## ESTABLISHED IN LUXEMBOURG

### SINGAPORE PROSPECTUS

This Singapore Prospectus incorporates and is not valid without the attached Luxembourg Prospectus dated 16 December 2025 and the Addendum dated April 2026 to the Luxembourg Prospectus dated 16 December 2025 (collectively, the “**Luxembourg Prospectus**”). BlackRock Global Funds (the “**Company**”) is an open-ended variable capital investment company constituted outside Singapore, organised as a *société anonyme* under the laws of Luxembourg and which qualifies as a *société d’investissement à capital variable*. The Company has appointed BlackRock (Singapore) Limited as its Singapore Representative and agent for service of process in Singapore. Details of the Singapore Representative are set out under the “Directory” section of this Singapore Prospectus.

## IMPORTANT INFORMATION

The collective investment schemes offered in this Singapore Prospectus, as listed in the cover page (each a “**Fund**” and collectively, the “**Funds**”) are established as sub-funds of BlackRock Global Funds (the “**Company**”). The Funds have been approved as recognised schemes under the Securities and Futures Act 2001 of Singapore (the “**SFA**”). A copy of this Singapore Prospectus has been lodged with and registered by the Monetary Authority of Singapore (the “**MAS**”). The MAS assumes no responsibility for the contents of this Singapore Prospectus. The registration of this Singapore Prospectus by the MAS does not imply that the SFA or any other legal or regulatory requirements have been complied with. The MAS has not, in any way, considered the investment merits of the Funds.

The Company is approved by the Luxembourg Commission de Surveillance du Secteur Financier (the “**CSSF**”) and was incorporated in Luxembourg as a *société anonyme* and qualifies as a *société d’investissement à capital variable* under Chapter 15 of the Luxembourg law of 17 December 2010 on undertakings for collective investment, as amended, modified or supplemented from time to time (the “**2010 Law**”) and, for some of its Funds pursuant to the provisions of the MMF Regulations. The Funds have also been approved by the CSSF.

This Singapore Prospectus was registered by the MAS on 21 April 2026. This Singapore Prospectus shall be valid for a period of 12 months from the date of the registration (i.e. up to and including 20 April 2027) and shall expire on 21 April 2027.

This Singapore Prospectus relating to the Funds incorporates and is not valid without the Luxembourg Prospectus. Unless the context otherwise requires, terms defined in the Luxembourg Prospectus shall have the same meaning when used in this Singapore Prospectus except where specifically provided for by this Singapore Prospectus. Certain defined terms can be found in the “Glossary” section of the Luxembourg Prospectus.

Each Fund is a separate portfolio of investments maintained and invested in accordance with specific investment objectives. Separate classes of shares may be issued in relation to a Fund.

In respect of the Euro Reserve Fund and the US Dollar Reserve Fund:

- a) The purchase of a Share in each Fund is not the same as placing funds on deposit with a bank or deposit-taking company;
- b) Although the Investment Adviser(s) may seek to maintain or preserve the principal value of each Fund, there can be no assurance that the relevant Fund will be able to meet this objective; and
- c) Each Fund is not a guaranteed fund, in that there is no guarantee as to the amount of capital invested or return received.

In accordance with the investment limits and restrictions set out in Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus and in the section headed “Investment Objectives and Policies” of the Luxembourg Prospectus, each Fund may use financial derivative instruments for investment purposes and for the purposes of efficient portfolio management and to hedge market, interest rate and currency risk. Further details on the investment restrictions and techniques and instruments in relation to the use of derivatives for each Fund are set out in the section headed “Investment Objective, Policy and Strategy” in paragraph 6 of this Singapore Prospectus and paragraph 18 of this Singapore Prospectus.

Please note that the Shares (as defined below) of each Fund are capital markets products other than prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Specified Investment Products (as defined in the Notice on the Sale of Investment Products issued by the MAS, as the same may be modified, amended or revised from time to time).

Potential investors should note that the Funds are subject to market fluctuations and that there can be no assurance that any appreciation in value will occur. The value of investments and the income from them, and therefore the value of, and income from the shares in the Funds (the “**Shares**”), can go down as well as up and an investor may not get back the amount invested.

The Board of Directors of the Company (the “**Board of Directors**”) have taken all reasonable care to ensure that the facts stated in this Singapore Prospectus are true and accurate in all material respects and that there are no other

material facts the omission of which makes any statement of fact or opinion in this Singapore Prospectus misleading. The Board of Directors accept responsibility accordingly.

The distribution of this Singapore Prospectus and the offering of the Shares may be restricted in certain jurisdictions. This Singapore Prospectus is not an offer or solicitation in any jurisdiction where such offer or solicitation is unlawful, where the person making the offer or solicitation is not authorised to make it or a person receiving the offer or solicitation may not lawfully receive it.

Investors should inform themselves as to (a) the legal requirements within their own country, (b) any foreign exchange or exchange control restrictions which may be applicable, and (c) the possible tax consequences, which they may encounter under the laws of the countries of their citizenship, residence or domicile, and which may be relevant to the subscription, holding, transfer or redemption of Shares, before investing in the Funds.

Investors are advised to carefully consider the risk factors set out under the sections headed “Risk Considerations” and “Specific Risk Considerations” of the Luxembourg Prospectus and to refer to paragraph 8 of this Singapore Prospectus.

If you are in any doubt about the contents of this Singapore Prospectus, you should consult your stockbroker, bank manager, solicitor, accountant or other independent financial adviser. The Shares are offered on the basis of the information contained in this Singapore Prospectus and the documents referred to in this Singapore Prospectus. No person is authorised to give any information or to make any representations concerning the Company or the Funds other than as contained in this Singapore Prospectus. Any purchase made by any person on the basis of statements or representations not contained in or inconsistent with the information and representations contained in this Singapore Prospectus will be solely at the risk of the purchaser.

Investors may wish to consult their independent financial adviser about the suitability of any Fund for their specific investment needs.

The delivery of this Singapore Prospectus or the issue of Shares shall not, under any circumstances, create any implication that the affairs of the Company and/or the Funds have not changed since the date of registration of this Singapore Prospectus. To reflect material changes, this Singapore Prospectus may be updated from time to time and investors should investigate whether any more recent Singapore Prospectus is available.

For enquiries in relation to the Company or any Fund, investors may contact the Singapore Representative at Twenty Anson, #18-01, 20 Anson Road, Singapore 079912, telephone number: +65 6411 3000, email: [clientservice.asiapac@blackrock.com](mailto:clientservice.asiapac@blackrock.com) or any appointed Singapore distributor.

### 1 THE COMPANY

The Company is an umbrella type open-ended variable capital investment company, with segregated liability between sub-funds, incorporated with limited liability under the laws of Luxembourg. Full details of the Company (including where its Articles of Association may be inspected) are set out under Appendix C (Additional Information) to the Luxembourg Prospectus.

### 2 THE FUNDS

2.1 The Board of Directors may establish one or more sub-funds under the Company from time to time. The sub-funds currently offered to investors in Singapore in this Singapore Prospectus are listed in the cover page (each a “**Fund**” and collectively known as the “**Funds**”).

2.2 The Board of Directors may also create new share classes in a Fund from time to time. As at the date of registration of this Singapore Prospectus, only Class A and D Shares (each of which may be offered as Non-Distributing or Distributing Share Classes, and/or Hedged Share Classes) are offered (each a “**Class**” and collectively the “**Classes**”).

#### 2.3 Class A Shares

2.3.1 Class A Shares are available to all investors.

2.3.2 Class A Shares may be offered as Distributing Share Classes, and for such classes the current dividend policy of the Board of Directors is to distribute substantially all the investment income (where available) for the period after deduction of expenses for Share Classes which distribute net or all of the investment income for the period, and potentially a portion of capital before deduction of expenses for Share Classes which distribute gross income or total return. The Board of Directors may also determine if and to what extent dividends may include distributions from both net realised and net unrealised capital gains. Distributing Share Classes are referred to using 1 or (D) e.g. Class A1 or Distributing (D) Shares (distributing daily), 3 or (M) e.g. Class A3 or Distributing (M) Shares (distributing monthly), 4 or (A) i.e. Class A4 or Distributing (A) Shares (distributing annually), 5 or (Q) i.e. Class A5 or Distributing (Q) Shares (distributing quarterly), 6 or (S) i.e. Class A6 or Distributing (S) Shares (distributing monthly on the basis of expected gross income), 8 or (R) i.e. Class A8 or Distributing (R) Shares (distributing monthly on the basis of expected gross income and any Interest Rate Differential arising from Share Class currency hedging), 9 or (Y) i.e. Class A9 or Distributing (Y) Shares (distributing quarterly on the basis of expected gross income and at least equal to, or greater than, the Dividend Threshold Amount on an annual basis), 10 or (T) i.e. Class A10 or Distributing (T) Shares (distributing monthly on the basis of expected gross total return) and 11 or (C) i.e. Class A11 or Distributing (C) Shares (distributing monthly on a basis that may not be linked to income or capital gains).

2.3.3 Class A Shares may be offered as Non-Distributing Share Classes, and for such classes the current dividend policy of the Board of Directors is to retain and reinvest all net income. Non-Distributing Share Classes are also referred to using the number 2 i.e. Class A2.

2.3.4 Class A Shares may also be offered as Hedged Share Classes and for such classes a hedging strategy will be applied which aims to mitigate currency risk between the Net Asset Value of the Fund and the currency of the Hedged Share Class, while taking account of practical considerations including transaction costs.

#### 2.4 Class D Shares

2.4.1 Class D Shares are intended for certain providers of independent advisory services or discretionary investment management or certain classes of distributors, and are available subject to the discretion of the Management Company (taking into account local regulations).

2.4.2 Class D Shares may be offered as Distributing Share Classes, and for such classes the current dividend policy of the Board of Directors is to distribute substantially all the investment income (where available) for the period after deduction of expenses for Share Classes which distribute net or all of the investment income for the period, and potentially a portion of capital before deduction of expenses for Share Classes which distribute gross. The Board of Directors may also determine if and to what extent dividends may include distributions from both net

realised and net unrealised capital gains. Distributing Share Classes are referred to using 1 or (D) e.g. Class D1 or Distributing (D) Shares (distributing daily), 3 or (M) e.g. Class D3 or Distributing (M) Shares (distributing monthly), 4 or (A) i.e. Class D4 or Distributing (A) Shares (distributing annually), 5 or (Q) i.e. Class D5 or Distributing (Q) Shares (distributing quarterly), 6 or (S) i.e. Class D6 or Distributing (S) Shares (distributing monthly on the basis of expected gross income), 8 or (R) i.e. Class D8 or Distributing (R) Shares (distributing monthly on the basis of expected gross income and any Interest Rate Differential arising from Share Class currency hedging), 9 or (Y) i.e. Class D9 or Distributing (Y) Shares (distributing quarterly on the basis of expected gross income and at least equal to, or greater than, the Dividend Threshold Amount on an annual basis), 10 or (T) i.e. Class D10 or Distributing (T) Shares (distributing monthly on the basis of expected gross total return) and 11 or (C) i.e. Class D11 or Distributing (C) Shares (distributing monthly on a basis that may not be linked to income or capital gains).

- 2.4.3 Class D Shares may be offered as Non-Distributing Share Classes, and for such classes the current dividend policy of the Board of Directors is to retain and reinvest all net income. Non-Distributing Share Classes are also referred to using the number 2 i.e. Class D2.
- 2.4.4 Class D Shares may also be offered as Hedged Share Classes and for such classes a hedging strategy will be applied which aims to mitigate currency risk between the Net Asset Value of the Fund and the currency of the Hedged Share Class, while taking account of practical considerations including transaction costs.
- 2.5 Please refer to the sections headed “Classes and Form of Shares” and “Dividends” of the Luxembourg Prospectus for further details on Class A and Class D Shares.

### 3 MANAGEMENT AND ADMINISTRATION

Full details on the management and administration of the Company are set out under the section headed “Investment Management of the Funds” of the Luxembourg Prospectus.

#### 3.1 Management Company

- 3.1.1 BlackRock (Luxembourg) S.A. has been appointed by the Company to act as its management company (the “**Management Company**”).
- 3.1.2 The Management Company is a wholly owned subsidiary within the BlackRock Group<sup>1</sup>. It is regulated by the CSSF. The Management Company has been managing collective investment schemes or discretionary funds since 1988. The Management Company is also authorised to act as an Alternative Investment Fund Manager in accordance with Article 5 of the Luxembourg law of 12 July 2013 on alternative investment fund managers, as amended, modified or supplemented from time to time.
- 3.1.3 In the event that the Management Company becomes insolvent, the Company may terminate its appointment immediately. A replacement or successor entity would be appointed in accordance with applicable laws and regulations.

**Investors should note that any past performance of the Management Company is not indicative of the future performance of the Management Company.**

#### 3.2 Investment Adviser and Sub-Investment Advisers

- 3.2.1 In respect of the Funds, the Management Company has delegated its investment management functions to BlackRock Investment Management (UK) Limited, BlackRock Financial Management, Inc., BlackRock Investment Management, LLC and BlackRock (Singapore) Limited (collectively, the “**Investment Advisers**”). The Investment Advisers provide advice and management in the areas of stock and sector selection and strategic allocation.

---

<sup>1</sup> “**BlackRock Group**” means the BlackRock group of companies, the ultimate holding company of which is BlackRock, Inc.

- 3.2.2 BlackRock Investment Management (UK) Limited (“**BIMUK**”) is domiciled in England and Wales and regulated by the Financial Conduct Authority. BIMUK has been managing collective investment schemes or discretionary funds since 1982.
- 3.2.3 BlackRock Financial Management, Inc. (“**BFM**”) and BlackRock Investment Management, LLC (“**BIMLLC**”) are domiciled in the United States of America and regulated by the Securities and Exchange Commission. BFM and BIMLLC have been managing collective investment schemes or discretionary funds since 1995 and 1999 respectively.
- 3.2.4 BlackRock (Singapore) Limited (“**BSL**”) is domiciled in Singapore and regulated by the MAS. BSL has been managing collective investment schemes or discretionary funds since 2001.
- 3.2.5 In respect of the Funds, the relevant Investment Adviser(s) has/have sub-delegated some of its/their functions to BlackRock Japan Co., Ltd, BlackRock Investment Management (Australia) Limited and BlackRock Asset Management North Asia Limited (each a “**Sub-Investment Adviser**”). Notwithstanding the appointment of the Investment Advisers or Sub-Investment Advisers, the Management Company accepts full responsibility to the Company for all investment transactions.
- 3.2.6 BlackRock Asset Management North Asia Limited (“**BAMNA**”) is domiciled in Hong Kong and regulated by the Securities and Futures Commission. BAMNA has been managing collective investment schemes or discretionary funds since 2003.
- 3.2.7 BlackRock Investment Management (Australia) Limited (“**BIMAL**”) is domiciled in Australia and regulated by the Australian Securities and Investments Commission. BIMAL has been managing collective investment schemes or discretionary funds since 1983.
- 3.2.8 BlackRock Japan Co., Ltd. (“**BLKJap**”) is domiciled in Japan and regulated by the Financial Services Agency (Japan). BLKJap has been managing collective investment schemes or discretionary funds since 1988.
- 3.2.9 The Investment Advisers and the Sub-Investment Advisers are indirect operating subsidiaries of BlackRock, Inc., the ultimate holding company of the BlackRock Group. The Investment Advisers and the Sub-Investment Advisers form part of the BlackRock Group.
- 3.2.10 The following table sets out the Investment Advisers and Sub-Investment Advisers in respect of each Fund as at 31 August 2025:

3.2.11 Both the Investment Advisers and Sub-Investment Advisers listed above and the Investment Advisers and Sub-Investment Advisers in respect of a Fund may change from time to time and such change will be updated at the next Singapore Prospectus registration date. The list of all investment advisers and sub-investment advisers over the last six or twelve months will be published at the annual and semi-annual reports of the Company. Please contact the Singapore Representative for up-to-date information regarding the relevant Investment Advisers and Sub-Investment Advisers of a Fund.

3.2.12 In the event that any of the Investment Managers or Sub-Investment Advisers becomes insolvent, the appointment of the relevant Investment Manager or Sub-Investment Adviser, as the case may be, may be terminated pursuant to the terms of the relevant advisory agreement and in accordance with applicable laws and regulations.

**Investors should note that any past performance of the Investment Advisers and Sub-Investment Advisers is not indicative of their future performance.**

### 3.3 Directors and Key Executives of the Management Company

#### **Directors**

##### ***Jonathan Griffin***

Mr. Griffin was appointed on 23 September 2021 as independent non-executive director to BlackRock (Luxembourg) S.A. and BlackRock Fund Management Company S.A.. He retired from JPMorgan Asset Management in 2020 following a 34-year career with roles based in the UK, Germany and Tokyo including the last 19 years as CEO of JPMorgan Asset Management's Luxembourg based Management company.

He was a board member of the Association of the Luxembourg Fund Industry (ALFI) from 2005-2019 and a board member of the European Fund Management Association (EFAMA) from 2019-2020.

Mr. Griffin holds the professional designation as a Certified Investment Fund Director (CIFD) since 2021.

##### ***Svetlana Butvina***

Ms Butvina, Managing Director, is the Head of Risk at BlackRock (Luxembourg) S.A. She is a member of the Risk and Quantitative Analysis Group, focusing on Regulatory Risk Oversight and Model Risk Management.

She has over 15 years' experience in the asset management and banking industry. Prior to joining BlackRock in 2012, she held risk management and IT roles at a number of institutions including Schroders Investment Management, State Street Bank and Biomax Informatics. Earlier, she was an Assistant Scientist at Lomonosov Moscow State University.

She earned a Diploma with Honours in Mathematics and a PhD in Mathematics and Physics at Lomonosov Moscow State University. She is also a CFA and a FRM Charter holder. She has been a member of the Group of Economic Advisers of ESMA's Committee for Economic and Market Analysis since 2018.

### ***Joanne Fitzgerald***

Ms. Fitzgerald is a Director of the Management Company. She is responsible for the on-going company secretarial maintenance of over 250 real estate related entities based in various jurisdictions throughout Europe and Asia. Fund launches, incorporations of holding companies and special purpose vehicles, board/shareholder meetings, statutory filings and involvement with re-financings, acquisitions and dispositions include some of the responsibilities that fall within her remit. She also acts as director on a number of BlackRock's advisor entities in addition to the general partners of the funds, holding companies, and special purpose vehicles in various jurisdictions throughout Europe and Asia. In this role, she is directly involved in all decisions concerning the assets and for ensuring that good corporate governance practices are applied and regulatory and legal requirements are adhered to.

Ms. Fitzgerald's service with the firm dates back to 2006, including her years with MGPA, which was acquired by BlackRock in 2013. She has played an integral part in creating a governance framework during her time at MGPA. Prior to joining MGPA, she worked for JP Morgan Luxembourg S.A. as a Senior Company Administrator, where she was responsible for the on-going company secretarial maintenance of 14 SICAVs and dealt with a variety of areas in addition to the routine business of the funds. She has 12 years of experience in investment management, eight of which are specific to real estate.

Ms. Fitzgerald is a Fellow of the Institute of Chartered Secretaries and Administrators (ICSA). She earned a Law degree and a Higher Diploma in Business and Financial and Information Systems from University College Cork, Ireland in 2001 and 2002, respectively.

### ***Richard Gardner***

Mr. Gardner is currently the Head of EMEA Client Core COO team and COO for BlackRock Life Limited (BLL). In his role, Mr. Gardner is responsible for the effective operation of the iSW and ICB Sales channels and driving commercial excellence through the EMEA iSW Core RM/Sales Support team and RFP team. This includes partnering with functional management to support growth and client service, manage risk, oversee expenses, promote operational efficiency and respond to market and regulatory change.

As COO for BLL, Mr. Gardner is also responsible for overseeing the day to day operation of the business and supports the BLL CEO in ensuring that BlackRock delivers an effective service for BLL across functions outsourced to BlackRock.

Prior to his current role Mr. Gardner was the Chief Administrative Officer of EMEA Retail and responsible for risk, control and change management. Mr Gardner joined BlackRock as a Relationship Manager in the Aladdin Platform Group (APG) in January 2013.

Prior to joining BlackRock, Mr. Gardner held senior roles at UBS Asset Management, the London Stock Exchange Group and Accenture. Mr. Gardner began his career as a mainframe developer and is certified in Prince2, ITIL, Six Sigma, Agile and Microsoft Systems Engineering.

### ***Michael Renner***

Mr Renner (German and Luxembourgish), a Luxembourg resident was appointed on 18 August 2022 as an independent non-executive director to BlackRock (Luxembourg) S.A.. Mr Renner is a former Managing Director of Fidessa S.A., regulated by the CSSF, where he also took the role of CIO and CFO. He has held other senior regulated manager positions at financial institutions in the UK, Luxembourg and Germany during his 35+ years in financial markets.

Mr Renner holds a Diploma in Banking from IHK Düsseldorf, Germany, and a professional qualification in Private Client Investment Advice & Management from the Chartered Institute for Securities & Investment in London, England where he is a chartered member (MCSI). He is also a member of Institut Luxembourgeois des Administrateurs (ILA) in Luxembourg.

### **Leon Schwab**

Ms Schwab is a Director within BlackRock Global Funds Administration Services (GFAS) group which is part of Business Operations. Ms Schwab is responsible for the oversight of EMEA Alternatives business including Hedge Funds, Fund of Hedge Funds, Private Credit and Alternatives Solutions Funds.

She joined BlackRock in 1995 and has over 25 years of mutual fund, accounting experience in Luxembourg, spanning regulated and unregulated funds domiciled in Ireland, Cayman, Jersey and Luxembourg.

She is a resident of Luxembourg and is a director of two Luxembourg domiciled regulated management companies as well as a number of Luxembourg domiciled real estate, private credit, private equity and infrastructure structures.

### **Benjamin Gregson**

Benjamin Gregson (Australian) Is a Luxembourg resident Managing Director and Head of the BlackRock Luxembourg office and Regulatory Governance.

Mr Gregson's primary responsibility is the oversight of BlackRock's Luxembourg Fund platform and Leadership of the BlackRock offices in Luxembourg. This includes partnering with functional teams to support growth, manage risk, promote operational efficiency, and respond to market and regulatory change.

Mr Gregson is Chair of the Dirigeant Committee and a Director of BlackRock (Luxembourg) S.A., a Director of BlackRock Funds Management Company S.A. (combined AUM of \$180B as (January 2024)) and a member of the EMEA Product Development Committee.

In addition to his BlackRock positions Mr Gregson is a Board Member of the Association of the Luxembourg Fund Industry (ALFI) since 2023.

Mr Gregson has 25+ years industry experience (18 at BlackRock) gained through senior positions in Australia, Asia Pacific & Luxembourg. Prior to relocating to Luxembourg, Mr Gregson was Head of Asia-Pacific Fund Administration based in Hong Kong.

Mr Gregson obtained a Bachelor of Commerce from the University of Newcastle (Australia) and is a member of the CFA Institute.

Svetlana Butvina, Joanne Fitzgerald, Richard Gardner, Benjamin Gregson and Leon Schwab are employees of the BlackRock Group (of which the Management Company, Investment Advisers and Principal Distributor are part).

## **4 OTHER PARTIES**

### **4.1 Singapore Representative**

4.1.1 The Company has appointed BlackRock (Singapore) Limited to act as the representative for the Funds in Singapore (the "**Singapore Representative**") to provide and maintain certain administrative and other facilities in respect of the Company.

4.1.2 If the Singapore Representative goes into liquidation or if a receiver is appointed (e.g. in the event where the Singapore Representative becomes insolvent), the appointment of the Singapore Representative may be terminated and a replacement or successor entity may be appointed in its place pursuant to the terms of the Singapore representative agreement in accordance with applicable laws and regulations.

### **4.2 Depositary**

4.2.1 The Bank of New York Mellon SA / NV, Luxembourg Branch acts as custodian (the "**Depositary**") of the assets of the Company and assumes the functions and responsibilities of a custodian under the 2010 Law and other

applicable law. The Depositary will also act as depositary of the Company for the purposes of the UCITS Directive and, in doing so, will comply with the provisions of the UCITS Directive. The Depositary was incorporated with limited liability in Belgium on 30 September 2008 with registered capital of EUR 1,723,485,526.21 as at 31 December 2017. Its office/correspondence address is 2-4, rue Eugène Ruppert, L-2453 Luxembourg, Grand Duchy of Luxembourg and its registered office address is 2-4, rue Eugène Ruppert, L-2453 Luxembourg. Its ultimate holding company is The Bank of New York Mellon Corporation which is incorporated in the United States of America. The Depositary is regulated by the CSSF.

4.2.2 The assets of the Company are entrusted to the Depositary for safekeeping. The Depositary may appoint delegates (which may not always be part of the same group of companies as the Depositary) in order to facilitate the custody of assets in certain markets. The Depositary is required to exercise reasonable care in the appointment of the delegates and the selection, appointment, due diligence and monitoring of such delegates remains the responsibility of the Depositary. Before appointing a delegate, the Depositary will evaluate various attributes such as a delegate's securities processing and operational capabilities, financial strength, reputation and market standing and expertise of personnel. The Depositary's liability shall not be affected by the fact that it has entrusted to a third party any assets in its safekeeping. The assets of the Company should be identified in the Depositary's books and records as belonging to the Company. All delegates appointed shall be licensed and regulated under application law to carry out the relevant financial activities in the relevant jurisdiction.

4.2.3 In the event that the Depositary becomes insolvent the Company may terminate its appointment immediately by giving notice in writing. A replacement or successor entity would be appointed in accordance with applicable laws and regulations.

4.2.4 Please refer to the section headed "The Depositary" of Appendix C (Additional Information) of the Luxembourg Prospectus for further details.

#### 4.3 **Transfer Agent and Registrar**

4.3.1 J.P. Morgan SE, Luxembourg Branch (the "**Transfer Agent**") acts as the transfer agent and registrar of the Funds.

4.3.2 Further information on the Depositary and Transfer Agent can be found under Appendix C (Additional Information) to the Luxembourg Prospectus.

#### 4.4 **Auditor**

4.4.1 The auditor of the Company is Ernst & Young S.A.

### 5 **STRUCTURE OF THE FUNDS**

5.1 The Company is an umbrella type open-ended variable capital investment company with segregated liability between the Funds. Each Fund is a separate portfolio of investments formed under the umbrella structure of the Company and has its own investment objectives and policies.

5.2 Information contained in the subsidiary register of Singapore Shareholders is available from the office of the Singapore Representative for inspection by investors, free of charge, during normal Singapore business hours.

### 6 **INVESTMENT OBJECTIVE, POLICY AND STRATEGY**

|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>it is expected to derive future revenue from the advancement, development, and use of AI technology.</p> <p>Such companies are generally expected to operate in one or more of the following areas: (i) computing and infrastructure (e.g., graphics processing units (GPUs), cloud computing and data centers); (ii) foundational models; (iii) data (e.g., vertical industry data and proprietary data); (iv) software (e.g., enterprise applications); (v) services (e.g., information technology (IT) services); (vi) internet (e.g., chatbots or content creation); or (vii) hardware (e.g., robotics, smart glasses).</p> <p>In normal market conditions the Fund will invest in equity securities of companies with large, medium and small market capitalisation (market capitalisation is the share price of the company multiplied by the number of shares issued). Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> |

| Fund                    | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                         | <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Asia Pacific Bond Fund* | <p>The Asia Pacific Bond Fund seeks to maximise income without sacrificing long term capital growth and seeks to invest in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) focused investing. The Fund invests at least 70% of its total assets in fixed income transferable securities of issuers domiciled in, or exercising the predominant part of their economic activity in the Asia Pacific region.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p>As part of its investment objective, the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 15% of total assets and the Fund’s exposure to Distressed Securities is limited to 5% of its total assets.</p> <p>The Fund invests no more than 20% of its total assets in non-investment grade fixed income transferable securities.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> |

| Asian High Yield Bond Fund    | <p>The Asian High Yield Bond Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in the Asia Pacific region. The Fund may invest in the full spectrum of permitted fixed income transferable securities and fixed income related securities, including non-investment grade. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and QFI Access Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China via the QFI regime and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using iBoxx ChinaBond Asian High Yield (USD Hedged) Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 70% of Net Asset Value.</b></p> <p><b>Important Note: please note that the liquidity of Asian high yield bond market is particularly unpredictable. Investors should read the "Liquidity Risk" section of the "Risk Considerations" section of the Luxembourg Prospectus and the "Suspension and Deferrals" section of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus prior to investing in this Fund.</b></p> |
| Asian Multi-Asset Income Fund | <p>The Asian Multi-Asset Income Fund seeks to provide income and long-term capital growth from its investments. The Fund invests at least 70% of its total assets, directly and indirectly through permitted investments, in fixed income transferable securities and equity securities of issuers and companies domiciled in, or exercising the predominant part of their economic activity in, Asia, excluding Japan. The Fund invests in the full spectrum of permitted investments including equities, equity-</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|                       | <p>related securities, fixed income transferable securities (including non-investment grade), units of CIS, cash, deposits and money market instruments. The Fund has a flexible approach to asset allocation with a bias towards income-generating securities (including fixed income transferable securities and dividend-paying equities). Currency exposure is flexibly managed.</p> <p>The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly in the PRC by investing via the QFI regime and/or via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the QFI regime, the Stock Connects, the Foreign Access Regime and/or Bond Connect.</p> <p>As part of its investment objective the Fund may invest up to 10% of its total assets in asset-backed securities (“<b>ABS</b>”) and mortgage-backed securities (“<b>MBS</b>”) whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund’s exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>The Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using 50% MSCI Asia ex Japan Index / 25% JP Morgan Asia Credit Index / 25% Markit iBoxx ALBI Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 100% of Net Asset Value.</b></p> |
| Asian Tiger Bond Fund | <p>The Asian Tiger Bond Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in the fixed income transferable securities of issuers domiciled in, or exercising the predominant part of their economic activity in, Asian Tiger countries. The Fund may invest in the full spectrum of available securities, including non-investment grade. The currency exposure of the Fund is flexibly managed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Fund                           | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                                | <p>The Fund is a QFI Access Fund and may invest directly up to 20% of its total assets in the PRC by investing via the QFI regime.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the QFI regime, the Foreign Access Regime and/or Bond Connect.</p> <p>As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 20% of total assets and the Fund's exposure to Distressed Securities is limited to 10% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using JP Morgan Asian Credit Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 150% of Net Asset Value.</b></p> |
| Brown To Green Materials Fund* | <p>The Brown To Green Materials Fund seeks to maximise total return. The Fund invests in the equity securities of companies globally that contribute to the transitioning materials theme. The transitioning materials theme covers the need for materials to build lower carbon technologies and efforts to reduce the emissions intensity of the materials sector. As well as being aligned to the principles of the transitioning materials theme, at least 80% of the Fund's total assets will be invested in companies which qualify under BlackRock's proprietary 'Transition Assessment' methodology<sup>4</sup>. Although the intention is to invest only in equity securities of such companies, the Fund may gain limited indirect exposure to other equity securities, fixed income securities, CIS or cash (which may not be consistent with the transition theme) for the purposes of meeting the Fund's objective or for liquidity purposes.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

<sup>4</sup> Please refer to the section headed "What investment strategy does this financial product follow?" in the Fund's SFDR Pre-Contractual Disclosure in Appendix H (SFDR Pre-Contractual Disclosure) to the Luxembourg Prospectus for further details on BlackRock's proprietary 'Transition Assessment' methodology.

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|      | <p>The Fund seeks to invest in Sustainable Investments and the Fund seeks for its total assets to be invested in accordance with the principles of environmental, social and governance (“<b>ESG</b>”) Policy described below.</p> <p>More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>Although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p><b>Risk management measure used: Commitment Approach</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Climate Transition Benchmark Exclusions.</p> <p>The Investment Adviser will identify a universe of potential investments within the following categories of companies – consistent with the principles of the transitioning materials theme:</p> <p>Emission Reducers: supplier of materials that have a plan to reduce their carbon emissions intensity over a defined period.</p> <p>Enablers: producers of materials that enable the world to transition to a lower carbon global economy (e.g. lithium) and companies providing solutions that enable materials companies to reduce their emissions intensity.</p> <p>Green Leaders: companies producing materials with below average carbon emissions intensity for their particular industry (e.g. within the steel sector).</p> <p>References to materials above include materials that enable transition to a lower carbon economy and materials for which lower carbon technologies are not a key demand driver.</p> <p>Having determined those companies which meet the principles of the transitioning materials theme, the Fund will further apply BlackRock’s proprietary ‘Transition Assessment’ methodology<sup>4</sup> to ensure a minimum of 80% of the Fund’s total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds’ names.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |

| China Bond Fund | <p>The China Bond Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in Renminbi or other non-Chinese domestic currencies issued by entities exercising the predominant part of their economic activity in the PRC through recognised mechanisms including but not limited to the Chinese Interbank Bond Market, the exchange bond market, quota system and/or through onshore or offshore issuances and/or any future developed channels. The Fund is a QFI Access Fund and a CIBM Fund and may invest without limit in the PRC via the QFI regime and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>The Fund may invest in the full spectrum of permitted fixed income transferable securities and fixed income related securities, including non-investment grade (limited to 50% of total assets). Currency exposure is flexibly managed.</p> <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Absolute VaR.</b></p> <p><b>Expected level of leverage of the Fund: 190% of Net Asset Value.</b></p> |
| China Fund      | <p>The China Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the People's Republic of China.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the QFI regime and/or via the Stock Connects.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |

| China Multi-Asset Fund* | <p>The China Multi-Asset Fund follows an asset allocation policy that seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (ESG) investing.</p> <p>In order to achieve its investment objective, the Fund will seek to invest at least 70% of its total assets (excluding cash) in the full spectrum of permitted investments to gain exposure to the People's Republic of China (PRC) which may include issuers and/or companies exercising the predominant part of their economic activity in the PRC. The Fund's permitted investment may include equities, equity-related securities, fixed income transferable securities and fixed income related transferable securities including non-investment grade securities (limited to 20% of total assets), units or shares in undertakings for collective investment (including exchange traded funds), derivatives and, when determined appropriate, cash, deposits and cash-equivalent instruments. The Fund may, at times, take indirect exposure to relevant assets, including commodities, through investments in undertakings for collective investment (including exchange traded funds), and derivatives on commodity indices where applicable.</p> <p>As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets.</p> <p>The Fund has a flexible approach to asset allocation. The Fund is a QFII Access Fund, a Stock Connect Fund and a CIBM Fund and may invest without limit in the PRC via the QFII regime, via the Stock Connects and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p><b>Risk management measure used: Commitment Approach</b></p> <p><b>ESG Policy</b></p> <p>Where the Fund holds securities directly, the Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Fund will invest at least 80% of total assets, excluding cash and derivatives, in Collective Investment Schemes qualifying as Article 8 or 9 of the SFDR Regulation and investment strategies which pursue a positive ESG objective or outcome and</p> |

|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         | <p>do not adopt ESG exclusionary screens solely as their ESG policy, or, in the case of government bond exposures, track benchmark indices incorporating ESG requirements. Where determined appropriate, the Fund may invest directly in derivatives, cash and near-cash instruments.</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining companies (i.e. those companies which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on their ability to manage the ESG related risks and opportunities associated with their business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| China Onshore Bond Fund | <p>The China Onshore Bond Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in Renminbi issued by entities exercising the predominant part of their economic activity in the PRC (through recognised mechanisms including (but not limited to) the Chinese Interbank Bond Market, the exchange bond market, quota system and/or through onshore or offshore issuances and/or any future developed channels) in a manner consistent with the principles of environmental, social and governance “ESG” focused investing. The 70% ratio above may include, on a temporary basis and for liquidity management purposes the holding of cash and near cash instruments.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund is a QFI Access Fund and a CIBM Fund and may invest without limit in the PRC via the QFI regime and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund may invest in the full spectrum of permitted fixed income transferable securities and fixed income related securities, including non-investment grade (limited to 50% of total assets). Currency exposure is flexibly managed.</p> <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Absolute VaR.</b></p> <p><b>Expected level of leverage of the Fund: 120% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens. Investors should please note in relation to the screen which covers the UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption) that at the time of the launch of this Fund, coverage of the investable universe is limited but is expected to improve over time.</p> <p>The Investment Adviser also intends to invest at least 10% of the Fund's total assets in "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively).</p> <p>In very limited circumstances, the Fund may inadvertently gain indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that are inconsistent with the exclusions described above.</p> |

| Fund                   | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Circular Economy Fund* | <p>The Circular Economy Fund seeks to maximise total return. The Fund invests at least 80% of its total assets in the equity securities of companies globally that benefit from, or contribute to, the advancement of the “Circular Economy”. Although the intention is to invest only in such equity securities, up to 20% of the total assets of the Fund may be invested in other equity securities, fixed income securities, CIS or cash (which may not be consistent with the Circular Economy concept) for the purposes of meeting the Fund’s objective or for liquidity purposes.</p> <p>The Circular Economy concept recognises the importance of a sustainable economic system and represents an alternative economic model to the default “make-use-throw away” approach of consumption, which is believed to be unsustainable given scarce resources and the rising cost of managing waste. The Circular Economy concept promotes the redesign of products and systems to minimise waste and to enable greater recycling and reuse of materials. The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Fund will also aim to invest in line with the principles of the Circular Economy as determined by the Investment Adviser (having regard to specialist third party information sources as appropriate). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation, across all industry sectors, that benefit from the Circular Economy and/or contribute to the advancement of the Circular Economy across three categories:</p> <p>Adopters: Companies that are adopting ‘circularity’ in their business operations (e.g. companies involved in sustainable fashion or companies that have made a commitment to use recycled plastics in production processes).</p> <p>Enablers: Companies that provide new, innovative solutions directly aimed at solving inefficient material use and pollution (e.g. companies involved in recycling of products, companies involved in reducing inputs such as water and energy and companies enabling sustainable transportation).</p> <p>Beneficiaries: Companies that provide alternatives to materials that cannot be recycled or supply these to the extended value chain (e.g. companies that will see an increase in demand for their products from shifts towards more easily recyclable products and companies that offer natural or plant-based circular alternatives to non-recyclable and non-biodegradable products).</p> <p>The assessment of a company’s benefit from and/or contribution to the advancement of the Circular Economy in each of the above categories may be based on percentage of revenue, a defined total revenue threshold, or any connection to the Circular Economy regardless of the amount of revenue received.</p> |

|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      | <p>The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the Circular Economy and on their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.</p> <p>The Fund adopts a “best in class” approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.</p> <p>The weighted average ESG rating of the Fund will be higher than the ESG rating of the MSCI All Countries World Index after eliminating at least 20% of the least well-rated securities from the MSCI All Countries World Index.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 9 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Climate Transition Multi-Asset Fund* | <p>The Climate Transition Multi-Asset Fund seeks to maximise total return by investing in issuers globally that are expected to enable, and/or benefit from, the transition to a lower greenhouse gas emissions economy and to net zero carbon emissions. The Fund invests in the full spectrum of permitted investments including (but not limited to) equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments. Currency exposure and asset allocation is flexibly managed. The Fund may invest without limitation in securities denominated in currencies other than the reference currency (Euro).</p> <p>Although it is likely that most of the Fund's investments will be in issuers located in developed markets globally, the Fund may also invest in emerging markets.</p> <p>The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below and at the levels set out in its SFDR Pre-Contractual Disclosure in Appendix H (SFDR Pre-Contractual Disclosure) to the Luxembourg Prospectus.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|      | <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations.</p> <p>The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using MSCI All Country World All Cap Index 65% and Bloomberg Global Aggregate Bond Index (Hedged to EUR) 35% as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 300% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Climate Transition Benchmark Exclusions.</p> <p>The Fund will apply BlackRock's proprietary 'Transition Assessment' methodology<sup>4</sup> to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.</p> <p>The weighted average ESG rating of the Fund will be higher than the Index after eliminating at least 20% of the least well-rated securities from the Index. The weighted average ESG rating excludes certain asset classes, such as funds, that are not supported by ESG rating providers. In such cases, the Investment Adviser will assess these holdings to ensure they are in line with the Environmental objective of the Fund.</p> <p>More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>The Fund's ESG score will be calculated as the total of each issuers ESG score (where applicable), weighted by its market value. The ESG score of the relevant</p> |

| Fund                               | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Continental European Flexible Fund | <p>The Continental European Flexible Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in Europe excluding the UK. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused</p> |

| Fund                          | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                               | <p>on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Dynamic Income Fund      High | <p>The Dynamic High Income Fund follows a flexible asset allocation policy that seeks to provide a high level of income. In order to generate high levels of income the Fund will seek diversified income sources across a variety of asset classes, investing significantly in income producing assets such as fixed income transferable securities, including corporate and government issues which may be fixed and floating and may be investment grade, sub-investment grade or unrated, covered call options and preference shares. The Fund will use a variety of investment strategies and may invest globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities, units of CIS, cash, deposits and money market instruments. Currency exposure is flexibly managed.</p> <p>The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.</p> <p>As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the</p> |

The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 10% of its total assets and the Fund's exposure to Distressed Securities is limited to 15% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using JP Morgan Emerging Markets Bond Index Global Diversified Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 150% of Net Asset Value.</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Emerging Markets Corporate Bond Advanced Fund* | <p>The Emerging Markets Corporate Bond Advanced Fund seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing.</p> <p>The Fund invests at least 70% of its total assets in the fixed income transferable securities issued by companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets and included within the J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified (the “<b>Index</b>” and the securities comprised within it being the “<b>Index Securities</b>”). The Index provides the investment universe for at least 70% of the Fund's total assets. The weighting of Index Securities within the Fund's portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index.</p> <p>The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent a significant part of the portfolio and are likely to exceed 50% of the Fund's net asset value.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> |

|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Hungary, Indonesia, Mexico, the Philippines, Russia, Republic of South Africa, Turkey and Ukraine, countries which are, at the date of the Luxembourg Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the J.P. Morgan ESG Corporate Emerging Market Bond Index Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.</p> <p>Currency exposure is flexibly managed.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of its total assets.</p> <p><b>Risk management measure used: Relative VaR using J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 100% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.</p> <p>The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <a href="https://www.jpmorgan.com/insights/research/index-research/composition-docs">https://www.jpmorgan.com/insights/research/index-research/composition-docs</a>.</p> <p>The Fund may also invest in fixed income transferable securities of an issuer which is not included in the Fund's benchmark index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).</p> <p>In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens.</p> |

| Fund                                 | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      | <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.</p> <p>The Investment Adviser intends the Fund to have a carbon emissions intensity score that is lower than the J.P. Morgan Corporate Emerging Market Bond Index Broad Diversified (the “<b>ESG Reporting Index</b>”). The ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Emerging Markets Corporate Bond Fund | <p>The Emerging Markets Corporate Bond Fund seeks to maximise total return. The Fund invests at least 70% of total assets in fixed income transferable securities issued by companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 20% of total assets and the Fund's exposure to Distressed Securities is limited to 10% of its total assets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Emerging Markets Equity Income Fund | <p>The Emerging Markets Equity Income Fund seeks an above average income from its equity investments without sacrificing long term capital growth. The Fund invests globally at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets. Investment may also be made in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets that have significant business operations in emerging markets.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p>                                                                                                                                                                                                                                                                                |
| Emerging Markets Ex-China Fund      | <p>The Emerging Markets Ex-China Fund seeks to maximise total return through a combination of capital growth and income on Fund assets. The Fund invests globally at least 80% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, excluding China. Investments may also be made in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets that have significant business operations in emerging markets (excluding China).</p> <p>The Fund may indirectly invest in emerging markets securities (excluding China) by investing in American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs), which are listed or traded on stock-exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> |

| Emerging Markets Local Currency Bond Fund | <p>The Emerging Markets Local Currency Bond Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in local currency-denominated fixed income transferable securities issued by governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets. The full spectrum of available securities, including non-investment grade, may be utilised. Currency exposure is flexibly managed.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund is a QFI Access Fund and may invest directly up to 20% of its total assets in the PRC by investing via the QFI regime.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the QFI regime, the Foreign Access Regime and/or Bond Connect.</p> <p>The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Brazil, Hungary, Indonesia, Russia Republic of South Africa and Turkey, countries which are, at the date of the Luxembourg Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the JP Morgan GBI-EM Global Diversified Index (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using JP Morgan GBI-EM Global Diversified Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 480% of Net Asset Value.</b></p> |

| Fund                                      | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Emerging Markets Sustainable Equity Fund* | <p>The Emerging Markets Sustainable Equity Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in, emerging markets in a manner consistent with the principles of sustainable investing.</p> <p>The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the MSCI Emerging Markets Index (the "<b>Index</b>").</p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.</p> <p>The weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.</p> <p>The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than its Index.</p> <p>More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>Companies in the portfolio are then evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this analysis, the Investment Adviser may use data</p> |

| Fund                                    | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|                                         | <p>provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Investment Adviser engages with companies to support improvement in their environmental, social and governance (“<b>ESG</b>”) credentials.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| ESG Emerging Markets Blended Bond Fund* | <p>The ESG Emerging Markets Blended Bond Fund seeks to maximise total return in a manner consistent with the principles of ESG focused investing. The Fund invests at least 70% of its total assets in fixed income transferable securities issued by governments and government agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, denominated in both emerging market and non-emerging market currencies, and included within the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (the “<b>Index</b>”, and the securities comprised within it being the “<b>Index Securities</b>”). The Index provides the investment universe for at least 70% of the Fund’s total assets. The weighting of Index Securities within the Fund’s portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index. The asset allocation of the Fund is intended to be flexible and the Fund will maintain the ability to switch exposure between currencies and issuers as market conditions and other factors dictate.</p> <p>The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent a significant part of the portfolio and are likely to exceed 50% of the Fund’s net asset value.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Hungary, Ghana, Indonesia, Mexico, the Philippines, Sri Lanka, Russia, Republic of South Africa, Turkey, Ukraine and Zambia, countries which are, at the date of the Luxembourg Prospectus, rated non-investment grade. |      | <p>are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The aforementioned countries are for reference only and may change without prior notice to Shareholders.</p> <p>Currency exposure is flexibly managed.</p> <p>The Fund's exposure to Distressed Securities is limited to 15% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) as appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 550% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.</p> <p>The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <a href="https://www.jpmorgan.com/insights/research/index-research/composition-docs">https://www.jpmorgan.com/insights/research/index-research/composition-docs</a>.</p> <p>The Fund may also invest in fixed income transferable securities of emerging markets and non-emerging markets issuers which are not included in the Fund's benchmark index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).</p> <p>In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the</p> |

|                                                           | <p>ESG Reporting Index (as defined in the Luxembourg Prospectus) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| <p>ESG<br/>Markets<br/>Fund*</p> <p>Emerging<br/>Bond</p> | <p>The ESG Emerging Markets Bond Fund seeks to maximise total return in a manner consistent with the principles of ESG focused investing. The Fund invests at least 70% of its total assets in the fixed income transferable securities of governments and government agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, and included within the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (the “<b>Index</b>” and the securities comprised within it being “<b>Index Securities</b>”). The Index provides the investment universe for at least 70% of the Fund's total assets. The weighting of Index Securities within the Fund's portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index.</p> <p>The Fund seeks to invest in Sustainable Investments including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent a significant part of the portfolio and are likely to exceed 50% of the Fund's net asset value.</p>                                                                                                                                                                                                                                                                          |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|      | <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Ghana, Indonesia, Mexico, the Philippines, Sri Lanka, Russia, Turkey, Ukraine and Zambia, countries which are, at the date of the Luxembourg Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.</p> <p>Currency exposure is flexibly managed.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's exposure to Distressed Securities is limited to 15% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets.</p> <p><b>Risk management measure used: Relative VaR using J.P. Morgan ESG Emerging Market Bond Index Global Diversified as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 150% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.</p> <p>The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <a href="https://www.jpmorgan.com/insights/research/index-research/composition-docs">https://www.jpmorgan.com/insights/research/index-research/composition-docs</a>.</p> <p>The Fund may also invest in fixed income transferable securities of an issuer which is not included in the Index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).</p> |

| Fund                                                          | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                               | <p>In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined in the Luxembourg Prospectus) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| ESG<br>Markets<br>Currency<br>Fund* Emerging<br>Local<br>Bond | <p>The ESG Emerging Markets Local Currency Bond Fund seeks to maximise total return in a manner consistent with the principles of ESG focused investing. The Fund invests at least 70% of its total assets in the fixed income transferable securities issued by governments of emerging markets, denominated in the local currency of such emerging markets countries and included within the J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (the “<b>Index</b>”, and the securities comprised within it being the “<b>Index Securities</b>”). The Index provides the investment universe for at least 70% of the Fund's total assets. The weighting of Index Securities within the Fund's portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund seeks to invest in Sustainable Investments including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent an important part of the portfolio and are likely to exceed, depending on market conditions, 30% of the Fund’s net asset value.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey, countries which are, at the date of the Luxembourg Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country’s bond market represents of the emerging market bond universe within the J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.</p> <p>Currency exposure is flexibly managed.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund’s exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 5% of total assets.</p> <p><b>Risk management measure used: Relative VaR using J.P. Morgan ESG Government Bond Index — Emerging Market Global Diversified Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 480% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the “ESG” characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer’s ESG credentials within the Index and its broader ESG performance.</p> |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <a href="https://www.jpmorgan.com/insights/research/index-research/composition-docs">https://www.jpmorgan.com/insights/research/index-research/composition-docs</a>.</p> <p>The Fund may also invest in fixed income transferable securities of an issuer which is not included in the Fund's benchmark index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).</p> <p>In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined in the Luxembourg Prospectus) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |

| Fund                  | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| ESG Multi-Asset Fund* | <p>The ESG Multi-Asset Fund follows an asset allocation policy that seeks to maximise total return in a manner consistent with the principles of environmental, social and governance “ESG”-focussed investing.</p> <p>The Fund invests globally in the full spectrum of permitted investments including equities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments.</p> <p>The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund has a flexible approach to asset allocation (which includes taking indirect exposure to commodities through permitted investments, principally through derivatives on commodity indices and exchange traded funds). The Fund may invest without limitation in securities denominated in currencies other than the reference currency (Euro). The currency exposure of the Fund is flexibly managed.</p> <p>The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects.</p> <p>The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.</p> <p>As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Fund may use total return swaps that have, in accordance with its investment policy, equity or fixed income transferable securities and equity or fixed income related securities as underlying assets. Investors should refer to Appendix G (Securities Financing Transaction Disclosures) of the Luxembourg Prospectus for more details on the expected and maximum portion of total return swaps held by the Fund. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.</p> |

|      | <p><b>Risk management measure used: Relative VaR using 25% MSCI World Index, 25% MSCI World Index hedged to EUR, and 50% Bloomberg Global Aggregate Bond Index hedged to EUR as the appropriate risk benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 175% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser also intends to limit investments in companies within the Global Industry Classification Standard (GICS) Oil &amp; Gas Exploration &amp; Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil &amp; Gas sector to below 5% of its total assets.</p> <p>The Investment Adviser also intends to limit direct investment in securities of issuers involved in the production, distribution or licensing of alcoholic products; the ownership or operation of gambling-related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The Investment Adviser will exclude any issuer with a MSCI ESG rating below BBB.</p> <p>The remaining companies (i.e. those companies which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>The Fund's ESG score will be calculated as the total of each issuer ESG score (where applicable), weighted by its market value. The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus a composite</p> |

|                 | <p>benchmark comprising the 50% MSCI World Index and 50% Bloomberg Global Aggregate Bond Index hedged to EUR (“<b>Index</b>”) and the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 25% of the least well-rated securities from the Index. The Investment Adviser intends the Fund to have a carbon emissions intensity score that is lower than the Index.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Euro Bond Fund* | <p>The Euro Bond Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of total assets will be invested in fixed income transferable securities denominated in euro. Currency exposure is flexibly managed.</p> <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund’s exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using Bloomberg Euro-Aggregate 500mm+ Bond Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 120% of Net Asset Value.</b></p> |

| Fund                      | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined in the Luxembourg Prospectus) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.</p> <p>The weighted average ESG rating of the corporate portion of the Fund will be higher than the ESG rating of the corporate portion of the ESG Reporting Index (as defined in the Luxembourg Prospectus).</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Euro Corporate Bond Fund* | <p>The Euro Corporate Bond Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in investment grade corporate fixed income transferable securities denominated in euro. Currency exposure is flexibly managed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|      | <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>The Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using ICE BofAML Euro Corporate Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 100% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined in the Luxembourg Prospectus) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> |

|                   | <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Euro Income Fund* | <p><b>Flexible Bond</b></p> <p>The Euro Flexible Income Bond Fund seeks to maximise income by primarily investing in debt and income-producing securities while seeking to maintain long term capital growth in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) focused investing. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in various currencies, mainly in Euro denominated securities, issued by governments, agencies and companies worldwide. The full spectrum of available securities, including non-investment grade, may be utilised. The Fund's base currency is Euro and currency exposure is flexibly managed.</p> <p>The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>As part of its investment objective the Fund may invest up to 60% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the</p> |

|      | <p>performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 10% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.</p> <p><b>This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".</b></p> <p><b>Risk management measure used: Absolute VaR.</b></p> <p><b>Expected level of leverage of the Fund: 200% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities including limiting direct investment in securities of issuers involved in the ownership or operation of gambling related activities or facilities, production, supply and mining activities related to nuclear power and production of adult entertainment materials.</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> |

| Euro Reserve Fund              | <p>The Euro Reserve Fund seeks to offer returns in line with money market rates consistent with preservation of capital and liquidity. The Fund invests its assets exclusively in Euro denominated short-term assets and cash in accordance with the requirements of the MMF Regulations, as summarised in Appendix A (Investment and Borrowing Powers and Restrictions) of the Luxembourg Prospectus. The Fund is a short-term money market fund.</p> <p>The Fund may invest up to 15% of its total assets in securitisations and asset backed commercial paper (“<b>ABCP</b>”) that are sufficiently liquid and have received a favourable assessment pursuant to the Internal Credit Quality Assessment Procedure.</p> <p>At the discretion of the Investment Adviser, the Fund will invest in eligible reverse repurchase agreements for both liquidity management purposes and for permitted investment purposes.</p> <p>The Fund may only use derivatives for the purpose of hedging the interest rate or exchange rate risks inherent in its investments. The underlying of the derivative instruments must consist of interest rates, foreign exchange rates, currencies or indices representing one of those categories.</p> <p>The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.</p> <p><b>The Fund may have a material exposure to permitted securitisations and ABCPs, and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Commitment Approach.</b></p> |
| Euro Short Duration Bond Fund* | <p>The Euro Short Duration Bond Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of total assets will be invested in fixed income transferable securities denominated in Euro with a duration of less than five years. The average duration is not more than three years. Currency exposure is flexibly managed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|      | <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Absolute VaR.</b></p> <p><b>Expected level of leverage of the Fund: 120% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined in the Luxembourg Prospectus) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> |

| Fund              | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                   | <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.</p> <p>The weighted average ESG rating of the corporate portion of the Fund will be higher than the ESG rating of the corporate portion of the ESG Reporting Index (as defined in the Luxembourg Prospectus).</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Euro-Markets Fund | <p>The Euro-Markets Fund seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in those EU Member States participating in EMU. Other exposure may include, without limitation, investments in those EU Member States that, in the opinion of the Investment Adviser, are likely to join EMU in the foreseeable future and companies based elsewhere that exercise the predominant part of their economic activity in EMU-participating countries.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically</p>                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Fund                        | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             | <p>manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| European Equity Income Fund | <p>The European Equity Income Fund seeks an above average income from its equity investments without sacrificing long term capital growth and invest in a manner consistent with the principles of ESG investing. The Fund invests at least 70% of its total assets in equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Fund                             | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| European Equity Transition Fund* | <p>The European Equity Transition Fund seeks to maximise long-term total return. The Fund invests at least 70% of its total assets in a concentrated portfolio of equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. These companies will be selected by the Investment Adviser based on their fundamental merit, and their ability to act as enablers, improvers or leaders of the transition to a lower carbon economy.</p> <p>The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below and at the levels set out in its SFDR Pre-Contractual Disclosure in Appendix H (SFDR Pre-Contractual</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Fund          | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|               | <p>Disclosure) to the Luxembourg Prospectus.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Climate Transition Benchmark Exclusions.</p> <p>The Fund invests in equities or equity-related securities of companies, that contribute to the advancement of the transition theme. The Investment Adviser will identify a universe of potential investments within the following categories of companies – consistent with the principles of the transition theme:</p> <p>Improvers: Companies demonstrating positive progress or commitment to reducing the carbon emissions intensity of their operations;</p> <p>Enablers: Companies that enable and facilitate the transition to a lower carbon economy;</p> <p>Leaders: Companies that are already considered within their respective sectors as leaders in carbon reduction.</p> <p>Having determined those companies which meet the principles of the transition theme, the Fund will further apply BlackRock's proprietary 'Transition Assessment' methodology<sup>4</sup> to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| European Fund | <p>The European Fund seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("<b>ESG</b>") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Fund                          | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                               | <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| European High Yield Bond Fund | <p>The European High Yield Bond Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests at least 70% of its total assets in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|      | <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using Bloomberg Pan European High Yield 3% Issuer Constrained Index EUR Hedged as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 70% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser</p> |

| European Multi-Asset Income Fund | <p>The European Multi-Asset Income Fund follows a flexible asset allocation policy that seeks an above average income without sacrificing long-term capital growth. The Fund seeks to invest at least 70% of its assets, directly and indirectly through permitted investments in securities of companies domiciled in, or exercising the predominant part of their economic activity in Europe.</p> <p>In order to generate income, the Fund will take a level of risk commensurate with its risk Index, referred to below. The Fund invests globally in the full spectrum of permitted investments, including equities, equity-related securities, fixed income transferable securities, units of CIS (including ETFs), derivatives, cash, deposits and money market instruments. The fixed income transferable securities in which the Fund invests may be issued by governments, agencies, companies and supranationals worldwide, including in emerging markets, and may be investment grade, non-investment grade or unrated. Currency exposure is flexibly managed.</p> <p>The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS which will typically be investment grade but may also include non-investment grade. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have significant exposure to ABS and MBS, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".</b></p> |

