Key information document production date: : 16/04/2026

What is this product ?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Product's investment objective is to maximize the total return from a combination of income and capital growth by investing in fixed income securities. The Product seeks to outperform the Bloomberg Euro-Aggregate Corporate Index (Bloomberg ticker: LECPTREU Index) on the recommended investment period.

The Product meets the criteria for Responsible management. Thus, the process and selection of all the securities in the portfolio take into account an internal evaluation of Corporate Responsibility (shareholder, social, societal, and environmental responsibilities) based on a proprietary financial analysis model. There is a limitation in the rating process due to the reliability of the published data, which depends on the credibility and auditing of companies' extra-financial reports. The Management Company implements a "best in universe" approach aimed at selecting the highest-rated issuers from an extra-financial perspective within their investment universe, regardless of their sector of activity, resulting in a reduction of the initial universe by at least 20%. The extra-financial analysis is conducted on at least 90% of the assets in the portfolio.

The overall investment strategy of the Product is to seek, in the medium term, a regular rate of total return consistent with the preservation of capital by investing in the Euro bond market and in other negotiable debt securities. The Product will seek to select securities in the fixed income universe by exploring various compartments of this market, including but not limited to, corporate bonds, government bonds, convertible & exchangeable bonds, perpetual bonds. The Product will invest mainly, directly or indirectly in fixed income securities issued or guaranteed by governments, corporate issuers, or supranational entities in the OECD. The Product's fixed income portfolio may be composed of securities belonging to the "speculative grade" category with a limit at B- rating by Standard & Poor's for example or that are considered of a comparable credit quality by the Management Company. Non-rated debt securities may not exceed 20% of its net assets. Debt securities with a rating under B- grade (at the time of the purchase), will not exceed a total of 10% of the Product's total assets. If a bond is downgraded to a rating under the B- grade, the relevant asset will not be sold unless, in the opinion of the Management Company, it is in the interest of Shareholders to do so. The Product can be invested in fixed income securities denominated in USD or GBP at a maximum level of 50% of the net asset value, the currency risk hedged in the base currency of the fund. Consequently, the currency risk should not exceed 10% of the net assets. The Product may also invest up to 60% of net assets in subordinated debts including up to 50% of its net assets in perpetual bonds (i.e., bonds without a maturity date). The Product may invest up to 20% of its net assets in contingent convertibles bonds.

The Product will use all types of eligible derivatives instruments traded on regulated or OTC markets when these contracts are better suited to the management objective or offer lower trading costs. These instruments may include, but are not restricted to: futures, options, swaps, CDS on indices, CDS and currency forwards.

The Product is actively managed. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant. The reference benchmark does not intend to be consistent with the environmental or social characteristics promoted by the Product.

This is an accumulation share.

INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

What are the risk and what could I get in return ?

Risk indicator

This risk indicator assumes you keep the Product for 2 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

This product is rated 2 out of 7, representing a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Other risks materially relevant to the Product and which could lead to a fall in the net asset value to which the indicator gives too little consideration : counterparty risk and operational risk.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

PERFORMANCE SCENARIOS

This figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not takes into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

Recommended holding period : 2 years Example Investment : 10,000 €		If you exit after 1 year	If you exit after 2 years
Scenarios	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	8,790 €	9,140 €
	Average return each year	-12.10 %	-4.40 %
Unfavourable	What you might get back after costs	8,830 €	9,140 €
	Average return each year	-11.70 %	-4.40 %
Moderate	What you might get back after costs	10,280 €	10,170 €
	Average return each year	2.80 %	0.90 %
Favourable	What you might get back after costs	11,110 €	11,880 €
	Average return each year	11.10 %	9.00 %

- The unfavourable scenario occurred for an investment between September 2020 and September 2022.
- The moderate scenario occurred for an investment between September 2019 and September 2021.
- The favourable scenario occurred for an investment between September 2022 and September 2024.

What happens if DNCA Finance is unable to pay out ?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs ?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COST OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed :

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. ;
- EUR 10 000 is invested.

Investment : 10,000 €	If you exit after 1 year	If you exit after 2 years
Total costs	357 €	533 €
Annual cost impact *	3.60 %	2.60 % each year

*The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 3.50 % before cost and 0.90 % after costs..

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This personne will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off upon entry or exit		If you exit after 1 year
Entry costs	Up to 2.00 % of the amount you pay in when entering this Investment. This is the most you will be charged. The person selling you the production will inform you of the actual charge..	up to 200 €
Exit cost	We do not charge an exit fee for this product..	0 €
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.09 % of the value of your investment per year. This is an estimate based on actual costs over the last year..	109 €

Transaction costs	0.18 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell..	18 €
Incidental costs taken under specific conditions		
Performance fees	20% of the positive performance net of any fees above Bloomberg Euro-Aggregate Corporate Index with High Water Mark. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	30 €

How long should I hold it can I take my money out early ?

Recommended holding period : 2 years

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product features a redemption gating mechanism ("Gates") and a net asset value adjustment mechanism with a trigger threshold ("Swing Pricing"), as described in the prospectus.

How can I complain ?

If you have any complaints about the Product, you can send a written request with a description of the problem either by e-mail service.conformite@dnca-investments.com or to the following address: DNCA Finance, 19 Place Vendôme, 75001 Paris.

Other Relevant Informations

The Product promotes environmental or social and governance (ESG) criteria within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability reporting in the financial services sector ("SFDR Regulation").

The Product's prospectus and the latest key information document, as well as the latest annual report and information on past performance, can be obtained free of charge from the website of the manufacturer: www.dnca-investments.com.
