## Q4 2024

The fourth quarter of 2024 was marked by Donald Trump's Republican victory in the US and America's continued growth. This momentum is in contrast to the weakness in Europe and China. Central banks continued with their rate-reduction cycles while remaining vigilant about the risk of a resurgence of inflation. Geopolitical risks are still very present. Financial markets have generally continued their positive trends, and 2024 will ultimately be a good year for investors.

### Macro Economy

**■ US: political changeover and economic resilience**

The US economy once again showed resilience in Q4, even if certain weaknesses persist. GDP growth bounced back by 2.8% in Q3, confirming its positive trend for 2024. Leading indicators, such as the ISM manufacturing index, remained in contraction territory at 48.4 in November, reflecting a lack of dynamism in industry, but improved in December (49.3). However, the services sector which had held up well until then, is showing signs of weakness. The ISM services index stood at 52.1 in November, down from the 56 recorded in October, disappointing for a consensus of 55.5. Consumption, a key driver of the economy, remains strong thanks to stable household incomes, but it faces persistent inflationary pressures. Consumer sentiment remains high, as shown by the Michigan Consumer Sentiment index, which rose 2.8 points in December compared to November. In the labour market, job creation significantly exceeded expectations, reaching 227,000 positions in November, demonstrating remarkable resilience and contributing to the positive consumer outlook. However, the unemployment rate rose slightly, reaching 4.2% (up 0.1% over the period), but remains under control.

The consumer price index stopped falling at the end of the year, rising to 2.6% in October and 2.7% in December, and underlying pressures remain high. But the Federal Reserve continued with its policy of gradually reducing rates, lowering its key rate by 0.5 percentage points to 4.5% over the quarter. The Fed no longer considers the labour market to be an inflationary factor and that the contribution of housing is a delayed effect that will fade. But it still remains cautious as its favourite inflation measure, the Core PCE index, remains at 2.8%. The Fed is looking to return to neutral while monitoring the risk of a return of inflation with the implementation of customs and immigration policies by the new Trump administration.

**■ Europe: weak growth and political instability**

Europe continues to navigate a gloomy economic environment, marked by weakened external demand, growing trade tensions, internal economic divergences and relative political instability. Growth momentum improved with the publication of Eurozone GDP for Q3 confirmed as being up 0.9% year-on-year. The labour market continued to improve with the Eurozone unemployment rate at 6.3%. Leading indicators (HCOB) for the manufacturing sector in the Eurozone remained contracted and were below expectations when released at the end of the year. There was also disappointment regarding services, which are heading for a short-term slowdown. Germany remains in recession for the second consecutive year, with GDP contracting by 0.3% year-on-year in Q3. The industrial sector, the mainstay of the German economy, is facing sluggish demand, exacerbated by trade tensions with China and the US. The automotive sector has been particularly affected, and is witnessing increasing job cuts. Olaf Scholz's government has lost its majority, leading to new legislative elections on 23 February, 2025. In France, the "Olympics effect" has faded, giving way to political uncertainty. Forecasts for the public deficit continue to deteriorate, reaching 6.1% of GDP in 2024. The

Barnier government, which failed to pass the 2025 budget, has been criticised. French debt was ultimately downgraded by Moody's a few hours after the nomination of F. Bayrou as prime minister.

While inflation ticked up from 2% in October to 2.3% in November (annual variation of the harmonised price index) the European Central Bank lowered its key rates by 50 basis points over the quarter, bringing the deposit rate to 3.00%. The Bank of England lowered its key rate by 25 basis points to 4.75%.

**■ Emerging markets:**

In China, the government continued its support for the real estate sector, focussing its efforts on cleaning up bank balance sheets and local public finances. However, the weakness in the real estate sector continues to weigh on household confidence. China is also confronted with the risk of deflation (inflation at 0.3% in October then 0.2% in November, year-on-year) as export momentum runs out of steam and could deteriorate further with a rise in US customs tariffs with Donald Trump's return to power. This environment continues to put the brakes on growth, and it will probably be lower than the 5% target.

In India overall economic momentum remains positive (supported by major investments in infrastructure) despite disappointing Q3 2024 GDP of 5.4% compared to the expectation of 6.5%. Tensions in the labour market and a slowdown in some strategic sectors such as technology, are reducing the outlook for growth.

In Brazil, sustained growth continues, leading the International Monetary Fund to increase its forecast for 2024 from 2.1% to 3%. The central bank, facing a resurgence in inflation, has raised its interest rates 50 points to bring the Selic rate to 12%.

### Financial Markets

**■ Bond Markets: Divergent trends between the US and Europe**

In the US, Treasury bond yields continued to rise, reaching 4.58% at the end of the period. This trend is explained by the resilience of the US economy, and anticipation of a widening in the budget deficit, linked to the announcements of tax cuts by the future president, Donald Trump, as well as the risk of a return to inflation in 2025. 2-year, short-term rates have continued along a similar path, climbing to 4.36% in December, and reflecting a persistent inflationary environment, which limited the Fed's cycle of rate cuts.

In Europe the disparity is significant, against a background of a faster-than-expected decline in inflation and weak growth, suggesting additional rate cuts by the ECB. German 10-year bond yields moved back to 2.1%, while French bonds (OATs) reached 2.9%, before going back up to 3.20% at the end of the period. The spread between French and German bonds widened exceeding 80 basis points after the vote of censure of the Barnier government. Conversely, the spread between Italian and Spanish sovereign bond rates and those of Germany has narrowed, leading to a shift in French debt. Eurozone short-term rates are volatile: in Germany they fluctuated throughout the quarter, stabilising at 2.09% in December, while French rates ended the quarter at 2.28%. These movements reflect adjustments in the face of economic divergences between the member states and the accommodative policy of the ECB.

**■ Share Markets: contrasting performances across the world**

In the US stock market indices reached new highs, driven by expectations of a tax policy and deregulation favourable to American companies, and the performance of technology stocks. The S&P 500 crossed the 6,000-point threshold before dropping back, posting a gain in USD of 3.03% over the quarter. Mega Caps soared more than 14%, strongly driving the market. The Nasdaq — particularly exposed to the Big Tech companies and to Artificial Intelligence — outperformed, rising 6.27% (in USD). The Republican victory in the elections led to significant international flows into US stocks. These performances illustrate the pursuit of "Trump Trade" and renewed confidence in the American economy, as well as investors being attracted to growth stocks.

In Europe, indices were punished by political uncertainty and disappointing economic data. The Eurostoxx 50 ended the quarter down 1.17% (in EUR). Sector divergences were marked and European giants (the "Granolas") fell 7.6%. The CAC 40 closed down 2.55% over the quarter, due to disappointing performances from the luxury goods and automotive sectors, combined with a discount linked to political uncertainty. The German DAX, more exposed to technology and financials, stood out with a noteworthy positive performance of 3.8%.

In Asia, the Nikkei 225 fell 5.6% (in USD) in the fourth quarter, following Yen volatility and the unpredictability of the Bank of Japan's choices. The rebound in Chinese shares that began at the end of September, after the announcement of significant measures to stabilise the real estate sector, continued to the beginning of October, then faded. Investors are now waiting for concrete action. Yet this rebound illustrates a return of confidence in Beijing's ability to stabilise its economy after several quarters of slowdowns.

### 2025 Outlook

The beginning of 2025 will be shaped by Donald Trump's early policies. Depending on whether he favours a fiscal axis (massive tax cuts) and the deregulation of certain sectors, or reinforced protectionist and migration policies, the economic implications could be very different. Against this background the central banks, the Fed in particular, will remain cautious, while investors will have to deal with uncertain economic outlooks and increased volatility in financial markets.

The figures stated in this report are historical and not necessarily indicative of future performance.

## Q1 2025

The US economy showed signs of weakness in Q1 2025, while the Fed kept rates unchanged in the face of a return of inflationary pressures. This benefited Europe, with the ECB continuing to lower its headline rates while at the same time governments coordinated their stimulus efforts. China also announced a plan to stimulate consumption. Financial markets have been unsettled by Donald Trump's assumption of office and his sometimes contradictory decision-making. After having broken records, US share indices consolidated and underperformed Europe and China. Long-term interest rates performed strongly in the Eurozone and have remained stable in the United States.

### United States

After a near-euphoric phase following the election of Donald Trump, the US economy has maintained a positive pace, but is clearly showing signs of weakness, disrupted by a flood of sometimes contradictory decisions from the new administration. March marked a turning point with a downturn in household confidence, wage stabilisation and a sharp rise in inflation expectations.

Economic growth indicators such as the ISM and S&P PMI are contrasting, although we witnessed a slight improvement in the manufacturing sector's outlook at the end of the quarter. However, the trade war started by Washington is reducing visibility for business. The unemployment rate remained stable at 4.1%, but wage increases have slowed, due to a reduction in the Federal civil service workforce and the expulsion of millions of illegal workers, which is maintaining pressure on low-skilled employment.

Against this uncertain backdrop, the Fed is procrastinating, choosing to keep key rates unchanged, much to the dismay of president Trump. However, faced with volatility on the bond market, it has slowed down the speed of a reduction in its balance sheet. The March-end release of the PCE core inflation rate, the Fed's favourite benchmark, exceeded expectations at 2.8% on an annual basis, which should encourage it not to cut rates in April. Markets are anticipating two to three rate cuts in the second half of 2025.

### Europe

The European economy is facing significant challenges, with weak growth and signs of a downturn in several countries in Q1. The HCOB PMI survey still indicates a contraction in the manufacturing sector but the outlook is clearly improving in Germany where industry has been stagnating since the pandemic.

European leaders have maintained their cohesion in the face of American protectionist measures and the risk of it withdrawing its military support for Ukraine. In an historic development, just a few days after the German legislative elections (23 February), the barriers to public spending were lifted, and the future Chancellor Mertz (CDU), supported by a coalition with the SPD and the Greens, launched a vast recovery plan. Out of the announced EUR 500 billion investment in infrastructure, EUR 100 billion will go to defence, which is a radical change. This unprecedented budgetary stroke should bolster Germany's potential growth, and with it, that of the Eurozone. As a result, economists who revised down their forecasts in January, raised them again in March.

Inflation in the Eurozone appeared to have resumed its downward trend and the harmonised price index (from February, released in March) fell back to 2.3% (2.4% in January). Inflation is still driven by services (3.7%) but the contribution of energy is now low. Core inflation is now at 2.4% and should reach 2% by the end of the year.

Noting inflation's downward trend, and despite the risks linked to the trade war with the US, the European Central Bank (ECB) lowered its rates by 50 basis points over the quarter, the deposit rate dropping from 3% to 2.5% against a backdrop of a slowdown in the Eurozone, while warning that it remains vigilant about how inflation will evolve.

The Bank of England (BoE) reduced its interest rates by 25 bp, bringing them back to 4.5%. The move follows downward revisions to growth forecasts, with the BoE lowering its projections for 2025 from 1.5% to 0.75%.

### Asia

The Japanese economy continued to show encouraging signs with an uptick in consumption and dynamic exports (before US tariffs), and inflation stabilising despite a falling index. The Bank of Japan maintained its headline rates unchanged but normalisation is not complete.

The economic outlook continues to deteriorate in China. Recent PMI data, down from December, indicates a further weakening of the economy. In response, the National People's Congress outlined plans to support the economy through budgetary spending, monetary support and the allocation of additional resources to domestic demand. These decisions involved an upward revision in the growth outlook for 2025 and 2026. Nevertheless, the risk of a slowdown in Q2, with weak consumption and the negative impact of US tariffs, should encourage the PBoC to act.

In India, the reduction in public spending has slightly reduced growth prospects. Inflation was lower than expected in February, at 3.6%, a deceleration from 4.3% in January. This decline is mainly due to a sharp slowdown in food prices. The Reserve Bank of India may cut rates earlier than expected, starting from April.

### Equities

The MSCI ACWI fell 2% over the quarter (in USD). The rotation initiated at the end of 2024 in favour of Europe (MSCI Europe up 10%) and China (MSCI China up 14.5%) continued at the start of this year, while major US stocks were consolidating (MSCI USA down 5%).

