Directors' Report

To our shareholders,

The Board of Directors of Kempen International Funds SICAV (the "Fund" or "KIF") is pleased to present the Annual Report, including the audited financial statements of the Fund, for the financial year from 1 October 2023 to 30 September 2024.

Developments

The Fund currently comprises the following twelve Sub-Funds:

- Kempen (Lux) Global High Dividend Fund
- Kempen (Lux) European High Dividend Fund
- Kempen (Lux) Global Property Fund

- Kempen (Lux) Euro Sustainable Credit Fund

- Kempen (Lux) Sustainable European Small-cap Fund
- Kempen (Lux) Euro Credit Fund

- Kempen (Lux) Global Small-cap Fund
- Kempen (Lux) Euro High Yield Fund
- Kempen (Lux) Global Sustainable Equity Fund
- Kempen (Lux) Global Listed Infrastructure Fund
- Kempen (Lux) European Sustainable Equity Fund
- Kempen (Lux) European Property Fund

As at 30 September 2024, the Assets under Management of the Fund totaled EUR 5,987,875,307.62, compared to EUR 4,982,553,913.14 at 30 September 2023.

As of 11 January 2024, Mrs. Marlies Kolle was appointed as a new member of the Board of Directors of Kempen International Funds.

Corporate Governance statement

The Board of Directors of the Fund is responsible for supervising the Fund and its delegates in accordance with the articles of incorporation, prospectus, and laws and regulations applicable to Luxembourg investment funds.

The names of the Directors are listed with their principal occupations in the Directors and Administration section of the Annual Report. The Board of Directors confirms the Fund's adherence to the principles of the ALFI Code of Conduct for Luxembourg Investment Funds.

The Board consists of six Directors, two of whom are employees of the Management Company and Distributor, Van Lanschot Kempen Investment Management N.V. ("VLK Investment Management"). Another Director is Managing Partner of Mercier Vanderlinden Asset Management, a company affiliated with the Management Company. The remaining three Directors are non-executive and independent of the service providers of the Fund.

At Board meetings, which generally number at least four per financial year, the Directors review the management of the Fund's assets and all other significant matters so as to ensure that they maintain overall control and supervision of the Fund's affairs. The Board is responsible for the appointment and monitoring of all service providers to the Fund. The Directors are kept fully informed of investment and financial controls and other matters relevant to the business of the Fund.

The Directors are responsible for ensuring the Fund's Annual Report is prepared in accordance with Luxembourg GAAP and applicable legal and regulatory requirements.

Directors' Report (continued)

Internal Controls

The Board is also ultimately responsible for the Fund's system of internal controls and for reviewing its effectiveness. The Board confirms that there is an ongoing process for identifying, evaluating, and managing the significant risks faced by the Fund

Subsequent events

As of 1 October 2024, Mr. Kelly stepped down from his directorship in Kempen International Funds. The Articles of Incorporation published in the Memorial on 25 May 2009 were amended on 6 November 2024.

Business of the Annual General Meeting

The annual general meeting of shareholders is held at the registered office of the Fund in Luxembourg on the second Thursday of the month of January of each year at 2 p.m. (Luxembourg time) or, if any such day is not a Business Day, on the next following Business Day. The notice and the agenda of the meeting will be sent to the shareholders prior to the meeting. The next annual general meeting will be held on 9 January 2025.

Luxembourg, 18 December 2024 The Board of Directors of Kempen International Funds

* Details on Benchmark and longer term performances of the Sub-Fund (minimum 5 years) are available on <u>www.vanlanschotkempen.com</u> Note: the performance of the Sub-Funds compared to the performance of the Benchmarks can differ due to the differences between the Sub-Fund's portfolio and the constituents of the relevant Benchmarks.

The information stated in the report is historical and is not representative of futures results.

Audit report

To the Shareholders of Kempen International Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Kempen International Funds (the "Fund") and of each of its sub-funds as at 30 September 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the statement of Net Assets as at 30 September 2023;
- the statement of Operations and Changes in Net Assets for the period / for the year then ended;
- the securities portfolio as at 30 September 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

 $[\]label{eq:pricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg T: +352 494848 1, F: +352 494848 2900, www.pwc.lu$

Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256) R.C.S. Luxembourg B 65 477 - TVA LU25482518

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Financial Statements as at 30 September 2024

Note 1. General information

Kempen International Funds (the "Fund") is an open-ended investment company organised as a societe anonyme under the laws of the Grand-Duchy of Luxembourg and qualifies as a "Societe d'Investissement a Capital Variable" (SICAV). The Fund is registered under part I of the amended law of 17 December 2010 on undertakings for collective investment (the "2010 law"). The Fund was incorporated on 28 April 2009 for an unlimited period.

The Fund is registered with the Registre de Commerce et des Societes Luxembourg under the number RCS B 146.018. The Articles of Incorporation have been published in the Memorial on 25 May 2009 and amended for the last time on 15 March 2023.

The Board of Directors of the Fund has appointed Van Lanschot Kempen Investment Management N.V. ("VLKIM") to act as its Management Company. The Management Company is located in the Netherlands and is licensed to act as a Fund Management Company by the Dutch Authority for the Financial Markets ("AFM") pursuant to Dutch law. The CSSF have been notified in advance that the Management Company will act as Management Company of the Fund on a cross border basis.

The Fund consists of twelve Sub-Funds, all operational at year-end. All Sub-Funds are denominated in Euro (€):

- Kempen (Lux) Global High Dividend Fund
- Kempen (Lux) European High Dividend Fund
- Kempen (Lux) Global Property Fund
- Kempen (Lux) Sustainable European Small-cap Fund
- Kempen (Lux) Euro Credit Fund

Note 2. Summary of significant accounting policies

Presentation of Financial Statements

The Financial Statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment and generally accepted accounting principles in the Grand-Duchy of Luxembourg.

Combined Financial Statements

The Combined Financial Statements are expressed in Euro and correspond to the sum of items in the financial statements of each Sub-Fund, and if applicable, converted into Euro at the exchange rate prevailing at the closing date.

Valuation of Assets

The value of any cash on hand or on deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full in which case the value thereof shall be arrived at after making such discount as the Board of Directors of the Fund may consider appropriate in such case to reflect the true value thereof.

The value of securities and/or financial derivative instruments which are quoted or dealt in on any regulated market or in another regulated market is based on the last closing price available at the applicable valuation point as described for each Sub-Fund in the last prospectus approved by the CSSF. All Sub-Funds are valued based on closing price as of 30 September 2024. The value is obtained on the principal market on which such securities and/or financial derivatives are traded.

In the event that any of the securities held in the Sub-Fund's portfolio on the relevant day are not quoted or dealt in on any Regulated Market or other regulated market or if, with respect to securities quoted or dealt in on any Regulated Market or dealt in another regulated market, the price as determined as above is not representative of the fair market value of the relevant securities, the value of such securities is determined based on the reasonably foreseeable sales price determined prudently and in good faith under the responsibility of the Board of Directors of the Fund.

