward-looking capital expenditure plans do not include investment in new coal- powered generation assets.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments aligned to the transitioning infrastructure theme, as described above.
- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of its carbon reduction target and its exclusionary policy.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

#### **What investment strategy does this financial product follow?**

The Fund will aim to invest in line with the principles of the transition theme as determined by the Investment Adviser (having regard to specialist third party information sources as appropriate). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation, across the Infrastructure sectors, that contribute to the advancement of the transition theme across three categories:

Improvers: companies demonstrating positive progress in reducing the carbon emissions intensity of their operations.

**Solution Providers:** companies that enable and facilitate countries and societies transition towards net zero. These companies may be assessed on how they facilitate the reduction of carbon (e.g. electricity grids that provide the transmission and distribution of renewable energy) or enable the transition to net zero.

**Peer Group Leaders:** companies that are already considered within their respective sectors as carbon operations leaders.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain that the Fund holds at least 70% in investments aligned to the transitioning infrastructure theme.
- Application of the exclusionary screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 30% of its total assets in other investments (**#2 Other**).

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global Long-Horizon Equity Fund  
Legal entity identifier: 549300UI1W5KUOTB6B84**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests globally, with no prescribed country, regional or capitalisation limits, at least 70% of its total assets in equity securities. The Fund may invest in equity securities that, in the opinion of the Investment Adviser, have a sustained competitive advantage and will typically be held over a long-term horizon. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global Securitised Fund  
Legal entity identifier: 529900XVDW0WIIQIG1V30**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund applies an ESG investing policy (as described below) when selecting the securities to be held directly by the Fund, and in doing so, the Fund aims to meet the environmental and social criteria referred to below.

A minimum of 80% of the Fund's total assets will be invested in assets that are aligned with such environmental and/or social criteria.

A maximum of 20% of the portfolio may consist of assets that are not aligned with such environmental and social criteria. Such assets will include only cash and cash equivalents (other than the Institutional Cash Series plc LEAF), derivatives and Unscreened CLO Issuers (as later defined).

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Investment Selection Based on Assessment of Externalities**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser.

The Investment Adviser will seek to enhance exposure to (i) investments that are deemed to have associated positive externalities (e.g. issuers with lower carbon emissions or positive ESG credentials) and (ii) investments that are not deemed to have any explicit positive impact characteristics but have no associated negative externalities either (e.g. issuers with average carbon emissions or neutral ESG credentials). The Fund will invest at least 50% of its portfolio in such investments.

The Fund will not purchase securities that are deemed by the Investment Adviser to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). If a security held by the Fund is reclassified by the Investment Adviser as having such negative associated externalities after the point of purchase, the Fund will divest of such security as soon as reasonably possible and practicable without requiring a forced or distressed sale.

### **Additional Screens for CLOs**

The Investment Adviser intends to limit, to the extent sufficient data is available to do so, direct investment in CLO issuers which are identified as being involved in certain activities as summarized below, namely CLO issuers which:

- are engaged in, or are otherwise exposed to, the production of controversial weapons (including cluster munitions, biological-chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons);
- derive any revenue from direct involvement in the production of nuclear weapons, nuclear weapon components or delivery platforms or the provision of auxiliary services related to nuclear weapons;
- produce civilian firearms and/or civilian small arms ammunitions intended for retail to civilians;
- have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anticorruption);
- are engaged in the production of tobacco;
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from retail distribution of small arms intended for civilian use;
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from thermal coal extraction or power generation, or oil tar sands production (also known as oil sands);
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from tobacco distribution, retail, and supply of certain tobacco-related products; and
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from adult entertainment materials or services.

These additional screens for CLOs will be applied to CLO issuers only to the extent that sufficient ESG data is available. Where sufficient data is not available to screen a CLO issuer (an “Unscreened CLO Issuer”), the Fund may hold the Unscreened CLO Issuer provided such Unscreened CLO Issuers, together with cash, cash equivalents (excluding holdings in Institutional Cash Series plc LEAF) and derivatives do not comprise more than 20% of the assets of the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a ‘do not significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of its exclusionary policy.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 80% of its total assets in investment grade tranches of global securitised assets at the point of purchase.

The Fund will seek to achieve its objective by investing in global securitised assets including, but not limited to, ABS, RMBS, Agency MBS, CMBS, and CLOs. The Fund may invest up to 30% of its total assets in CLOs.

The Fund will apply an ESG investing policy (as described below) when selecting the securities to be held directly by the Fund, and in doing so, the Fund aims to meet the environmental and social criteria referred to below.

A minimum of 80% of the Fund's total assets will be invested in assets that are aligned with the environmental and/or social criteria.

A maximum of 20% of the portfolio may consist of assets that are not aligned with such environmental and social criteria. Such assets will include only cash and cash equivalents (other than the Institutional Cash Series plc LEAF), derivatives and Unscreened CLO Issuers (as later defined).

### **Proprietary ESG externalities framework**

The Investment Adviser categorizes securities by their “externalities”. Externalities are defined as the cost (or benefit) to a third party from an action undertaken by a different party. According to the Investment Adviser's proprietary ESG framework, the parties taking action are ‘issuers’ and the third party bearing the cost (or benefit) is broader society and the environment.

The four categories of issuers by their “externalities” are as follows:

- “Positive externalities” or “PEXT”: Issuers or securities associated with some positive environmental or social impact, highlighted as preferred holdings. Includes lower carbon emitting issuers and issuers with positive ESG credentials.
- “Baseline externalities” or “BEXT”: Issuers or securities that do not have any explicit positive impact characteristics but have no associated negative externalities either, are defined as neutral. Includes average carbon emitting issuers and those with neutral ESG credentials.
- “Discussion externalities” or “DEXT”: Where externalities of issuers or securities are unclear or potentially marginally negative (e.g. because of inadequate disclosures or limited track record),
- “Negative externalities” or “NEXT”: Issuers associated with manifestly negative environmental or social impact that are consequently avoided for ESG portfolios.

The Fund will invest at least 50% of its portfolio in securities classified by the Investment Adviser as PEXT or BEXT. The Fund will not purchase securities classified by the Investment Adviser as “NEXT”. Securities eligible for investment by the Fund that are not classified by the Investment Adviser as PEXT, BEXT or NEXT shall be classified as DEXT.

### **Additional screens for CLOs:**

The Investment Adviser intends to limit, to the extent sufficient data is available to do so, direct investment in CLO issuers which are identified as being involved in certain activities as summarized below, namely CLO issuers which:

- are engaged in, or are otherwise exposed to, the production of controversial weapons (including cluster munitions, biological-chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons);
- derive any revenue from direct involvement in the production of nuclear weapons, nuclear weapon components or delivery platforms or the provision of auxiliary services related to nuclear weapons;
- Produce, or are exposed to issuers that produce, civilian firearms and/or civilian small arms ammunitions intended for retail to civilians;
- have themselves, or whose underlying issuers have, been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anticorruption);

- are engaged in the production of tobacco;
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from retail distribution of small arms intended for civilian use;
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from thermal coal extraction or power generation, or. oil tar sands production (also known as oil sands);
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from. tobacco distribution, retail, and supply of certain tobacco-related products; and
- have in aggregate more than 5% of their assets exposed to issuers which individually derive more than 5% of their revenues from adult entertainment materials or services.

The additional screens for CLOs will be applied to CLO issuers only to the extent that sufficient ESG data is available. Where sufficient data is not available to screen a CLO issuer (an “Unscreened CLO Issuer”), the Fund may hold the Unscreened CLO Issuer provided such Unscreened CLO Issuers, together with cash, cash equivalents (excluding Institutional Cash Series plc LEAF) and derivatives do not comprise more than 20% of the assets of the Fund. In applying the ESG investing policy, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Enhancing exposure to investments that are deemed to have associated positive externalities or baseline externalities while limiting investments that are deemed to have associated negative externalities.
- Application of the exclusionary screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager evaluates underlying investments in companies according to the good governance criteria outlined in the SFDR where relevant data is available and as appropriate given the underlying investment type. These criteria relate to sound management structures, employee relations, remuneration of staff and tax compliance. The Investment Manager may consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers. In relation to investments in securitised assets, the Investment Manager will assess the securitisation issuer for good governance. The Investment Manager’s due diligence process looks to verify the securitisation transaction structure is in line with sector norms and where appropriate engage with issuers where it identifies potential weaknesses. The Investment Manager may also decide to refrain from investing in that particular securitisation where engagement is not appropriate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include CLOs where it has not been possible for the Investment Adviser to apply the ESG screens, derivatives, cash and near cash instruments and shares or units of CIS. These investments may be used for investment purposes in pursuit of the Fund’s (non ESG) investment objective, for the purposes of liquidity management and/or hedging. No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Global Unconstrained Equity Fund  
Legal entity identifier: 529900C4B6X8NH3O3X24**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology, as described above.

2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 80% of its total assets in equity securities and equity-related securities (namely American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of companies domiciled in, or exercising a significant part of their economic activity in, global developed markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities. These instruments will be listed or traded on regulated markets. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance. The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements. The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Application of the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Manager, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer. The Investment Manager may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (“#2 Other”).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of investments in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not applicable.

- **How does the designated index differ from a relevant broad market index?**

Not applicable.

- **Where can the methodology used for the calculation of the designated index be found?**

Not applicable.

- **Where can I find more product specific information online?**

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com)

Further information on the criteria for BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Impact Bond Fund  
Legal entity identifier: 5493000ECOD9JNFIP55**

**Sustainable investment objective**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☒ **Yes**

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 15%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ It will make a minimum of **sustainable investments with a social objective: 1%**

☐ ☐ ☐ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What is the sustainable investment objective of this financial product?**

The Fund invests globally at least 80% of its total assets in “impact” investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return.