After having posted a new high of 6,144 points on 19 February, the S&P 500 ended the quarter down 4.6% and the Nasdaq 100 was down 8%. On the other hand, European shares posted positive performance; the Eurostoxx 50 was up 7.2% and there was clear outperformance in Germany, the DAX 30 was up 11.3%. There was equally positive performance from emerging markets (MSCI EM up 2%), driven by China.

The underperformance by US shares can be explained by several factors: (1) a collapse in the values of the "Magnificent Seven", which lost close to 16% over the quarter; (2) the divergence of the paths of the Fed and the ECB and (3) the stimulus plans in Germany and China, which boosted profit expectations in the short and medium term. Lastly, the prospect of a ceasefire in Ukraine could lower the risk premium on European assets and lead to markets repositioning.

Moreover, the avalanche of sometimes contradictory announcements from Donald Trump generated increased volatility, pushing the VIX up to 22% (+ 5 points). Investors have revised their forecasts in the face of new trade tariffs, which has led to a fall in the automotive sector, particularly in Japan and Korea (Nikkei down 11%). In response to the risk of the US withdrawing from Ukraine, massive investment in rearming Europe, notably the ReArm Europe plan for EUR 800 billion, has shored up the defence sector.

### Bonds

The first quarter was marked by high volatility in interest rates, with long-term rates in the Eurozone rising in March, while US yields generally fell. We are witnessing a convergence of long-term rates.

Yields on 2- and 10-year US Treasury bonds, which had risen sharply in late 2024, fell by 36 bp each, finishing at 3.8% and 4.2% respectively, as investors now anticipate a decline in growth.

In the Eurozone the downward trend of interest rates has reversed after the announcement of an increase in the German budget deficit and the expectation of a rise in bond issues. 10-year Bund rates rose by more than 37 bp, but the short end remained anchored at 2%, in anticipation of the ECB's key rate cuts. The steepening of the Eurozone curves has therefore increased. Spreads remain stable with an 11 bp narrowing of the spread between the French OAT and the German 10-year Bund.

Credit initially proved resilient in this period of sovereign rate volatility, but then spreads began to widen, particularly on US high yields, with equities falling and volatility rising.

### Foreign exchange, gold and oil

The foreign exchange market has been volatile in relation to movements in interest rates. The prospect of divergence between the Fed and the ECB initially strengthened the dollar (EUR/USD 1.02) before the sharp rise in German long-term rates brought the euro back to 1.08 against the dollar.

The geopolitical situation and the fall in the dollar have favoured gold, which rose 19% and reached an historic high of USD 3,124 an ounce.

Oil prices fell by 5% amid expectations of increased production from OPEC and the United States, as well as a halt to fighting in the Middle East, only to rise again amid new sanctions against Russia.

The figures stated in this report are historical and not necessarily indicative of future performance.

## Q2 2025

The quarter has been marked by a trade war by the US. This darkened growth prospects and heightened fears of inflation taking hold again. The Fed took a wait-and-see approach while the ECB pursued lowering headline rates. China's response and the about-turns by Washington fuelled uncertainty on financial markets, marked by a significant decline in the dollar and in shares, and strong pressure on long-term interest rates. Military operations between Israel/United States and Iran caused significant volatility in oil prices. Despite this turmoil, markets have proved resilient and generally held up well.

### Macro economy

#### ■ United States

Donald Trump's announcement on 2 April of prohibitive tariffs for the majority of the US's trade partners has been a shock for businesses, consumers and investors. After the downturn in markets and the dollar, the suspension of this decision for 90 days from 9 April helped to reduce tensions, but the growth outlook for the US economy was revised downwards. The release of the growth figure, GDP, for the first quarter confirmed the slowdown by contracting 5%. The Federal Reserve is now predicting growth of 1.4% for 2025. The IMF forecasts 1.8% and the World Bank 1.4%, which signals significant uncertainty among economists. The new budget, the "Big Beautiful Bill", being negotiated with Congress, is expected to cut taxes by USD 4.5 trillion and increase the national debt by USD 3.3 trillion.
Household consumption, supported by a still-resilient jobs market, remains solid, but is showing signs of weakness. Net job creation is slowing but the unemployment rate remains stable at 4.2%. Advanced indicators (manufacturing ISM[1] stable at 48.5 and non-manufacturing ISM down at 49.5 nevertheless confirm a deterioration in the outlook. At the end of the quarter, cyclical data shows a slowdown in consumption and industrial production: US retail sales fell 0.9% in May compared to April; industrial production was almost stagnant in May and new construction is down.
Inflation measures have given mixed signals. The core consumer price index for May came in below expectations at 2.4% (vs. 2.5% expected). However, PCE inflation, the Fed's preferred gauge, appears to be picking up again. Core PCE inflation came out up 2.7% on an annual basis, as against the 2.6% expected by consensus opinion. Against this background, the Fed decided to wait and see, and kept key rates unchanged, between 4.25% and 4.50%, despite a great deal of pressure from the White House.

#### ■ Europe

Europe's accelerated growth appears thwarted by the American trade war, despite the unprecedented increase in public spending in Germany. Growth for the first quarter in the Eurozone was above expectations at 1.5% on an annual basis. Growth prospects for 2025 have now been revised upwards by the European Central Bank (ECB) to 0.9% for 2025. The strength of the labour market, with an unemployment rate at an historically low level of 6.3% should stimulate consumption and support growth. After the fall in April, surveys show good resilience in the Eurozone. The outlook for the manufacturing sector has stabilised, with the HCOB PMI[2] survey reaching 50.2 in June, compared to 49.4 in May, signalling a slight improvement in manufacturing orders. In Germany, the ZEW index rose sharply in June, climbing 22.3 points in relation to May, to reach 47.5, indicating an improvement in expectations, confirmed by the IFO business climate index. We see weakness in France, while the outlook is improving in Germany. This deterioration in French prospects was confirmed by the Bank of France's quarterly survey.
The new German government has adopted a 2025 budget project and ambitious budget plans for the medium term. The measures focus on tax breaks for companies and support for the energy price for households and businesses, which aims to boost confidence and improve the economy's growth potential. The 2025 budget deficit is expected to reach 3.2% of GDP.

The slowdown in inflation in the Eurozone was confirmed by May's data, with an increase of only 1.9%, the services sector being the main contributor. The ECB revised down its inflation forecast for 2026 to 1.6%, then 2% in 2027, and has cut its deposit rate by 50 bp over the quarter.
In the United Kingdom, the Bank of England (BoE), maintained the status quo, leaving its key rate unchanged at 4.25%. Nevertheless, the slowdown in property prices coupled with weak consumer confidence, may prompt the BoE to lower its rates in the third quarter.

#### ■ Asia

Japan saw a contraction in GDP in the first quarter and movement during May remained weak. GDP fell by 0.2% quarter-on-quarter, penalised by weak exports. This figure still does not fully reflect the impact of US trade tariffs. Underlying inflation accelerated in April to 3.5% year-on-year (compared to 3.2% in March) However, weak growth heralds a very gradual recovery. The Bank of Japan (BoJ) kept its key rate at 0.5% due to the slowdown in the Japanese economy and inflation. No imminent rate hike has been announced, except perhaps in January 2026 if the cyclical recovery is confirmed. Moreover, in order to limit the volatility of long-term rates, the BoJ has decided to reduce its balance sheet more slowly. Finally, the Finance Minister announced a reduction in the issue of very long maturities to take pressure off the 30-year bond.
The trade war with the United States has affect the economic outlook in China. The Caixin manufacturing sector index released in early June was below expectations at 48.9, anticipating further deterioration. The services sector has expanded only slightly. However, the decline in property prices continues, prompting the authorities to further support the market. The official unemployment rate is stable at 5.1% and retail sales up 6.4% were reported. Yet deflation has been confirmed. Producer prices fell by 3.3% and consumer prices were also down by 0.1% for May. As a result, the central Chinese bank (PBoC) resumed its monetary easing against a backdrop of trade uncertainty, lowering its 1-year rate to 3% and the 5-year rate to 3.5%. Moreover, the trade surplus remained largely unchanged at 750 billion yuan in May and the country is facing two targets — maintaining urban unemployment at around 5-5.5% on the one hand and on the other creating 12 million jobs by the end of the year.
In India the economic outlook remains solid and the composite HSBC survey for June was above expectations at 61, versus the expected 59,4. The fall in inflation persists, reaching its lowest level for 6 years. It was at 2.8% year-on-year in May, compared to 3.2% in April, due to the slowdown in food prices. Underlying inflation is also down. This environment allowed the Reserve Bank of India (RBI) to lower its headline rate by 50 basis points. The next meeting will be held in early August and will see the announcement of a probable pause in monetary policy.

### Financial markets

#### ■ Equities

Equities markets experienced extreme volatility at the beginning of April following the announcement of tariffs, and then their postponement, but performances have been positive over the quarter. In May, US markets outperformed Europe and Asia, driven by good results for the "Magnificent Seven". This trend was confirmed in June when US indices posted historic highs. The S&P 500 gained 10.6% at the end of March and the Nasdaq 100 rose 17.6%. In contrast, in the Eurozone the Eurostoxx 50 only gained 1%, driven by the DAX 30 (up 7.9%) but dragged down by the CAC 40 (down 1.6%). On the currency side, the euro again appreciated, by 9% this quarter against the dollar, bringing its increase to 13% since the beginning of the year. Therefore, when denominated in euros, the United States' market performance has been mediocre. After exceeding 50% in April, the volatility index, the VIX, returned below 17% at the end of the period, reflecting the return of some optimism. Emerging markets rose 11.5% in dollars. In Asia the trend is positive overall, notably in Korea and Taiwan. The Chinese market remained volatile and ended the quarter down an average of 2% in dollars, due to the lack of fiscal stimulus.

#### ■ Bonds

The second quarter saw a fall in short-term rates and strong volatility in the long US rates. The movement in short-term rates is linked to the expectation of rate cuts by the Fed and the ECB, a fall in inflation and an outlook of a slowdown in global growth. Bond volatility remains high, in particular for US Treasuries, fuelled by (geo)political and budgetary uncertainties. In the US the 10-year rate ended the quarter at around 4.23% in mid-June, after a rise to 4.6%. The 2-year rate ended at 3.72%. Investors are expecting monetary easing in the second half of the year and a slowdown in US nominal growth. In the Eurozone, the 10-year German Bund reached 2.61% and the 2-year fell 22 bp compared to the end of the year (and by 19 bp compared to the end of March) to reach 1.86%, while the ECB continues with its cycle of cuts, bringing back its deposit rates to 2%. Sovereign rate spreads in the Eurozone remain stable, except Italy's, which dropped 26 bp. Corporate bonds maintained their positive performance, in particular those with high yields.

[1] An ISM index above 50% indicates expansion in manufacturing activity compared to the previous month. An ISM index below 50% suggests contraction in manufacturing activity compared to the previous month.
[2] The HCOB PMI® Germany Services Activity index is based on a single question: comparing the level of activity with that of the previous month. An index less than 50.0 indicates a contraction, and the further below 50.0 it is, the faster the rate of decline.

The figures stated in this report are historical and not necessarily indicative of future performance.

■ **Foreign exchange and commodities**

The euro strengthened by 9% against the dollar and emerged as a potential global alternative to the latter, rising from 1.08 to 1.18 over the quarter. Sterling also continues to appreciate against the greenback and is up nearly 6.5% since the end of March. The yuan remains stable near 7.2 against the dollar and the yen has strengthened slightly against the dollar.

Gold confirmed its status as a safe haven, breaking records, with an ounce touching USD 3,450 in April and May, and stabilising at USD 3,303 per ounce at the end of June. Gold has risen 25.9% since the start of the year.

The price of a barrel of oil has been very volatile over the period, due to the war between Israel/United States and Iran. But the price of oil has fallen significantly over the quarter due to the deterioration in economic prospects, but mainly due to an increase in OPEC production quotas, in particular Saudi Arabia. A barrel of Brent lost USD 10 (down 9.5%) over the quarter, ending at around USD 68, having brushed the symbolic USD 60 mark, on 5 May, its lowest level since February 2021, but was USD 80 at the beginning of June.