Shares or units in open-ended investment funds shall be valued at their last available calculated net asset value.

Note 2. Summary of significant accounting policies (continued)

Valuation of Assets(continued)

Financial derivative instruments which are not listed on any Regulated Market or traded on any other regulated market are subject to reliable and verifiable valuation on a daily basis in accordance with market practice.

Unrealised gains or losses on outstanding forward currency exchange contracts are valued on the basis of currency exchange rates prevailing at the relevant valuation date. The changes in such amounts are included in Statement of operations and changes in net assets. Unrealised gains or losses are recorded in the Statement of net assets.

Regulated financial futures contracts are valued at the exchange quoted settlement price. Initial margin deposits are made upon entering into the contracts and can be either in cash or securities. During the year the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by "marking-to-market" to reflect the market value of the contracts at the end of each business day's trading. Variation margin payments are made or received, depending upon whether losses or gains are incurred. The frequency of those margin payments may differ depending on where the contract is traded. When a contract is closed, the Sub-Fund records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract recorded in the Statement of operations and changes in net assets. Unrealised gains or losses are recorded in the Statement of net assets.

Options purchased are recorded as investments; options written or sold are recorded as liabilities. When the exercise of an option results in a cash settlement, the difference between the premium and the settlement proceeds is accounted for as a realised gain or loss. When securities are acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium. When an option is closed, the difference between the premium and the cost to close the position is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain or loss. The market values are recorded in the Statement of net assets.

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual issuers. Net unrealised gains or losses on outstanding credit default swap are recorded in the Statement of net assets. When a contract is closed, the realised gains or losses are recorded in the Statement of operations and changes in net assets.

Foreign currencies

The books and records of each Sub-Fund are denominated in Euro ("€"), the base currency of the Fund. The value of all assets and liabilities not expressed in the reference currency of a Sub-Fund is converted into the reference currency of such Sub-Fund at the rate of exchange determined on the relevant Valuation Day in good faith by or under procedures established by the Board of Directors of the Fund.

Bank accounts, market value of the investment portfolio and other net assets in currencies other than the EUR are translated into EUR at the applicable exchange rate at the year-end. Income and expenses in currencies other than EUR will be translated into EUR at the applicable exchange rates prevailing at the transaction date.

For the following Sub-Funds, the exchange rates applied as at 27 September 2024:

- Kempen (Lux) Global High Dividend Fund

- Kempen (Lux) Global Property Fund

- Kempen (Lux) Global Small-cap Fund

- Kempen (Lux) Global Sustainable Equity Fund

Net realised gains and losses on foreign exchange represent: (i) foreign exchange gains and losses from the holding and sale of foreign currencies, (ii) gains and losses between trade date and settlement date on forward exchange contracts transactions, and (iii) gains and losses arising from the difference between amounts of dividends and interest recorded and the amounts actually received.

The resulting gains and losses on translation are included in "Net realised gain/(loss) on Foreign currencies transactions" in the Statement of operations and changes in net assets.

Swing Pricing

A Sub-Fund may suffer dilution of the Net Asset Value per share due to investors buying or selling shares in a Sub-Fund at a price that does not reflect dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

In order to counter this impact, a swing pricing mechanism has been adopted to protect the interests of shareholders of the Sub-Fund. If on any valuation date, the aggregate net capital activity of a Sub-Fund exceeds a pre-determined threshold, as determined and reviewed for each Sub-Fund on periodic basis by the Board of Directors of the Fund, the Net Asset Value per share will be adjusted upwards or downwards to reflect costs associated with net capital inflows or net capital outflows respectively.

The table below disclosed the Sub-Funds that are in scope of the swing price mechanism during the year.

For the Sub-Funds that applied swing price adjustment at the end of the year, the NAV per Share in each Sub-Fund's reference currency before swing price adjustment (the un-swung NAV per share) and the NAV per Share in each Sub-Fund's reference currency after swing price adjustment (the swung NAV per share) are disclosed.

The Sub-Funds in scope of the swing pricing and the actual swing factors applied will be published on the website (www.vanlanschotkempen.com).

*All investments of the mentioned Sub-Funds are valued as of September 27, 2024, except for Asian investments, which are valued as of September 30, 2024.

Note 2. Summary of significant accounting policies (continued)

Swing Pricing(continued) As at 30 September 2024 swing pricing was applied on the NAV per share of the following Sub-Funds:

| Sub-Fund Name | Share class currency | Un-swung NAV per Share | Swung NAV per Share |

Note 2. Summary of significant accounting policies (continued)

Net realised Gain/(Loss) on sales of investments

Investments in securities are accounted for on a trade date basis. The net realised gain or loss on sales of investments is determined on the basis of the average cost of investments sold.

Revenue recognition

Dividends, net of any unrecoverable withholding taxes, are taken into income on the date upon which the relevant securities are first listed as "exdividend". Interest income is accrued on a daily basis.

Note 3. Management and fund charges

Management fee

The Fund pays to the Management Company an investment management fee calculated as a percentage of the net assets of the relevant Sub-Fund. Such fee is calculated and accrued daily and is paid monthly in arrears to the Management Company by the Fund.

The maximum percentages per Sub-Fund are disclosed in the Appendix of the Prospectus. For the effective percentages please refer to the website of the Management Company (<u>www.vanlanschotkempen.com</u>).

Service fee

The Fund pays a service fee to the Management Company calculated as a fixed percentage of the net assets of the relevant Sub-Fund as specified in the relevant Appendix of Prospectus of the relevant Sub-Fund. The actual percentages per Sub-Fund are disclosed in the Appendix of the Prospectus.

The Management Company will bear the excess of any such fees above the rate specified for each Class of Shares in the Appendix of the relevant Sub-Fund. Conversely, the Management Company will be entitled to retain any amount by which the rate of these fees to be borne by the Classes of Shares, as set out in the Appendix, exceeds the actual expenses incurred by the relevant Class of the relevant Sub-Fund.

The service fee covers the custodian and administration agent fees, fees and out-of-pocket expenses of the Board of Directors of the Fund, legal and auditing fees, publishing, translation and printing expenses, costs and expenses for the compilation and the calculation of indices whose performance is tracked by a Sub-Fund, the cost of preparing the explanatory memoranda, financial statements and other documents for the shareholders, postage, telephone and telex, advertising expenses, as well as notification expenses and the costs of the preparation of the Prospectus and of the Key Investor Information Documents and any additional registration fees.

Such fees do not include normal banking and brokerage fees and commissions on transactions relating to the assets and liabilities of the Fund, expenses related to reclaiming withholding taxes by other parties than the Fund's depositary, as well as interest and bank charges and extraordinary expenses, including but not limited to, litigation expenses and the full amount of any tax, levy, duty or similar charge imposed on the Fund or their assets that would not be considered as ordinary expenses. For avoidance of any doubt, the service fee does not cover the Belgian Annual Tax to be paid by the Sub-Funds. The amounts effectively paid will be shown under "Other Operating expenses" in the Statement of operations and changes in net assets.