The Fund will aim to diversify its investments across issuers that have an impact on people and the planet (the “Impact Categories”) across themes including, but not limited to, affordable housing, education and skilling, financial and digital inclusion, public health, safety and security, efficiency, electrification and digitalisation, green energy, pollution remediation and prevention, sustainable food, water and waste.

The Fund invests a minimum of 80% of its total assets in Sustainable Investments, across environmental and social objectives. The minimum for each Sustainable Investment objective is set out in the box above. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer’s business activity contributes to an Environmental and/or Social Objective; or

- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti- corruption.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and other exclusionary screens, as described above.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

This Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests globally at least 80% of its total assets in “impact” investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return. This includes, but is not limited to, “Green, Social and Sustainability” (GSS) bonds where the proceeds of such GSS bonds are tied to green and socially responsible projects. More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes including, but not limited to, bonds from companies which have social and/or environmental impact characteristics that the Investment Adviser has at its discretion deemed to be impactful and bespoke impact MBS pools. The Fund may invest in the full spectrum of available fixed income securities, including non-investment grade. Currency exposure is flexibly managed.

For the selection of GSS bonds, the Investment Adviser will analyse the use of proceeds of the issues and the issuer framework for alignment of the bonds with the Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability Bond Guidelines (SBG) of the International Capital Markets Association to determine suitability within the investment universe.

Investment decisions will be based on issuer specific research (such as sovereign and credit analysis comprising a multi factor framework assessing global, country and issuer specific risk to determine issuers’ ability and willingness to pay over the long term) to identify and select the GSS bonds and other fixed income securities that, in the opinion of the Investment Adviser, have the potential to produce attractive long-term returns whilst also being consistent with the United Nations Sustainable Development Goals (“UN SDGs”). The UN SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education, and economic growth, reduction in inequalities, all whilst tackling climate change and working to preserve the planet’s oceans and forests, as set out in more detail on the UN website: <https://www.un.org/sustainabledevelopment/sustainable-development-goals>).

The Fund will aim to diversify its investments across issuers that have an impact on people and the planet (the “Impact Categories”) across themes including, but not limited to, affordable housing, education and skilling, financial and digital inclusion, public health, safety and security, efficiency, electrification and digitalisation, green energy, pollution remediation and prevention, sustainable food, water and waste.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer’s financials.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The binding elements of the investment strategy are as follows:

- Maintain that all of the Fund’s investments will be Sustainable Investments (save for instruments used for the purposes of liquidity management and/or hedging, which will not exceed 20% of the Fund’s total assets). In relation to such Sustainable Investments,

at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

- Enhancing exposure to investments that are deemed to have associated positive externalities while limiting investments that are deemed to have associated negative externalities.
- Application of the BlackRock EMEA Baseline Screens and other exclusionary screens described above.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

#### Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

#### ● **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

#### **What is the asset allocation and the minimum share of sustainable investments?**

All of the Fund's investments will be Sustainable Investments or instruments used for the purposes of liquidity management and/or hedging. Investments used for the purposes of liquidity management and/or hedging will not exceed 20% of the Fund's total assets.

A minimum of 80% of the Fund's total assets will be invested in Sustainable Investments (#1 Sustainable). In relation to these Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Not sustainable).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#### ● **How does the use of derivatives attain the sustainable investment objective?**

Where derivatives are used for investment purposes, they are assessed against the criteria for Sustainable Investments. Derivatives may also be used for limited other purposes such as liquidity and hedging, and any ESG rating or analyses referenced above will apply only to the underlying investment in respect of such derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of sustainable investments with a social objective?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

The use of such investments does not affect the delivery of the sustainable investment objective, as these investments are used for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to meet the sustainable investment objective?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Japan Flexible Equity Fund  
Legal entity identifier: 549300UJ9NZRIU24W956**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI Developed Ā pan (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

1. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in, Japan. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middle-east-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Manager, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer. The Investment Manager may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

Please note that the MSCI Developed Japan is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### **Where can I find more product specific information online?**

#### **More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Japan Small & MidCap Opportunities Fund  
Legal entity identifier: 549300HZ21BD9CBK5N76**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, S&P Japan Small & MidCap Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

1. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of small and mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, Japan. Small and mid capitalisation companies are considered companies which, at the time of purchase, form the bottom 30% by market capitalisation of Japanese stock markets. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Manager, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer. The Investment Manager may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

Please note that the S&P Japan Small & MidCap Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### **Where can I find more product specific information online?**

#### **More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Multi-Theme Equity Fund  
Legal entity identifier: 549300Q710S0IUIPBZ60**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund invests in Collective Investment Schemes ("CIS") qualifying as Article 8 or 9 of the SFDR Regulation which pursue a positive ESG objective or outcome or comprised of bonds issued by governments that have an ESG sovereign rating of at least BB (as defined by third party ESG data vendors).

The Fund will maintain a minimum exposure to investments that specifically support climate objectives.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings in Sustainable Investments, as described above.
2. The Fund's holdings of underlying Collective Investment Schemes meeting the above criteria
3. The Fund's holdings in investments that specifically support climate objectives.
4. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Fund invests at least 20% of its holdings in Sustainable Investments on a look through basis. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through exposure to investments that specifically support climate objectives.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies

In addition, this Fund takes into account the PAIs through BlackRock’s DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

### What investment strategy does this financial product follow?

The Fund seeks to achieve capital growth over the long term (at least five consecutive years) in a manner consistent with the principles of environmental, social and governance (ESG) investing.

The Fund will invest at least 80% of total assets in CIS qualifying as Article 8 or 9 of the SFDR Regulation which pursue a positive ESG objective or outcome or comprised of bonds issued by governments that have an ESG sovereign rating of at least BB (as defined by third party ESG data vendors).

The Investment Adviser will analyse all the securities in the underlying investment universe to assess their contribution to environmental and social objectives. The assessment of the level of alignment in each activity is based on percentage of revenue and a defined total revenue threshold.

The Investment Adviser will refer to qualitative (i.e. judgement-based) and quantitative (i.e. mathematical or statistical) research analysing a wide range of economic data and market behaviour, with a focus on the five Megatrends and a range of other “thematic trends”. The research may be produced by the Investment Adviser or another member of the BlackRock Group, or by a third party.

The Investment Adviser uses its analysis to construct a portfolio that invests in Sustainable Investments and investments that specifically support climate objectives

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund’s total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund’s total assets will be invested in Sustainable Investments with a social objective.
2. Maintain that the Fund holds at least 80% of its holdings in Collective Investment Schemes meeting the above criteria.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

3. Maintain that the Fund holds at least 10% of its holdings in investments that specifically support climate objectives.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

There is no commitment to reduce the scope of investments by a minimum rate.

● **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

● ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

● ***What is the minimum share of socially sustainable investments?***

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

● ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

● ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

● ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

● ***How does the designated index differ from a relevant broad market index?***

Not applicable.

● ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### **Where can I find more product specific information online?**

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Next Generation Technology Fund  
Legal entity identifier: 549300WSSL4Z83Z2VF84**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of new and emerging technology. The Fund will focus on next generation technology themes including artificial intelligence, computing, automation, robotics, technological analytics, e-commerce, payment systems, communications technology and generative design. In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation. Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Sustainable Energy Fund  
Legal entity identifier: 5493009Z1H3ONBJRQQ80**

**Sustainable investment objective**

*Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☒ **Yes**

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 15%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ It will make a minimum of **sustainable investments with a social objective: 1%**

☐ ☐ ☐ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What is the sustainable investment objective of this financial product?**

The Fund invests globally at least 70% of its total assets in the equity securities of sustainable energy companies. Sustainable energy companies are those which are engaged in alternative energy and energy technologies including: renewable energy technology; renewable energy developers; alternative fuels; energy efficiency; enabling energy and infrastructure.

The Fund invests a minimum of 80% of its total assets in Sustainable Investments, across environmental and social objectives. The minimum for each Sustainable Investment objective is set out in the box above. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives"). An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) a minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

The Fund considers key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by

weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

The Fund will not invest in companies that are classified in the following sectors (as defined by Global Industry Classification Standard): coal and consumables; oil and gas exploration and production; integrated oil and gas.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI All Countries World Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's ESG rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

This Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

**What investment strategy does this financial product follow?**

The Fund invests globally at least 70% of its total assets in the equity securities of sustainable energy companies. Sustainable energy companies are those which are engaged in alternative energy and energy technologies including: renewable energy technology; renewable energy developers; alternative fuels; energy efficiency; enabling energy and infrastructure. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with alternative energy and energy technologies and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

The Fund will not invest in companies that are classified in the following sectors (as defined by Global Industry Classification Standard): coal and consumables; oil and gas exploration and production; and integrated oil and gas. The assessment of the level of engagement in each activity or sector may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without

excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Investment Adviser uses its analysis to create a portfolio that has a higher ESG rating than the Index after eliminating at least 20% of the least well-rated securities from the Index.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The binding elements of the strategy are as follows:

- Maintain that all of the Fund's investments will be Sustainable Investments (save for instruments used for the purposes of liquidity management and/or hedging, which will not exceed 20% of the Fund's total assets). In relation to such Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Apply the exclusionary screens.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the index after eliminating at least 20% of the lowest rated securities from the index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

## What is the asset allocation and the minimum share of sustainable investments?

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

All of the Fund's investments will be Sustainable Investments or instruments used for the purposes of liquidity management and/or hedging. Investments used for the purposes of liquidity management and/or hedging will not exceed 20% of the Fund's total assets.

A minimum of 80% of the Fund's total assets will be invested in Sustainable Investments (#1 Sustainable). In relation to these Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Not sustainable).