## Q3 2025

Q3 economic momentum has remained solid, despite the trade war and geopolitical risks. US growth has been revised upwards. Despite inflation falling far short of its target, the Fed cut rates, anticipating a slowdown in the labour market. In Europe, growth was more moderate whereas inflation is close to the ECB's target. Asia is still the most dynamic region, with China, India and Japan maintaining positive momentum. On the markets, the dollar stabilised after its sharp fall at the beginning of the year, while gold is breaking records. Equities and credit are performing well, with emerging markets outperforming significantly, and there is a divergence in interest rates, which are generally falling in the United States and rising in Europe.

**Macro economy**

■ **United States**

Despite the shock of the trade war and the sometimes brutal decisions of the Trump administration, the momentum of the US economy surprised on the positive with an uptick in GDP growth of 3.8% in Q2, exceeding the previous estimate of 3.3% after the 0.5% contraction in Q1. Growth continued to be driven by consumption (rising retail sales) and productive investment. Leading indicators continue to point toward an extension of the cycle, particularly in the services sector. The labour market remains dynamic, even if signs of weakness in job creation are becoming more significant. The unemployment rate rose from 4.1% in June to 4.3% in August.

Inflation measured using the consumer price index continued its rally. It reached 2.9% year-on-year in August, whereas it had fallen back to 2.3% in April. It was at the same level of 2.9% using the Federal Reserve's preferred measure — core PCE (Personal Consumption Expenditures). However, the impact of customs duties appears limited at this stage. The production prices index, after rising 0.9% in July, contracted by 0.1% in August.

The quarter was marked by the stand-off between Trump and the Federal Reserve, with the President of the United States judging monetary policy to be too restrictive. Following the surprise resignation of the Democrat Adriana Kugler, Trump nominated Stephen Miran to replace her. He is an economist close to the White House and in favour of rate cuts. He also removed governor Lisa Cook from office, on suspicion of tax fraud. At the Jackson Hole symposium, Jerome Powell, President of the Fed, indicated that the risk to employment was greater than a resumption of inflation. This turnaround materialised in September with a 25-basis point reduction to 4.25%. Although inflation is well above target, the Fed has nevertheless chosen to lower its rates, indicating that it is refocussing on its employment policy. Investors are now anticipating a new phase of rate cuts through to mid-2026.

Political tensions remain high and antagonisms are being exacerbated by violence. The Republicans' narrow majority puts them at the mercy of the budget vote being blocked for a new government shutdown.

■ **Europe**

**Eurozone**

The return of growth to the eurozone was confirmed. Q2 GDP growth was revised upwards to 1.5% year-on-year, particularly driven by Spain where GDP grew by 0.8% in Q2. After several months of improvement in the manufacturing sector (particularly in Germany), the outlook stabilised at the end of the quarter, with the HCOB PMI manufacturing index falling back to 49.5 in September from 50.7 in August and 49.8 in July. On the other hand, the services sector posted a net gain, with the services PMI reaching 51.4 in September, compared to 50.5 in August and 51 in July. Unemployment remained steady over the quarter, at 6.2%, but there remained a strong disparity between economies with full employment, such as Germany, and those where there is still a high unemployment rate (France, Italy, Spain).

The European Commission reached a trade deal with the White House at the end of July, after difficult negotiations. While this deal restores visibility for European exporters, they will be subject to a maximum customs duty of 15%. Europe is in advanced negotiations with India, while the deal with MERCOSUR continues to create tensions.

Inflation stabilised around the European Central Bank's (ECB) target, with a positive contribution from food prices and a negative contribution from energy prices. The harmonised index of consumer prices (IPCH) stood at 2.3% in July, then 2.1% in August, year-on-year. Consensus estimates expect 2.2% in September. It should reach the 2% target at year-end 2025 and the start of 2026. However, there are stark differences between countries, with France posting inflation of less than 1% while in Spain the figure reached 2.9% year-on-year (August figures). Against this backdrop the ECB decided to maintain the status quo and its deposit rate at 2%, while leaving the door open for a rate cut by the end of the year.

**United Kingdom**

Q2 GDP growth was revised upwards, to an annual variation of 1.4% . Inflation remained high, at 3.8% in July and August year-on-year (CPI) driven by a positive contribution from restaurants and hotels prices, but offset by a fall in air fares. Despite this inflation figure being a long way from the Bank of England's target, it decided to cut its headline rate over the summer by 25 basis points and to keep it at this level in September, leaving room for a future cut in November.

■ **Asia**

The summer was marked by the SCO (Shanghai Cooperation Organisations) conference which brought more than 20 heads of states and governments representing 3.4 billion people, around Xi Jin Ping. Significant were the presence of Vladimir Putin, Kim Jung Un and even the Indian prime minister Narendra Modi, whose relations with the US are particularly strained, due to the trade war.

**China:** The Chinese GDP growth rate stood at 5.2% year-on-year in Q2, however the deflationary background persists. The consumer price index stood at 0% in August, as in July, but year-on-year it contracted by 0.4% (0% in July). The production index continued to decline, to -3.6% in July and -2.9% in August, year-on-year. Real estate prices continued to fall, with new homes prices dropping by 2.8% in July (annual variation) and 2.5% in August. Although retail sales increased by 3.7% in July and 3.4% in August, worth highlighting is the over-production by Chinese manufacturers. Finally, unemployment rose over the quarter, starting at 5% in June and reaching 5.3% in August. Under these conditions the People's Bank of China continued with its monetary policy of easing. But the authorities made no major announcements aimed at jump-starting the economy.

**Japan:** A revision of the annual growth figure to 2.2% for Q2 confirmed the vitality of the Japanese economy. The consumer price index remains high, but slowed over the quarter. After an annual variation of 3.3% in June it fell to 2.7% in August. Unemployment decreased over the quarter, standing at 2.3% in July after four months at 2.5%. Against this background, despite persistent high inflation, the Japanese Central Bank retained its headline rate of 0.50% in July and September, to avoid bond market jitters. But still two members of the BoJ voted for an increase to 0.75%. Such disagreement is unusual for the Bank of Japan and heralds a rate rise by the end of the year.

**India:** India's dynamic growth continued with GDP surging to 7.8% in Q2 year-on-year. After nine months of falls, inflation ticked up again, with the consumer price index reaching 2.07% in August compared to 1.61 in July. This increase was largely due to the rise in food prices, which represent half of the CPI basket, but also to base effects. The Reserve Bank of India (RBI) then decided to reduce its key interest rate by 50 basis points in June, while remaining cautious in the face of the risks linked to customs duties and persistent underlying inflation. Under these circumstances the RBI chose to keep its headline rate at 5.5% at its 1 October meeting.

The figures stated in this report are historical and not necessarily indicative of future performance.

**Markets**

■ **Equities markets:**

Equities markets continued with their positive trajectory throughout Q3, bolstered by the United States, Japan and China. The signing of several trade agreements reassured investors whereas geopolitical tensions had little impact on risk premiums.

The MSCI ACWI USD index closed the month up 7.3% while emerging markets outperformed with the MSCI Emerging Markets index gaining 9.6%. The outlook for the AI sector and US monetary policy easing after Jerome Powell's speech at Jackson Hole, and the cut in rates in September, buoyed the market. The S&P500 gained ground by 7.8% and the Nasdaq 100 was up 8.8% over the quarter. Turning to mega-caps now, NVIDIA reported results slightly better than expectations, but posted more moderate data centre revenue growth amid a pause in sales of AI chips to China. The spectacular growth in Oracle's order book endorsed the sector's positive trend.

European stocks posted more moderate growth. The Eurostoxx 50 gained 4.3%, driven by the defence sector and banks. Despite political instability in France, the CAC 40 closed up 3%. In Germany the DAX 30 consolidated, declining slightly, by 0.1% over the quarter, but it has nevertheless remained strong since the start of the year, with a 19.9% gain.

In Asia, China and Japan were the outperformers over the quarter. The Nikkei 225 climbed 11%, driven by investors returning to this market that has been underweight for some time, whose outlook is improving. China saw an outstanding quarter, with the HSCEI gaining 10% and retaining its place as a top performer in 2025, with a 31.1% annual gain.

■ **Bond markets:**

We witnessed a divergence in interest rate trends, with contraction in the United States and an increase in Europe. The 2-year US rate lost 11 basis points, closing the quarter at 3.61%, while the 10-year US Treasury yield posted a decline of 8 basis points to 4.15% This decrease reflects monetary policy easing, with rates anticipating the cut in September even before the Fed's official announcement. The 30-year US Treasury yield was no exception, and posted a slight drop of 4 basis points to close at 4.73%, but remains at historically high levels — a return to 2007.

In Europe the trend was rather the opposite, as markets expected an increase in German issues to finance infrastructure projects. Germany posted a rise of 16 basis points on its 2-year bond (closing at 2.02%) and the 10-year Bund backed up the trend, rising 10 basis points to 2.71%. France, where the 2026 budget vote remains in the balance, saw its 2-year OAT rate rise 11 bp to 2.25% and its 10-year yield increase 28 bp to close at 3.53%. In this environment of easing European rates, the 10-year rate spreads vis-à-vis Germany have contracted; Spain has seen its rate tighten by 9 bp compared to those of Germany and Italy, 5 bp. France, facing political instability, saw its spread rise 15 bp reaching 82 bp.

■ **Foreign exchange, gold and oil:**

The dollar stagnated against the euro over the quarter, with the EUR/USD rate at 1.173 (down 0.4%) and rose against the Yen with the USD/JPY rate at 148 (up 2.7%) following the trend since the start of the year and thanks, in part, to the Fed's rate cut. Against this backdrop gold continued its meteoric rise and closed the quarter up 16.8%, reaching its highest level at USD 3,859 per ounce. Oil ended the quarter close to its June-end price, closing at USD 67 (down 0.67%).

Luxembourg, January 22, 2026

## 1 INTRODUCTION

MULTI UNITS LUXEMBOURG (the "Fund") was incorporated on March 29, 2006 under Luxembourg laws as a Société d'Investissement à Capital Variable ("SICAV") for an unlimited period of time. The Fund is governed by the Provisions of Part I of the Luxembourg law of December 17, 2010, as amended relating to Undertakings for Collective Investment. The Articles of Incorporation were deposited with the Registre du Commerce et des Sociétés of Luxembourg and have been published in the Mémorial C, Recueil des Sociétés et Associations (the "Mémorial") on April 14, 2006. The Articles of Incorporation have been amended for the last time on June 13, 2024 and were published in the Mémorial on July 4, 2024.

The Fund is registered with the Registre du Commerce et des sociétés of Luxembourg under number B 115.129. The Fund aims to provide investors with professionally managed Sub-Funds investing in a wide range of transferable securities and money market instruments in order to achieve an optimum return from capital invested while reducing investment risk through diversification.

In addition, the Fund aims to provide investors with professionally managed index Sub-Funds whose objective is to replicate the composition of a certain financial index recognised by the Luxembourg supervisory authority.

The annual general meeting of shareholders will be held within four (4) months of the end of each financial year in Luxembourg in order to approve the financial statements of the Company for the previous financial year. The annual general meeting of shareolders will be held at the registered office of the Company, or at such alternative location in Luxembourg as may be specified in the convening notice of such meeting.
Notices of all general meetings are sent by mail to all registered Shareholders at their registered address at least 8 days prior to such meeting. Such notice will indicate the time and place of such meeting and the conditions of admission thereto, will contain the agenda and will refer to the requirements of Luxembourg law with regard to the necessary quorum and majority at such meeting.
Audited annual reports and unaudited semi-annual reports are made available for public inspection at each of the registered offices of the Fund and the Administrative Agent within four, respectively two months following the relevant accounting period, and the latest Annual Report shall be available at least fifteen days before the annual general meeting.

The following Sub-Fund have been merged during the year:
MULTI UNITS LUXEMBOURG - Amundi MSCI Emerging Asia II into Amundi Index Solutions - Amundi MSCI EM Asia ESG CTB Net Zero Ambition on November 18, 2024.
MULTI UNITS LUXEMBOURG - Amundi MSCI World V into Amundi ETF ICAV Amundi MSCI World UCITS ETF on February 21, 2025.