Formation expenses

The expenses of establishing the Fund amounting to approximately €150,000 were written off over the period from 2009 to 2014. Charges relating to the creation of any new Sub-Fund are amortised in that Sub-Fund's accounts over a period not exceeding five years following the relevant new Sub-Fund's launch date. Any newly created Sub-Fund will not bear any pro rata share of the costs and expenses incurred in connection with either the formation of the Fund or the launch of any other Sub-Funds.

Note 4. Taxation

Under current law and practice, the Fund is not liable to any Luxembourg income tax or capital gains tax, nor are dividends paid by the Fund liable to any Luxembourg withholding tax.

However, Class A, Class A-Dis, Class AN, Class AN, Class AX, Class B, Class BN, Class BNX, Class BX, Class F, Class F, Class F-Dis, Class LRD, Class LRD, Class R, Class R, Class R, Class VLK-A and Class VLK-B Shares are liable in Luxembourg to a "taxe d'abonnement" of 0.05% per annum of its net assets. Such tax is payable quarterly and calculated on the total net asset value of each Class at the end of the relevant quarter. Class I, Class IX, Class JX, Class JX, Class LID, Class VLK-I, Class VLK-J, Class Z and Class ZJ Shares are liable in Luxembourg to a "taxe d'abonnement" of 0.01% per annum of their net assets. Such tax is payable quarterly and calculated on the total net asset value of each Class at the end of the relevant quarter.

Note 4. Taxation(continued)

The "taxe d'abonnement" is not applicable in respect of assets invested (if any) in Luxembourg Undertakings for collective investment, which are themselves subject to such tax. No stamp duty or other tax is payable in Luxembourg on the issue of Shares in the Fund except a tax payable once only of EUR 1,250 which was paid upon incorporation.

Kempen (Lux) European High Dividend Fund and Kempen (Lux) Sustainable European Small-cap Fund are eligible to the French Plan d'Epargne d'Actions (PEA) tax wrapper. As such, these Sub-Funds must invest at least 75% of their net assets in PEA eligible assets, i.e. securities issued in the EU, Norway and Iceland. As at 30 September 2024 Kempen (Lux) European High Dividend Fund and Kempen (Lux) Sustainable European Small-cap Fund invested respectively 91.37% and 96.88% of the net assets in PEA eligible assets.

Note 5. Future contracts, options, swaps and forwards contracts

The Sub-Funds may use options, futures contracts, swaps and forwards contracts on securities, indices, volatility, inflation and interest rates for hedging and investment purposes. Transactions in options, futures contracts, swaps and forwards may carry a high degree of risk. The amount of the initial margin is small relative to the value of the contract so that transactions are "leveraged" or "geared". A relatively small market movement will have a proportionately larger impact which may work for or against the Sub-Fund. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

The unrealised gain or loss on derivative contracts is shown in the Statement of net assets of the respective Sub-Funds.

Note 6. Directors' Fees

For the year ended 30 September 2024, directors' fees amount to a total of EUR 70,000.00 and will be paid to three non-executive Directors. The fees are fixed and there is no variable amount. The Directors who are employees of the Management Company do not receive remuneration from the Fund in respect of their roles as Directors of the Fund.

Note 7. Transaction Costs

For the year ended 30 September 2024, the Fund incurred transaction costs which have been defined as brokerages fees and custodian transaction costs. Brokerage fees relate to the purchase or sale of transferable securities, derivatives or other eligible assets and are initially capitalised as part of the cost of these assets. Custodian transaction costs are costs charged by the custodian agent and are expensed outright as Services fees included in the Statement of operations and changes in net assets.

For fixed income securities, transaction costs are not separately recognisable from the purchase price of the security and therefore cannot be disclosed separately. The commissions on derivatives are included directly in the transaction price.

For the year ended 30 September 2024, transaction costs incurred by the Fund are recorded in the Statement of Operations and Changes in Net Assets.

Note 8. Information

Copies of the current prospectus, latest annual and semi-annual reports and portfolio changes for the Fund are available free of charge from the registered office of the Fund.

Note 9. Distribution of the Fund in Germany

Investors residing in Germany may obtain the Prospectus, Key Investor Information, Fund's Articles of Association, latest annual report or latest semi-annual report, if published thereafter, free of charge at the registered office of the Fund.

They may also request the net asset value per share, the latest issue, conversion and redemption prices as well as any other financial information relating to the Fund available to shareholders at the registered office of the Fund.

Note 9. Distribution of the Fund in Germany(continued)

As at year-end, the following Sub-Funds are registered in Germany:

- Kempen (Lux) Global High Dividend Fund
- Kempen (Lux) European High Dividend Fund
- Kempen (Lux) Global Property Fund
- Kempen (Lux) Sustainable European Small-cap Fund
- Kempen (Lux) Euro Credit Fund
- Kempen (Lux) Euro Sustainable Credit Fund
- Kempen (Lux) Global Small-cap Fund
- Kempen (Lux) Euro High Yield Fund
- Kempen (Lux) Global Sustainable Equity Fund
- Kempen (Lux) Global Listed Infrastructure Fund
- Kempen (Lux) European Sustainable Equity Fund
- Kempen (Lux) European Property Fund

Note 10. Margin account

As at 30 September 2024, the Sub-Fund Kempen (Lux) Euro Credit Fund held positions in Futures Contracts. The counterparty for these positions is JP Morgan London. The margin account amount for these positions is EUR (124,304.83).

As at 30 September 2024, the Sub-Fund Kempen (Lux) Euro High Yield Fund held positions in Futures Contracts. The counterparty for these positions is JP Morgan London. The collateral amount for these positions is EUR 7,384.37.

As at 30 September 2024, the Sub-Fund Kempen (Lux) Euro Sustainable Credit Fund held positions in Futures Contracts. The counterparty for these positions is JP Morgan London. The collateral amount for these positions is EUR 38,292.80.

Note 11. Collateral

As at 30 September 2024, the Sub-Fund Kempen (Lux) Euro Credit Fund held position in CDS Contracts. The counterparties for these positions are BNP Paribas Paris and JP Morgan AG. The collateral amount held with the counterparty BNP Paribas Paris is EUR 140,000.00.

Note 12. Dividend distribution

For the dividend distributions during the financial year, please refer to the website of the Management Company (www.vanlanschotkempen.com).

Note 13. Significant events occurred during the year

As at 11 January 2024, Mrs. Marlies Kolle was appointed as a member of the Board of Directors of the Company.

Note 14. Subsequent events occurred after year-end

As of 1 October 2024, Mr. Kelly stepped down from his directorship in Kempen International Funds.

The Articles of Incorporation published in the Memorial on 25 May 2009 were amended on 6 November 2024.

Information for Investors in Switzerland (unaudited)

Representative Agent

The representative in Switzerland is CACEIS Bank, Montrouge, Zurich Branch / Switzerland, Bleicherweg, 7, CH-8027 Zurich, Switzerland.

Paying Agent

The paying agent in Switzerland is CACEIS Bank, Montrouge, Zurich Branch / Switzerland, Bleicherweg, 7, CH-8027 Zurich, Switzerland.

