The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 3 out of 7, which is a medium-low risk class on the basis of the PRIIPs regulation. This rates the potential losses from future

performance at medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. The categorisation of the Fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

Be aware of currency risk. You could receive payments in a different currency from your currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This Fund does not include any protection from future market performance so you could lose some or all of your investment.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 4 years

Due to its investment strategy, the Fund's value may vary considerably over the short time. You should therefore stay invested for at least 4 years to profit from gains on the longer term. If you disinvest earlier, there is a higher risk that you might get back only poor returns, or not even the sum you invested. The Fund is open-ended which means you can redeem money back at every NAV calculation and without having to pay penalties. If applicable to your Fund you will pay the exit fees only.

However, the Company may suspend the issue and redemption of fund units if exceptional circumstances make this appear necessary in the interests of investors, or restrict redemptions if investors' redemption requests reach a predetermined threshold above which redemption requests can no longer be executed in the interests of investors as a whole and/or extend the notice period for returning the units. The Company may spin off illiquid investments in the fund portfolio in the interests of investors. The detailed redemption procedure for fund units of the Fund is described in the prospectus.