The following Sub-Funds have been liquidated during the year:
MULTI UNITS LUXEMBOURG - Lyxor MSCI Russia UCITS ETF on December 13, 2024.
MULTI UNITS LUXEMBOURG - Lyxor Core US Equity (DR) UCITS ETF on February 24, 2025.
MULTI UNITS LUXEMBOURG - Lyxor iBoxx £ Liquid Corporates Long Dated UCITS ETF on July 07, 2025.
MULTI UNITS LUXEMBOURG - Amundi US Inverse Inflation Expectations 10Y on July 07, 2025.

Detailed Share Classes active as at September 30, 2025 are listed in the "Financial Details Relating to the last 3 Year" and description of Shares Classes are disclosed in the latest prospectus.

## 2 PRINCIPAL ACCOUNTING CONVENTIONS

**PRESENTATION OF THE FINANCIAL STATEMENTS**

The SICAV's financial statements are prepared and presented in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements for investment funds. The financial statement is prepared under going concern basis for accounting.
The figures for the year ended 30 September 2024 relating to certain balances in the statement of net assets and the statement of operations have been re-classified to conform to the current year presentation. These reclassifications do not have any impact on the net asset value of the Fund and its Sub-Funds as at 30 September 2024.

**Valuation of investments and other instruments**

The following pricing policy applies:

- **Valuation of investment in securities -** Securities listed on a recognised stock exchange or dealt in on any other regulated market that operates regularly, is recognised and is open to the public, are valued at their last available closing prices, or, in the event that there should be several such markets, on the basis of their last available closing prices on the main market for the relevant security.
  In the event that the last available closing price does not, in the opinion of the Board of Directors, truly reflect the fair market value of such securities, the value is defined by the Board of Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith.
  Securities not listed or traded on a stock exchange or not dealt in on another regulated market are valued on the basis of the probable sales proceeds determined prudently and in good faith by the Board of Directors.
  Securities not listed or traded on a stock exchange or not dealt in on another regulated market are valued at their face value with interest accrued.
  In case of short term instruments which have a maturity of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of the material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.
  Investments in open-ended UCIs are valued on the basis of the last available net asset value of the units or shares of such UCIs.
  All other securities and other assets are valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors.
- **Futures contracts** - The value of financial derivative instruments traded on exchanges or on other Regulated Markets shall be based upon the last available settlement prices of these financial derivative instruments on exchanges and Regulated Markets on which the particular financial derivative instruments are traded by the Fund; provided that if financial derivative instruments could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the value of such financial derivative instruments shall be such value as the Directors may deem fair and reasonable. The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market will be valued in a reliable and verifiable manner on a daily basis and verified by a competent professional appointed by the Fund.
- **Forward foreign exchange contracts** - Net change in unrealised profits and losses on forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the relevant valuation date and are included in the Statement of Operations and Changes in Net Assets. Forward foreign exchange contracts are disclosed in the Statement of Net Assets under the item "Net unrealised profit/loss on forward foreign exchange contracts". Net change in unrealised profits and losses and net realised gain/loss are recorded in the Statement of Operations and Changes in Net Assets.
- **Total Return Swaps** - Swaps linked to indexes or financial instruments are valued at their market value, net present value of future cash flows, based on the applicable index or financial instrument, in accordance with the procedure laid down by the Board of Directors.
- **Net realised gains or losses on swaps** - Swaps transactions are computed by taking in consideration both the receiving leg which refers to the performance of the underlying index of the contracts and the paying leg which refers to the performance of the securities basket held by the Fund.
- **Net realised gains or losses resulting from investments** - The realised gains or losses resulting from the sales of investments are calculated on an average cost basis.
- **Foreign exchange translation** - The accounts of each Sub-Fund are maintained in the reference currency of the Sub-Fund and the financial statements are expressed in that currency. The acquisition cost of securities expressed in a currency other than the reference currency is translated into the reference currency at the exchange rates prevailing on the date of purchase. Income and expenses expressed in other currencies than the reference currency are converted at exchange rates ruling at the transaction date. Assets and liabilities expressed in other currencies than the reference currency are converted at exchange rates ruling at the year end. The realised or unrealised gains and losses on foreign exchange are recognised in the Statement of Operations and Changes in Net Assets in determining the increase or decrease in net assets.
- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Combined financial statements** - The combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets represent the total of the Statements of Net Assets Assets and Statements of Operations and Changes in Net Assets of the individual Sub- Funds, converted in Euro, based on exchange rates applicable at year end.
- **Income** - Dividends are credited to income on the date upon which the relevant securities are first listed as ex-dividend. Interest income is accrued on a daily basis. For the index Sub-Funds which replicate the composition of a financial index, the dividend payments are included in the swap performance.
- **Formation Expenses** - The formation expenses of the Fund are borne by the Management Company.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan year and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

## 3 EXCHANGE RATES USED AS OF 30 SEPTEMBER 2025

The exchange rates used for the combined figures are the following:

| 1 EUR = | | 1 EUR = | | 1 EUR = | |

| 19,581.37550 | IDR | 1.17500 | USD | | |

## 4 MANAGEMENT FEES AND ADMINISTRATION FEES

A management fee is payable monthly in arrears to the Management Company in compensation for its services. Such fee was payable monthly and is set for the period under review at the following rates of the Net Asset Value (inclusive of VAT).

As Administrative, Société Générale Luxembourg is entitled to receive fees and commissions for its services rendered to the Sub-Funds. Such fees are payable by the Management Company out of the Total Fee it receives to cover structural costs.

The Management fees and administration fees rates applicable at September 30, 2025, are as follows :

## 5 DEPOSITARY, REGISTRAR AGENT AND OTHER FEES

As Depositary, Société Générale Luxembourg is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Fund.
As Registrar and Transfer Agent, Société Générale Luxembourg is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Fund.
The Total Fee (administration fees) is a percentage that the Depositary, the Registrar and Transfer Agent and the Administrator are entitled to receive out of the assets of the relevant Sub-Fund, which will range from 0.02 % to 0.10 % of the asset values underlying the relevant Sub-Fund Class, payable quarterly in arrears.

## 6 TAXATION OF THE FUND - TAXE D'ABONNEMENT

The amended Law of December 17, 2010 lays down that Sub-Funds of umbrella UCI established under the Law of December 20, 2002 are exempted of the taxe d'abonnement if they comply with following conditions stated in the article 175 e):
• whose securities are listed or dealt in on a stock exchange or another market which is regulated, operates regulary and is recognised and open to the public;
• whose exclusive object is to replicate the performance of one or several indices.
Considering that all classes of shares of all Sub-Funds of the Fund described in the Prospectus comply with the conditions required by the article 175 e) of the amended Law of December 17, 2010, the Board of Directors decided, by a Circular Resolution dated December 31, 2010, that all Sub-Funds and their classes of shares are exempted of the taxe d'abonnement as from January 1, 2011.
The Fund is not liable to any Luxembourg tax other than a once-and-for-all tax of EUR 1250 that was paid upon incorporation.
Investment income from dividends and interest received by the Fund may be subject to withholding taxes at varying rates. Such withholding taxes are usually not recoverable.

## 7 AUDITOR'S REMUNERATION

The remuneration for all work carried out by the statutory audit firm in respect of the financial year ended 30 September 2025 is as follows:

| | EUR |
|---|---|
| Statutory audit of financial statements | 277,768.84 |
| Separate report in relation to CSSF Circular 21/790 | 10,868.00 |
| Merger reports | 61,780.66 |
| Master / Feeder ad-hoc report | 16,129.58 |
| Limited review on interim financial informations | 21,366.07 |
| **Total** | **387,913.15** |

All amounts presented are rounded to the nearest Euro and exclusive VAT.

## 8 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly income of securities lending.

## 9 OTHER CHARGES

Balances for other charges in the Statement of Operations and Changes in Net Assets mainly include adjustments on cash dividend.

## 10 OPEN POSITIONS ON FUTURES CONTRACTS

## 12 TOTAL RETURN SWAP AGREEMENTS

The total return swaps entered into by the Sub-Funds are governed by the ISDA Master Agreements (the "Master Agreement") signed by Amundi Asset Management on behalf of the Sub-Funds with Barclays Bank Ireland PLC, BNP Paribas, BOFA Securities Europe SA, Crédit Agricole CIB, Goldman Sachs, JP Morgan, Morgan Stanley SE, Natixis and Société Générale ( the "OTC Counterparties").
The terms and conditions of the swap transactions are detailed for each swap transaction in appendices to this Master Agreement.
Under the Master Agreement, the Sub-Fund pays to the OTC Counterparty an amount reflecting the performance of the basket of securities (including income received held by the Sub-Fund, and receives an amount reflecting the performance of an index (see below the index for each Sub-Fund).
The performance difference between the two legs is adjusted by (i) the difference of repo rate between the basket of securities held by the Sub-Fund and the index components, (ii) the difference between the index components dividend level in the index methodology and their market price, and (iii) pricing parameters linked to the index replication.
The market value of those swaps, used only for index replication purpose are booked in the caption "Swap at market value" of the Statement of Net Assets.
Counterparty's countries are listed following the ISO 3166-1 standard.
Lines captioned "basket of securities" in the tables below correspond to the paying leg of the swaps.
As at September 30, 2025, no collateral was received or granted by the collective investment undertaking as part of Total Return Swaps.
As at September 30, 2025 the Company holds the following Total Return Swaps :

## 16 SWING PRICE

Since December 2024, Swing Pricing is applied in the Fund.
Swing Pricing is a mechanism that aims to protect the existing Shareholders from dilution of value caused by trading costs incurred as a result of subscription and redemption activity on a Sub-Fund on a particular day.
The mechanism is applied at the Sub-Fund level to all the Share Classes (except shares denominated as UCITS ETF and EXF shares) and is not meant to address specific circumstances of each individual investor. The Sub-Funds apply Full Swing Pricing, that means that Swing Pricing will be applied in any given Business Days where there is subscription and/or redemption activity on the specific Sub-Funds.
The Sub-Fund's NAV will be adjusted in order to reduce the effect of dilution on that Sub-Fund. These adjustments will seek to reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations.
The NAV will be adjusted upward when there is net inflows into the Sub-Fund and downward when there is net outflow into the Sub-Fund. Any such adjustment will be applied to all the subscriptions and redemptions on this Dealing Day.
For any given Business Day the adjustment will normally not be larger than 2% of the NAV, but the Board of Directors can raise this limit when necessary to protect the interests of Shareholders.

| Sub-Funds in scope of the Swing Prcing Mechanism | Sub-Funds with NAV swung as at 30 Septembre 2025 |
|---|---|
| MULTI UNITS LUXEMBOURG - Amundi MSCI Pacific Ex Japan | X |
| MULTI UNITS LUXEMBOURG - Amundi Euro Government Bond 7-10Y | |
| MULTI UNITS LUXEMBOURG - Amundi US Treasury Bond 1-3Y | |
| MULTI UNITS LUXEMBOURG - Amundi US Treasury Bond 3-7Y | |
| MULTI UNITS LUXEMBOURG - Amundi US Treasury Bond Long Dated | |
| MULTI UNITS LUXEMBOURG - Amundi UK Government Bond | |
| MULTI UNITS LUXEMBOURG - Amundi UK Government Inflation-Linked Bond | |
| MULTI UNITS LUXEMBOURG - Amundi US Treasury Bond 7-10Y | |
| MULTI UNITS LUXEMBOURG - Amundi UK Government Bond 0-5Y | X |
| MULTI UNITS LUXEMBOURG - Amundi US TIPS Government Inflation-Linked Bond | |
| MULTI UNITS LUXEMBOURG - Amundi Euro Government Bond 3-5Y | |
| MULTI UNITS LUXEMBOURG - Amundi UK Equity All Cap | |

As at 30 September 2025, the swing pricing adjustment has been applied for some sub-funds. The Net Asset Value per share after application of swinging pricing is detailed in the Financial details.
The swing factor is the amount by which the NAV is swung when the swing pricing process is triggered after net subscriptions or redemptions exceed the swing threshold. The factors to consider when setting the swinging factor include net broker commissions paid by the sub-fund and fiscal charges (e.g. stamp duty and sales tax).