Location the relevant documents

The prospectus, the Key Information Documents, the articles of association and the annual and semi-annual reports in addition to the purchase and sales report can be obtained free of charge from the representative in Switzerland.

2. Performance

Performance is defined as the total income generated by one share over the year. Performance is shown for the last three years of the Funds' existence.

Performance does not take into account any fees or expenses that may be paid when shares are issued or redeemed. The Performance was calculated

according to the guidelines dated May 16, 2008 by the Swiss Funds & Asset Management Association ("SFAMA").

Unaudited Additional Information

1. Remuneration policy

Employees working for VLK Investment Management have an employment contract with Van Lanschot Kempen, the parent company of VLK Investment Management. Van Lanschot Kempen's variable remuneration policy applies to all employees (including identified staff) of Van Lanschot Kempen and its subsidiaries, including VLK Investment Management, subject to several additional provisions specific to VLK Investment Management. These are described in the remuneration policy and govern the activities of VLK Investment Management.

Van Lanschot Kempen ensures that its remuneration policy is applied across the group.

The following general remuneration policy principles apply to all employees working at VLK Investment Management:

- Outperformance is rewarded;
- A system of differentiated remuneration applies;
- Remuneration is set on a gender-neutral basis;
- An employee's variable remuneration is based on the respective performances of Van Lanschot Kempen, VLK Investment Management and individual employees;
- The assessment of an employee's personal performance is based on both quantitative (financial) and qualitative (non-financial) performance criteria, with some departments applying only qualitative criteria;
- At least 50% of variable remuneration is based on non-financial criteria;
- The performance criteria contain no incentives to take irresponsible risks;
- Appropriate account is taken of the interests of clients when striking a balance between the fixed and variable remuneration components, and the performance criteria are determined in such a way as to avoid any conflicts of interest between employees and clients;
- The award of variable remuneration in part reflects Van Lanschot Kempen's long-term objectives;
- When assessing performance on the basis of the performance criteria set, financial performance is adjusted for (estimated) risks and costs
 of capital;
- Variable remuneration (including the conditional portion) is only awarded or paid if: i) this is reconcilable with Van Lanschot Kempen's
 financial position and is justified by the performance of Van Lanschot Kempen, VLK Investment Management and the employee concerned,
 and ii) Van Lanschot Kempen holds the capital buffers as required by the Dutch Financial Supervision Act (Wft) and implementing regulation;
- None of Van Lanschot Kempen's financial services or other activities, remuneration components or structures could lead to a risk of clients being treated without due care, and Van Lanschot Kempen will not introduce such activities, components or structures;
- In the event that Van Lanschot Kempen turns only a modest profit in a given financial year, discretionary bonus pools may be established by Van Lanschot Kempen's Management Board with the approval of its Supervisory Board;
- At the reassessment stage preceding the payment and receipt of variable remuneration, the total variable remuneration may be lowered significantly by applying a hold or claw-back clause – for instance, in the event of incompetent or incorrect conduct on the part of an employee.

A more detailed description of our remuneration policy can be found on our website, www.vanlanschotkempen.com, including a further description of how the fixed and variable remuneration components are drawn up. The policy also describes the criteria that form the basis for determining the amount of variable remuneration, which non-standard rules apply for employees in control functions, and which parts of the variable remuneration are conditional. The policy also describes the governance in relation to the annual determination of variable remuneration.

Unaudited Additional Information

1. Remuneration policy(continued)

The table below provides information on the remuneration of identified staff. VLK Investment Management's identified staff are employees, including management, whose activities have a material influence on our risk profile or that of the funds we manage. It includes employees performing senior management, risk-taking or audit roles, as well as employees whose remuneration amounts to at least the same as that of the categories of employees who hold senior management or risk-taking positions.

The figures in the table below are the most recently available and refer to the Sub-Funds of Kempen International Fund's 2023 financial year, with the amounts in the table allocated on the basis of total fund assets on 31 December 2023.

The allocation of fixed and variable remuneration is carried out as follows:

Total payment (fixed and variable) * Assets under Management of the Sub-Funds of Kempen International Funds / Total assets VLK Investment Management.

In keeping with Article 1:120 (2) of the Dutch Financial Supervision Act (Wft), we report that no individual at VLK Investment Management received any remuneration in 2023 in excess of €1 million.

| | Senior management personnel* | Managerial positions | Other personnel | All personnel |
|--|------------------------------------|------------------------|--------------------------|--------------------------|
| Number of employees (in FTEs, average for the 2023 financial year) | 7 | 15 | 183 | 205 |
| Remuneration 2023 (in EUR) | | | | |
| Total Fixed Remuneration Total Variable Remuneration** | € 277,157 € 59,563 | € 384,419 € 101,514 | € 2,078,762 € 393,091 | € 2,740,338 € 554,168 |

* Mr. W.H. van Houwelingen and E.J.G. Jansen are directors of VLK Investment Management, and their allocation is therefore included in the table in the "senior management" category.

** In keeping with Dutch laws and regulations, variable remuneration relates to 2023 variable remuneration as recognised in profit or loss.

3. Risk Management

As required by Circular CSSF 11/512, the Board of Directors of the Fund needs to determine the global risk exposure of the Fund either by applying the commitment approach or the Value at Risk approach, a widely used risk measurement approach that values the risk of loss. In terms of risk management, the Board of Directors of the Fund decided to adopt the Commitment Approach as a method of determining the global exposure for all Sub-Funds.

4. Securities Financing Transactions Regulations (SFTR)

The Fund does not engage in securities financing transactions (as defined in Article 3 of Regulation (EU) 2015/2365 (the "Regulation"), securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sellbuy back transactions and margin lending transactions). Accordingly, disclosures required by Article 13 of the Regulation are not applicable for the year ended 30 September 2024.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy classification syste laid down in Regulation (EU) 2020/852, establishing a list o environmentally sustainable econo activities. That Regulation does no lay down a list of socially sustainable economic activities Sustainable investments with a environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics related to:

- climate change mitigation and climate change adaptation in line with the Paris Climate Agreement;

- the protection of biodiversity and ecosystems;
 - the transition to a circular economy.

The Sub-Fund promoted the following social characteristics:

- decent work;

_

_

- adequate living standards and wellbeing for end-users;
- other social topics such as gender equality and broader diversity matters.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?...and compared to previous periods?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 30 September 2024.

| Enviromental indicators | Units | 2023 | 2024 | % Cov. 2023 | % Cov. 2024 |
|--|--|------------|------------|----------------|----------------|
| Scope 1 greenhouse gases emissions | ton CO2e | 32,631.10 | 29,710.45 | 94% | 96% |

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? Not applicable.

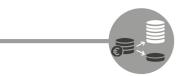

> Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

| OECD | UNGP |
|------|------|
| Yes | Yes |

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion** of investments of the financial product during the reference period which is: 01 October 2023 until 30 September 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through the specific sustainability indicators it uses to assess the extent to which its (proposed) investments contribute to the environmental and social characteristics it promotes, which include principal adverse impact indicators. We refer to the table of sustainability indicators earlier listed in this document.