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| European Special Situations Fund | <p>The European Special Situations Fund seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activities in, Europe.</p> <p>The Fund places particular emphasis on “special situations” companies that, in the opinion of the Investment Adviser, are companies with potential for improvement that the market has failed to appreciate. Such companies generally take the form of small, mid or large capitalisation companies that are undervalued and exhibit growth investment characteristics, such as above-average growth rates in earnings or sales and high or improving returns on capital. In some cases such companies can also benefit from changes in corporate strategy and business restructuring.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to</p> |

|                                   | <p>strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| European Sustainable Equity Fund* | <p>The European Sustainable Equity Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in Europe, in a manner consistent with the principles of sustainable investing.</p> <p>The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Fund                | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                     | <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced below will apply only to the underlying securities of derivatives used by the Fund.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.</p> <p>The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than the MSCI Europe Index (the "Index").</p> <p>More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>Companies in the portfolio are then evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| European Value Fund | <p>The European Value Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Europe. The Fund places particular</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>emphasis on companies that are, in the opinion of the Investment Adviser, undervalued and therefore represent intrinsic investment value.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> |

| Fund         | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|              | <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| FinTech Fund | <p>The FinTech Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied in financial services.</p> <p>The Fund will focus on companies that generate revenues from the application of technology in the financial services industry sector and/or which aim to compete with traditional methods in the operation and distribution of financial products and services.</p> <p>In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation that are involved in activities including the following: payment systems, banking, investments, lending, insurance and software. Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to</p> |

| Fund                                   | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                                        | <p>be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Fixed Income Global Opportunities Fund | <p>The Fixed Income Global Opportunities Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in various currencies issued by governments, agencies and companies worldwide. The full spectrum of available securities, including non-investment grade, may be utilised. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>As part of its investment objective the Fund may invest up to 100% of its total assets in ABS and MBS. ABS and MBS are debt securities backed or collateralised by the income stream from an underlying pool of assets or mortgage loans respectively. It is anticipated that a large portion of the ABS and MBS held by the Fund will have an investment grade rating, but the Fund will be able to use the full spectrum of available ABS and MBS, including non-investment grade instruments. ABS and MBS held by the Fund may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The issuers of the ABS and MBS may be companies, governments or municipalities and, more particularly, the Fund may hold MBS issued by government-sponsored enterprises (“<b>agency MBS</b>”). The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). Although this will not typically be the case, the ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 20% of total assets. The Fund’s exposure to Distressed Securities is limited to 10% of its total assets.</p> |

| Fund                      | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.</p> <p><b>This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Absolute VaR.</b></p> <p><b>Expected level of leverage of the Fund: 500% of Net Asset Value. Leverage per se is not an accurate risk indicator as a higher degree of leverage does not necessarily imply a higher degree of risk. This Fund has a higher gross leverage figure than many of the other Funds due to the way in which it uses financial derivative instruments (for example, through its use of futures, swaps, options and forward contracts and short term interest rate derivatives, which can each contribute to increased leverage). In particular, short term interest rate derivatives can contribute to increased leverage due to the large notional values associated with these instruments relative to the duration exposure gained. As a result of its use of derivatives, this Fund may be more highly leveraged than other Funds. While leverage may present opportunities for increasing the Fund’s total return, it also has the potential for increasing losses. The cumulative effect of the use of leverage by the Fund in a market that moves adversely to the Fund’s investments could result in a loss to the Fund. Investors should note that the expected level of leverage can be exceeded in certain circumstances. Leverage, in this context is calculated as the sum of gross notional exposure created by the derivatives used.</b></p> |
| Future Of Transport Fund* | <p>The Future Of Transport Fund seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies globally whose predominant economic activity comprises the research, development, production and/or distribution of technologies used and applied to transport.</p> <p>The Fund will focus on companies that generate revenues from the transition to a lower carbon transportation system such as electric, autonomous and/or digitally connected vehicles. The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p>Although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Fund                   | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|                        | <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced below will apply only to the underlying securities of derivatives used by the Fund.</p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Paris-Aligned Benchmark Exclusions.</p> <p>In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation that are involved in activities including the following: raw materials (e.g. metals and battery materials), components and computer systems (e.g. batteries and cabling), technology (e.g. vehicle sensor technology) and infrastructure (e.g. vehicle battery charging stations). The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with renewable energy and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>The weighted average ESG rating of the Fund will be higher than the ESG rating of the MSCI All Countries World Index (the "<b>Index</b>") after eliminating at least 20% of the least well-rated securities from the Index.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 9 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Global Allocation Fund | <p>The Global Allocation Fund seeks to maximise total return. The Fund invests globally in equity, debt and short term securities, of both corporate and governmental issuers, with no prescribed limits. In normal market conditions the Fund will invest at least 70% of its total assets in the securities of corporate and governmental issuers. The Fund generally will seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. The Fund may also invest a portion of its debt portfolio in high yield fixed income transferable securities. Currency exposure is flexibly managed.</p> <p>The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|                         | <p>Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.</p> <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using 36% S&amp;P 500 Index, 24% FTSE World Index (Ex-US), 24% ICE BofAML Current 5Yr US Treasury Index, 16% FTSE Non-USD World Government Bond Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 140% of Net Asset Value.</b></p> |
| Global Bond Income Fund | <p>The Global Bond Income Fund seeks to maximise income without sacrificing long term capital growth. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in various currencies issued by governments, government agencies, companies and supranationals worldwide, including in emerging markets. In order to maximise income the Fund will seek diversified income sources across a variety of such fixed income transferable securities. The full spectrum of available fixed income securities may be utilised, including investment grade, non-investment grade and unrated. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

The Fund invests at least 70% of its total assets in investment grade corporate fixed income securities issued by companies worldwide. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>As part of its investment objective the Fund may invest up to 20% in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities</p>                                                                                                                                                                               |

| Fund                      | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                             | <p>its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                               |
| Global Government Bond Fund | <p>The Global Government Bond Fund seeks to maximise total return, in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) focused investing. The Fund invests at least 70% of its total assets in investment grade fixed income transferable securities issued by governments and their agencies worldwide. Currency exposure is flexibly managed.</p> <p>The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond principles) and “Green, Social and Sustainability” (GSS) bonds issued by governments and agencies of, and companies, where the proceeds of such GSS bonds are tied to green and socially responsible projects.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>As part of its investment objective the Fund may invest up to 30% of the Fund’s total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a</p> |

|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 10% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using FTSE World Government Bond USD Hedged Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 400% of Net Asset Value.</b></p> <p><b><i>ESG Policy</i></b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> |

|                             | <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Global High Yield Bond Fund | <p>The Global High Yield Bond Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests globally at least 70% of its total assets in high yield fixed income transferable securities. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.</p> <p>As part of its investment objective the Fund may invest up to 20% in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using ICE BofA Merrill Lynch Global High Yield Constrained USD Hedged Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 60% of Net Asset Value.</b></p> |

| Fund                              | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                                   | <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                          |
| Global Inflation Linked Bond Fund | <p>The Global Inflation Linked Bond Fund seeks to maximise real return. The Fund invests at least 70% of its total assets in inflation-linked fixed income transferable securities that are issued globally. The Fund may invest in fixed income transferable securities which are investment grade or non-investment grade (up to a limit of 10% of total assets). Currency exposure is flexibly managed.</p> <p>As part of its investment objective the Fund may invest up to 20% in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>It is intended that the maturity of the majority of the fixed income securities held by the Fund will be less than 20 years. However, since the Fund is actively managed, it still has the flexibility to invest in fixed income securities which have a maturity profile outside of the 1 to 20 years range.</p> |

| Fund                                          | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| <p>Global Horizon Fund</p> <p>Long-Equity</p> | <p>The Global Long-Horizon Equity Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests globally, with no prescribed country, regional or capitalisation limits, at least 70% of its total assets in equity securities. The Fund may invest in equity securities that, in the opinion of the Investment Adviser, have a sustained competitive advantage and will typically be held over a long-term horizon. Currency exposure is flexibly managed.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would</p> |

|                                | <p>otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Global Multi-Asset Income Fund | <p>The Global Multi-Asset Income Fund follows a flexible asset allocation policy that seeks an above average income without sacrificing long term capital growth. The Fund invests globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments. Currency exposure is flexibly managed.</p> <p>The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.</p> <p>As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> |

| Fund                             | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Global Unconstrained Equity Fund | <p>The Global Unconstrained Equity Fund seeks to achieve long term capital growth. The Fund will take into account the principles of environmental social and governance ("ESG") criteria in its investments selection.</p> <p>The Fund invests at least 80% of its total assets in equity securities and equity-related securities (namely American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of companies domiciled in, or exercising a significant part of their economic activity in, global developed markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities. These instruments will be listed or traded on regulated markets.</p> <p>The Fund's assets will be invested in accordance with the ESG Policy described below.</p> <p>Although most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets and namely in:</p> <ul style="list-style-type: none"> <li>- equity securities and equity related securities (namely ADRs and GDRs) of companies domiciled in, or exercising a significant part of their economic activity in, global emerging markets;</li> <li>- cash and/or cash equivalents (such as term deposits and bank certificates), liquid government debt instruments and Money Market Instruments (including certificates of deposit, commercial paper and bankers acceptances); and</li> <li>- other CIS, including exchange-traded funds (where the objectives of such CIS are consistent with its objective or for efficiently managing cash holdings and/or collateral) The Fund may not invest more than 10% of its Net Asset Value in other CIS.</li> </ul> <p>Investment decisions are based on company-specific research to identify and select equity securities that, in the opinion of the Investment Adviser, have a viable competitive advantage and the potential to produce attractive long-term capital growth. The Fund's portfolio is expected to be concentrated (i.e. it is expected to hold relatively</p> |

|                   | <p>few stocks in comparison to other funds), but there is no guarantee that this will always be the case.</p> <p>The Fund may use derivatives for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Manager may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">www.blackrock.com/https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Impact Bond Fund* | <p>The Impact Bond Fund seeks to achieve capital growth and income over the long term (at least five consecutive years) by investing in a global portfolio of fixed income instruments which have a positive social and/or environmental impact.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund invests globally at least 80% of its total assets in “impact” investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return. This includes, but is not limited to, “Green, Social and Sustainability” (GSS) bonds where the proceeds of such GSS bonds are tied to green and socially responsible projects.</p> <p>More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes including, but not limited to, bonds from companies which have social and/or environmental impact characteristics that the Investment Adviser has at its discretion deemed to be impactful and bespoke impact MBS pools. The Fund may invest in the full spectrum of available fixed income securities, including non-investment grade. Currency exposure is flexibly managed.</p> <p>For the selection of GSS bonds, the Investment Adviser will analyse the use of proceeds of the issues and the issuer framework for alignment of the bonds with the Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability Bond Guidelines (SBG) of the International Capital Markets Association to determine suitability within the investment universe. Investment decisions will be based on issuer specific research (such as sovereign and credit analysis comprising a multi factor framework assessing global, country and issuer specific risk to determine issuers’ ability and willingness to pay over the long term) to identify and select the GSS bonds and other fixed income securities that, in the opinion of the Investment Adviser, have the potential to produce attractive long-term returns whilst also being consistent with the United Nations Sustainable Development Goals (“<b>UN SDGs</b>”). The UN SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education, and economic growth, reduction in inequalities, all whilst tackling climate change and working to preserve the planet’s oceans and forests, as set out in more detail on the UN website: <a href="https://www.un.org/sustainabledevelopment/sustainable-development-goals">https://www.un.org/sustainabledevelopment/sustainable-development-goals</a>. The Fund will aim to diversify its investments across issuers that have an impact on people and the planet (the “<b>Impact Categories</b>”) across themes including, but not limited to, affordable housing, education and skilling, financial and digital inclusion, public health, safety and security, efficiency, electrification and digitalisation, green energy, pollution remediation and prevention, sustainable food, water and waste.</p> <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 20% of total assets. The Fund’s exposure to Distressed Securities is limited to 10% of its total assets.</p> |

|      | <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” in the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR. using ICE Green, Social &amp; Sustainable Bond Index, EUR hedged as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 250% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities including limiting direct investment in securities of issuers involved in the ownership or operation of gambling related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials.</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS (including exchange traded funds)) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> |

| Japan Flexible Equity Fund | <p>The Japan Flexible Equity Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in, Japan. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> |

| Fund                                    | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                                         | <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Japan Small & MidCap Opportunities Fund | <p>The Japan Small &amp; MidCap Opportunities Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in the equity securities of small and mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, Japan. Small and mid capitalisation companies are considered companies which, at the time of purchase, form the bottom 30% by market capitalisation of Japanese stock markets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would</p> |

| Fund                     | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Multi-Theme Equity Fund* | <p>The Multi-Theme Equity Fund seeks to achieve capital growth over the long term (at least five consecutive years) in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing.</p> <p>The Fund is an actively managed fund of funds. It will seek to achieve its investment objective by obtaining exposure, in respect of at least 80% of its total assets, to global equities and equity-related securities, both indirectly, through investment in units of UCITS managed by an affiliate of the BlackRock Group, and by investing directly in equity and equity-related securities and derivatives.</p> <p>The Fund may invest in other Funds in the Company. The conditions applicable to investment in other Funds in the Company are set out in paragraph 2.4 of Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus.</p> <p>The Fund will not be subject to any geographic restrictions and may obtain indirect exposure to equities of companies located in developed markets and emerging markets globally. In practice the Fund may have a high allocation to particular countries or sectors at any one time.</p> <p>The Fund will allocate strategically to longer-term investment opportunities intended to provide exposure to long-term themes (explained below) with the aim of gaining exposure to five global “Megatrends” (explained below) identified by the Investment</p> |

|      | <p>Adviser. The Fund will maintain the ability to adjust these exposures tactically based on the Investment Adviser's assessment of market conditions.</p> <p>The Fund will also allocate tactically to shorter-term investment opportunities on the basis of shorter-term thematic trends (explained below), where such investments may provide attractive risk and return characteristics or demonstrate better relative performance in the short term.</p> <p>The five "Megatrends" are key transformative forces which are changing the global economy, in the opinion of the Investment Adviser. These are technological innovation (e.g. technology which aims to address large-scale challenges such as climate change or bring better alternatives to existing markets such as payments or streaming), demographics and social change (growth opportunities for businesses based on e.g. skills imbalance and ageing populations in advanced economies), rapid urbanization (growth opportunities for businesses arising from the significant needs of growing cities, e.g. communication networks and housing), climate change and resource scarcity (e.g. producers of sustainable energy and providers of substitutes to scarce materials) and emerging global wealth (growth opportunities for businesses arising from increasing consumer spending power in various parts of the world).</p> <p>"Themes" and "Thematic trends" refers to major trends which may enable the identification of short-, medium- and long-duration investment opportunities which are derived from fundamental (i.e. judgement-based) research into drivers of the global economy and interpretation of the major economic, political and social developments that may have an impact on asset risks and returns.</p> <p>The Investment Adviser will refer to qualitative (i.e. judgement-based) and quantitative (i.e. mathematical or statistical) research analysing a wide range of economic data and market behaviour, with a focus on the five Megatrends and a range of other "thematic trends". The research may be produced by the Investment Adviser or another member of the BlackRock Group, or by a third party.</p> <p>The currency exposure of the Fund is flexibly managed.</p> <p>The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the QFI regime and/or via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the ESG criteria described below.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will invest at least 80% of total assets in CIS qualifying as Article 8 or 9 of the SFDR Regulation which pursue a positive ESG objective or outcome or comprised of bonds issued by governments that have an ESG sovereign rating of at</p> |

| Fund                | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|                     | <p>least BB (as defined by third party ESG data vendors), and in both cases being CIS with status aligned with the SFDR Regulation.</p> <p>The Fund will seek to invest at least 20% of its total assets in Sustainable Investments. The Investment Adviser also intends the Fund to deliver exposure to Sustainable Investments that is higher than the MSCI All Countries World Index.</p> <p>The Investment Adviser will analyse all the securities in the underlying investment universe to assess their contribution to environmental and social objectives. The assessment of the level of alignment in each activity is based on percentage of revenue and a defined total revenue threshold.</p> <p>The Fund will maintain a minimum exposure to investments that specifically support climate objectives.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| MyMap Cautious Fund | <p>The MyMap Cautious Fund seeks to provide investors with a total return, taking into account both capital and income returns, through an actively managed, multi-asset portfolio, whilst targeting a cautious risk profile.</p> <p>The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. Exposure to these asset classes will be achieved through investment in shares or units of a concentrated portfolio of CIS (which themselves invest in a diversified portfolio of assets), including, but not limited to, exchange traded funds and index funds managed by an affiliate of the BlackRock Group and where determined appropriate, the Fund may invest directly in derivatives and near-cash instruments.</p> <p>The Fund will seek to maintain a cautious risk profile of the Fund's portfolio. The Fund will vary its underlying asset exposure in different market conditions. Given the cautious risk profile of the Fund, under normal market conditions the Fund will seek a lower exposure to equity securities, compared to a fund with a higher risk profile which would normally seek to have a lower exposure to fixed income securities. The fixed income exposure of the Fund will comprise mainly investment grade rated (but may also comprise non-investment grade or unrated) fixed and floating rate global government and corporate fixed income securities / bonds. The equity exposure will comprise mainly large and mid-capitalisation companies globally. It is not expected that the Fund's exposure to emerging markets will exceed 25% of its assets.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> |
| MyMap Growth Fund   | <p>The MyMap Growth Fund seeks to provide investors with a total return, taking into account both capital and income returns, through an actively managed, multi-asset portfolio, whilst targeting a growth risk profile.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     | <p>The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. Exposure to these asset classes will be achieved through investment in shares or units of a concentrated portfolio of CIS (which themselves invest in a diversified portfolio of assets), including but not limited to exchange traded funds and index funds managed by an affiliate of the BlackRock Group and where determined appropriate, the Fund may invest directly in derivatives and near-cash instruments.</p> <p>The Fund will seek to maintain a growth risk profile of the Fund's portfolio. The Fund will vary its underlying asset exposure in different market conditions. Given the growth risk profile of the Fund, under normal market conditions the Fund will seek a higher exposure to equity securities, compared to a fund with a lower risk profile which would normally seek to have a higher exposure to fixed income securities. The fixed income exposure of the Fund will comprise mainly investment grade rated (but may also comprise non-investment grade or unrated) fixed and floating rate global government and corporate fixed income securities / bonds. The equity exposure will comprise mainly large and mid-capitalisation companies globally. It is not expected that the Fund's exposure to emerging markets will exceed 25% of its assets.</p> <p><b>Risk management measure used: Commitment Approach.</b></p>                                                                                                                                                                                                                                        |
| MyMap Moderate Fund | <p>The MyMap Moderate Fund seeks to provide investors with a total return, taking into account both capital and income returns, through an actively managed, multi-asset portfolio, whilst targeting a moderate risk profile.</p> <p>The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. |--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <p>fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Sustainable Energy Fund* | <p>The Sustainable Energy Fund seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of sustainable energy companies. Sustainable energy companies are those which are engaged in alternative energy and energy technologies including: renewable energy technology; renewable energy developers; alternative fuels; energy efficiency; enabling energy and infrastructure. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with alternative energy and energy technologies and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financials.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                                         | <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced will apply only to the underlying securities of derivatives used by the Fund.</p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Fund will not invest in companies that are classified in the following sectors (as defined by Global Industry Classification Standard): coal and consumables; oil and gas exploration and production; and integrated oil and gas. The assessment of the level of engagement in each activity or sector may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The Fund adopts a “best in class” approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.</p> <p>The weighted average ESG rating of the Fund will be higher than the ESG rating of the MSCI All Countries World Index after eliminating at least 20% of the least well-rated securities from the MSCI All Countries World Index.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 9 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Sustainable Global Dynamic Equity Fund* | <p>The Sustainable Global Dynamic Equity Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) focused investing. The Fund invests globally, with no prescribed country or regional limits, at least 70% of its total assets in equity securities. The Fund will generally seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. Currency exposure is flexibly managed.</p> <p>The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 20% of total assets. The Fund's exposure to Distressed Securities is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Relative VaR using MSCI All Countries World Index (MSCI ACWI) as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 100% of Net Asset Value.</b></p> <p><b><i>ESG policy</i></b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The ESG Policy reduces the investment universe of the Fund compared to the Index by at least 20%.</p> <p>The Investment Adviser intends the Fund to have a carbon emissions intensity score that is lower than the Index.</p> <p>At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.</p> |

|                                         | <p>The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Sustainable Global Infrastructure Fund* | <p>The Sustainable Global Infrastructure Fund seeks to maximise long term total return and invest at least 80% of its total assets in the equity securities of companies whose predominant economic activity is in the infrastructure sector and with a particular focus on companies aligned with and supporting the objectives of the UN Sustainable Development Goals (“<b>UN SDGs</b>”).</p> <p>In normal market conditions the Fund will invest in a relatively concentrated portfolio of equity securities of companies with large, medium and small market capitalisation across a broad range of infrastructure sub-sectors including (without limitation) regulated utilities, renewables, transportation and communications. The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p>Although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p><b>ESG Policy</b></p> <p>The Fund will apply the EU Paris-Aligned Benchmark Exclusions.</p> <p>In addition, the Investment Adviser will look at the targets and the indicators for certain UN SDG namely SDG3 (Good Health &amp; Well-Being), SDG 6 (Clean Water &amp; Sanitation) SDG 7 (Affordable &amp; Clean Energy), SDG 9 (Industry, Innovation &amp; Infrastructure) SDG 11 (Sustainable Cities &amp; Communities) and SDG 13 (Climate Action) and identify those that are supported by the sustainable infrastructure theme. The Investment Adviser screens the investment universe to invest only in companies that align with and advance at least one of the UN SDGs.</p> <p>As part of the climate objective of the Fund, the Investment Adviser seeks to invest in companies that enhance the energy transition in line with objectives SDG 7 (Affordable and Clean Energy) and SDG 13 (Climate Action). In both cases the assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>Secondly, the Investment Adviser evaluates companies aligned with key ESG credentials using data provided by external ESG data providers. Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the infrastructure theme and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage</p> |

|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                 | <p>fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Systematic Asia Pacific Equity High Income Fund | <p>The Systematic Asia Pacific Equity High Income Fund seeks to generate a high level of income and provide capital growth. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in Asia Pacific.</p> <p>In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.</p> <p>The Fund may, on an opportunistic basis, in response to evolving market conditions, or for liquidity management purposes, invest the remaining portion of the portfolio across the full capital structure of companies and in the broad range of permitted assets, including (without limitation) fixed-income transferable securities, equities, equity-related instruments, units of collective investment undertakings, cash, deposits and money market instruments.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the Stock Connects.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Fund                                               | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| <p>Systematic China A-Share Opportunities Fund</p> | <p>The Systematic China A-Share Opportunities Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in a portfolio of equity securities of companies domiciled in, or exercising the predominant part of their activity in the People's Republic of China (PRC). The Fund is a QFI Access Fund and a Stock Connect Fund and may invest without limit in the PRC via the QFI regime and/or via the Stock Connects. For the purpose of the investment objective, the PRC excludes Hong Kong and Macau Special Administrative Regions and Taiwan and accordingly the Fund will invest only in onshore Chinese equity markets (A-Shares).</p> <p>In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.</p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> <p><b>Important Note: please note that the liquidity of Chinese equity markets is particularly unpredictable. Investors should read the “Liquidity Risk” and “Investments in the PRC” sections of the “Risk Considerations” section of the Luxembourg Prospectus and the “Suspension and Deferrals” section of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) of the Luxembourg Prospectus prior to investing in the Fund.</b></p> |
| <p>Systematic China Environmental Tech Fund*</p>   | <p>The Systematic China Environmental Tech Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or the main business of which is in, the People's Republic of China (PRC) in the industries and supply chain of new energy, carbon neutral, green energy, energy conservation and emission reduction themes. The Fund will have a flexible allocation between onshore and offshore Chinese equity markets. The Fund may invest in the Chinese equity markets through the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect. In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Fund                                      | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                                           | <p>The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund is a Stock Connect Fund and a QFI Access Fund and may invest without limit in the PRC via the Stock Connects and/or via the QFI regime. The Fund will have a flexible allocation between onshore and offshore Chinese equity markets. Currency exposure is flexibly managed.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.</p> <p>The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>The Investment Adviser will create a portfolio that seeks to deliver a superior ESG score versus the MSCI China All Share IMI Environmental 10/40 Index.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| Systematic Global Equity High Income Fund | <p>The Systematic Global Equity High Income Fund seeks to generate a high level of income. The Fund invests globally, with no prescribed country or regional limits, at least 70% of its total assets in equity securities.</p> <p>In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Fund                                    | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Systematic Global Income & Growth Fund* | <p>The Systematic Global Income &amp; Growth Fund seeks to provide income and capital growth from its investments in a manner consistent with the principles of environmental, social and governance “ESG” focused investing.</p> <p>In order to achieve its investment objective the Fund will invest globally, directly and indirectly, in the full spectrum of permitted investments including on average, typically two thirds of its total assets in equities and one third of its total assets in fixed income transferable securities (also known as debt securities which may include the Fund investing up to 20% of its total assets in some high yield fixed income transferable securities), as well as investing in units of CIS, cash, deposits and money market instruments. The Fund will not be subject to prescribed country or regional limits and although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>To evaluate a company at the time of purchase using the Fund’s ESG methodology, multiple areas are focused on: environmental, social and governance outcomes, expected returns (including ESG return drivers), risk and transaction costs, as determined through proprietary research. In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic approach to stock selection. This means that stocks will be selected and weightings allocated based on their ESG attributes and on forecasts of return, risk and transaction costs.</p> <p>To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Investment Adviser may also consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers depending on the particular ESG strategy applicable to the Fund.</p> |

|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p>The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus a composite benchmark comprising 33.3% MSCI World Minimum Volatility Index, 33.3% MSCI All Country World Index, 16.7% BBG Global Aggregate Corporate Index and 16.7% BBG Global High Yield Corp ex Emerging Markets Index Hedged in USD Index (“Index”) and the weighted average ESG score of the Fund will be higher than the ESG score of the Index. The Investment Adviser also intends the Fund to have a lower carbon emissions intensity score by at least 30% relative to the Index.</p> <p>The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Systematic Global SmallCap Fund* | <p>The Systematic Global SmallCap Fund seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of smaller capitalisation companies in a manner consistent with the principles of ESG investing. Smaller capitalisation companies are considered companies which, at the time of purchase, form the bottom 20% by market capitalisation of global stock markets. Although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in the emerging markets of the world. Currency exposure is flexibly managed.</p> <p>In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.</p> <p>The Fund will apply the BlackRock EMEA Baseline Screens and seeks to invest in Sustainable Investments. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund’s ESG score will be calculated as the total of each issuer ESG score (where applicable), weighted by its market value.</p> <p>The Investment Adviser intends the Fund to have a lower carbon emissions intensity score than its Index.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> |

|                     | <p>their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| US Basic Value Fund | <p>The US Basic Value Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. The Fund places particular emphasis on companies that are, in the opinion of the Investment Adviser, undervalued and therefore represent basic investment value.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| US Dollar Bond Fund | <p>The US Dollar Bond Fund seeks to maximise total return. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of the Fund’s total assets are invested in fixed income transferable securities denominated in US dollars. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Fund                           | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                | <p>As part of its investment objective the Fund may invest up to 100% of its total assets in ABS and MBS. ABS and MBS are debt securities backed or collateralised by the income stream from an underlying pool of assets or mortgage loans respectively. It is anticipated that a large portion of the ABS and MBS held by the Fund will have an investment grade rating but the Fund will be able to utilise the full spectrum of available ABS and MBS, including non-investment grade or not instruments. ABS and MBS held by the Fund may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The issuers of the ABS and MBS may be companies, governments or municipalities and, more particularly, the Fund may hold MBS issued by government-sponsored enterprises ("agency MBS"). The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). Although this will not typically be the case, the ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 10% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.</p> <p><b>This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using Bloomberg US Aggregate Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 300% of Net Asset Value.</b></p> |
| US Dollar High Yield Bond Fund | <p>The US Dollar High Yield Bond Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests at least 70% of its total assets in high yield fixed income transferable securities denominated in US dollars. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.</p> <p>As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|      | <p>collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using Bloomberg US High Yield 2% Constrained Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 20% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>Issuers are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG consistent business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.</p> <p>The Investment Adviser monitors issuers with lower ESG ratings and flagged controversies according to third party data providers. The Investment Adviser conducts enhanced analysis on such issuers through a 'watchlist' to identify relevant ESG related information that is not reflected in the third party data analysis and may determine an engagement agenda for discussion with those issuers in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> |

| US Dollar Reserve Fund             | <p>The US Dollar Reserve Fund seeks to offer returns in line with money market rates consistent with preservation of capital and liquidity. The Fund invests its assets exclusively in US dollar denominated short-term assets and cash in accordance with the requirements of the MMF Regulations. The Fund is a short-term money market fund.</p> <p>The Fund may invest up to 15% of its total assets in securitisations and ABCP that are sufficiently liquid and have received a favourable assessment pursuant to the Internal Credit Quality Assessment Procedure.</p> <p>At the discretion of the Investment Adviser, the Fund will invest in eligible reverse repurchase agreements for both liquidity management purposes and for permitted investment purposes.</p> <p>The Fund may only use derivatives for the purpose of hedging the interest rate or exchange rate risks inherent in its investments. The underlying of the derivative instruments must consist of interest rates, foreign exchange rates, currencies or indices representing one of those categories.</p> <p>The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.</p> <p><b>The Fund may have a material exposure to permitted securitisations and ABCPs and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Commitment Approach.</b></p> |
| US Dollar Short Duration Bond Fund | <p>The US Dollar Short Duration Bond Fund seeks to maximise total return. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of the Fund's total assets are invested in fixed income transferable securities denominated in US dollars with a duration of less than five years. The average duration is not more than three years. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p> <p>As part of its investment objective the Fund may invest up to 100% of its total assets in ABS and MBS whether investment grade or not. The ABS and MBS will generally be issued in the US, the securitised assets will be rated investment grade by at least one of the leading credit rating agencies and agency ABS and MBS will carry the same credit rating as the US Government. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may</p>                             |

|                         | <p>include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed "Specific Risk Considerations" of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Absolute VaR.</b></p> <p><b>Expected level of leverage of the Fund: 350% of Net Asset Value.</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| US Flexible Equity Fund | <p>The US Flexible Equity Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("<b>ESG</b>") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b><i>ESG Policy</i></b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and</p> |

|                | <p>proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| US Growth Fund | <p>The US Growth Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the US. The Fund places particular emphasis on companies that, in the opinion of the Investment Adviser, exhibit growth investment characteristics, such as above-average growth rates in earnings or sales and high or improving returns on capital.</p> <p>The Fund’s total assets will be invested in accordance with the ESG Policy described below.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine</p>                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| US Mid-Cap Value Fund | <p>The US Mid-Cap Value Fund seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of mid capitalisation companies domiciled in, or exercising the predominant part of their economic activity in, the US. Mid capitalisation companies are considered companies which, at the time of purchase, have market capitalisations in the range of companies included in the Russell Midcap Value Index.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>Risk management measure used: Commitment Approach.</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| World Bond Fund*      | <p>The World Bond Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“<b>ESG</b>”) focused investing. The Fund invests at least 70% of its total assets in investment grade fixed income transferable securities. Currency exposure is flexibly managed.</p> <p>The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Fund | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <p>The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.</p> <p>As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.</p> <p>The Fund’s exposure to contingent convertible bonds is limited to 20% of total assets. The Fund’s exposure to Distressed Securities is limited to 10% of its total assets.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p><b>This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section headed “Specific Risk Considerations” of the Luxembourg Prospectus.</b></p> <p><b>Risk management measure used: Relative VaR using Bloomberg Global Aggregate USD Hedged Index as the appropriate benchmark.</b></p> <p><b>Expected level of leverage of the Fund: 350% of Net Asset Value.</b></p> <p><b>ESG Policy</b></p> <p>The Fund will apply the BlackRock EMEA Baseline Screens.</p> <p>The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).</p> |

|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                 | <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |
| World Gold Fund | <p>The World Gold Fund seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is gold-mining. It may also invest in the equity securities of companies whose predominant economic activity is other precious metal or mineral and base metal or mineral mining. The Fund does not hold physical gold or metal.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| World Healthscience Fund | <p>The World Healthscience Fund seeks to maximise total return and invest in a manner consistent with the principles of ESG investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in healthcare, pharmaceuticals, medical technology and supplies and the development of biotechnology. Currency exposure is flexibly managed.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.</p> <p>The Fund's total assets will be invested in accordance with the ESG Policy described below.</p> <p><b>Risk management measure used: Commitment Approach.</b></p> <p><b>ESG Policy</b></p> <p>Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.</p> <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused</p> |

| Fund                               | Investment Objective, Policy and Strategy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|      | <p>The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <a href="https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf">https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf</a>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.</p> <p>The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.</p> <p>Please refer to the SFDR disclosures in the Luxembourg Prospectus for further details of the ESG commitments made by the Fund.</p> <p>The Fund has been categorised as an Article 8 fund under the EU Regulation 2019/2088 on sustainable finance disclosure.</p> |

*\* This Fund is an ESG Fund under Circular No. CFC 02/2022 on the Disclosure and Reporting Guidelines for Retail ESG Funds issued by the MAS.*

#### 6.1.1 Risk Management

The Management Company is required by regulation to employ a risk management process in respect of the Funds, which enables it to monitor accurately and manage the global exposure from financial derivative instruments (“**global exposure**”) which each Fund gains as a result of its strategy.

The Management Company uses one of two methodologies, the “Commitment Approach” or the “Value at Risk” or “VaR” approach, in order to measure the global exposure of each of the Funds and manage the potential loss to them due to market risk, in each case ensuring each Fund complies with the investment restrictions set out in Appendix A (Investment and Borrowing Powers and Restrictions) of the Luxembourg Prospectus. The methodology used for each Fund will be determined by the Management Company based on the investment strategy of the relevant Fund. Details about the methodologies used for each Fund are set out in the section headed “Investment Objectives and Policies” of the Luxembourg Prospectus.

The Management Company will ensure that the risk management and compliance procedures are adequate and have been or will be implemented and that it has the necessary expertise to manage the risk relating to the use of financial derivatives.

#### 6.1.2 Liquidity Risk Management

The Management Company has established a Liquidity Risk Management Policy which enables it to identify, monitor and manage the liquidity risks of each Fund. Such policy, combined with the liquidity management tools available, seeks to achieve fair treatment of Shareholders and safeguard the interests of remaining Shareholders against the redemption behaviour of other investors and mitigate against systemic risk.

The Management Company's Liquidity Risk Management Policy is appropriate for each Fund's specific characteristics and takes into account the relevant Fund's liquidity terms, asset class liquidity, liquidity tools and regulatory requirements.

Under the Liquidity Risk Management Policy, tools available to manage liquidity risk include the following:

- (a) the Management Company may adjust the Net Asset Value per Share for a Fund in order to reduce the effect of "dilution" and apply the dealing costs to transacting investors;
- (b) a Fund may borrow up to 10% of its total net assets on a temporary basis;
- (c) the Company will not be bound to redeem or convert on any one Dealing Day (as defined in the Luxembourg Prospectus) more than 10% of the value of Shares of all Classes of a Fund then in issue or deemed to be in issue;
- (d) payment of an amount to a single Shareholder in excess of USD500,000 may be deferred for up to seven Business Days (as defined in the Luxembourg Prospectus) beyond the normal settlement date;
- (e) the Management Company may, subject to the prior consent of a Shareholder, effect a payment of redemption proceeds in specie by allocating to the Shareholder investments from the portfolio of the relevant Fund equal in value to the price of the relevant Shares to be redeemed;
- (f) the Company may compulsorily redeem all Shares of the Company or the Shares of any Class if the Net Asset Value of the Company or the relevant Fund falls below certain thresholds;
- (g) where the value of certain assets is not ascertainable by normal valuation methods or if the Directors consider that some other method of valuation more accurately reflects the fair value of such assets, the method of valuation will be such as the Directors in their absolute discretion decide; and
- (h) the Management Company may suspend the valuation of any Class of a Fund in certain circumstances.

#### 6.1.3 **Leverage**

A fund's level of investment exposure (for an equity fund, when combined with its instruments and cash) can in aggregate exceed its Net Asset Value due to the use of financial derivative instruments or borrowing (borrowing is only permitted in limited circumstances and not for investment purposes). Where a fund's investment exposure exceeds its Net Asset Value this is known as leverage.

Please refer to the section headed "Investment Objectives and Policies" of the Luxembourg Prospectus for more information about leverage and the expected level of leverage of each Fund which uses the VaR approach to measure global exposure.

- 6.1.4 Shareholders should note that the Directors may determine to restrict the purchase of Shares in a Fund when it has become "capacity constrained", for example, when a Fund or the investment strategy of a Fund reaches a size that in the opinion of the Management Company and/or Investment Advisers could impact its ability to implement its investment strategy, find suitable investments or manage efficiently its existing investments. Please refer to the section headed "Dealing in Fund Shares" of the Luxembourg Prospectus for further details.

- 6.1.5 Please refer to the section headed "Investment Objectives and Policies" of the Luxembourg Prospectus for further information on the investment objective, policy and strategy for each Fund.

#### 6.2 **Investment Restrictions**

- 6.2.1 Please refer to Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus for information on the investment restrictions for the Funds.

### 7 **FEES, CHARGES AND EXPENSES**

- 7.1 The current fees, charges and expenses applicable to each Fund are set out in Appendix 1 to this Singapore Prospectus.
- 7.2 Please refer to the "Fees, Charges and Expenses" section of the Luxembourg Prospectus and Appendix B (Summary of Certain Provisions of the Articles and of Company Practice), Appendix C (Additional Information)

and Appendix E (Summary of Charges and Expenses) to the Luxembourg Prospectus for further details on fees, charges and expenses currently applicable to the Funds.

## 8 RISK FACTORS

### 8.1 General Risks

- 8.1.1 The performance of each Fund will depend on the performance of the underlying investments. No guarantee or representation is made that any Fund or any investment will achieve its respective investment objectives.
- 8.1.2 Past results are not necessarily indicative of future results. The value of the Shares may fall due to any of the risk factors set out in the Luxembourg Prospectus as well as rise and an investor may not recoup its investment. Income from the Shares may fluctuate in money terms.
- 8.1.3 Changes in exchange rates may, among other factors, cause the value of Shares to increase or decrease. The levels and bases of, and reliefs from, taxation may change.
- 8.1.4 There can be no assurance that the collective performance of a Fund's underlying investments will be profitable. Also, there is no guarantee of the repayment of principal. On establishment, a Fund will normally have no operating history upon which investors may base an evaluation of performance.
- 8.1.5 The Funds are exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Management Company seeks to reduce these operational risks through controls and procedures and, through its monitoring and oversight of providers of services for the Funds, and also seeks to ensure that such service providers take appropriate precautions to avoid and mitigate risks that could lead to disruptions and operating errors. However, it is not possible for the Management Company and other service providers to identify and address all of the operational risks that may affect a Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.
- 8.1.6 A Fund's operations (including investment management, distribution, collateral management, administration, and currency hedging) are carried out by several service providers which are selected based on a rigorous due diligence process.
- 8.1.7 Nevertheless, the Management Company and other service providers to the Funds may experience disruptions or operating errors such as processing errors or human errors, inadequate or failed internal or external processes, or systems or technology failures, provision or receipt of erroneous or incomplete data, resulting in operational risk which may have a negative effect on the Fund's operations and may expose the Fund to a risk of loss. This can manifest itself in various ways, including business interruption, poor performance, information systems malfunctions or failures, provision or receipt of erroneous or incomplete data or loss of data, regulatory or contractual breaches, human error, negligent execution, employee misconduct, fraud or other criminal acts. Investors could experience delays (for example, delays in the processing of subscriptions, switching and redemption of Shares) or other disruptions.
- 8.1.8 While the Management Company seeks to minimize operational errors as set out above, there may still be failures that could cause losses to a Fund and reduce the value of the Fund.

### 8.2 Specific Risks

- 8.2.1 In addition to the general risks, as set out above and in the Luxembourg Prospectus, that should be considered for all Funds, there are other risks that investors should also bear in mind when considering investment into specific Funds. The tables below show which specific risk warnings apply to each of the Funds.

| No. | FUND                   | Risk of Capital Erosion | Fixed Income | Distressed Securities | Delayed Delivery Transactions | Small Cap | Equity risk | ABS/ MBS/ ABCP | Portfolio Concentration Risk | Contingent Convertible Bonds | ESG Investment Policy Risk | Model Risk |
|-----|------------------------|-------------------------|--------------|-----------------------|-------------------------------|-----------|-------------|----------------|------------------------------|------------------------------|----------------------------|------------|
| 1.  | AI Innovation Fund     |                         |              |                       |                               | X         | X           |                | X                            |                              | X                          |            |
| 2.  | Asia Pacific Bond Fund |                         | X            | X                     |                               |           |             | X              |                              | X                            | X                          |            |
| 3.  | Asian Dragon Fund      |                         |              |                       |                               | X         | X           |                |                              |                              |                            |            |

| No. | FUND                                          | Risk of Capital Erosion | Fixed Income | Distressed Securities | Delayed Delivery Transactions | Small Cap | Equity risk | ABS/MBS/ABCP | Portfolio Concentration Risk | Contingent Convertible Bonds | ESG Investment Policy Risk | Model Risk |

| 95.                        | World Technology Fund                           | X                                     |                |                     | X                                   | X                |                               |                      |          | X              |               |                      |

8.2.2 As the Net Asset Value of the Shares is denominated in United States Dollars (“USD”), Euro (“EUR”), Japanese yen (“Yen”), Chinese Renminbi (“RMB”), Swiss Franc (“CHF”) or Pound Sterling (“GBP”), foreign currency

exchange rate movements are likely to influence the returns to investors in Singapore, and accordingly such investors may be exposed to exchange rate risks. Certain Share Classes of certain Funds may be denominated in a currency other than the base currency of the relevant Fund. In addition, the Funds may invest in assets denominated in currencies other than the base currency. Therefore changes in exchange rates and changes in exchange rate controls may affect the value of an investment in the Funds. The hedging strategies applied to Hedged Share Classes will vary on a Fund by Fund basis. In respect of Hedged Share Classes, Funds will apply a hedging strategy which aims to mitigate currency risk between the Net Asset Value of a Fund and the currency of the Hedged Share Class while taking into account practical considerations including transaction costs. Hedged Share Classes in non-major currencies may be affected by the fact that capacity of the relevant currency market may be limited, which could further affect the volatility of the Hedged Share Class. Funds may also use hedging strategies which seek to provide exposure to certain currencies (i.e. where a currency is subject to currency trading restrictions). These hedging strategies involve converting the Net Asset Value of the relevant Share Class into the relevant currency using financial derivative instruments (including currency forwards). All gains/losses or expenses arising from hedging transactions are borne separately by the Shareholders of the respective Hedged Share Classes. Any over-hedged position arising in a Hedged Share Class is not permitted to exceed 105% of the Net Asset Value of that Hedged Share Class and any under-hedged position arising in a Hedged Share Class is not permitted to fall short of 95% of the Net Asset Value of that Hedged Share Class.

- 8.2.3 In respect of the Funds where “currency exposure is flexibly managed” as set out for the respective Funds in the section headed “Investment Objective, Policy and Strategy”, this means that the relevant Investment Adviser(s) may be expected to regularly employ currency management and hedging techniques in the relevant Fund. Techniques used may include hedging the currency exposure on a Fund’s portfolio or/and using more active currency management techniques such as currency overlays, but does not mean that a Fund’s portfolio will always be hedged in whole or in part. In respect of all other Funds, the currency exposure of such Funds will normally be left unhedged.
- 8.2.4 In respect of Funds which are subject to ABS and MBS risks, investors should note that the obligations associated with these securities may be subject to greater credit, liquidity and interest rate risk compared to other fixed income securities such as government issued bonds. ABS and MBS are often exposed to extension risk (where obligations in the underlying assets are not paid on time) and prepayment risks (where obligations on the underlying assets are paid earlier than expected). These risks may have a substantial impact on the timing and size of the cashflows paid by the securities and may negatively impact the returns of the securities.
- 8.2.5 In respect of Funds which are subject to Distressed Securities risks, investors should note that the relevant Fund may invest in securities issued by a company that is either in default or in high risk of default. This involves significant risk. There is no guarantee that any exchange offer or reorganisation will be successfully completed.
- 8.2.6 In respect of Funds which may invest all or substantially all of its assets in collective investment schemes, the investment risks applicable to the target funds will apply in addition to the risks applicable to the Fund’s direct investments. The investment in collective investment schemes may result in an increase of the TER and/or Ongoing Charges, subject to the limits described in Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus.
- 8.2.7 In respect of Funds which use certain ESG criteria in their investment strategies, the use of ESG criteria may affect an ESG Fund’s investment performance and, as such, ESG Funds may perform differently compared to similar funds that do not use such criteria. ESG-based exclusionary criteria used in an ESG Fund’s investment policy may result in the ESG Fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to their ESG characteristics when it might be disadvantageous to do so. In evaluating a security or issuer based on ESG criteria, the Investment Adviser is dependent upon information and data from third party ESG Providers and other data providers, which may be incomplete, inaccurate, inconsistent or unavailable. As a result, there is a risk that the Investment Adviser may incorrectly assess a security or issuer. There is also a risk that the Investment Adviser may not apply the relevant ESG criteria correctly or that an ESG Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near- cash instruments, shares or units of CIS, and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers which may not be

consistent with the relevant ESG criteria used by such ESG Fund. Please refer to “ESG Investment Policy Risk” under the “Risk Considerations” section of the Luxembourg Prospectus for further details.

- 8.2.8 BlackRock defines sustainability risk as an investment risk (probability or uncertainty of occurrence of material losses relative to the expected return of an investment) that arises from environmental, social and/or governance issues. In this assessment, BlackRock focuses on the investment risks that are financially material to the fund. The outcome of the sustainability risk assessment outlined below is an assessment at the Fund level with no reference to the benchmark or active objective of the Fund. This is designed to give clients an indication of the total level of sustainability risk they may be exposed to when investing in a particular Fund. It is not intended to represent how sustainability risk is managed within our investment processes, as risk is managed within the objective of the Fund and typically assessed relative to the benchmark of the Fund. Sustainability risk may be reflected in two ways: 1) a Fund’s potential exposure to a sustainability risk event and 2) the potential financial impact to a Fund’s performance should such a sustainability risk event or factor occur. In assessing the potential impact of sustainability risk, these aspects are considered against the fund’s geographical focus, liquidity and product design. Exposure and impact are assessed across a 5-year (or less) time horizon as aligned with the investment horizon of the majority of BlackRock funds. BlackRock classifies each of the above factors and aggregates the factor assessments to a fund-by-fund overall classification of material or not material. As at the date of the Luxembourg Prospectus, Circular Economy Fund, Future of Transport Fund, Sustainable Energy Fund, Sustainable Global Infrastructure Fund, World Real Estate Securities Fund have been classified as falling into the “material” category from a sustainability risk perspective. Please refer to the section headed “Sustainability Risks – General” under the “Risk Considerations” section of the Luxembourg Prospectus for more information on sustainability risks.
- 8.2.9 Please refer to the section headed “Risk Considerations” of the Luxembourg Prospectus for more information on the general risks and specific risks relating to each Fund and to paragraph 17 of Appendix C (Additional Information) to the Luxembourg Prospectus for further details of the special risk considerations applicable to the India Fund.

## **9 SUBSCRIPTION AND OFFERING OF SHARES**

### **9.1 Subscription Procedure, Dealing Deadline and Pricing Basis**

- 9.1.1 Shares may normally be acquired at their Net Asset Value. Prices may include or have added to them, as appropriate: (i) an initial charge; and (ii) in limited circumstances, adjustments to reflect fiscal charges and dealing costs. Please refer to paragraph 17.3 of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus for details of such fiscal and dealing costs. Save for Shares being offered during the initial subscription period (as described in paragraph 9.3 of this Singapore Prospectus), prices of Shares are calculated on a forward pricing basis and the relevant Net Asset Value cannot be calculated at the time of the application.
- 9.1.2 Singapore investors who wish to subscribe for Shares should complete the application form available from the Transfer Agent on initial application. Subsequent applications for Shares may be made electronically through a ‘straight through process’ (“**STP**”) or by fax (followed by original via post) and the Management Company may, in its sole discretion, accept individual dealing orders submitted via other forms of electronic communication. The completed application must be received, through the appointed Singapore distributors or otherwise, by the Transfer Agent. Subscriptions must be received by the Transfer Agent by the following cut-off point: (1) in respect of a Fund other than the Multi-Theme Equity Fund, 6:00 pm (Singapore time) on the relevant Dealing Day; or (2) in respect of the Multi-Theme Equity Fund, 6:00 pm (Singapore time) one Business Day prior to the relevant Dealing Day (in each case, the “**Singapore Cut-Off Point**”), unless specifically agreed otherwise by the Transfer Agent, in order to be accepted by the Transfer Agent for that day’s dealing (provided it is also a Dealing Day for the relevant Fund). Subscriptions received by the Transfer Agent after the Singapore Cut-Off Point will be accepted by the Transfer Agent for dealing on the next available Dealing Day.
- 9.1.3 Appointed Singapore distributors will impose their own more restrictive dealing deadlines on investors in order to meet the Transfer Agent’s dealing deadlines. Investors should confirm the applicable dealing deadline with the relevant appointed Singapore distributor.

- 9.1.4 The Transfer Agent will promptly confirm transactions by dispatching a confirmation note to the applicant normally within 3 days after receipt of the subscription.
- 9.1.5 All application forms and other dealing orders must contain all required information, including (but not limited to) Share Class specific information such as the International Securities Identification Number (ISIN) of the Share Class the investor wishes to deal in. Where the ISIN quoted by the investor is different from any other Share Class specific information provided by the investor with respect to such order, the quoted ISIN shall be decisive and the Management Company and the Transfer Agent may process the order accordingly taking into account the quoted ISIN only.
- 9.1.6 Further details on the subscription procedure are set out in the section headed “Application for Shares” of the Luxembourg Prospectus.
- 9.1.7 An investor may, by prior arrangement with the Transfer Agent, provide the Transfer Agent with any major freely convertible currency and the Transfer Agent will arrange the necessary currency transactions. The cost of foreign exchange transactions will be borne by the investor.
- 9.1.8 The Funds do not offer a cancellation period to investors.

## 9.2 Minimum Subscription

- 9.2.1 In respect of the Class A Shares of each Fund, the minimum initial subscription amount is USD 5,000 (or the approximate equivalent in the relevant dealing currency) and the minimum subsequent subscription amount is USD 1,000 (or the approximate equivalent in the relevant dealing currency) and in respect of the Class D Shares of each Fund, the minimum initial subscription amount is USD 100,000 (or the approximate equivalent in the relevant dealing currency) and the minimum subsequent subscription amount is USD 1,000 (or the approximate equivalent in the relevant dealing currency).
- 9.2.2 The minimum initial subscription amount and the minimum subsequent subscription amount may be varied for any particular case or distributor or generally.

## 9.3 Numerical Example of How Shares are Allotted

### Class A Shares

The following example assumes an initial charge of 5% of the gross investment and explains the effect of such initial charge on the number of Shares received.

Based on an investment amount of USD 5,000 at the notional Net Asset Value per Share of USD 1.00, the number of Shares received by the Shareholder will be:

|                                                      |   |                              |   |                                                   |
|------------------------------------------------------|---|------------------------------|---|---------------------------------------------------|
| USD 5,000                                            | – | USD 250                      | = | USD 4,750                                         |
| Gross Investment                                     |   | Initial charge of 5%         |   | Net subscription into<br>Class A Shares of a Fund |
| USD 4,750                                            | ÷ | USD 1.00                     | = | 4,750                                             |
| Net subscription into<br>Class A Shares of a<br>Fund |   | Net Asset Value per<br>Share |   | Number of Shares                                  |

***Investors should note that the above example is purely hypothetical and is not a forecast or indication of any expectation of performance of the Funds. The above example is to illustrate how the Shares will be allotted. Please note that Class D Shares are subject to a higher minimum initial subscription amount of USD 100,000.***

## 9.4 Minimum Fund Size

- 9.4.1 If at any time the Net Asset Value of the Company is less than USD 100 million (or equivalent), all Shares not previously redeemed may be redeemed by notice to all Shareholders.

9.4.2 The Directors may require redemption of all the Shares linked to a particular Fund if the Net Asset Value of the relevant Fund falls below USD 50 million (or the equivalent in any relevant dealing currency).

## **9.5 Valuation Method**

9.5.1 Investors should refer to the section headed “Net Asset Value and Price Determination” in Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus for details of the method of valuation adopted in respect of investments of the Funds.

9.5.2 Further information on subscriptions of Shares of the Funds can be found under the sections headed “Dealing in Fund Shares” and “Application for Shares” of, and Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to, the Luxembourg Prospectus.

## **9.6 Regular Savings Plan**

9.6.1 The Singapore distributors may, at their own discretion, offer regular savings plans in relation to offers of the Funds in Singapore. Information on such regular savings plans, such as minimum periodic contribution, timing of the investment deduction and Shares allotment, fees and termination of such regular savings plan, may be obtained from the relevant appointed Singapore distributor.

9.6.2 An investor may at any time cease his participation in the regular savings plan (if any) in respect of a Fund or Class without penalty by giving written notice to the relevant Singapore distributor of not less than such period of notice as may from time to time be required by the relevant Singapore distributor provided that the requisite notice period is not longer than the period between that investor’s periodic contributions or such other period specified under applicable Singapore laws.

## **9.7 Supplementary Retirement Scheme**

9.7.1 You may also subscribe for Shares using SRS monies. You should check with your relevant appointed Singapore distributors on the availability of such subscription and any further details relating to such SRS subscriptions.

9.7.2 If you wish to subscribe for Shares with your SRS monies, you will have to give a written authorisation to the relevant SRS operator for monies to be withdrawn from your SRS account to pay for the subscription of Shares.

# **10 REDEMPTIONS**

## **10.1 Redemption Procedure, Dealing Deadline and Pricing Basis**

10.1.1 Shares may normally be redeemed at their Net Asset Value. Prices may include or have added to them, as appropriate and in limited circumstances, adjustments to reflect fiscal charges and dealing costs. Please refer to paragraph 17.3 of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus for details of such fiscal and dealing costs. A redemption charge of up to a maximum of 2% of the redemption proceeds can be charged to a Shareholder where the Directors, in their reasonable opinion, suspect that Shareholder of excessive trading as described in the section headed “Excessive Trading Policy” of the Luxembourg Prospectus.

10.1.2 Singapore Shareholders wishing to redeem Shares should submit requests for redemption electronically through an approved STP provider. If this option is unavailable then this can be completed by fax (followed by original via post) to the Transfer Agent and the Management Company may, at its sole discretion, accept individual dealing orders submitted via other forms of electronic communication. Please refer to the section headed “Redemption of Shares” of the Luxembourg Prospectus for more information on the redemption procedure.

10.1.3 Requests for redemption must be received, through the appointed Singapore distributors or otherwise, by the Transfer Agent by the Singapore Cut-Off Point, unless specifically agreed otherwise by the Transfer Agent, in order to be accepted by the Transfer Agent for that day’s dealing (provided it is also a Dealing Day for the relevant Fund). Redemption requests received by the Transfer Agent after the Singapore Cut-Off Point will be accepted by the Transfer Agent for dealing on the next available Dealing Day.