## 17 LIQUIDATED SUB-FUNDS

The following Sub-Funds have been liquidated during the year and as at 30 September 2025 are still holding residual cash at custody level mainly for accrued costs not yet paid:

| Sub-Funds | Date of liquidation | Currency | Cash amount |

## 18 SUBSEQUENT EVENTS

The following Sub-Funds were launched:
- MULTI UNITS LUXEMBOURG - Amundi European Strategic Autonomy on November 6, 2025.
- MULTI UNITS LUXEMBOURG - Amundi EUR Credit Spread Widening on January 8, 2026.

## 19 SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR")

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the (unaudited) Sustainable Finance Disclosure Regulation section.

## 20 OTHER ASSETS AND OTHER LIABILITIES

Amounts of other assets and other liabilities in the Statement of Net Assets include mainly receivable and payable on swaps.

# Audit report

To the Shareholders of
**MULTI UNITS LUXEMBOURG**

## Report on the audit of the financial statements

### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of MULTI UNITS LUXEMBOURG (the "Fund") and of each of its sub-funds as at 30 September 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### What we have audited

The Fund's financial statements comprise:

- the securities portfolio as at 30 September 2025;
- the statement of net assets as at 30 September 2025;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

### Basis for opinion

We conducted our audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the EU Regulation No 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

PricewaterhouseCoopers Assurance, Société coopérative,
2 rue Gerhard Mercator, L-2182 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu

Cabinet de révision agréé. Expert-comptable (autorisation ministérielle n°10181659)
R.C.S. Luxembourg B294273 - TVA LU36559370

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

To the best of our knowledge and belief, we declare that we have not provided non-audit services that are prohibited under Article 5(1) of the EU Regulation No 537/2014.

The non-audit services that we have provided to the Fund, for the year then ended, are disclosed in Note 7 to the financial statements.

## Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

| Key audit matter | How our audit addressed the key audit matter |
|---|---|
| **Existence of OTC Swaps**<br>The existence of such assets is considered to be a key audit matter due to the potential magnitude of material misstatement combined with the higher inherent risk for assets that cannot be held by the Depositary Bank. | We gained an understanding of the control environment and operating effectiveness of key controls surrounding authorisation, completeness and accuracy of OTC swaps transactions and the reconciliation process in place for these instruments at the fund administrator.<br><br>We obtained from the Depositary Bank, the confirmation of the ownership by the Fund of all OTC swaps instruments. We agreed all positions as per Depositary Bank confirmation to the Fund's accounting records. |
| **Valuation of OTC swaps**<br>As part of their investment strategy, a number of sub-funds of Multi Units Luxembourg use over-the-counter swaps to replicate the performance of indices. | We gained an understanding of the control environment and operating effectiveness of key controls surrounding the valuation of OTC swaps (total return swaps) at Fund Administrator level through its ISAE 3402 controls report. In addition, we gained an understanding of key controls over the valuation process implemented by the Management Company. |

| | |
|---|---|
| The valuation of such investments is considered to be a key audit matter due to the potential magnitude of a material misstatement.<br><br>Refer to Note 2 of the financial statements for the valuation policy for such instruments | We carried out an independent valuation of all the total return swaps held by the Fund as of 30 September 2025.<br><br>We independently determined a range of acceptable values, based on models using recognized methodologies, considering the key terms of the contracts and observable market data.<br><br>In addition, for all OTC swaps, we compared the value of such derivatives to the counter-valuation performed by the Fund's Management Company |

## Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

## Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

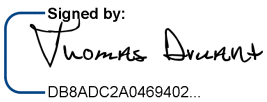

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our audit report unless law or regulation precludes public disclosure about the matter.

## Report on other legal and regulatory requirements

We have been appointed as “Réviseur d’entreprises agréé” of the Fund by the General Meeting of the Shareholders on 28 February 2025 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 20 years.

Luxembourg, 29 January 2026

PricewaterhouseCoopers Assurance, Société coopérative
Represented by

Thomas Druant

## SFT REGULATION

Following the Regulation 2015/2365 of the European Parliament and of the Council of November 25, 2015 on transparency of securities financing transactions, please find bellow details about total return swaps for the year ending September 30, 2025:

### Total Return Swaps

## REMUNERATION POLICY AND PRACTICES

Amundi Luxembourg S.A. remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that come into force on March 18, 2016, and was transposed into Luxembourg Law of 10 May 2016. The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Luxembourg. The policy is subject to independent review by the internal Compliance function.
There were no further material changes to the remuneration policy adopted from previous years, only wording modifications/precision, mainly to clarify the threshold to be used for deferral calculations and to underline that an appropriate balance between fixed and variable remuneration is sought.
The policy applicable for 2024 was approved by Amundi Luxembourg Board on September 26, 2024. Amundi group Remuneration Committee reviews on an annual basis the group remuneration policy. The 2024 review took place on February 06, 2024.
The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system.
Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.
Amundi Luxembourg S.A. and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of the funds.

### ■ REMUNERATION OF DELEGATES

Amundi Luxembourg S.A., the Management Company acts as of December 31, 2024 as Management Company or AIFM for several umbrella and standalone UCITS and AIFs.

The total remuneration expressed in Euro paid by Amundi Luxembourg S.A. to its staff during the calendar year 2024 is as follows:

| | Nr. of beneficiaries | Fixed remuneration | Variable remuneration | Total |
|---|---|---|---|---|
| **Staff** | 106 | 9,237,821.73 | 1,719,726.79 | 10,957,548.52 |
| Out of which | | | | |
| - Identified staff | 10 | 1,370,331.15 | 699,980.79 | 2,070,311.94 |
| - All other staff | 96 | 7,867,490.58 | 1,019,746.00 | 8,887,236.58 |

As of December 31, 2024 and as of September 30, 2025 a Multi Unit Luxembourg represented respectively around 24.99% and around 26.97% of the Total Net Assets under Management of Amundi Luxembourg S.A.. The total remuneration figures shown above refer to activities in respect of all funds managed. Amundi Luxembourg S.A. and Amundi group employees who are appointed to the Board of Directors of the Management Company and/or of the Funds waive the right to any remuneration in respect of all funds managed. No employee of the Management Company receives any amount, including carried interest and performance fees, paid directly by the UCITS or AIFs managed.

## REMUNERATION OF DELEGATES

As of 30 September 2025:

- Amundi Asset Management managed EUR 1215.95 billion AuM, out of which EUR 91.38 billion represented by the sub-funds in the umbrella (respectively 7.52% of the total assets managed by the Investment Manager and 94.01% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of the sub-funds was EUR 3,086,044, out of which EUR 1,353,493 in fixed remuneration and EUR 1,732,551 in variable one. The pro-rata portion of staff total remuneration attributable to the management of the sub-funds was EUR 16,146,066, out of which EUR 11,321,560 in fixed remuneration and EUR 4,824,506 in variable one. Amundi Asset Management had a total of 109 identified staff out of a total of 1,988 staff in 2024.

- Amundi Japan managed EUR 35.78 billion AuM, out of which EUR 5.82 billion represented by the sub-funds in the umbrella (respectively 16.27% of the total assets managed by the Investment Manager and 5.99% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of the sub-funds was EUR 424,963, out of which EUR 300,535 in fixed remuneration and EUR 124,428 in variable one. The pro-rata portion of staff total remuneration attributable to the management of the sub-funds was EUR 2,827,708, out of which EUR 2,202,349 in fixed remuneration and EUR 625,359 in variable one. Amundi Japan had a total of 15 identified staff out of a total of 189 staff in 2024.

Please note that the staff remuneration figures refer to the calendar year 2024.

## French “Plan d’Epargne en Actions” (“PEA”)

Plan d’Epargne en Actions (PEA) is a savings plan dedicated to French tax resident individuals in order to promote the investment in european equities (companies established in European Union, Iceland, Liechtenstein or Norway, and subject to corporate income tax).
To be eligible for PEA the sub-fund must invest on a permanent basis at least 75% of their assets in PEA eligible securities.
During the period between October 1, 2024 and September 30, 2025 the following sub-funds invested constantly at least 75% of their total net assets in PEA eligible securities.

As of September 30, 2025 the percent of the assets invested in PEA eligible securities was:

| Sub-Funds | Ratios |
|---|---|
| MULTI UNITS LUXEMBOURG - Amundi DAX II | 95.73% |

## THE ABSOLUTE VAR APPROACH

The absolute VaR approach is used in order to determine the global risk for :
• MULTI UNITS LUXEMBOURG - Amundi US Curve steepening 2-10Y
The lowest, the highest and the average utilisation of the VaR limit calculating during the period from October 1, 2024 to September 30, 2025 are described below :
VaR Model Historical
Market risk calculation Absolute VaR
Interval of time 20 days
Limits 20%
Scenarios Historical, 1 Year
Reliable interval 99%

| Overview of VaR | VaR Utilisation Max (VaR 20 Day) | VaR Utilisation Min (VaR 20 Day) | Average level of leverage (sum of notionals) | Average level of leverage (gross delta) | Average level of leverage (net delta) |
|---|---|---|---|---|---|
| MULTI UNITS LUXEMBOURG - Lyxor US Curve Steepening 2-10 Y | 3.05% | 2.24% | 449.82% | 449.82% | 289.86% |

## TRACKING ERROR

Calculation methodology: Tracking error for the representative share-class for each Sub-Fund has been calculated over a period of 52 weeks.

| | | | | Performance over the accounting period | | |

1 This Sub-Fund has been renamed during the reported period, see more details in Note 1.
2 This Sub-Fund has been liquidated during the reported period, see more details in Note 1.
3 This Sub-Fund has been launched during the reported period, see more details in Note 1.

* In certain cases (when a sub-fund has been taken over, liquidated, or launched within the last 12 months, when any class of shares has been launched or liquidated within the last 12 months,when the assets under management for any class of shares have increased or reduced significantly within the last 12 months, or when there are few assets under management for any class) the Total Expense Ratios calculated on an annual basis (reference period of 12 months) may not be representative of the true value.

## DISCLOSURE REGULATION

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonized approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.
For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product". For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation please refer to the supplement for that Sub-Fund. Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Amundi Responsible Investment Policy available on www.amundi.com.
As required by Art.11 of the Disclosure Regulation the Fund makes the following statements: Under the Amundi Responsible Investment Policy, Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage Sustainability Risks and opportunities inherent to its industry and individual circumstances. By using the Amundi ESG ratings, portfolio managers are taking into account Sustainability Risks in their investment decisions. Amundi applies targeted exclusion policies to all Amundi's active investing strategies by excluding companies in contradiction with the Responsible Investment Policy, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

### Article 9 Sub-Funds

These Sub-Funds have a sustainable objective and is therefore classified as article 9 under SFDR (Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector).
Therefore, as required by Article 58 of COMMISSION DELEGATED REGULATION (EU) 2022/1288, detailed information on the environmental or social characteristics promoted by the financial product is available in an annex to this report.
This annex contains information about:
• Attainment of the sustainable investment objective of the financial product;
• Top investments, asset allocation & proportion of investments in different economic sectors and sub-sectors;
• Information on sustainable investments.

**List of Art. 9 Sub-Funds as of 30 September 2025**
MULTI UNITS LUXEMBOURG - Amundi Euro Government Green Bond

### Article 8 Sub-Funds (required Art.11.1)

The Sub-Funds listed below are classified pursuant to article 8 of the Disclosure Regulation and aim to promote environmental and/or social characteristics. In addition to applying Amundi's Responsible Investment Policy, these Article 8 Sub-Funds aim to promote such characteristics through investments resulting in an ESG score of their portfolios greater than of their respective benchmark or investment universe. The ESG portfolio score is the AUM-weighted average of the issuers' ESG score based on Amundi ESG scoring model.
During the financial period under reporting, the Investment Manager continuously promoted environmental and/or social characteristics through the application of the above mentioned methodologies.