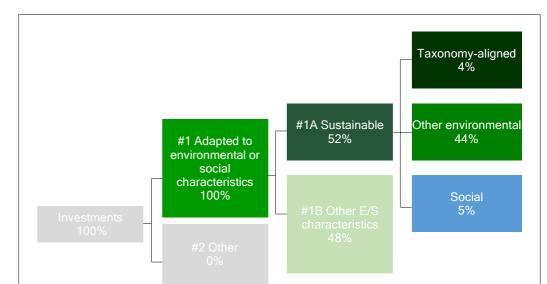

What were the top investments of this financial product?

| Largest issuer | Sector | Country | % Assets |
|---|------------------------|----------------|----------|
| Sanofi | Health Care | France | 2.1% |
| Hana Financial Group Inc. | Financials | South Korea | 2.1% |
| Shell plc | Energy | United Kingdom | 2.1% |
| National Grid plc | Utilities | United Kingdom | 2.1% |
| LyondellBasell Industries N.V. | Materials | United States | 2.0% |
| Fresenius SE & Co. KGaA | Health Care | Germany | 2.0% |
| Singapore Telecommunications Limited | Communication Services | Singapore | 2.0% |
| Power Corporation of Canada | Financials | Canada | 2.0% |
| Sysco Corporation | Consumer Staples | United States | 2.0% |
| Cisco Systems, Inc. | Information Technology | United States | 2.0% |
| NN Group N.V. | Financials | Netherlands | 2.0% |
| Samsung Electronics Co., Ltd. | Information Technology | South Korea | 1.9% |
| Nexstar Media Group, Inc. | Communication Services | United States | 1.9% |
| Kinder Morgan, Inc. | Energy | United States | 1.9% |
| BAWAG Group AG | Financials | Austria | 1.9% |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. For these investments, the investee companies have to adhere to good governance practices and we assess and monitor this in our investment process.

#1A Sustainable investments includes the investments of the financial product that meet the criteria of sustainable investments. Within the scope of this Fund, it relates to investments in an economic activity that contributes to an environmental objective, is aligned to the EU Taxonomy and does not significantly harm any environmental and/ or social objective within the meaning of the SFDR.

#1B Other E/S characteristics includes the investments of the financial product that do not meet the criteria of sustainable investments, particularly around contribution to environmental and/ or social objectives (e.g., EU Taxonomy alignment).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This also covers investments held for liquidity (cash) and/ or rebalancing purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover reflects the "greenness" of investee companies today. - capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx)

reflects the green operational activities of investee companies

In which economic sectors were the investments made?

| Sector | Aligned with E/S | Sustainable | Other E/S | Taxonomy aligned | Other environmental | Social | Other |
|---------------------------|------------------|-------------|-----------|---------------------|------------------------|--------|-------|
| All | 100% | 52% | 48% | 4% | 44% | 5% | 0% |
| Communication Services | 12% | 8% | 4% | 0% | 7% | 1% | 0% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ✓ Yes | |
|---------------|---------------------|
| In fossil gas | 🖌 In nuclear energy |
| No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What was the share of investments made in transitional and enabling activities? 2%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 1%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 44%

What was the share of socially sustainable investments? 5%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website. We exercised our voting rights following our voting policy. We have used ISS as a proxy voting advisor. All voting records can be found on our website (Proxy Voting Dashboard | Kempen (issgovernance.com).

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion** of investments of the financial product during the reference period which is: 01 October 2023 until 30 September 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through the specific sustainability indicators it uses to assess the extent to which its (proposed) investments contribute to the environmental and social characteristics it promotes, which include principal adverse impact indicators. We refer to the table of sustainability indicators earlier listed in this document.

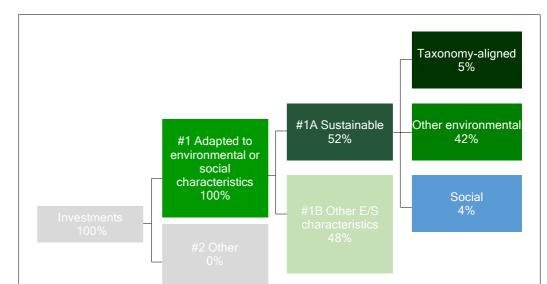

What were the top investments of this financial product?

| Largest issuer | Sector | Country | % Assets |
|-----------------------------|------------------------|----------------|----------|
| Unilever PLC | Consumer Staples | United Kingdom | 3.3% |
| Rexel S.A. | Industrials | France | 3.2% |
| Fresenius SE & Co. KGaA | Health Care | Germany | 3.2% |
| BAWAG Group AG | Financials | Austria | 3.1% |
| Reckitt Benckiser Group plc | Consumer Staples | United Kingdom | 3.1% |
| Diageo plc | Consumer Staples | United Kingdom | 3.1% |
| Sanofi | Health Care | France | 3.1% |
| Rio Tinto Group | Materials | United Kingdom | 2.9% |
| NN Group N.V. | Financials | Netherlands | 2.9% |
| WPP plc | Communication Services | United Kingdom | 2.9% |
| ENGIE SA | Utilities | France | 2.8% |
| Telenet Group Holding NV | Communication Services | Belgium | 2.7% |
| Equinor ASA | Energy | Norway | 2.7% |
| ING Groep N.V. | Financials | Netherlands | 2.6% |
| Shell plc | Energy | United Kingdom | 2.6% |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. For these investments, the investee companies have to adhere to good governance practices and we assess and monitor this in our investment process.

#1A Sustainable investments includes the investments of the financial product that meet the criteria of sustainable investments. Within the scope of this Fund, it relates to investments in an economic activity that contributes to an environmental objective, is aligned to the EU Taxonomy and does not significantly harm any environmental and/ or social objective within the meaning of the SFDR.

#1B Other E/S characteristics includes the investments of the financial product that do not meet the criteria of sustainable investments, particularly around contribution to environmental and/ or social objectives (e.g., EU Taxonomy alignment).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This also covers investments held for liquidity (cash) and/ or rebalancing purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover reflects the "greenness" of investee companies today. - capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx)

operational activities of investee companies

In which economic sectors were the investments made?

| Sector | Aligned with E/S | Sustainable | Other E/S | Taxonomy aligned | Other environmental | Social | Other |
|---------------------------|------------------|-------------|-----------|---------------------|------------------------|--------|-------|
| All | 100% | 52% | 48% | 5% | 42% | 4% | 0% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ✓ Yes | |
|---------------|---------------------|
| In fossil gas | ✓ In nuclear energy |
| No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What was the share of investments made in transitional and enabling activities? 4%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 1%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 42%

4%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

What was the share of socially sustainable investments?

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website. We exercised our voting rights following our voting policy. We have used ISS as a proxy voting advisor. All voting records can be found on our website (Proxy Voting Dashboard | Kempen (issgovernance.com).