### ● How does the use of derivatives attain the sustainable investment objective?

Where derivatives are used for investment purposes, they are assessed against the criteria for Sustainable Investments. Derivatives may also be used for limited other purposes such as liquidity and hedging, and any ESG rating or analyses referenced above will apply only to the underlying investment in respect of such derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of sustainable investments with a social objective?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

The use of such investments does not affect the delivery of the sustainable investment objective, as these investments are used for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to meet the sustainable investment objective?**

No.

Please note that the MSCI All Countries World Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Sustainable Global Allocation Fund  
Legal entity identifier: 549300TYWZPHTEVJ5C72**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 40% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

Greenhouse gas emissions are categorised into three groups or “scopes” by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity of the portfolio relative to the Index which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund applies exclusionary screens in accordance with the French SRI label requirements (as described in the section headed "The French SRI label" of this Prospectus).

The ESG policy reduces the investment universe of the Fund by 25%. For the purposes of measuring this reduction only, MSCI All Country World Index and Bloomberg Global Aggregate Index are used to define the investment universe and are reduced separately.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI All Country World Index (60%) and Bloomberg Global Aggregate Index (40%) (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including “green bonds”, “sustainable bonds” and “social bonds” (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and other exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 40% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, other exclusionary screens, its carbon reduction target and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

The Fund achieves a better result than the Index for the following two PAIs:

- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector

In addition, the Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing.

The Fund invests globally in equity, debt and short term securities, of both corporate and governmental issuers, with no prescribed limits. In normal market conditions the Fund will invest at least 70% of its total assets in the securities of corporate and governmental issuers. The Fund generally will seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. The Fund may also invest a portion of its debt portfolio in high yield fixed income transferable securities. Currency exposure is flexibly managed.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs relative to the holding’s sector as defined by the Investment Adviser. The Investment Adviser will seek to restrict exposure to investments that are deemed to have associated negative externalities (“NEXT”) while enhancing exposure to investments that are deemed to have associated positive externalities (“PEXT”), compared to the Fund’s investable universe. The Fund seeks to reduce its corporate carbon emissions profile compared to that of the benchmark by investing in lower carbon emitting issuers and issuers committed to decarbonisation.

After applying exclusionary policies, the Investment Advisor evaluates the risks and opportunities of the remaining issuers, combining ESG principles with top-down macro asset allocation and bottom-up security analysis.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 40% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund’s total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund’s total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities compared to the Fund’s benchmark while limiting investments that are deemed to have associated negative externalities.
- Application of the BlackRock EMEA Baseline Screens and other exclusionary screens described above.
- Reduce the investable universe of the Fund by at least 25%.
- Maintain that the Fund’s carbon emissions intensity is lower than that of the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

### ● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The ESG policy (as described above) reduces the investment universe of the Fund by at least 25%.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 40% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the MSCI All Country World Index (60%) and Bloomberg Global Aggregate Index (40%) is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Sustainable Global Dynamic Equity Fund  
Legal entity identifier: 5493000X5HT2OV7FWP57**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 50% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

Greenhouse gas emissions are categorised into three groups or “scopes” by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity of the portfolio relative to the Index (as defined below), which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The ESG policy reduces the investment universe of the Fund by 20%. For the purposes of measuring this reduction only, MSCI All Country World Index is used to define the investment universe and are reduced separately.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI All Country World Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 50% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, the Fund takes into account the PAIs through BlackRock’s DNSH standard for Sustainable Investments. The Fund will provide information on the PAIs in its annual report.

**What investment strategy does this financial product follow?**

The Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing. The Fund invests globally, with no prescribed country or regional limits, at least 70% of its total assets in equity securities. The Fund will generally seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. Currency exposure is flexibly managed.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

social benefits or costs relative to the holding's sector as defined by the Investment Adviser. The Investment Adviser will seek to restrict exposure to investments that are deemed to have associated negative externalities ("NEXT") while enhancing exposure to investments that are deemed to have associated positive externalities ("PEXT"), compared to the Fund's investable universe. The Fund seeks to reduce its corporate carbon emissions profile compared to that of the benchmark by investing in lower carbon emitting issuers and issuers committed to decarbonization. After applying exclusionary policies, the Investment Advisor evaluates the risks and opportunities of the remaining issuers, combining ESG principles with top-down macro asset allocation and bottom-up security analysis.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 50% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities compared to the Fund's benchmark while limiting investments that are deemed to have associated negative externalities.
- Reduce the investable universe of the Fund by at least 20%.
- Maintain that the Fund's carbon emissions intensity score is lower than the Index.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The ESG policy (as described above) reduces the investment universe of the Fund compared to the ESG Reporting Index by at least 20%.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). Of these investments, a minimum of 50% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

## ● *How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?*

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What is the minimum share of socially sustainable investments?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

### Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No.

Please note that the MSCI All Country World Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### Where can I find more product specific information online?

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Sustainable Global Infrastructure Fund  
Legal entity identifier: 549300MW34RL70JW4V90**

**Sustainable investment objective**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☒ **Yes**

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 15%**
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ It will make a minimum of **sustainable investments with a social objective: 1%**

☐ ☐ ☐ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What is the sustainable investment objective of this financial product?**

The Fund seeks to invest at least 80% of its total assets in the equity securities of companies whose predominant economic activity is in the infrastructure sector and with a particular focus on companies aligned with and supporting the objectives of the UN Sustainable Development Goals ("UN SDGs").

The Fund invests a minimum of 80% of its total assets in Sustainable Investments, across environmental and social objectives. The minimum for each Sustainable Investment objective is set out in the box above. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or the issuer's business practices contribute to an Environmental and/or Social Objective.
- b) or the issuer's business practices contribute to an Environmental and/or Social Objective.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the exclusionary screens, as described above.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

This Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What investment strategy does this financial product follow?**

The Fund invests in companies whose predominant economic activity is in the infrastructure sector and with a particular focus on companies aligned with and supporting the objectives of the UN Sustainable Development Goals ("UN SDGs").

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund focuses on infrastructure investments serving the needs of societies and economies. Investment themes include low emissions forms of transport, hospitals and medical centres, digital infrastructure. In normal market conditions the Fund will invest in a relatively concentrated portfolio of equity securities of companies with large, medium and small market capitalisation across a broad range of infrastructure sub-sectors including (without limitation) regulated utilities, renewables, transportation, social infrastructure and communications, that contribute to the advancement of at least one of the 6 SDGs below:

- SDG 3 (Good Health & Well-Being)
- SDG 6 (Clean Water & Sanitation)
- SDG 7 (Affordable & Clean Energy)
- SDG 9 (Industry, Innovation & Infrastructure)
- SDG 11 (Sustainable Cities & Communities)
- SDG 13 (Climate Action)

After applying the exclusionary policy, the remaining companies (i.e. those companies which have not yet been excluded from investment by the Fund) are assessed by the Investment Adviser based on their alignment to each of the SDGs above. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Investment Adviser evaluates companies on their ability to manage the risks and opportunities associated with the infrastructure theme and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. The investment strategy reduces the investable universe of the Fund by at least 20%.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The binding elements of the strategy are as follows:

- Maintain that all of the Fund's investments will be Sustainable Investments (save for instruments used for the purposes of liquidity management and/or hedging, which will not exceed 20% of the Fund's total assets). In relation to such Sustainable Investments, at least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Apply the exclusionary screens.
- Maintain that the investment strategy reduces the investment universe of the Fund by at least 20%.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

## What is the asset allocation and the minimum share of sustainable investments?

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

All of the Fund's investments will be Sustainable Investments or instruments used for the purposes of liquidity management and/or hedging. Investments used for the purposes of liquidity management and/or hedging will not exceed 20% of the Fund's total assets.

A minimum of 80% of the Fund's total assets will be invested in Sustainable Investments (#1 Sustainable). At least 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (#2 Not sustainable).

### ● *How does the use of derivatives attain the sustainable investment objective?*

Where derivatives are used for investment purposes, they are assessed against the criteria for Sustainable Investments. Derivatives may also be used for limited other purposes such as liquidity and hedging, and any ESG rating or analyses referenced above will apply only to the underlying investment in respect of such derivatives.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 15% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of sustainable investments with a social objective?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

The use of such investments does not affect the delivery of the sustainable investment objective, as these investments are used for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to meet the sustainable investment objective?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Swiss Small & MidCap Opportunities Fund  
Legal entity identifier: 549300YOB1KZTW27BE02**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of small and mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, Switzerland in a manner consistent with environmental, social and governance “ESG” investing.

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser’s direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Systematic China A-Share Opportunities Fund  
Legal entity identifier: 549300HIK3R2NF85QQ13**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in a portfolio of equity securities of companies domiciled in, or exercising the predominant part of their activity in the People's Republic of China (PRC). The Fund is a RQFII Access Fund and a Stock Connect Fund and may invest without limit in the PRC via the RQFII regime and/or via the Stock Connects. For the purpose of the investment objective, the PRC excludes Hong Kong and Macau Special Administrative Regions and Taiwan and accordingly the Fund will invest only in onshore Chinese equity markets (A-Shares).

The Fund will apply the BlackRock EMEA Baseline Screens in order to create the universe of investible equities to which it applies its quantitative models.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 30% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Systematic China Environmental Tech Fund  
Legal entity identifier: 529900A0JA146KNY9O73**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or the main business of which is in, the People's Republic of China (PRC) in the industries and supply chain of new energy, carbon neutral, green energy, energy conservation and emissions reduction themes.

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI China All Share IMI Environmental 10/40 Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in investments in companies in the industries and supply chain of new energy, carbon neutral, green energy, energy conservation and emissions reduction themes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's, environmental, social and governance ("ESG") rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

BlackRock makes use of internal analysis and third-party data sources to measure how issuers negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and exclusionary screens.