### Article 6 Sub-Funds

Given the investment focus and the asset classes/sectors they invest in, the investment managers of all other Sub-Funds, not classified pursuant to article 8 or 9 of the Disclosure Regulation did not integrate a consideration of environmentally sustainable economic activities into the investment process for the Sub-Fund. Therefore, it should be noted that the investments underlying the Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities.
Throughout the financial year, the Sub-Fund considered PAI 14 via the Amundi Minimum Standard and Exclusion Policy related to controversial weapons, excluding issuers in the production, sale, storage or services for and of anti-personnel mines and cluster bombs, prohibited by the Ottawa and Oslo treaties and issuers involved in the production, sale or storage of chemical, biological and depleted uranium weapons, as per Amundi Global Responsible Investment Policy.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi S&P Eurozone Dividend Aristocrat Screened

**Legal entity identifier:** 549300JDVXJULA4ZPW45

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

| | |
|---|---|
| ☐ **Yes** | ☒ **No** |

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **82.68%** of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It made a **sustainable investments with a social objective:** _____

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% S&P Euro High Yield Dividend Aristocrats Screened Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The S&P Global ESG Scores are used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. The S&P Global ESG scores dataset contains a total company-level ESG score for one financial year and consists of individual environmental (E), social (S), and governance (G) dimension scores, beneath which are (on average) more than 20 industry-specific criteria scores that can be used as signals of ESG risks

and repercussions.

The sustainability indicator used is the S&P Global ESG Score of the ESG reference benchmark that is measured against the S&P Global ESG Score of the Parent index.

At the end of the period:
- the S&P Global ESG Scores of the S&P Euro High Yield Dividend Aristocrats Screened Index is 66.87
- the S&P Global ESG Scores of the S&P Europe BMI (the "Parent Index") is 57.03

***… and compared to previous periods?***

At the end of the previous period:
- the S&P DJI ESG Scores of the S&P Euro ESG High Yield Dividend Aristocrats Net Total Return Index was 65.60
- the S&P DJI ESG Scores of the S&P Europe BMI (the "Parent Index") was 57.88

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social

standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

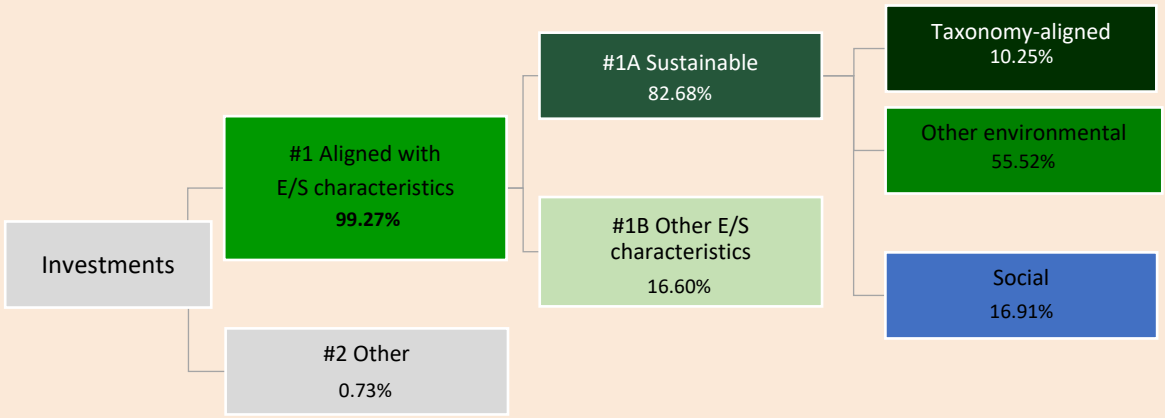

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| EDP SA | Utilities | Electric Utilities | Portugal | 5.23% |
| ALLIANZ SE-REG | Financials | Insurance | Germany | 4.99% |
| GENERALI | Financials | Insurance | Italy | 4.97% |
| UPM-KYMMENE OYJ | Materials | Paper & Forest Products | Finland | 4.92% |
| TERNA-RETE ELETTRICA NAZIONA | Utilities | Electric Utilities | Italy | 4.91% |
| DHL GROUP (XETRA) | Industrials | Transportation | Germany | 4.81% |
| KONINKLIJKE KPN NV | Communication Services | Telecommunication | Netherlands | 4.65% |
| SANOFI - PARIS | Health Care | Pharmaceuticals Biotech & Life Sciences | France | 4.60% |
| UNIPOL GRUPPO FINANZ | Financials | Insurance | Italy | 4.54% |
| MUENCHENER RUECKVER AG-REG | Financials | Insurance | Germany | 3.90% |
| KONE OYJ-B | Industrials | Capital goods | Finland | 3.87% |
| KONINKLIJKE AHOLD DELHAIZE | Consumer Staples | Consumer Staples Distribution & Retail | Netherlands | 3.47% |
| A2A SPA | Utilities | Multi-Utilities | Italy | 3.12% |
| LEGRAND SA | Industrials | Capital goods | France | 3.01% |
| AGEAS | Financials | Insurance | Belgium | 2.96% |

## What was the proportion of sustainability-related investments?

The fund invested 82.68% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Financials* | *Insurance* | *21.36%* |
| *Industrials* | *Capital goods* | *13.58%* |
| *Utilities* | *Electric Utilities* | *10.13%* |
| *Health Care* | *Pharmaceuticals Biotech & Life Sciences* | *7.46%* |

| | | |

| *Consumer Discretionary* | *Consumer Durables & Apparel* | *1.09%* |
| *Real Estate* | *REITs* | *1.01%* |
| *Utilities* | *Independent Power & Renewable Electricity Producers* | *1.01%* |
| *Energy* | *Oil, Gas & Consumable Fuels* | *0.91%* |
| *Materials* | *Containers & Packaging* | *0.85%* |

| | | |
|---|---|---|
| *Utilities* | *Gas Utilities* | *0.83%* |
| *Others* | *Others* | *0.00%* |
| *Cash* | *Cash* | *0.73%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 10.25% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

[ ] No

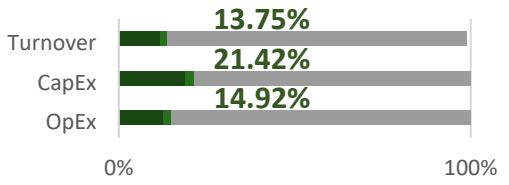

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

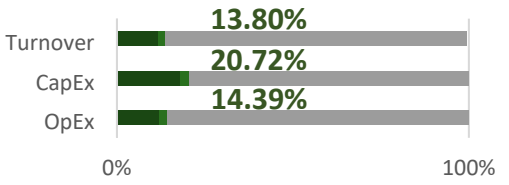

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 85.08% | 78.58% | 86.25% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 2.36% | 2.56% | 2.09% |
| Taxonomy-aligned [No gas and nuclear] | 12.55% | 18.86% | 11.65% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 85.61% | 79.28% | 86.20% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 2.41% | 2.61% | 2.14% |
| Taxonomy-aligned [No gas and nuclear] | 11.98% | 18.10% | 11.66% |

This graph represents 98.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### *What was the share of investments in transitional and enabling activities ?*

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.10% and the share of investment in enabling activities was 8.60%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

At the end of the previous period: the percentage of investments with Taxonomy alignment was 3.94%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **55.52%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 16.91%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The S&P Euro High Yield Dividend Aristocrats Screened Index measures the performance of 40 high dividend-yielding and ESG-scoring companies from the S&P Europe BMI (the "Parent Index") with an Eurozone country classification.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Global Aggregate Green Bond

**Legal entity identifier:** 549300NMTL8UEBWJK406

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **92.11%** of sustainable investments
  - [x] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an Index (100% SOLACTIVE GREEN BOND EUR USD IG INDEX) composed of bonds which are considered as “Green Bond” according to the Climate Bonds Initiative.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the “Solactive Green Bond EUR USD IG Index” (the “Index"), a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.

The Sub-Fund followed an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least

90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative (as mentioned above).

At the end of the period, the portfoio holds 100 % of green bonds.

- ***… and compared to previous periods?***

At the end of the previous period the portfolio held 99.35 % of green bonds.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

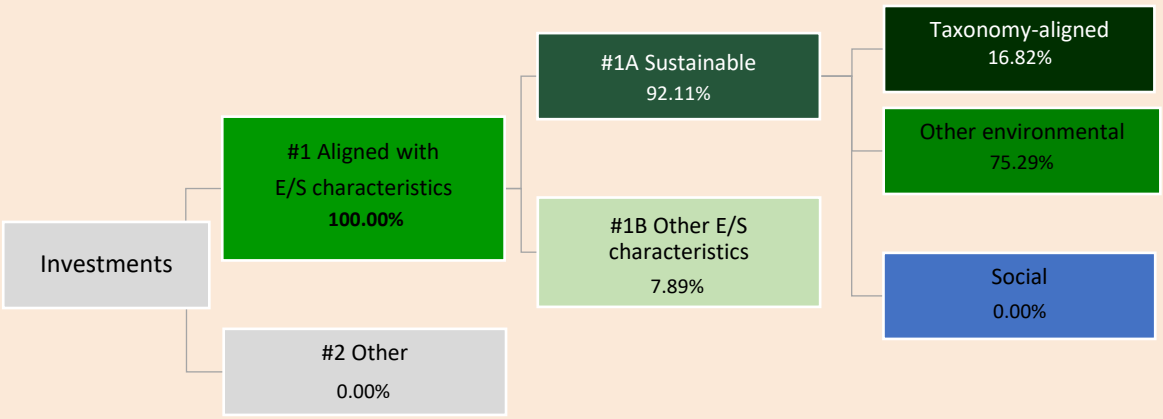

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| OAT 1.75% 06/39 | Treasuries | Treasuries | France | 2.53% |
| EU 3.25% 02/50 UFA | Government-Related | Supranationals | BEL | 1.38% |
| BTPS 4.05% 10/37 13Y | Treasuries | Treasuries | Italy | 1.30% |

| BELGIUM 1.25% 22/04/33 EUR | Treasuries | Treasuries | Belgium | 0.94% |

## What was the proportion of sustainability-related investments?

The fund invested 92.11% in sustainability-related investments.

***What was the asset allocation?***

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***In which economic sectors were the investments made ?***

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Treasuries* | *Treasuries* | *22.95%* |
| *Corporates* | *Banking* | *18.93%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 16.82% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [X] In nuclear energy

[ ] No

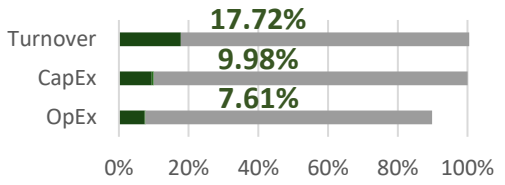

The Master Fund does not invest in fossil gas or nuclear energy projects. The figures shown below are at the issuer level, not at the project level. All green-financed projects comply with our fund's investment philosophy. However, the Fund may invest in companies that are also active in these industries. Such investments may or may not be taxonomy-aligned.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

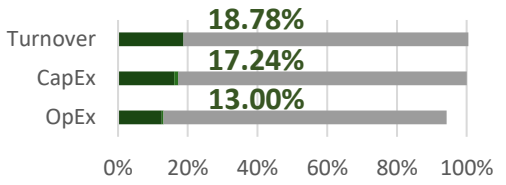

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 92.39% | 90.02% | 82.28% |
| Taxonomy-aligned: Fossil Gas | *0.01%* | *0.03%* | *0.00%* |
| Taxonomy-aligned: Nuclear | *0.20%* | *0.49%* | *0.00%* |
| Taxonomy-aligned [No gas and nuclear] | *7.40%* | *9.45%* | *17.72%* |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 87.00% | 82.76% | 81.22% |
| Taxonomy-aligned: Fossil Gas | *0.01%* | *0.05%* | *0.00%* |
| Taxonomy-aligned: Nuclear | *0.42%* | *1.09%* | *0.00%* |
| Taxonomy-aligned [No gas and nuclear] | *12.57%* | *16.10%* | *18.78%* |

This graph represents 44.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### *What was the share of investments in transitional and enabling activities ?*

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.46%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **75.29%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

This product did not commit to have social sustainable investments over the period.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The "Solactive Green Bond EUR USD IG Index" (the "Index") offers an exposure to the Green Bonds market.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi EUR Corporate Bond Climate Paris Aligned

**Legal entity identifier:** 5493006LD608VBS18F78

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.51%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (Bloomberg MSCI EUR Corporate PAB Select) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The weighted average greenhouse gas (GHG) emissions is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions. - Scope 1 emissions: those from sources owned or controlled by the company. - Scope 2 emissions: those caused by the generation of electricity purchased by the company. - Scope 3 emissions: include all other indirect emissions that occur in a company's value chain. More precisely,

Bloomberg MSCI EUR Corporate PAB Select ("The Index") intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

- At the end of the period, the weighted average greenhouse gas (GHG) emissions of the index Bloomberg MSCI EUR Corporate PAB Select are 10,201,157.
- At the end of the period, the weighted average greenhouse gas (GHG) emissions of the parent index Bloomberg Euro Corporate Bond Index are 48,760,950.