Annex IV - Annex IV SFDR level II

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Kempen (Lux) Global Property Fund Legal entity identifier: 549300IN5HIM17RDLQ71

| e 5. n | It made sustainable investments with a social objective: | | with a social objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy classification syste laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable econo activities. That Regulation does no lay down a list of socially sustainabl economic activitie Sustainable investments with a environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics related to:

- climate change mitigation and climate change adaptation in line with the Paris Climate Agreement;

- sustainable cities and communities;
 - the transition to a circular economy.

The Sub-Fund promoted the following social characteristics:

- decent work;

_

- adequate living standards and wellbeing for end-users;
- other social topics such as gender equality and broader diversity matters.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?...and compared to previous periods?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 30 September 2024.

| Enviromental indicators | Units | 2023 | 2024 | % Cov. 2023 | % Cov. 2024 |
|---|---|----------|----------|----------------|----------------|

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Van Lanschot Kempen has developed a sustainable investment approach which distinguishes between sustainable investments with an environmental objective (either aligned with the EU Taxonomy or not) and sustainable investments with a social objective. This definition follows the requirements of the article 2(17) of the SFDR. The objectives of the sustainable investments are linked to the promoted environmental and social characteristics of the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By considering principal and additional adverse impact indicators and by aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights the Sub-Fund seeks to cause no significant harm to any environmental or social sustainable investment objective. Assets related to violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded from the universe.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

| OECD | UNGP |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. For these investments, the investee companies have to adhere to good governance practices and we assess and monitor this in our investment process.

#1A Sustainable investments includes the investments of the financial product that meet the criteria of sustainable investments. Within the scope of this Fund, it relates to investments in an economic activity that contributes to an environmental objective, is aligned to the EU Taxonomy and does not significantly harm any environmental and/ or social objective within the meaning of the SFDR.

#1B Other E/S characteristics includes the investments of the financial product that do not meet the criteria of sustainable investments, particularly around contribution to environmental and/ or social objectives (e.g., EU Taxonomy alignment).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This also covers investments held for liquidity (cash) and/ or rebalancing purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover reflects the "greenness" of investee companies today. - capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx) reflects the green

operational activities of investee companies

In which economic sectors were the investments made?

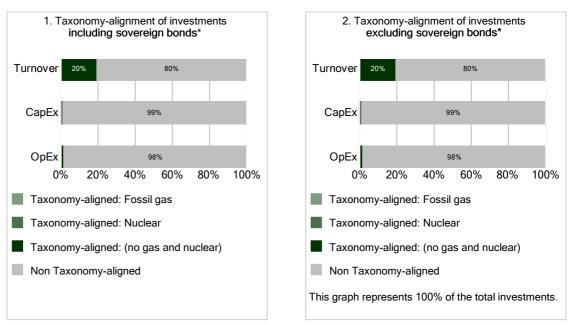

| Sector | Aligned with E/S | Sustainable | Other E/S | Taxonomy aligned | Other environmental | Social | Other |
|---------------------------|------------------|-------------|-----------|---------------------|------------------------|--------|-------|
| All | 100% | 52% | 48% | 4% | 39% | 9% | 0% |
| Communication Services | 5% | 1% | 4% | 0% | 1% | 0% | 0% |
| Consumer Discretionary | 10% | 7% | 2% | 0% | 7% | 0% | 0% |
| Consumer Staples | 13% | 9% | 4% | 0% | 4% | 5% | 0% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| Yes | |
|---------------|-------------------|
| In fossil gas | In nuclear energy |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What was the share of investments made in transitional and enabling activities? 2%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 4%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 39%

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website. We exercised our voting rights following our voting policy. We have used ISS as a proxy voting advisor. All voting records can be found on our website (Proxy Voting Dashboard | Kempen (issgovernance.com).

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy classification syste laid down in Regulation (EU) 2020/852, establishing a list o environmentally sustainable econo activities. That Regulation does no lay down a list of socially sustainable economic activities Sustainable investments with a environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics related to:

- climate change mitigation and climate change adaptation in line with the Paris Climate Agreement;

- the protection of biodiversity and ecosystems;
 - the transition to a circular economy.

The Sub-Fund promoted the following social characteristics:

decent work;

_

_

_

- adequate living standards and wellbeing for end-users;
- other social topics such as gender equality and broader diversity matters.

How did the sustainability indicators perform?...and compared to previous periods?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 30 September 2024.

| Enviromental indicators | Units | 2023 | 2024 | % Cov. 2023 | % Cov. 2024 |
|--|---|------------|------------|----------------|----------------|
| Scope 1 greenhouse gases emissions | ton CO2e | 36,057.02 | 38,543.05 | 67% | 71% |
| Scope 2 greenhouse gases emissions | ton CO2e | 6,205.39 | 7,312.41 | 67% | 71% |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Van Lanschot Kempen has developed a sustainable investment approach which distinguishes between sustainable investments with an environmental objective (either aligned with the EU Taxonomy or not) and sustainable investments with a social objective. This definition follows the requirements of the article 2(17) of the SFDR. The objectives of the sustainable investments are linked to the promoted environmental and social characteristics of the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By considering principal and additional adverse impact indicators and by aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights the Sub-Fund seeks to cause no significant harm to any environmental or social sustainable investment objective. Assets related to violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded from the universe.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ✓ Yes | |
|---------------|---------------------|
| In fossil gas | ✓ In nuclear energy |
| No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What was the share of investments made in transitional and enabling activities? 6%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 3%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 36%

What was the share of socially sustainable investments? 10%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy classification syste laid down in Regulation (EU) 2020/852, establishing a list environmentally sustainable econo activities. That Regulation does no lay down a list of socially sustainab economic activitie Sustainable investments with environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics related to:

- climate change mitigation and climate change adaptation in line with the Paris Climate Agreement;

- the protection of biodiversity and ecosystems;
 - the transition to a circular economy.

The Sub-Fund promoted the following social characteristics:

decent work;

_

Enterprises

Unadjusted gender pay gap

Exposure to controversial weapons

Board gender diversity

Controversial Weapons

Involvements

Tobacco

- adequate living standards and wellbeing for end-users;
- other social topics such as gender equality and broader diversity matters.

How did the sustainability indicators perform?...and compared to previous periods?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 30 September 2024.

| Enviromental indicators | Units | 2023 | 2024 | % Cov. 2023 | % Cov. 2024 |

how the environmental or social characteristics promoted by the financial product are attained.

Sustainability indicators measure

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Van Lanschot Kempen has developed a sustainable investment approach which distinguishes between sustainable investments with an environmental objective (either aligned with the EU Taxonomy or not) and sustainable investments with a social objective. This definition follows the requirements of the article 2(17) of the SFDR. The objectives of the sustainable investments are linked to the promoted environmental and social characteristics of the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By considering principal and additional adverse impact indicators and by aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights the Sub-Fund seeks to cause no significant harm to any environmental or social sustainable investment objective. Assets related to violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded from the universe.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

| OECD | UNGP |
|------|------|
| Yes | Yes |

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion** of investments of the financial product during the reference period which is: 01 October 2023 until 30 September 2024. How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through the specific sustainability indicators it uses to assess the extent to which its (proposed) investments contribute to the environmental and social characteristics it promotes, which include principal adverse impact indicators. We refer to the table of sustainability indicators earlier listed in this document.