- 10.1.4 Appointed Singapore distributors will impose their own more restrictive dealing deadlines on Shareholders in order to meet the Transfer Agent's dealing deadlines. Investors should confirm the applicable dealing deadline with the relevant appointed Singapore distributor.
- 10.1.5 The redemption price per Share is calculated on a forward pricing basis. Therefore, the redemption price of Shares will not be ascertainable at the time of the redemption request.
- 10.2 Minimum Realisation Amount and Minimum Holding**
- 10.2.1 The Company may refuse to comply with redemption, conversion or transfer instructions if they are given in respect of part of a holding in the relevant Share Class which has a value of less than USD 1,000 or the approximate equivalent in the relevant dealing currency or if to do so would result in such a holding of less than USD 5,000 (except for Class D Shares where there is no on-going minimum holding size once the initial subscription amount has been made). These minima may be varied for any particular case or distributor or generally.
- 10.3 Payment of Redemption Proceeds**
- 10.3.1 Redemption payments will normally be despatched in the relevant dealing currency on the third Business Day after the relevant Dealing Day, provided the relevant documents and any applicable money laundering prevention or international financial sanctions information have been received. On written request to the Transfer Agent (made through the appointed Singapore distributors), payment may be made in such other currency as may be freely purchased by the Transfer Agent with the relevant dealing currency and such currency exchange will be effected at the Shareholder's risk and cost. Redemption payments for Shares are made by telegraphic transfer to the Shareholder's bank account at the Shareholder's cost.
- 10.3.2 If you have subscribed Shares with monies from your SRS account, redemption payments payable to you shall be paid by transferring the monies to the relevant SRS operator for credit to your SRS account.
- 10.4 Numerical example of calculation of redemption proceeds**
- Class A Shares
- The following example assumes that there is no redemption charge.
- Based on a redemption request of 1,000 Shares at the notional Net Asset Value per Share of USD 1.50, the redemption proceeds will be:
- |                           |   |                           |   |                           |
|---------------------------|---|---------------------------|---|---------------------------|
| 1,000 Shares              | X | USD 1.50                  | = | USD 1,500                 |
| Redemption request        |   | Net Asset Value per Share |   | Gross redemption proceeds |
| USD 1,500                 | - | USD 0                     | = | USD 1,500                 |
| Gross redemption proceeds |   | Redemption charge         |   | Net redemption proceeds   |
- Investors should note that the above example is purely hypothetical and is not a forecast or indication of any expectation of performance of the Funds. The above examples are to illustrate how the redemption proceeds will be calculated.***
- 10.5 For more information on redemptions, please refer to the sections headed "Redemption of Shares" and "Conversion of Shares" of, as well as Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to, the Luxembourg Prospectus.
- 11 CONVERSION**
- 11.1 Conversions are permitted between different Share Classes of the same Fund or of a different Fund available in Singapore, subject to the limitations set out under the section headed "Conversion of Shares" of the Luxembourg Prospectus and provided investors and/or the holding (as appropriate) meet the specific eligibility criteria for each Share Class.

- 11.2 Shareholders should normally submit instructions for conversion electronically through an approved STP provider. If this option is unavailable then this can be completed by fax (followed by original via post to the Transfer Agent) and the Management Company may, at its sole discretion, accept individual conversion orders submitted via other forms of electronic communication. Please refer to the section headed “Instructions to Convert” of the Luxembourg Prospectus for more information on the conversion procedure.
- 11.3 Requests for conversion must be received, through the appointed Singapore distributors or otherwise, by the Transfer Agent by the Singapore Cut-Off Point, unless specifically agreed otherwise by the Transfer Agent, in order to be accepted by the Transfer Agent for that day’s dealing (provided it is also a Dealing Day for the relevant Fund). Conversion requests received by the Transfer Agent after the Singapore Cut-Off Point will be accepted by the Transfer Agent for dealing on the next available Dealing Day.
- 11.4 Appointed Singapore distributors will impose their own more restrictive dealing deadlines on Shareholders in order to meet the Transfer Agent’s dealing deadlines. Investors should confirm the applicable dealing deadline with the relevant appointed Singapore distributor.
- 11.5 For more information on conversion, please refer to the section headed “Conversion of Shares” of, as well as Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to, the Luxembourg Prospectus.

## **12 OBTAINING PRICE INFORMATION**

- 12.1 The Net Asset Value of the Class A and Class D Shares for the previous Dealing Day may be obtained from the Singapore Representative or an appointed Singapore distributor and will also be published on [www.blackrock.com/sq](http://www.blackrock.com/sq).
- 12.2 Further information on obtaining price information can be found under the section headed “Prices of Shares” of the Luxembourg Prospectus.

## **13 SUSPENSION OF VALUATION AND SUBSCRIPTION, TRANSFER, CONVERSION AND REDEMPTION OF SHARES**

- 13.1 The Board of Directors may at any time suspend the calculation of the Net Asset Value of the Shares of any Class of a Fund and the issue, redemption and conversion of such Shares in the circumstances described under paragraph 30 of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus.
- 13.2 The Company will also not be bound to accept instructions to subscribe for, and will be entitled to defer instructions to redeem or convert any Shares of a Fund on any one Dealing Day in the circumstances described under paragraph 32 of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus.
- 13.3 The Directors also have power to suspend dealings in the Shares linked to any Fund where it is to be terminated or merged in the circumstances described under paragraph 9 of Appendix B (Summary of Certain Provisions of the Articles and of Company Practice) to the Luxembourg Prospectus.

## **14 PERFORMANCE OF THE FUNDS, EXPENSE RATIO AND TURNOVER RATIO**

Please refer to Appendix 2 to this Singapore Prospectus for information on the performance, expense ratio and turnover ratio of each Fund.

## **15 CONFLICTS OF INTEREST**

- 15.1 Conflicts of interest are set out in paragraphs 6 and 26 to 29 of Appendix C (Additional Information) to the Luxembourg Prospectus.
- 15.2 Please also refer to paragraph 19 below on conflicts which may arise as a result of soft dollar commissions received or intended to be received.

## **16 REPORTS**

- 16.1 The Company’s accounting year ends on 31 August in each year.

16.2 Audited annual reports will be made available within 4 months of the relevant year-end and unaudited interim reports will be made available within 2 months following the end of the relevant half-year. The annual and interim reports will be made available at the registered office of the Company and from the Singapore Representative during normal business hours.

16.3 Details on the Company's audited annual report and unaudited interim report are set out under the section headed "Meetings and Reports" of the Luxembourg Prospectus.

## 17 CERTAIN SINGAPORE TAX CONSIDERATIONS

17.1 Investors should be aware that they may or may not be required to pay income tax in relation to their investments in the Funds. Investors who are in doubt of their tax position should consult their own independent tax advisors.

## 18 USE OF DERIVATIVES AND SECURITIES LENDING

18.1 In accordance with the investment limits and restrictions set out in Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus and in the section headed "Investment Objectives and Policies" of the Luxembourg Prospectus, each of the Funds may use financial derivative instruments for investment purposes and for the purposes of efficient portfolio management and to hedge market, interest rate and currency risk. Each Fund's choice of derivative counterparties for its derivative transactions is not restricted and should the Company net its OTC derivative positions, it is intended for such netting to conform to the laws of the relevant jurisdictions. Investors should note that a Fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.

18.2 Investors may obtain supplementary information relating to the risk management methods employed by the Company from the Company or the Singapore Representative. Please refer to the sections headed "Derivatives – (a) General" and "Derivatives – (b) Specific" of the Luxembourg Prospectus for more details about derivatives usage. Please also refer to the Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus on the investment restrictions and techniques and instruments in relation to the use of derivatives.

18.3 The Funds may enter into securities lending transactions and/or repurchase transactions for the purposes of efficient portfolio management subject to the conditions and limits in accordance with the requirements of the CSSF. Please refer to paragraphs 4.5 to 4.8 of Appendix A (Investment and Borrowing Powers and Restrictions) to the Luxembourg Prospectus for more information.

### 18.3.1 Types, purpose, limits and conditions

In addition to the investments in financial derivatives instruments, the Company may employ other techniques and instruments relating to transferable securities and money market instruments subject to the conditions set out in the CSSF Circular 08/356, as amended from time to time, and ESMA Guidelines ESMA/2012/832EL, such as repurchase/ reverse repurchase transactions, ("**repo transactions**") and securities lending.

Appendix G (Securities Financing Transaction Disclosures) of the Luxembourg Prospectus specifies, for each Fund, the maximum and expected proportion of the Net Asset Value that can be subject to securities lending and repo transactions. The expected proportion is not a limit and the actual percentage may vary over time depending on factors including, but not limited to, market conditions and borrowing demand in the market.

Techniques and instruments which relate to transferable securities or money market instruments and which are used for the purpose of efficient portfolio management, including financial derivatives instruments which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- a) they are economically appropriate in that they are realised in a cost-effective way;
- b) they are entered into for one or more of the following specific aims:
  - (i) reduction of risk;
  - (ii) reduction of cost;

- (iii) generation of additional capital or income for the Company with a level of risk which is consistent with the risk profile of the Company and its relevant Funds and the risk diversification rules applicable to them;
- c) their risks are adequately captured by the risk management process of the Company; and
- d) they cannot result in a change to the Fund's declared investment objective or add significant supplementary risks in comparison to the general risk policy as described in the Luxembourg Prospectus and relevant key investor information documents issued pursuant to the 2010 Law.

Techniques and instruments (other than financial derivatives instruments) which may be used for efficient portfolio management purposes are set out below and are subject to the conditions set out below.

Moreover those transactions may be carried out for 100% of the assets held by the relevant Fund provided (i) that their volume is kept at an appropriate level or that the Company is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations; and (ii) that these transactions do not jeopardise the management of the Company's assets in accordance with the investment policy of the relevant Fund. Risks shall be monitored in accordance with the risk management process of the Company.

As part of the efficient portfolio management techniques the Funds may underwrite or sub-underwrite certain offerings from time to time through the Investment Advisers. The Management Company will seek to ensure that the relevant Funds will receive the commissions and fees payable under such contracts and all investments acquired pursuant to such contracts will form part of the relevant Funds' assets. Under the Luxembourg regulation, there is no requirement to require a prior consent of the trustee/depositary.

The Depositary will ensure that the assets of the Funds held in custody by the Depositary shall not be reused by the Depositary or by any third party to whom the custody function has been delegated for their own account. Reuse comprises any transaction of assets of the Funds held in custody including, but not limited to, transferring, pledging, selling and lending. Assets of the Funds held in custody are only allowed to be reused where:

- a) the reuse of the assets is executed for the account of the Funds;
- b) the Depositary is carrying out the instructions of the Management Company;
- c) the reuse is for the benefit of the Fund and in the interest of the Shareholders; and
- d) the transaction is covered by high quality and liquid collateral received by the Fund under a title transfer arrangement with a market value at least equivalent to the market value of the reused assets plus a premium.

### 18.3.2 Securities lending transactions and related potential conflicts of interest

Each Fund may conduct securities lending transactions in aggregate for up to such percentage of its Net Asset Value as disclosed in the table in Appendix G (Securities Financing Transaction Disclosures) of the Luxembourg Prospectus.

The Company may enter into securities lending transactions provided that it complies with the following rules:

- (i) the Company may lend securities either directly or through a standardised system organised by a recognised clearing institution or a lending program organised by a financial institution subject to prudential supervision rules which are recognised by the CSSF as equivalent to those laid down in European Union ("EU") law and specialised in this type of transactions;
- (ii) the borrower must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law;
- (iii) net exposures (i.e. the exposures of a Fund less the collateral received by a Fund) to a counterparty arising from securities lending transactions shall be taken into account in the 20% limit provided for in article 43(2) of the 2010 Law.

- (iv) as part of its lending transactions, the Company must receive collateral, the market value of which, shall, at all times, be equal to at least the market value of the securities lent plus a premium;
- (v) such collateral must be received prior to or simultaneously with the transfer of the securities lent. When the securities are lent through an intermediary referred to under (i) above, the transfer of the securities lent may be effected prior to receipt of the collateral, if the relevant intermediary ensures proper completion of the transaction. The intermediary may, instead of the borrower, provide to the UCITS collateral in lieu of the borrower; and
- (vi) the Company must have the right to terminate any securities lending arrangement which it has entered into at any time or demand the return of any or all of the securities loaned.

Counterparties for securities lending transactions are selected based on a rigorous credit assessment and in-depth review at the individual legal entity level at the outset of the trading relationship. Credit assessments include an evaluation of the legal entity corporate and/or ownership structure, regulatory regime, track record, financial health and any external agency ratings, where applicable.

All revenues from efficient portfolio management techniques will be returned to the Company, net of direct and indirect operational costs and fees (which do not include hidden revenue).

The Company shall disclose the global valuation of the securities lent in the annual and semi-annual reports. Please refer also to paragraph 11 (“**The Depositary**”) in Appendix C (Additional Information) of the Luxembourg Prospectus for information on additional requirements pursuant to the UCITS Directive in relation to the reuse of assets held in custody by the Depositary.

There are potential conflicts of interests in managing a securities lending program, including but not limited to: (i) BlackRock as lending agent may have an incentive to increase or decrease the amount of securities on loan or to lend particular securities in order to generate additional risk-adjusted revenue for BlackRock and its affiliates; and (ii) BlackRock as lending agent may have an incentive to allocate loans to clients that would provide more revenue to BlackRock. As described further below, BlackRock seeks to mitigate this conflict by providing its securities lending clients with equal lending opportunities over time in order to approximate pro-rata allocation.

As part of its securities lending program, BlackRock indemnifies the Funds and certain other clients and/or funds against a shortfall in collateral in the event of borrower default. On a regular basis, BlackRock calculates the potential dollar exposure of collateral shortfall resulting from a borrower default (“**shortfall risk**”) in the securities lending program. BlackRock established program-wide borrower limits (“**credit limits**”) to actively manage the borrower-specific credit exposure. BlackRock oversees the risk model that calculates projected collateral shortfall values using loan-level factors such as loan and collateral type and market value as well as specific borrower counterparty credit characteristics. When necessary, BlackRock may adjust securities lending program attributes by restricting eligible collateral or reducing borrower credit limits. As a result, the management of the program-wide exposure as well as BlackRock-specific indemnification exposure may affect the amount of securities lending activity BlackRock may conduct at any given point in time by reducing the volume of lending opportunities for certain loans (including by asset type, collateral type and/or revenue profile).

BlackRock uses a predetermined systematic process in order to approximate pro-rata allocation over time. In order to allocate a loan to a portfolio: (i) BlackRock as a whole must have sufficient lending capacity pursuant to the various program limits (i.e. indemnification exposure limit and borrower credit limits); (ii) the lending portfolio must hold the asset at the time a loan opportunity arrives; and (iii) the lending portfolio must also have enough inventory, either on its own or when aggregated with other portfolios into one single market delivery, to satisfy the loan request. In doing so, BlackRock seeks to provide equal lending opportunities for all portfolios, independent of whether BlackRock indemnifies the portfolio. Equal opportunities for lending portfolios does not guarantee equal outcomes. Specifically, short and long-term outcomes for individual clients may vary due to asset mix, asset/liability spreads on different securities, and the overall limits imposed by the firm.

BlackRock may decline to make a securities loan on behalf of a Fund, discontinue lending on behalf of a Fund or terminate a securities loan on behalf of a Fund for any reason, including but not limited to regulatory requirements and/or markets rules, liquidity considerations, or credit considerations, which may impact Funds by reducing or

eliminating the volume of lending opportunities for certain types of loans, loans in particular markets, loans of particular securities or types of securities, or for loans overall.

### 18.3.3 Repo transactions

- (a) The Company may enter into repurchase transactions which consist of the purchase or sale of securities with provisions reserving the seller the right or the obligation to repurchase from the buyer securities sold at a price and term specified by the two parties in their contractual arrangement; and
- (b) reverse repurchase agreement transactions, which consist of a forward transaction at the maturity of which the seller (counterparty) has the obligation to repurchase the securities sold and the Company the obligation to return the securities received under the transaction.

Each Fund may conduct repurchase/reverse repurchase transactions in aggregate for up to such percentage of its latest available net asset value as disclosed in the table in Appendix G (Securities Financing Transaction Disclosures) of the Luxembourg Prospectus. All incremental incomes generated from such transactions will be accrued to the Fund.

The Company can act either as buyer or seller in repo transactions. Its involvement in such transactions is however subject to the following rules:

- (a) the fulfilment of the conditions 18.3.2(ii) and 18.3.2(iii) above;
- (b) during the life of a repo transaction with the Company acting as purchaser, the Company shall not sell the securities which are the object of the contract, before the counterparty has exercised its option or until the deadline for the repurchase has expired, unless the Company has other means of coverage
- (c) the securities acquired by the Company under a repo transaction must conform to the Fund's investment policy and investment restrictions and must be limited to:
  - (i) short-term bank certificates or money market instruments as defined in Directive 2007/16/EC of 19 March 2007;
  - (ii) bonds issued by non-governmental issuers offering an adequate liquidity;
  - (iii) assets referred to under paragraph 4.8.2 (b), (c) and (d) of Appendix A (Investment and Borrowing Powers and Restrictions) of the Luxembourg Prospectus; and
  - (iv) the Company shall disclose the total amount of the open repo transactions on the date of reference of its annual and interim reports.

### 18.3.4 Conflicts of interest

The Company has appointed BlackRock Advisors (UK) Limited as securities lending agent, under the terms of a securities lending management agreement, which in turn may sub-delegate the provision of securities lending agency services to other BlackRock Group companies. BlackRock Advisors (UK) Limited has the discretion to arrange stock loans with highly rated specialist financial institutions (the “**counterparties**”). Such counterparties can include associates of BlackRock Advisors (UK) Limited. The Board of Directors will ensure that revenues arising from securities lending transactions are in accordance with usual market practice.

### 18.3.5 Risks

The Funds engaging in securities lending will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund. The Company intends to ensure that all securities lending is fully collateralised but, to the extent that any securities lending is not fully collateralised (for example due to timing issues arising from payment lags), the Funds will have a credit risk exposure to the counterparties to the securities lending contracts.

In the event of the failure of the counterparty with which collateral has been placed, the Funds which engage in repurchase agreements may suffer loss as there may be delays in recovering collateral placed out or the cash

originally received may be less than the collateral placed with the counterparty due to inaccurate pricing of the collateral or market movements.

In the event of the failure of the counterparty with which cash has been placed, the Funds which engage in reverse repurchase agreements may suffer loss as there may be delay in recovering cash placed out or difficulty in realising collateral or proceeds from the sale of the collateral may be less than the cash placed with the counterparty due to inaccurate pricing of the collateral or market movements.

#### 18.3.6 Revenue

As part of the efficient portfolio management techniques the Funds may underwrite or sub-underwrite certain offerings from time to time through the Investment Advisers. The Management Company will seek to ensure that the relevant Funds will receive the commissions and fees payable under such contracts and all investments acquired pursuant to such contracts will form part of the relevant Funds' assets. Under the Luxembourg regulation, there is no requirement to require a prior consent of the trustee/depositary.

Under the terms of the securities lending management agreement, the securities lending agent is appointed to manage the Funds' securities lending activities and is entitled to receive a fee out of the income generated from securities lending. At the cost of the Company, BlackRock Advisors (UK) Limited receives remuneration in relation to its activities above. Such remuneration amounts to 37.5% of the gross revenue from the securities lending activities, with all direct and indirect costs borne out of BlackRock's share, including any third party operational and administrative costs, and will pay any third party operational and administrative costs associated with, and incurred in respect of, such activity, out of its fee. All revenue generated from securities lending activities net of the securities lending agent's fee will be returned to the Company. The relevant Funds receive 62.5% of the gross revenue from the securities lending activities.

The fee of the securities lending agent represents direct costs (and if relevant indirect operational costs/fees) of the Company's securities lending activities. To the extent that the securities lending costs payable to third parties exceed the fee received by the securities lending agent, the securities lending agent will discharge any excess amounts out of its own assets. Full financial details of the amounts earned, and expenses incurred with respect to securities lending for the Funds, including fees paid or payable, will also be included in the annual and semi-annual financial statements. The securities lending arrangements and associated costs will be reviewed at least annually.

- 18.3.7 Further information on the Company's use of securities lending and repo transactions are set out under the section headed "Efficient Portfolio Management – Other Techniques and Instruments" of the Luxembourg Prospectus.

### 19 SOFT DOLLAR COMMISSIONS

- 19.1 Pursuant to EU Directive 2014/65/EU on markets in financial instruments referred to as "MiFID II", BlackRock Group will no longer pay for external research via client trading commissions for its MiFID II-impacted funds (**"MIFID II-impacted funds"**).

The BlackRock Group shall meet such research costs out of its own resources. MiFID II-impacted funds are those which have appointed a BlackRock Group MiFID firm as investment adviser or where investment management has been delegated by such firm to an overseas affiliate.

Funds which have directly appointed an overseas affiliate of the BlackRock Group within a third country (i.e. outside the European Union) to perform portfolio management are not in-scope for the purposes of MiFID II and will be subject to the local laws and market practices governing external research in the applicable jurisdiction of the relevant affiliate. This means that costs of external research may continue to be met out of the assets of such funds. A list of such funds is available on request from the Management Company or can be found on the BlackRock website: <https://www.blackrock.com/international/individual/en-zz/mifid/research/bgf>.

Where investments are made in non-BlackRock Group funds, they will continue to be subject to the external manager's approach to paying for external research in each case. This approach may be different from that of the BlackRock Group and may include the collection of a research charge alongside trading commissions in

accordance with applicable laws and market practice. This means that the costs of external research may continue to be met out of the assets within the fund.

- 19.2 Where permitted by applicable regulation (excluding, for the avoidance of doubt, any Funds which are in scope for MiFID II), certain BlackRock Group companies acting as investment adviser to the Funds may accept commissions generated when trading equities with certain brokers in certain jurisdictions. Commissions may be reallocated to purchase eligible research services. Such arrangements may benefit one Fund over another because research can be used for a broader range of clients than just those whose trading funded it. BlackRock Group has a Use of Commissions Policy designed to ensure only eligible services are purchased and excess commissions are reallocated to an eligible service provider where appropriate.
- 19.3 To the extent that investment advisers within the BlackRock Group are permitted to receive trading commissions or soft dollar commissions, with respect to the Funds (or portion of a Fund) for which they provide investment management and advice, they may select brokers (including, without limitation, brokers who are affiliated with the BlackRock Group) that furnish the BlackRock Group, directly or through third-party or correspondent relationships, with research or execution services which provide, in BlackRock Group's view, lawful and appropriate assistance to each applicable BlackRock Group company in the investment decision-making or trade execution processes and the nature of which is that their provision can reasonably be expected to benefit the Fund as a whole and may contribute to an improvement in the Funds' performance. Such research or execution services may include, without limitation and to the extent permitted by applicable law: research reports on companies, industries and securities; economic and financial information and analysis; and quantitative analytical software. Research or execution services obtained in this manner may be used in servicing not only the account from which commissions were used to pay for the services, but also other BlackRock Group client accounts. For the avoidance of doubt, such goods and services do not include travel, accommodation, entertainment, general administrative goods and services, general office equipment, computer hardware or premises, membership fees, employee salaries or direct money payments. To the extent that BlackRock uses its clients' commission dollars to obtain research or execution services, BlackRock Group companies will not have to pay for those products and services themselves. BlackRock Group companies may receive research or execution services that are bundled with the trade execution, clearing and/or settlement services provided by a particular broker-dealer. To the extent that each BlackRock Group company receives research or execution services on this basis, many of the same potential conflicts related to receipt of these services through third party arrangements exist. For example, the research effectively will be paid by client commissions that also will be used to pay for the execution, clearing and settlement services provided by the broker-dealer and will not be paid by that BlackRock Group company.
- 19.4 Each BlackRock Group company may endeavour, subject to best execution, to execute trades through brokers who, pursuant to such arrangements, provide research or execution services in order to ensure the continued receipt of research or execution services that BlackRock Group company believes are useful in their investment decision-making or trade execution process.
- 19.5 Each BlackRock Group company may pay, or be deemed to have paid, commission rates higher than it could have otherwise paid in order to obtain research or execution services if that BlackRock Group company determines in good faith that the commission paid is reasonable in relation to the value of the research or execution services provided. BlackRock Group believes that using commission dollars to obtain the research or execution services enhances its investment research and trading processes, thereby increasing the prospect for higher investment returns.
- 19.6 BlackRock Group may from time to time choose to alter or choose not to engage in the above described arrangements to varying degrees, without notice to BlackRock Group clients, to the extent permitted by applicable law.

## **20 QUERIES AND COMPLAINTS**

- 20.1 Investors may contact the Singapore Representative at +65 6411 3000 to seek clarifications about the Company or the Funds.

## **21 OTHER MATERIAL INFORMATION**

21.1 Investors should refer to the Luxembourg Prospectus for other material information relating to the Funds.

## APPENDIX 1 – FEES, CHARGES AND EXPENSES

The fees, charges and expenses applicable to the Funds are set out in the tables below.

In respect of each Fund, the Initial Charge (payable by the Investor), Management Fee, Distribution Fee and Contingent Deferred Sales Charge (“CDSC”) (payable by the Investor where the Directors believe that excessive trading is being practised) are set out as follows. The Management Fee and Distribution Fee (payable to appointed distributors on a monthly basis)\* are incurred by the Company on behalf of the Fund and will affect the Net Asset Value of the Fund:

|                                      | Initial charge | Management Fee** | Distribution Fee | CDSC  |
|--------------------------------------|----------------|------------------|------------------|-------|
| <b>AI Innovation Fund</b>            |                |                  |                  |       |
| Class A                              | 5.00%          | 1.50%            | 0.00%            | 0.00% |

| The following fees and expenses will be incurred by the Company on behalf of the Fund and will affect the Net Asset Value of the Fund. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Depository Fee and other Fees                                                                                                          | <p>The Depository receives annual fees, based on the value of securities, which accrue daily, plus transaction fees. The annual custody safekeeping fees range from 0.001% to 0.45% per annum and the transaction fees range from US\$3 to US\$108 per transaction, all such fees to be subject to change without prior notice. The rates for both categories of fees will vary according to the country of investment and, in some cases, according to asset class.</p> <p>The Company also pays any professional costs relating to European Union withholding tax reclaims. Any commitment fees arising from borrowings or any costs relating to withholding tax reclaims will be allocated between the relevant Funds on a fair and equitable basis. Any costs relating to withholding tax reclaims outside of the EU (plus any taxes or interest thereon) will be paid by the Company and will be allocated between the relevant Funds on a fair and equitable basis. As the Company has had a good degree of success with its EU withholding tax reclaims (which are paid by the Company) to date, any costs associated with non-EU withholding tax reclaims will no longer be paid out of the Annual Service Charge and will now be paid by the Company and allocated between the relevant Funds on a fair and</p> |

These costs are normally allocated between the relevant Funds (plus any taxes thereon) on a fair and equitable basis at the Directors' discretion.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Annual Service Charge*  | <p>Currently up to 0.25% per annum.</p> <p>The level of Annual Service Charge may vary at the Directors' discretion, as agreed with the Management Company, and will apply at different rates across the various Funds and Share Classes issued by the Company. However, it has been agreed between the Directors and the Management Company that the Annual Service Charge currently paid shall not exceed 0.25% per annum. It is accrued daily, based on the Net Asset Value of the relevant Share Class and paid monthly.</p> <p>The Directors and the Management Company set the level of the Annual Service Charge at a rate which aims to ensure that the ongoing charges of each Fund remain competitive when compared across a broad market of similar investment products available to Shareholders in the Funds, taking into account a number of criteria such as the market sector of each Fund and the Fund's performance relative to its peer group.</p> <p>The Annual Service Charge is used by the Management Company to meet all fixed and variable operating and administrative costs and expenses incurred by the Company, with the exception of the Depositary fees, Distribution fees, Securities Lending fees, any fees arising from borrowings (including for the avoidance of doubt any commitment fee that may be due to the lender), any costs relating to (EU and non EU – see the section headed "Fees, Charges and Expenses - Other Fees" of the Luxembourg Prospectus) withholding tax reclaims (plus any taxes or interest thereon) and any taxes at an investment or Company level.</p> <p>These operating and administrative expenses include all third party expenses and other recoverable costs incurred by or on behalf of the Company from time to time, including but not limited to, fund accounting fees, transfer agency fees (including sub-transfer agency and associated platform dealing charges), all professional costs, such as consultancy, legal, tax advisory and audit fees, Directors' fees (for those Directors who are not employees of the BlackRock Group), travel expenses, reasonable out-of-pocket expenses, printing, publication, translation and all other costs relating to Shareholder reporting, regulatory filing and licence fees, correspondent and other banking charges, software support and maintenance, operational costs and expenses attributed to the Investor Servicing teams and other global administration services provided by various BlackRock Group companies.</p> <p>The Management Company bears the risk of ensuring that the Funds' ongoing charges remain competitive. Accordingly the Management Company is entitled to retain any amount of the Annual Service Charge paid to it which is in excess of the actual expenses incurred by the Company during any period whereas any costs and expenses incurred by the Company in any period which exceed the amount of Annual Service Charge that is paid to the Management Company, shall be borne by the Management Company or another BlackRock Group company.</p> |
| Securities Lending Fees | <p>The securities lending agent, BlackRock Advisors (UK) Limited, receives remuneration in relation to its activities. Such remuneration amounts to 37.5% of the gross revenue from the securities lending activities, with all direct and indirect costs borne out of BlackRock's share including any third party operational and administrative costs.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Research Fees                                    | <p>In accordance with new rules coming into force in January 2018 pursuant to EU Directive 2014/65/EU on markets in financial instruments referred to as “<b>MiFID II</b>”, BlackRock Group will no longer pay for external research via client trading commissions for its MiFID II-impacted funds.</p> <p>The BlackRock Group shall meet such research costs out of its own resources. MiFID II-impacted funds are those which have appointed a BlackRock Group MiFID firm as investment adviser or where investment management has been delegated by such firm to an overseas affiliate.</p> <p>Funds which have directly appointed an overseas affiliate of the BlackRock Group within a third country (i.e. outside the European Union) to perform portfolio management are not in-scope for the purposes of MiFID II and will be subject to the local laws and market practices governing external research in the applicable jurisdiction of the relevant affiliate. This means that costs of external research may continue to be met out of the assets of such funds. A list of such funds is available on request from the Management Company or can be found on the BlackRock website: <a href="https://www.blackrock.com/international/individual/en-zz/mifid/research/bgf">https://www.blackrock.com/international/individual/en-zz/mifid/research/bgf</a>.</p> <p>Where investments are made in non-BlackRock Group funds, they will continue to be subject to the external manager’s approach to paying for external research in each case. This approach may be different from that of the BlackRock Group and may include the collection of a research charge alongside trading commissions in accordance with applicable laws and market practice. This means that the costs of external research may continue to be met out of the assets within the fund.</p> |
| Fees of underlying collective investment schemes | <p>The investment by a Fund in other collective investment schemes may result in an increase in the expense ratio and/or ongoing charges of the Fund and may result in the Fund bearing a portion of the fees and charges of the underlying collective investment scheme(s), subject to the considerations set out below. As such fees and charges vary depending on the underlying collective investment scheme in which the Fund invests, it is not possible to provide full disclosure as to such fees and charges.</p> <ul style="list-style-type: none"> <li>• When a Fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same investment manager or by any other company with which the investment manager is linked by common management or control, or by a substantial direct or indirect holding, no subscription or redemption fees may be charged to the Company on its investment in the units of such other UCITS and/or UCIs.</li> <li>• Where a Fund invests a substantial proportion of its net assets in other UCITS and other UCIs, the Fund’s Investment Adviser will ensure that the total management fee (excluding any performance fee, if any) charged to such Fund (including management fees from other UCITS and UCIs in which it invests) shall not exceed 1.50% of the net asset value of the Fund.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

*\* Please note that, subject to the approval of the Directors, the combined Management Fee and Annual Service Charge for each Fund may be increased up to a maximum of 2.25% in total by giving Shareholders three months’ prior notice. In respect of the Emerging Europe Fund, the Annual Service Charge of the Fund has been waived by the Management Company with effect from 1 March 2022 until further notice. Further updates will be shared via the BlackRock website: [www.blackrock.com/sg](http://www.blackrock.com/sg).*

## APPENDIX 2 – PERFORMANCE OF THE FUNDS, EXPENSE RATIO AND TURNOVER RATIO

### Performance of the Funds

Past performance of Class A and Class D Shares of each Fund and its benchmark (as of 30 January 2026):

<sup>8</sup> Effective 26 October 2023, the benchmark changed from ICE BofAML Blended Index: ACCY, 20% Lvl4 Cap 3% Constrained Index to iBoxx ChinaBond Asian High Yield (USD Hedged) Index. The performance of the benchmark prior to 26 October 2023 is that of ICE BofAML Blended Index: ACCY, 20% Lvl4 Cap 3% Constrained Index. The benchmark changed to better reflect the Fund's investible universe.

<sup>9</sup> There is currently no benchmark for comparing performance of the Fund. The Investment Adviser is not bound by the components or weighting of any benchmark when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the benchmark in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the benchmark.

<sup>10</sup> Effective 16 December 2025, the MSCI ACWI Materials Index was introduced as another benchmark for the Fund to provide investors with an additional performance reference aligned with the Fund's market focus and asset allocation. The performance of the benchmark has not been provided for all corresponding years for which performance for the relevant Class is provided as the benchmark was only introduced on 16 December 2025 and the performance of the benchmark is only relevant from 16 December 2025 onwards.

<sup>11</sup> HSBC has exited the index business and transitioned its existing benchmarks to be managed by Markit iBoxx. In this connection, HSBC has ceased producing indices. Accordingly, with effect from 1 April 2016, the benchmark of the China Bond Fund was changed from the HSBC Offshore RMB Index to the Markit iBoxx ALBI China Offshore Index. With effect from 8 December 2017, the said benchmark was removed in order to reflect the revised investment universe of the Fund and change of risk measurement method, and the 1 Year China Household Savings Deposit Rate should be used by investors to compare the performance of the Fund.

<sup>12</sup> There is no benchmark for the investors to compare the performance of the Fund. The Investment Adviser has discretion to select the Fund's investments. The Fund has an unconstrained investment style.

<sup>13</sup> There is no benchmark for the investors to compare the performance of the Fund. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

<sup>14</sup> The Dynamic High Income Fund follows a flexible asset allocation policy that seeks to provide a high level of income. Hence, there is currently no suitable benchmark for investors to compare the performance of the Fund.

<sup>15</sup> Effective from and including 1 March 2022, as a result of the escalating conflict between Russia and the Ukraine, normal market trading conditions have been significantly impaired, which in view of the Management Company and the Directors constitutes an emergency as a result of which disposal and valuation of investments of the Emerging Europe Fund is impracticable, issues, redemptions and conversions of Shares in the Emerging Europe Fund were suspended. Accordingly, please note that the past performance figures since inception of the relevant Class and over the 1, 3, 5 and 10 year periods in respect of the Emerging Europe Fund are for the respective periods up until 28 February 2022.

<sup>16</sup> Effective 2 October 2006, the benchmark changed from the MSCI Emerging Europe (net) Index to the MSCI Emerging Markets Europe 10/40 Index. The performance of the benchmark prior to 2 October 2006 is that of the MSCI Emerging Europe (net) Index. The benchmark was changed because the MSCI Emerging Markets Europe 10/40 Index is a more suitable UCITS specific index.

<sup>21</sup> Prior to 6 May 2025, the Fund has no benchmark for investors to compare performance of the Fund. Effective 6 May 2025, the Bloomberg Euro Aggregate Bond Index was introduced as a benchmark for investors to compare performance of the Fund against Euro bonds. The performance of the benchmark has not been provided for all corresponding years for which performance for the relevant Class is provided as the benchmark was only introduced on 6 May 2025 and the performance of the benchmark is only relevant from 6 May 2025 onwards.

<sup>22</sup> Effective 16 September 2021, the benchmark changed from EUR 1 Week LIBID Index to Euro Short Term Rate (ESTR). The benchmark changed to reflect the requirement to change the benchmark from a London Interbank Offered Rate related rate to a replacement rate. The performance of the benchmark prior to 16 September 2021 is that of EUR 1 Week LIBID Index.

<sup>23</sup> There is no benchmark for the investors to compare the performance of the Fund. The Fund is actively managed across asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Adviser's discretion.

<sup>24</sup> Effective 14 February 2014, the benchmark changed from the MSCI Europe Growth Index to the MSCI Europe Index. The benchmark changed to reflect the repositioned strategy of the Fund. The performance of the benchmark prior to 14 February 2014 is that of the MSCI Europe Growth Index.

<sup>25</sup> Prior to 6 May 2025, the Fund has no benchmark for investors to compare performance of the Fund. Effective 6 May 2025, the Bloomberg Global Aggregate Bond Index (USD Hedged) was introduced as a benchmark for investors to compare performance of the Fund against global bonds. The performance of the benchmark has not been provided for all corresponding years for which performance for the relevant Class is provided as the benchmark was only introduced on 6 May 2025 and the performance of the benchmark is only relevant from 6 May 2025 onwards.

<sup>26</sup> Citi's fixed income indexes were rebranded and references to Citi had changed to FTSE with effect from 31 July 2018. Accordingly, the Citigroup Non-USD World Govt Bond Index component of the benchmark of Global Allocation Fund was changed to the FTSE Non-USD World Govt Bond Index.

<sup>30</sup> Citi's fixed income indexes were rebranded and references to Citi had changed to FTSE with effect from 31 July 2018. Accordingly, the Citigroup World Government Bond USD Hedged Index was changed to the FTSE World Government Bond USD Hedged Index.

<sup>31</sup> With effect from 8 December 2017, the benchmark of the Fund changed from Barclays World Government Inflation-Linked Bond Index to the Bloomberg Barclays World Government Inflation-Linked 1-20yr Index USD Hedged (now known as Bloomberg World Government Inflation-Linked 1-20yr Index USD Hedged). The benchmark changed in order to take advantage of the prevailing inflation rate environment and for better flexibility in achieving the investment objective of the Fund.

<sup>32</sup> There is currently no benchmark for comparing performance of the Fund. The Investment Adviser is not bound by the components or weighting of any benchmark when selecting investments.

<sup>33</sup> The India Fund was formed by merger of the Merrill Lynch Specialist Funds ("MLSF") India Fund (launched on 2 Feb 2005) into the Fund on 28 Apr 2006. Any performance data prior to 28 Apr 2006 relates to MLSF India Fund and not the Fund, which was launched on 28 Apr 2006. Performance data which is "since inception" relates to the inception date of the MLSF India Fund on 2 Feb 2005 and not that of the Fund. The investment objectives of the MLSF India Fund and the Fund are substantially the same, the MLSF India Fund and the Fund are managed by the same investment team (immediately prior to and after 28 April 2006) with similar investment policies and strategies.

<sup>34</sup> Effective 21 March 2013, the benchmark changed from S&P IFC Emerging Markets Investible India Index to MSCI India Index. The benchmark changed to enable investors to better compare the performance of the Fund with other India dedicated funds. The performance of the benchmark prior to 21 March 2013 is that of S&P IFC Emerging Markets Investible India Index. Effective 31 July 2020, the benchmark of the Fund changed from the MSCI India Index to MSCI India TR Net 10/40 Index. The benchmark changed to better reflect the Fund's investable universe and the diversification requirements of the UCITS rules. The performance of the benchmark between 21 March 2013 and 30 July 2020 (both dates inclusive) is that of MSCI India Index.

<sup>40</sup> The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The MSCI All Countries World Index should be used by investors to compare the performance of the Fund.

<sup>41</sup> Effective 23 February 2024, the benchmark changed from the S&P 500 (60%) and FTSE World (ex-US) (40%) Index to the MSCI All Countries World Index. The performance of the benchmark prior to 23 February 2024 is that of the S&P 500 (60%) and FTSE World (ex-US) (40%) Index. The benchmark changed to better reflect the Fund's investible universe.

<sup>42</sup> Effective 16 December 2025, the FTSE Developed Core Infrastructure 50/50 Net Tax Index was removed as a performance benchmark of the Fund as it was no longer reflective of the Fund's investment universe. There is currently no benchmark for comparing performance of the Fund. The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments.

<sup>44</sup> Effective 2 October 2006, the benchmark changed from the CSFB High Yield Bond Index to the Barclays Capital US High Yield 2% Constrained Index (now known as the "Bloomberg US High Yield 2% Constrained Index"). The performance of the benchmark prior to 2 October 2006 is that of the CSFB High Yield Bond Index. Following the merger of BlackRock and Merrill Lynch Investment Managers, the management of the Fund was transferred to the BlackRock team who had always managed their portfolios to the Barclays Capital US High Yield 2% Constrained Index (now known as the "Bloomberg US High Yield 2% Constrained Index").

<sup>46</sup> Effective 30 August 2022, the benchmark changed from S&P US Mid Small Cap Index to Russell MidCap Value Index. The benchmark changed as the investment objective and policy of the Fund was changed. The performance of the benchmark prior to 30 August 2022 is that of S&P US Mid Small Cap Index.

<sup>47</sup> Effective 4 December 2020, the performance benchmark of the World Energy Fund changed from MSCI World Energy 10/40 Net Total Return Index to MSCI World Energy 30% Buffer 10/40 Index. The rationale for the change is that the design of the new index means it has a lower likelihood of breaching the UCITS rules and better reflects the Fund's investable universe. The change described above will have no impact on the Fund's investment objective and policy, and no change to the Fund's existing risk limits. The performance of the benchmark prior to 4 December 2020 is that of the MSCI World Energy 10/40 Net Total Return Index.

<sup>48</sup> Effective 14 February 2014, the benchmark changed from the MSCI World Financials Index to the MSCI ACWI Financials Index. The rationale for this change is that the ACWI version of the index is more representative of the Fund's strategy. The performance of the benchmark prior to 14 February 2014 is that of the MSCI World Financials Index.

<sup>49</sup> Effective 18 August 2020, the benchmark changed from EMIX Global Mining Constrained Weights Index to MSCI ACWI Metals & Mining 30% Buffer 10/40 Index. The design of the new benchmark means it has a lower likelihood of breaching the UCITS rules, plus it includes a broader selection of companies from the Fund's investible universe. The performance of the benchmark prior to 18 August 2020 is that of the EMIX Global Mining Constrained Weights Index.

| MSCI AC World Information Technology 10/40 Index <sup>50</sup> | 31.27  | 32.48                                | 17.61   | 22.61    | 19.66                                 |

\* Performance calculations are on a single pricing basis, on the assumption that all dividends and distributions are reinvested net of all charges payable upon reinvestment, in Fund base currency, taking into account the maximum initial charge (where applicable) and any redemption charge. Investors should note that the performance figures relate to the Class A Non-Distributing Shares and Class D Non-Distributing Shares of a Fund in the base currency (unless otherwise specifically indicated next to the relevant Class above) of the Fund. Other Classes with different distribution features, hedging features and/or currencies may be made available in Singapore and the performance figures for these Classes may vary from the above performance figures and such performance is available on [www.blackrock.com/sq](http://www.blackrock.com/sq).

**Past performance of each Fund is not necessarily indicative of its future performance.**

---

<sup>50</sup> Effective 31 December 2009, the benchmark changed from MSCI World Information Technology (net) Index to the MSCI AC World Information Technology Index. The benchmark was changed to include both developed and emerging markets (which more accurately reflects what the Fund actually does). Effective 23 February 2024, the benchmark changed from the MSCI AC World Information Technology Index to the MSCI AC World Information Technology 10/40 Index. The benchmark was changed as the new benchmark reflects more accurately the investment universe of the Fund. The performance of the benchmark prior to 31 December 2009 is that of the MSCI World Information Technology (net) Index. The performance of the benchmark between 31 December 2009 and 22 February 2024 (both dates inclusive) is that of the MSCI AC World Information Technology Index.

## Expense Ratio and Turnover Ratio

The expense ratio\* and turnover ratio\*\* of each Fund for the year ended 31 August 2025, calculated based on figures in each Fund's latest audited accounts as at the date of registration of this Singapore Prospectus are:

| Sub-Fund                                   | Expense Ratio (%)<br>(In respect of Class A Shares) | Expense Ratio (%)<br>(In respect of Class D Shares)                                                                    | Turnover Ratio (%)<br>(In respect of the Fund) |

|------------------------------------------|--------------------------------------------------------|--------------------------------------------------------|------------------------------------------------|
| <b>World Real Estate Securities Fund</b> | 1.82                                                   | 1.07                                                   | 98.30                                          |
| <b>World Technology Fund</b>             | 1.81                                                   | 1.06                                                   | 83.64                                          |

Investors should note that the above expense ratios relate to the Class A Non-Distributing Shares and Class D Non-Distributing Shares of a Fund in the base currency (unless otherwise specifically indicated next to the relevant Class above) of the Fund. There are sub-classes with different distribution features, hedging features and/or currencies made available in Singapore within Class A and Class D of a Fund, and the expense ratios for these other sub-classes may vary from the expense ratios disclosed above.

*\* The expense ratios are calculated in accordance with the Investment Management Association of Singapore's (IMAS) guidelines for the disclosure of expense ratios and are based on the Sub-Funds' latest audited accounts as at the date of registration of this Singapore Prospectus. The following expenses, where applicable, are excluded from the calculation of the expense ratio:*

- (a) brokerage and other transaction costs;*
- (b) interest expenses;*
- (c) foreign exchange gains and losses;*
- (d) front or back-end loads arising from the purchase or sale of other funds;*
- (e) tax deducted at source or arising from income received; and*
- (f) dividends and other distributions paid to Shareholders.*

*Expense ratios for any classes launched during the applicable financial period to which the expense ratios relate have been annualised.*

*\*\* The turnover ratio is calculated based on the lesser of purchases or sales of underlying investments of a Fund expressed as a percentage over daily average net asset value, over the same period used for calculating the expense ratio.*

## Introduction to BlackRock Global Funds

### Structure

BlackRock Global Funds (the "Company") is a public limited company (société anonyme) established under the laws of the Grand Duchy of Luxembourg as an open-ended variable capital investment company (société d'investissement à capital variable). The Company has been established on 14 June 1962 and its registration number in the Registry of the Luxembourg Trade and Companies Register is B 6317. The Company has been authorised by the Commission de Surveillance du Secteur Financier (the "CSSF") as an undertaking for collective investments in transferable securities pursuant to the provisions of Part I of the law of 17 December 2010, as amended from time to time and, for some of its Funds pursuant to the provisions of the MMF Regulations and is regulated pursuant to such law and regulations, respectively. Authorisation by the CSSF is not an endorsement or guarantee of the Company by the CSSF nor is the CSSF responsible for the contents of this Prospectus. The authorisation of the Company shall not constitute a warranty as to performance of the Company and the CSSF shall not be liable for the performance or default of the Company.

The articles of association governing the Company (the "Articles") have been deposited with the Luxembourg Trade and Companies Register. The Articles have been amended and restated several times, most recently on 4 February 2019 and published in the

Recueil Electronique des Sociétés et Associations ("RESA"), on 25 February 2019.

The Company is an umbrella structure comprising separate compartments with segregated liability. Each compartment shall have segregated liability from the other compartments and the Company shall not be liable as a whole to third parties for the liabilities of each compartment. Each compartment shall be made up of a separate portfolio of investments maintained and invested in accordance with the investment objectives applicable to such compartment, as specified herein. The Directors are offering separate classes of Shares, each representing interests in a compartment, on the basis of the information contained in this Prospectus and in the documents referred to herein which are deemed to be an integral part of this Prospectus.

### Management

The Company is managed by BlackRock (Luxembourg) S.A., a public limited company (société anonyme) established in 1988 under registration number B 27689. The Management Company has been authorised by the CSSF to manage the business and affairs of the Company pursuant to chapter 15 of the 2010 Law.

**A list of Dealing Currencies, Hedged Share Classes, Distributing and Non-Distributing Share Classes and UK Reporting Fund status Classes is available from the Company's registered office and the local Investor Servicing team.**

\* Fund not available for subscription at the date of this Prospectus. Such Funds may be launched at the Directors' discretion. Confirmation of the launch date of these Funds will then be made available from the local Investor Servicing team. Any provisions in this Prospectus relating to any one of these Funds shall only take effect from the launch date of the relevant Fund.

## IMPORTANT NOTICE

**If you are in any doubt about the contents of this Prospectus or whether an investment in the Company is suitable for you, you should consult your stockbroker, solicitor, accountant, relationship manager or other professional adviser.**

The Directors of the Company, whose names appear in the section "Board of Directors", and the directors of the Management Company are the persons responsible for the information contained in this Prospectus. To the best knowledge and belief of the Directors and the directors of the Management Company (who have taken all reasonable care to ensure that such is the case), the information contained herein is accurate in all material respects and does not omit anything likely to affect the accuracy of such information. The Directors and the directors of the Management Company accept responsibility accordingly.

This Prospectus has been prepared solely for, and is being furnished to investors for the purpose of evaluating an investment in Shares in the Funds. Investment in the Funds is only suitable for investors seeking long-term capital appreciation (save for the Reserve Funds which may not be appropriate for investors who seek long-term capital appreciation) who understand the risks involved in investing in the Company, including the risk of loss of all capital invested.

**In considering an investment in the Company, investors should also take account of the following:**

- ▶ **certain information contained in this Prospectus, the documents referred to herein and any brochures issued by the Company as substitute offering documents constitutes forward-looking statements, which can be identified by the use of forward-looking terminology such as "seek", "may", "should", "expect", "anticipate", "estimate", "intend", "continue", "target" or "believe" or the negatives thereof or other variations thereof or comparable terminology and includes projected or targeted returns on investments to be made by the Company. Such forward-looking statements are inherently subject to significant economic, market and other risks and uncertainties and accordingly actual events or results or the actual performance of the Company may differ materially from those reflected or contemplated in such forward-looking statements; and**
- ▶ **nothing in this Prospectus should be taken as legal, tax, regulatory, financial, accounting or investment advice.**

**An application / decision to subscribe for Shares should be made on the basis of the information contained in this Prospectus which is issued by the Company and in the most recent annual and (if later) interim report and accounts of the Company which are available at the registered office of the Company. Information updating this Prospectus may, if appropriate, appear in the report and accounts.**

This Prospectus, and the KID for the relevant Share Class, should each be read in their entirety before making an application for Shares. KIDs for each available Share Class can be found at: <http://kiid.blackrock.com>

Statements made in this Prospectus are based on laws and practices in force at the date hereof and are subject to changes therein. Neither the delivery of this Prospectus nor the issue of Shares will, in any circumstances, imply that there has been no change in the circumstances affecting any of the matters contained in this Prospectus since the date hereof.

**This Prospectus may be translated into other languages provided that any such translation shall be a direct translation of the English text. In the event of any inconsistency or ambiguity in relation to the meaning of any word or phrase in any translation, the English text shall prevail, except to the extent (and only to the extent) that the laws of a jurisdiction require that the legal relationship between the Company and investors in such jurisdiction shall be governed by the local language version of this Prospectus.**

**Any Shareholder in the Company will only be able to fully exercise its Shareholder rights directly against the Company, and in particular the right to participate in general meetings of Shareholders, where such Shareholder is registered in its own name in the register of Shareholders for the Company. In cases where an investor (a "Beneficial Shareholder") invests in the Company through an intermediary (whereby the intermediary holds the Shares in its own name but on behalf of the Beneficial Shareholder), (i) it may not always be possible for such Beneficial Shareholder to exercise certain of its shareholder rights in the Company and (ii) Beneficial Shareholder's right to be compensated in case of Net Asset Value calculation errors, non-compliance with investment rules and/or other errors as set out in Circular CSSF 24/856 of 28 March 2024 may be affected. Beneficial Shareholders are therefore advised to seek legal advice in respect of the above.**

### Distribution

This Prospectus does not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. Details of certain countries in which the Company is currently authorised to offer Shares are contained in Appendix D. Prospective investors for Shares should inform themselves as to the legal requirements of applying for Shares and of applicable exchange control regulations and taxes in the countries of their respective citizenship, residence or domicile. US Persons are not permitted to subscribe for Shares. The Funds are not registered for distribution in India. In some countries investors may be able to subscribe for Shares through regular savings plans. Under Luxembourg law, the fees and commissions relating to regular savings plans during the first year must not exceed one third of the amount contributed by the investor. These fees and commissions do not include premiums to be paid by the investor where the regular savings plan is offered as part of a life insurance or whole life insurance product. Please contact the local Investor Servicing team for more details.

## **Glossary**

### **2010 Law**

means the Luxembourg law of 17 December 2010 on undertakings for collective investment, as amended, modified or supplemented from time to time.

### **2013 Law**

means the Luxembourg law of 12 July 2013 on alternative investment fund managers, as amended, modified or supplemented from time to time.

### **Base Currency**

means in relation to Shares of any Fund, the currency indicated in the section "Choice of Funds".

### **BlackRock EMEA Baseline Screens Policy**

means the limits and/or exclusions applied by the Investment Advisers on relevant Funds (where referenced in their investment objectives and policies) available at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>

### **BlackRock Group**

means the BlackRock group of companies, the ultimate holding company of which is BlackRock, Inc.

### **Bond Connect**

means the initiative launched in July 2017 for mutual bond market access between Hong Kong and Mainland China as described in the section entitled "China Interbank Bond Market" in the "Investment Objectives and Policies" section of this Prospectus.

### **BRL**

means Brazilian Real, the lawful currency of Brazil.

### **Business Day**

means, for all Funds except Shari'ah Funds, any day normally treated by the banks in Luxembourg as a business day (except for Christmas Eve) and such other days as the Directors may decide. For Shari'ah Funds, Business Day means, Monday, Tuesday, Wednesday and Thursday, unless this day is not a day normally treated by the banks in Luxembourg, Saudi Arabia and in countries of the Gulf Cooperation Council (the "GCC") as a business day (except for Christmas Eve) and any other days as the Directors may decide.

The Management Company may also take into account whether relevant local exchanges are open for Funds that invest a substantial amount in assets outside the Eurozone, and/or whether relevant currency exchange vendors are open for Funds that have substantial exposure to a currency other than their respective Base Currency, and may elect to treat such closures as non-business days. Information regarding closures of local exchanges or currency exchange vendors treated by the Management Company as non-business days will be available before such a non-business day and can be obtained from the registered office of the Company and from the local Investor Servicing team.

### **CDSC**

means a contingent deferred sales charge as set out in the section "Contingent Deferred Sales Charge".

### **China A-Shares**

means securities of companies that are incorporated in the PRC and denominated and traded in Renminbi on the SSE and SZSE.

### **China Interbank Bond Market**

means the Mainland China interbank bond markets of the PRC.

### **ChinaClear**

means China Securities Depository and Clearing Corporation Limited which is the PRC's central securities depository in respect of China A-Shares.

### **CIBM Funds**

Asian High Yield Bond Fund, Asian Multi-Asset Income Fund, Asian Tiger Bond Fund, China Bond Fund, China Multi-Asset Fund, China Onshore Bond Fund, Dynamic High Income Fund, Emerging Markets Bond Fund, Emerging Markets Corporate Bond Advanced Fund, Emerging Markets Corporate Bond Fund, Emerging Markets Impact Bond Fund, Emerging Markets Local Currency Bond Fund, ESG Emerging Markets Blended Bond Fund, ESG Emerging Markets Bond Fund, ESG Emerging Markets Local Currency Bond Fund, ESG Multi-Asset Fund, Fixed Income Global Opportunities Fund, Global Allocation Fund, Global Bond Income Fund, Global Corporate Bond Fund, Global Government Bond Fund, Global Multi-Asset Income Fund, Sustainable Global Allocation Fund, US Dollar Bond Fund, US Dollar Short Duration Bond Fund, and World Bond Fund.

### **CIS**

means Collective Investment Scheme.

### **CMA**

means the Capital Market Authority of the Kingdom of Saudi Arabia

### **CSRC**

means the China Securities Regulatory Commission of the PRC or its successors which is the regulator of the securities and futures market of the PRC.

### **Dealing Currency**

means the currency or currencies in which applicants may currently subscribe for the Shares of any Fund. Dealing Currencies may be introduced at the Directors' discretion. Confirmation of the Dealing Currencies and the date of their availability can be obtained from the registered office of the Company and from the local Investor Servicing team.

### **Dealing Day**

means any Business Day other than any day declared as a non-dealing day by the Directors as further described in the section "Non-Dealing Days" and any day falling within a period of suspension of subscriptions, redemptions and conversions and/or such other day determined by the Directors to be a day when a Fund is open for dealing.