The Fund takes into account the following PAIs:

- GHG Emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What investment strategy does this financial product follow?**

The Fund invests at least 70% of its total assets in a portfolio of equity securities of companies domiciled in, or the main business of which is in, the People's Republic of China (PRC) in the industries and supply chain of new energy, carbon neutral, green energy, energy conservation and emission reduction themes. The Fund seeks to invest in Sustainable Investments. The Fund will apply the BlackRock EMEA Baseline Screens.

The Fund applies the EU Paris-aligned Benchmark Exclusions.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG score versus the Index.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain the Fund's holds at least 70% in investments in companies in the industries and supply chain of new energy, carbon neutral, green energy, energy conservation and emissions reduction themes.
- Maintain that the Fund's ESG score is higher than that of the Index.
- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What is the minimum share of socially sustainable investments?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

### Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Please note that the MSCI China All Share IMI Environmental 10/40 Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### Where can I find more product specific information online?

#### More product-specific information can be found on the website:

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Systematic Global Income & Growth Fund  
Legal entity identifier: 549300VKXVTNB9CQJ249**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

This Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

Greenhouse gas emissions are categorised into three groups or "scopes" by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity of the portfolio relative to the Index (as defined below), which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, 33.3% MSCI World Minimum Volatility Index, 33.3% MSCI All Country World Index, 16.7% BBG Global Aggregate Corporate Index and 16.7% BBG Global High Yield Corp ex Emerging Markets Index Hedged in USD (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including "green bonds", "sustainable bonds" and "social bonds" (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's, environmental, social and governance ("ESG") rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to provide income and capital growth from its investments in a manner consistent with the principles of environmental, social and governance "ESG" focused investing. In order to achieve its investment objective the Fund will invest globally, directly and indirectly, in the full spectrum of permitted investments including on average, typically two thirds of its total assets in equities and up to one third of its total assets in fixed income transferable securities (also known as debt securities which may include the Fund investing up to 20% of its total assets in some high yield fixed income transferable securities), as well as investing in units of CIS, cash, deposits and money market instruments. The Fund will not be subject to prescribed country or regional limits and although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Risk management measure used: Commitment Approach First Addendum 192

The Fund will apply the BlackRock EMEA Baseline Screens. To evaluate a company at the time of purchase using the Fund's ESG methodology, multiple areas are focused on: environmental, social and governance outcomes, expected returns (including ESG return drivers), risk and transaction costs, as determined through proprietary research. In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic approach to stock selection. This means that stocks will be selected and weightings allocated based on their ESG attributes and on forecasts of return, risk and transaction costs. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Investment Adviser may also consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers depending on the particular ESG strategy applicable to the Fund.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above. Please refer to the SFDR disclosures on page 47 for further details of the ESG commitments made by the Fund. The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may take into consideration a composite benchmark comprising 33.3% MSCI World Minimum Volatility Index, 33.3% MSCI All Country World Index, 16.7% BBG Global Aggregate Corporate Index and 16.7% BBG Global High Yield Corp ex Emerging Markets Index Hedged in USD (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components and weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index.

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the Index and the weighted average ESG score of the Fund will be higher than the ESG score of the Index. The Investment Adviser also intends the Fund to maintain that the Fund's carbon emissions intensity score is 30% lower than the Index

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Application of the BlackRock EMEA Baseline Screens described above.
- Maintain that the weighted average ESG score of the Fund will be higher than the ESG score of the Index.
- Maintain the Fund's carbon emissions intensity score as 30% lower than that of the Fund's Index.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What is the minimum share of socially sustainable investments?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

### Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Please note that the 33.3% MSCI World Minimum Volatility Index, 33.3% MSCI All Country World Index, 16.7% BBG Global Aggregate Corporate Index and 16.7% BBG Global High Yield Corp ex Emerging Markets Index Hedged in USD is used to compare certain ESG characteristics promoted by the Fund.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### Where can I find more product specific information online?

#### **More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Systematic Global SmallCap Fund  
Legal entity identifier: 549300HBMGWEEZN5BI34**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

Greenhouse gas emissions are categorised into three groups or “scopes” by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3 includes all other indirect emissions that occur in an issuer’s value chain. The Fund seeks to have a lower greenhouse gas emissions intensity of the portfolio relative to the Index (as defined below), which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the Fund’s holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production

and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, MSCI ACWI Small Cap Index (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.
- The Fund's holdings of underlying MMFs meeting the above criteria.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

**What investment strategy does this financial product follow?**

The Fund aims to achieve long-term capital growth on your investment. The Fund seeks to gain at least 70% of its investment exposure to equity securities (e.g. shares) of companies domiciled in, listed in, or the main business of which is in, global developed markets.

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Investment Manager will apply the BlackRock EMEA Baseline Screens to the Index in order to create the universe of investible equities to which it applies its quantitative models. As described more fully above, the quantitative models incorporate ESG data across the various characteristics used to score companies. The portfolio construction tool is also subject to investment constraints which optimise the portfolio so that the Fund has a lower carbon emissions intensity score than its Index.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain that the Fund's carbon emissions intensity score is lower than that of the Index.
- Apply the BlackRock EMEA Baseline Screens and exclusionary screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance**  
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (**#1 Aligned with E/S characteristics**). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (**#1A Sustainable**), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (**#1B Other E/S characteristics**).

In relation to the Sustainable Investments (**#1A Sustainable**), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments (**#2 Other**).

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the MSCI ACWI Small Cap Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Systematic Multi Allocation Credit Fund  
Legal entity identifier: 549300UUNWQOH7ZDYR32**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3 includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity for the investment grade securities portion of the portfolio relative to the Bloomberg Global Aggregate Corporate USD Hedged Index, which are the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the relevant holdings. The Fund also seeks to have a lower greenhouse gas emissions intensity for the high yield securities portion of the portfolio relative to the Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index, which are the estimated greenhouse gas (Scope 1 and Scope 2) emissions per \$1 million of sales revenue across the relevant holdings. For the avoidance of doubt, Scope 3 is not currently considered for these calculations.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, Bloomberg Global Aggregate Corporate USD Hedged Index, Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index and J.P. Morgan EMBI ESG Global Diversified USD Hedged Index (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's ESG rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

### What investment strategy does this financial product follow?

The Fund seeks to provide a positive return (net of fees) over a composite benchmark comprising (in equal proportion) Bloomberg Global Aggregate Corporate USD Hedged Index, Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index and J P. Morgan EMBI ESG Global Diversified USD Hedged Index (the Index), by investing at least 70% of its total assets in a globally diversified range of investment grade and non-investment grade (i.e. securities which have a relatively low credit rating or which are unrated) fixed income securities (i.e. both government and corporate bonds).

The Fund will apply the BlackRock EMEA Baseline Screens.

With respect to the investment grade and high yield corporate debt securities portion of the Fund's portfolio, the Investment Adviser will also apply additional ESG criteria when selecting the investments to be held by the Fund.

In relation with investment grade corporate debt securities, the ESG criteria applied by the Fund consists of (i) achieving a carbon emission intensity score lower and (ii) an ESG score higher than the Bloomberg Global Aggregate Corporate USD Hedged Index. The Bloomberg Global Aggregate Corporate USD Hedged Index represents the investment grade corporate debt securities portion of the Fund's index composite benchmark. In relation with high yield corporate debt securities, the criteria applied by the Fund consists of (i) achieving a carbon emission intensity score lower and (ii) an ESG score higher than the Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index. The Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index represents the high yield corporate debt securities portion of the Fund's index composite benchmark.

In relation to the emerging debt issuers, the Fund will invest in issuers that consists of the component securities of the J.P. Morgan ESG-Emerging Markets Bond Index Global Diversified Index (the Index). It is expected that this portion of the Fund's assets will be invested in either issuers within the Index or in issuers that meet the ESG selection criteria of the Index.

By investing in the constituents of the Index, the Fund's investment strategy enables it to comply with the ESG requirements of its Index as determined by the index provider. In the event that any

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

investments cease to comply, the Fund may continue to hold such investments only until such time as the relevant issuers cease to form part of the Index and it is possible and practicable to liquidate the position.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- In relation with investment grade corporate debt securities, the ESG criteria applied by the Fund consists of (i) achieving a carbon emission intensity score lower and (ii) an ESG score higher than the Bloomberg Global Aggregate Corporate USD Hedged Index.
- In relation with high yield corporate debt securities, the criteria applied by the Fund consists of (i) achieving a carbon emission intensity score lower and (ii) an ESG score higher than the Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index.
- In relation to the emerging debt issuers, the Fund will invest in issuers that consists of the component securities of the J P. Morgan ESG-Emerging Markets Bond Index Global Diversified Index.
- Apply the BlackRock EMEA Baseline Screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No. Please note that the Bloomberg Global Aggregate Corporate USD Hedged Index, Bloomberg Global High Yield Index Excl CMBS & EMG 2% Capped USD Hedged Index and J.P. Morgan EMBI ESG Global Diversified USD Hedged Index is used to compare certain ESG characteristics promoted by the Fund.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: United Kingdom Fund  
Legal entity identifier: 549300CZ01EMON5C7Z93**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, FTSE All Share Index (the "Index") is used to compare certain ESG characteristics promoted by the Fund.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

1. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies incorporated or listed in the UK. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Manager, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer. The Investment Manager may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

Please note that the FTSE All Share Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

### **Where can I find more product specific information online?**

#### **More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: US Dollar High Yield Bond Fund  
Legal entity identifier: 5493002GUOE4D10RFV09**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, “Does this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in high yield fixed income transferable securities denominated in US dollars. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.