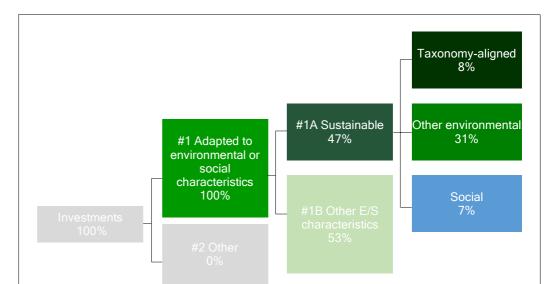

What were the top investments of this financial product?

| Largest issuer | Sector | Country | % Assets |
|--------------------------------|------------------------|---------------|----------|
| Jabil Inc. | Information Technology | United States | 3.7% |
| Fujitec Co., Ltd. | Industrials | Japan | 3.3% |
| Thermon Group Holdings, Inc. | Industrials | United States | 3.2% |
| Brunswick Corporation | Consumer Discretionary | United States | 3.1% |
| EnerSys | Industrials | United States | 2.7% |
| BAWAG Group AG | Financials | Austria | 2.6% |
| ULVAC, Inc. | Information Technology | Japan | 2.6% |
| First Solar, Inc. | Information Technology | United States | 2.3% |
| ASR Nederland N.V. | Financials | Netherlands | 2.3% |
| Gentex Corporation | Consumer Discretionary | United States | 2.2% |
| Encompass Health Corporation | Health Care | United States | 2.2% |
| Mueller Water Products, Inc. | Industrials | United States | 2.2% |

| Quest Diagnostics Incorporated | Health Care | United States | 2.1% |
| Teradata Corporation | Information Technology | United States | 2.1% |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. For these investments, the investee companies have to adhere to good governance practices and we assess and monitor this in our investment process.

#1A Sustainable investments includes the investments of the financial product that meet the criteria of sustainable investments. Within the scope of this Fund, it relates to investments in an economic activity that contributes to an environmental objective, is aligned to the EU Taxonomy and does not significantly harm any environmental and/ or social objective within the meaning of the SFDR.

#1B Other E/S characteristics includes the investments of the financial product that do not meet the criteria of sustainable investments, particularly around contribution to environmental and/ or social objectives (e.g., EU Taxonomy alignment).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This also covers investments held for liquidity (cash) and/ or rebalancing purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover reflects the "greenness" of investee companies today. - capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx)

reflects the green operational activities of investee companies

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ✓ Yes | |
|---------------|---------------------|
| In fossil gas | ✓ In nuclear energy |
| No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What was the share of investments made in transitional and enabling activities? 5%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 3%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 38%

What was the share of socially sustainable investments? 4%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website.

contributes to an environmental or social objective, provided that the investment does r

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics related to:

- climate change mitigation and climate change adaptation in line with the Paris Climate Agreement;

- the protection of biodiversity and ecosystems;
 - the transition to a circular economy.

The Sub-Fund promoted the following social characteristics:

decent work;

_

_

- adequate living standards and wellbeing for end-users;
- other social topics such as gender equality and broader diversity matters.

How did the sustainability indicators perform?...and compared to previous periods?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 30 September 2024.

| Enviromental indicators | Units | 2023 | 2024 | % Cov. 2023 | % Cov. 2024 |
|---|---|-----------|-----------|----------------|----------------|
| Scope 1 greenhouse gases emissions | ton CO2e | 978.67 | 778.40 | 89% | 94% |
| Scope 2 greenhouse gases emissions | ton CO2e | 1,185.87 | 1,083.45 | 89% | 94% |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. Van Lanschot Kempen has developed a sustainable investment approach which distinguishes between sustainable investments with an environmental objective (either aligned with the EU Taxonomy or not) and sustainable investments with a social objective. This definition follows the requirements of the article 2(17) of the SFDR. The objectives of the sustainable investments are linked to the promoted environmental and social characteristics of the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By considering principal and additional adverse impact indicators and by aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights the Sub-Fund seeks to cause no significant harm to any environmental or social sustainable investment objective. Assets related to violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded from the universe.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

| OECD | UNGP |
|------|------|
| Yes | Yes |

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion** of investments of the financial product during the reference period which is: 01 October 2023 until 30 September 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through the specific sustainability indicators it uses to assess the extent to which its (proposed) investments contribute to the environmental and social characteristics it promotes, which include principal adverse impact indicators. We refer to the table of sustainability indicators earlier listed in this document.

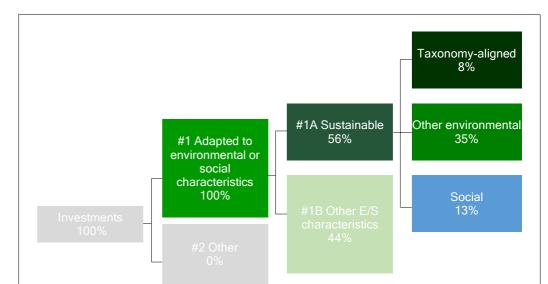

What were the top investments of this financial product?

| Largest issuer | Sector | Country | % Assets |
|------------------------------------|------------------------|---------------|----------|
| Microsoft Corporation | Information Technology | United States | 5.8% |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. For these investments, the investee companies have to adhere to good governance practices and we assess and monitor this in our investment process.

#1A Sustainable investments includes the investments of the financial product that meet the criteria of sustainable investments. Within the scope of this Fund, it relates to investments in an economic activity that contributes to an environmental objective, is aligned to the EU Taxonomy and does not significantly harm any environmental and/ or social objective within the meaning of the SFDR.

#1B Other E/S characteristics includes the investments of the financial product that do not meet the criteria of sustainable investments, particularly around contribution to environmental and/ or social objectives (e.g., EU Taxonomy alignment).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This also covers investments held for liquidity (cash) and/ or rebalancing purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover reflects the "greenness" of investee companies today. - capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx)

reflects the green operational activities of investee companies

In which economic sectors were the investments made?

| Sector | Aligned with E/S | Sustainable | Other E/S | Taxonomy aligned | Other environmental | Social | Other |
|---------------------------|------------------|-------------|-----------|---------------------|------------------------|--------|-------|

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ✓ Yes | |
|---------------|---------------------|
| In fossil gas | ✓ In nuclear energy |
| No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. What was the share of investments made in transitional and enabling activities? 3%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 2%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 52%

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website. We exercised our voting rights following our voting policy. We have used ISS as a proxy voting advisor. All voting records can be found on our website (Proxy Voting Dashboard | Kempen (issgovernance.com).