### **Directors**

means the members of the board of directors of the Company for the time being and any successors to such members as may be appointed from time to time.

### **Distributing Funds and Distributing Shares**

means a Fund or a Share Class for which dividends may be declared, at the Directors' discretion. Distributing Shares may also

be treated as UK Reporting Fund status Shares. Confirmation of the Funds, Share Classes and Currencies on which dividends may be declared and Share Classes which are UK Reporting Fund status Shares (please see below for more details) is available from the registered office of the Company and from the local Investor Servicing team.

#### **Dividend Threshold Amount**

means such minimum dividend yield set on an annual basis for the period 1 January each year to 31 December each year and which will be paid to investors as determined by the Directors in respect of the Distributing (Y) Shares. The Dividend Threshold Amount is available from the local Investor Servicing Team. In certain circumstances, as determined by the Directors, the Dividend Threshold Amount may need to be reduced during the year. Shareholders will be notified of this, where possible, in advance.

#### **Equity Income Funds**

means the Emerging Markets Equity Income Fund, European Equity Income Fund and Global Equity Income Fund.

#### **ESG**

Refers to “environmental, social and governance” criteria, which are three central factors used in measuring the sustainability and ethical impact of an investment in securities of an issuer. By way of example, “environmental” may cover themes such as climate risks and natural resources scarcity, “social” may include labour issues and product liability risks such as data security and “governance” may encompass items such as business ethics and executive pay. These are only examples and do not necessarily determine the policy of any specific ESG Fund. Investors should refer to the investment policy of an ESG Fund, including any website referred to in such investment policy, for more detailed information.

#### **ESG Fund**

means a Fund which uses ESG criteria as part of its investment strategy.

#### **ESG Provider**

means a provider of ESG research, reports, screening, ratings and/or analysis including, without limitation, third party index providers, ESG consultancies or members of the BlackRock Group.

#### **Euro**

means the single European currency unit (referred to in Council Regulation (EC) No. 974/98 of 3 May 1998 on the introduction of the Euro) and, at the Investment Adviser's discretion, the currencies of any countries that have previously formed part of the Eurozone. As at the date of this Prospectus the countries that make up the Eurozone are: Austria, Belgium, Croatia, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia and Spain.

#### **Europe or European**

means all European countries including the UK, Eastern Europe and former Soviet Union countries.

#### **EU Climate Transition Benchmark Exclusions**

means the exclusions applying to administrators of EU Climate Transition Benchmarks set out in article 12(1)(a) to (c) of Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 as amended, modified or supplemented from time to time.

#### **EU Paris-Aligned Benchmark Exclusions**

means the exclusions applying to administrators of Paris Aligned Benchmarks set out in article 12(1)(a) to (g) of Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020, as amended, modified or supplemented from time to time.

#### **Fatwa**

means a scholarly opinion or verdict issued by the Shari'ah Panel incorporating a Shari'ah ruling on an actual or potential, including hypothetical when agreed, action or fact with respect to a Shari'ah Fund.

#### **Foreign Access Regime**

means the regime for foreign institutional investors to invest in the China Interbank Bond Market as described in the section entitled “China Interbank Bond Market” in the “Investment Objectives and Policies” section of this Prospectus.

#### **Fund**

means a segregated compartment established and maintained by the Company in respect of one or more Share Classes to which assets, liabilities, income and expenditure attributable to each such Class or Share Classes will be applied or charged, as further described in this Prospectus.

#### **GCC**

means the Gulf Cooperation Council, being a regional organization composed of the Kingdom of Saudi Arabia, Oman, Kuwait, Bahrain, the United Arab Emirates and Qatar.

#### **Global Industry Classification Standard**

means an industry taxonomy developed by MSCI and Standard & Poor's for use by the global financial community.

#### **Hedged Share Classes**

means those Share Classes to which a currency hedging strategy is applied. Hedged Share Classes may be made available in Funds and currencies at the Directors' discretion. Confirmation of the Funds and currencies in which the Hedged Share Classes are available can be obtained from the registered office of the Company and from the local Investor Servicing team.

#### **HKEX**

means Hong Kong Exchanges and Clearing Limited.

#### **HKSCC**

means Hong Kong Securities Clearing Company Limited which operates a securities market and a derivatives market in Hong Kong and the clearing houses for those markets.

#### **Institutional Investor**

means an institutional investor within the meaning of the 2010 Law which satisfies the eligibility and suitability requirements of institutional investors. Please see the section headed “Restrictions on Holding of Shares”.

#### **Internal Credit Quality Assessment Procedure**

Means, in relation to the Reserve Funds, the procedure required by the MMF Regulations and followed by the Investment Adviser when assessing the credit quality of investments.

**International Capital Markets Association Green Bond principles**

are voluntary process guidelines issued by the International Capital Markets Association, which seek to support issuers in financing environmentally sound and sustainable projects that foster a net-zero emissions economy and protect the environment.

**Interest Rate Differential**

means the difference in interest rates between two similar interest-bearing assets.

**Investment Adviser(s)**

means the investment adviser(s) appointed by the Management Company from time to time in respect of the management of the assets of the Funds as described under "Investment Management of the Funds".

**Investor Servicing**

means the dealing provisions and other investor servicing functions by local BlackRock Group companies or branches or their administrators.

**KSA**

means the Kingdom of Saudi Arabia.

**KSA Sub-custodian**

means the delegate of the Depositary in charge of the safekeeping of the assets in the KSA as listed in the Appendix F – List of Depositary Delegates.

**KID**

means the key information document, as applicable, issued in respect of each Share Class pursuant to the 2010 Law.

**Management Company**

means BlackRock (Luxembourg) S.A., a Luxembourg société anonyme authorised as a management company under the 2010 Law.

**MMF**

means a money market fund as defined in the MMF Regulations. A "VNAV MMF" means a variable net asset value money market fund as defined in the MMF Regulations.

**MMF Regulations**

means Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017 on money market funds ("MMF") and any delegated regulation published pursuant to it.

**Net Asset Value**

means in relation to a Fund or a Share Class, the amount determined in accordance with the provisions described in paragraphs 12. to 17. of Appendix B. The Net Asset Value (or "NAV") of a Fund may be adjusted in accordance with paragraph 17.3 of Appendix B.

**Non-Distributing Shares**

means Non-Distributing Shares / Non-Distributing Share Classes are Share Classes that do not pay dividends.

**OTC derivatives**

means over-the-counter derivative instruments.

**Paris Agreement**

means the agreement adopted under the United Nations Framework Convention on Climate Change on 12 December 2015 and approved by the European Union on 5 October 2016 with the aim of holding the increase in the global average temperature to well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels.

**Principal Adverse Impacts (PAIs)**

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**PBOC**

means the People's Bank of China in the PRC.

**PRC or Mainland China**

means the People's Republic of China.

**Principal Distributor**

means BlackRock Investment Management (UK) Limited acting in its capacity as Principal Distributor. References to distributors may include BlackRock Investment Management (UK) Limited in its capacity as Principal Distributor.

**Prospectus**

means this offering memorandum, as amended, modified or supplemented from time to time.

**QFI**

means qualified foreign investors (including, if applicable, Qualified Foreign Institutional Investors ("QFII") and Renminbi Qualified Foreign Institutional Investors ("RQFII")) approved pursuant to the relevant PRC regulations (as amended from time to time).

**QFI Access Funds**

Asia High Yield Bond Fund, Asian Dragon Fund, Asian Growth Leaders Fund, Asian Multi-Asset Income Fund, Asian Tiger Bond Fund, China Bond Fund, China Fund, China Onshore Bond Fund, Emerging Markets Local Currency Bond Fund, Multi-Theme Equity Fund, Systematic China A-Share Opportunities Fund and Systematic China Environmental Tech Fund.

**QFI Custodian**

means HSBC Bank (China) Company Limited or such other person appointed as a sub-custodian of the relevant Fund for China A-Shares and/or China onshore bonds acquired through the QFI regime.

**QFI Licence**

means the licence awarded by the CSRC to entities based in certain jurisdictions outside of the PRC, enabling such entities to invest in eligible PRC securities via the QFI regime.

**QFI Licence Holder**

means the holder of a QFI Licence.

**Remuneration Policy**

means the policy as described in the section entitled "Management" including, but not limited to, a description as to how remuneration and benefits are calculated and identification of those individuals responsible for awarding remuneration and benefits.

**Reserve Funds**

means the Euro Reserve Fund and the US Dollar Reserve Fund. The Euro Reserve Fund and the US Dollar Reserve Fund are “Short-Term Variable Net Asset Value Money Market Funds” (Short-term MMFs) in accordance with the MMF Regulations. The investment objectives of the Euro Reserve Fund and the US Dollar Reserve Fund are intended to comply with this classification.

**RMB or Renminbi**

means Renminbi, the lawful currency of the PRC.

**Rules for Foreign Investment in Securities**

means the rules issued by the Board of the CMA pursuant to its Resolution Number 2-26-2023 Dated 5/9/1444H corresponding to 27/3/2023G based on the Capital Market Law issued by Royal Decree No. M/30 dated 2/6/1424H.

**SAFE**

means the State Administration of Foreign Exchange of the PRC.

**Saudi Qualified Foreign Investors**

means a foreign investor that is qualified, in accordance with the provisions of the Rules for Foreign Investment in Securities, to invest in shares listed on the Saudi Stock Exchange (Tadawul).

**SEHK**

means the Stock Exchange of Hong Kong.

**Share**

means a share of any Class representing a participation in the capital of the Company, and carrying rights attributable to a relevant Share Class, as further described in this Prospectus.

**Share Class**

means any class of Shares attributable to a particular Fund, and carrying rights to participate in the assets and liabilities of such Fund as further described in section “Classes and Form of Shares”.

**Shareholder**

means an owner of Shares.

**SFC**

means the Securities and Futures Commission in Hong Kong.

**SFDR**

means Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector, as may be amended, modified or supplemented from time to time.

**Shari’ah**

means the rules, principles and parameters of Islamic law as interpreted by the Shari’ah Panel with respect to a Shari’ah Fund.

**Shari’ah Funds**

means the Systematic Islamic Saudi Arabia Equity Fund and the Systematic Islamic GCC Equity Fund.

**Shari’ah Panel**

means a panel of Islamic scholars appointed by the Investment Adviser and provided by a Shari’ah advisory firm, Amanie Advisors, in respect of the Fund and any person appointed to sit on

the panel from time to time to provide advice and guidance relating to the Fund’s compliance with Shari’ah investment and accounting principles and render Fatwas based on Shari’ah.

**SICAV**

means an investment company with variable capital (*société d’investissement à capital variable*).

**Sovereign Sukuk**

means Sukuk securities issued or guaranteed by governments or government-related entities.

**Stock Connect**

means each of the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect, and collectively the “**Stock Connects**”.

**Stock Connect Funds**

Al Innovation Fund, Asian Dragon Fund, Asian Growth Leaders Fund, Asian Multi-Asset Income Fund, Asian Sustainable Equity Fund, Brown To Green Materials Fund, China Fund, China Innovation Fund, China Multi-Asset Fund, Circular Economy Fund, Climate Transition Multi-Asset Fund, Dynamic High Income Fund, Emerging Markets Fund, Emerging Markets Equity Income Fund, Emerging Markets Sustainable Equity Fund, FinTech Fund, ESG Multi-Asset Fund, Future Of Transport Fund, Global Allocation Fund, Global Equity Income Fund, Global Multi-Asset Income Fund, Global Long-Horizon Equity Fund, Multi-Theme Equity Fund, Natural Resources Fund, Next Generation Health Care Fund, Next Generation Technology Fund, Sustainable Energy Fund, Sustainable Global Allocation Fund, Sustainable Global Dynamic Equity Fund, Sustainable Global Infrastructure Fund, Systematic China A-Share Opportunities Fund, Systematic Global Equity High Income Fund, Systematic Global SmallCap Fund, Systematic China Environmental Tech Fund, Systematic Global Income & Growth Fund, World Energy Fund, World Financials Fund, World Gold Fund, World Healthscience Fund, World Mining Fund, World Real Estate Securities Fund, and World Technology Fund.

**SSE**

means the Shanghai Stock Exchange.

**Sukuk**

means investment certificates commercially similar to fixed income securities, that provide evidence of an investment/funding into an underlying asset or a project which is typically an income generating project or asset.

**Sustainable Investment**

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**SZSE**

means the Shenzhen Stock Exchange.

**Taxonomy Regulation**

means Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088.

**UCITS**

means an undertaking for collective investment in transferable securities.

**UCITS Directive**

means Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS), as amended.

**UK Reporting Funds**

means the Statutory Instrument 2009 / 3001 that the UK Government enacted in November 2009 (The Offshore Funds (Tax) Regulations 2009) which provides for a framework for the taxation of investments in offshore funds which operates by reference to whether a Fund opts into a reporting regime ("UK Reporting Funds") or not ("Non-UK Reporting Funds"). Under the UK Reporting Funds regime, investors in UK Reporting Funds are subject to tax on the share of the UK Reporting Fund's income attributable to their holding in the Fund, whether or not distributed, but any gains on disposal of their holding are subject to capital gains tax. The UK Reporting Funds regime has applied to the Company since 1 September 2010.

A list of the Funds which currently have UK Reporting Fund status is available at <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

**UN Sustainable Development Goals (UN SDG)**

The UN SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education and economic growth, and a reduction in inequalities, all whilst tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: <https://sdgs.un.org/goals>.

## Investment Management of the Funds

### Management

The Directors are responsible for the overall investment policy of the Company.

The Management Company has been appointed by the Company to act as its management company. The Management Company is authorised to act as a fund management company in accordance with Chapter 15 of the 2010 Law.

The Company has signed a management company agreement with the Management Company. Under this agreement, the Management Company is entrusted with the day-to-day management of the Company, with responsibility for performing directly or by way of delegation all operational functions relating to the Company's investment management, administration and the marketing of the Funds.

In agreement with the Company, the Management Company has decided to delegate several of its functions as is further described in this Prospectus.

The Management Company is also authorised to act as an Alternative Investment Fund Manager in accordance with Article 5 of the 2013 Law.

The directors of the Management Company are:

#### Chairman

Jonathan Griffin

#### Directors

Svetlana Butvina  
Joanne Fitzgerald  
Richard Gardner  
Michael Renner  
Leon Schwab  
Benjamin Gregson

Svetlana Butvina, Joanne Fitzgerald, Richard Gardner, Benjamin Gregson, and Leon Schwab are employees of the BlackRock Group (of which the Management Company, Investment Advisers and Principal Distributor are part).

The Management Company is a wholly owned subsidiary within the BlackRock Group. It is regulated by the CSSF.

The remuneration policy of the Management Company sets out the policies and practices that are consistent with and promote sound and effective risk management. It does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Company and does not impair compliance with the Management Company's duty to act in the best interest of shareholders. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company and the UCITS funds that it manages and of the investors in such UCITS funds, and includes measures to avoid conflicts of interest. It includes a description as to how remuneration and benefits are calculated and identifies those individuals responsible for awarding remuneration and benefits. With regard to the internal organisation of the Management Company, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the UCITS funds managed by the Management

Company in order to ensure that the assessment process is based on longer-term performance of the Company and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period. The Remuneration Policy includes fixed and variable components of salaries and discretionary pension benefits that are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component. The Remuneration Policy applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profile of the Management Company. The details of the up-to-date Remuneration Policy, including but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee where such a committee exists, are available on the individual Fund pages at [www.blackrock.com](http://www.blackrock.com) (select the relevant Fund in the "Product" section and then select "All Documents") and [www.blackrock.com/remunerationpolicy](http://www.blackrock.com/remunerationpolicy) and a paper copy will be made available free of charge upon request from the registered office of the Management Company.

### Investment Advisers and Sub-Investment Advisers

The Management Company has delegated its investment management functions to the Investment Advisers. The Investment Advisers provide advice and management in the areas of stock and sector selection and strategic allocation. Notwithstanding the appointment of the Investment Advisers, the Management Company accepts full responsibility to the Company for all investment transactions. References to an Investment Adviser in this Prospectus may refer to one or more of the below Investment Advisers.

BlackRock Investment Management (UK) Limited is a principal operating subsidiary of the BlackRock Group outside the US. It is regulated by the Financial Conduct Authority ("FCA") but the Company will not be a customer of BlackRock Investment Management (UK) Limited for the purposes of the FCA rules and will accordingly not directly benefit from the protection of those rules.

BlackRock Investment Management (UK) Limited also acts as the Investment Adviser to the Subsidiary.

BlackRock Investment Management (UK) Limited has sub-delegated some of its functions to BlackRock Japan Co., Ltd., BlackRock Investment Management (Australia) Limited, BlackRock Asset Management North Asia Limited ("BAMNA"), and BlackRock Saudi Arabia Company.

BlackRock (Singapore) Limited is regulated by the Monetary Authority of Singapore.

BlackRock Financial Management, Inc. and BlackRock Investment Management, LLC are regulated by the Securities and Exchange Commission.

The investment sub-advisers are also licensed and/or regulated (as applicable). BlackRock Japan Co., Ltd is regulated by the

Japanese Financial Services Agency. BlackRock Investment Management (Australia) Limited is licensed by the Australian Securities and Investments Commission as an Australian Financial Services Licence holder. BAMNA is regulated by the SFC. BlackRock Saudi Arabia Company is regulated by the Capital Market Authority.

The Investment Advisers and their sub-investment advisers are indirect operating subsidiaries of BlackRock, Inc., the ultimate holding company of the BlackRock Group. The Investment Advisers and their sub-investment advisers form part of the BlackRock Group.

## Risk Considerations

**All investments risk the loss of capital. An investment in the Shares involves considerations and risk factors which investors should consider before subscribing. In addition, there will be occasions when the BlackRock Group may encounter potential conflicts of interest in connection with the Company. See section “Conflicts of interest from relationships within the BlackRock Group”.**

**Investors should review this Prospectus carefully and in its entirety and are invited to consult with their professional advisers before making an application for Shares. An investment in the Shares should form only a part of a complete investment programme and an investor must be able to bear the loss of its entire investment. Investors should carefully consider whether an investment in the Shares is suitable for them in light of their circumstances and financial resources. In addition, investors should consult their own tax advisers regarding the potential tax consequences of the activities and investments of the Company and/or each Fund. Below is a summary of risk factors that apply to all Funds which in particular, in addition to the matters set out elsewhere in this Prospectus, should be carefully evaluated before making an investment in the Shares. Not all risks apply to all Funds. The risks that, in the opinion of the Directors and the Management Company, could have significant impact on the overall risk of the relevant Fund are detailed in the table in the section “Specific Risk Considerations”.**

**Only those risks which are believed to be material and are currently known to the Directors have been disclosed. Additional risks and uncertainties not currently known to the Directors, or that the Directors deem to be immaterial, may also have an adverse effect on the business of the Company and/or the Funds.**

### General Risks

The performance of each Fund will depend on the performance of the underlying investments. No guarantee or representation is made that any Fund or any investment will achieve its respective investment objectives. Past results are not necessarily indicative of future results. The value of the Shares may fall due to any of the risk factors below as well as rise and an investor may not recoup its investment. Income from the Shares may fluctuate in money terms. Changes in exchange rates may, among other factors, cause the value of Shares to increase or decrease. The levels and bases of, and reliefs from, taxation may change. There can be no assurance that the collective performance of a Fund's underlying investments will be profitable. Also, there is no guarantee of the repayment of principal. On establishment, a Fund will normally have no operating history upon which investors may base an evaluation of performance.

The Funds are exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Management Company seeks to reduce these operational risks through controls and procedures and, through its monitoring and oversight of providers of services for the Funds, and also seeks to ensure that such service providers take appropriate precautions to avoid and mitigate risks that could lead to disruptions and operating errors. However, it is not possible for the Management Company and

other service providers to identify and address all of the operational risks that may affect a Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

A Fund's operations (including investment management, distribution, collateral management, administration, and currency hedging) are carried out by several service providers which are selected based on a rigorous due diligence process.

Nevertheless, the Management Company and other service providers to the Funds may experience disruptions or operating errors such as processing errors or human errors, inadequate or failed internal or external processes, or systems or technology failures, provision or receipt of erroneous or incomplete data, resulting in operational risk which may have a negative effect on the Fund's operations and may expose the Fund to a risk of loss. This can manifest itself in various ways, including business interruption, poor performance, information systems malfunctions or failures, provision or receipt of erroneous or incomplete data or loss of data, regulatory or contractual breaches, human error, negligent execution, employee misconduct, fraud or other criminal acts. Investors could experience delays (for example, delays in the processing of subscriptions, switching and redemption of Shares) or other disruptions.

While the Management Company seeks to minimize operational errors as set out above, there may still be failures that could cause losses to a Fund and reduce the value of the Fund.

### Financial Markets, Counterparties and Service Providers

The Funds may be exposed to finance sector companies that act as a service provider or as a counterparty for financial contracts. In times of extreme market volatility, such companies may be adversely affected, with a consequent adverse effect on the return of the Funds.

Regulators and self-regulatory organisations and exchanges are authorised to take extraordinary actions in the event of market emergencies. The effect of any future regulatory action on the Company could be substantial and adverse.

### Tax Considerations

The Company may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Where the Company invests in securities that are not subject to withholding or other taxes at the time of acquisition, there can be no assurance that tax may not be imposed in the future as a result of any change in applicable laws, treaties, rules or regulations or the interpretation thereof. The Company may not be able to recover such tax and so any such change could have an adverse effect on the Net Asset Value of the Shares.

The tax information provided in the “Taxation” section is based, to the best knowledge of the Directors, upon tax law and practice as at the date of this Prospectus. Tax legislation, the tax status of the Company, the taxation of Shareholders and any tax reliefs, and the consequences of such tax status and tax reliefs, may change from time to time. Any change in the taxation legislation in any jurisdiction where a Fund is registered, marketed or invested could affect the tax status of the Fund, affect the value of the Fund's investments in the affected jurisdiction and affect the Fund's ability to achieve its investment objective and/or alter the post-tax returns to Shareholders. Where a Fund invests in derivatives, the preceding sentence may also extend to the jurisdiction of the

governing law of the derivative contract and/or the derivative counterparty and/or to the market(s) comprising the underlying exposure(s) of the derivative.

The availability and value of any tax reliefs available to Shareholders depend on the individual circumstances of Shareholders. The information in the "Taxation" section is not exhaustive and does not constitute legal or tax advice. Investors are urged to consult their tax advisors with respect to their particular tax situations and the tax effects of an investment in the Company.

Where a Fund invests in a jurisdiction where the tax regime is not fully developed or is not sufficiently certain, for example India and jurisdictions in the Middle East, the relevant Fund, the Management Company, the Investment Advisers and the Depositary shall not be liable to account to any Shareholder for any payment made or suffered by the Company in good faith to a fiscal authority for taxes or other charges of the Company or the relevant Fund notwithstanding that it is later found that such payments need not or ought not have been made or suffered. Conversely, where through fundamental uncertainty as to the tax liability, adherence to best or common market practice (to the extent that there is no established best practice) that is subsequently challenged or the lack of a developed mechanism for practical and timely payment of taxes, the relevant Fund pays taxes relating to previous years, any related interest or late filing penalties will likewise be chargeable to the Fund. Such late paid taxes will normally be debited to the Fund at the point the decision to accrue the liability in the Fund accounts is made.

Investors should note that certain Share Classes may pay dividends gross of expenses. This may result in Shareholders receiving a higher dividend than they would have otherwise received and therefore Shareholders may suffer a higher income tax liability as a result. In addition, in some circumstances, paying dividends gross of expenses may mean that the Fund pays dividends from capital property as opposed to income property. This is also the case where dividends may include Interest Rate Differentials arising from Share Class currency hedging. Such dividends may still be considered income distributions in the hands of Shareholders, depending on the local tax legislation in place, and therefore Shareholders may be subject to tax on the dividend at their marginal income tax rate. Shareholders should seek their own professional tax advice in this regard.

The tax laws and regulations in the PRC may be expected to change and develop as the PRC's economy changes and develops. Consequently, there may be less authoritative guidance to assist in planning and less uniform application of the tax laws and regulations in comparison to more developed markets. In addition, any new tax laws and regulations and any new interpretations may be applied retroactively. The application and enforcement of PRC tax rules could have a significant adverse effect on the Company and its Shareholders, particularly in relation to capital gains withholding tax imposed upon non-residents. The Company does not currently intend to make any accounting provisions for these tax uncertainties.

**Investors should also read the information set out in the section headed "FATCA and other cross-border reporting systems", particularly in relation to the consequences of the Company being unable to comply with the terms of such reporting systems.**

### **Share Class Contagion**

It is the Directors' intention that all gains/losses or expenses arising in respect of a particular Share Class are borne separately by that Share Class. Given that there is no segregation of liabilities between Share Classes, there is a risk that, under certain circumstances, transactions in relation to one Share Class could result in liabilities which might affect the Net Asset Value of the other Share Classes of the same Fund.

### **Currency Risk – Base Currency**

The Funds may invest in assets denominated in a currency other than the Base Currency of the Funds. Changes in exchange rates between the Base Currency and the currency in which the assets are denominated and changes in exchange rate controls will cause the value of the asset expressed in the Base Currency to fall or rise. The Funds may utilise techniques and instruments including derivatives for hedging purposes to control currency risk. However, it may not be possible or practical to completely mitigate currency risk in respect of a Fund's portfolio or specific assets within the portfolio. Furthermore, unless otherwise stated in the investment policies of the relevant fund, the Investment Adviser is not obliged to seek to reduce currency risk within the Funds.

### **Currency Risk – Share Class Currency**

Certain Share Classes of certain Funds may be denominated in a currency other than the Base Currency of the relevant Fund. In addition, the Funds may invest in assets denominated in currencies other than the Base Currency. Therefore changes in exchange rates and changes in foreign exchange rate controls may affect the value of an investment in the Funds.

### **Currency Risk – Investor's Own Currency**

An investor may choose to invest in a Share Class which is denominated in a currency that is different from the currency in which the majority of the investor's assets and liabilities are denominated (the "Investor's Currency"). In this scenario, the investor is subject to currency risk in the form of potential capital losses resulting from movements of the exchange rate between the Investor's Currency and the currency of the Share Class in which such investor invests, in addition to the other currency risks described herein and the other risks associated with an investment in the relevant Fund.

### **Hedged Share Classes**

While a Fund or its authorised agent may attempt to hedge currency risks, there can be no guarantee that it will be successful in doing so and it may result in mismatches between the currency position of that Fund and the Hedged Share Class.

The hedging strategies may be entered into whether the Base Currency is declining or increasing in value relative to the relevant currency of the Hedged Share Class and so, where such hedging is undertaken it may substantially protect Shareholders in the relevant Class against a decrease in the value of the Base Currency relative to the Hedged Share Class currency, but it may also preclude Shareholders from benefiting from an increase in the value of the Base Currency.

Hedged Share Classes in non-major currencies may be affected by the fact that capacity of the relevant currency market may be limited, which could further affect the volatility of the Hedged Share Class.

The Funds may also use hedging strategies which seek to provide exposure to certain currencies (i.e. where a currency is subject to currency trading restrictions). These hedging strategies involve converting the Net Asset Value of the relevant Share Class into the relevant currency using financial derivative instruments (including currency forwards).

All gains/losses or expenses arising from hedging transactions are borne separately by the Shareholders of the respective Hedged Share Classes. Given that there is no segregation of liabilities between Share Classes, there is a risk that, under certain circumstances, currency hedging transactions in relation to one Share Class could result in liabilities which might affect the Net Asset Value of the other Share Classes of the same Fund.

### **Global Financial Market Crisis and Governmental Intervention**

Since 2007, global financial markets have undergone pervasive and fundamental disruption and suffered significant instability which has led to governmental intervention. Regulators in many jurisdictions have implemented or proposed a number of emergency regulatory measures. Government and regulatory interventions have sometimes been unclear in scope and application, resulting in confusion and uncertainty which in itself has been detrimental to the efficient functioning of financial markets. It is impossible to predict what additional interim or permanent governmental restrictions may be imposed on the markets and/or the effect of such restrictions on the Investment Adviser's ability to implement a Fund's investment objective.

Whether current undertakings by governing bodies of various jurisdictions or any future undertakings will help stabilise the financial markets is unknown. The Investment Advisers cannot predict how long the financial markets will continue to be affected by these events and cannot predict the effects of these – or similar events in the future – on a Fund, the European or global economy and the global securities markets. The Investment Advisers are monitoring the situation. Instability in the global financial markets or government intervention may increase the volatility of the Funds and hence the risk of loss to the value of your investment.

### **Impact of Natural or Man-Made Disasters and Disease Epidemics**

Certain regions are at risk of being affected by natural disasters or catastrophic natural events. Considering that the development of infrastructure, disaster management planning agencies, disaster response and relief sources, organized public funding for natural emergencies, and natural disaster early warning technology may be immature and unbalanced in certain countries, the natural disaster toll on an individual portfolio company or the broader local economic market may be significant. Prolonged periods may pass before essential communications, electricity and other power sources are restored and operations of the portfolio company can be resumed. The Fund's investments could also be at risk in the event of such a disaster. The magnitude of future economic repercussions of natural disasters may also be unknown, may delay the Fund's ability to invest in certain companies, and may ultimately prevent any such investment entirely.

Investments may also be negatively affected by man-made disasters. Publicity of man-made disasters may have a significant negative impact on overall consumer confidence, which in turn may materially and adversely affect the performance of the Fund's investments, whether or not such investments are involved in such man-made disaster.

Outbreaks of infectious diseases may also have a negative impact on the performance of the Funds. For example, an infectious respiratory disease caused by a novel coronavirus known as COVID-19 detected in December 2019 gave rise to a global pandemic. This pandemic adversely affected the economies of many nations globally, negatively affecting the performance of individual companies and capital markets. Future epidemics and pandemics could have similar effects, and the extent of their impact cannot be foreseen at the present time. Moreover, the impact of infectious diseases in certain developing or emerging market countries may be more severe due to less established health care systems, as was evident with COVID-19. Health crises caused by infectious diseases can exacerbate existing political, social, and economic risks in these countries leading to prolonged recovery periods and greater investment risks in these regions. The long-term effects of such outbreaks may include increased volatility as investors react to uncertainty and rapidly changing conditions and potential losses in the value of investments.

Governments and regulatory bodies may implement new policies and regulations in response to health crises, which can impact various industries and investment strategies. These responses can include fiscal stimulus, changes in healthcare policies, and adjustments to trade and travel regulations.

### **Recent Market Events**

Periods of market volatility may occur in response to various local and/or global political, social and economic events. These conditions have resulted in, and in many cases continue to result in, greater price volatility, less liquidity, widening credit spreads and a lack of price transparency, with many securities remaining illiquid and of uncertain value. Such market conditions may adversely affect the Funds, including by making valuation of some of a Fund's securities uncertain and/or result in sudden and significant valuation increases or declines in the Fund's holdings. If there is a significant decline in the value of a Fund's portfolio, this may impact the asset coverage levels for any outstanding leverage the Fund may have.

Risks resulting from any future debt or other economic crisis could also have a detrimental impact on the global economic recovery, the financial condition of financial institutions and a Fund's business, financial condition and results of operation. Market and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, personal bankruptcy rates, levels of incurrence and default on consumer debt and home prices, among other factors. To the extent uncertainty regarding the U.S. or global economy negatively impacts consumer confidence and consumer credit factors, a Fund's business, financial condition and results of operations could be significantly and adversely affected. Downgrades to the credit ratings of major banks could result in increased borrowing costs for such banks and negatively affect the broader economy. Moreover, Federal Reserve policy, including with respect to certain interest rates, may also adversely affect the value, volatility and liquidity of dividend- and interest-paying securities. Market volatility, rising interest rates and/or unfavourable economic conditions could impair a Fund's ability to achieve its investment objective(s).

### **Derivatives**

#### **(a) General**

In accordance with the investment limits and restrictions set out in Appendix A and in the section headed "Investment Objectives and

Policies”, each of the Funds may use derivatives for investment purposes and for the purposes of efficient portfolio management and to hedge market, interest rate and currency risk.

The use of derivatives may expose Funds to a higher degree of risk. These risks may include credit risk with regard to counterparties with whom the Funds trade, the risk of settlement default, volatility risk, over-the-counter transaction risk, lack of liquidity of the derivatives, imperfect tracking between the change in value of the derivative, and the change in value of the underlying asset that the relevant Fund is seeking to track and greater transaction costs than investing in the underlying assets directly. Some derivatives are leveraged and therefore may magnify or otherwise increase investment losses to the Funds.

In accordance with standard industry practice when purchasing derivatives, a Fund may be required to secure its obligations to its counterparty. For non-fully funded derivatives, this may involve the placing of initial and/or variation margin assets with the counterparty. For derivatives which require a Fund to place initial margin assets with a counterparty, such assets may not be segregated from the counterparty’s own assets and, being freely exchangeable and replaceable, the Fund may have a right to the return of equivalent assets rather than the original margin assets deposited with the counterparty. These deposits or assets may exceed the value of the relevant Fund’s obligations to the counterparty in the event that the counterparty requires excess margin or collateral. In addition, as the terms of a derivative may provide for one counterparty to provide collateral to the other counterparty to cover the variation margin exposure arising under the derivative only if a minimum transfer amount is triggered, the Fund may have an uncollateralised risk exposure to a counterparty under a derivative up to such minimum transfer amount.

Derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Fund volatility. Whilst the Funds will not borrow money to leverage they may for example take synthetic short positions through derivatives to adjust their exposure, always within the restrictions provided for in Appendix A of this Prospectus. Certain Funds may enter into long positions executed using derivatives (synthetic long positions) such as futures positions including currency forwards.

Additional risks associated with investing in derivatives may include a counterparty breaching its obligations to provide collateral, or due to operational issues (such as time gaps between the calculation of risk exposure to a counterparty’s provision of additional collateral or substitutions of collateral or the sale of collateral in the event of a default by a counterparty), there may be instances where a Fund’s credit exposure to its counterparty under a derivative contract is not fully collateralised but each Fund will continue to observe the limits set out in Appendix A. The use of derivatives may also expose a Fund to legal risk, which is the risk of loss resulting from changing laws or from the unexpected application of a law or regulation, or because a court declares a contract not legally enforceable. Where derivative instruments are used in this manner the overall risk profile of the Fund may be increased. Accordingly the Company will employ a risk-management process which enables the Management Company to monitor and measure at any time the risk of the positions and

their contribution to the overall risk profile of the Fund. The Management Company uses one of two methodologies to calculate each Fund’s global exposure, the “Commitment Approach” or the “Value at Risk” or “VaR” approach, in both cases ensuring each Fund complies with the investment restrictions set out in Appendix A. The methodology used for each Fund will be determined by the Management Company based on the investment strategy of the relevant Fund. Details about the methodologies used for each Fund are set out in the section entitled “Investment Objectives and Policies”.

For more detail regarding the derivative strategies applied by individual Funds please refer to the individual Fund investment objectives in the section headed “Investment Objectives and Policies” below and the latest risk management programme which is available on request from the local Investor Servicing team.

#### (b) Specific

The Funds may use derivatives for investment purposes or for the purpose of efficient portfolio management in accordance with their respective investment objective and policies. In particular this may involve (on a non-exhaustive basis):

- ▶ using swap contracts to adjust interest rate risk;
- ▶ using currency derivatives to buy or sell currency risk;
- ▶ writing covered call options;
- ▶ using credit default swaps to buy or sell credit risk;
- ▶ using volatility derivatives to adjust volatility risk;
- ▶ buying and selling options;
- ▶ using swap contracts to gain exposure to one or more indices;
- ▶ using synthetic short positions to take advantage of any negative investment views; and
- ▶ using synthetic long positions to gain market exposure.

Investors should note the associated risks with the following types of derivative instruments and strategies as described below:

#### Credit Default Swaps, Interest Rate Swaps, Currency Swaps, Total Return Swaps, and Swaptions

The use of credit default swaps may carry a higher risk than investing in bonds directly. A credit default swap allows the transfer of default risk. This allows investors to effectively buy insurance on a bond they hold (hedging the investment) or buy protection on a bond they do not physically own where the investment view is that the stream of coupon payments required will be less than the payments received due to the decline in credit quality. Conversely, where the investment view is that the payments due to decline in credit quality will be less than the coupon payments, protection will be sold by means of entering into a credit default swap. Accordingly, one party, the protection buyer, makes a stream of payments to the seller of protection, and a payment is due to the buyer in the event that there is a “credit event” (a decline in credit quality, which will be pre-defined in the agreement). If the credit event does not occur the buyer pays all the required premiums and

the swap terminates on maturity with no further payments. The risk of the buyer is therefore limited to the value of the premiums paid.

The market for credit default swaps may sometimes be more illiquid than bond markets. A Fund entering into credit default swaps must at all times be able to meet the redemption requests. Credit default swaps are valued on a regular basis according to verifiable and transparent valuation methods reviewed by the Company's auditor.

Interest rate swaps involve an exchange with another party of respective commitments to pay or receive interest, such as an exchange of fixed rate payments for floating rate payments. Currency swaps may involve the exchange of rights to make or receive payments in specified currencies. Total return swaps involve the exchange of the right to receive the total return, coupons plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments. The Funds may enter into swaps as either the payer or receiver of payments under such swaps.

Where a Fund enters into interest rate or total return swaps on a net basis, the two payment streams are netted out, with each party receiving or paying, as the case may be, only the net amount of the two payments. Interest rate or total return swaps entered into on a net basis do not involve the physical delivery of investments, other underlying assets or principal. Accordingly, it is intended that the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that a Fund is contractually obliged to make (or in the case of total return swaps, the net amount of the difference between the total rate of return of a reference investment, index or basket of investments and the fixed or floating payments). If the other party to an interest rate or total return swap defaults, in normal circumstances each Fund's risk of loss consists of the net amount of interest or total return payments that each party is contractually entitled to receive. In contrast, currency swaps usually involve the delivery of the entire principal value of one designated currency in exchange for the other designated currency. Therefore, the entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations.

Certain Funds may also buy or sell interest rate swaption contracts. These give the purchaser the right, but not the obligation to enter into an interest rate swap at a pre-set interest rate within a specified period of time. The interest rate swaption buyer pays a premium to the seller for this right. A receiver interest rate swaption gives the purchaser the right to receive fixed payments in return for paying a floating rate of interest. A payer interest rate swaption would give the purchaser the right to pay a fixed rate of interest in return for receiving a floating rate payment stream.

**The use of credit default swaps, interest rate swaps, currency swaps, total return swaps, and interest rate swaptions is a specialised activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If the Investment Adviser is incorrect in its forecasts of market values, interest rates and currency exchange rates, the investment performance of the Fund would be less favourable than it would have been if these investment techniques were not used.**

## Volatility Derivatives

"Historic Volatility" of a security is a statistical measure of the speed and magnitude of changes in the price of that security over defined periods of time. "Implied Volatility" is the market's expectation of future realised volatility. Volatility derivatives are derivatives whose price depends on Historic Volatility or Implied Volatility or both. Volatility derivatives are based on an underlying security, and Funds may use volatility derivatives to increase or reduce volatility risk, in order to express an investment view on the change in volatility, based on an assessment of expected developments in underlying securities markets. For example, if a significant change in the market background is expected, it is likely that the volatility of the price of a security will increase as prices adapt to the new circumstances.

The Funds may only buy or sell volatility derivatives which are based on an index where:

- ▶ the composition of the index is sufficiently diversified;
- ▶ the index represents an adequate benchmark for the market to which it refers; and
- ▶ it is published in an appropriate manner.

The price of volatility derivatives may be highly volatile, and may move in a different way to the other assets of the Fund, which could have a significant effect on the Net Asset Value of a Fund's Shares.

## Currency Overlay Strategies

In addition to the use of techniques and instruments to control currency risk (see 'Currency Risk'), certain Funds may invest in currencies or utilise techniques and instruments in relation to currencies other than the Base Currency with the aim of generating positive returns. The Investment Adviser utilises specialist currency overlay strategies which involves the creation of long positions and synthetic pair trades in currencies to implement tactical views through the use of currency derivatives, including forward foreign exchange contracts, currency futures, options, swaps and other instruments providing exposure to changes in exchange rates. The movement in currency exchange rates can be volatile and where funds engage substantially in such strategies, there will be a significant impact on the overall performance of the funds. These Funds have the flexibility to invest in any currency in the world including emerging market currencies which may be less liquid and currencies that may be affected by the actions of governments and central banks including intervention, capital controls, currency peg mechanisms or other measures.

## Option Strategies

An option is the right (but not the obligation) to buy or sell a particular asset or index at a stated price at some date in the future. In exchange for the rights conferred by the option, the option buyer has to pay the option seller a premium for carrying on the risk that comes with the obligation. The option premium depends on the strike price, volatility of the underlying asset, as well as the time remaining to expiration. Options may be listed or dealt in OTC.

A Fund may enter into option transactions as either the buyer or seller of this right and may combine them to form a particular trading strategy as well as use options for reducing an existing risk.

If the Investment Adviser or its delegate is incorrect in its expectation of changes in the market prices or determination of the correlation between the particular assets or indices on which the options are written or purchased and the assets in a Fund's investment portfolio, that Fund may incur losses that it would not otherwise incur.

#### Transfer of Collateral

In order to use derivatives, the Funds will enter into arrangements with counterparties which may require the payment of collateral or margin out of a Fund's assets to act as cover to any exposure by the counterparty to the Fund. If the title of any such collateral or margin is transferred to the counterparty, it becomes an asset of such counterparty and may be used by the counterparty as part of its business. Collateral so transferred will not be held in custody by the Depositary for safekeeping, but collateral positions will be overseen and reconciled by the Depositary. Where the collateral is pledged by the Fund to the benefit of the relevant counterparty, then such counterparty may not rehypothecate the assets pledged to it as collateral without the Fund's consent.

#### **Securities Lending**

The Funds may enter into securities lending transactions for the purposes of efficient portfolio management subject to the conditions and limits in accordance with the requirements of the CSSF. The Funds engaging in securities lending will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund. The Company intends to ensure that all securities lending is fully collateralised but, to the extent that any securities lending is not fully collateralised (for example due to timing issues arising from payment lags), the Funds will have a credit risk exposure to the counterparties to the securities lending contracts.

#### **Risks Relating to Repurchase Agreements**

In the event of the failure of the counterparty with which collateral has been placed, the Funds may suffer loss as there may be delays in recovering collateral placed out or the cash originally received may be less than the collateral placed with the counterparty due to inaccurate pricing of the collateral or market movements.

#### **Risks Relating to Reverse Repurchase Agreements**

In the event of the failure of the counterparty with which cash has been placed, the Funds may suffer loss as there may be delay in recovering cash placed out or difficulty in realising collateral or proceeds from the sale of the collateral may be less than the cash placed with the counterparty due to inaccurate pricing of the collateral or market movements.

#### **Counterparty Risk**

A Fund will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the relevant Fund. This would include the counterparties to

any derivatives, repurchase / reverse repurchase agreement or securities lending agreement that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The relevant Fund mitigates much of its credit risk to its derivative counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Fund maintains an active oversight of counterparty exposure and the collateral management process.

#### **Counterparty Risk to the Depositary**

The assets of the Company are entrusted to the Depositary for safekeeping, as set out in further detail in paragraph 11. of Appendix C. In accordance with the UCITS Directive, in safekeeping the assets of the Company, the Depositary shall: (a) hold in custody all financial instruments that may be registered in a financial instruments account opened in the Depositary's books and all financial instruments that can be physically delivered to the Depositary; and (b) for other assets, verify the ownership of such assets and maintain a record accordingly. The assets of the Company should be identified in the Depositary's books as belonging to the Company.

Securities held by the Depositary should be segregated from other securities / assets of the Depositary in accordance with applicable law and regulation which mitigates but does not exclude the risk of non-restitution in the case of bankruptcy of the Depositary. Shareholders are therefore exposed to the risk of the Depositary not being able to fully meet its obligation to reconstitute all of the assets of the Company in the case of bankruptcy of the Depositary. In addition, a Fund's cash held with the Depositary may not be segregated from the Depositary's own cash / cash under custody for other clients of the Depositary, and a Fund may therefore rank as an unsecured creditor in relation thereto in the case of bankruptcy of the Depositary.

The Depositary may not keep all the assets of the Company itself but may use a network of sub-custodians which are not always part of the same group of companies as the Depositary. Shareholders may be exposed to the risk of bankruptcy of the sub-custodians in circumstances where the Depositary may have no liability.

A Fund may invest in markets where custodial and/or settlement systems are not fully developed. The assets of the Fund that are traded in such markets and which have been entrusted to such sub-custodians may be exposed to risk in circumstances where the Depositary may have no liability.

#### **Fund Liability Risk**

The Company is structured as an umbrella fund with segregated liability between its Funds. As a matter of Luxembourg law, the assets of one Fund will not be available to meet the liabilities of another. However, the Company is a single legal entity that may operate or have assets held on its behalf or be subject to claims in other jurisdictions that may not necessarily recognise such segregation of liability. As at the date of this Prospectus, the Directors are not aware of any such existing or contingent liability.

## Market Leverage

The Funds will not use borrowing to purchase additional investments but may be expected, via derivative positions, to obtain market leverage (gross market exposure, aggregating both long and synthetic short positions, in excess of net asset value). The Investment Adviser will seek to make absolute returns from relative value decisions between markets ("this market will do better than that market"), as well as from directional views on the absolute return of markets ("this market is going to go up or down"). The extent of market leverage is likely to depend on the degree of correlation between positions. The higher the degree of correlation, the greater is the likelihood and probable extent of market leverage.

## Repurchase and Reverse Repurchase Agreements

Under a repurchase agreement a Fund sells a security to a counterparty and simultaneously agrees to repurchase the security back from the counterparty at an agreed price and date. The difference between the sale price and the repurchase price establishes the cost of the transaction. The resale price generally exceeds the purchase price by an amount which reflects an agreed-upon market interest rate for the term of the agreement. In a reverse repurchase agreement a Fund purchases an investment from a counterparty which undertakes to repurchase the security at an agreed resale price on an agreed future date. The Fund therefore bears the risk that if the seller defaults the Fund might suffer a loss to the extent that proceeds from the sale of the underlying securities together with any other collateral held by the Fund in connection with the relevant agreement may be less than the repurchase price because of market movements. A Fund cannot sell the securities which are the subject of a reverse repurchase agreement until the term of the agreement has expired or the counterparty has exercised its right to repurchase the securities.

## MiFID II

Laws and regulations introduced by Member States of the EU to implement the EU's second Markets in Financial Instruments Directive ("MiFID II") and the EU's Markets in Financial Instruments Regulation ("MiFIR"), which came into force on 3 January 2018 and imposed new regulatory obligations and costs on the Management Company and the Investment Advisers.

The impact of MiFID II on the EU financial markets and on EU investment firms which offer financial services to clients is significant.

In particular, MiFID II and MiFIR introduced new rules regarding the execution of certain standardised OTC derivatives on regulated trading venues.

In addition, MiFID II introduced wider transparency regimes in respect of trading on EU trading venues and with EU counterparties. Under MiFID II, pre- and post-trade transparency regimes are extended from equities traded on a regulated market to also cover equity-like instruments (such as Depositary Receipts, Exchange-Traded Funds and certificates that are traded on regulated trading venues) and non-equities such as bonds, structured finance products, emission allowances and derivatives. The increased transparency regime under MiFID II, together with the restrictions on the use of "dark pools" and other trading venues, may mean greater disclosure of information relating to price discovery becoming available and may have an adverse impact on trading costs.

## Cybersecurity Risk

A Fund or any of the service providers, including the Management Company and the Investment Advisers, may be subject to risks resulting from cybersecurity incidents and/or technological malfunctions. A cybersecurity incident is an event that may cause a loss of proprietary information, data corruption or a loss of operational capacity. Cybersecurity incidents can result from deliberate cyber attacks or unintentional events. Cyber attacks include, but are not limited to, gaining unauthorised access to digital systems (e.g. through hacking or malicious software coding) for the purposes of misappropriating assets or sensitive information, corrupting data, releasing confidential information without authorisation or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorised access, such as causing denial-of-service attacks on websites, which may make network services unavailable to intended users. The issuers of securities and counterparties to other financial instruments in which a Fund invests may also be subject to cybersecurity incidents.

Cybersecurity incidents may cause a Fund to suffer financial losses, interfere with a Fund's ability to calculate its net asset value, impede trading, disrupt the ability of investors to subscribe for, exchange or redeem their units, violate privacy and other laws and incur regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Cyber-attacks may render records of assets and transactions of a Fund, unitholder ownership of units, and other data integral to the functioning of a Fund inaccessible, inaccurate or incomplete. In addition, substantial costs may be incurred in order to prevent any cybersecurity incidents in the future which may adversely impact a Fund.

While the Management Company and the Investment Advisers have established business continuity plans and risk management strategies to seek to prevent cybersecurity incidents, there are inherent limitations in such plans and strategies, including the possibility that certain risks have not been identified given the evolving nature of the threat of cyber-attacks.

Furthermore, none of the Funds, the Management Company or the Investment Advisers can control the business continuity plans or cybersecurity strategies put in place by other service providers to a Fund or issuers of securities and counterparties to other financial instruments in which a Fund invests. Technological malfunctions may occur from factors such as processing errors, human errors, inadequate or failed internal or external processes, failure in systems and technology, changes in personnel, infiltration by unauthorised persons and errors cause by services providers. Whilst the Management Company and the Investment Advisers seek to minimise such events through controls and oversight, there may still be failures that could cause losses to the Funds.

The Investment Advisers rely on its third-party service providers for many of their day-to-day operations and will be subject to the risk that the protections and policies implemented by those service providers will be ineffective to protect the Investment Advisers or a Fund from cyber-attack.

## Tax Risk

The Company (or its representative) may file claims on behalf of the Funds to recover withholding tax on dividend and interest income (if any) received from issuers in certain countries where such withholding tax reclaim is possible. Whether or when a Fund

will receive a withholding tax refund in the future is within the control of the tax authorities in such countries. Where the Company expects to recover withholding tax for a Fund based on a continuous assessment of probability of recovery, the Net Asset Value of that Fund generally includes accruals for such tax refunds. The Company continues to evaluate tax developments for potential impact to the probability of recovery for such Funds. If the likelihood of receiving refunds materially decreases, for example due to a change in tax regulation or approach, accruals in the relevant Fund's net asset value for such refunds may need to be written down partially or in full, which will adversely affect that Fund's Net Asset Value. Shareholders in that Fund at the time an accrual is written down will bear the impact of any resulting reduction in Net Asset Value regardless of whether they were Shareholders during the accrual period. Conversely, if the Fund receives a tax refund that has not been previously accrued, Shareholders in the Fund at the time the claim is successful will benefit from any resulting increase in the Fund's Net Asset Value. Shareholders who sold their Shares prior to such time will not benefit from such net asset value increase.

### Sustainability Risk

BlackRock defines sustainability risk as an investment risk (probability or uncertainty of occurrence of material losses relative to the expected return of an investment) that arises from environmental, social and/or governance issues. In this assessment, BlackRock focuses on the investment risks that are financially material to the fund. The definition of sustainability risks is not intended to capture the risk that a Fund with sustainable characteristics or objectives fails to meet its sustainable commitments.

As with other investment risks and opportunities, the financial materiality of sustainability risks may vary by issuer, sector, product, mandate, and time horizon. See the BlackRock SFDR Sustainability Risk Statement for further information at <https://www.blackrock.com/corporate/literature/continuous-disclosure-and-important-information/sfdr-sustainability-risk-statement.pdf>.

The outcome of the sustainability risk assessment outlined below is an assessment at the Fund level with no reference to the benchmark or active objective of the Fund. This is designed to give clients an indication of the total level of sustainability risk they may be exposed to when investing in a particular Fund. It is not intended to represent how sustainability risk is managed within our investment processes, as risk is managed within the objective of the Fund and typically assessed relative to the benchmark of the Fund. Like other investment risks, the ability to manage sustainability risk depends on the Fund chosen. If a client chooses a product with limited investment discretion - such as an index replicating portfolio - the ability to manage or control the sustainability risk present in the Fund will be constrained.

Whilst the impact of sustainability risks may differ from fund to fund, as noted in the Risk Factors above, all Funds may be subject to some aspects of sustainability risk, given sustainability risk may manifest itself through existing other risk types (including, but not limited to, market, liquidity, concentration, credit, asset-liability mismatches etc.).

Sustainability risk may be reflected in two ways: 1) a Fund's potential exposure to a sustainability risk event and 2) the potential financial impact to a Fund's performance should such a sustainability risk event or factor occur. In assessing the potential

impact of sustainability risk, these aspects are considered against the fund characteristics as listed below. Exposure and impact are assessed across a 5-year (or less) time horizon as aligned with the investment horizon of the majority of BlackRock funds.

- ▶ **Fund Geographical Focus:** The geographic location of underlying investments may impact the extent to which a Fund is exposed to and impacted by a sustainability risk event or factor. Certain conditions in a geographic location such as the local climate, regulatory environment, economic diversification or level of infrastructure may impact the extent to which a Fund is exposed to either the physical impacts of climate change, the risks related to the transition to a lower carbon economy or social and governance risks.
- ▶ **Fund liquidity:** funds with lower liquidity may be less able to exit positions impacted by sustainability risks and are therefore both more exposed to sustainability risk events and more likely to be financially impacted by a sustainability risk event if it occurs.
- ▶ **Fund Sector Allocation:** Certain sectors are likely to be more exposed to the impacts of sustainability risks. As a result, issuers in such sectors may require significant business model transformation or face decreased demand for their goods or services. These effects could be positive or negative depending on company positioning for the future, current economic activities and ability to manage change. Funds with higher allocation to such sectors, for example, the energy sector, are expected to have higher exposure to sustainability-related risks and also expect a higher impact on financial performance should a sustainability risk event occur. Funds that have lower exposure to these sections are expected to have a lower exposure to sustainability-related risks and are expected to experience a lower impact on financial performance should a sustainability risk event occur.
- ▶ **Product design:** Funds with explicit aims to consider environmental or social characteristics, or with explicit sustainability objectives, adopt investment strategies which drive greater exposure to sustainability related themes and therefore have a higher exposure to sustainability risk event. As these Funds have greater exposure to sustainability related themes, they can expect a higher financial performance impact should a sustainability risk event occur.

BlackRock classifies each of the above factors and aggregates the factor assessments to a fund-by-fund overall classification of material or not material. As at the date of this prospectus, the following Funds have been classified as falling into the "material" category from a sustainability risk perspective:

Circular Economy Fund, Future of Transport Fund, Sustainable Energy Fund, Sustainable Global Infrastructure Fund, World Real Estate Securities Fund.

### ESG Labels

Certain Funds may have been awarded an ESG label for their engagement with socially responsible investment. ESG labels are contractual frameworks and compliance with their governance and investment requirements may not always align with the regulatory obligations applicable to the Fund.

Auditors verify periodically that funds comply with the label criteria. Auditors may decide not to renew a label awarded previously. Label criteria may evolve over time, sometimes significantly, and a Fund may not be in a position to maintain the label without changing its investment policy. As a result, a Fund may withdraw from the label. Investors are invited to refer to the website of the ESG label for the most up to date list of Funds holding the label.

#### **Other Risks**

The Funds may be exposed to risks that are outside of their control – for example legal risks from investments in countries with unclear and changing laws or the lack of established or effective avenues for legal redress; the risk of terrorist actions; the risk that economic and diplomatic sanctions may be in place or imposed on certain states and military action may be commenced. The impact of such

events is unclear, but could have a material effect on general economic conditions and market liquidity.

Regulators and self-regulatory organisations and exchanges are authorised to take extraordinary actions in the event of market emergencies. The effect of any future regulatory action on the Company could be substantial and adverse.