***… and compared to previous periods?***

At the end of the previous period

- the weighted average greenhouse gas (GHG) emissions of the index Bloomberg MSCI EUR Corporate Paris Aligned Green Tilted Index were 12,017,623.

- the weighted average greenhouse gas (GHG) emissions of the parent index Bloomberg Euro Corporate Bond Index were 53,144,218.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

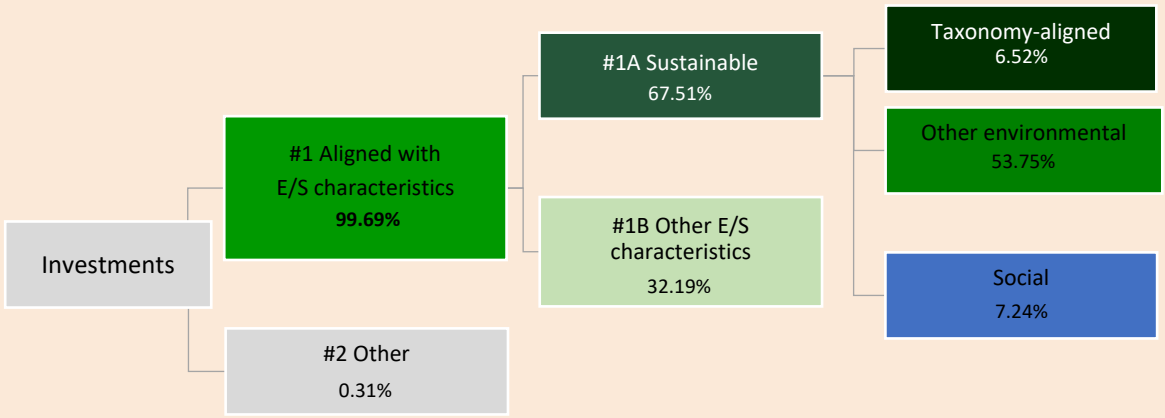

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| AXASA VAR 05/49 EMTN | Corporates | Insurance | France | 0.39% |
| C VAR 05/32 EMTN | Corporates | Banking | United States | 0.33% |

|---|---|---|---|---|
| 02/36 EMTN | | | | |
| JPM VAR 11/31 EMTN | Corporates | Banking | United States | 0.22% |

## What was the proportion of sustainability-related investments?

The fund invested 67.51% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Corporates* | *Banking* | *26.85%* |
| *Corporates* | *Consumer Staples* | *10.71%* |
| *Corporates* | *Communications* | *10.66%* |

| | | |
|---|---|---|
| *Corporates* | *Consumer Discretionary* | *9.10%* |
| *Corporates* | *Insurance* | *9.06%* |
| *Corporates* | *Technology* | *7.32%* |
| *Corporates* | *Real Estate (REIT)* | *6.26%* |
| *Corporates* | *Transportation* | *5.02%* |
| *Corporates* | *Electric* | *4.27%* |

| *Corporates* | *Other Financials* | *2.56%* |
| *Corporates* | *Capital Goods* | *2.54%* |
| *Corporates* | *Other Utilities* | *1.09%* |
| *Corporates* | *Other Industrials* | *0.94%* |
| *Corporates* | *Basic Industry* | *0.41%* |
| *Corporates* | *Natural Gas* | *0.18%* |
| *Corporates* | *Finance Companies* | *0.13%* |
| *Cash* | *Cash* | *0.01%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.52% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

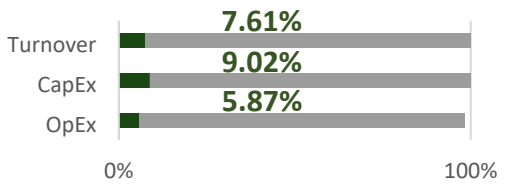

[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

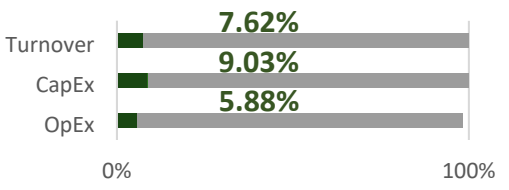

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 94.13% | 90.98% | 92.39% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.05% | 0.01% |
| Taxonomy-aligned: Nuclear | 0.08% | 0.39% | 0.19% |
| Taxonomy-aligned [No gas and nuclear] | 5.80% | 8.58% | 7.41% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 94.12% | 90.97% | 92.38% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.05% | 0.01% |
| Taxonomy-aligned: Nuclear | 0.08% | 0.39% | 0.19% |
| Taxonomy-aligned [No gas and nuclear] | 5.80% | 8.59% | 7.42% |

This graph represents 99.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.08% and the share of investment in enabling activities was 1.57%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 2.19%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **53.75%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 7.24%.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Bloomberg MSCI EUR Corporate PAB Select is constructed from the Bloomberg Euro Corporate Index (the "Parent Index") and intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi EUR Corporate Bond ex-Financials ESG

**Legal entity identifier:** 54930010RGQHB1KEUC57

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. # Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **71.04%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% Bloomberg MSCI ESG EUR Corporate Liquid ex Financial Select Index .The investment objective of the Product is to track an Index, which is based on a Parent Index.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not

limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI ESG EUR Corporate Liquid ex Financial Select Index is 7.27
- the MSCI ESG score of the Bloomberg Euro AGG Corporate Excl Financials Total Return Index is 6.92

***… and compared to previous periods?***

At the end of the previous period:

- the MSCI ESG score of the Bloomberg Barclays MSCI EUR Corporate Liquid ex Financial SRI Sustainable Index was 7.378
- the MSCI ESG score of the Bloomberg Euro AGG Corporate Excl Financials Total Return Index was 7.04.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

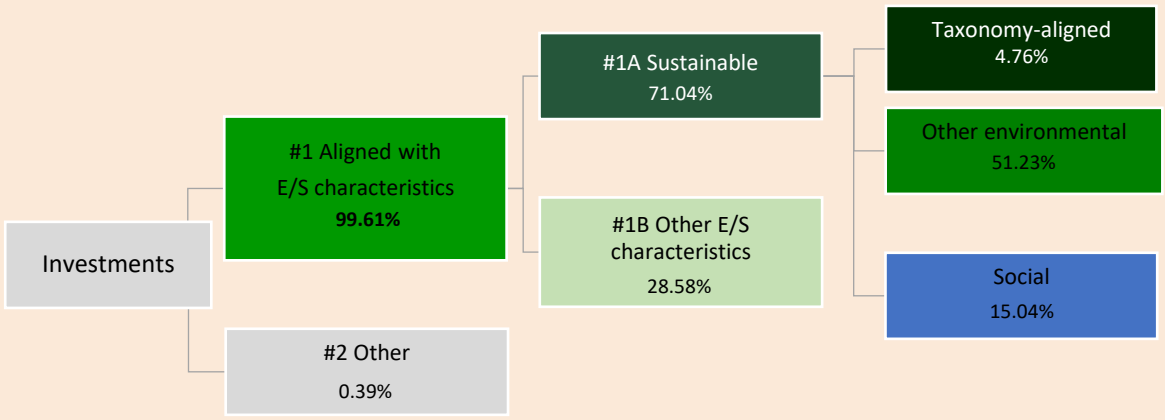

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| FRANCE TEL 8 1/8% 33 | Corporates | Communications | France | 0.30% |

## What was the proportion of sustainability-related investments?

The fund invested 71.04% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Corporates* | *Consumer Staples* | *26.40%* |
| *Corporates* | *Communications* | *16.17%* |
| *Corporates* | *Consumer Discretionary* | *16.01%* |
| *Corporates* | *Capital Goods* | *11.67%* |

| | | |
|---|---|---|
| *Corporates* | *Transportation* | *9.14%* |
| *Corporates* | *Technology* | *8.18%* |
| *Corporates* | *Basic Industry* | *5.53%* |
| *Corporates* | *Electric* | *4.02%* |
| *Corporates* | *Other Utilities* | *2.06%* |
| *Corporates* | *Other Industrials* | *0.73%* |
| *Cash* | *Cash* | *0.08%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.76% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [X] In nuclear energy

[ ] No

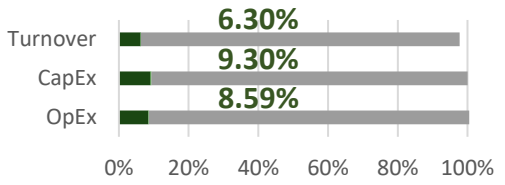

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

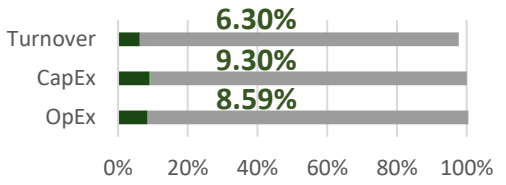

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 91.41% | 90.70% | 93.70% |
| Taxonomy-aligned: Fossil Gas | 0.06% | 0.15% | 0.06% |
| Taxonomy-aligned: Nuclear | 0.13% | 0.16% | 0.04% |
| Taxonomy-aligned [No gas and nuclear] | 8.40% | 8.99% | 6.20% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 91.41% | 90.70% | 93.70% |
| Taxonomy-aligned: Fossil Gas | 0.06% | 0.15% | 0.06% |
| Taxonomy-aligned: Nuclear | 0.13% | 0.16% | 0.04% |
| Taxonomy-aligned [No gas and nuclear] | 8.40% | 8.99% | 6.20% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.13% and the share of investment in enabling activities was 3.85%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 5.31%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **51.23%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 15.04%.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The index is representative of the performance of EUR denominated, investment grade corporate bonds issued by European and non-European corporates, with maturities of at least 1 year. The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a “red” MSCI ESG Controversy Score.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI China ESG Selection Extra

**Legal entity identifier:** 549300E7C8KZ5P6BZI39

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

| | |
|---|---|
| ☐ **Yes** | ☒ **No** |

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.70%** of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It made a **sustainable investments with a social objective:** _____

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI China ESG Selection P-Series Extra Net Total Return Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI China ESG Selection P-Series Extra Net Total Return Index is 6.581
- the MSCI ESG score of the MSCI China Index is 5.631

***… and compared to previous periods?***

At the end of the previous period:

- the MSCI ESG score of the MSCI China Select ESG Rating and Trend Leaders Net Total Return Index was 5.983
- the MSCI ESG score of the MSCI China Index was 4.924

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

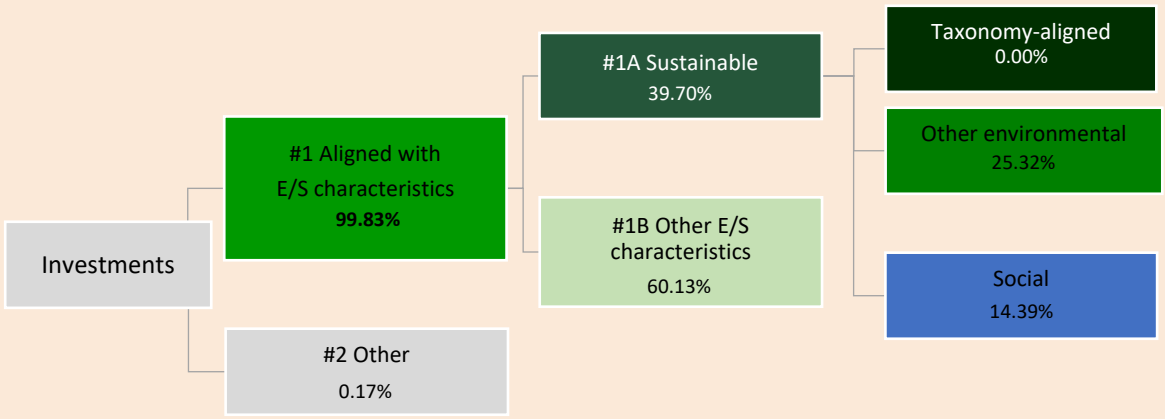

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| ALIBABA GROUP HOLDING LTD | Consumer Discretionary | Consumer Discretionary Distribution & Retail | Cayman Islands | 19.31% |
| TENCENT HOLDINGS LTD | Communication Services | Media & Entertainment | Cayman Islands | 14.93% |
| CHINA CONSTRUCT BANK | Financials | Banks | China | 6.33% |

| INNOVENT BIOLOGICS INC | Health Care | Pharmaceuticals Biotech & Life Sciences | Cayman Islands | 1.24% |
| LI AUTO INC-CLASS A | Consumer Discretionary | Automobiles & Components | Cayman Islands | 1.12% |