Annex IV - Annex IV SFDR level II

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Kempen (Lux) Euro Sustainable Equity Fund Legal entity identifier: 549300UHSRRF2LM1CV49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

| | Yes | | ✓ No |
|--------------------------------|--|---|---|
| ot any d r is a em | It made sustainable investments with an environmental objective: in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | ✓ | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 25.0% of sustainable investments. with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental |

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonom classification syst laid down in Regulation (EU) 2020/852, establishing a list environmentally sustainable econo activities. That Regulation does n lay down a list of socially sustainab economic activitie Sustainable investments with environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental characteristics related to:

- climate change mitigation and climate change adaptation in line with the Paris Climate Agreement;

- the protection of biodiversity and ecosystems;
 - the transition to a circular economy.

The Sub-Fund promoted the following social characteristics:

decent work;

_

_

- adequate living standards and wellbeing for end-users;
- other social topics such as gender equality and broader diversity matters.

How did the sustainability indicators perform?...and compared to previous periods?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 30 September 2024.

| Enviromental indicators | Units | 2023 | 2024 | % Cov. 2023 | % Cov. 2024 |
|---|---|-----------|-----------|----------------|----------------|
| Scope 1 greenhouse gases emissions | ton CO2e | 1,480.58 | 1,014.03 | 97% | 99% |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. Van Lanschot Kempen has developed a sustainable investment approach which distinguishes between sustainable investments with an environmental objective (either aligned with the EU Taxonomy or not) and sustainable investments with a social objective. This definition follows the requirements of the article 2(17) of the SFDR. The objectives of the sustainable investments are linked to the promoted environmental and social characteristics of the financial product.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By considering principal and additional adverse impact indicators and by aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights the Sub-Fund seeks to cause no significant harm to any environmental or social sustainable investment objective. Assets related to violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded from the universe.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

| OECD | UNGP |
|------|------|
| Yes | Yes |

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion** of investments of the financial product during the reference period which is: 01 October 2023 until 30 September 2024.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through the specific sustainability indicators it uses to assess the extent to which its (proposed) investments contribute to the environmental and social characteristics it promotes, which include principal adverse impact indicators. We refer to the table of sustainability indicators earlier listed in this document.

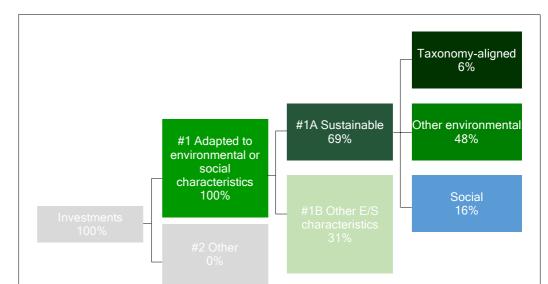

What were the top investments of this financial product?

| Largest issuer | Sector | Country | % Assets |
|-------------------------------------|------------------------|----------------|----------|
| SAP SE | Information Technology | Germany | 5.6% |
| Novo Nordisk A/S | Health Care | Denmark | 5.4% |
| ASML Holding N.V. | Information Technology | Netherlands | 5.3% |
| ASSA ABLOY AB (publ) | Industrials | Sweden | 5.0% |
| Allianz SE | Financials | Germany | 4.8% |
| EssilorLuxottica Société anonyme | Health Care | France | 4.6% |
| AstraZeneca PLC | Health Care | United Kingdom | 4.3% |
| RELX PLC | Industrials | United Kingdom | 4.3% |
| Siemens Healthineers AG | Health Care | Germany | 4.2% |
| London Stock Exchange Group plc | Financials | United Kingdom | 4.0% |
| BE Semiconductor Industries N.V. | Information Technology | Netherlands | 3.7% |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. For these investments, the investee companies have to adhere to good governance practices and we assess and monitor this in our investment process.

#1A Sustainable investments includes the investments of the financial product that meet the criteria of sustainable investments. Within the scope of this Fund, it relates to investments in an economic activity that contributes to an environmental objective, is aligned to the EU Taxonomy and does not significantly harm any environmental and/ or social objective within the meaning of the SFDR.

#1B Other E/S characteristics includes the investments of the financial product that do not meet the criteria of sustainable investments, particularly around contribution to environmental and/ or social objectives (e.g., EU Taxonomy alignment).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This also covers investments held for liquidity (cash) and/ or rebalancing purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of: - turnover reflects the "greenness" of investee companies today. - capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy. - operational expenditure (OpEx)

reflects the green operational activities of investee companies

In which economic sectors were the investments made?

| Sector | Aligned with E/S | Sustainable | Other E/S | Taxonomy aligned | Other environmental | Social | Other |
|---------------------------|------------------|-------------|-----------|---------------------|------------------------|--------|-------|
| All | 100% | 69% | 31% | 6% | 48% | 16% | 0% |
| Communication Services | 1% | 1% | 0% | 0% | 1% | 0% | 0% |
| Consumer Discretionary | 4% | 1% | 3% | 0% | 1% | 0% | 0% |
| Consumer Staples | 8% | 4% | 5% | 0% | 1% | 2% | 0% |
| Financials | 16% | 8% | 8% | 0% | 8% | 0% | 0% |
| Health Care | 23% | 23% | 0% | 0% | 9% | 13% | 0% |
| Industrials | 24% | 19% | 5% | 4% | 14% | 0% | 0% |
| Information Technology | 12% | 6% | 7% | 1% | 4% | 0% | 0% |
| Materials | 11% | 8% | 3% | 0% | 8% | 0% | 0% |
| Other | 1% | 0% | 1% | 0% | 0% | 0% | 0% |

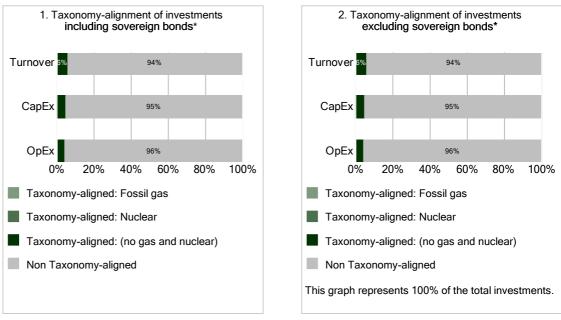

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| Yes | |
|---------------|-------------------|
| In fossil gas | In nuclear energy |
| ✓ No | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial

substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods? Last year it was 4%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? 48%

What was the share of socially sustainable investments? 16%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards

The type of instruments included under "#2 Other" include investments not aligned with the E/S characteristics, and cash, cash equivalents and derivatives. The financial product did not make use of derivatives to attain the environmental or social characteristics promoted. Where relevant, minimum environmental or social safeguards are taken into account.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken: We have used our VLK ESG Risk Score to monitor ESG risks and our engagement framework which is based on the same ESG risk factors to engage on the most material risk factors. We have increased the number of engagements with companies on biodiversity. Periodically we report on our engagement activities in our fund quarterly review and our annual stewardship report. Examples of engagements can be found on our website. We exercised our voting rights following our voting policy. We have used ISS as a proxy voting advisor. All voting records can be found on our website (Proxy Voting Dashboard | Kempen (issgovernance.com).