#### **Specific Risk Considerations**

**In addition to the general risks, as set out above, that should be considered for all Funds, there are other risks that investors should also bear in mind when considering investment into specific Funds. The tables below show which specific risk warnings apply to each of the Funds.**

## Specific Risk Considerations

| No. FUND                                           | Risk of Capital Erosion | Fixed Income | Distressed Securities | Delayed Delivery Transactions | Small Cap | Equity risk | ABS/ MBS / ABCPs | Portfolio Concentration Risk | Contingent Convertible Bonds | ESG Investment Policy Risk | Model Risk |
|----------------------------------------------------|-------------------------|--------------|-----------------------|-------------------------------|-----------|-------------|------------------|------------------------------|------------------------------|----------------------------|------------|
| 1. AI Innovation Fund                              |                         |              |                       |                               | X         | X           |                  | X                            |                              | X                          |            |
| 2. Asian Dragon Fund                               |                         |              |                       |                               | X         | X           |                  |                              |                              |                            |            |
| 3. Asian Growth Leaders Fund                       |                         |              |                       |                               | X         | X           |                  |                              |                              |                            |            |
| 4. Asian High Yield Bond Fund                      |                         | X            | X                     |                               |           |             | X                |                              | X                            |                            |            |
| 5. Asian Multi-Asset Income Fund                   | X                       | X            | X                     |                               | X         | X           | X                |                              | X                            |                            |            |
| 6. Asia Pacific Bond Fund                          |                         | X            | X                     |                               |           |             | X                |                              | X                            | X                          |            |
| 7. Asian Sustainable Equity Fund                   |                         |              |                       |                               | X         | X           |                  | X                            |                              | X                          |            |
| 8. Asian Tiger Bond Fund                           |                         | X            | X                     |                               |           |             | X                |                              | X                            |                            |            |
| 9. Brown to Green Materials Fund                   |                         |              |                       |                               | X         | X           |                  | X                            |                              | X                          |            |
| 10. ## Specific Risks

### Liquidity Risk

Trading volumes in the underlying investments of the Funds may fluctuate significantly depending on market sentiment. There is a risk that investments made by the Funds may become less liquid in response to market developments, adverse investor perceptions or regulatory and government intervention (including the possibility of widespread trading suspensions implemented by domestic regulators). In extreme market conditions, there may be no willing buyer for an investment and so that investment cannot be readily sold at the desired time or price, and consequently the relevant Fund may have to accept a lower price to sell the relevant investment or may not be able to sell the investment at all. An inability to sell a particular investment or portion of a Fund's assets can have a negative impact on the value of the relevant Fund or prevent the relevant Fund from being able to take advantage of other investment opportunities.

The liquidity of fixed income securities issued by small and mid-capitalisation companies and emerging country issuers is particularly likely to be reduced during adverse economic, market or political events or adverse market sentiment. The credit rating downgrade of fixed income securities and changes in prevailing interest rate environments may also affect their liquidity. See also the Specific Risk Considerations section in relation to different sub-categories of fixed income securities.

Similarly, investment in equity securities issued by unlisted companies, small and mid-capitalisation companies and companies based in emerging countries are particularly subject to the risk that during certain market conditions, the liquidity of particular issuers or industries, or all securities within a particular investment category, will reduce or disappear suddenly and without warning as a result of adverse economic, market or political events, or adverse market sentiment.

Liquidity risk also includes the risk that relevant Funds may be forced to defer redemptions, issue in specie redemptions or suspend dealing because of stressed market conditions, an unusually high volume of redemption requests, or other factors beyond the control of the Investment Adviser. See paragraphs 25, and 30, to 33, of Appendix B for further detail. To meet redemption requests, the relevant Funds may be forced to sell investments at an unfavourable time and/or conditions, which may have a negative impact on the value of your investment.

### Model Risk

Certain Funds seek to pursue their investment objective by using proprietary models that incorporate quantitative analysis. Investments selected using these models may perform differently than as forecasted due to the factors incorporated into the models and the weighting of each factor, changes from historical trends, and issues in the construction and implementation of the models (including, but not limited to, software issues and other technological issues). There is no guarantee that BlackRock's use of these models will result in effective investment decisions for the Funds. The information and data used in the models may be supplied by third parties. Inaccurate or incomplete data may limit the effectiveness of the models. In addition, some of the data that BlackRock uses may be historical data, which may not accurately predict future market movement. There is a risk that the models will not be successful in selecting investments or in determining the weighting of investment positions that will enable the Funds to achieve their investment objective.

## Risk of Capital Erosion

Certain Funds and/or Share Classes may be exposed to the risk of capital erosion as a result of the dividend policies they adopt and/or the investment strategies they pursue. Where distributions are made from net realised and net unrealised capital gains and/or capital or, where expenses are deducted from net realised and net unrealised capital gains and/or capital rather than income, this will result in capital erosion and therefore will reduce the potential for future capital growth.

### Dividend Policies

Certain Funds and/or certain Share Classes (e.g. Distributing (G) Shares, Distributing (S) Shares, Distributing (R) Shares, Distributing (T) Shares, Distributing (C) and Distributing (Y) Shares) may make distributions from capital as well as from income and net realised and net unrealised capital gains. This may occur for example:

- ▶ if dividends are paid gross of fees and expenses this will mean fees and expenses are paid out of net realised and net unrealised capital gains or initially subscribed capital. As a result payment of dividends on this basis will reduce the capital of the Fund and/or relevant Share Class and will reduce the potential for future capital growth. See also "Tax Considerations" below; or
- ▶ if dividends include Interest Rate Differential arising from Share Class currency hedging, this will mean that the dividend may be higher but capital of the relevant Share Class will not benefit from the Interest Rate Differential. Where net Share Class currency hedging returns do not fully cover the Interest Rate Differential portion of a dividend, such shortfall will have the effect of reducing capital. This risk of capital erosion is particularly relevant for Distributing (R) Shares as, for this Share Class, a material portion of any dividend payment may be made out of capital since the dividend is calculated on the basis of expected gross income plus Interest Rate Differential. Therefore the capital that is returned via the dividend is not available for future capital growth. Interest rates are subject to change which means that the Interest Rate Differential may reduce dividend;
- ▶ if the securities markets in which the Fund invests had declined to such an extent that the Fund has incurred net capital losses. This risk to capital growth is particularly relevant for Distributing (T) and Distributing (C) Shares as, for these Share Classes, a material portion of any dividend payment may be made out of capital since the dividend is calculated on the basis of expected gross total return with respect to the Distributing (T) Shares, or may not be linked to income or capital gains with respect to the distributing (C) Shares, and dividend may continue to be paid and the value of investment may fall more rapidly;
- ▶ if dividends calculated on an annual basis in respect of Distributing (Y) Shares are lower than the Dividend Threshold Amount, this will mean that there may be a shortfall which may need to be paid out of capital and therefore would have the effect of reducing capital. For this Share Class, the risk of capital erosion is particularly relevant, since any dividend distributions on an annual basis must be at least equal to the Dividend Threshold Amount, and in the event of a shortfall, a material portion of any dividend payment may be made out of

capital. Therefore the capital that is returned via the dividend will not be available for future capital growth;

- ▶ In volatile or exceptional market conditions, the level of income of the fund may reduce. This may lead to the consistency of distributions being compromised and also an increase in distributions from capital, net realised and net unrealised gains, to reduce the fluctuations in the distribution rate per share, which may in turn increase the risk of capital erosion and reduce the potential for capital growth.

### Options Strategies

In addition, certain Funds may pursue investment strategies, such as options strategies, in order to generate income. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital and the potential for long-term capital growth as well as increasing any capital losses. Any such distributions may result in an immediate reduction of the Net Asset Value per Share. If a Fund adopts options strategies to generate income and as part of an options strategy, the Investment Adviser or its delegate is incorrect in its expectation of changes in the market prices or determination of the correlation between the instruments or indices on which the options are written or purchased and the instruments in a Fund's investment portfolio, that Fund may incur losses that it would not otherwise incur.

### Fixed Income Transferable Securities

Debt securities are subject to both actual and perceived measures of creditworthiness. The "downgrading" of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security, particularly in a thinly traded market. In certain market environments this may lead to investments in such securities becoming less liquid, making it difficult to dispose of them.

A Fund may be affected by changes in prevailing interest rates and by credit quality considerations. Changes in market rates of interest will generally affect a Fund's asset values as the prices of fixed rate securities generally increase when interest rates decline and decrease when interest rates rise. Prices of shorter-term securities generally fluctuate less in response to interest rate changes than do longer-term securities.

An economic recession may adversely affect an issuer's financial condition and the market value of high yield debt securities issued by such entity. The issuer's ability to service its debt obligations may be adversely affected by specific issuer developments, or the issuer's inability to meet specific projected business forecasts, or the unavailability of additional financing. In the event of bankruptcy of an issuer, a Fund may experience losses and incur costs.

Issuers of non-investment grade or unrated debt may be highly leveraged and carry a greater risk of default. In addition, non-investment grade or unrated securities tend to be less liquid and more volatile than higher rated fixed-income securities, so that adverse economic events may have a greater impact on the prices of non-investment grade debt securities than on higher rated fixed-income securities. Such securities are also subject to greater risk of loss of principal and interest than higher rated fixed-income securities.

### Investment in High Yield Debt Securities

Non-investment grade debt securities, also known as "high-yield" debt securities may carry a greater risk of default than higher rated debt securities. In addition, non-investment grade securities tend to be more volatile than higher rated debt securities, so that adverse economic events may have a greater impact on the prices of non-investment grade debt securities than on higher rated debt securities. Further, an issuer's ability to service its debt obligations may be adversely affected by specific issuer developments, for example, an economic recession may adversely affect an issuer's financial condition and the market value of high yield debt securities issued by such entity.

### Asset-Backed Securities ("ABS")

An asset-backed security is a generic term for a debt security issued by corporations or other entities (including public or local authorities) backed or collateralised by the income stream from an underlying pool of assets. The underlying assets typically include loans, leases or receivables (such as credit card debt, automobile loans and student loans). An asset-backed security is usually issued in a number of different classes with varying characteristics depending on the riskiness of the underlying assets assessed by reference to their credit quality and term and can be issued at a fixed or a floating rate. The higher the risk contained in the class, the more the asset-backed security pays by way of income.

The obligations associated with these securities may be subject to greater credit, liquidity and interest rate risk compared to other fixed income securities such as government issued bonds. ABS and MBS are often exposed to extension risk (where obligations on the underlying assets are not paid on time) and prepayment risks (where obligations on the underlying assets are paid earlier than expected), these risks may have a substantial impact on the timing and size of the cashflows paid by the securities and may negatively impact the returns of the securities. The average life of each individual security may be affected by a large number of factors such as the existence and frequency of exercise of any optional redemption and mandatory prepayment, the prevailing level of interest rates, the actual default rate of the underlying assets, the timing of recoveries and the level of rotation in the underlying assets.

Specific types of ABS in which the Funds may invest are set out below:

#### *Generic risks related to ABS*

With regard to Funds that invest in ABS, while the value of ABS typically increases when interest rates fall and decreases when interest rates rise, and are expected to move in the same direction of the underlying related asset, there may not be a perfect correlation between these events.

The ABS in which the Fund may invest may bear interest or pay preferred dividends at below market rates and, in some instances, may not bear interest or pay preferred dividends at all.

Certain ABS may be payable at maturity in cash at the stated principal amount or, at the option of the holder, directly in a stated amount of the asset to which it is related. In such instance, a Fund may sell the ABS in the secondary market prior to maturity if the value of the stated amount of the asset exceeds the stated principal amount and thereby realise the appreciation in the underlying asset.

ABS may also be subject to extension risk, which is, the risk that, in a period of rising interest rates, prepayments may occur at a slower rate than expected. As a result, the average duration of the Fund's portfolio may increase. The value of longer-term securities generally changes more in response to changes in interest rates than that of shorter-term securities.

As with other debt securities, ABS are subject to both actual and perceived measures of creditworthiness. Liquidity in ABS may be affected by the performance or perceived performance of the underlying assets. In some circumstances investments in ABS may become less liquid, making it difficult to dispose of them. Accordingly, the Fund's ability to respond to market events may be impaired and the Fund may experience adverse price movements upon liquidation of such investments. In addition, the market price for an ABS may be volatile and may not be readily ascertainable. As a result, the Fund may not be able to sell them when it desires to do so, or to realise what it perceives to be their fair value in the event of a sale. The sale of less liquid securities often requires more time and can result in higher brokerage charges or dealer discounts and other selling expenses.

ABS may be leveraged which may contribute to volatility in the value of the security.

*Considerations relating to specific types of ABS in which a Fund may invest*

#### *Asset-Backed Commercial Paper – ("ABCP")*

An ABCP is a short-term investment vehicle with a maturity that is typically between 90 and 180 days. The security itself is typically issued by a bank or other financial institution. The notes are backed by physical assets such as trade receivables, and are generally used for short-term financing needs.

A company or group of companies looking to enhance liquidity may sell receivables to a bank or other conduit, which, in turn, will issue them to the Fund as commercial paper. The commercial paper is backed by the expected cash inflows from the receivables. As the receivables are collected, the originators are expected to pass on the funds.

#### *Collateralised Debt Obligation ("CDO")*

A CDO is generally an investment grade security backed by a pool of non-mortgage bonds, loans and other assets. CDOs do not usually specialise in one type of debt but are often loans or bonds. CDOs are packaged in different classes representing different types of debt and credit risk. Each class has a different maturity and risk associated with it.

#### *Agency Mortgage-Backed Security ("Agency MBS")*

An Agency MBS is a type of mortgage back security issued by government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation or the Federal National Mortgage Association. It typically entails less credit and default risk compared to non-agency MBS.

#### *Collateralised Loan Obligations ("CLOs")*

CLOs are a type of securitisation backed by corporate loans (i.e. loans to businesses).

CLOs are predominantly backed by floating rate loans (although transactions typically allow some exposure to fixed-rate bonds and floating rate notes). The most common type of CLOs are referred to as "levered loan" CLOs and are backed predominantly by loans to high-yield (non-investment grade) companies. Levered loan CLOs are usually actively managed by a CLO manager who will be an asset manager active in the high yield market, although static (i.e. not actively managed) CLOs also exist and may be invested in by Fund.

CLOs are typically issued with multiple tranches, each with a different risk/return profile. The risk/return profile of a tranche is based on its credit quality, as determined by the credit quality of the underlying assets of the CLO and the ranking of the tranche relative to other tranches of the CLO in the priority of payments from those underlying assets. Payments from underlying assets are made to the tranches starting from the highest credit tranches to the lowest credit tranches. Credit and default risks are therefore generally higher for mezzanine and equity tranches of the CLO, while investment-grade tranches typically face lower exposure to such risks.

The price of CLOs owned by the Fund will generally fluctuate with, among other things, the financial condition of the underlying corporates that have borrowed money via the loans, general economic conditions, the condition of certain financial markets, political events, developments or trends in a particular industry, and changes in prevailing interest rates.

Credit rating downgrades can trigger forced selling and destabilise CLO prices. Returns may also be negatively impacted by reinvestment risk (i.e., the challenge of finding suitable loans in which to reinvest) and counterparty risk (e.g., the risk of default by parties involved in structuring or managing the CLO).

CLOs offer a diversified exposure to corporate debt as they typically contain loans to a significant number of different companies. Concentration of an underlying portfolio in any one company or industry increases risk from defaults or sector-specific downturns.

CLOs can be less liquid than other fixed income securities due to limited secondary market trading and dealer marks and valuations provided may not represent prices at which assets can actually be purchased or sold in the market from time to time.

#### *CLO Manager Risk*

The CLOs in which the Fund invests are managed by investment advisers which may not be the Investment Manager. CLO managers are responsible for selecting, managing and replacing the underlying bank loans or bonds within a CLO. CLO managers may have limited operating histories and may be subject to conflicts of interests, including managing the assets of other clients or other investment vehicles, or receiving fees that incentivise maximising the yield, and indirectly the risk, of a CLO. Adverse developments with respect to a CLO manager, such as personnel and resource constraints, regulatory issues or other developments that may impact the ability and/or performance of the CLO

manager, may adversely impact the performance of the CLO securities in which the Fund invests

#### *Credit Linked Note – (“CLN”)*

A CLN is a security with an embedded credit default swap allowing the issuer to transfer a specific credit risk to the Fund.

CLNs are created through a special purpose company or trust, which is collateralised with securities rated in the top tier as determined by an accredited credit rating agency. The Fund buys securities from a trust that pays a fixed or floating coupon during the life of the note. At maturity, the Fund will receive the par value unless the referenced entity credit defaults or declares bankruptcy, in which case it receives an amount equal to the recovery rate. The trust enters into a default swap with a deal arranger. In case of default, the trust pays the dealer par minus the recovery rate in exchange for an annual fee which is passed on to the Fund in the form of a higher yield on the notes.

Under this structure, the coupon or price of the note is linked to the performance of a reference asset. It offers borrowers a hedge against credit risk, and offers the Fund a higher yield on the note for accepting exposure to a specified credit event.

#### *Synthetic Collateralised Debt Obligation*

A synthetic CDO is a form of collateralised debt obligation (CDO) that invests in credit default swaps (CDSs – see below) or other non-cash assets to gain exposure to a portfolio of fixed income assets. Synthetic CDOs are typically divided into credit classes based on the level of credit risk assumed. Initial investments into the CDO are made by the lower classes, while the senior classes may not have to make an initial investment.

All classes will receive periodic payments based on the cash flows from the credit default swaps. If a credit event occurs in the fixed income portfolio, the synthetic CDO and its investors including the Fund become responsible for the losses, starting from the lowest rated classes and working its way up.

While synthetic CDOs can offer extremely high yields to investors such as the Fund, there is potential for a loss equal to that of the initial investments if several credit events occur in the reference portfolio.

A CDS is a swap designed to transfer the credit exposure of fixed income products between parties. The buyer of a CDS receives credit protection (buys protection), whereas the seller of the swap guarantees the credit worthiness of the product. By doing this, the risk of default is transferred from the holder of the fixed income security to the seller of the CDS. CDS are treated as a form of OTC derivative.

#### *Whole Business Securitisation (“WBS”)*

A WBS is defined as a form of asset-backed financing in which operating assets (which are long-term assets acquired for use in the business rather than for resale and includes property, plant, and equipment and intangible assets) are financed through the issues of notes via a special purpose vehicle (a structure whose operations are limited to the acquisition and financing of specific assets, usually a subsidiary company with an asset/liability structure and legal status that makes its obligations secure even if

the parent company goes bankrupt) in the bond market and in which the operating company keeps complete control over the assets securitised. In case of default, control is handed over to the security trustee for the benefit of the note holders for the remaining term of financing.

#### *Mortgage-Backed Securities (“MBS”)*

A mortgage-backed security is a generic term for a debt security backed or collateralised by the income stream from an underlying pool of commercial and/or residential mortgages. This type of security is commonly used to redirect the interest and principal payments from the pool of mortgages to investors. A mortgage-backed security is normally issued in a number of different classes with varying characteristics depending on the riskiness of the underlying mortgages assessed by reference to their credit quality and term and can be issued at a fixed or a floating rate of securities. The higher the risk contained in the class, the more the mortgage-backed security pays by way of income.

Specific types of MBS in which a Fund may invest are set out below.

#### *Generic risks related to MBS*

MBS may be subject to prepayment risk which is the risk that, in a period of falling interest rates, borrowers may refinance or otherwise repay principal on their mortgages earlier than scheduled. When this happens, certain types of MBS will be paid off more quickly than originally anticipated and the Fund will have to invest the proceeds in securities with lower yields. MBS may also be subject to extension risk, which is, the risk that, in a period of rising interest rates, certain types of MBS will be paid off more slowly than originally anticipated and the value of these securities will fall. As a result, the average duration of the Fund's portfolio may increase. The value of longer-term securities generally changes more in response to changes in interest rates than that of shorter-term securities.

Because of prepayment risk and extension risk, MBS react differently to changes in interest rates than other fixed income securities. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain MBS. Certain MBS in which the Fund may invest may also provide a degree of investment leverage, which could cause the Fund to lose all or a substantial amount of its investment.

In some circumstances investments in MBS may become less liquid, making it difficult to dispose of them. Accordingly, the Fund's ability to respond to market events may be impaired and the Fund may experience adverse price movements upon liquidation of such investments. In addition, the market price for MBS may be volatile and may not be readily ascertainable. As a result, the Fund may not be able to sell them when it desires to do so, or to realise what it perceives to be their fair value in the event of a sale. The sale of less liquid securities often requires more time and can result in higher brokerage charges or dealer discounts and other selling expenses.

*Considerations relating to specific types of MBS in which a Fund may invest*

*Commercial Mortgage Backed Security ("CMBS")*

A CMBS is a type of mortgage backed security that is secured by the loan on a commercial property; CMBS can provide liquidity to real estate investors and to commercial lenders. Typically a CMBS provides a lower degree of prepayment risk because commercial mortgages are most often set for a fixed term and not for a floating term as is generally the case with a residential mortgage. CMBS are not always in a standard form so can present increased valuation risk.

*Collateralised Mortgage Obligation ("CMO")*

A CMO is a security backed by the revenue from mortgage loans, pools of mortgages, or even existing CMOs, separated into different maturity classes. In structuring a CMO, an issuer distributes cash flow from the underlying collateral over a series of classes, which constitute a multiclass securities issue. The total revenue from a given pool of mortgages is shared between a collection of CMOs with differing cashflow and other characteristics. In most CMOs, coupon payments are not made on the final class until the other classes have been redeemed. Interest is added to increase the principal value.

CMOs aim to eliminate the risks associated with prepayment because each security is divided into maturity classes that are paid off in order. As a result, they yield less than other mortgage-backed securities. Any given class may receive interest, principal, or a combination of the two, and may include more complex stipulations. CMOs generally receive lower interest rates that compensate for the reduction in prepayment risk and increased predictability of payments. In addition, CMOs can exhibit relatively low liquidity, which can increase the cost of buying and selling them.

*Real Estate Mortgage Investment Conduits ("REMIC")*

A REMIC is an investment-grade mortgage bond that separates mortgage pools into different maturity and risk classes to the bank or conduit, which then passes the proceeds on to the note holders including the Fund. The REMIC is structured as a synthetic investment vehicle consisting of a fixed pool of mortgages broken apart and marketed to investors as individual securities and created for the purpose of acquiring collateral. This base is then divided into varying classes of securities backed by mortgages with different maturities and coupons.

*Residential mortgage-backed security ("RMBS")*

An RMBS is a type of security whose cash flows come from residential debt such as mortgages, home-equity loans and subprime mortgages. This is a type of MBS which focuses on residential instead of commercial debt.

Holders of an RMBS receive interest and principal payments that come from the holders of the residential debt. The RMBS comprises a large amount of pooled residential mortgages.

**Distressed Securities**

Investment in a security of an issuer that is either in default or in high risk of default ("Distressed Securities") involves significant risk. Such investments will only be made when the Investment Adviser believes either that the security trades at a materially different level from the Investment Adviser's perception of fair value or that it is reasonably likely that the issuer of the securities will make an exchange offer or will be the subject of a plan of reorganisation; however, there can be no assurance that such an exchange offer will be made or that such a plan of reorganisation will be adopted or that any securities or other assets received in connection with such an exchange offer or plan of reorganisation will not have a lower value or income potential than anticipated when the investment was made. In addition, a significant period of time may pass between the time at which the investment in Distressed Securities is made and the time that any such exchange, offer or plan of reorganisation is completed. During this period, it is unlikely that any interest payments on the Distressed Securities will be received, there will be significant uncertainty as to whether fair value will be achieved or not and the exchange offer or plan of reorganisation will be completed, and there may be a requirement to bear certain expenses to protect the investing Fund's interest in the course of negotiations surrounding any potential exchange or plan of reorganisation. Furthermore, constraints on investment decisions and actions with respect to Distressed Securities due to tax considerations may affect the return realised on the Distressed Securities.

Some Funds may invest in securities of issuers that are encountering a variety of financial or earnings problems and represent distinct types of risks. A Fund's investments in equity or fixed income transferable securities of issuers in a weak financial condition may include issuers with substantial capital needs or negative net worth or issuers that are, have been or may become, involved in bankruptcy or reorganisation proceedings.

**Contingent Convertible Bonds**

A contingent convertible bond is a type of complex debt security which may be converted into the issuer's equity or be partly or wholly written off if a pre-specified trigger event occurs. Trigger events may be outside of the issuer's control. Common trigger events include the share price of the issuer falling to a particular level for a certain period of time or the issuer's capital ratio falling to a pre-determined level. Coupon payments on certain contingent convertible bonds may be entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.

Events that trigger the conversion from debt into equity are designed so that conversion occurs when the issuer of the contingent convertible bonds is in financial difficulty, as determined either by regulatory assessment or objective losses (e.g. if the capital ratio of the issuer company falls below a pre-determined level).

Investment in contingent convertible bonds may entail the following (non-exhaustive) risks:

Contingent convertible bonds' investors may suffer a loss of capital when equity holders do not.

Trigger levels differ and determine exposure to conversion risk depending on the distance of the capital ratio to the trigger level. It might be difficult for the Fund to anticipate the trigger events that

would require the debt to convert into equity. Furthermore, it might be difficult for the Fund to assess how the securities will behave upon conversion.

In case of conversion into equity, the relevant Fund might be forced to sell these new equity shares because the investment policy of the relevant Fund may not allow equity in its portfolio. Such a forced sale, and the increased availability of these shares might have an effect on market liquidity in so far as there may not be sufficient demand for these shares. Investment in contingent convertible bonds may also lead to an increased industry concentration risk and thus counterparty risk as such securities are issued by a limited number of banks. Contingent convertible bonds are usually subordinated to comparable non-convertible securities, and thus are subject to higher risks than other debt securities.

In the event that a contingent convertible bond is written off (a “write-down”) as the result of a pre-specified trigger event, the Fund may suffer a full, partial or staggered loss of the value of its investment. A write-down may be either temporary or permanent.

In addition, most contingent convertible bonds are issued as perpetual instruments which are callable at pre-determined dates. Perpetual contingent convertible bonds may not be called on the pre-defined call date and investors may not receive return of principal on the call date or at any date.

#### **Delayed Delivery Transactions**

Funds that invest in fixed income transferable securities may purchase “To Be Announced” securities contracts (“TBAs”). This refers to the common trading practice in the mortgage-backed securities market whereby a contract is purchased which entitles the buyer to buy a security from a mortgage pool (including but not limited to Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. As a TBA is not settled at the time of purchase, this may lead to leveraged positions within a Fund. Purchasing a TBA involves a risk of loss if the value of the security to be purchased declines prior to the settlement date. Risks may also arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts. In certain jurisdictions, TBAs may be classed as financial derivative instruments.

The Funds may dispose of a commitment prior to settlement if it is deemed appropriate to do so. Proceeds of TBA sales are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment (deliverable on or before the sale commitment date), are held as cover for the transaction.

If the TBA sale commitment is closed through the acquisition of an offsetting purchase commitment, the Fund realises a gain or loss on the commitment without regard to any unrealised gain or loss on the underlying security. If the Fund delivers securities under the commitment, the Fund realises a gain or loss from the sale of the securities upon the unit price established at the date the commitment was entered into.

#### **Smaller Capitalisation Companies**

The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies or the market average in general. These companies may have limited product lines, markets or financial resources, or they may be dependent on a limited management group. Full development of those companies takes time. In addition, many small company stocks trade less frequently and in smaller volume, and may be subject to more abrupt or erratic price movements than stocks of large companies. The securities of small companies may also be more sensitive to market changes than the securities of large companies. These factors may result in above-average fluctuations in the Net Asset Value of a Fund's Shares.

#### **Equity Risks**

The values of equities fluctuate daily and a Fund investing in equities could incur significant losses. The price of equities can be influenced by many factors at the individual company level, as well as by broader economic and political developments, including changes in investment sentiment, trends in economic growth, inflation and interest rates, issuer-specific factors, corporate earnings reports, demographic trends and catastrophic events.

#### **Money-Market Instruments**

The Euro Reserve Fund and the US Dollar Reserve Fund invest a significant amount of their Net Asset Value in approved money-market instruments and in this regard investors might compare the funds to regular deposit accounts. Investors should however note that holdings in these Funds are subject to the risks associated with investing in a CIS, in particular the fact that the principal sum invested is capable of fluctuation as the Net Asset Value of the Funds fluctuates.

Money-market instruments are subject to both actual and perceived measures of creditworthiness. The “downgrading” of a rated money-market instrument or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of these instruments, particularly in an illiquid market.

#### **Emerging Markets/Frontier Markets**

The following considerations, which apply to some extent to all international investments, are of particular significance in certain smaller emerging and frontier markets. Funds investing in equities (please refer to the respective investment objectives section of each relevant fund) may include investments in certain smaller emerging and frontier markets, which are typically those of poorer or less developed countries which exhibit lower levels of economic and/or capital market development, and higher levels of share price and currency volatility. The prospects for economic growth in a number of these markets are considerable and equity returns have the potential to exceed those in mature markets as growth is achieved. However, share price and currency volatility are generally higher in emerging and frontier markets.

Some governments exercise substantial influence over the private economic sector and the political and social uncertainties that exist for many developing countries are particularly significant. Another risk common to most such countries is that the economy is heavily export oriented and, accordingly, is dependent upon international trade. The existence of overburdened infrastructures and obsolete financial systems also presents risks in certain countries, as do environmental problems which may be exacerbated by climate change.

Certain economies also depend to a significant degree upon exports of primary commodities and, therefore, are vulnerable to changes in commodity prices which, in turn, may be affected by a variety of factors.

In adverse social and political circumstances, governments have been involved in policies of expropriation, confiscatory taxation, nationalisation, intervention in the securities market and trade settlement, and imposition of foreign investment restrictions and exchange controls, and these could be repeated in the future. In addition to withholding taxes on investment income, some emerging and frontier markets may impose different capital gains taxes on foreign investors.

Generally accepted accounting, auditing and financial reporting practices in emerging and frontier markets may be significantly different from those in developed markets. Compared to mature markets, some emerging and frontier markets may have a low level of regulation, enforcement of regulations and monitoring of investors' activities. Those activities may include practices such as trading on material non-public information by certain categories of investor.

The securities markets of developing countries are not as large as the more established securities markets and have substantially less trading volume, resulting in a lack of liquidity and high price volatility. There may be a high concentration of market capitalisation and trading volume in a small number of issuers representing a limited number of industries as well as a high concentration of investors and financial intermediaries. These factors may adversely affect the timing and pricing of a Fund's acquisition or disposal of securities.

Practices in relation to settlement of securities transactions in emerging and frontier markets involve higher risks than those in developed markets, in part because a Fund will need to use brokers and counterparties which are less well capitalised, and custody and registration of assets in some countries may be unreliable.

Delays in settlement could result in investment opportunities being missed if a Fund is unable to acquire or dispose of a security. The Depositary is responsible for the proper selection and supervision of its correspondent banks in all relevant markets in accordance with Luxembourg law and regulation.

In certain emerging and frontier markets, registrars are not subject to effective government supervision nor are they always independent from issuers. The possibility of fraud, negligence, undue influence being exerted by the issuer or refusal to recognise ownership exists, which, along with other factors, could result in the registration of a shareholding being completely lost. Investors should therefore be aware that the Funds concerned could suffer loss arising from these registration problems, and as a result of archaic legal systems a Fund may be unable to make a successful claim for compensation.

While the factors described above may result in a generally higher level of risk with respect to the individual smaller emerging and frontier markets, these may be reduced when there is a low correlation between the activities of those markets and/or by the diversification of investments within the relevant Funds.

## **Sovereign Debt**

Sovereign debt refers to debt obligations issued or guaranteed by governments or their agencies and instrumentalities (each a "governmental entity"). Investments in sovereign debt may involve a degree of risk. The governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. A governmental entity's willingness or ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the governmental entity's policy towards the international monetary bodies, any constraints placed on it by inclusion in a common monetary policy, or any other constraints to which a governmental entity might be subject. Governmental entities may also be dependent on expected disbursements from foreign governments, multilateral agencies and other foreign entities to reduce principal and interest arrears on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on a governmental entity's implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability or willingness to service its debt on a timely basis. Consequently, governmental entities may default on their sovereign debt. Holders of sovereign debt, including a Fund, may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities.

Sovereign debt holders may also be affected by additional constraints relating to sovereign issuers which may include (i) the restructuring of such debt (including the reduction of outstanding principal and interest and or rescheduling of repayment terms) without the consent of the impacted Fund(s) (e.g. pursuant to legislative actions unilaterally taken by the sovereign issuer and/or decisions made by a qualified majority of the lenders); and (ii) the limited legal recourses available against the sovereign issuer in case of failure of or delay in repayment (for example there may be no bankruptcy proceedings available by which sovereign debt on which a government entity has defaulted may be recovered).

As set out in their investment policies, some of the Funds may invest in debt securities, issued by governments and agencies worldwide and may invest, from time to time, more than 10% of their Net Asset Value in non-investment grade debt securities issued by governments and agencies of any single country.

Non-investment grade, also known as "high-yield", sovereign debt may carry a greater risk of default than higher rated debt securities. In addition, non-investment grade securities tend to be more volatile than higher rated debt securities, so that adverse economic events may have a greater impact on the prices of non-investment grade debt securities than on higher rated debt securities. Further, an issuer's ability to service its debt obligations may be adversely affected by specific issuer developments, for example, an economic recession may adversely affect an issuer's financial condition and the market value of high yield debt securities issued by such entity.

Where Funds invest more than 10% of their Net Asset Value in debt securities issued by governments or agencies of any single country, they may be more adversely affected by the performance of those securities and will be more susceptible to any single economic, market, political or regulatory occurrence affecting that particular country or region.

#### **Sukuk Investment Risk**

Price changes in Sukuk are influenced predominantly by the value of the underlying asset. Factors that may impact the value of the underlying asset include volatility and interest rate levels. Price changes in Sukuk may also be influenced by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors. Sukuk could suffer when capital market interest rates rise, while they could increase in value when capital market interest rates fall. The price changes also depend on the term or residual time to maturity of the Sukuk. In general, Sukuk with shorter terms have less price risks than Sukuk with longer terms. However, they generally have lower returns and, because of the more frequent due dates of the securities portfolios, involve higher re-investment costs. Sukuk may be issued by any corporate, sovereign, or supranational entity and may be backed or derive its value from any asset, tangible or otherwise, including home financings.

Sovereign Sukuk may involve a higher degree of risk than conventional governmental bonds due to their geographical concentration. The governmental entity that controls the repayment of Sovereign Sukuk may not be able or willing to repay the principal and/or return when due in accordance with the terms of such debt due to specific factors, including, but not limited to (i) their foreign reserves, (ii) the available amount of their foreign exchange as at the date of repayment, (iii) their failure to implement political reforms, and (iv) their policy relating to the International Monetary Fund. Sovereign Sukuk holders may also be affected by additional constraints relating to sovereign issuers which may include: (i) the unilateral rescheduling of such obligation by the issuer and (ii) the limited legal recourses available against the issuer (in case of failure of delay in repayment). Where a Fund invests in Sovereign Sukuk issued by governments or government related entities from emerging countries it will bear additional risks linked to the specifics of such countries (e.g. currency fluctuations, political and economic uncertainties, repatriation restrictions, etc.).

Sukuk issued or guaranteed by corporate or supranational entities are also subject to the risk that the obligor is unwilling or unable to make payments according to the terms of the Sukuk. Recourse to the obligor may be limited in such instances depending on the jurisdiction where the Sukuk was issued and the law governing the issuance.

#### **High Yield Sukuk**

Some Funds may invest in Sukuk that are rated sub-investment grade, or Sukuk which are unrated such Funds may be more volatile than funds investing in higher-rated Sukuk of similar maturity.

High yield Sukuk may also be subject to greater levels of credit or default risk than high-rated Sukuk. Such Sukuk are more likely to react to developments affecting market and credit risk than more highly rated securities. The value of high yield Sukuk can be adversely affected by overall economic conditions, such as an economic downturn or a period of rising interest rates, and high

yield Sukuk may be less liquid and more difficult to sell at an advantageous time or price or to value than higher-rated Sukuk. In particular, high yield Sukuk are often issued by smaller, less creditworthy companies which are generally less able than more financially stable firms to make scheduled payments of profit and principal.

For further information on the risks associated with Funds which may invest in high yield securities, investors should refer to the "General Risks" and "Specific Risks" sections of this Prospectus.

#### **Illiquidity of Sukuk Close to Maturity**

In addition to the liquidity risks of Sukuk already described above, there is a risk that Sukuk which are nearing maturity may become illiquid. In such cases, it may become more difficult to achieve fair value on the purchase and sale thereof.

#### **Sukuk Issuer Rating**

Securities are subject to both actual and perceived measures of creditworthiness. The amount of credit risk may be assessed using the issuer's credit rating which is assigned by one or more independent rating agencies. This does not amount to a guarantee of the issuer's creditworthiness but provides an indicator of the likelihood of default. Securities which have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. Companies often issue securities which are ranked in order of seniority which in the event of default would be reflected in the priority in which investors might be paid back. The "downgrading" of an investment grade rated security or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security, particularly in a thinly traded market.

Some Funds may be affected by changes in prevailing interest rates and by credit quality considerations. Changes in market rates of interest may generally affect the Funds' net asset values as the prices of fixed rate securities generally increase when interest rates decline and decrease when interest rates rise. Prices of shorter-term securities generally fluctuate less in response to interest rate changes than do longer-term securities. An economic recession may adversely affect an issuer's financial condition, and the market value of high yield securities issued by such entity. The issuer's ability to service its obligations may be adversely affected by specific issuer developments, or the issuer's inability to meet specific projected business forecasts, or the unavailability of additional financing. In the event of bankruptcy of an issuer, the Funds may experience losses and incur costs.

#### **Bond Downgrade Risk**

A Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Fund does hold such downgraded bonds, there will be an increased risk of default on repayment, which in turn translates into a risk that the capital value of the Fund will be affected. Investors should be aware that the yield or the capital value of the Fund (or both) could fluctuate.

#### **Bank Corporate Bonds "Bail-in" Risk**

Corporate bonds issued by a financial institution in the European Union may be subject to the risk of a write down or conversion (i.e.

“bail-in”) by an EU authority in circumstances where the financial institution is unable to meet its financial obligations. This may result in bonds issued by such financial institution being written down (to zero), converted into equity or alternative instrument of ownership, or the terms of the bond may be varied. ‘Bail-in’ risk refers to the risk of EU member state authorities exercising powers to rescue troubled banks by writing down or converting rights of their bondholders in order to absorb losses of, or recapitalise, such banks. Investors should be alerted to the fact that EU member state authorities are more likely to use a “bail-in” tool to rescue troubled banks, instead of relying on public financial support as they have in the past as EU member state authorities now consider that public financial support should only be used as a last resort after having assessed and exploited, to the maximum extent practicable, other resolution tools, including the “bail-in” tool. A bail-in of a financial institution is likely to result in a reduction in value of some or all of its bonds (and possibly other securities) and a Fund holding such securities when a bail-in occurs will also be similarly impacted.

### **Restrictions on Foreign Investment**

Some countries prohibit or impose substantial restrictions on investments by foreign entities such as a Fund. As illustrations, certain countries require governmental approval prior to investments by foreign persons, or limit the amount of investment by foreign persons in a particular company, or limit the investment by foreign persons in a company to only a specific class of securities which may have less advantageous terms than securities of the company available for purchase by nationals. Certain countries may restrict investment opportunities in issuers or industries deemed important to national interests. The manner in which foreign investors may invest in companies in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of a Fund. For example, a Fund may be required in certain of such countries to invest initially through a local broker or other entity and then have the share purchases re-registered in the name of the Fund. Re-registration may in some instances not be able to occur on a timely basis, resulting in a delay during which a Fund may be denied certain of its rights as an investor, including rights as to dividends or to be made aware of certain corporate actions. There also may be instances where a Fund places a purchase order but is subsequently informed, at the time of re-registration, that the permissible allocation to foreign investors has been filled, depriving the Fund of the ability to make its desired investment at the time. Substantial limitations may exist in certain countries with respect to a Fund’s ability to repatriate investment income, capital or the proceeds of sales of securities by foreign investors. A Fund could be adversely affected by delays in, or a refusal to grant any required governmental approval for repatriation of capital, as well as by the application to the Fund of any restriction on investments. A number of countries have authorised the formation of closed-end investment companies to facilitate indirect foreign investment in their capital markets. Shares of certain closed-end investment companies may at times be acquired only at market prices representing premiums to their net asset values. If a Fund acquires shares in closed-end investment companies, Shareholders would bear both their proportionate share of expenses in the Fund (including management fees) and, indirectly, the expenses of such closed end investment companies. In addition, certain countries such as India and the PRC implement quota restrictions on foreign ownership of certain onshore investments. These investments may at times be acquired only at market prices representing premiums to their net asset values and such premiums may ultimately be borne by the relevant Fund. A Fund may also seek, at its own cost,

to create its own investment entities under the laws of certain countries.

### **Investments in the PRC**

Investments in the PRC are currently subject to certain additional risks, particularly regarding the ability to deal in securities in the PRC. Dealing in certain PRC securities is restricted to licensed investors and the ability of the investor to repatriate its capital invested in those securities may be limited at times. Due to issues relating to liquidity and repatriation of capital, the Company may determine from time to time that making direct investments in certain securities may not be appropriate for a UCITS. As a result, the Company may choose to gain exposure to PRC securities indirectly and may be unable to gain full exposure to the PRC markets.

### **PRC Economic Risks**

The PRC is one of the world’s largest global emerging markets. The economy in the PRC, which has been in a state of transition from a planned economy to a more market orientated economy, differs from the economies of most developed countries and investing in the PRC may be subject to greater risk of loss than investments in developed markets. This is due to, among other things, greater market volatility, lower trading volume, political and economic instability, greater risk of market shut down, greater control of foreign exchange and more limitations on foreign investment policy than those typically found in a developed market. There may be substantial government intervention in the PRC economy, including restrictions on investment in companies or industries deemed sensitive to relevant national interests. The PRC government and regulators may also intervene in the financial markets, such as by the imposition of trading restrictions, which may affect the trading of PRC securities. The companies in which the relevant Fund invests may be held to lower disclosure, corporate governance, accounting and reporting standards than companies in more developed markets. In addition, some of the securities held by the relevant Fund may be subject to higher transaction and other costs, foreign ownership limits, the imposition of withholding or other taxes, or may have liquidity issues which make such securities more difficult to sell at reasonable prices. These factors may have an unpredictable impact on the relevant Fund’s investments and increase the volatility and hence the risk of a loss to the value of an investment in the relevant Fund.

As with any fund investing in an emerging market country, the relevant Fund investing in the PRC may be subject to greater risk of loss than a fund investing in a developed market country. The PRC economy has experienced significant and rapid growth in the past 20 years. However, such growth may or may not continue, and may not apply evenly across different geographic locations and sectors of the PRC economy. Economic growth has also been accompanied by periods of high inflation. The PRC government has implemented various measures from time to time to control inflation and restrain the rate of economic growth of the PRC economy. Furthermore, the PRC government has carried out economic reforms to achieve decentralisation and utilisation of market forces to develop the economy of the PRC. These reforms have resulted in significant economic growth and social progress. There can, however, be no assurance that the PRC government will continue to pursue such economic policies or, if it does, that those policies will continue to be successful. Any such adjustment and modification of those economic policies may have an adverse impact on the securities markets in PRC and therefore on the performance of the relevant Fund.

These factors may increase the volatility of any such Fund (depending on its degree of investment in the PRC) and hence the risk of loss to the value of your investment.

### **PRC Political Risks**

Any political changes, social instability and adverse diplomatic developments which may take place in, or in relation to, the PRC could result in significant fluctuation in the price of China A-Shares and/or China onshore bonds.

### **Legal System of the PRC**

The PRC legal system is based on written statutes and their interpretation by the Supreme People's Court. Prior court decisions may be cited for reference but have no precedent value. Since 1979, the PRC government has been developing a comprehensive system of commercial laws and considerable progress has been made in introducing laws and regulations dealing with economic matters such as foreign investment, corporate organisation and governance, commerce, taxation and trade. However, because of the limited volume of published cases and judicial interpretation and their non-binding nature, the interpretation and enforcement of these regulations involves significant uncertainties. Given the short history of the PRC system of commercial laws, the PRC regulatory and legal framework may not be as well developed as those of developed countries. Such regulations also empower the CSRC and SAFE to exercise discretion in their respective interpretation of the regulations, which may result in increased uncertainties in their application. In addition, as the PRC legal system develops, no assurance can be given that changes in such laws and regulations, their interpretation or their enforcement will not have a material adverse effect on the relevant Fund's onshore business operations or the ability of the relevant Fund to acquire China A-Shares and/or China onshore bonds.

### **Accounting and Reporting Standards**

PRC companies are required to comply with PRC accounting standards and practices which follow international accounting standards to a certain extent. However, the accounting, auditing and financial reporting standards and practices applicable to PRC companies may be less rigorous, and there may be significant differences between financial statements prepared in accordance with the PRC accounting standards and practice and those prepared in accordance with international accounting standards. For example, there are differences in the valuation methods of properties and assets and in the requirements for disclosure of information to investors.

### **Renminbi Currency and Conversion Risks**

The Renminbi, the lawful currency of the PRC, is not currently a freely convertible currency and is subject to exchange control imposed by the PRC government. Such control of currency conversion and movements in the Renminbi exchange rates may adversely affect the operations and financial results of companies in the PRC. Insofar as the relevant Fund may invest in the PRC, it will be subject to the risk of the PRC government's imposition of restrictions on the repatriation of funds or other assets out of the country, limiting the ability of the relevant Fund to satisfy payments to investors.

Non-Renminbi based investors are exposed to foreign exchange risk and there is no guarantee that the value of Renminbi against the investors' base currencies (for example USD) will not depreciate. Any depreciation of Renminbi could adversely affect the value of investor's investment in the Funds.

The exchange rate used for all relevant Fund transactions in Renminbi is in relation to the offshore Renminbi ("CNH"), not the onshore Renminbi ("CNY"), save for those made via the QFI regime. The value of CNH could differ, perhaps significantly, from that of CNY due to a number of factors including without limitation those foreign exchange control policies and repatriation restrictions applied by the PRC government from time-to-time as well as other external market forces. Any divergence between CNH and CNY may adversely impact investors.

### **Investments in Russia**

For Funds that invest in or are exposed to investment in Russia, potential investors should also consider the following risk warnings which are specific to investing in or exposure to Russia:

- ▶ As a result of Russia's action in Europe, as at the date of this Prospectus Russia has been the subject of economic sanctions imposed by the United States, the European Union and other countries throughout the world. The scope and level of the sanctions may increase and there is a risk that this may adversely affect the Russian economy and result in a decline in the value and liquidity of Russian securities, a devaluation of the Russian currency and/or a downgrade in Russia's credit rating. These sanctions could also lead to Russia taking counter-measures more broadly against Western and other countries. Depending on the form of action which may be taken by Russia and other countries, it could become more difficult for the Funds with exposure to Russia to continue investing in Russia and/or to liquidate Russian investments and expatriate funds out of Russia. Measures taken by the Russian government could include freezing or seizure of Russian assets of European residents which would reduce the value and liquidity of any Russian assets held by the Funds. If any of these events were to occur, the Directors may (at their discretion) take such action as they consider to be in the interests of Shareholders in Funds which have investment exposure to Russia, including (if necessary) suspending trading in the Funds (see section 30, entitled "Suspensions and Deferrals" in Appendix B for more details).
- ▶ The laws relating to securities investments and regulations have been created on an ad-hoc basis and do not tend to keep pace with market developments leading to ambiguities in interpretation and inconsistent and arbitrary application. Monitoring and enforcement of applicable regulations is rudimentary.
- ▶ Rules regulating corporate governance either do not exist or are underdeveloped and offer little protection to minority Shareholders.

These factors may increase the volatility of any such Fund (depending on its degree of investment in Russia) and hence the risk of loss to the value of your investment.

### **Euro and Euro Zone Risk**

The success of the Euro and the Eurozone is dependant on the general economic and political condition of each member state, as well as each state's credit worthiness and the willingness of the members to remain committed to monetary union and support for the other members. Default by any state on its Euro debts or a material decline in the credit rating of any Eurozone state could have a material negative impact on a Fund and its investments. The base currency of a number of the Funds is Euro and/or may

hold Euro denominated assets either directly or as collateral and may experience a reduction of the value and/or liquidity of their investments as a result of events in the Eurozone regardless of the measures the Investment Adviser or Directors may take to reduce this risk.

The Eurozone is subject to risks arising from different trends, including high inflation, rapid monetary policy tightening, geopolitical instability, and an uncertain economic outlook, which could lead to new shocks and asset price corrections.

This situation has raised a number of uncertainties regarding the stability and overall standing of the European Economic and Monetary Union and may result in changes to the composition of the Euro zone. The departure or risk of departure from the Euro by one or more Euro zone countries could lead to the reintroduction of national currencies in one or more Euro zone countries or, in more extreme circumstances, the possible dissolution of the Euro entirely. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Fund's investments, including risk of redenomination from Euro into another currency, possible capital controls and legal uncertainty as to the ability to enforce obligations and debts. Shareholders should carefully consider how changes to the Euro zone and European Union may affect their investment in the Fund.

#### **Fund of funds**

Where a Fund may invest all or substantially all of its assets in CIS, the investment risks applicable to the target funds will apply in addition to the risks applicable to the Fund's direct investments. The investment in CIS may result in an increase of the TER and/or Ongoing Charges, subject to the limit described in Appendix A. A fund of funds may be permitted to invest in other Funds in the Company. Investors should be aware and understand that from time to time, the Investment Adviser may decide to only invest in investment products which are managed by the Management Company or an associate of the Management Company. Such an approach may, from time to time, limit the investment universe from which the Investment Adviser selects the investments of the fund of funds.

#### **Funds Investing in Specific Sectors**

Where investment is made in one or in a limited number of market sectors, Funds may be more volatile than other more diversified Funds. The companies within these sectors may have limited product lines, markets, or financial resources, or may depend on a limited management group.

Such Funds may also be subject to rapid cyclical changes in investor activity and / or the supply of and demand for specific products and services. As a result, a stock market or economic downturn in the relevant specific sector or sectors would have a larger impact on a Fund that concentrates its investments in that sector or sectors than on a more diversified Fund.

There may also be special risk factors associated with individual sectors. For example, the stock prices of companies operating in natural resource related sectors, such as precious and other metals may be expected to follow the market price of the related natural resource, although there is unlikely to be perfect correlation between these two factors. Precious and other metal prices historically have been very volatile, which may adversely affect the financial condition of companies involved with precious and other metals. Also, the sale of precious and other metals by

governments or central banks or other larger holders can be affected by various economic, financial, social and political factors, which may be unpredictable and may have a significant impact on the prices of precious and other metals. Other factors that may affect the prices of precious and other metals and securities related to them include changes in inflation, the outlook for inflation and changes in industrial and commercial supply and demand for such metals. There may also be increased impacts on the value of the investments in these Funds as a result of environmental factors (both physical changes related to climate change and the transition to alternative energy), as well as social and governance factors. Funds with specific sectoral concentrations such as investing in industries or issuers with high carbon intensity or high switching costs associated with the transition to low carbon alternatives, may be more impacted by climate transition risks.

Real estate securities are subject to some of the same risks associated with the direct ownership of real estate including, but not limited to: adverse changes in the conditions of the real estate markets, changes in the general and local economies, obsolescence of properties, changes in availability of real estate stock, vacancy rates, tenant bankruptcies, costs and terms of mortgage financing, costs of operating and improving real estate and the impact of laws affecting real estate (including environmental and planning laws).

However, investing in real estate securities is not equivalent to investing directly in real estate and the performance of real estate securities may be more heavily dependent on the general performance of stock markets than the general performance of the real estate sector. Historically there had been an inverse relationship between interest rates and property values. Rising interest rates can decrease the value of the properties in which a real estate company invests and can also increase related borrowing costs. Either of these events can decrease the value of an investment in real estate companies.

The current taxation regimes for property-invested entities are potentially complex and may change in the future. This may impact either directly or indirectly the returns to investors in a real estate fund and the taxation treatment thereof. There may also be increased impacts on the value of the investments in these Funds as a result of geographical concentration in locations the value of the investments in the Funds may be more susceptible to adverse physical climate events, as well as social and governance factors.

For Funds investing in the technology sector, companies within this sector typically face intense competition which may have an adverse effect on profit margins. The products of technology companies may become less competitive or obsolete due to technological developments and frequent new product innovation in the industry, unpredictable changes in growth rates and competition for qualified and skilled personnel. Companies in this sector tend to be heavily dependent on patent and intellectual property rights and their profitability may be adversely affected by loss or impairment of these rights. Certain technology companies may be reliant on limited product lines, markets, financial resources and/or certain key personnel. Other risk factors may include (but are not limited to) substantial capital requirements, government regulations and taxes. Certain parts of the technology sector may also be adversely affected by competitive demand for commodities and changes in commodity prices which may be unpredictable. Price movements of company stocks within the technology sector may be more volatile than other sectors.

### **Portfolio Concentration Risk**

Certain Funds may invest in a limited number of securities compared to other more diversified Funds holding a larger number of securities. Where a Fund holds a limited number of securities and is considered concentrated, the value of the Fund may fluctuate more than that of a diversified Fund holding a greater number of securities. The selection of securities in a concentrated portfolio may also result in sectoral and geographical concentration.

For Funds with geographical concentration, the value of the Funds may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, sustainability related, legal or regulatory event affecting the relevant market.

### **Turnover Risk**

The US Dollar Bond Fund may have a large exposure to US Treasury bonds. The Investment Adviser supports the liquidity of the Fund by ensuring that it invests in “on the run” Treasury bonds which are those that have recently been issued and are hence most liquid. The Investment Adviser has therefore a policy of rotating the bonds to offer greater liquidity for a lower cost of trading. However, this policy may result in additional transaction costs which will be borne by the Fund and may adversely affect the Fund’s Net Asset Value and the interest of relevant Shareholders.

### **Exposure to Commodities within Exchange Traded Funds**

An Exchange Traded Fund investing in commodities may do so by replicating the performance of a commodities index. The underlying index may concentrate investment on selected commodity futures on multinational markets. This makes the underlying exchange traded fund extremely dependent on the performance of the commodity markets concerned.

### **ESG Investment Policy Risk**

The ESG Funds will use certain ESG criteria in their investment strategies, as determined by the data provided by their respective ESG Providers and as set out in their respective investment policies. Different ESG Funds may use one or more different ESG Providers, and the way in which different ESG Funds will apply ESG criteria may vary.

The use of ESG criteria may affect an ESG Fund’s investment performance and, as such, ESG Funds may perform differently compared to similar funds that do not use such criteria. ESG-based exclusionary criteria used in an ESG Fund’s investment policy may result in the ESG Fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to their ESG characteristics when it might be disadvantageous to do so.

In the event the ESG characteristics of a security held by an ESG Fund change, resulting in the Investment Adviser having to sell the security, neither the ESG Fund, the Company nor the Investment Advisers accept liability in relation to such change.

No investment will be made in contravention of Luxembourg law. Please also see the note on the United Nations Convention on Cluster Munitions, under the heading “Investment Objectives and Policies”, on page 50.

Any website indicated in the investment policy of an ESG Fund includes information on the index methodology published by the relevant ESG Provider and explains which types of issuer or

security are excluded, for example by reference to the sector from which they derive their revenue. Such sectors might include Tobacco, Weapons or Thermal Coal. The relevant exclusions might not correspond directly with investors own subjective ethical views.

ESG Funds will vote proxies in a manner that is consistent with the relevant ESG exclusionary criteria, which may not always be consistent with maximising the short-term performance of the relevant issuer.

In evaluating a security or issuer based on ESG criteria, the Investment Adviser is dependent upon information and data from third party ESG Providers and other data providers, which may be incomplete, inaccurate, inconsistent or unavailable. As a result, there is a risk that the Investment Adviser may incorrectly assess a security or issuer. There is also a risk that the Investment Adviser may not apply the relevant ESG criteria correctly or that an ESG Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near- cash instruments, shares or units of CIS, and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers which may not be consistent with the relevant ESG criteria used by such ESG Fund. Neither the ESG Funds, the Company nor the Investment Advisers make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of such ESG assessment.

### **MSCI ESG Screening Criteria**

Certain ESG Funds will apply ESG criteria as defined by MSCI, an ESG Provider.

The MSCI methodology positively screens and ranks potential constituents according to their ESG credentials relative to their industry peers. No exclusion is made by MSCI on the basis of how ethical a particular industry/sector is perceived to be. Investors should make a personal ethical assessment of MSCI’s ESG rating and/or controversies score and how they will be utilised as part of the relevant Fund’s investment policy prior to investing in such Fund. Such ESG screening may affect, adversely or otherwise, the value and/or quality of the Fund’s investments compared to a fund without such screening.

### **Fixed Maturity Funds**

Fixed Maturity Funds are designed for investors whose Shares will be held until the relevant Fund’s Maturity Date as specified for each Fund under the section “Investment Objectives and Policies of the Funds”. Investors, in particular investors who redeem their Shares prior to the relevant Fund’s Maturity Date, may suffer a loss of capital. Although Fixed Maturity Funds seek to provide income whilst also aiming to preserve capital in accordance with their relevant investment objective, there is no guarantee that either will be achieved. The Fixed Maturity Funds’ capital is at risk.