The Fund will apply the BlackRock EMEA Baseline Screens.

Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Legal entity identifier: 5493000VBLDY9YB8P237**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
3. The Fund's holdings of underlying MMFs meeting the above criteria

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to invest in Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: US Growth Fund  
Legal entity identifier: 549300DS7VHS2WOPZD71**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.
- The Fund's holdings of underlying MMFs meeting the above criteria.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Application of the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (“#2 Other”).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: US Investment Grade Fixed Maturity Bond Fund 2027  
Legal entity identifier: 5299005KV5BLKFQOT812**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. In addition, the Fund will seek to limit all exposure to issuers involved with the manufacturing and/or sale of conventional weapons. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption.

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities, as described above.
2. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
3. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

— ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)
- Energy consumption intensity per high impact climate sector
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing. The Fund uses a “buy and maintain” strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 80% of its Net Asset Value is invested in corporate fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets and denominated in US Dollar. Such fixed income securities shall, at the time of purchase, be rated investment grade; and
- up to 20% of the Fund's Net Asset Value is invested in global fixed income securities which, at the time of purchase, are rated non-investment grade.

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

1. Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.
2. Application of the BlackRock EMEA Baseline Screens described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of investments in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not applicable.

- **How does the designated index differ from a relevant broad market index?**

Not applicable.

- **Where can the methodology used for the calculation of the designated index be found?**

Not applicable.

- **Where can I find more product specific information online?**

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: US Sustainable Equity Fund  
Legal entity identifier: 549300KZU3AFC0XHX480**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 50% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Fund seeks to address key environmental and social issues that are deemed to be relevant to the issuers' businesses using ESG scores as a means of assessing issuers' exposure to and management of those risks and opportunities. The ESG scores recognise that certain environmental and social issues are more material based on the type of activity that the issuer is involved in by weighting the issues differently in the scoring methodology. The following environmental themes are captured in the environmental component of the ESG score: climate change, natural capital, pollution and waste and environmental opportunities. The following social themes are captured in the social component of the ESG score: human capital, product liability, stakeholder opposition and social opportunities. Corporate issuers that have better ESG scores are perceived to have more sustainable business practices.

Greenhouse gas emissions are categorised into three groups or 'scopes' by the most widely-used international accounting tool, the Greenhouse Gas (GHG) Protocol. Scope 1 covers direct emissions from owned or controlled sources. Scope 2 covers indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting issuer. Scope 3

includes all other indirect emissions that occur in an issuer's value chain. The Fund seeks to have a lower greenhouse gas emissions intensity relative to the Index, which is the estimated greenhouse gas (Scope 1 and Scope 2) emissions based on the enterprise value including cash (EVIC) across the Fund's holding of capital invested in a company across the Fund's holdings. For the avoidance of doubt, Scope 3 is not currently considered for this calculation.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Fund promotes limiting global temperature rises within the targets set in the Paris Agreement by excluding investment in companies that have 1% or more of their revenue deriving from exploration, mining, extraction, distribution or refining of hard coal and lignite; have 10% or more of their revenue deriving from the exploration, extraction, distribution or refining of oil fuels; have 50% or more of their revenue deriving from the exploration, extraction, manufacturing or distribution of gaseous fuel; or have 50% or more of their revenue deriving from electricity generation having a greenhouse gas intensity greater than 100g CO<sub>2</sub> e/kWh.

The Fund also promotes social characteristics related to (a) reduction of the availability of weapons by excluding investment in companies with involvement in activities related to controversial weapons; (b) better health and well-being by excluding investment in companies involved in the cultivation and/or production of tobacco; and (c) support for human rights, labour standards, the environment and anti-corruption by excluding investment in companies deemed to have failed to comply with the 10 UN Global Compact (UNGC) Principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

In order to apply these exclusions, we rely on a third-party data provider (MSCI).

The Fund may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and / or social contributions, and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations (as described in (c) above) at the issuer level; and
- the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

The Fund may gain indirect exposure for non-investment purposes (through, including but not limited to, derivatives and shares or units of collective investment schemes) to issuers with exposures that are inconsistent with the EU Paris-aligned Benchmark Exclusions described above. Circumstances in which such indirect exposure may arise include, but are not limited to, where a counterparty to a FDI in which the Fund invests posts collateral which is inconsistent with the Fund's ESG criteria or where a CIS in which the Fund invests does not apply any or the same ESG criteria as the Fund and so provides exposure to securities which are inconsistent with the Fund's ESG criteria.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities; the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, Russell 1000 Index (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's, environmental, social and governance (“ESG”) rating, which is the weighted average of ESG scores of the Fund's holdings, as described above.
- The Fund's carbon emissions intensity, as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens and exclusionary screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 50% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in or whose main business is in the United States, in a manner consistent with the principles of sustainable investing.

The Investment Adviser applies the BlackRock EMEA Baseline Screens and other exclusionary criteria to the investable universe.

This Fund applies the EU Paris-aligned Benchmark Exclusions.

The Investment Adviser uses fundamental analysis to map companies' revenues and activities to environmental and social objectives to identify Sustainable Investments.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Investment Adviser uses its analysis to create a portfolio that seeks to deliver:

1. a superior ESG outcome versus the Index;
2. a lower carbon emissions intensity score at least 20% lower than the Index; and
3. an allocation to Sustainable Investments.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Investment Adviser ensures that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 50% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Maintain the Fund's carbon emissions intensity as 20% lower than that of the Fund's Index.
- Application of the BlackRock EMEA Baseline Screens and exclusionary screens described above.
- Maintain that the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.
- Ensure that more than 90% of the issuers of securities in which the Fund invests (excluding money market funds) shall be ESG rated or have been analysed for ESG purposes.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 50% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the Russell 1000 Index is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: World Bond Fund  
Legal entity identifier: 549300GIUUQLJYFN4112**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective
- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund invests a minimum of 20% of its total assets in Sustainable Investments, across environmental and social objectives. BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Sustainable Investments should also meet the do no significant harm (DNSH) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria to assess whether an issuer or investment does significant harm.

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials). The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers

involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes, however, Bloomberg Barclays Global Aggregate Index (USD hedged) (the “Index”) is used to compare certain ESG characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's holdings in Sustainable Investments, as described above.
- The Fund's holdings in use-of-proceeds bonds, including “green bonds”, “sustainable bonds” and “social bonds” (each as defined by BlackRock's corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). The Fund's holdings of green, sustainable and social bonds may cause the Fund to gain exposure to issuers which, in turn, have exposures that are inconsistent with the exclusions described above.
- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals (“Environmental and Social Objectives”).

An investment will be assessed as contributing to an Environmental and/or Social Objective where:

- a) minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- b) the issuer's business practices contribute to an Environmental and/or Social Objective; or
- c) the use of proceeds is assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- d) the fixed income securities are aligned with an Environmental and/or Social Objective.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The indicators for adverse impacts on sustainability factors for each type of investment are assessed using BlackRock's Sustainable Investments proprietary methodology. BlackRock uses third-party data and/or fundamental analysis to identify investments which negatively impact sustainability factors and cause significant harm.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments are assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens, its exclusionary policy and its holdings in green bonds.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

In addition, this Fund takes into account the PAIs through BlackRock's DNSH standard for Sustainable Investments. This Fund will provide information on the PAIs in its annual report.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

The investment objective of the fund is to maximize total return in a manner that is consistent with the principles of Environmental, Social and Governance (ESG) investing. The fund is actively managed, and the Investment Adviser will refer to the Bloomberg Barclays Global Aggregate USD hedged index when constructing the fund and analyzing risks for the fund.

The fund's investment process is consistent with ESG investing such that it will assess investments based on the extent to which they have positive or negative externalities that have environmental and social benefits or costs as defined by the Investment Adviser's proprietary methodology. The Investment Adviser will actively tilt the fund towards investments with positive externalities and limit investments with negative externalities. Additionally, the Investment Adviser considers ESG considerations as it relates to an issuer's creditworthiness and seeks to engage with global entities to address environmental, social and governance concerns.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- Maintain that the Fund holds at least 20% in Sustainable Investments. In relation to such Sustainable Investments, at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.
- Enhancing exposure to investments that are deemed to have associated positive externalities compared to the Fund's benchmark while limiting investments that are deemed to have associated negative externalities.
- Apply the BlackRock EMEA Baseline Screens.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## What is the asset allocation planned for this financial product?

A minimum of 70% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics). In relation to these investments, a minimum of 20% of the Fund's total assets will be invested in Sustainable Investments (#1A Sustainable), and the remainder will be invested in investments aligned with other environmental and/or social characteristics described above (#1B Other E/S characteristics).

In relation to the Sustainable Investments (#1A Sustainable), at least 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy, and at least 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective. The remainder of the Fund's Sustainable Investments may fluctuate between these two types of Sustainable Investment.

The Fund may invest up to 30% of its total assets in other investments (#2 Other investments).

## ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with environmental objectives that are not aligned with the EU Taxonomy.

The Fund invests in Sustainable Investments that are not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment may be unavailable; and / or (iii) underlying economic activities may not be eligible under the EU Taxonomy's available technical screening criteria or may not comply with all requirements set out in such technical screening criteria.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

A minimum of 1% of the Fund's total assets will be invested in Sustainable Investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 30% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

Please note that the Bloomberg Barclays Global Aggregate Index (USD hedged) is used to compare certain ESG characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for Sustainable Investments can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: World Financials Fund  
Legal entity identifier: 5493009JGB3XP8H4XV85**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: World Healthscience Fund  
Legal entity identifier: 549300OHN1ZT4WMEMU83**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: World Real Estate Securities Fund  
Legal entity identifier: 549300XQLHCXCR7Z2447**

**Environmental and/or social characteristics**

***Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.*

*The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.*

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Fund promotes climate change mitigation efforts by seeking to achieve a reduction in one-year average carbon footprint compared to the corresponding average carbon footprint, three-years prior (e.g. the average carbon footprint in 2024 will be compared to the one in 2021). The carbon footprint is defined as the total carbon emissions (scope 1 and 2) of a portfolio normalized by its market value, represented in tons of CO<sub>2</sub> per million dollars invested.

This Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's carbon emissions intensity, as described above.
- The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Please refer to the section below, "Does this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens and its carbon reduction target.

The Fund takes into account the following PAIs:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

This Fund will provide information on the PAIs in its annual report.

## What investment strategy does this financial product follow?

The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the real estate sector. This may include residential and / or commercial real estate focused companies as well as real estate operating companies and real estate holding companies (for example, real estate investment trusts).

The Fund will apply the BlackRock EMEA Baseline Screens.

The Fund promotes climate change mitigation efforts by seeking to achieve a reduction in one-year average carbon footprint compared to the corresponding average carbon footprint, three-years prior (e.g. the average carbon footprint in 2024 will be compared to the one in 2021). The carbon footprint is defined as the total carbon emissions (scope 1 and 2) of a portfolio normalized by its market value, represented in tons of CO2 per million dollars invested. The Fund may gain limited indirect exposure (through, including but not limited to, derivatives) to issuers that do not meet the ESG criteria described above.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

- The Investment Adviser seeks to achieve a reduction in one-year average carbon footprint compared to the corresponding average carbon footprint, three-years prior.
- Application of the BlackRock EMEA Baseline Screens described above.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

### What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ('climate change mitigation') and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8 paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: World Technology Fund  
Legal entity identifier: 5493007T8WWG2QURHU23**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

This Fund applies the BlackRock EMEA Baseline Screens with the Fundamental Insights Methodology. This approach seeks to avoid exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by limiting direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. This Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by this Fund include:

1. The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.

2. The Fund's exclusion of holdings in issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology, as described above.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio. Please refer to the section below which describes how the Fund considers PAIs on sustainability factors.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are as follows:

1. Apply the BlackRock EMEA Baseline Screens using Fundamental Insights Methodology.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments (#2 Other investments).

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

- ***What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What is the minimum share of socially sustainable investments?***

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

- ***What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?***

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

- ***Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?***

No.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

- ***Where can I find more product specific information online?***

**More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com). Further information on the criteria for BlackRock EMEA Baseline Screens using Fundamental Insights Methodology can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

## Addendum

Dated April 2026

to the Prospectus dated 16 December 2025

This addendum (the “Addendum”) forms part of and should be read in the context of and in conjunction with, the prospectus dated 16 December 2025 (the “Prospectus”). Distribution of this Addendum is not authorised unless accompanied by a copy of the Prospectus and the reports referred to therein. The Prospectus is deemed to be modified by the information in this Addendum.

Words and expressions not specifically defined herein shall bear the same meaning as that attributed to them in the Prospectus.

The directors of BlackRock Global Funds (the “Company”) and BlackRock (Luxembourg) S.A. (the “Management Company”), whose names appear under the headings “Directory - Board of Directors” and “Management Company” respectively in the Prospectus, accept responsibilities for the information contained in this Addendum. To the best of the knowledge and belief of the directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Addendum is in accordance with the facts and does not omit anything likely to affect the import of such information.

If you are in any doubt about the action to be taken you should consult your stockbroker, bank manager, solicitor, accountant, relationship manager or other professional adviser immediately.

The directors of the Company have resolved that the Prospectus shall be amended effective as and from the date of this Addendum to include the following amendments:

## 1. Introduction to BlackRock Global Funds

The “Choice of Funds” list from page 2 of the Prospectus shall be updated to include the following Funds:

| Fund                                                | Base Currency | Bond/Equity/ Mixed Fund/<br>Fund of Funds |
|-----------------------------------------------------|---------------|-------------------------------------------|
| 44. Euro Income Fixed Maturity Bond Fund 2030 (2)   | EUR           | B                                         |
| 45. Euro Income Fixed Maturity Bond Fund 2031       | EUR           | B                                         |
| 89. Step Into Equity High Income Fund 2030          | EUR           | M                                         |
| 95. Systematic Asia Pacific Equity High Income Fund | USD           | E                                         |
| 101. Systematic Nasdaq Equity High Income Fund      | USD           | E                                         |

The lists of Funds in these tables shall be renumbered accordingly.

## 2. Specific Risk Considerations

The tables of specific risk considerations from page 24 of the Prospectus shall be updated to include the following:

| No. FUND                                            | Risk of<br>Capital<br>Ero-<br>sion | Fixed<br>In-<br>come | Dis-<br>tresse-<br>d<br>Securi-<br>ties | De-<br>layed<br>Deliv-<br>ery<br>Trans-<br>ac-<br>tions | Small<br>Cap | Equity<br>risk | ABS/<br>MBS /<br>ABCPs | Port-<br>folio<br>Concen-<br>tration<br>Risk | Contin-<br>gent<br>Convert-<br>ible<br>Bonds | ESG<br>Invest-<br>ment<br>Policy<br>Risk | Model<br>Risk |

Systematic Asia Pacific Equity High Income Fund | X                                                         |                   |                             | X                                                   |                          |                                                    |                                 |               | X                      |                            |                                          |
| 101. Systematic Nasdaq Equity High Income Fund      |                                                           |                   |                             |                                                     | X                        |                                                    |                                 |               |                        |                            |                                          |

The list of Funds in these tables shall be renumbered accordingly.

### 3. Investment Objectives and Policies

The following five new Funds are added in alphabetical order from page 67 of the Prospectus:

"The **Step Into Equity High Income Fund 2030** seeks to provide a positive total return, defined as a mix of capital growth and income, by adopting a transitioning investment strategy that provides exposure to an increasing level of equity securities relative to fixed income securities over the Fund's Investment Period (as defined below).

The Fund will seek to achieve its investment objective by implementing an evolving 4-year investment strategy. The Fund will provide up to 100% exposure to fixed income securities during the Pre Investment Period and start of the Investment Period, while gradually evolving the asset allocation to provide up to 100% exposure to equity securities at the end of the Investment Period, as further detailed below. Exposure to these asset classes will be achieved through, but not limited to, investment in equity and fixed income securities as well as shares or units of CIS.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund is expected to have a fixed term of up to 5 years and 2 months, subject to any extension of the Pre Investment Period (as defined below), comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 4 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund), subject to any postponement of the Launch Date at the discretion of the Board of Directors, provided that the Launch Date takes place no later than 6 months after the creation of the Fund.

During the Pre Investment Period, the Fund may hold up to 100% of its Net Asset Value in debt securities, units of CIS (including Money Market Funds), Money Market Instruments, cash, deposits, and other cash equivalents.

- ii) the "**Investment Period**": a period of 4 years following the Pre Investment Period including a ramp-up period of 20 Business Days (the "**Ramp-Up Period**"), during which the Investment Adviser will invest the Fund's assets in accordance with its strategic asset allocation. The length of the Ramp-Up Period is subject to the Investment Adviser's discretion based on its assessment of market conditions, provided that the Pre Investment Period and the Ramp-Up Period together do not exceed 6 months and 20 Business Days.

During the Investment Period the allocation between fixed income asset classes and equity securities will evolve dynamically over time, based on the following two elements:

- (a) a pre-defined step up of equity risk in the strategic asset allocation of the portfolio over the Investment Period (this strategic asset allocation will change every quarter over four years by incrementally increasing the equity allocation and correspondingly reducing the fixed income allocation). See "Benchmark use" section below for an indication of allocation over time, actual allocation may vary depending on market conditions; and

- (b) active asset allocation at all times to dynamically adjust exposures to various asset classes in the portfolio to reflect forward-looking market fundamentals and other investment insights in relation to these, and other asset classes at the Investment Adviser's discretion.
- iii) the **"Post Investment Period"**: a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion (the **"Maturity Date"**). On the Maturity Date, the Investment Adviser will decide, at its sole discretion, to liquidate, merge or reposition the Fund. Investors will be informed of such decision.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 5 years and 2 months and the Maturity Date to be changed to a later date.

The Fund will not have a geographical or sector focus but may have a high allocation to particular countries or sectors at any one time. The Fund will mainly invest in developed markets but may also have exposure to emerging markets. The asset allocation of the Fund is intended to be flexible to allow the Fund to allocate across countries and maintain the ability to adjust its exposures as market conditions dictate.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets.

#### **Risk management measure used: Commitment Approach**

##### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. The Investment Adviser will refer to an evolving benchmark (the "Benchmark") for portfolio construction and risk management purposes to ensure that the active risk (i.e. degree of deviation from the Benchmark) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Benchmark will evolve from Bloomberg Euro Aggregate 1-5 Year Index at Launch Date to 100% MSCI All Country World Minimum Volatility with Developed Markets 50% Hedged to EUR Index by the end of the Investment Period. During the Investment Period, the Fund's Benchmark will be adjusted quarterly to reflect the strategic shift from fixed income to equity investments, with a corresponding increase in equity exposure and reduction in fixed income holdings, such that the weights of the components at each anniversary of the Launch Date will be as outlined below. The Investment Adviser is not bound by the components or weighting of the Benchmark when selecting investments:

| Year          | Fixed Income component: Bloomberg Euro Aggregate 1-5 Year Index | Equity component: MSCI All Countries World Minimum Volatility with Developed Markets 50% Hedged to EUR Index |
|---------------|-----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Launch date   | 100%                                                            | 0%                                                                                                           |
| End of Year 1 | 75%                                                             | 25%                                                                                                          |
| End of year 2 | 50%                                                             | 50%                                                                                                          |
| End of Year 3 | 25%                                                             | 75%                                                                                                          |
| End of year 4 | 0%                                                              | 100%                                                                                                         |

Further details are available at the index provider website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices) and [www.msci.com](http://www.msci.com)."