The nature of the Fixed Maturity Funds’ investment objectives and policies means that the risk profile of the Funds may vary over time. At any time, the Fixed Maturity Funds may be invested and/or exposed to the various risks inherent in a portfolio of corporate and sovereign bonds. As these securities mature and as the Maturity Date approaches, the nature of the risks associated with the portfolio may change. The Fixed Maturity Funds’ risk profile may therefore change significantly between the applicable launch date,

the time when it is fully invested in the relevant target assets and as they approach the Maturity Date.

Whilst aiming to provide income and to preserve capital in accordance with its investment objective, the Fixed Maturity Funds offer no such guarantee that either will be achieved and investors may suffer a loss of capital. In scenarios where investors wish to redeem their Shares prior to the relevant Fund's Maturity Date the loss of capital may be greater. Fixed Maturity Funds may also see an enhanced risk to early closure if insufficient capital is raised during the applicable Initial Offer Period and Pre-Investment Period or in the case that investors representing significant proportions of the relevant Fund wish to redeem their Shares prior to the Fund's Maturity Date. Given the changing nature of the assets held during the relevant Pre Investment Period, Ramp Up Period, Investment Period and Post Investment Period, as outlined in each Fund's investment objective and policy, the risks incurred by investors will differ during each period. As a result, investors should refer to the applicable instrument type risks in the general risk section.

The nature of the Sub-Fund's investment objective and policy means that the risk profile of the Fund may vary over time. At any time, the Fund may be invested and/or exposed to the various risks inherent in a portfolio of investment grade and sub-investment grade emerging market fixed income transferable securities. As these securities mature and as the Maturity Date approaches, the nature of the risks associated with the portfolio may change. The Sub-Fund's risk profile may therefore change significantly between its Launch Date, the time when it is fully invested in fixed income securities and as it approaches the Maturity Date.

#### **Risk of non-compliance with Shariah**

The Investment Adviser will undertake the investment activities of a Shari'ah Fund in accordance with the principles of Shari'ah in accordance with the methodology used by the Index provider as further detailed in section "Investments in a Shari'ah Fund" of the Appendix A and subject to the annual screening of investments by the Shari'ah Panel. These requirements may lead to investments being assessed or reclassified as non-compliant with Shari'ah. The reclassification of an investment as non-compliant with Shari'ah may be due to factors outside of the control of a Shari'ah Fund, the Investment Adviser, the Index provider and the Shari'ah Panel, such as new interpretations or regulations as to the eligibility of certain instruments. In the event the Investment Adviser is required to rectify any Shari'ah non-compliance by disposing of the relevant investments, a Shari'ah Fund may bear losses from the disposal. In the event of gains or profits received from the disposal of non-Shari'ah compliant investments, such amount is intended to be donated to approved charities for purification purposes, as further detailed in section "Purification of non-Shari'ah compliant Income".

#### **Specific Risks related to Funds that directly invest into listed shares on the Saudi Stock Exchange**

##### **Saudi Qualified Foreign Investor Regime – General Risks**

The Rules for Foreign Investment in Securities were introduced in 2023. Accordingly, the application and interpretation of such investment regulations are therefore untested and in certain material respects, there remains a lack of clarity and certainty as to how they will be applied by the regulator and/or interpreted by Saudi Qualified Foreign Investors. It is not possible to predict the future development of the Saudi Qualified Foreign Investor regime. Any change in the Saudi Qualified Foreign Investor regime generally, including the possibility of the Investment Adviser losing

its Saudi Qualified Foreign Investor status, may affect the relevant Fund's ability to invest in shares listed on the Saudi Stock Exchange through the Investment Adviser.

##### **Saudi Qualified Foreign Investor Regime – Foreign Ownership Limits**

The relevant Fund's investment in Saudi shares is dependent on the Investment Adviser being able to buy and sell shares listed on the Saudi Stock Exchange. The ability of the Investment Adviser to trade in Saudi listed shares is dependent on none of the prescribed foreign ownership limits being exceeded. The Saudi Qualified Foreign Investor Rules and Saudi Capital Markets Law prescribe certain foreign investment ownership limits on Saudi Qualified Foreign Investors (e.g. a Fund) and their affiliates, which take the form of various maximum ownership thresholds. For example, one of the key threshold limits is an aggregate total cap (at 49%) on foreign ownership of Saudi listed shares, which applies not just to Saudi Qualified Foreign Investors, but all other categories of foreign investors as well (e.g. foreigners resident in Saudi Arabia; investors holding interests in Saudi listed shares via swap contracts or participation notes; and non-resident foreign shareholders who owned stakes in companies prior to their listings). The CMA provides ongoing information relating to these thresholds on their website (<http://www.cma.orgsa>) in order to assist Saudi Qualified Foreign Investors and other market participants in complying with such limits. The Investment Adviser has the flexibility to invest in Saudi listed shares on behalf of more than one Saudi Qualified Foreign Investor. Therefore, it may invest in shares on behalf of multiple funds under its management which are Saudi Qualified Foreign Investors from time to time, all of which would count towards the foreign ownership thresholds. In the event that a relevant foreign ownership limit is reached or exceeded, it could result in the relevant Fund not being able to acquire additional KSA listed shares. Moreover, as approved Saudi Qualified Foreign Investors are not permitted under the current Rules for Foreign Investment in Securities to also be the ultimate beneficial owners of Saudi-listed securities underlying derivatives (e.g. swaps or participation notes) traded through the Saudi swap framework, it will not be possible, in such circumstances, for the relevant Fund as a Saudi Qualified Foreign Investor to take indirect/synthetic exposure (e.g. via swaps or participation notes) to Saudi listed shares in addition to its physical/direct holdings. This may ultimately result in (i) the relevant Fund not being able to accept any further subscriptions for Shares and its Shares trading at a significant premium or discount to their net asset value on a stock exchange on which they are admitted to trading; and (ii) a negative or positive performance impact to the relevant Fund and, by extension, its Shareholders, as compared to the Index.

The ability of the Investment Adviser to trade in Saudi listed shares is also dependent on the ability of the Investment Adviser and relevant Fund to maintain its Saudi Qualified Foreign Investors status. Certain approved Saudi Qualified Foreign Investors may apply, via a third party assessing authorised person (mandated as such by the CMA pursuant to the Saudi Qualified Foreign Investors Rules), to the CMA for approval as a Saudi Qualified Foreign Investors. Only once an investment fund is approved by the CMA as a Saudi Qualified Foreign Investors under the Saudi Qualified Foreign Investors Rules can it, via its investment Adviser, invest in Saudi listed shares on the Saudi Stock Exchange. To the extent that the Investment Adviser and/or the relevant Fund loses its Saudi Qualified Foreign Investors status or laws and regulations change such that the Saudi Qualified Foreign Investors regime is no longer available to the Investment Adviser and/or the relevant

Fund, it will be more difficult for the relevant Fund to achieve its investment objective. In such an event, the relevant Fund may use techniques to invest in securities or other instruments that are not constituents of the Index, but which provide a similar exposure to the return of the Index. These instruments may include offshore futures, other exchange-traded funds that would provide a similar exposure or unfunded swap agreements, which are agreements whereby a counterparty agrees to provide the relevant Fund with the returns of a specific exposure, i.e. the Index, in return for a fee. The CMA may introduce further limitations or restrictions on the foreign ownership of securities in the KSA, which may have adverse effects on the liquidity and the performance of the relevant Fund. Such limitations and restrictions may restrict the relevant Fund's ability to pursue its investment objective and policy.

#### **Legal System of the KSA**

The KSA legal system primarily is based on Shari'ah law with codified laws and regulations that are predominantly interpreted in accordance with Islamic principles. Prior court decisions may be cited for reference but do not have precedent value. Because of the lack of volume of published cases and judicial interpretation and the fact that, in any event, the outcome of previously determined cases would not be binding in nature, the interpretation and enforcement of applicable Saudi laws and regulations involves significant uncertainties. In addition, as the KSA legal system, and the Saudi Qualified Foreign Investor regime in particular, develops, no assurance can be given that changes in such laws and regulations, their interpretation or their enforcement will not have a material adverse effect on the relevant Fund's operations or the ability of the relevant Fund to acquire Saudi listed shares.

#### **Potential Market Volatility Risk**

Investors should note that the Saudi Stock Exchange is admitting foreign investors, pursuant to the regime established by the Rules for Foreign Investment in Securities, for the first time. Market volatility may result in significant fluctuation in the prices of securities traded on the Saudi Stock Exchange, which would therefore impact upon the Net Asset Value of the relevant Fund.

#### **Commodity Risk**

The relevant Fund may invest in Saudi Arabian issuers that are susceptible to fluctuations in certain commodity markets. Any negative changes in commodity markets that may be due to changes in supply and demand for commodities, market events, regulatory developments or other factors that the Fund cannot control could have an adverse impact on those companies.

#### **Nationalisation Risk**

Investments in Saudi Arabia may be subject to loss due to expropriation or nationalisation of assets and property or the imposition of restrictions on foreign investments and repatriation of capital.

#### **Specific Risks Applicable to QFI Investing**

**Please refer to the section entitled "QFI Investments" in the "Investment Objectives and Policies" section for an overview of the QFI Scheme.**

The QFI Access Funds may invest directly in the PRC by investing in China A-Shares and/or China onshore bonds (as relevant) via the QFI status of BAMNA or an affiliate in the BlackRock Group who is a QFI Licence Holder.

In addition to the risks set out under "Investments in the PRC" and other risks applicable to the QFI Access Funds the following additional risks apply:

#### **QFI Risk**

The application and interpretation of the regulations which regulate investments through QFI regime in the PRC are relatively untested and there is no certainty as to how they will be applied as the PRC authorities and regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. It is not possible to predict the future development of the QFI system. Any restrictions on repatriation imposed in respect of the relevant QFI Access Fund's QFI investments may have an adverse effect on the QFI Access Fund's ability to meet redemption requests. Any change in the QFI system generally, including the possibility of the QFI losing its QFI status, may affect the relevant QFI Access Fund's ability to invest in eligible securities in the PRC directly through the relevant QFI. In addition, should the QFI status be suspended or revoked, the relevant QFI Access Fund's performance may be adversely affected as the relevant QFI Access Fund may be required to dispose of its QFI eligible securities holdings. The applicable laws, rules and regulations on QFI are subject to change and such change may have potential retrospective effects.

#### **QFI Investment Restrictions Risk**

Although the QFI does not anticipate that QFI investment restrictions will impact on the ability of the QFI Access Funds to achieve their investment objectives, investors should note that the relevant PRC laws and regulations may limit the ability of a QFI to acquire China A-Shares in certain PRC issuers from time to time. This may occur in a number of circumstances, such as (i) where an underlying foreign investor such as the QFI holds in aggregate 10% of the total share capital of a listed PRC issuer (regardless of the fact that the QFI may hold its interest on behalf of a number of different ultimate clients), and (ii) where the aggregated holdings in China A-Shares by all underlying foreign investors (including other QFIs and QFIs and whether or not connected in any way to the QFI Access Funds) already equal 30% of the total share capital of a listed PRC issuer. In the event that these limits are exceeded the relevant QFIs will be required to dispose of the China A-Shares in order to comply with the relevant requirements and, in respect of (ii), each QFI will dispose of the relevant China A-Shares on a "last in first out" basis. Such disposal will affect the capacity of the relevant QFI Access Fund in making investments in China A-Shares through the QFI.

#### **Suspensions, Limits and other Disruptions affecting Trading of China A-Shares**

Liquidity for China A-Shares will be impacted by any temporary or permanent suspensions of particular stocks imposed from time to time by the Shanghai and/or Shenzhen stock exchanges or pursuant to any regulatory or governmental intervention with respect to particular investments or the markets generally. Any such suspension or corporate action may make it impossible for the relevant QFI Access Fund to acquire or liquidate positions in the relevant stocks as part of the general management and periodic adjustment of the QFI Access Fund's investments through the QFI or to meet redemption requests. Such circumstances may also make it difficult for the Net Asset Value of the QFI Access Fund to be determined and may expose the QFI Access Fund to losses.

In order to mitigate the effects of extreme volatility in the market price of China A-Shares, the Shanghai and Shenzhen stock exchanges currently limit the amount of fluctuation permitted in the prices of China A-Shares during a single trading day. The daily limit is currently set at 10% and represents the maximum amount that the price of a security (during the current trading session) may vary either up or down from the previous day's settlement price. The daily limit governs only price movements and does not restrict trading within the relevant limit. However, the limit does not limit potential losses because the limit may work to prevent a liquidation of any relevant securities at the fair or probable realisation value for such securities which means that the relevant QFI Access Fund may be unable to dispose of unfavourable positions. There can be no assurance that a liquid market on an exchange would exist for any particular China A- Share or for any particular time.

#### **Counterparty Risk to the QFI Custodian and other Depositories for PRC assets**

Any assets acquired through the QFI regime will be maintained by the QFI Custodian pursuant to the PRC regulations, in electronic form via the QFI securities account(s) and any cash will be held in Renminbi cash account(s) (as defined under the section "QFI Investments") with the QFI Custodian. QFI securities account(s) and Renminbi cash account(s) for the relevant QFI Access Fund in the PRC are maintained in accordance with market practice. Whilst the assets held in such accounts are segregated and held separately from the assets of the QFI and belong solely to the relevant QFI Access Fund, it is possible that the judicial and regulatory authorities in the PRC may interpret this position differently in the future. The relevant QFI Access Fund may also incur losses due to the acts or omissions of the QFI Custodian in the execution or settlement of any transaction or in the transfer of any funds or securities.

Cash held by the QFI Custodian in the Renminbi cash account(s) will not be segregated in practice but will be a debt owing from the QFI Custodian to the relevant QFI Access Fund as a depositor. Such cash will be co-mingled with cash belonging to other clients of the QFI Custodian. In the event of insolvency of the QFI Custodian, the relevant QFI Access Fund will not have any proprietary rights to the cash deposited in the cash account opened with the QFI Custodian, and the QFI Access Fund will become an unsecured creditor, ranking *pari passu* with all other unsecured creditors, of the QFI Custodian. The QFI Access Fund may face difficulties and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the relevant QFI Access Fund will lose some or all of its cash.

#### **Counterparty Risk to PRC broker(s)**

The QFI selects brokers in the PRC ("PRC Broker(s)") to execute transactions for the relevant QFI Access Fund in markets in the PRC. There is a possibility that the QFI may only appoint one PRC Broker for each of the SZSE and the SSE, which may be the same broker. While up to three PRC Brokers can be appointed for each of the Shenzhen and Shanghai stock exchanges, as a matter of practice, it is likely that that only one PRC Broker will be appointed in respect of each stock exchange in the PRC as a result of the requirement in the PRC that securities are sold through the same PRC Broker through which they were originally purchased.

If, for any reason, the QFI is unable to use the relevant broker in the PRC, the operation of the relevant QFI Access Fund may be adversely affected. The QFI Access Fund may also incur losses due to the acts or omissions of any of the PRC Broker(s) in the

execution or settlement of any transaction or in the transfer of any funds or securities.

If a single PRC Broker is appointed, the relevant QFI Access Fund may not pay the lowest commission available in the market. However, the QFI shall, in the selection of PRC Brokers, have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards.

There is a risk that the relevant QFI Access Fund may suffer losses from the default, insolvency or disqualification of a PRC Broker. In such event, the relevant QFI Access Fund may be adversely affected in the execution of transactions through such PRC Broker. As a result, the Net Asset Value of the relevant QFI Access Fund may also be adversely affected. To mitigate the Company's exposure to the PRC Broker(s), the QFI employs specific procedures to ensure that each PRC Broker selected is a reputable institution and that the credit risk is acceptable to the Company.

#### **Remittance and Repatriation of Renminbi**

Repatriations of Renminbi by QFIs are currently not subject to any lock-up periods or prior regulatory approval; although authenticity and compliance reviews will be conducted and monthly reports on remittances and repatriations will be submitted to SAFE by the QFI Custodian. The repatriation process may be subject to certain requirements set out in the relevant regulations (e.g. submission of certain documents when repatriating the realised cumulative profits). Completion of the repatriation process may be subject to delay. There is no assurance that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Further, such changes to the PRC rules and regulations may be applied retroactively. Any restrictions on repatriation imposed in respect of the relevant QFI Access Fund's cash may have an adverse effect on the QFI Access Fund's ability to meet redemption requests.

Furthermore, as the QFI Custodian's review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the QFI Custodian in case of non-compliance with the QFI rules and regulations. In such case, it is expected that redemption proceeds will be paid to the redeeming Shareholder as soon as practicable and after the completion of the repatriation of funds concerned. The actual time required for the completion of the relevant repatriation will be beyond the QFI's control.

#### **Specific Risks Applicable to investing via the Stock Connects**

**Please refer to the section entitled "Stock Connects" in the "Investment Objectives and Policies" section for an overview of the Stock Connects.**

The Stock Connect Funds may invest in China A-Shares via the Stock Connects. In addition to risks regarding "Investments in the PRC" and other risks applicable to the Stock Connect Funds the following additional risks apply:

#### **Quota Limitations**

The Stock Connects are subject to quota limitations, further details of which are set out in the "Investment Objectives and Policies" section below. In particular, once the daily quota is exceeded, buy orders will be rejected (although investors will be permitted to sell their cross-boundary securities regardless of the quota balance).

Therefore, quota limitations may restrict the relevant Stock Connect Fund's ability to invest in the eligible securities through the Stock Connect on a timely basis, and the relevant Stock Connect Fund may not be able to effectively pursue its investment strategy.

## Legal / Beneficial Ownership

The SSE Securities and SZSE Securities each as defined under "Stock Connects" in the "Investment Objectives and Policies" section in respect of the Stock Connect Funds are held by the Depositary/ sub-custodian in accounts in the Hong Kong Central Clearing and Settlement System ("CCASS") maintained by the HKSCC as central securities depository in Hong Kong. HKSCC in turn holds the SSE Securities and SZSE Securities, as the nominee holder, through an omnibus securities account in its name registered with ChinaClear for each of the Stock Connects. The precise nature and rights of the Stock Connect Funds as the beneficial owners of the SSE Securities and SZSE Securities through HKSCC as nominee is not well defined under PRC law. There is lack of a clear definition of, and distinction between, "legal ownership" and "beneficial ownership" under PRC law and there have been few cases involving a nominee account structure in the PRC courts. Therefore the exact nature and methods of enforcement of the rights and interests of the Stock Connect Funds under PRC law is uncertain. Because of this uncertainty, in the unlikely event that HKSCC becomes subject to winding up proceedings in Hong Kong it is not clear if the SSE Securities and SZSE Securities will be regarded as held for the beneficial ownership of the Stock Connect Funds or as part of the general assets of HKSCC available for general distribution to its creditors.

For completeness, the CSRC has provided information titled "FAQ on Beneficial Ownership under SH-HK Stock Connect" dated 15 May 2015 in relation to beneficial ownership – the relevant sections from this FAQ have been extracted and reproduced below:

### ***Do overseas investors enjoy proprietary rights in the SSE Securities acquired through the Northbound Trading Link as Shareholders? Are the concepts of "nominee holder" and "beneficial owner" recognized under Mainland law?***

*Article 18 of the Administrative Measures for Registration and Settlement of Securities (the "Settlement Measures") states that "securities shall be recorded in the accounts of the securities holders, unless laws, administrative regulations or CSRC rules prescribe that the securities shall be recorded in accounts opened in the name of nominee holders". Hence, the Settlement Measures expressly provides for the concept of nominee shareholding. Article 13 of the Certain Provisions on Shanghai-Hong Kong Stock Connect Pilot Program (the "CSRC Stock Connect Rules") states that shares acquired by investors through the Northbound Trading Link shall be registered in the name of HKSCC and that "investors are legally entitled to the rights and benefits of shares acquired through the Northbound Trading Link". Accordingly, the CSRC Stock Connect Rules have expressly stipulated that, in Northbound trading, overseas investors shall hold SSE Securities through HKSCC and are entitled to proprietary interests in such securities as shareholders.*

### ***How do overseas investors bring legal action in the Mainland to realise their rights over the SSE Securities acquired through the Northbound Trading Link?***

*Mainland law does not expressly provide for a beneficial owner under the nominee holding structure to bring legal proceedings, nor does it prohibit a beneficial owner from doing so. As we understand, HKSCC, as the nominee holder of the SSE Securities in Northbound Trading Link, may exercise shareholder rights and take legal actions on behalf of overseas investors. In addition, Article 119 of the Civil Procedure Law of the People's Republic of China states that "the claimant in a legal action shall be an individual, legal person or any other organization that has a direct interest in the relevant case". As long as an overseas investor can provide evidential proof of direct interest as a beneficial owner, the investor may take legal actions in its own name in Mainland courts.*

## Clearing and Settlement Risk

HKSCC and ChinaClear have established the clearing links and each has become a participant of the other to facilitate clearing and settlement of cross-boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

As the national central counterparty of the PRC's securities market, ChinaClear operates a comprehensive network of clearing, settlement and stock holding infrastructure. ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. The chances of ChinaClear default are considered to be remote. In the remote event of a ChinaClear default, HKSCC's liabilities in Northbound trades under its market contracts with clearing participants will be limited to assisting clearing participants in pursuing their claims against ChinaClear. HKSCC should in good faith, seek recovery of the outstanding securities and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In that event, the relevant Stock Connect Fund may suffer delay in the recovery process or may not fully recover its losses from ChinaClear.

## Suspension Risk

Each of the SEHK, SSE and SZSE reserves the right to suspend trading if necessary for ensuring an orderly and fair market and that risks are managed prudently. Consent from the relevant regulator would be sought before a suspension is triggered. Where a suspension is effected, the relevant Stock Connect Fund's ability to access the PRC market will be adversely affected.

## Differences in Trading Day

The Stock Connects only operate on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the PRC market but the Stock Connect Funds cannot carry out any China A-Shares trading via the Stock Connects. The Stock Connect Funds may be subject to a risk of price fluctuations in China A-Shares during the time when any of the Stock Connects is not trading as a result.

## Restrictions on Selling Imposed by Front-end Monitoring

PRC regulations require that before an investor sells any share, there should be sufficient shares in the account; otherwise the SSE or SZSE will reject the sell order concerned. SEHK will carry out

pre-trade checking on China A-Share sell orders of its participants (i.e. the stock brokers) to ensure there is no over-selling.

If a Stock Connect Fund intends to sell certain China A-Shares it holds, it must transfer those China A-Shares to the respective accounts of its broker(s) before the market opens on the day of selling ("trading day"). If it fails to meet this deadline, it will not be able to sell those shares on the trading day. Because of this requirement, a Stock Connect Fund may not be able to dispose of its holdings of China A-Shares in a timely manner.

Alternatively, if a Stock Connect Fund maintains its SSE Securities and/or SZSE Securities with a custodian which is a custodian participant or general clearing participant participating in the CCASS, the Stock Connect Fund may request such custodian to open a special segregated account ("SPSA") in CCASS to maintain its holdings in SSE Securities and/or SZSE Securities (as the case may be) under the enhanced pre-trade checking model. Each SPSA will be assigned a unique "Investor ID" by CCASS for the purpose of facilitating the Stock Connects system to verify the holdings of an investor such as the Stock Connect Fund. Provided that there is sufficient holding in the SPSA when a broker inputs the Stock Connect Fund's sell order, the relevant Stock Connect Fund will only need to transfer SSE Securities and/or SZSE Securities from its SPSA to its broker's account after execution and not before placing the sell order and the relevant Stock Connect Fund will not be subject to the risk of being unable to dispose of its holdings of SSE Securities and/or SZSE Securities in a timely manner due to failure to transfer SSE Securities and/or SZSE Securities to its brokers in a timely manner.

To the extent a Stock Connect Fund is unable to utilize the SPSA model, it would have to deliver SSE Securities and/or SZSE Securities to its brokers before the market opens on the trading day. Accordingly, if there are insufficient SSE Securities and/or SZSE Securities in the Stock Connect Fund's account before the market opens on the trading day, the sell order will be rejected, which may adversely impact its performance.

#### **Settlement Mode under the SPSA model**

Under the normal Delivery Versus Payment (DVP) settlement mode, stock and cash settlement will take place on T+0 between clearing participants (i.e. brokers and custodian or a custodian participant) with a maximum window of four hours between stocks and cash movement. This applies to settlement in CNH only and on the condition that the brokers support same-day Chinese renminbi cash finality. Under the Real time Delivery Versus Payment (RDVP) settlement mode introduced in November, 2017, stock and cash movement will take place real time but the use of RDVP is not mandatory. The clearing participants must agree to settle the transaction RDVP and indicate RDVP on the settlement instruction in a specific field. If either of the clearing participants are unable to settle the trades RDVP, there is a risk that the trades could either fail or revert to normal DVP based on amendment from both parties. If the trades are to revert to normal DVP, an amended instruction from the Stock Connect Fund must be provided before the published cut-off and matched with the broker's amended instruction before the market cut off; in the absence of such amended instructions, there is a risk the trades could fail and therefore may impact on the ability of the relevant Stock Connect Fund to track closely the performance of its Benchmark Index.

#### **Operational Risk**

The Stock Connects are premised on the functioning of the operational systems of the relevant market participants. Market participants are permitted to participate in this program subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house.

The securities regimes and legal systems of the two markets differ significantly and market participants may need to address issues arising from the differences on an on-going basis. There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading in both markets through the program could be disrupted. The relevant Stock Connect Fund's ability to access the PRC market (and hence to pursue its investment strategy) may be adversely affected.

#### **Regulatory Risk**

The Stock Connect is a novel concept. Because the Stock Connect rules are relatively recent, their interpretation and enforcement may involve significant uncertainty. In addition, the current regulations are subject to change which may have potential retrospective effects and there can be no assurance that the Stock Connect will not be abolished. New regulations may be issued from time to time by the regulators / stock exchanges in the PRC and Hong Kong in connection with operations, legal enforcement and cross-border trades under the Stock Connect. Stock Connect Funds may be adversely affected as a result of such changes.

Chinese companies, such as those in the financial services or technology sectors, and potentially other sectors in the future, are also subject to the risk that Chinese authorities can intervene in their operations and structure, which may negatively affect the value of a Fund's investments.

#### **Recalling of Eligible Securities**

When a security is recalled from the scope of eligible stocks for trading via the Stock Connect, the stock can only be sold but restricted from being bought. This may affect the investment portfolio or strategies of the relevant Stock Connect Funds, for example, if the Investment Adviser wishes to purchase a stock which is recalled from the scope of eligible stocks.

Specific risks associated with China Interbank Bond Market

**Please refer to the section entitled "China Interbank Bond Market" in the "Investment Objectives and Policies" section for an overview of the China Interbank Bond Market.**

**The CIBM Funds may gain direct exposure to China onshore bonds in the China Interbank Bond Market via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.**

In addition to risks regarding "Investments in the PRC" and other risks applicable to the CIBM Funds, the following additional risks apply:

#### **Volatility and Liquidity Risk**

Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on

such market fluctuating significantly. The relevant CIBM Fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the relevant Fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments. The debt securities traded in the China Interbank Bond Market may be difficult or impossible to sell, and this would affect the relevant CIBM Fund's ability to acquire or dispose of such securities at their intrinsic value.

### **Risk of Default of Agents**

For investments via the Foreign Access Regime and/or Bond Connect, the relevant filings, registration with PBOC and account opening have to be carried out via an onshore settlement agent, offshore custody agent, registration agent or other third parties (as the case may be). As such, the relevant Fund is subject to the risks of default or errors on the part of such third parties.

### **Regulatory Risks**

Investing in the China Interbank Bond Market via the Foreign Access Regime and/or Bond Connect is also subject to regulatory risks. The relevant rules and regulations on these regimes are subject to change which may have potential retrospective effect. In the event that the relevant Mainland Chinese authorities suspend account opening or trading on the China Interbank Bond Market, the relevant CIBM Fund's ability to invest in the China Interbank Bond Market will be adversely affected and limited. In such event, the relevant CIBM Fund's ability to achieve its investment objective will be negatively affected and, after exhausting other trading alternatives, the relevant CIBM Fund may suffer substantial losses as a result.

### **System Failure Risks for Bond Connect**

Trading through Bond Connect is performed through newly developed trading platforms and operational systems. There is no assurance that such systems will function properly or will continue to be adapted to changes and developments in the market. In the event that the relevant systems fails to function properly, trading through Bond Connect may be disrupted. The relevant CIBM Fund's ability to trade through Bond Connect (and hence to pursue its investment strategy) may therefore be adversely affected. In addition, where the relevant CIBM Fund invests in the China Interbank Bond Market through Bond Connect, it may be subject to risks of delays inherent in the order placing and/or settlement systems.

### **Taxation Risks**

On 22 November 2018, the Ministry of Finance and State Administration of Taxation jointly issued Circular 108 providing foreign Institutional Investors temporary exemption from PRC withholding income tax and Value Added Tax with respect to interests from non-government bonds in the domestic bond market for the period from 7 November 2018 to 6 November 2021.

Circular 108 is silent on the PRC tax treatment with respect to non-government bond interest derived prior to 7 November 2018. Any changes in PRC tax law, future clarifications thereof, and/or subsequent retroactive enforcement by the PRC tax authorities of any tax may result in a material loss to the relevant Funds.

The Management Company will keep the provisioning policy for tax liability under review, and may, in its discretion from time to time, make a provision for potential tax liabilities, if in their opinion

such provision is warranted, or as further clarified by the PRC authorities in notifications.

For further details on PRC taxes and associated risks, please refer to the risk factor headed "Tax Considerations" under the "Risk Considerations" section.

### **Excessive Trading Policy**

The Funds do not knowingly allow investments that are associated with excessive trading practices, as such practices may adversely affect the interests of all Shareholders. Excessive trading includes individuals or groups of individuals whose securities transactions seem to follow a timing pattern or are characterised by excessively frequent or large trades.

Investors should, however, be aware that the Funds may be utilised by certain investors for asset allocation purposes or by structured product providers, which may require the periodic re-allocation of assets between Funds. This activity will not normally be classed as excessive trading unless the activity becomes, in the opinion of the Directors, too frequent or appears to follow a timing pattern.

As well as the general power of Directors to refuse subscriptions or conversions at their discretion, powers exist in other sections of this Prospectus to ensure that Shareholder interests are protected against excessive trading. These include:

- ▶ fair value pricing – Appendix B paragraph 16.;
- ▶ price swinging – Appendix B paragraph 17.3;
- ▶ in specie redemptions – Appendix B paragraphs 24.-25.; and
- ▶ conversion charges – Appendix B paragraphs 20.-22..

In addition, where excessive trading is suspected, the Funds may:

- ▶ combine Shares that are under common ownership or control for the purposes of ascertaining whether an individual or a group of individuals can be deemed to be involved in excessive trading practices. Accordingly, the Directors reserve the right to reject any application for switching and/or subscription of Shares from investors whom they consider to be excessive traders;
- ▶ adjust the Net Asset Value per Share to reflect more accurately the fair value of the Funds' investments at the point of valuation. This will only take place if the Directors believe that movements in the market price of underlying securities mean that in their opinion, the interests of all Shareholders will be met by a fair price valuation; and
- ▶ levy a redemption charge of up to a maximum of 2% on the redemption proceeds to Shareholders whom the Directors, in their reasonable opinion, suspect of excessive trading. This charge will be made for the benefit of the Funds, and affected Shareholders will be notified in their contract notes if such a fee has been charged.

### **Investment Objectives and Policies**

**Investors must read the Specific Risk Considerations section above before investing in any of the following Funds. There**

**can be no assurance that the objectives of each Fund will be achieved.**

#### **General**

Each Fund is managed separately and in accordance with the investment and borrowing restrictions specified in Appendix A.

The specific investment objectives and policies of each Fund will be formulated by the Directors at the time of the creation of the Fund. Each Fund's investments will be in accordance with the permitted investments which are described in more detail in Appendix A.

References to "above average income" mean above the average return on an appropriate total return benchmark.

At the discretion of the Investment Adviser, the Funds will employ investment management techniques, including the use of financial derivative instruments and certain currency strategies not only for the purpose of hedging or risk management but also in order to increase total return. The Funds may use derivatives for investment purposes or efficient portfolio management in accordance with their respective investment objective and policies.

Derivative investments may include futures, options, forward contracts on financial instruments and options on such contracts, mortgage TBAs and swap contracts (including credit default swaps and total return swaps) by private agreement and other fixed interest, equity and credit derivatives. Appendix G specifies, for each Fund, the maximum and expected proportion of the Net Asset Value that can be subject to total return swaps. The expected proportion is not a limit and the actual percentage may vary over time depending on factors including, but not limited to, market conditions.

At the discretion of the Investment Adviser, the Funds will use securities financing transactions to help meet the investment objective of a Fund and/or as part of efficient portfolio management. For further detail please refer to Appendix G.

The Funds may also invest in units in CIS and in other transferable securities. For the purpose of these investment objectives and policies all references to "transferable securities" shall include "money market instruments and both fixed and floating rate instruments" but not, for the avoidance of doubt, vice versa.

Certain investment strategies and or certain Funds may become "capacity constrained". This means that the Directors may determine to restrict the purchase of Shares in a Fund affected by such a constraint when it is in the interests of such Fund and/or its Shareholders to do so, including without limitation (by way of example) when a Fund or the investment strategy of a Fund reaches a size that, in the opinion of the Management Company and/or Investment Adviser, could impact its ability to find suitable investments for the Fund or efficiently manage its existing investments. Refer to the section entitled "Dealing in Fund Shares" for further details.

Unless defined otherwise in the individual investment policies of the Funds, the following definitions, investment rules and restrictions apply to all Funds of the Company:

- ▶ Where an individual investment policy of a Fund refers to 70% of its total assets being invested in a specific type or range of

investments, the remaining 30% of the total assets may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally, unless the individual investment policy of such Fund contains further restrictions. However, in the case of a Bond Fund, no more than 10% of its total assets will be invested in equities.

#### **Investment in non-investment grade sovereign debt**

- ▶ As set out in their investment policies, some of the Funds may invest in a broad range of securities, including fixed income transferable securities, also known as debt securities, issued by governments and agencies worldwide. These Funds may seek to achieve capital appreciation and/or income from the portfolio of assets which the Funds hold. From time to time, in order to achieve these objectives, these Funds may invest more than 10% of their Net Asset Value in non-investment grade debt securities issued by governments and agencies of any single country.

Non-investment grade, also known as "high-yield", debt may carry a greater risk of default than higher rated debt securities. In addition, non-investment grade securities tend to be more volatile than higher rated debt securities, so that adverse economic events may have a greater impact on the prices of non-investment grade debt securities than on higher rated debt securities. Further, an issuer's ability to service its debt obligations may be adversely affected by specific issuer developments, for example, an economic recession may adversely affect an issuer's financial condition and the market value of high yield debt securities issued by such entity.

Where Funds invest more than 10% of their Net Asset Value in debt securities issued by governments or agencies of any single country, they may be more adversely affected by the performance of those securities and will be more susceptible to any single economic, market, political or regulatory occurrence affecting that particular country or region.

For further information on the risks associated with Funds which may invest in emerging markets, sovereign debt, high yield securities, bonds and any other risks, investors should refer to the "General Risks" and "Specific Risks" sections of this Prospectus.

It is anticipated that the following Funds, as set out in the table below, may invest more than 10% of their Net Asset Value in debt securities issued and/or guaranteed by governments in each of the relevant countries listed below which, at the date of this Prospectus, are rated non-investment grade. Investors should note that whilst this table sets out the expected maximum exposure to these countries, these figures are not indicative of the Funds' current holdings in these countries which may fluctuate.

The Emerging Markets Corporate Bond Advanced Fund, ESG Emerging Markets Blended Bond Fund, ESG Emerging Markets Bond Fund and ESG Emerging Markets Local Currency Bond Fund each invest at least 70% of their respective total assets in fixed income transferable securities within the relevant J.P. Morgan LLC ("J.P. Morgan") Index, as more fully described in the investment objective and policy for these Funds. In relation to each of these Funds:

Note that only the relevant excerpt of the relevant Funds' investment objective and policy are set out below, for a full statement of investment objectives and policies please refer to page 50 onwards.

#### Emerging Markets Corporate Bond Advanced Fund

The objective of the Fund is to gain exposure to debt securities issued by companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, but also permits exposure to debt securities issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Argentina, Brazil, Hungary, Indonesia, Mexico, the Philippines, Russia, Republic of South Africa, Turkey and Ukraine only.**

The Fund is expected to invest more than 10% (but no more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the Fund's benchmark, the J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposure may change over time.

The above countries are for reference only and may change without prior notice to the Shareholders.

#### Emerging Markets Bond Fund

The objective of the Fund is to gain exposure to debt securities issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Argentina, Brazil, Ghana, Indonesia, Lebanon, Mexico, the Philippines, Russia, Sri Lanka, Turkey, Ukraine, Venezuela and Zambia only.**

The Fund may invest more than 10% (but no more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the Fund's benchmark, the JP Morgan Emerging Markets Bond Index Global Diversified Index (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The above countries are for reference only and may change without prior notice to the Shareholders.

#### Emerging Markets Local Currency Bond Fund

The objective of the Fund is to gain exposure to debt securities issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey only.**

The Fund is expected to invest more than 10% (but no more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the Fund's benchmark, the JP Morgan GBI-EM Global Diversified Index (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposure may change over time. The above countries are for reference only and may change without prior notice to the Shareholders.

#### ESG Emerging Markets Blended Bond Fund

The objective of the Fund is to gain exposure to debt securities issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Argentina, Brazil, Ghana, Hungary, Indonesia, Mexico, the Philippines, Sri Lanka, Russia, Republic of South Africa, Turkey, Ukraine and Zambia only.**

The Fund is expected to invest more than 10% (but no more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the Fund's benchmark, the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposure may change over time.

The above countries are for reference only and may change without prior notice to the Shareholders.

#### ESG Emerging Markets Bond Fund

The objective of the Fund is to gain exposure to debt securities issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Argentina, Brazil, Ghana, Indonesia, Mexico, the Philippines, Sri Lanka, Russia, Turkey, Ukraine and Zambia only.**

The Fund may invest more than 10% (but no more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the Fund's benchmark, the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when

making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The above countries are for reference only and may change without prior notice to the Shareholders.

#### ESG Emerging Markets Local Currency Bond Fund

The objective of the Fund is to gain exposure to debt securities issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey only.**

The Fund is expected to invest more than 10% (but no more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the Fund's benchmark, the J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposure may change over time.

The above countries are for reference only and may change without prior notice to the Shareholders.

#### MENA Bond Fund

The objective of the Fund is to gain exposure to debt securitised issued by governments, public or local authorities of emerging market countries which, by their nature, are more likely to be rated non-investment grade than developed market countries.

**Applicable to: Oman, Bahrain, Egypt, Morocco, Iraq, Jordan, Lebanon, Algeria, and Tunisia only.**

The Fund may invest more than 10% (but no more than 20%) of its Net Asset Value in debt securitises (including Sukuk) issued by and/or guaranteed by governments in each of the above countries, which are, as at the date of this Prospectus, rated non-investment grade.

Such investments are based on the professional judgment of the Investment Adviser whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes.

Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The above countries are for reference only and may change without prior notice to the Shareholders.

It is not anticipated that any of the Funds, other than those set out in the table above, will invest more than 10% of their Net Asset Value in debt securities issued and/or guaranteed by governments of any single country which are rated non-investment grade at the date of this Prospectus.

In the event that the debt securities issued and/or guaranteed by governments of a country which any of the Funds invest in are downgraded to non-investment grade following the date of this Prospectus, the relevant Fund may, subject to its investment objective and policy, invest more than 10% of its Net Asset Value in those securities and the table set out above will be updated accordingly in the next update to the Prospectus.

- ▶ Where an investment policy, other than that of the Reserve Funds, requires a particular percentage to be invested in a specific type or range of investments, such requirement will not apply under extraordinary market conditions and is subject to liquidity and/or market risk hedging considerations arising from the issuance, switching or redemption of Shares. In particular, in aiming to achieve a Fund's investment objective, investment may be made into other transferable securities than those in which the Fund is normally invested in order to mitigate the Fund's exposure to market risk.
- ▶ Funds may hold cash and near-cash instruments on an incidental basis unless otherwise stated in the investment objective of the Fund.
- ▶ Funds may use derivative instruments (including those on foreign exchange) as provided for in Appendix A. The Reserve Funds may only use derivatives for hedging purposes and with determined underlyings as more specifically described in the relevant investment policies.
- ▶ Where a Fund invests in derivatives, cover for such derivative positions are held in cash or other liquid assets.
- ▶ Unless specifically stated to the contrary, the currency exposure of the Equity Funds will normally be left unhedged. Elsewhere if a Fund's investment objective states that "currency exposure is flexibly managed", this means that the Investment Adviser may be expected to regularly employ currency management and hedging techniques in the Fund. Techniques used may include hedging the currency exposure on a Fund's portfolio or/and using more active currency management techniques such as currency overlays, but does not mean that a Fund's portfolio will always be hedged in whole or in part.
- ▶ Where the term "Asia Pacific" is used, it refers to the region comprising the countries in the Asian continent and surrounding Pacific islands including Australia and New Zealand.
- ▶ Where the term "Asian Tiger countries" is used, it refers to any of the following countries, regions or territories: Japan, South Korea, the PRC, Taiwan, Hong Kong, the Philippines, Thailand, Malaysia, Singapore, Vietnam, Indonesia, Macau, India, Sri Lanka, Mongolia and Pakistan.
- ▶ Where the term "Europe" is used, it refers to all European countries including the UK, Eastern Europe and former Soviet Union countries.
- ▶ The "weighted average maturity", or WAM, of a fund, is a measure of the average length of time to legal maturity (the date at which fixed income securities become due for repayment) or, if shorter, to the next interest rate reset to a

money market rate of all the underlying assets of a fund reflecting the relative holdings in each asset. In practice, this measure is an indication of current investment strategy and is not an indication of liquidity.

- ▶ The “weighted average life”, or WAL, of a fund, is a measure of the average length of time to legal maturity of all the underlying assets in the fund reflecting the relative holdings of each asset. In practice, this measure is an indication of current investment strategy and is not an indication of liquidity.
- ▶ A reference to the “EMU” means the Economic and Monetary Union of the European Union.
- ▶ A reference to the equity securities of companies domiciled in those EU member states participating in EMU may, at the Investment Adviser’s discretion, be taken to include the equity securities of companies domiciled in countries which formerly participated in EMU.
- ▶ Where the term “Latin America” is used, it refers to Mexico, Central America, South America and the islands of the Caribbean, including Puerto Rico.
- ▶ Where the term “Mediterranean region” is used, it refers to countries bordering the Mediterranean Sea.
- ▶ Funds other than the Reserve Funds investing globally or in Europe may contain investments in Russia, subject always to the 10% limit referred to in the “Restrictions on Foreign Investment” section above except for investment in securities listed on the MICEX-RTS, which has been recognised as a regulated market.
- ▶ Where the term “Renminbi” is used, it refers to investments via the offshore Renminbi market (CNH), except where investments are made via the QFI regime (i.e. the onshore Renminbi market (CNY)).
- ▶ Where a Fund invests in initial public offerings or new debt issues, the prices of securities involved in initial public offerings or new debt issues are often subject to greater and more unpredictable price changes than more established securities.
- ▶ Funds which include “Equity Income”, “Enhanced Equity Yield”, “High Income” or “Multi-Asset Income” in their title or investment objective and policy seek either to out-perform in terms of income (from equity dividends, and/or fixed income securities and/or other asset classes as appropriate) their eligible investment universe or to generate a high level of income. The opportunity for capital appreciation within such Funds may be lower than other Funds of the Company – see “Risks to Capital Growth”.
- ▶ Where the term “real return” is used, it means the nominal return less the level of inflation, which is typically measured by the change in an official measure of the level of prices in the relevant economy.
- ▶ The term “investment grade” defines debt securities which are rated, at the time of purchase, BBB- (Standard & Poor’s or equivalent rating) or better by at least one recognised rating agency, or, in the opinion of the Management Company, and,

where applicable, based on the Internal Credit Quality Assessment Procedure, are of comparable quality.

- ▶ The terms “non-investment grade” or “high yield” define debt securities which are unrated or rated, at the time of purchase, BB+ (Standard & Poor’s or equivalent rating) or lower by at least one recognised rating agency or, in the opinion of the Management Company, and, where applicable, based on the Internal Credit Quality Assessment Procedure, are of comparable quality.
- ▶ Fixed income transferable securities invested in by the Funds may include ABS and MBS. The Funds which may currently invest in such assets contain reference to this fact in their investment policies. The Reserve Funds may only invest in securitisations and asset-backed commercial paper fulfilling the requirements of the MMF Regulations.
- ▶ Where reference is made to “developed” markets or countries these are typically markets or countries which, on the basis of criteria such as economic wealth, development, liquidity and market accessibility are considered as more advanced or mature markets or countries. The markets and countries which may be classified as developed for a Fund are subject to change and may include, though are not limited to, countries and regions such as Australia, Canada, Japan, New Zealand, United States of America and Western Europe.
- ▶ Where reference is made to “developing” or “emerging” markets or countries, these are typically markets of poorer or less developed countries which exhibit lower levels of economic and/or capital market development. The markets and countries which may be classified as developing or emerging for a Fund are subject to change and may include, though are not limited to, any country or region outside of Australia, Canada, Japan, New Zealand, United States of America and Western Europe.
- ▶ United Nations Convention on Cluster Munitions - The UN Convention on Cluster Munitions became binding international law on 1 August 2010 and prohibits the use, production, acquisition or transfer of cluster munitions. The Investment Advisers on behalf of the Company accordingly arrange for the screening of companies globally for their corporate involvement in anti-personnel mines, cluster munitions and depleted uranium ammunition and armour. Where such corporate involvement has been verified, the Directors’ policy is not to permit investment in securities issued by such companies by the Company and its Funds.
- ▶ Where the term “transferable securities denominated in Euro” is used it refers to transferable securities which were denominated in Euro at the time of their issue and may also, at the Investment Adviser’s discretion, be taken to include transferable securities denominated in the currencies of any countries that have previously formed part of the Eurozone.

#### **Environmental Social and Governance Integration**

The Investment Adviser considers many investment risks in its processes. In order to seek the best risk-adjusted returns for clients, the Investment Adviser manages material risks and opportunities that could impact portfolios, including financially material Environmental, Social and/or Governance (ESG) data or information, where available. E, S and/or G data or information is

defined as any data or information around E, S and/or G issues that could impact a company's ability to perform over time. Companies may self-identify ESG issues as financially material to their business models through external or financial reporting. A portfolio manager may identify ESG issues as financially material to the investment process because they impact company risk, opportunity, performance, volatility, etc. Examples of environmental issues include, but are not limited to, water use, land use, waste management and climate risk. Examples of social issues include, but are not limited to, human capital management, impacts on the communities in which a company operates, customer loyalty and relationships with regulators. Governance issues are anything related to the core means by which boards can oversee the creation of durable, long-term financial value. BlackRock defines ESG integration to be the practice of incorporating financially material E, S and/or G data or information into firmwide processes with the objective of enhancing risk adjusted returns of clients' portfolios. See the BlackRock ESG Integration Statement for further information.

The Investment Adviser considers E,S and/or G data and information, within the total set of information in its research process. The extent to which E, S, and/or G data and information are considered during investment decision making will be determined by the materiality of such data or information and the Fund. The Investment Adviser's evaluation of ESG data may be subjective and could change over time in light of emerging sustainability risks or changing market conditions.

As with other investment risks and opportunities, the relevance of E, S and/or G considerations may vary by issuer, sector, product, mandate, and time horizon. Depending on the investment approach, this financially material E, S and/or G data or information may help inform due diligence, portfolio or index construction, and/or portfolio monitoring processes, as well as risk management. This approach is consistent with the Investment Adviser's regulatory and fiduciary duty to manage the Funds in accordance with their investment objectives and policies and in the best interests of the Funds' Shareholders.

Unless otherwise stated in Fund documentation and included within a Fund's investment objective and investment policy, ESG integration does not change a Fund's investment objective or constrain the Investment Adviser's investable universe, and there is no indication that an ESG or impact focused investment strategy or any exclusionary screens will be adopted by a Fund. Similarly, ESG integration does not determine the extent to which a Fund may be impacted by sustainability risks. Please refer to "Sustainability Risks" in the risk factors section of this Prospectus.

### Investment Stewardship

BlackRock seeks to advance the financial interests of investors through its investment stewardship efforts, consistent with the investment strategy in which they are invested. It does this by engaging with public companies, proxy voting on the Funds' behalf, contributing to industry dialogue on stewardship, and reporting on its stewardship activities.

BlackRock's stewardship approach is comprised of the following core elements (as further described below):

- ▶ Global principles
- ▶ Engagement

- ▶ Proxy voting

### Global principles

A key focus of the stewardship program is the promotion of sound corporate governance practices and financial resilience. While accepted standards and norms of corporate governance can differ between markets, there are certain globally-applicable fundamental principles of corporate governance that, in BlackRock's experience, contribute to a company's ability to create long-term financial value for shareholders. Some of the focus areas in these global principles include boards and directors (including their effectiveness and composition), shareholder proposals (in particular, their implications for financial value) and material sustainability-related risks and opportunities.

### Engagement

Engagement is core to BlackRock's stewardship efforts as it provides the opportunity to better understand a company's business model and material risks and opportunities. When assessing material risks and opportunities, BlackRock focuses on the factors that could impact a company's long-term financial performance, which are unique to its business model and/or operating environment.

Engagement may also inform BlackRock's voting decisions, particularly on issues where company disclosures are not sufficiently clear or complete, or management's approach seems misaligned with the financial interests of investors.

BlackRock's engagement priorities reflect the themes on which it most frequently engages companies, where they are relevant and a source of material business risk or opportunity. These themes focus on:

- ▶ Board quality and effectiveness: consideration of board performance, which is critical to the long-term financial success of a company and the protection of shareholders' economic interests.
- ▶ Strategy, purpose, and financial resilience: understanding how boards and management align their business decision-making with the company's purpose and adjust strategy as necessary.
- ▶ Incentives aligned with financial value creation: evaluation of companies' disclosures on the connection between compensation policies and outcomes and the financial interests of shareholders.
- ▶ Climate and natural capital: understanding companies' approach to, and oversight of, material climate-related risks and opportunities as well as how they manage material natural-related risks and opportunities, in the context of their business model and sector.
- ▶ Company impacts on people: understanding companies' approach to human capital management and their management of the human rights issues that are material to their businesses.

### Proxy voting

BlackRock uses proxy voting to communicate its support for, or concerns about, how companies are serving the long-term financial interests of investors. BlackRock's regional voting guidelines set out guidance on its position on common voting matters. These guidelines are not prescriptive as BlackRock takes into consideration the context in which companies are operating their businesses.

#### Climate and Decarbonization Stewardship Guidelines

Certain Funds that apply, or which track indexes that apply, decarbonization or climate-related criteria have adopted additional climate and decarbonization stewardship guidelines (Guidelines). Guidelines will apply to the following Funds:

Climate Transition Multi-Asset Fund, Brown to Green Materials Fund, Circular Economy Fund, Future of Transport Fund, Sustainable Energy Fund, Asian Sustainable Equity Fund, Developed Markets Sustainable Equity Fund, Emerging Markets Sustainable Equity Fund, ESG Multi-Asset Fund, European Sustainable Equity Fund, Sustainable Global Allocation Fund, Sustainable Global Dynamic Equity Fund, Systematic Global Income & Growth Fund, Systematic Global Small Cap Fund, US Sustainable Equity Fund.

Guidelines are focused on matters related to climate risks and the transition to a low-carbon economy at companies that are held by the applicable Funds. In respect of these matters, BlackRock will apply Guidelines, and for all other matters, BlackRock's core stewardship approach (described above) will continue to apply. Guidelines differ from the core stewardship approach in that they consider, in addition to financial considerations and consistent with the investment objective of each applicable Fund, the alignment of companies' business models and strategies with the financial opportunities presented by the transition to a low carbon economy and the more ambitious goal of the Paris Agreement<sup>1</sup>, namely, to limit average temperature rise to 1.5°C above pre-industrial levels.

Guidelines will apply to companies which produce goods and services that contribute to real world decarbonization or have a carbon intensive business model and face outsized impacts from the low carbon transition, based on reported and estimated scopes 1, 2, and 3 greenhouse gas emissions. Where Guidelines apply, BlackRock looks for these companies to provide sufficient corporate disclosure to allow it to determine the extent to which decarbonization and the low-carbon transition are strategic priorities.

In implementing Guidelines, BlackRock will generally support non-executive directors standing for election where, in the BlackRock's assessment based on company disclosures and engagement, a company is executing on its commitment to align with the transition to a low-carbon economy, as defined above. Where BlackRock determines this is not the case, it may vote against the election of one or more non-executive directors who have responsibility for the issue.

Shareholder proposals on a company's approach to the low-carbon transition or climate risk will be considered on their merit. The BlackRock Group's assessment will take into consideration

the implications for, and the relevance to, the company's stated low-carbon transition strategy and targets.

#### **Implementation**

BlackRock implements its stewardship programme in respect of the Funds through the BlackRock Investment Stewardship (BIS) team.

More detailed information on the policies and guidelines of BIS can be found here: <https://www.blackrock.com/corporate/insights/investment-stewardship>.

#### **Reporting**

BlackRock provides periodic reporting of its stewardship activities, which can be accessed here, as part of a comprehensive library of materials on its stewardship policies and activities: <https://www.blackrock.com/corporate/insights/investment-stewardship>.

#### **SFDR**

SFDR categorises fund strategies into three categories based on their sustainable investment credentials, as follows:

An Article 6 fund is defined as a fund which "*...deems sustainability risks not to be relevant...*".

An Article 8 fund is defined as a fund which "*...promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices...*".

An Article 9 fund is defined as a fund which "*...has sustainable investment as its objective...*".

The following Funds have been categorised under the SFDR as "Article 8" or "Article 9" funds:

Article 8 Funds: AI Innovation Fund, Asia Pacific Bond Fund, Asian Sustainable Equity Fund, Brown To Green Materials Fund, China Fund, China Innovation Fund, China Onshore Bond Fund, China Multi-Asset Fund, Climate Transition Multi-Asset Fund, Continental European Flexible Fund, Developed Markets Sustainable Equity Fund, Diversified Tactical Fund, Emerging Markets Corporate Bond Advanced Fund, Emerging Markets Fixed Maturity Bond Fund 2028, Emerging Markets Sustainable Equity Fund, ESG Emerging Markets Blended Bond Fund, ESG Emerging Markets Local Currency Bond Fund, ESG Multi-Asset Fund, Euro Bond Fund, Euro Corporate Bond Fund, Euro Flexible Income Bond Fund, Euro High Yield Fixed Maturity Bond Fund 2027, Euro High Yield Fixed Maturity Bond Fund 2028, Euro High Income Fixed Maturity Bond Fund 2028, Euro High Income Fixed Maturity Bond Fund 2029, Euro Income Fixed Maturity Bond Fund 2029, Euro Income Fixed Maturity Bond Fund 2030, Euro Investment Grade Fixed Maturity Bond Fund 2027 (1), Euro Investment Grade Fixed Maturity Bond Fund 2028, Euro Short Duration Bond Fund, Euro-Markets Fund, European Equity Income Fund, European Equity Transition Fund, European Fund, European High Yield Bond Fund, European Multi-Asset Income Fund, European Special Situations Fund, European Sustainable Equity Fund, European Value Fund, FinTech Fund, Global Equity Income Fund, Global Government Bond Fund, Global High Yield Bond Fund, Global Listed Infrastructure Fund, Global Long-Horizon Equity Fund, Global Securitised Fund, Global Unconstrained Equity Fund, Japan Flexible Equity Fund, Japan

<sup>1</sup> The Paris Agreement to the United Nations Framework Convention on Climate Change, December 12, 2015.

Small & MidCap Opportunities Fund, Multi-Theme Equity Fund, Next Generation Technology Fund, Sustainable Global Allocation Fund, Sustainable Global Dynamic Equity Fund, Swiss Small & MidCap Opportunities Fund, Systematic China A-Share Opportunities Fund, Systematic China Environmental Tech Fund, Systematic Islamic GCC Equity Fund, Systematic Islamic Saudi Arabia Equity Fund, Systematic Multi Allocation Credit Fund, Systematic Global Income & Growth Fund, United Kingdom Fund, US Dollar High Yield Bond Fund, US Sustainable Equity Fund, Systematic Global SmallCap Fund, US Growth Fund, US Flexible Equity Fund, World Bond Fund, World Financials Fund, World Healthscience Fund, World Real Estate Securities Fund and World Technology Fund.

Article 9 Funds: Circular Economy Fund, Emerging Markets Impact Bond Fund, Future Of Transport Fund, Impact Bond Fund, Sustainable Energy Fund and Sustainable Global Infrastructure Fund.