"The **Systematic Asia Pacific Equity High Income Fund** seeks to generate a high level of income and provide capital growth. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in Asia Pacific.

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Fund may, on an opportunistic basis, in response to evolving market conditions, or for liquidity management purposes, invest the remaining portion of the portfolio across the full capital structure of companies and in the broad range of permitted assets, including (without limitation) fixed-income transferable securities, equities, equity-related instruments, units of collective investment undertakings, cash, deposits and money market instruments.

The Fund is a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

## Risk management measure used: Commitment Approach.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser may refer to the MSCI All Country Asia Pacific Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. Further details are available at the index provider website at [www.msci.com](http://www.msci.com)

"The **Systematic Nasdaq Equity High Income Fund** seeks to generate a high level of income and provide capital growth. The Fund invests at least 70% of its total assets in the equity securities of companies that are part of the Nasdaq 100 Index.

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.

The Fund may, on an opportunistic basis, in response to evolving market conditions, or for liquidity management purposes, invest the remaining portion of the portfolio across the full capital structure of companies and in the broad range of permitted assets, including (without limitation) fixed-income transferable securities, equities, equity-related instruments, units of collective investment undertakings, cash, deposits and money market instruments.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

## Risk management measure used: Commitment Approach.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the Nasdaq 100 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Index has been chosen because the Investment Adviser has determined that it is representative of the investment universe of the Fund and should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.nasdaq.com](http://www.nasdaq.com)

"The **Euro Income Fixed Maturity Bond Fund 2030 (2)** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 4 years and 2 months, subject to any extension of the Pre-Investment Period (as defined below), comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund), subject to any postponement of the Launch Date at the discretion of the Board of Directors, provided that the Launch Date cannot take place later than 6 months after the start of the Pre Investment Period;
- ii) the "**Investment Period**": a period of 3 years immediately following the Pre-Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the "**Ramp-up Period**"); and
- iii) the "**Post Investment Period**": a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion (the "**Maturity Date**"). On the Maturity Date, the Investment Adviser will decide, at its sole discretion, to liquidate, merge or reposition the Fund. Investors will be informed of such decision.

During the Pre-Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade;
- up to 25% of the Fund's Net Asset Value is invested in fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets, which, at the time of purchase, are rated non-investment grade. For the avoidance of doubt, this limit does not apply to instruments relating to such non-investment grade securities such as credit default swaps, currency swaps, futures and forwards.

If, during the final year of the Investment Period, the minimum requirement of 60% invested in fixed income securities rated investment grade issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members cannot be met without compromising the credit rating or the income target of the Fund, this minimum exposure requirement may not apply.

Should the credit quality of fixed income securities held by the Fund deteriorate to below investment grade causing the Fund to hold greater than 25% of its Net Asset Value in sub-investment grade fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. The Fund may use financial derivatives instruments for investment purposes.

In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in fixed income securities which have a maturity of up to 4 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have maturities of up to 3 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits or minimum exposure requirements set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 2 months and the Maturity Date to be changed to a later date.

### **Subscriptions**

Shareholders may subscribe into the Fund during the Pre-Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link

<https://www.blackrock.com/uk/individual/en/literature/fund-announcement/blackrock-global-funds-fund-announcement>.

Within 20 Business Days after the end of the Pre-Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### Redemptions

Shareholders will be able to redeem their Shares in the Fund during the Pre-Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

### Risk management measure used: Commitment Approach.

### ESG Policy

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

When investing in fixed income securities issued by companies, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 56 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process."

"The ***Euro Income Fixed Maturity Bond Fund 2031*** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 5 years and 2 months, subject to any extension of the Pre-Investment Period (as defined below), comprising three distinct periods namely:

- i) the **"Pre Investment Period"**: an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the **"Launch Date"** of the Fund), subject to any postponement of the Launch Date at the discretion of the Board of Directors, provided that the Launch Date cannot take place later than 6 months after the start of the Pre Investment Period;
- ii) the **"Investment Period"**: a period of 4 years immediately following the Pre-Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the **"Ramp-up Period"**); and
- iii) the **"Post Investment Period"**: a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion (the **"Maturity Date"**). On the Maturity Date, the Investment Adviser will decide, at its sole discretion, to liquidate, merge or reposition the Fund. Investors will be informed of such decision.

During the Pre-Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade;
- up to 25% of the Fund's Net Asset Value is invested in fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets, which, at the time of purchase, are rated non-investment grade. For the avoidance of doubt, this limit does not apply to instruments relating to such non-investment grade securities such as credit default swaps, currency swaps, futures and forwards.

If, during the final year of the Investment Period, the minimum requirement of 60% invested in fixed income securities rated investment grade issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members cannot be met without compromising the credit rating or the income target of the Fund, this minimum exposure requirement may not apply.

Should the credit quality of fixed income securities held by the Fund deteriorate to below investment grade causing the Fund to hold greater than 25% of its Net Asset Value in sub-investment grade fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. The Fund may use financial derivatives instruments for investment purposes.

In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in fixed income securities which have a maturity of up to 5 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have maturities of up to 4 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits or minimum exposure requirements set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 5 years and 2 months and the Maturity Date to be changed to a later date.

### **Subscriptions**

Shareholders may subscribe into the Fund during the Pre-Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link

<https://www.blackrock.com/uk/individual/en/literature/fund-announcement/blackrock-global-funds-fund-announcement>.

Within 20 Business Days after the end of the Pre-Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### **Redemptions**

Shareholders will be able to redeem their Shares in the Fund during the Pre-Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

**Risk management measure used: Commitment Approach.**

### **ESG Policy**

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

When investing in fixed income securities issued by companies, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 56 for further details of the ESG commitments made by the Fund.

## Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process."

The fourth paragraph of the investment objective and policy of the MENA Bond Fund is amended from page 130 of the Prospectus:

"The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets."

## 4. SFDR

The sixth paragraph under the heading "SFDR" on page 56 of the Prospectus is amended to include reference to the Euro Income Fixed Maturity Bond Fund 2030 (2) and Euro Income Fixed Maturity Bond Fund 2031.

## 5. German Tax Rules – Equity Funds

The third paragraph under the heading "German Tax Rules – Equity Funds" on page 62 of the Prospectus is amended to include reference to the Systematic Asia Pacific Equity High Income Fund and Systematic Nasdaq Equity High Income Fund.

## 6. Appendix E – Summary of Charges and Expenses

The following details are inserted (in alphabetical order) into Appendix E from page 203 of the Prospectus:

| Step Into Equity High Income Fund 2030 | Initial charge | Management Fee <sup>1</sup> | Distribution Fee | CDSC        |
|----------------------------------------|----------------|-----------------------------|------------------|-------------|
| Class A                                | 5.00%          | up to 1.50%                 | 0.00%            | 0.00%       |
| Class E                                | 3.00%          | up to 1.50%                 | 0.50%            | 0.00%       |
| Class EI                               | 3.00%          | up to 1.50%                 | 0.50%            | 0.00%       |
| Class K                                | 0.00%          | up to 1.50%                 | 0.50%            | up to 2.00% |
| Class X                                | 0.00%          | 0.00%                       | 0.00%            | 0.00%       |

| Systematic Asia Pacific Equity High Income Fund | Initial charge | Management Fee | Distribution Fee | CDSC        |

## 7. Appendix G – Securities Financing Transaction Disclosures

The table of Securities Financing Transaction Disclosures in Appendix G from page 225 of the Prospectus is updated to include the following:

| No.  | FUND                                            | TRS (in aggregate*)                        | Securities Lending**                       | Repo Transactions                          |
|------|-------------------------------------------------|--------------------------------------------|--------------------------------------------|--------------------------------------------|
|      |                                                 | Maximum/Expected proportion of the NAV (%) | Maximum/Expected proportion of the NAV (%) | Maximum/Expected proportion of the NAV (%) |
| 44.  | Euro Income Fixed Maturity Bond Fund 2030 (2)   | N/A                                        | 49/up to 40                                | N/A                                        |
| 45.  | Euro Income Fixed Maturity Bond Fund 2031       | N/A                                        | 49/up to 40                                | N/A                                        |
| 89.  | Step Into Equity High Income Fund 2030          | 10/0                                       | 49/ up to 25                               | 0/0                                        |
| 95.  | Systematic Asia Pacific Equity High Income Fund | 40/0                                       | 49/ up to 25                               | 0/0                                        |
| 101. | Systematic Nasdaq Equity High Income Fund       | 40/0                                       | 49/up to 25                                | 0/0                                        |

The list of Funds in the table shall be renumbered accordingly.

## 8. Dividend Policy

The third paragraph under the heading “Dividend Policy” on page 159 of the Prospectus is amended to include reference to the Step Into Equity High Income Fund 2030, the Systematic Asia Pacific Equity High Income Fund and the Systematic Nasdaq Equity High Income Fund.

## 9. Appendix A - Investment and Borrowing Powers and Restrictions

The fourteenth paragraph under the heading “Investment and Borrowing Powers and Restrictions” on page 171 of the Prospectus is amended to include reference to the Euro Income Fixed Maturity Bond Fund 2030 (2), the Euro Income Fixed Maturity Bond Fund 2031 and the Step Into Equity High Income Fund 2030.

A new section “6. Liquidity Management Tools” will be included after section “5. Investments in a Shari’ah Fund” under the heading “Investment and Borrowing Powers and Restrictions” on page 182 of the Prospectus:

### 6. Liquidity Management Tools

**To better manage the liquidity of the Funds, address redemption pressures under stressed market conditions and/or protect Shareholder interests, the Directors may use the liquidity tools and measures as specified in this Prospectus. These include, but are not limited to:**

- swing pricing, as described in Appendix B, point 17.3, page 186, which applies to all Funds except the Reserve Funds and**
- redemption gates, as described in Appendix B, point 32, page 189.**

## 10. Appendix H – SFDR Pre-Contractual Disclosure

The ninth paragraph under the heading “SFDR-Pre-Contractual Disclosures” on page 232 of the Prospectus is amended to include reference to Euro Income Fixed Maturity Bond Fund 2030 (2) and Euro Income Fixed Maturity Bond Fund 2031.

**Pre-contractual disclosure for the financial products referred to in  
Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Income Fixed Maturity Bond Fund 2030 (2)  
Legal entity identifier: 529900FBODYYN89VZQ31**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund seeks to address key environmental and social issues deemed to be relevant to sovereign bond issuers using the BlackRock Sovereign Sustainability Index ("BSSI") and the J.P. Morgan ESG ("JESG") sovereign scoring framework. The Fund will exclude sovereign bonds that score less than or equal to 2.0 in the BSSI or are in the bottom quintile of the JESG sovereign scoring framework.

The BSSI ranks sovereign debt issuers based on a country's overall sustainability measures from an environmental, social and governance perspective using UN Sustainable Development goals to guide factor selection. Environmental factors include carbon performance and climate policy as well as other environmental factors such as air quality and wastewater treatment. Social factors include equality, public health and other socioeconomic issues. The BSSI also incorporates factors such as peacefulness within its methodology.

The JESG sovereign scoring framework assesses countries based on a range of environmental, social and governance indicators, using data from international organisations and J.P. Morgan's own research. ESG scores are assigned to each country and reflect factors such as climate risk,

natural resource management, human development, institutional strength and corruption. Countries are ranked relative to a defined universe of sovereign issuers, and those in the lowest quintile are excluded from the Fund's investable universe.

The Fund also invests a minimum of 10% of its sovereign bond asset allocation in sustainable investments, across environmental and social objectives.

In respect of investments in fixed income securities other than sovereign bonds, the Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in corporate issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.
- ESG scores from the JESG sovereign scoring framework, with the bottom quintile of countries excluded from the investment universe.
- BSSI scores, with sovereign issuers scoring below 2.0 excluded.
- The proportion of sovereign holdings that qualify as sustainable investments, to ensure a minimum of 10% of net assets held in those securities are sustainable investments.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 10% of its holdings in sovereign issuers in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the ramp-up Period at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade. The fund will apply the following ESG policy following the Ramp-up Period.

In respect of investments in fixed income securities other than sovereign bonds, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- With respect to sovereign bonds, to maintain that the Fund holds at least 10% in Sustainable Investments in relation to such Sustainable Investments.
- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.

- Application to corporate issuers of the BlackRock EMEA Baseline Screens described above.
- The exclusion of sovereign issuers that have a BSSI score below 2.0 or are in the bottom quintile of the JESG sovereign scoring framework.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

**Pre-contractual disclosure for the financial products referred to in  
Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6,  
first paragraph, of Regulation (EU) 2020/852**

**Product name: Euro Income Fixed Maturity Bond Fund 2031  
Legal entity identifier: 5299001CFJXJH8L5R967**

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective: \_\_\_\_%**

☒ ☐ ☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

**What environmental and/or social characteristics are promoted by this financial product?**

The Investment Adviser will employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The Fund seeks to address key environmental and social issues deemed to be relevant to sovereign bond issuers using the BlackRock Sovereign Sustainability Index ("BSSI") and the J.P. Morgan ESG ("JESG") sovereign scoring framework. The Fund will exclude sovereign bonds that score less than or equal to 2.0 in the BSSI or are in the bottom quintile of the JESG sovereign scoring framework.

The BSSI ranks sovereign debt issuers based on a country's overall sustainability measures from an environmental, social and governance perspective using UN Sustainable Development goals to guide factor selection. Environmental factors include carbon performance and climate policy as well as other environmental factors such as air quality and wastewater treatment. Social factors include equality, public health and other socioeconomic issues. The BSSI also incorporates factors such as peacefulness within its methodology.

The JESG sovereign scoring framework assesses countries based on a range of environmental, social and governance indicators, using data from international organisations and J.P. Morgan's own research. ESG scores are assigned to each country and reflect factors such as climate risk,

natural resource management, human development, institutional strength and corruption. Countries are ranked relative to a defined universe of sovereign issuers, and those in the lowest quintile are excluded from the Fund's investable universe.

The Fund also invests a minimum of 10% of its sovereign bond asset allocation in sustainable investments, across environmental and social objectives.

In respect of investments in fixed income securities other than sovereign bonds, the Fund applies the BlackRock EMEA Baseline Screens. This set of screens avoids exposures that have negative environmental outcomes by excluding direct investment in issuers that have material involvement in thermal coal and tar sands extraction, as well as thermal coal-based power generation. Negative social outcomes are also avoided by excluding direct investment in issuers involved in controversial weapons and nuclear weapons, and material involvement in production and distribution of civilian firearms and tobacco. The Fund also excludes issuers deemed to have failed to comply with the 10 UN Global Compact Principles, which cover human rights, labour standards, the environment, and anti-corruption. Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

The Fund does not use a reference benchmark for the purposes of attaining the ESG characteristics that it promotes.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental or social characteristics promoted by the Fund include:

- The Fund's holdings in investments that are deemed to have associated positive externalities and avoidance of negative externalities as described above.
- The Fund's consideration of principal adverse impacts (PAIs) on sustainability factors, as described below.
- The Fund's exclusion of holdings in corporate issuers identified by the exclusion criteria set out in the BlackRock EMEA Baseline Screens, as described above.
- ESG scores from the JESG sovereign scoring framework, with the bottom quintile of countries excluded from the investment universe.
- BSSI scores, with sovereign issuers scoring below 2.0 excluded.
- The proportion of sovereign holdings that qualify as sustainable investments, to ensure a minimum of 10% of net assets held in those securities are sustainable investments.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund invests at least 10% of its holdings in sovereign issuers in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments will be assessed by the Investment Adviser to comply with BlackRock's DNSH standard outlined above.

BlackRock invests in Sustainable Investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments. Further information on the above can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-sfdr-sustainable-investments-methodology.pdf>

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as this Fund does not commit to investing in Sustainable Investments, however, they may form part of the portfolio.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes

☐ No

The Fund considers PAIs on sustainability factors through the application of the BlackRock EMEA Baseline Screens.

The Fund takes into account the following PAIs:

- GHG emissions
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The Fund seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance “ESG”-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the ramp-up Period at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade. The fund will apply the following ESG policy following the Ramp-up Period.

In respect of investments in fixed income securities other than sovereign bonds, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

- With respect to sovereign bonds, to maintain that the Fund holds at least 10% in Sustainable Investments in relation to such Sustainable Investments.
- Enhancing exposure to investments that are deemed to have associated positive externalities during the Investment Period while limiting investments that are deemed to have associated negative externalities throughout the fixed term.

- Application to corporate issuers of the BlackRock EMEA Baseline Screens described above.
- The exclusion of sovereign issuers that have a BSSI score below 2.0 or are in the bottom quintile of the JESG sovereign scoring framework.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Whilst the Fund applies exclusionary screens to avoid investment in the activities listed above, there is no commitment to reduce the scope of investments by a minimum rate.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

BlackRock assesses good governance practices of the investee companies by combining proprietary insights and shareholder engagement by the Investment Adviser, with data from external ESG research providers. BlackRock uses data from external ESG research providers to initially identify issuers which may not have satisfactory governance practices in relation to key performance indicators (KPIs) related to sound management structure, employee relations, remuneration of staff and tax compliance.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Adviser agrees with this external assessment, the Investment Adviser is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Adviser's direct engagement with the issuer. The Investment Adviser may also decide to reduce exposure to such issuers.

**What is the asset allocation planned for this financial product?**

A minimum of 80% of the Fund's total assets will be invested in investments that are aligned with the environmental and/or social characteristics described above (#1 Aligned with E/S characteristics).

The Fund may invest up to 20% of its total assets in other investments ('#2 Other').

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying investment.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to investing more than 0% of its assets in Sustainable Investments with an environmental objective aligned with the EU Taxonomy, however, these investments may form part of the portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

✓ No

The Fund does not currently commit to invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, however, these investments may form part of the portfolio.

*The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

\*\*As the Fund does not commit to making sustainable investments aligned with the EU Taxonomy, the proportion of sovereign bonds in the Fund portfolio will not impact the proportion of sustainable investments aligned with the EU Taxonomy included in the graph.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

The Fund does not commit to making investments in transitional and enabling activities, however, these investments may form part of the portfolio.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What is the minimum share of socially sustainable investments?**

The Fund does not commit to holding Sustainable Investments, however, they may form part of the portfolio.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

Other holdings are limited to 20% and may include derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide.

These investments may be used for investment purposes in pursuit of the Fund's (non ESG) investment objective, for the purposes of liquidity management and/or hedging.

No other holdings are considered against minimum environmental or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

**Where can I find more product specific information online?****More product-specific information can be found on the website:**

Please refer to the website page for the Fund, which can be found by typing the name of the Fund into the search bar on the BlackRock website: [www.blackrock.com](http://www.blackrock.com).

Further information on the criteria for BlackRock EMEA Baseline Screens can be found by copying and pasting the following link into your web browser: <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.