For the avoidance of doubt, all Funds that have not been categorised under the SFDR as Article 8 or Article 9 in accordance with the above paragraphs are considered to fall under the Article 6 under the SFDR.

For all Article 8 Funds and Article 9 Funds BlackRock evaluates underlying investments in companies according to the good governance criteria outlined in the SFDR where relevant data is available and as appropriate given the underlying investment type. These criteria relate to sound management structures, employee relations, remuneration of staff and tax compliance. BlackRock may consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers depending on the particular ESG strategy applicable to the Fund.

BlackRock will assess the good governance assessment framework of any delegated managers, including third party managers, where relevant information is available.

BlackRock intends to comply with transparency requirements relating to adverse sustainability principal impacts of the Fund within the timeframe set out in the SFDR.

For the Article 9 Funds, a majority of the assets will be invested in sustainable investments.

In addition to exposure to Sustainable Investments, all holdings within these Article 9 Funds will be assessed as doing no significant harm.

## **Taxonomy Regulation**

### *Article 6 Funds*

The investments underlying these Funds do not take into account the EU criteria for environmentally sustainable economic activities.

### *Article 8 Funds and Article 9 Funds*

Article 8 Funds and Article 9 Funds are required to disclose the proportion of investment in environmentally sustainable economic activities under Article 3 of the Taxonomy Regulation ("Environmentally Sustainable Economic Activities") selected for such Article 8 Funds and Article 9 Funds, including details of the

proportions of enabling activities and transitional activities within the meaning of the Taxonomy Regulation.

The Technical Screening Criteria ("TSC") were finalised on 9 December 2021 (i.e. in respect of the first two Taxonomy environmental objectives of climate change mitigation and climate change adaptation) and the remaining four Taxonomy environmental objectives are not yet in force. These detailed criteria will require the availability of multiple, specific data points regarding each investment. As at the date hereof, there is insufficient reliable, timely and verifiable data available for BlackRock to be able to assess investments using the TSC.

In addition, the Regulatory Technical Standards (RTS) under the Sustainable Finance Disclosure Regulation (SFDR) which define the methodology for the calculation of the share of environmentally sustainable investments and the templates for these disclosures are not yet in force. As at the date hereof, BlackRock is not able to provide standardised and comparable disclosures on the Taxonomy alignments of the Funds.

BlackRock considers itself unable to collect reliable data on the environmental objectives set forth in Article 9 of the Taxonomy Regulation and on how and to what extent the investments underlying such Article 8 Funds and Article 9 Funds relate to Environmentally Sustainable Economic Activities. Accordingly, while these Articles 8 Funds and Article 9 Funds may have investments in the activities referred to above, they do not currently commit to investing more than 0% of their assets in investments aligned with the EU criteria for Environmentally Sustainable Economic Activities.

BlackRock is keeping this situation under active review and where, in its discretion, it has assessed that it has sufficient reliable, timely and verifiable data on the Funds' investments, BlackRock will update the descriptions referred to above, in which case this Prospectus or the relevant supplement will be updated. For further information please refer to <https://www.blackrock.com/corporate/literature/prospectus/eu-taxonomy.pdf>.

## **SFDR Pre-Contractual Disclosures**

The pre-contractual disclosure "annexes" or "PCDs" for the Funds classified as Article 8 or Article 9 Funds pursuant to the SFDR are available under "Appendix H" SFDR-PCDs" of the prospectus.

## **Consideration of Principal Adverse Impacts ("PAIs")**

The Investment Adviser has access to a range of data sources, including PAI data, when making decisions on selection of investments. However, whilst BlackRock considers ESG risks for all portfolios and these risks may coincide with environmental or social themes associated with the PAIs, unless stated otherwise in the SFDR PCDs, the Funds do not commit to considering PAIs in driving the selection of their investments.

## **Labels**

With respect to the Funds listed below, it is BlackRock's intention to align with the following ESG labels in recognition of their support of promoting responsible investments in addition to complying with the SFDR and the Taxonomy Regulation. For these Funds that have applied and obtained the below ESG labels, alignment with the methodologies and ESG requirements established by such ESG labels may restrict investment selections of the Investment Advisers in addition to the policies disclosed with respect to each Fund identified as having obtained or applied for each ESG label.

### **Febelfin Label**

The Belgian Financial Sector Federation ("Febelfin") supports the promotion of socially responsible financial products through its initiative to create a socially responsible investment ("SRI") label. Initially issued in February 2019, the Quality Standard, as revised from time to time (the "Febelfin Guidelines"), has been developed by the Central Labelling Agency (the "CLA"). The CLA is a not-for-profit association incorporated under Belgian law and its board is composed equally of independent directors (academia, civil society) and directors from the financial sector.

To be awarded the label, Funds need to implement at least two mandatory ESG strategies and the harm avoidance principle as further defined by the Febelfin Guidelines. The two mandatory ESG strategies are the integration of all dimensions of sustainability and negative/ exclusionary ESG screening. The harm avoidance principle is achieved by the exclusion from the eligible universe of companies violating the UN Global Compact. In addition to the two ESG strategies above, one or more of the following additional strategies may be implemented: positive/ best in class screening, norm-based screening, sustainability-themed investing or impact/community investing. All assets in the portfolio are assessed according to these ESG principles.

Exclusions required by the label apply at a company level, based on their engagement in a sector as measured by the proportion of the company's revenues derived from certain activities. A socially responsible financial product shall not finance weapons, tobacco production and trading, thermal coal extraction, unconventional oil and gas. Transitional energy sources however, like conventional oil and gas and nuclear energy, can be allowed on a limited basis but subject to corporate engagement or Shareholder action.

The current *Towards Sustainability Quality Standard 2023* comprises the revised Febelfin Guidelines published on 30 June 2023 which implement more stringent requirements since January 2024. The Revised Quality Standards have aligned the Febelfin Guidelines with EU legislation and upcoming initiatives on sustainability, introduced criteria for ESG assessment of financial institutions and energy and electricity utilities sector and increased transparency requirements. Among the new requirements, Funds applying for the label now need to disclose the calculated average selectivity for the best-in-class approach. Revised thresholds have also been introduced, with phasing out margins decreasing year on year for companies that are not yet fully compliant with required business criteria but are amongst the best of their peer group in transitioning their business model. Additional rules deal with certain assets such as derivatives, fixed income instruments and green bonds. Specifically, sovereign bonds issued by states that have not ratified or implemented certain international conventions are excluded. For this asset class, exceptions apply to public debt issued by certain issuers and for certain products (such as funds with an emerging market focus) with limitations applying by jurisdictions. Febelfin Guidelines allow exposure to core reserve (non-EURO) currency issuers that do not comply with its criteria only up to a combined limit of 30% (e.g. total exposure to US and Japanese sovereign bonds).

For the Funds that have obtained or applied for this label, the label requirements and investment constraints will inform the investment policies and strategies of such Funds.

An independent third-party verifier is appointed by the CLA to evaluate a Fund's initial compliance with the Febelfin Guidelines

and also subsequent annual verification. The Investment Adviser may withdraw from the label or no longer qualify for it if a Fund does not meet compliance with its evolving criteria.

However, wherever consistent with a Fund investment policy, Manager will endeavour to take necessary and timely remedial measures (such as divestment) if investments deviate from the Febelfin Guidelines. Please refer to the label website for the most up to date list of Funds holding the label.

For a more complete and current account of the Febelfin label policies as may further evolve over time, Shareholders should consult the Febelfin label website at [www.towardssustainability.be/en/quality-standard](http://www.towardssustainability.be/en/quality-standard).

To avoid any confusion, where certain Funds commit to obtaining the Febelfin label but are also bound by commitments under guidelines or other texts published by ESMA, the most stringent set of rules will be applied.

As at the date of this Prospectus, the following Funds have been awarded the Febelfin label. Please refer to the label website for an up-to-date list of Funds holding the Febelfin label;

Circular Economy Fund, ESG Multi-Asset Fund, Future Of Transport Fund, Sustainable Energy Fund, and Sustainable Global Allocation Fund.

### **The French SRI label**

The French SRI label is sponsored by the French Ministry for the Economy and Finance. The Funds that apply for the SRI label are required to demonstrate the soundness of their ESG methodology and the environmental, social, governance or human rights benefit of their investment policies. The SRI label guidelines (the "SRI Guidelines") cover fund governance, transparency and rules on portfolio composition. Funds that are awarded the SRI label commit to enhanced transparency on their portfolio composition and management policy with distributors and investors. The French SRI label imposes certain requirements and investment constraints on funds. 90% of the issuers selected for a Fund's portfolio need to have been assessed for their ESG characteristics by use of specified indicators outlined in the SRI Guidelines. To evidence the ESG significance of the portfolio selection, the Investment Adviser must provide information on each of the ESG areas. The Investment Adviser must present measurable improvements of the Fund's portfolio in relation to ESG characteristics for all three E, S and G criteria, relative to the initial universe of the Fund. Improvement compared to the initial universe can be achieved by removing the worst 25% securities. Alternatively, the Investment Adviser may present an average rating that is significantly higher than the rating of the initial universe, which can be no lower than the initial universe after eliminating the worst 25% securities. Specific ratios apply for certain assets (such as government bonds, etc.). The ESG ratings methodology utilised by the products evaluate each corporate issuer on a selection of 2-7 Environmental and Social Key Issues. All corporate issuers are evaluated on the Governance pillar. The ratings applied to each pillar (E, S & G) will vary by sub-industry classified by the Global Industry Classification Standards (GICS) however the Governance pillar is calculated independently and floored at 33.33%.

As outlined in Appendix VII of the SRI Guidelines, the Funds will apply the environmental, social and governance exclusions to

corporate issuers and the sovereign exclusions to all sovereign issuers. Further details on the exclusions criteria and scope of application can be found on the SRI Label website at: [www.llelabelisr.fr/wp-content/uploads/EN\\_Referentiel-Label-ISR-mars24.pdf](http://www.llelabelisr.fr/wp-content/uploads/EN_Referentiel-Label-ISR-mars24.pdf)

To avoid any confusion, where certain Funds commit to obtaining the SRI label but are also bound by commitments under guidelines or other texts published by ESMA, the most stringent set of rules will be applied.

For the Funds that have obtained or applied for the SRI label, the SRI Guidelines and their investment constraints will inform the investment policies and strategies of such Funds.

Independent auditors verify initially and periodically whether a Fund meets the label requirements. Where a Fund ceases to meet certain criteria, a transition period may be permitted for the fund to change its portfolio composition. The Investment Adviser may withdraw from the label or no longer qualify for it if a Fund does not meet compliance with the evolving criteria. However, wherever consistent with a Fund's investment policy, the Investment Adviser will endeavour to take necessary and timely remedial measures (such as divestment) if investments deviate from the SRI Guidelines.

For a more complete and current account of the SRI Guidelines, as may further evolve over time, Shareholder should consult the SRI label website at [www.llelabelisr.fr/label-isr/criteres-attribution/](http://www.llelabelisr.fr/label-isr/criteres-attribution/). An English version of the SRI Guidelines is also available.

As at the date of this Prospectus, the following Funds have been awarded the SRI label. Please refer to the label website for an up-to-date list of Funds holding the label:

ESG Multi-Asset Fund and Sustainable Global Allocation Fund.

#### **BlackRock EMEA Baseline Screens Policy**

Where the Baseline Screens Policy applies to a Fund, the Investment Adviser will seek to limit and/or exclude direct investment (as applicable) in corporate issuers which, in the opinion of the Investment Adviser, have exposure to, or ties with, certain sectors (in some cases subject to specific revenue thresholds) including but not limited to:

- (i) the production of controversial weapons;
- (ii) the distribution or production of firearms or small arms ammunition intended for retail civilians;
- (iii) the extraction of certain types of fossil fuel and/or the generation of power from them;
- (iv) the production of tobacco products or certain activities in relation to tobacco-related products; and
- (v) Companies involved in severe controversies or who are deemed to have breached accepted global norms, relating to their business practices and conduct.

To undertake its analysis of ESG criteria, the Investment Adviser may use data generated internally by the Investment Adviser and/

or its affiliates or provided by one or more third party ESG research providers.

Should existing holdings, compliant at the time of investment subsequently become ineligible, they will be divested within a reasonable period of time.

An ESG Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near- cash instruments, shares or units of CIS and fixed income transferable securities issued by governments and agencies worldwide) to issuers that do not meet the ESG criteria described above.

A full list of the limits and/or exclusions being applied by Investment Advisers at any time (including any specific threshold criteria) is available at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.

It is the Investment Advisers' intention that the BlackRock EMEA Baseline Screens policy will evolve over time as improved data and more research on this subject becomes available. The full list may be amended from time to time at the Investment Advisers' discretion and (unless it alters the description in this section) may be implemented without notification to Shareholders.

#### **EU Paris-Aligned Benchmark Exclusions**

Funds using environmental-, impact- or sustainability-related terms in their name (including "ESG"), other than as described in 'EU Climate Transition Benchmark Exclusions' below, also apply the EU Paris-aligned Benchmark Exclusions.

These exclusions prohibit investments in companies that are involved in any activities related to controversial weapons; are involved in the cultivation and production of tobacco; have violated the United Nations Global Compact (UNGC) principles or the Organisation for Economic Cooperation and Development's (OECD) Guidelines for Multinational Enterprises; or derive more than a set percentage of revenues from electricity generation (that produces GHG emissions above a set GHG intensity threshold), coal, oil or gas.

Funds using environmental-, impact- or sustainability-related terms in their name may invest in Green, Social and Sustainability (GSS) bonds issued by a company, which are intended to raise proceeds specifically for projects that promote positive environmental and/or social contributions and aimed at mitigating adverse sustainability impacts, such as investment in renewable energy or energy efficiency, based on information available in the bond's issuance documentation. Such investments in GSS bonds will, instead of being subject to all the EU Paris-aligned Benchmark Exclusions at issuer level, be subject to:

- ▶ the EU Paris-aligned Benchmark Exclusions relating to UNGC and OECD violations at the issuer level; and
- ▶ the other EU Paris-aligned Benchmark Exclusions described above at the level of the economic activities financed by the GSS bond.

#### **EU Climate Transition Benchmark Exclusions**

Funds using only transition-, social- or governance-related terms in their name, or where the name combines transition-related and

environmental- or impact-related terms, also apply the EU Climate Transition Benchmark Exclusions.

These exclusions prohibit investments in companies that are involved in any activities related to controversial weapons; are involved in the cultivation and production of tobacco; or have violated the UNGC principles or the OECD Guidelines for Multinational Enterprises.

### **Autorité des marchés financiers (AMF)**

The following Funds have been classified as compliant with the rules of the AMF regarding sustainable investing:

Asian Sustainable Equity Fund, Brown To Green Materials Fund, Circular Economy Fund, Developed Markets Sustainable Equity Fund, Emerging Markets Impact Bond Fund, Emerging Markets Sustainable Equity Fund, ESG Multi-Asset Fund, European Sustainable Equity Fund, Future Of Transport Fund, Impact Bond Fund, Sustainable Global Dynamic Equity Fund, Sustainable Global Infrastructure Fund, Sustainable Energy Fund, Sustainable Global Allocation Fund, and US Sustainable Equity Fund.

### **QFI Investments**

Under current PRC law, subject to minor exceptions, investors based in certain jurisdictions outside the PRC may apply to the CSRC for status as a QFI. Once an entity is licensed as a QFI, it may register with the SAFE, and invest directly in eligible PRC securities. BAMNA has been licensed as a QFI and the QFI Access Funds may obtain access to eligible securities within the PRC directly and invest directly in QFI eligible securities investment via the QFI status of BAMNA. There may be additional BlackRock entities licensed as QFI's from time to time which may also enable the QFI Access Funds to invest directly in QFI eligible securities investment.

In respect of the QFI Access Funds which are authorised by the SFC, the Management Company will obtain an opinion from PRC legal counsel ("PRC Legal Opinion") before the QFI Access Funds invest through the QFI regime. The Management Company will ensure that the PRC Legal Opinion will, in respect of each of the QFI Access Funds, contain the following as a matter of PRC laws:

- (a) securities account(s) opened with the relevant depositories and maintained by the QFI Custodian and the Renminbi special deposit account(s) with the QFI Custodian (respectively, the "QFI securities account(s)" and the "Renminbi cash account(s)") have been opened in the joint names of the QFI and the relevant QFI Access Fund for the sole benefit and use of the QFI Access Fund in accordance all applicable laws and regulations of the PRC and with approval from all competent authorities in the PRC;
- (b) the assets held/credited in the QFI securities account(s) of the relevant QFI Access Fund (i) belong solely to the QFI Access Fund, and (ii) are segregated and independent from the proprietary assets of the QFI (as the QFI Licence Holder), the Depositary or the QFI Custodian and any PRC Broker(s), and from the assets of other clients of the QFI (as QFI Licence Holder), the Depositary, the QFI Custodian and any PRC Broker(s);

- (c) the assets held/credited in the Renminbi cash account(s) (i) become an unsecured debt owing from the QFI Custodian to the relevant QFI Access Fund, and (ii) are segregated and independent from the proprietary assets of the QFI (as QFI Licence Holder) and any PRC Broker(s), and from the assets of other clients of the QFI (as QFI Licence Holder) and any PRC Broker(s);
- (d) the Company, for and on behalf of the relevant QFI Access Fund, is the only entity which has a valid claim of ownership over the assets in the QFI securities account(s) and the debt in the amount deposited in the Renminbi cash account(s) of the QFI Access Fund;
- (e) if the QFI or any PRC Broker(s) is liquidated, the assets contained in the QFI securities account(s) and Renminbi cash account(s) of the relevant QFI Access Fund will not form part of the liquidation assets of the QFI or such PRC Broker(s) in liquidation in the PRC; and
- (f) if the QFI Custodian is liquidated, (i) the assets contained in the QFI securities account(s) of the relevant QFI Access Fund will not form part of the liquidation assets of the QFI Custodian in liquidation in the PRC, and (ii) the assets contained in the Renminbi cash account(s) of the relevant QFI Access Fund will form part of the liquidation assets of the QFI Custodian in liquidation in the PRC and the QFI Access Fund will become an unsecured creditor for the amount deposited in the Renminbi cash account(s).

### **QFI Custodian**

The Depositary has appointed the QFI Custodian to act as its sub-custodian for the purpose of safekeeping the investments of its customers in certain agreed markets, including the PRC (the "Global Custody Network") through a sub-custody agreement.

According to the current QFI regulations, a QFI is allowed to appoint multiple QFI Custodians.

Notwithstanding that the Depositary has, pursuant to its obligations as a UCITS custodian, established the Global Custody Network for the purpose of safe-keeping the assets of its clients, including the Company, held in the PRC (as described above), QFI rules separately require that every QFI must appoint local QFI custodian(s) for the purposes of safe-keeping the investments and holding the cash in connection with the QFI regime and for the purpose of coordinating relevant foreign exchange requirements. Therefore, in order to satisfy the requirements of the QFI rules, the relevant QFI will enter into a separate agreement (the "QFI Custodian Agreement") with the QFI Custodian appointing it to act as the local custodian of the relevant QFI Access Fund's assets acquired through the QFI regime.

In accordance with the UCITS requirements, the Depositary has additionally confirmed that it shall provide for the safekeeping of the Fund's assets in PRC through its Global Custody Network, and that such safekeeping is in accordance with the conditions set down by the CSSF which provides that there must be legal separation of non-cash assets held under custody and that the Custodian through its delegates must maintain appropriate internal control systems to ensure that records clearly identify the nature and amount of assets under custody, the ownership of each asset and where documents of title to each asset are located.

## Stock Connects

The Shanghai-Hong Kong Stock Connect is a securities trading and clearing links program developed by HKEX, SSE and ChinaClear and the Shenzhen-Hong Kong Stock Connect is a securities trading and clearing links program developed by HKEX, SZSE and ChinaClear. The aim of Stock Connect is to achieve mutual stock market access between the PRC and Hong Kong.

The Shanghai-Hong Kong Stock Connect comprises a Northbound Shanghai Trading Link and a Southbound Hong Kong Trading Link under Shanghai-Hong Kong Stock Connect. Under the Northbound Shanghai Trading Link, Hong Kong and overseas investors (including the Stock Connect Funds), through their Hong Kong brokers and a securities trading service company established by SEHK, may be able to trade eligible securities listed on the SSE by routing orders to SSE. Under the Southbound Hong Kong Trading Link under Shanghai-Hong Kong Stock Connect, investors in the PRC will be able to trade certain securities listed on the SEHK.

Under the Shanghai-Hong Kong Stock Connect, the Stock Connect Funds, through their Hong Kong brokers may trade certain eligible securities listed on the SSE ("SSE Securities"). These include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A-Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on SEHK, except the following:

- ▶ SSE-listed shares which are not traded in RMB; and
- ▶ SSE-listed shares which are included in the "risk alert board".

In addition, Hong Kong and overseas investors are able to trade eligible SSE-listed ETFs that satisfy the relevant criteria at a regular review and are accepted as eligible ETFs for Northbound trading under the Shanghai-Hong Kong Stock Connect. Regular reviews will be performed to determine the eligible ETFs for Northbound trading every six months.

It is expected that the list of eligible securities may be changed subject to review and approval by the relevant PRC regulators from time to time.

The trading is subject to rules and regulations issued from time to time. Trading under the Shanghai-Hong Kong Stock Connect is subject to a daily quota ("Daily Quota"). Northbound Shanghai Trading Link and Southbound Hong Kong Trading Link under the Shanghai-Hong Kong Stock Connect are subject to a separate set of Daily Quota. The Daily Quota limits the maximum net buy value of cross-boundary trades under the Stock Connect each day.

The Shenzhen-Hong Kong Stock Connect comprises a Northbound Shenzhen Trading Link and a Southbound Hong Kong Trading Link under Shenzhen-Hong Kong Stock Connect. Under the Northbound Shenzhen Trading Link, Hong Kong and overseas investors (including the Stock Connect Funds, if applicable), through their Hong Kong brokers and a securities trading service company established by SEHK, may be able to trade eligible securities listed on the SZSE by routing orders to SZSE. Under the Southbound Hong Kong Trading Link under Shenzhen-Hong Kong Stock Connect investors in the PRC will be able to trade certain securities listed on the SEHK.

Under the Shenzhen-Hong Kong Stock Connect, the Stock Connect Funds through their Hong Kong brokers may trade certain eligible securities listed on the SZSE ("SZSE Securities"). These include any constituent stock of the SZSE Component Index and SZSE Small/Mid Cap Innovation Index which has a market capitalisation of RMB6 billion or above and all SZSE-listed shares of companies which have issued both China A-Shares and H Shares. At the initial stage of the Northbound Shenzhen Trading Link, investors eligible to trade securities that are listed on the ChiNext Board of SZSE under the Northbound Shenzhen Trading Link will be limited to institutional professional investors as defined in the relevant Hong Kong rules and regulations.

In addition, Hong Kong and overseas investors are able to trade eligible SZSE-listed ETFs that satisfy the relevant criteria at a regular review and are accepted as eligible ETFs for Northbound trading under the Shenzhen-Hong Kong Stock Connect. Regular reviews will be performed to determine the eligible ETFs for Northbound trading every six months.

It is expected that the list of eligible securities may be changed subject to review and approval by the relevant PRC regulators from time to time.

The trading is subject to rules and regulations issued from time to time. Trading under the Shenzhen-Hong Kong Stock Connect is subject to a Daily Quota. Northbound Shenzhen Trading Link and Southbound Hong Kong Trading Link under the Shenzhen-Hong Kong Stock Connect is subject to a separate set of Daily Quota. The Daily Quota limits the maximum net buy value of cross-boundary trades under the Shenzhen-Hong Kong Stock Connect each day.

HKSCC, a wholly-owned subsidiary of HKEX, and ChinaClear will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by their respective market participants and investors. The SSE Securities and SZSE Securities traded through Stock Connect are issued in scripless form, and investors will not hold any physical shares.

Although HKSCC does not claim proprietary interests in the SSE Securities and SZSE Securities held in its omnibus stock accounts in ChinaClear, ChinaClear as the share registrar for SSE Securities and SZSE Securities will still treat HKSCC as one of the Shareholders when it handles corporate actions in respect of such SSE Securities and SZSE Securities.

In accordance with the UCITS requirements, the Depositary shall provide for the safekeeping of the Fund's assets in the PRC through its Global Custody Network. Such safekeeping is in accordance with the conditions set down by the CSSF which provides that there must be legal separation of non-cash assets held under custody and that the Depositary through its delegates must maintain appropriate internal control systems to ensure that records clearly identify the nature and amount of assets under custody, the ownership of each asset and where documents of title to each asset are located.

Under the Stock Connects, Hong Kong and overseas investors will be subject to the fees and levies imposed by SSE, SZSE, ChinaClear, HKSCC or the relevant Mainland Chinese authority when they trade and settle SSE Securities and SZSE Securities. Further information about the trading fees and levies is available

online at the website: [https://www.hkex.com.hk/mutual-market/stock-connect?sc\\_lang=en](https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en).

### **China Interbank Bond Market**

The CIBM Funds can invest in the China Interbank Bond Market via the Foreign Access Regime and/or the Bond Connect.

#### *Investment in China Interbank Bond Market via Foreign Access Regime*

Pursuant to the “Announcement (2016) No 3” issued by the PBOC on 24 February 2016, foreign Institutional Investors can invest in China Interbank Bond Market (“**Foreign Access Regime**”) subject to other rules and regulations as promulgated by the Mainland Chinese authorities.

Under the prevailing regulations in Mainland China, foreign Institutional Investors who wish to invest directly in China Interbank Bond Market may do so via an onshore settlement agent, who will be responsible for making the relevant filings and account opening with the relevant authorities. There is no quota limitation.

#### *Investment in China Interbank Bond Market via Northbound Trading Link under Bond Connect*

Bond Connect is an initiative launched in July 2017 for mutual bond market access between Hong Kong and Mainland China established by China Foreign Exchange Trade System & National Interbank Funding Centre (“CFETS”), China Central Depository & Clearing Co., Ltd, Shanghai Clearing House, and HKEX and Central Moneymarkets Unit.

Under the prevailing regulations in Mainland China, eligible foreign investors will be allowed to invest in the bonds circulated in the China Interbank Bond Market through the northbound trading of Bond Connect (“Northbound Trading Link”). There will be no investment quota for Northbound Trading Link.

Under the Northbound Trading Link, eligible foreign investors are required to appoint the CFETS or other institutions recognised by the PBOC as registration agents to apply for registration with the PBOC.

The Northbound Trading Link refers to the trading platform that is located outside of Mainland China and is connected to CFETS for eligible foreign investor to submit their trade requests for bonds circulated in the China Interbank Bond Market through Bond Connect. HKEX and CFETS will work together with offshore electronic bond trading platforms to provide electronic trading services and platforms to allow direct trading between eligible foreign investors and approved onshore dealer(s) in Mainland China through CFETS.

Eligible foreign investors may submit trade requests for bonds circulated in the China Interbank Bond Market through the Northbound Trading Link provided by offshore electronic bond trading platforms (such as Tradeweb and Bloomberg), which will in turn transmit their requests for quotation to CFETS. CFETS will send the requests for quotation to a number of approved onshore dealer(s) (including market makers and others engaged in the market making business) in Mainland China. The approved onshore dealer(s) will respond to the requests for quotation via CFETS and CFETS will send their responses to those eligible foreign investors through the same offshore electronic bond trading

platforms. Once the eligible foreign investor accepts the quotation, the trade is concluded on CFETS.

On the other hand, the settlement and custody of bond securities traded in the China Interbank Bond Market under Bond Connect will be done through the settlement and custody link between the Central Money-markets Unit, as an offshore custody agent, and the China Central Depository & Clearing Co., Ltd and Shanghai Clearing House, as onshore custodian and clearing institutions in Mainland China. Under the settlement link, China Central Depository & Clearing Co., Ltd or Shanghai Clearing House will effect gross settlement of confirmed trades onshore and the Central Moneymarkets Unit will process bond settlement instructions from Central Moneymarkets Unit members on behalf of eligible foreign investors in accordance with its relevant rules.

Since the introduction in August 2018 of Delivery Versus Payment (DVP) settlement in respect of Bond Connect, the movement of cash and securities is carried out simultaneously on a real time basis. Pursuant to the prevailing regulations in Mainland China, the Central Moneymarkets Unit, being the offshore custody agent recognised by the Hong Kong Monetary Authority open omnibus nominee accounts with the onshore custody agent recognised by the PBOC (i.e., the China Securities Depository & Clearing Co., Ltd and Shanghai Clearing House). All bonds traded by eligible foreign investors will be registered in the name of Central Moneymarkets Unit, which will hold such bonds as a nominee owner.

**Important Note: please note that the liquidity of the China Interbank Bond Market is particularly unpredictable. Investors should read the “Liquidity Risk” and “Specific risks associated with China Interbank Bond Market” sections of the “Risk Considerations” section of this Prospectus prior to investing in the CIBM Funds.**

### **German Tax Rules – Equity Funds**

It is the intention of the Management Company to seek to maintain the status as “equity funds” or “mixed funds” (as applicable) pursuant to Sec. 2 para. 6 and 7 of the German Investment Tax Act as applicable from 1 January 2018 for the Funds listed below. Accordingly, as of the date of this Prospectus and notwithstanding any other provision in this Prospectus (including Appendix A):

- (a) each of the following Funds (“equity funds”) invests more than 50% of its Gross Assets on a continuous basis directly into Equities as defined below in accordance with Sec. 2 para. 8 of the German Investment Tax Act as applicable from 1 January 2018:

AI Innovation Fund, Asian Dragon Fund, Asian Growth Leaders Fund, Asian Sustainable Equity Fund, Brown To Green Materials Fund, China Fund, Circular Economy Fund, China Innovation Fund, Continental European Flexible Fund, Developed Markets Sustainable Equity Fund, Emerging Markets Equity Income Fund, Emerging Markets Ex-China Fund, Emerging Markets Sustainable Equity Fund, Euro-Markets Fund, European Equity Income Fund, European Equity Transition Fund, European Fund, European Special Situations Fund, European Sustainable Equity Fund, European Value Fund, FinTech Fund, Future Of Transport Fund, Global Equity Income Fund, Global Listed Infrastructure Fund, Global Long-Horizon Equity Fund, Global Unconstrained Equity Fund, India Fund, Japan Small & MidCap Opportunities Fund, Japan Flexible Equity Fund, Natural Resources Fund, Next

Generation Health Care Fund, Next Generation Technology Fund, Sustainable Energy Fund, Sustainable Global Dynamic Equity Fund, Sustainable Global Infrastructure Fund, Swiss Small & MidCap Opportunities Fund, Systematic China A-Share Opportunities Fund, Systematic China Environmental Tech Fund, Systematic Global Equity High Income Fund, Systematic Global SmallCap Fund, Systematic Islamic GCC Equity Fund, Systematic Islamic Saudi Arabia Equity Fund, United Kingdom Fund, US Basic Value Fund, US Flexible Equity Fund, US Growth Fund, US Mid-Cap Value Fund, US Sustainable Equity Fund, World Energy Fund, World Financials Fund, World Gold Fund, World Healthscience Fund, World Mining Fund and World Technology Fund.

- (b) Each of the following Funds (“mixed funds”) invests at least 25% of its Gross Assets on a continuous basis directly into Equities as defined below in accordance with Sec. 2 para. 8 of the German Investment Tax Act as applicable from 1 January 2018:

Emerging Markets Fund, Multi-Theme Equity Fund, MyMap Growth Fund, MyMap Moderate Fund and Sustainable Global Allocation Fund.

The “Gross Assets” of the Funds are defined as the value of the assets of the respective Fund without considering liabilities of such Fund (Sec. 2 para. 9a sentence 1 of the German Investment Tax Act as applicable from 1 January 2018).

Corporate actions, subscriptions/redemptions, index rebalancings and market movements may temporarily cause a Fund not to meet the Equities investment levels set out above. In such a case, the Fund will take possible and reasonable measures to re-establish the indicated investment levels without undue delay after getting knowledge of the shortfall. The Funds may also enter into securities lending for the purpose of efficient portfolio management. The Equities investment levels set out above are exclusive of Equities that are lent out.

For the purpose of the above percentage numbers, “Equities” means in accordance with Sec. 2 para. 8 of the German Investment Tax Act as applicable from 1 January 2018:

1. Shares of a corporation which are admitted to official trading on a stock exchange or listed on an organised market (which is a market recognised and open to the public and which operates in a due and proper manner),
2. Shares of a corporation, which is not a real estate company and which:
  - a. is resident in a Member State or a member state of the EEA and is subject to income taxation for corporations in that state and is not tax exempt; or
  - b. is resident in any other state and is subject to an income taxation for corporations in that state at a rate of at least 15% and is not exempt from such taxation,
3. Fund units of an equity fund (being a fund that invests more than 50% of its Gross Assets on a continuous basis directly in Equities) with 51% of the equity fund units' value – or, if the investment conditions of the equity fund provide for a higher minimum Equities investment, with the respective higher

percentage of the equity fund units' value – being taken into account as Equities, or

4. Fund units of a mixed fund (being a fund that invests at least 25% of its Gross Assets on a continuous basis directly in Equities) with 25% of the mixed fund units' value – or, if the investment conditions of the mixed fund provide for a higher minimum Equities investment, with the respective higher percentage of the equity fund units' value – being taken into account as Equities.

For purposes of calculating the investment levels set out above, the Funds may also consider the actual Equities quotas of the target funds published on each valuation day, provided that a valuation takes place at least once per week.

For the purpose of the above percentage numbers, the following in accordance with Sec. 2 para. 8 of the German Investment Tax Act as applicable from 1 January 2018 do not qualify as “Equities”:

1. Shares in partnerships, even if the partnerships are holding themselves shares in corporations,
2. Shares in corporations, which pursuant to Sec. 2 para. 9 sentence 6 of the German Investment Tax Act qualify as real estate,
3. Shares in corporations which are exempt from income taxation, to the extent these corporations are distributing their profits, unless the distributions are subject to a taxation of at least 15% and the investment fund is not exempt from this taxation, and
4. Shares in corporations:
  - a. whose income is directly or indirectly to more than 10% derived from shares in corporations, which do not fulfil the requirements of no. 2 a. or b. above, or
  - b. which are holding directly or indirectly shares in corporations that do not fulfil the requirements of no. 2. a. or b. above, if the value of these participations amounts to more than 10% of the market value of the corporations.

The above reflects the Management Company's understanding of the relevant German tax legislation at the date of this Prospectus. The legislation is subject to change and so adjustments to these figures may be made without prior notice.

Investors should refer to their tax advisors in relation to the implications of the Funds obtaining the status as “equity funds” or “mixed funds” (as applicable) pursuant to Sec. 2 para. 6 and 7 of the German Investment Tax Act as applicable from 1 January 2018.

#### **Japanese Tax Rules - Nippon Individual Savings Account (NISA) regulation**

It is the intention of the Management Company that the Funds listed below comply with the requirements on the use of derivatives (as described below), in order to remain eligible for investments from Nippon Individual Savings Account (“NISA”) compliant investors (pursuant to the applicable NISA regulations, as the Management Company understands NISA regulations), effective as of 1<sup>st</sup> January 2024. Accordingly, as of the date of this

Prospectus and notwithstanding any other provision in this Prospectus, the Funds below shall solely use derivatives for the following purposes:

- (a) for investment purposes provided the derivatives are covered by cash and/or near-cash instruments; or
- (b) for the purposes of liquidity management and/or hedging such as risks arising from FX rate fluctuations, interest rate fluctuations.

The following Funds will apply the above requirements on derivative use:

Circular Economy Fund, India Fund, World Mining Fund, World Gold Fund, World Energy Fund, Sustainable Energy Fund, Future of Transport Fund, World Technology Fund, World Healthscience Fund, World Financials Fund.

The above reflects the Management Company's understanding of the NISA regulation at the date of this Prospectus and investors should make their own assessment as to the NISA regulation to ensure that their investment into the Funds meet their understanding of these requirements. The regulation is subject to change and so adjustments to these requirements may be made without prior notice.

#### **Shari'ah Panel**

Amanie Advisors Ltd  
Al Fattan Currency House, Tower II, 1304, Dubai International Financial Center,  
Dubai, United Arab Emirates

Board members: Dr. Mohamed Ali Elgari, Dr. Mohd Daud Bakar, Dr. Muhammad Amin Ali Qattan, Dr. Osama Al Dereai

Compliance with Shari'ah in the operations of a Shari'ah Fund shall be determined by the Shari'ah Panel. The Shari'ah Panel consists of Shari'ah scholars with expertise in Islamic investment. The Shari'ah Panel's primary duties and responsibilities are to (i) advise on the Shari'ah aspects of a Shari'ah Fund, (ii) issue an opinion, by way of a Fatwa, ruling or guidelines as to whether the activities of a Shari'ah Fund comply with Shari'ah and (iii) make recommendations or issue guidance as to how a Shari'ah Fund could be made Shari'ah compliant. The Investment Adviser relies on the Shari'ah Panel's advice and guidance in ensuring that a Shari'ah Fund operates in a manner which is Shari'ah compliant.

The Shari'ah Panel will not be responsible for matters relating to (i) the management and supervision of the Company and its Funds, operations or vendors (not pertaining to Shari'ah), (ii) the application of Luxembourg or other jurisdictional law, (iii) determining what is the appropriate method to calculate income purification of the underlying securities.

Following guidance of the Shari'ah Panel, the Investment Adviser will ensure that any provisions or references to investment methods or techniques in the Prospectus, which would otherwise be available to a Shari'ah Fund in pursuing its investment policy, are not availed of to the extent they are not Shari'ah compliant. The Shari'ah Panel will advise on alternative investment techniques for a Shari'ah Fund which comply with a Shari'ah Fund's investment policy and are Shari'ah compliant.

The Shari'ah Panel will issue a Fatwa in respect of a Shari'ah Fund at its launch. Subject to a Shari'ah Fund's compliance with Shari'ah, the Shari'ah Panel will issue an annual Shari'ah compliance certificate for a Shari'ah Fund. With respect to certain investments in Shari'ah Funds, the Investment Adviser may request a written position from the Shari'ah Panel confirming the Shari'ah-compliant status of such investments, as further detailed in the investment objective and policy of the relevant Shari'ah Fund.

Conflicts of interest relating to the investment of a Shari'ah Fund's assets may arise between members of the Shari'ah Panel and a Shari'ah Fund. In the event that a conflict of interest does arise, members of the Shari'ah Panel will endeavour, so far as they are reasonably able, to ensure that it is resolved fairly. Subject to this, members of the Shari'ah Panel may effect transactions where those conflicts arise and shall not be liable to account for any profit, commission or other remuneration arising.

As at the date of this Prospectus, the members of the Shari'ah Panel comprised of the Amanie Advisors Shari'ah Supervisory Board Members are:

*Dr. Mohamed Ali Elgari (Chairman):* Dr. Mohamed Ali Elgari was previously a Professor of Islamic Economics and a former Director of the Centre for Research in Islamic Economics at King Abdul Aziz University in Saudi Arabia. He is an advisor to several Islamic financial institutions throughout the world and is also on the Shari'ah board of the Dow Jones Islamic Market Index. He is a member of, amongst others, the following Shari'ah Supervisory Boards - Dubai Islamic Bank, Credit Suisse, Merrill Lynch & Co, Rasmala Investments, UBS Islamic Finance, Saudi American Bank, Natixis Bank, FWU Group, Citi Islamic Investment Bank, HSBC Amanah Takaful Malaysia, Credit Agricole (Dubai), the Islamic Fiqh Academy as well as the Accounting & Auditing Organisation for Islamic Financial Institutions (AAOIFI). Dr. Elgari has written several books on Islamic banking. He is a graduate of the University of California with a Ph.D. in Economics.

*Dr. Mohd Daud Bakar (Executive Member):* Dr. Mohd Daud Bakar is the Founder and Executive Chairman of Amanie Group. He is the former Chairman of First Abu Dhabi Bank (UAE), the Shariah Advisory Council (SAC) at the Central bank of Malaysia, the Securities Commission of Malaysia, and Permodalan Nasional Berhad (PNB).

Dr. Mohd Daud is a Shariah Board Member of various global financial institutions, including Amanie Advisors Ltd (Dubai, UAE), and Amanie Advisors Sdn Bhd (Malaysia), where he serves as Chairman. He also chairs Salama Insurance (Dubai) and Habib Metropolitan Bank (Pakistan). Additionally, he serves on the Shariah boards of BNP Paribas Najma (Bahrain), Guidance Financial (USA), Amundi Asset Management (Paris), Dow Jones Islamic Market Index (USA), Standard & Poor's Islamic Index (USA), Oasis Asset Management (South Africa), Morgan Stanley (Dubai), Sedco Capital (Saudi Arabia and Luxembourg), Credit Agricole CIB (Dubai), Madina Takaful (Oman), and Abu Dhabi Commercial Bank UAE (UAE). Dr. Mohd Daud received his first degree in Shariah from University of Kuwait in 1988 and obtained his Ph.D. from University of St. Andrews, United Kingdom in 1993 before completing his external Bachelor of Jurisprudence at University of Malaya in 2002.

*Dr. Muhammad Amin Ali Qattan:* Dr. Qattan has a Ph.D. in Islamic Banking from Birmingham University and is a lecturer and a prolific author of texts and articles on Islamic economics and finance. He is currently a freelance consultant, lecturer and trainer in Islamic banking and finance. Dr. Qattan also serves as the Shariah advisor to many reputable institutions such as Ratings Intelligence, Standard & Poors Shariah Indices amongst others. He is a highly regarded Shariah Scholar and is based in Kuwait.

*Dr. Osama Al Dereai:* Dr. Osama Al Dereai is a Shariah scholar who has an extensive experience in teaching, consulting and research in the field of Islamic finance. Dr. Al Dereai obtained his Masters degree from the International Islamic University (Malaysia) and was later conferred his Doctorate in Islamic Transactions from the University of Malaya. Dr. Al Dereai is a Shariah board member of various financial institutions which include the First Leasing Company, Barwa Bank, Barwa Capital (UK), First Investment Company and Ghanim Al Saad Group of Companies, Asian Islamic Investment Management Sdn. Bhd. Djala Islamic Brokerage Company (W.L.L) First Finance Company (Q.S.C.) amongst others. He received his Bachelor's degree specializing in the Science of Hadeth Al Sharef from the prestigious Islamic University of Madina.

### Shari'ah Funds

While it is intended that the Shari'ah Funds are Shari'ah compliant at all times, there remains the possibility that the Fund invest in non-Shari'ah compliant asset, due to circumstances outside the control of the Fund, human error or omission at the level of the Investment Adviser, or another party, changes to the Shari'ah status of one or more constituents of the Index or another reason. An asset is deemed to be a non-Shari'ah compliant asset where it becomes non-compliant with the exclusion rules set out in the Index provider's screening methodology, as further detailed in section "Investments in a Shari'ah Fund" of the Appendix A, or it is deemed as non-compliant by the Shari'ah Panel following the annual screening of investments, as further detailed in section "Risk of non-compliance with Shari'ah".

In the case where Shari'ah-compliant asset becomes non-Shari'ah compliant, the Investment Adviser will take the necessary corrective measures within a reasonable period of time, by taking into account the interest of the investors, in order to correct the situation of non-compliance.

In the event of an active non-compliance with investment rules resulting in a loss for the Fund, the Fund will be compensated in accordance with the principles set forth in the Circular CSSF 24/856 regarding the protection of investors.

In the event that a capital gain or income is realized by selling the non-Shari'ah compliant asset, such amount will be purified by allocating the purification proceeds among charities, in accordance with the purification process as described in section "Purification of non-Shari'ah compliant Income". Any impure amount donated to a charity will be reflected, together with the selected beneficiary charity, in the Company's annual report. Any such amounts will be deducted only upon their actual determination and no anticipated accrual thereof shall be made.

Set out below is the current list of charitable organisations that have been selected by the Shari'ah Panel and duly approved by the Board of Directors:

Alzheimer Europe  
(Luxembourg)

available on : <https://www.alzheimer-europe.org/>

Fondation Cancer  
(Luxembourg)

available on : <https://www.cancer.lu/fr>

### Purification of Non-Shari'ah Compliant Income

Shari'ah Funds employ a Sharia-compliant purification process to ensure that all income stemming from the Fund's investments and which is accrued in the Net Asset Value remains pure. This process involves the receipt of purification data on a monthly basis from the Shari'ah Fund's Index provider, allowing the Fund Accountant to identify, on a monthly basis, any non-Shari'ah compliant ("impure") income arising from dividend and interest events. Such impure income is systematically tracked and excluded from the Fund's Net Asset Value on each Dealing Day, ensuring alignment with Shari'ah at all times. As a result, the Net Asset Value remains purified and is published on a daily basis, free from any impure income.

### Pillar Two

The OECD has issued work relating to the introduction of a system ensuring a minimum level of taxation for multinational enterprises ("Pillar Two"). The Pillar Two rules<sup>2</sup> aim to ensure that large multinational enterprise (MNE) groups pay a minimum level of tax on the income arising in each of the jurisdictions where they operate, by imposing a top-up tax whenever the effective tax rate, determined on a jurisdictional basis, is below the minimum rate specified in Pillar Two.

If an Investor entity – or, where applicable, its ultimate parent entity – consolidates (or is deemed to consolidate) the Fund in its consolidated financial statements ("Consolidated Financial Statements"), there is a risk that the Fund may become subject to Pillar Two tax.

If the Fund falls within the scope of Pillar Two, the effective tax rates within its structure could increase due to higher amounts of tax being due or the possible denial of deductions. Tax compliance costs may also increase, which could adversely affect returns to the Investors. In the event the Fund becomes liable for any Pillar Two tax, this may reduce the amounts available for distribution to the Investors.

Each Investor agrees to indemnify the Fund, on demand, for any Pillar Two tax liability and tax compliance costs that may be incurred by the Fund as a result of a (deemed) consolidation in the Consolidated Financial Statements relating to that Investor.

To the extent that any Pillar Two tax liability arises at the level of an Investor entity or, where applicable, the MNE group to which it belongs, as a result of the investment in the Fund, such liability shall be borne solely by the Investor giving rise to it (and not borne by the Fund or any other Investor. Investors are responsible for assessing their own Pillar Two tax position in connection with their investment in each Fund, including whether they may be required to consolidate the Fund on a line-by-line basis in their Consolidated

<sup>2</sup> The OECD's 2021 "Tax Challenges Arising from Digitalisation of the Economy – Global Anti-Base Erosion Model Rules (Pillar Two): Inclusive Framework on BEPS" (the Model Rules) and Council Directive (EU) 2022/2523 of 14 December 2022 on ensuring a global minimum level of taxation for multinational enterprise groups and large-scale domestic groups in the EU (the Pillar Two Directive), together with any current or future similar or related legislation in respect of any EU or non-EU jurisdiction and, in each case, any current or future legislation, regulations, guidance or official interpretations in connection therewith.

Financial Statements. Investors must notify BlackRock as soon as any such (deemed) consolidation requirement is identified.

BlackRock reserves the right to redeem the investment shares of any Investor if such investment gives rise to additional Pillar Two tax at the level of the Fund and/or results in additional filing or compliance obligations for the Fund.

#### **Investment in initial public offerings.**

Where a Fund invests in initial public offerings ("IPOs"), or new debt issues, the prices of securities involved in initial public offerings or new debt issues are often subject to greater and more unpredictable price changes than more established. Specifically, the market values of IPO shares may experience high volatility from factors such as the absence of a prior public market, unseasoned trading, the limited number of shares available for trading and limited information about the issuer. Additionally, a Fund may hold IPO shares for a period of time, which may increase a Fund's expenses. Some investments in IPOs may have an immediate and significant impact on a Fund's performance.

The Investment Adviser will ascertain that investments in such asset class shall be compliant with article 41(1)(d) of the 2010 Law and may initially be included in the trash ratio accordingly.

#### **Risk Management**

The Management Company is required by regulation to employ a risk management process in respect of the Funds, which enables it to monitor accurately and manage the global exposure from financial derivative instruments ("global exposure") which each Fund gains as a result of its strategy.

The Management Company uses one of two methodologies, the "Commitment Approach" or the "Value at Risk Approach" ("VaR"), in order to measure the global exposure of each of the Funds and manage the potential loss to them due to market risk. The methodology used in respect of each Fund is detailed below.

#### **VaR Approach**

The VaR methodology measures the potential loss to a Fund at a particular confidence (probability) level over a specific time period and under normal market conditions. The Management Company uses the 99% confidence interval and one month measurement period for the purposes of carrying out this calculation.

There are two types of VaR measure which can be used to monitor and manage the global exposure of a fund: "Relative VaR" and "Absolute VaR". Relative VaR is where the VaR of a Fund is divided by the VaR of an appropriate benchmark or reference portfolio, allowing the global exposure of a Fund to be compared to, and limited by reference to, the global exposure of the appropriate benchmark or reference portfolio. The regulations specify that the VaR of the Fund must not exceed twice the VaR of its benchmark. Absolute VaR is commonly used as the relevant VaR measure for absolute return style Funds, where a benchmark or reference portfolio is not appropriate for risk measurement purposes. The regulations specify that the VaR measure for such a Fund must not exceed 20% of that Fund's Net Asset Value.

In respect of those Funds that are measured using VaR, the Management Company uses Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others. The type of VaR measure used for each Fund is set out

below and where this is Relative VaR the appropriate benchmark or reference portfolio used in the calculation is also disclosed.

#### **Commitment Approach**

The Commitment Approach is a methodology that aggregates the underlying market or notional values of financial derivative instruments to determine the degree of global exposure of a Fund to financial derivative instruments.

Pursuant to the 2010 Law, the global exposure for a Fund under the Commitment Approach must not exceed 100% of that Fund's Net Asset Value.

#### **Leverage**

A fund's level of investment exposure (for an equity fund, when combined with its instruments and cash) can in aggregate exceed its net asset value due to the use of financial derivative instruments or borrowing (borrowing is only permitted in limited circumstances and not for investment purposes). Where a fund's investment exposure exceeds its net asset value this is known as leverage. The regulations require that the Prospectus includes information relating to the expected levels of leverage in a fund where VaR is being used to measure global exposure. The expected level of leverage of each of the Funds is set out below and expressed as a percentage of its Net Asset Value. The Funds may have higher levels of leverage in atypical or volatile market conditions for example when there are sudden movements in investment prices due to difficult economic conditions in a sector or region. In such circumstances the relevant Investment Adviser may increase its use of derivatives in a Fund in order to reduce the market risk which that Fund is exposed to, this in turn would have the effect of increasing its levels of leverage. For the purposes of this disclosure, leverage is the investment exposure gained through the use of financial derivative instruments. It is calculated using the sum of the notional values of all of the financial derivative instruments held by the relevant Fund, without netting. The expected level of leverage is not a limit and may vary over time.

#### **Regulation (EU) 2016/1011 of the European Parliament and of the Council (the "Benchmark Regulation")**

In respect of those Funds that track a benchmark index, or are managed by reference to a benchmark index, the Company works with the applicable benchmark administrators for the benchmark indices of such Funds to confirm that the benchmark administrators are, or intend to get themselves, included in the register maintained by ESMA under the Benchmark Regulation.

The list of benchmark administrators that are included in the Benchmark Regulation Register is available on ESMA's website at [www.esma.europa.eu](http://www.esma.europa.eu). As at 1 September 2019, the following administrators are included in the Benchmark Regulation Register:

- ▶ IHS Markit Benchmark Administration Limited
- ▶ ICE Data Indices LLC
- ▶ FTSE International Limited
- ▶ S&P Dow Jones Indices LLC
- ▶ STOXX Ltd
- ▶ SIX Financial Information Nordic AB

The MSCI Limited is currently in transition and will have to be authorised in the EU in accordance with the Benchmark Regulation from 31 December 2025. The Management Company will monitor the Benchmark Regulation Register and, if there are any changes, this information will be updated in the Prospectus at the next opportunity. The Company has in place and maintains robust written plans setting out the actions that it would take in the event that a benchmark is materially changed or ceases to be provided, such plans being available upon request and free of charge at the registered office of the Company.

### Investment Objectives and Policies of the Funds

The **AI Innovation Fund** seeks to maximise total return and capital growth and invest in a manner consistent with the principles of environmental, social and governance (“ESG”) investing. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is the advancement, development and use of artificial intelligence (AI) technology. The Investment Adviser considers, in its discretion, that a company is an AI company if it is expected to derive future revenue from the advancement, development, and use of AI technology.

Such companies are generally expected to operate in one or more of the following areas: (i) computing and infrastructure (e.g., graphics processing units (GPUs), cloud computing and data centers); (ii) foundational models; (iii) data (e.g., vertical industry data and proprietary data); (iv) software (e.g., enterprise applications); (v) services (e.g., information technology (IT) services); (vi) internet (e.g., chatbots or content creation); or (vii) hardware (e.g., robotics, smart glasses).

In normal market conditions the Fund will invest in equity securities of companies with large, medium and small market capitalisation (market capitalisation is the share price of the company multiplied by the number of shares issued). Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

### Risk management measure used: Commitment Approach.

#### ESG Policy

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this

analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary “Fundamental Insights” methodology (the “Methodology”, see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are “in transition” and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI All Countries World Information Technology 10/40 Index (the “Index”) for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The MSCI All Countries World Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Asian Dragon Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, Asia, excluding Japan.

The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the QFI regime and/or via the Stock Connects. The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

### Risk management measure used: Commitment Approach.

#### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI All Country Asia ex

Japan Index (the “Index”) when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Asian Growth Leaders Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their activity in Asia, excluding Japan. The Fund places particular emphasis on sectors and companies that, in the opinion of the Investment Adviser, exhibit growth investment characteristics, such as above-average growth rates in earnings or sales and high or improving returns on capital.

The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly up to 30% in aggregate of its total assets in the PRC by investing via the QFI regime and/or via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund’s investments. In doing so, the Investment Adviser will refer to the MSCI All Country Asia ex Japan Index (the “Index”) when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Asian High Yield Bond Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in the Asia Pacific region. The Fund may invest in the full spectrum of permitted fixed income transferable securities and fixed income related securities, including non-investment grade. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and QFI Access Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China via the QFI regime and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund’s exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using the iBoxx ChinaBond Asian High Yield (USD Hedged) Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 70% of Net Asset Value.**

**Important Note: please note that the liquidity of Asian high yield bond market is particularly unpredictable. Investors should read the “Liquidity Risk” sections of the “Risk Considerations” section of this Prospectus and the “Suspension and Deferral” section of Appendix B of this Prospectus prior to investing in this Fund.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund’s investments. In doing so, the Investment Adviser will refer to the iBoxx ChinaBond Asian High Yield (USD Hedged) Index (the “Index”) when constructing the Fund’s portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund’s investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.

Further details are available at the index providers website at [www.spglobal.com/spdji/](http://www.spglobal.com/spdji/).

The **Asian Multi-Asset Income Fund** seeks to provide income and long-term capital growth from its investments. The Fund invests at least 70% of its total assets, directly and indirectly through permitted investments, in fixed income transferable securities and equity securities of issuers and companies domiciled in, or exercising the predominant part of their economic activity in, Asia, excluding Japan. The Fund invests in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (including non-investment grade), units of CIS, cash, deposits and money market instruments. The Fund has a flexible approach to asset allocation with a bias towards income-generating securities (including fixed income transferable securities and dividend-paying equities). Currency exposure is flexibly managed.

The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly in the PRC by investing via the QFI regime and/or via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the QFI regime, the Stock Connects, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using 50% MSCI Asia ex Japan Index / 25% JP Morgan Asia Credit Index / 25% Markit iBoxx ALBI Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed and the asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Adviser's discretion. The Investment Adviser may refer to a composite benchmark comprising MSCI Asia ex Japan Index (50%), the JP Morgan Asia Credit Index (25%) and the Markit iBoxx ALBI Index (25%) (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. The components of the Index (i.e. MSCI Asia ex Japan Index (50%), the JP Morgan Asia Credit Index (25%) and the Markit iBoxx ALBI Index) may be quoted separately in marketing material related to the Fund. Further details are available at the index providers website at [www.msci.com](http://www.msci.com), [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs) and [www.spglobal.com/spdji/](http://www.spglobal.com/spdji/).

The **Asia Pacific Bond Fund** seeks to maximise income without sacrificing long term capital growth and seeks to invest, in a manner consistent with the principles of environmental, social and governance (ESG) focused investing.

The Fund invests at least 70% of its total assets in fixed income transferable securities of issuers domiciled in, or exercising the predominant part of their economic activity in the Asia Pacific region.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

As part of its investment objective, the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 15% of total assets and the Fund's exposure to Distressed Securities is limited to 5% of its total assets.

The Fund invests no more than 20% of its total assets in non-investment grade fixed income transferable securities.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using iBoxx USD Asia-Pacific ex-Greater China Non-Sovereigns Investment Grade Climate Transition Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

In very limited circumstances, the Fund may inadvertently gain indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that are inconsistent with the exclusions described above.

The Fund seeks to have a weighted average absolute carbon emission contribution (scope 1+ scope 2 excluding green and sustainable bonds) that is 30% lower than the ESG Reporting Index.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so the Investment Adviser will refer to the:

- (i) iBoxx USD Asia-Pacific ex-Greater China Non-Sovereigns Investment Grade Climate Transition Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.
- (ii) iBoxx USD Asia-Pacific ex-Greater China Non-Sovereigns Investment Grade Capped Index (the "ESG Reporting Index") to assess the impact of ESG screening on the Fund's investment universe. The ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at <https://www.spglobal.com/spdji/en/methodology/article/iboxx-usd-asia-pacific-ex-greater-china-non-sovereigns-investment-grade-climate-transition-index-methodology>

The **Asian Sustainable Equity Fund** seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled, or whose main business is, in Asia (excluding Japan) in a manner consistent with the principles of sustainable investing.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. For derivatives, any ESG rating or analyses referenced above will apply only to the underlying.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the Index as defined below.

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will limit direct investment in securities of issuers involved in the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than its Index.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits. The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also

known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI AC Asia ex Japan (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. In the opinion of the Investment Adviser, the Index is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Asian Tiger Bond Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the fixed income transferable securities of issuers domiciled in, or exercising the predominant part of their economic activity in, Asian Tiger countries. The Fund may invest in the full spectrum of available securities, including non-investment grade. The currency exposure of the Fund is flexibly managed.

The Fund is a QFI Access Fund and may invest directly up to 20% of its total assets in the PRC by investing via the QFI regime.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the QFI regime, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets and the Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using JP Morgan Asian Credit Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 150% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so the Investment Adviser will refer to the JP Morgan Asia Credit Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index providers website at [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs).

The **Brown To Green Materials Fund** seeks to maximise total return. The Fund invests in the equity securities of companies globally that contribute to the transitioning materials theme. The transitioning materials theme covers the need for materials to build lower carbon technologies and efforts to reduce the emissions intensity of the materials sector. As well as being aligned to the principles of the transitioning materials theme, at least 80% of the Fund's total assets will be invested in companies which qualify under BlackRock's proprietary 'Transition Assessment' methodology. Although the intention is to invest only in equity securities of such companies, the Fund may gain limited indirect exposure to other equity securities, fixed income securities, CIS or cash (which may not be consistent with the transition theme) for the purposes of meeting the Fund's objective or for liquidity purposes.

The Fund seeks to invest in Sustainable Investments and the Fund seeks for its total assets to be invested in accordance with the principles of environmental, social and governance (ESG) Policy described below.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply the EU Climate Transition Benchmark Exclusions.

The Investment Adviser will identify a universe of potential investments within the following categories of companies – consistent with the principles of the transitioning materials theme:

**Emission Reducers:** suppliers of materials that have a plan to reduce their carbon emissions intensity over a defined period.

**Enablers:** producers of materials that enable the world to transition to a lower carbon global economy (e.g. lithium) and companies providing solutions that enable materials companies to reduce their emissions intensity.

**Green Leaders:** companies producing materials with below average carbon emissions intensity for their industry (e.g. within the steel sector).

References to materials above include materials that enable transition to a lower carbon economy and materials for which lower carbon technologies are not a key demand driver.

Having determined those companies which meet the principles of the transitioning materials theme, the Fund will further apply BlackRock's proprietary 'Transition Assessment' methodology to ensure a minimum of 80% of the Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. In the opinion of the Investment Adviser, the MSCI All Countries World Index (MSCI ACWI) is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The MSCI ACWI measures the performance of large and mid-capitalisation stocks across developed and emerging markets countries. Investors may also use the MSCI ACWI Materials Index to compare the performance of the Fund, and in particular to measure the performance of the materials sector. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The **China Bond Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in Renminbi or other non-Chinese domestic currencies issued by entities exercising the predominant part of their economic activity in the PRC through recognised mechanisms including but not limited to the Chinese Interbank Bond Market, the exchange bond market, quota system and/or through onshore or offshore issuances and/or any future developed channels. The Fund is a QFI Access Fund and a CIBM Fund and may invest without limit in the PRC via the QFI regime and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest in the full spectrum of permitted fixed income transferable securities and fixed income related securities, including non-investment grade (limited to 50% of total assets). Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 190% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The 1 Year China Household Savings Deposit Rate should be used by investors to compare the performance of the Fund.

The **China Fund** seeks to maximise total return and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, the People's Republic of China.

The Fund is a QFI Access Fund and a Stock Connect Fund and may invest directly up to 20% in aggregate of its total assets in the PRC by investing via the QFI regime and/or via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

## **Risk management measure used: Commitment Approach.**

### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### **Benchmark use**

The Fund is actively managed and the investment adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI China 10/40 Index when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors

to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **China Innovation Fund** seeks to achieve long-term capital growth and invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in a portfolio of equity securities or equity-related securities (including derivatives) of, or giving exposure to companies domiciled in, or exercising the predominant part of their activity in, or from, Greater China and whose goods and services are contributing to Greater China's competitive advantage through technology innovation, with a focus on companies that generate revenues from innovative technologies such as artificial intelligence, computing, automation, robotics, technological analytics, e-commerce, payment systems, electric and autonomous vehicles, communications technology and generative design. Greater China refers to the People's Republic of China (PRC) and the Republic of China (Taiwan).

In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation.

The Fund is a Stock Connect Fund and may invest directly up to 100% of its total assets in the PRC by investing via the Stock Connects.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

## **Risk management measure used: Commitment Approach.**

The Fund's total assets will be invested in accordance with the ESG Policy described below.

### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition"

and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Investment Adviser will refer to the MSCI China All Shares Index for risk management purposes to ensure that the active risk (i.e. degree of deviation from the MSCI China All Shares Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The **China Multi-Asset Fund** follows an asset allocation policy that seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (ESG) investing.

In order to achieve its investment objective, the Fund will seek to invest at least 70% of its total assets (excluding cash) in the full spectrum of permitted investments to gain exposure to the People's Republic of China ("PRC") which may include issuers and/or companies exercising the predominant part of their economic activity in the PRC. The Fund's permitted investment may include equities, equity-related securities, fixed income transferable securities and fixed income related transferable securities including non-investment grade securities (limited to 20% of total assets), units or shares in undertakings for collective investment (including exchange traded funds), derivatives and, when determined appropriate, cash, deposits and cash-equivalent instruments. The Fund may, at times, take indirect exposure to relevant assets, including commodities, through investments in undertakings for collective investment (including exchange traded funds), and derivatives on commodity indices where applicable.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases

or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets.

The Fund has a flexible approach to asset allocation. The Fund is a QFII Access Fund, a Stock Connect Fund and a CIBM Fund and may invest without limit in the PRC via the QFII regime, via the Stock Connects and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

### **Risk management measure used: Commitment Approach.**

### **ESG Policy**

Where the Fund holds securities directly, the Fund will apply the BlackRock EMEA Baseline Screens.

The Fund will invest at least 80% of total assets, excluding cash and derivatives, in Collective Investment Schemes qualifying as Article 8 or 9 of the SFDR Regulation and investment strategies which pursue a positive ESG objective or outcome and do not adopt ESG exclusionary screens solely as their ESG policy, or, in the case of government bond exposures, track benchmark indices incorporating ESG requirements. Where determined appropriate, the Fund may invest directly in derivatives, cash and near-cash instruments.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining companies (i.e. those companies which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on their ability to manage the ESG related risks and opportunities associated with their business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. The Fund has an unconstrained investment style.

The **China Onshore Bond Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in fixed income transferable securities denominated in Renminbi issued by entities exercising the predominant part of their economic activity in the PRC (through recognised mechanisms including (but not limited to) the Chinese Interbank Bond Market, the exchange bond market, quota system and/or through onshore or offshore issuances and/or any future developed channels) in a manner consistent with the principles of environmental, social and governance "ESG" focused investing. The 70% ratio above may include, on a temporary basis and for liquidity management purposes the holding of cash and near cash instruments.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

The Fund is a QFI Access Fund and a CIBM Fund and may invest without limit in the PRC via the QFI regime and in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest in the full spectrum of permitted fixed income transferable securities and fixed income related securities, including non-investment grade (limited to 50% of total assets). Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to**

**read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 120% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens. Investors should please note in relation to the screen which covers the UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption) that at the time of the launch of this Fund, coverage of the investable universe is limited but is expected to improve over time.

The Investment Adviser also intends to invest at least 10% of the Fund's total assets in "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively). In very limited circumstances, the Fund may inadvertently gain indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that are inconsistent with the exclusions described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The 1 Year China Household Savings Deposit Rate should be used by investors to compare the performance of the Fund.

The **Circular Economy Fund** seeks to maximise total return. The Fund invests at least 80% of its total assets in the equity securities of companies globally that benefit from, or contribute to, the advancement of the "Circular Economy". Although the intention is to invest only in such equity securities, up to 20% of the total assets of the Fund may be invested in other equity securities, fixed income securities, CIS or cash (which may not be consistent with the Circular Economy concept) for the purposes of meeting the Fund's objective or for liquidity purposes.

The Circular Economy concept recognises the importance of a sustainable economic system and represents an alternative economic model to the default "make-use-throw away" approach of consumption, which is believed to be unsustainable given scarce resources and the rising cost of managing waste. The Circular Economy concept promotes the redesign of products and systems to minimise waste and to enable greater recycling and reuse of materials. The Fund's total assets will be invested in accordance with the ESG Policy described below.

#### **ESG Policy**

The Fund will apply the EU Paris-Aligned Benchmark Exclusions.

The Fund will also aim to invest in line with the principles of the Circular Economy as determined by the Investment Adviser (having regard to specialist third party information sources as appropriate). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and

small market capitalisation, across all industry sectors, that benefit from the Circular Economy and/or contribute to the advancement of the Circular Economy across three categories:

**Adopters:** Companies that are adopting 'circularity' in their business operations (e.g. companies involved in sustainable fashion or companies that have made a commitment to use recycled plastics in production processes).

**Enablers:** Companies that provide new, innovative solutions directly aimed at solving inefficient material use and pollution (e.g. companies involved in recycling of products, companies involved in reducing inputs such as water and energy and companies enabling sustainable transportation).

**Beneficiaries:** Companies that provide alternatives to materials that cannot be recycled or supply these to the extended value chain (e.g. companies that will see an increase in demand for their products from shifts towards more easily recyclable products and companies that offer natural or plant-based circular alternatives to non-recyclable and non-biodegradable products).

The assessment of a company's benefit from and/or contribution to the advancement of the Circular Economy in each of the above categories may be based on percentage of revenue, a defined total revenue threshold, or any connection to the Circular Economy regardless of the amount of revenue received. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the Circular Economy and on their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

The weighted average ESG rating of the Fund will be higher than the ESG rating of the MSCI ACWI after eliminating at least 20% of the least well-rated securities from the index.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has

discretion to select the Fund's investments and is not constrained by any benchmark in this process. In the opinion of the Investment Adviser, the MSCI All Countries World Index (MSCI ACWI) is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The MSCI ACWI measures the performance of large and mid-capitalisation stocks across developed and emerging markets countries. Further details are available at the index provider website at [www.msci.com/acwi](http://www.msci.com/acwi).

The ***Climate Transition Multi-Asset Fund*** seeks to maximise total return by investing in issuers globally that are expected to enable, and/or benefit from, the transition to a lower greenhouse gas emissions economy and to net zero carbon emissions. The Fund invests in the full spectrum of permitted investments including (but not limited to) equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments. Currency exposure and asset allocation is flexibly managed. The Fund may invest without limitation in securities denominated in currencies other than the reference currency (Euro).

Although it is likely that most of the Fund's investments will be in issuers located in developed markets globally, the Fund may also invest in emerging markets.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below and at the levels set out in its SFDR Pre-Contractual Disclosure in Appendix H.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations.

The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

#### **ESG Policy**

The Fund will apply the EU Climate Transition Benchmark Exclusions.

The Fund will apply BlackRock's proprietary 'Transition Assessment' methodology to ensure a minimum of 80% of the

Fund's total assets are invested in securities that align with the requirements for products with transition-related terms in their name under the ESMA guidelines on funds' names.

The weighted average ESG rating of the Fund will be higher than the Index after eliminating at least 20% of the least well-rated securities from the Index. The weighted average ESG rating excludes certain asset classes, such as funds, that are not supported by ESG rating providers. In such cases, the Investment Adviser will assess these holdings to ensure they are in line with the Environmental objective of the Fund.

More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the ESG criteria described above.

The Fund's ESG score will be calculated as the total of each issuers ESG score (where applicable), weighted by its market value. The ESG score of the relevant benchmark will be calculated using the ESG scores of the relevant asset class indices weighted to reflect the benchmark allocations. These scores may be quoted for individual asset classes or allocation weighted in marketing material.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Risk management measure used: Relative VaR using MSCI All Country World All Cap Index 65% and Bloomberg Global Aggregate Bond Index (Hedged to EUR) 35% as the appropriate benchmark.**

**Expected level of leverage of the Fund: 300% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Investment Adviser may refer to a composite benchmark (which it believes is a fair representation of the Fund's investment universe) comprising the MSCI All Country World All Cap Index 65% and Bloomberg Global Aggregate Bond Index (hedged to EUR) 35% (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in asset classes or securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. The components of the Index (i.e. MSCI All Country World All Cap Index 65% Index and Bloomberg Global Aggregate Bond Index (hedged to EUR) 35%) may be quoted separately in marketing material related to the Fund. Further details are available at the index providers website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices) and [www.msci.com](http://www.msci.com).

The **Continental European Flexible Fund** seeks to maximise total return in a manner consistent with the principles of

environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in Europe excluding the UK. The Fund normally invests in securities that, in the opinion of the Investment Adviser, exhibit either growth or value investment characteristics, placing an emphasis as the market outlook warrants.

The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

#### **ESG Policy**

Companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.

The Investment Adviser conducts enhanced analysis on all companies that it considers to have heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers, and proprietary models.

The Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology (the "Methodology", see further detail on <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>) to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time, or are otherwise meeting other criteria in accordance with the Methodology requirements.

The Methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the Methodology for investment and is approved in accordance with the Methodology, it is eligible to be held by the Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the Methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Fund in accordance with the Methodology.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so the Investment Adviser will refer to the FTSE World Europe ex UK Index when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.ftserussell.com/products/indices/russell-us](http://www.ftserussell.com/products/indices/russell-us).

The **Developed Markets Sustainable Equity Fund** seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in, global developed markets in a manner consistent with the principles of sustainable investing.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

Although most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

**Risk management measure used: Commitment Approach.**

### ESG Policy

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities; the mining, production and supply activities related to nuclear power, the production of adult entertainment materials, unconventional oil and gas production, and, the production of conventional weapons. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than its Index as defined below.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

Companies in the portfolio are evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI World Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. In the opinion of the Investment Adviser, the Index is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The Index measures the performance of large and mid-capitalisation companies across developed markets globally. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Diversified Tactical Fund** seeks to achieve a positive absolute return through a combination of capital growth and income with a limited correlation to market movements. The Fund seeks to achieve its objective by investing globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (which may include up to 10% of its total assets in high yield fixed income transferable securities), shares or units of CIS (including exchange-traded funds), Money Market Instruments, deposits, foreign currencies and cash, along with any other securities or instruments outlined in Appendix B.

The Fund will not have a geographical or sector focus but may have a high allocation to particular countries or sectors at any one time. The Fund will mainly invest in developed markets but may

also have exposure to emerging markets. The asset allocation of the Fund is intended to be flexible to allow the Fund to allocate across countries and maintain the ability to adjust its exposures as market conditions dictate.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

In order to achieve its investment objective and policy, the Fund will invest in a variety of investment instruments using discretionary investment techniques to derive investment themes based on research and analysis of macro-economic data.

The Fund's investment strategy seeks to evaluate the underlying issuers of the securities and instruments set out above according to the following macroeconomic categories: 'growth', 'inflation', 'policy' and 'pricing'.

- ▶ Within the growth category, the Fund uses statistical and mathematical techniques to assess indicators such as real output, balance of payments (i.e. transactions between entities in a given country with the rest of the world) and economic relationships between different countries.
- ▶ Within the inflation category, the Fund uses statistical and mathematical techniques to assess indicators such as inflation pressures, input costs to producers, labour costs and the effects of changes in exchange rates.
- ▶ Within the policy category, the Fund uses statistical and mathematical techniques to assess indicators such as fiscal and monetary policy regimes.
- ▶ Within the pricing category, the Fund uses statistical and mathematical techniques to assess indicators such as relative value and asset price correlations.

These categories are then used in the Fund's investment process to determine which markets, securities and foreign currencies will comprise the Fund's portfolio, with a higher allocation being made to those underlying issuers whose securities correspond positively with the above criteria.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Where the Fund uses derivatives, this may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets) and at times these levels of market leverage may be high. The use of derivatives will inevitably create leverage, because of the required calculation method i.e. leverage is the sum or gross notional exposure created by the derivatives used. A high leverage number is not necessarily an indication of high risk.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations.

The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans

and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

**Risk management measure used: Relative VaR using MSCI World Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 250% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Investment Adviser may also consider additional factors relating to good governance in its assessment of the sustainability related characteristics of underlying issuers depending on the particular ESG strategy applicable to the Fund.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI World Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. In the opinion of the Investment Adviser, the Index is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Dynamic High Income Fund** follows a flexible asset allocation policy that seeks to provide a high level of income. In

order to generate high levels of income the Fund will seek diversified income sources across a variety of asset classes, investing significantly in income producing assets such as fixed income transferable securities, including corporate and government issues which may be fixed and floating and may be investment grade, sub-investment grade or unrated, covered call options and preference shares. The Fund will use a variety of investment strategies and may invest globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities, units of CIS, cash, deposits and money market instruments. Currency exposure is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets, its exposure to contingent convertible bonds is limited to 20% of total assets and its exposure to structured notes qualifying as transferable securities (which may embed a derivative) is limited to 30% of total assets. Where structured notes embed a derivative, the underlying instruments to such structured notes will be UCITS eligible investments.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using 70% MSCI World Index / 30% Bloomberg Global Aggregate Bond Index USD Hedged as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed and the asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Adviser's discretion. In selecting these, the Investment Adviser may take into consideration a composite benchmark comprising MSCI World Index (70%) and the Bloomberg Global Aggregate Bond Index USD Hedged (30%) (the "Index") when constructing the Fund's portfolio, and for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. Whilst the Index is used by the Investment Adviser in constructing the portfolio of the Fund, the Investment Adviser is not bound by its components or weighting when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. The components of the Index (i.e. MSCI World Index and Bloomberg Global Aggregate Bond Index USD Hedged) may be quoted separately in marketing material related to the Fund. Further details are available at the index providers website at [www.bloomberg.com/professional/products/indices](http://www.bloomberg.com/professional/products/indices) and [www.msci.com](http://www.msci.com).

The **Emerging Europe Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging European countries. It may also invest in companies domiciled in and around, or exercising the predominant part of their economic activity in and around, the Mediterranean region.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so the Investment Adviser will refer to the MSCI Emerging Markets Europe 10/40 Index when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Emerging Markets Bond Fund** seeks to maximise total return. The Fund invests at least 70% of its total assets in the fixed income transferable securities of governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets. The Fund may invest in the full spectrum of available securities, including non-investment grade. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Ghana, Indonesia, Lebanon, Mexico, the Philippines, Russia, Sri Lanka, Turkey, Ukraine, Venezuela and Zambia, countries which are, at the date of this Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the JP Morgan Emerging Markets Bond Index Global Diversified Index (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.

The Fund's exposure to contingent convertible bonds is limited to 10% of total assets and the Fund's exposure to Distressed Securities is limited to 15% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using JP Morgan Emerging Markets Bond Index Global Diversified Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 150% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so the Investment Adviser will refer to the JP Morgan Emerging Markets Bond Index Global Diversified Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs).

The *Emerging Markets Corporate Bond Advanced Fund* seeks to maximise total return and invest in a manner consistent with the

principles of environmental, social and governance ("ESG") investing.

The Fund invests at least 70% of its total assets in the fixed income transferable securities issued by companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets and included within the J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified (the "Index" and the securities comprised within it being the "Index Securities"). The Index provides the investment universe for at least 70% of the Fund's total assets. The weighting of Index Securities within the Fund's portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.

The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent a significant part of the portfolio and are likely to exceed 50% of the Fund's net asset value.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Hungary, Indonesia, Mexico, the Philippines, Russia, Republic of South Africa, Turkey and Ukraine, countries which are, at the date of this Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the J.P. Morgan ESG Corporate Emerging Market Bond Index Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.

Currency exposure is flexibly managed.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of its total assets.

**Risk management measure used: Relative VaR using J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **ESG Policy**

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.

The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <https://www.jpmorgan.com/insights/research/index-research/composition-docs>.

The Fund may also invest in fixed income transferable securities of an issuer which is not included in the Fund's benchmark index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).

In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

The Investment Adviser intends the Fund to have a carbon emissions intensity score that is lower than the J.P. Morgan Corporate Emerging Market Bond Index Broad Diversified (the "ESG Reporting Index"). The ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments, provided that: the Fund will invest at least 70% of its total assets in fixed income (FI) securities within the J.P. Morgan ESG Corporate Emerging Market Bond Index Broad Diversified (the "Index"). The Fund will also refer to the Index for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the weighting of the Index when selecting Index Securities. The geographical scope and the environmental, social and governance ("ESG") requirements (described below) of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available on the index provider website at [www.jpmorgan.com/insights/research/index-research/composition-docs](http://www.jpmorgan.com/insights/research/index-research/composition-docs).

The **Emerging Markets Corporate Bond Fund** seeks to maximise total return. The Fund invests at least 70% of total assets in fixed income transferable securities issued by companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets. Currency exposure is flexibly managed.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund's exposure to contingent convertible bonds is limited to 20% of total assets and the Fund's exposure to Distressed Securities is limited to 10% of its total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using JPMorgan Corporate Emerging Markets Bond Index Broad Diversified as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the JP Morgan Corporate Emerging Markets Bond Index Broad Diversified (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation

from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs).

The **Emerging Markets Equity Income Fund** seeks an above average income from its equity investments without sacrificing long term capital growth. The Fund invests globally at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets. Investment may also be made in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets that have significant business operations in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Emerging Markets Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Emerging Markets Ex-China Fund** seeks to maximise total return through a combination of capital growth and income on Fund assets. The Fund invests globally at least 80% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, excluding China. Investments may also be made in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets that have significant business operations in emerging markets (excluding China).

The Fund may indirectly invest in emerging markets securities (excluding China) by investing in American Depositary Receipts

(ADRs) and Global Depositary Receipts (GDRs), which are listed or traded on stock-exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Commitment Approach.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Emerging Markets ex-China 10/40 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Emerging Markets Fixed Maturity Bond Fund 2028** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund uses a "buy and maintain" strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 4 years and 2 months comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund);
- ii) the "**Investment Period**": a period of 3 years immediately following the Pre Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the "**Ramp-up Period**"); and
- iii) the "**Post Investment Period**": a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the "**Maturity Date**").

During the Pre Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 50% of its Net Asset Value is invested in emerging markets corporate fixed income securities issued by companies domiciled in, or whose main business is in, emerging markets;
- up to 50% of the Fund's Net Asset Value can be invested in bonds and money market instruments (i.e. debt securities with short term maturities) that may be issued by governments and government agencies of, and supranationals domiciled in, or the main business of which is in, emerging markets; and
- up to 50% of the Fund's Net Asset Value is invested in emerging markets fixed income securities which, at the time of purchase, are rated non-investment grade.

Should the credit quality of fixed income securities held by the Fund deteriorate causing the Fund to hold greater than 50% of its Net Asset Value in sub-investment grade or unrated, fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in securities which have average maturities of up to 4 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have average maturities of up to 3 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not

exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 5 months and the Maturity Date to be changed to a later date.

### Subscriptions

Shareholders may subscribe into the Fund during the Pre Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link  
<https://www.blackrock.com/lu/individual/products/product-list>.

Within 20 Business Days after the end of the Pre Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on such Maturity Date.

### Redemptions

Shareholders will be able to redeem their Shares in the Fund during the Pre Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. The Fund's total assets will be invested in accordance with the ESG Policy described below.

**Risk management measure used: Commitment Approach.**

## ESG Policy

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

## Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The **Emerging Markets Fund** seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets. Investment may also be made in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, developed markets that have significant business operations in emerging markets.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

## Risk management measure used: Commitment Approach.

## Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Emerging Markets Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **Emerging Markets Impact Bond Fund** seeks to achieve capital growth and income over the long term (at least five consecutive years) by investing at least 80% of its total assets in a relatively concentrated global portfolio of "Green, Social and Sustainability" (GSS) bonds issued by governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets, where the proceeds of such GSS bonds are tied to green and socially responsible projects.

The Fund may invest more than 50% (but not more than 70%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments rated non-investment grade. The exposure to any one non-investment grade country will not exceed 10% of the Fund's Net Asset Value.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

## ESG Policy

The Fund will apply the EU Paris-Aligned Benchmark Exclusions.

The Fund invests in "impact" investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return. More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. The Fund may invest in the full spectrum of available fixed income securities, including non-investment grade. Currency exposure is flexibly managed.

For the selection of GSS bonds, the Investment Adviser will analyse the use of proceeds of the issues and the issuer framework for alignment of the bonds with the Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability

Bond Guidelines (SBG) of the International Capital Markets Association to determine suitability within the investment universe. For the entire portfolio, the Investment Adviser will base investment decisions on issuer specific research (such as sovereign and credit analysis comprising a multi factor framework assessing global, country and issuer specific risk to determine issuers' ability and willingness to pay over the long term) to identify and select the GSS bonds and other fixed income securities that, in the opinion of the Investment Adviser, have the potential to produce attractive long-term returns whilst also being consistent with the United Nations Sustainable Development Goals ("UN SDGs"). The UN SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health, education, and economic growth, and a reduction in inequalities, all whilst tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: <https://sdgs.un.org/goals>.

For the selection of non-GSS bonds, including emerging market corporate bonds and sovereign bonds, the Investment Adviser will only invest in highly rated ESG bonds.

The investment strategy reduces the investment universe of the Fund by at least 20%. For the purposes of measuring this reduction only, a combination of the JP Morgan Emerging Markets Bond Index and JPMorgan Corporate Emerging Markets Bond Index is used to define the investment universe.

The Investment Adviser also intends to limit direct investment in securities of issuers which, in the opinion of the Investment Adviser, have any exposure to, or ties with, controversial weapons; derive more than five per cent of their revenue from the production, distribution, licensing, retail or supply of tobacco or tobacco-related products; the production or distribution of firearms or small arms ammunitions intended for retail civilians; are deemed to have failed to comply with one or more of the ten United Nations Global Compact Principles ("UNGC"), which cover human rights, labour standards, the environment and anti-corruption.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund

**Risk management measure used: Absolute VaR.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments). The JP Morgan ESG Green Bond Emerging Markets Index (USD Hedged) (the "Index") should be used by investors to compare the performance of the Fund over the long term. The Index measures the performance of green bonds across emerging markets. Further details are available at the index provider website at [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs).

The *Emerging Markets Local Currency Bond Fund* seeks to maximise total return. The Fund invests at least 70% of its total assets in local currency-denominated fixed income transferable

securities issued by governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets. The full spectrum of available securities, including non-investment grade, may be utilised. Currency exposure is flexibly managed.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund is a QFI Access Fund and may invest directly up to 20% of its total assets in the PRC by investing via the QFI regime.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the QFI regime, the Foreign Access Regime and/or Bond Connect.

The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Brazil, Hungary, Indonesia, Russia Republic of South Africa and Turkey, countries which are, at the date of this Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the JP Morgan GBI-EM Global Diversified Index (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using JP Morgan GBI-EM Global Diversified Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 480% of Net Asset Value.**

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the JP Morgan GBI-EM Global Diversified Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical

scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. Further details are available at the index provider website at [www.jpmorgan.com/insights/global-research/index-research/composition-docs](http://www.jpmorgan.com/insights/global-research/index-research/composition-docs).

The **Emerging Markets Sustainable Equity Fund** seeks to maximise total return by investing at least 70% of its total assets in the equity securities of companies domiciled in, or whose main business is in, emerging markets in a manner consistent with the principles of sustainable investing.

The investment decisions are based on the Investment Adviser's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. This approach aims to identify and select equity and equity-related securities that can, through a concentrated portfolio, reflect the Investment Adviser's conviction to deliver the Fund's investment objective. The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the Index as defined below.

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in: the production and retail sales of alcoholic products; the ownership or operation of gambling-related activities or facilities and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The ESG criteria also consists of a rating of B or higher as defined by MSCI's ESG Intangible Value Assessment Ratings or another equivalent third party ESG data provider.

The weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 20% of the lowest rated securities from the Index.

The Investment Adviser intends the Fund to have a carbon emissions intensity score at least 20% lower than its Index.

More than 90% of the issuers of securities (excluding MMFs) the Fund invests in are ESG rated or have been analysed for ESG purposes.

Companies in the portfolio are then evaluated by the Investment Adviser based on their sustainability characteristics and their ability to manage ESG risks and opportunities. To undertake this analysis, the Investment Adviser may use data provided by external ESG data providers, proprietary models and local intelligence and may undertake site visits.

The Investment Adviser engages with companies to support improvement in their environmental, social and governance ("ESG") credentials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the MSCI Emerging Markets Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. In the opinion of the Investment Adviser, the Index is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The Index measures the performance of large and mid-capitalisation companies across emerging markets globally. Further details are available at the index provider website at [www.msci.com](http://www.msci.com).

The **ESG Emerging Markets Blended Bond Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing.

The Fund invests at least 70% of its total assets in fixed income transferable securities issued by governments and government agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, denominated in both emerging market and non-emerging market currencies, and included within the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (the "Index", and the securities comprised within it being the "Index Securities"). The Index provides the investment universe for at least 70% of the Fund's total assets. The weighting of Index Securities within the Fund's portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index. The asset allocation of the Fund is intended to be flexible and the Fund will maintain the ability to switch exposure between currencies and issuers as market conditions and other factors dictate.

The Fund seeks to invest in Sustainable Investments, including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.

The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent a significant part of the portfolio and are likely to exceed 50% of the Fund's net asset value.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Hungary, Ghana, Indonesia, Mexico, the Philippines, Sri Lanka, Russia, Republic of South Africa, Turkey, Ukraine and Zambia, countries which are, at the date of this Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.

Currency exposure is flexibly managed.

The Fund's exposure to Distressed Securities is limited to 15% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**Risk management measure used: Relative VaR using J. P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) as appropriate benchmark.**

**Expected level of leverage of the Fund: 550% of Net Asset Value.**

### ESG Policy

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.

The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <https://www.jpmmorgan.com/insights/research/index-research/composition-docs>.

The Fund may also invest in fixed income transferable securities of emerging markets and non-emerging markets issuers which are not included in the Fund's benchmark index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).

In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined under the Benchmark use section below) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments, provided that: the Fund will invest at least 70% of its total assets in fixed income (FI) securities within the J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (the "Index"). In doing so, the Investment Adviser will refer to the:

- ▶ J.P. Morgan ESG Blended Emerging Market Bond Index (Sovereign) (the "Index"), for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the weighting of the Index when selecting Index

Securities. The geographical scope and the ESG requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.

- ▶ J.P. Morgan Blended Emerging Market Bond Index (Sovereign) (the “ESG Reporting Index”) to assess the impact of ESG screening on the Fund’s investment universe. The ESG Reporting Index is not intended to be used when constructing the Fund’s portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at [www.jpmorgan.com/insights/research/index-research/composition-docs](http://www.jpmorgan.com/insights/research/index-research/composition-docs).

The **ESG Emerging Markets Bond Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance (“ESG”) focused investing.

The Fund invests at least 70% of its total assets in the fixed income transferable securities of governments and government agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in, emerging markets, and included within the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (the “Index” and the securities comprised within it being “Index Securities”). The Index provides the investment universe for at least 70% of the Fund’s total assets. The weighting of Index Securities within the Fund’s portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index.

The Fund seeks to invest in Sustainable Investments including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below. The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent a significant part of the portfolio and are likely to exceed 50% of the Fund’s net asset value.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Argentina, Brazil, Ghana, Indonesia, Mexico, the Philippines, Sri Lanka, Russia, Turkey, Ukraine and Zambia, countries which are, at the date of this Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country’s bond market represents of the emerging market bond universe within the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and

the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.

Currency exposure is flexibly managed.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund’s exposure to Distressed Securities is limited to 15% of its total assets and its exposure to contingent convertible bonds is limited to 10% of total assets.

**Risk management measure used: Relative VaR using J. P. Morgan ESG Emerging Market Bond Index Global Diversified as the appropriate benchmark.**

**Expected level of leverage of the Fund: 150% of Net Asset Value.**

### ESG Policy

In selecting such Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will analyse which ESG factors drive an issuer’s ESG credentials within the Index and its broader ESG performance.

The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <https://www.jpmorgan.com/insights/research/index-research/composition-docs>.

The Fund may also invest in fixed income transferable securities of an issuer which is not included in the Index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).

In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined under the Benchmark use section below) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments, provided that the Fund will invest at least 70% of its total assets in fixed income (FI) securities within the J.P. Morgan ESG Emerging Market Bond Index Global Diversified (the "Index"). In doing so, the Investment Adviser will refer to the:

- ▶ J.P. Morgan ESG Emerging Market Bond Index Global Diversified (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the weighting of the Index when selecting Index Securities. The geographical scope and the environmental, social and governance ("ESG") requirements (described below) of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.
- ▶ J.P. Morgan Emerging Market Bond Index Global Diversified (the "ESG Reporting Index") to assess the impact of ESG screening on the Fund's investment universe. The ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at [www.jpmorgan.com/insights/research/index-research/composition-docs](http://www.jpmorgan.com/insights/research/index-research/composition-docs).

The **ESG Emerging Markets Local Currency Bond Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing.

The Fund invests at least 70% of its total assets in the fixed income transferable securities issued by governments of emerging markets, denominated in the local currency of such emerging markets countries and included within the J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (the "Index", and the securities comprised within it being the "Index Securities"). The Index provides the investment universe for at

least 70% of the Fund's total assets. The weighting of Index Securities within the Fund's portfolio may differ from the weightings of securities within the Index, as the Fund is actively managed and does not seek to track the Index.

The Fund seeks to invest in Sustainable Investments including, but not limited to, "green bonds" (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy described below.

The full spectrum of fixed income transferable securities, including non-investment grade, may be utilised. Investments in high yield fixed income transferable securities are expected to represent an important part of the portfolio and are likely to exceed, depending on market conditions, 30% of the Fund's net asset value.

The Fund is a CIBM Fund and may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.

The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey, countries which are, at the date of this Prospectus, rated non-investment grade. Such investments are based on (i) reference to the weighting that the relevant country's bond market represents of the emerging market bond universe within the J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions), and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign/foreign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Due to market movements, as well as credit/investment rating changes, the exposures may change over time. The afore-mentioned countries are for reference only and may change without prior notice to Shareholders.

Currency exposure is flexibly managed.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 5% of total assets.

**Risk management measure used: Relative VaR using J. P. Morgan ESG Government Bond Index – Emerging Market Global Diversified Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 480% of Net Asset Value.**

### **ESG Policy**

In selecting Index Securities, the Investment Adviser will, in addition to other investment criteria, take into account the ESG characteristics of the relevant issuer. The Investment Adviser will

analyse which ESG factors drive an issuer's ESG credentials within the Index and its broader ESG performance.

The Index methodology assesses and ranks potential constituents according to their ESG credentials relative to their industry peers. This means that the Index provider, J.P. Morgan LLC, carries out an assessment on the sustainability and ethical impact of those constituents in accordance with its predetermined methodology. For further details please refer to <https://www.jpmorgan.com/insights/research/index-research/composition-docs>.

The Fund may also invest in fixed income transferable securities of an issuer which is not included in the Fund's benchmark index at the time of purchase, but which the Investment Adviser considers to meet similar ESG criteria (in addition to other investment criteria).

In addition to the above, the Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined under the Benchmark use Section below) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments, provided that: the Fund

will invest at least 70% of its total assets in fixed income (FI) securities within the J.P. Morgan ESG Government Bond Index-Emerging Market Global Diversified (the "Index"). In doing so the Investment Adviser will refer to the:

- ▶ J.P. Morgan ESG Government Bond Index – Emerging Market Global Diversified (the "Index"), for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the weighting of the Index when selecting Index Securities. The geographical scope and the environmental, social and governance ("ESG") requirements (described below) of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.
- ▶ J.P. Morgan Government Bond Index – Emerging Market Global Diversified (the "ESG Reporting Index") to assess the impact of ESG screening on the Fund's investment universe. The ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at [www.jpmorgan.com/insights/research/index-research/composition-docs](https://www.jpmorgan.com/insights/research/index-research/composition-docs).

The **European Multi-Asset Income Fund** follows a flexible asset allocation policy that seeks an above average income without sacrificing long-term capital growth. The Fund seeks to invest at least 70% of its assets, directly and indirectly through permitted investments in securities of companies domiciled in, or exercising the predominant part of their economic activity in Europe.

In order to generate income, the Fund will take a level of risk commensurate with its risk Index, referred to below. The Fund invests globally in the full spectrum of permitted investments, including equities, equity-related securities, fixed income transferable securities, units of CIS (including ETFs), derivatives, cash, deposits and Money Market Instruments. The fixed income transferable securities in which the fund invests may be issued by governments, agencies, companies and supnationals worldwide, including in emerging markets, and may be investment grade, and up to 50% of the Fund's total assets may be invested in non-investment grade or unrated. Currency exposure is flexibly managed.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

As part of its investment objective the Fund may invest up to 50% of its total assets in ABS and MBS which will typically be investment grade but may also include non-investment grade. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial

institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have significant exposure to ABS and MBS, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using 50% MSCI Europe Net TR in EUR and 50% Bloomberg Euro Aggregate Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 200% of Net Asset Value.**

#### **ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser also intends to limit direct investment in securities of issuers involved in the ownership or operation of gambling-related activities or facilities; and the production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### **Benchmark use**

The Fund is actively managed across asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Adviser's discretion. In doing so, the Investment Adviser may refer to a composite benchmark comprising 50% MSCI Europe Net TR in EUR and 50% Bloomberg Euro Aggregate Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components and weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio is expected to deviate materially from the Index. The components of the Index may be quoted separately in marketing material related to the Fund. Further details are available at the index providers website at [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices) and [www.msci.com](http://www.msci.com).

The **ESG Multi-Asset Fund** follows an asset allocation policy that seeks to maximise total return in a manner consistent with the

principles of environmental, social and governance "ESG" focussed investing.

The Fund invests globally in the full spectrum of permitted investments including equities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments.

The Fund seeks to invest in Sustainable Investments and its total assets will be invested in accordance with the ESG Policy described below.

The Fund has a flexible approach to asset allocation (which includes taking indirect exposure to commodities through permitted investments, principally through derivatives on commodity indices and exchange traded funds). The Fund may invest without limitation in securities denominated in currencies other than the reference currency (Euro). The currency exposure of the Fund is flexibly managed.

The Fund is a Stock Connect Fund and may invest directly in the PRC by investing via the Stock Connects. The Fund is a CIBM Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect.

As part of its investment objective the Fund may invest up to 10% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. The Fund may use total return swaps that have, in accordance with its investment policy, equity or fixed income transferable securities and equity or fixed income related securities as underlying assets. Investors should refer to Appendix G for more details on the expected and maximum portion of total return swaps held by the Fund. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

**Risk management measure used: Relative VaR using 25% MSCI World Index, 25% MSCI World Index hedged to EUR, and 50% Bloomberg Global Aggregate Bond Index hedged to EUR as the appropriate risk benchmark.**

**Expected level of leverage of the Fund: 175% of Net Asset Value.**

**ESG Policy**

The Fund will apply the BlackRock EMEA Baseline Screens and the EU Paris-Aligned Benchmark Exclusions.

The Investment Adviser also intends to limit investments in companies within the Global Industry Classification Standard (GICS) Oil & Gas Exploration & Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets. The Investment Adviser also intends to limit direct investment in securities of issuers involved in the production, distribution or licensing of alcoholic products; the ownership or operation of gambling-related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials. The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The Investment Adviser will exclude any issuer with a MSCI ESG rating below BBB.

The remaining companies (i.e. those companies which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits. The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.

The Fund's ESG score will be calculated as the total of each issuer ESG score (where applicable), weighted by its market value. The Investment Adviser will create a portfolio that seeks to deliver a superior ESG outcome versus the Index and the weighted average ESG rating of the Fund will be higher than the ESG rating of the Index after eliminating at least 25% of the least well-rated securities from the Index. The Investment Adviser intends the Fund to have a carbon emissions intensity score that is lower than the Index.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

**Benchmark use**

The Fund is actively managed with multiple asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Adviser's discretion. The Investment Adviser may refer

to a composite benchmark (which it believes is a fair representation of the Fund's investment universe) comprising the 25% MSCI World Index, 25% MSCI World Index hedged to EUR, and 50% Bloomberg Global Aggregate Bond Index hedged to EUR (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The components of the Index (i.e. MSCI World Index, MSCI World Index hedged to EUR, and Bloomberg Global Aggregate Bond Index hedged to EUR) may be quoted separately in marketing material related to the Fund. Further details are available on the index providers website at [www.msci.com](http://www.msci.com) and [www.bloomberg.com/professional/product/indices](http://www.bloomberg.com/professional/product/indices).

The **Euro Bond Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 80% of its total assets in investment grade fixed income transferable securities. At least 70% of total assets will be invested in fixed income transferable securities denominated in euro. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using Bloomberg Euro-Aggregate 500mm+ Bond Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 120% of Net Asset Value.**

## ESG Policy

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined under the Benchmark use Section below) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

At least 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.

The weighted average ESG rating of the corporate portion of the Fund will be higher than the ESG rating of the corporate portion of the ESG Reporting Index (as defined under the Benchmark use Section below).

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the:

- (i) Bloomberg Euro-Aggregate 500mm+ Bond Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The

Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.

- (ii) Bloomberg Euro-Aggregate Index (80%) and the Bloomberg Global Aggregate Index (20%) (the "ESG Reporting Index") to assess the impact of ESG screening on the Fund's investment universe. The ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at <https://www.bloomberg.com/company/press/bloomberg-completes-fixed-income-indices-rebrand/>.

The **Euro Corporate Bond Fund** seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests at least 70% of its total assets in investment grade corporate fixed income transferable securities denominated in euro. Currency exposure is flexibly managed.

As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to Shareholders. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly. The Fund's total assets will be invested in accordance with the ESG Policy described below.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.

The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

**This Fund may have a material exposure to ABS, MBS and non-investment grade debt, and investors are encouraged to read the relevant risk disclosures contained in the section "Specific Risk Considerations".**

**Risk management measure used: Relative VaR using ICE BofAML Euro Corporate Index as the appropriate benchmark.**

**Expected level of leverage of the Fund: 100% of Net Asset Value.**

## ESG Policy

The Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials) compared to the ESG Reporting Index (as defined under the Benchmark use Section below) and seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials).

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

The Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities)) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

## Benchmark use

The Fund is actively managed, and the Investment Adviser has discretion to select the Fund's investments. In doing so, the Investment Adviser will refer to the:

- (i) ICE BofAML Euro Corporate Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Investment Adviser is not bound by the components or weighting of the Index when selecting investments. The Investment Adviser may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope and credit rating requirements of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.
- (ii) Bloomberg Euro-Corporate Index (80%) and the Bloomberg US Corporate Index (20%) (the "ESG Reporting Index") to assess the impact of ESG screening on the Fund's investment

universe the ESG Reporting Index is not intended to be used when constructing the Fund's portfolio, for risk management purposes to monitor active risk, or to compare the performance of the Fund. Further details are available on the index provider website at <https://www.bloomberg.com/company/press/bloomberg-completes-fixed-income-indices-rebrand>.

The **Euro High Yield Fixed Maturity Bond Fund 2027** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund uses a "buy and maintain" strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 4 years and 2 months comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund);
- ii) the "**Investment Period**": a period of 3 years immediately following the Pre Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the "**Ramp-up Period**"); and
- iii) the "**Post Investment Period**": a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the "**Maturity Date**").

During the Pre Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 50% of its Net Asset Value is invested in high yield fixed income transferable securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. Such fixed income securities shall, at the time of purchase, shall be rated B or BB or equivalent rating.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in securities which have average maturities of up to 4 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have average maturities of up to 3 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 2 months and the Maturity Date to be changed to a later date.

### **Subscriptions**

Shareholders may subscribe into the Fund during the Pre Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link <https://www.blackrock.com/lu/individual/products/product-list>.

Within 20 Business Days after the end of the Pre Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in

accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### **Redemptions**

Shareholders will be able to redeem their Shares in the Fund during the Pre Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

The Fund is actively managed and the Investment Adviser has discretion to select the Fund's investments. The Fund's total assets will be invested in accordance with the ESG Policy described below.

### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

#### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The ***Euro High Yield Fixed Maturity Bond Fund 2028*** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG" focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates, (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 4 years and 2 months comprising three distinct periods namely:

- i) the **"Pre-Investment Period"**: an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the **"Launch Date"** of the Fund);
- ii) the **"Investment Period"**: a period of 3 years immediately following the Pre-Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the **"Ramp-up Period"**); and
- iii) the **"Post Investment Period"**: a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the **"Maturity Date"**).

During the Pre-Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period at least 50% of its Net Asset Value is invested in high yield fixed income securities, denominated in various currencies, issued by governments and agencies of, and companies domiciled in, or exercising the predominant part of their economic activity in Europe. Such fixed income securities shall, at the time of purchase, be rated B or BB or equivalent rating.

If, during the final year of the Investment Period, the minimum requirement of 50% invested in high yield fixed income securities cannot be met without compromising the credit rating or the

income target of the Fund, this minimum exposure requirement may not apply.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. The Fund may use financial derivative instruments for investment purposes, which could increase the total notional value of the portfolio's credit exposure to above 100%.

In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in fixed income securities which have a maturity of up to 4 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have maturities of up to 3 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits or minimum exposure requirements set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 2 months and the Maturity Date to be changed to a later date.

#### Subscriptions

Shareholders may subscribe into the Fund during the Pre-

Investment Period. At the end of the Pre-Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link <https://www.blackrock.com/uk/individual/en/literature/fund-announcement/blackrock-global-funds-fund-announcement>.

Within 20 Business Days after the end of the Pre-Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### Redemptions

Shareholders will be able to redeem their Shares in the Fund during the Pre-Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

**Risk management measure used: Commitment Approach.**

### ESG Policy

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials,

such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

**Risk management measure used: Commitment Approach.**

### ESG Policy

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The ***Euro Income Fixed Maturity Bond Fund 2029*** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 5 years and 2 months, subject to any extension of the Pre-Investment Period (as defined below), comprising three distinct periods namely:

- i) the **"Pre Investment Period"**: an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the **"Launch Date"** of the Fund), subject to any postponement of the Launch Date at the discretion of the Board of Directors, provided that the Launch Date cannot take place later than 4 months after the start of the Pre Investment Period;
- ii) the **"Investment Period"**: a period of 4 years immediately following the Pre-Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the **"Ramp-up Period"**); and
- iii) the **"Post Investment Period"**: a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the **"Maturity Date"**).

During the Pre-Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade;
- up to 25% of the Fund's Net Asset Value is invested in fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets, which, at the time of purchase, are rated non-investment grade. For the avoidance of doubt, this limit does not apply to instruments relating to such non-investment grade securities such as credit default swaps, currency swaps, futures and forwards.

If, during the final year of the Investment Period, the minimum requirement of 60% invested in fixed income securities rated investment grade issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members cannot be met without compromising the credit rating or the income target of the Fund, this minimum exposure requirement may not apply.

Should the credit quality of fixed income securities held by the Fund deteriorate to below investment grade causing the Fund to hold greater than 25% of its Net Asset Value in sub-investment grade fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. The Fund may use financial derivatives instruments for investment purposes.

In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in fixed income securities which have a maturity of up to 5 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have maturities of up to 4 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits or minimum exposure requirements set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 5 years and 2 months and the Maturity Date to be changed to a later date.

### Subscriptions

Shareholders may subscribe into the Fund during the Pre-Investment Period. At the end of the Pre Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link <https://www.blackrock.com/uk/individual/en/literature/fund-announcement/blackrock-global-funds-fund-announcement>.

Within 20 Business Days after the end of the Pre-Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### Redemptions

Shareholders will be able to redeem their Shares in the Fund during the Pre-Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing Day on which redemption is effected at all times but not including the Maturity Date.

**Risk management measure used: Commitment Approach.**

### ESG Policy

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

When investing in fixed income securities issued by companies, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to

manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.

### Benchmark use

The Fund is actively managed. The Investment Adviser has discretion to select the Fund's investments and is not constrained by any benchmark in this process.

The ***Euro Income Fixed Maturity Bond Fund 2030*** seeks to provide income, whilst also aiming to preserve the original amount of capital invested and investing in a manner consistent with the principles of environmental, social and governance "ESG"-focused investing.

The Fund pursues a low turnover strategy whereby fixed income securities will be held until their fixed maturity dates as part of a low turnover strategy (subject, among other factors, to ongoing monitoring of credit risk), when their capital will become repayable to the Fund. The Fund is therefore intended for investors who will hold Shares until they are finally redeemed upon the Maturity Date of the Fund, as defined hereunder.

The Fund is intended to have a fixed term of up to 5 years and 2 months, subject to any extension of the Pre Investment Period (as defined below), comprising three distinct periods namely:

- i) the "**Pre Investment Period**": an initial subscription period of up to 2 months from a date to be determined by the Board of Directors upon creation of the Fund until the date on which the Fund is launched (the "**Launch Date**" of the Fund), subject to any postponement of the Launch Date at the discretion of the Board of Directors, provided that the Launch Date cannot take place later than 4 months after the start of the Pre Investment Period;
- ii) the "**Investment Period**": a period of 4 years immediately following the Pre Investment Period including a ramp-up period of 20 Business Days, subject to the Investment Adviser's discretion to complete this within a longer time period depending on its assessment of market conditions (the "**Ramp-up Period**"); and
- iii) the "**Post Investment Period**": a period of up to 12 months following the Investment Period, ending on a date determined by the Investment Adviser at its discretion and on which the Fund will be automatically closed (the "**Maturity Date**").

During the Pre Investment Period and Ramp-up Period, the Fund will hold up to 100% of its Net Asset Value in cash, deposits,

Money Market Instruments, units of CIS and other cash equivalents.

In order to achieve its investment objective, the Fund will gradually look to build up its portfolio so that following the Ramp-up Period:

- at least 60% of its Net Asset Value is invested in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members. Such fixed income securities shall, at the time of purchase, be rated investment grade; and
- up to 25% of the Fund's Net Asset Value is invested in fixed income securities issued by companies domiciled in, or whose main business is in, global developed markets, which, at the time of purchase, are rated non-investment grade. For the avoidance of doubt, this limit does not apply to instruments relating to such non-investment grade securities such as credit default swaps, currency swaps, futures and forwards.

If, during the final year of the Investment Period, the minimum requirement of 60% invested in fixed income securities rated investment grade issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members cannot be met without compromising the credit rating or the income target of the Fund, this minimum exposure requirement may not apply.

Should the credit quality of fixed income securities held by the Fund deteriorate to below investment grade causing the Fund to hold greater than 25% of its Net Asset Value in sub-investment grade fixed income securities, the Fund may continue to hold the affected fixed income securities for a period of time, which could be three months or more, at the discretion of the Investment Adviser, in order to avoid a distressed sale of such downgraded securities.

Investment in fixed income securities may also include investments in instruments relating to such securities such as credit default swaps, currency swaps, futures and forwards. The Fund may use financial derivatives instruments for investment purposes.

In addition, when deemed appropriate, the Fund may invest in cash equivalents such as deposits, Money Market Instruments, and units of CIS for the purpose of cash management, and to achieve its investment goals.

During the Investment Period, Fund may invest up to 50% of its Net Asset Value in fixed income securities which have a maturity of up to 5 years, measured from the start of the Investment Period, where the Investment Adviser considers it to be appropriate to the investment objective and policy of the Fund. The remainder of the securities invested in by the Fund are intended to have maturities of up to 4 years, as measured from the start of the Investment Period.

During the Investment Period, all investment income and capital gains generated in the Fund will be reinvested back into the strategy at the discretion of the Investment Adviser and in accordance with the investment policy.

During the Post Investment Period, the Fund will invest progressively in securities (all as disclosed in this Investment

Policy section) which have shorter average maturities than those invested in by the Fund during the Investment Period.

In addition, in anticipation of the automatic closure of the Fund on the Maturity Date, the Fund may be fully invested in cash, deposits, Money Market Instruments, units of CIS and other cash equivalents for the purpose of cash management in order to redeem Shareholders on the Maturity Date in accordance with its investment policy, provided that holdings in cash shall not exceed 20% of the Fund's Net Asset Value, except during the last six months prior to the Maturity Date. For avoidance of doubt, Shareholders should note that during the Post Investment Period, the investment limits or minimum exposure requirements set out above in relation to the Investment Period shall no longer apply.

The Fund's exposure to Distressed Securities is limited to 10% of its total assets. In addition, the Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

The Fund does not qualify as a money market fund within the meaning of the Money Market Funds Regulation.

The Investment Adviser retains discretion to shorten or extend the Pre Investment Period, the Investment Period and the Post Investment Period, including but not limited to circumstances where the exercise of the suspension of the determination of the Net Asset Value, or the issue and redemption of Shares in the Fund, causes the term of the Fund to extend beyond 4 years and 2 months and the Maturity Date to be changed to a later date.

### **Subscriptions**

Shareholders may subscribe into the Fund during the Pre-Investment Period. At the end of the Pre-Investment Period, the Fund will be closed to new subscriptions.

Shareholders will be notified of the closure of the Pre Investment Period and opening of the Investment Period by means of a notice published at the following link <https://www.blackrock.com/uk/individual/en/literature/fund-announcement/blackrock-global-funds-fund-announcement>.

Within 20 Business Days after the end of the Pre-Investment Period, Shareholders will be informed in writing of the relevant Maturity Date. The Maturity Date shall be the date on which the Post Investment Period ends, within 12 months following the end of the Investment Period, as determined by the Investment Adviser at its discretion. On the Maturity Date, the Fund will be automatically closed and Shares in the Fund will be redeemed in accordance with the redemption provisions set out in this Prospectus, as if each investor remaining in the Fund on the Maturity Date had submitted an application form prior to the Maturity Date, requesting redemption in full on the Maturity Date.

### **Redemptions**

Shareholders will be able to redeem their Shares in the Fund during the Pre-Investment Period, the Investment Period or the Post Investment Period in compliance with the provisions set out under the section "Redemption of Shares".

A redemption fee of up to 1% will, at the discretion of the Management Company acting in the best interests of Shareholders, be charged on Shares, on the applicable Dealing

Day on which redemption is effected at all times but not including the Maturity Date.

#### **Risk management measure used: Commitment Approach.**

#### **ESG Policy**

The Fund will apply the following ESG policy following the end of the Ramp-up Period.

When investing in fixed income securities issued by companies, the Fund will apply the BlackRock EMEA Baseline Screens.

When investing in fixed income securities issued by a Member State of the EU, by its local authorities, by a third country or a public international body of which one or more Member States of the EU are members, the Fund will seek to invest at least 10% of these assets in Sustainable Investments. The Fund will also exclude sovereign bonds that score less than or equal to 2.0 in the BlackRock Sovereign Sustainability Index or are in the bottom quintile of the J.P. Morgan ESG sovereign scoring framework.

The Investment Adviser will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the Investment Adviser. During the Investment Period, the Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities (e.g. lower carbon emitting issuers and issuers with positive ESG credentials). The Investment Adviser will seek to limit exposure to investments that are deemed to have associated negative externalities (e.g. higher carbon emitters, issuers with certain controversial business practices, and issuers with negative ESG credentials) throughout the fixed term.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.

The remaining issuers (i.e. those issuers which have not yet been excluded from investment by the Fund) are then evaluated by the Investment Adviser based on, among other factors, their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on an issuer's financials.

To undertake this analysis, the Investment Adviser may use data provided by external ESG Providers, proprietary models and local intelligence and may undertake site visits.

The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers that do not meet the ESG criteria described above.

Please refer to the SFDR disclosures on page 55 for further details of the ESG commitments made by the Fund.