## What was the proportion of sustainability-related investments?

The fund invested 39.70% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

During the reporting period, the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

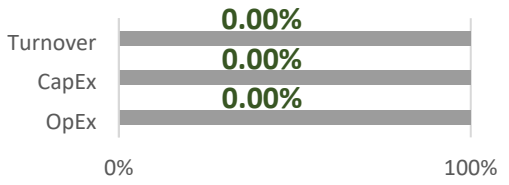

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

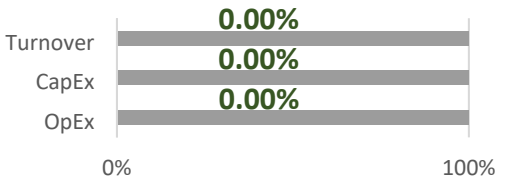

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 100.00% | 100.00% | 100.00% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.00% | 0.00% | 0.00% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 100.00% | 100.00% | 100.00% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.00% | 0.00% | 0.00% |

This graph represents 97.2% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%

are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **25.32%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 14.39%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI China ESG Selection P-Series Extra Net Total Return Index (the "Index") is denominated in US Dollars, and representative of the performance of large and mid cap stocks, across the Chinese economy, issued by companies with robust Environmental, Social and Governance (ESG) ratings.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI Semiconductors

**Legal entity identifier:** 549300PEVY81KWEMRO55

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

| | |
|---|---|
| ☐ **Yes** | ☒ **No** |
| ☐ It made **sustainable investments with an environmental objective:** _____ | ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.75%** of sustainable investments |
| ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy | ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | ☒ with a social objective |
| ☐ It made a **sustainable investments with a social objective:** _____ | ☐ It promoted E/S characteristics, but **did not make any sustainable investments** |

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% MSCI ACWI IMI Semiconductors & Semiconductor Equipment Filtered Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:
- the MSCI ESG score of the MSCI ACWI IMI Semiconductors & Semiconductor Equipment Filtered Index is 7.86
- the MSCI ESG score of the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the “Parent Index”) is 7.72.

***… and compared to previous periods?***

At the end of the period:

- the MSCI ESG score of the MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index was 8.844

- the MSCI ESG score of the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the “Parent Index”) was 8.4.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of

this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

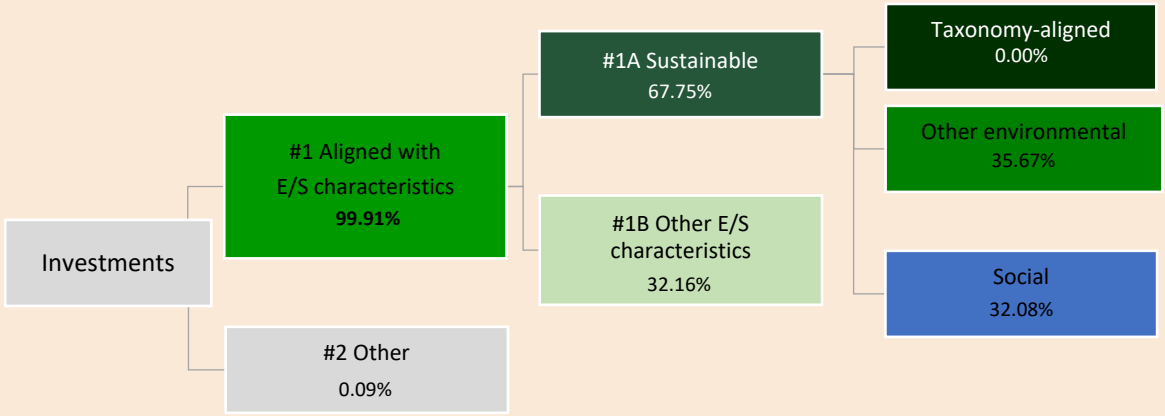

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| NVIDIA CORP | Information Technology | Semiconductors & Semiconductor Equipment | United States | 31.78% |
| BROADCOM INC | Information Technology | Semiconductors & Semiconductor Equipment | United States | 16.02% |
| TAIWAN SEMICONDUCTOR MANUFAC | Information Technology | Semiconductors & Semiconductor Equipment | Taiwan | 14.07% |
| ASML HOLDING NV | Information Technology | Semiconductors & Semiconductor Equipment | Netherlands | 5.11% |
| ADVANCED MICRO DEVICES | Information Technology | Semiconductors & Semiconductor Equipment | United States | 3.51% |
| MICRON TECHNOLOGY INC | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.49% |
| QUALCOMM INC | Information | Semiconductors | United States | 2.45% |

| | | | | |
|---|---|---|---|---|
| | Technology | & Semiconductor Equipment | | |
| LAM RESEARCH CORP | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.29% |
| TEXAS INSTRUMENTS | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.23% |
| APPLIED MATERIALS INC | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.22% |

## What was the proportion of sustainability-related investments?

The fund invested 67.75% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Information Technology* | *Semiconductors & Semiconductor Equipment* | *99.91%* |

| | | |
|---|---|---|
| *Others* | *Others* | *0.00%* |
| *Forex* | *Forex* | *-0.00%* |
| *Cash* | *Cash* | *0.09%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are**

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

During the reporting period, the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

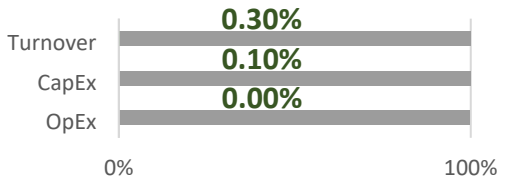

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

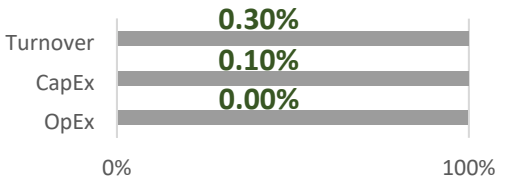

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 100.00% | 99.90% | 99.70% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.00% | 0.10% | 0.30% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 100.00% | 99.90% | 99.70% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.00% | 0.10% | 0.30% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.04%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **35.67%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

Regulation (EU) 2020/852.

The share of socially sustainable investments at the end of the period was 32.08%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI ACWI IMI Semiconductors & Semiconductor Equipment Filtered (the "Index") is denominated in US Dollars and representative of a select set of companies from the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the "Parent Index") that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI Europe ESG Selection

**Legal entity identifier:** 5493003TSM6WSACG3290

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

| | |
|---|---|
| ☐ **Yes** | ☒ **No** |

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **89.05%** of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It made a **sustainable investments with a social objective:** _____

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI Europe ESG Selection P-Series 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI Europe ESG Selection P-Series 5% Issuer Capped is 8.448
- the MSCI ESG score of the MSCI Europe Index is 7.698

***… and compared to previous periods?***

At the end of the previous period:

- the MSCI ESG score of the MSCI EUROPE ESG LEADERS SELECT 5% ISSUER CAPPED was 8.609
- the MSCI ESG score of the MSCI Europe Index was 7.879

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

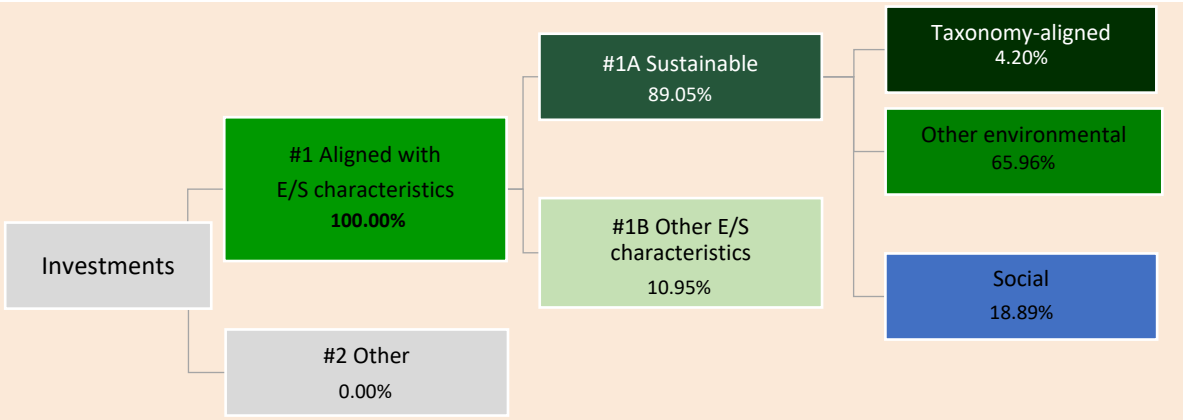

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| AM ETF MSCI EUROPE ESG LEADERS-MASTER | Financials | Mutual Funds | Luxembourg | 100.01% |

### What was the proportion of sustainability-related investments?

The fund invested 89.05% in sustainability-related investments.

#### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***In which economic sectors were the investments made ?***

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Financials* | *Mutual Funds* | *100.01%* |
| *Forex* | *Forex* | *0.01%* |
| *Cash* | *Cash* | *-0.01%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.20% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

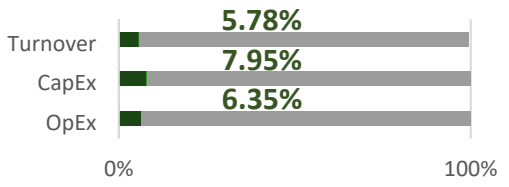

[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

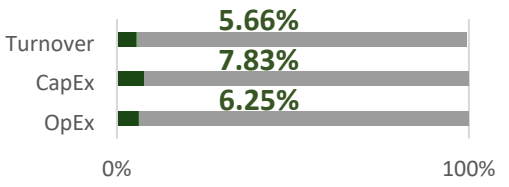

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 93.65% | 92.05% | 94.22% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.03% | 0.03% |
| Taxonomy-aligned: Nuclear | 0.11% | 0.22% | 0.22% |
| Taxonomy-aligned [No gas and nuclear] | 6.24% | 7.70% | 5.52% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 93.75% | 92.17% | 94.34% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.03% | 0.03% |
| Taxonomy-aligned: Nuclear | 0.11% | 0.22% | 0.22% |
| Taxonomy-aligned [No gas and nuclear] | 6.14% | 7.58% | 5.41% |

This graph represents 99.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.18% and the share of investment in enabling activities was 3.97%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 2.71%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **65.96%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 18.89%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI Europe ESG Selection P-Series 5% Issuer Capped Index (the "Index") is denominated in Euros in order to offer an exposure to the performance of large and mid cap stocks, across developed European countries, issued by companies having a high Environmental, Social and Governance (ESG) ratings.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Global Aggregate Proceeds Bond 1-10Y

**Legal entity identifier:** 549300AN4QVQ0SPP1Y68

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

| | |
|---|---|
| ☐ **Yes** | ☒ **No** |
| ☐ It made **sustainable investments with an environmental objective:** _____ | ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **92.72%** of sustainable investments |
| ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy | ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | ☐ with a social objective |
| ☐ It made a **sustainable investments with a social objective:** _____ | ☐ It promoted E/S characteristics, but **did not make any sustainable investments** |

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an Index (Bloomberg MSCI Global Green Bond 1-10 Year Index) composed of bonds which are considered as “Green Bond” according to the MSCI ESG research.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and .or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “Index"), a bond must be deemed eligible as a “Green Bond” by MSCI ESG Research (as detailed hereafter). MSCI ESG Research provides in-depth research, ratings and analysis of the environmental, social and governance-related business practices of thousands of companies worldwide. It consists of an integrated suite of tools and products to efficiently manage research,

analysis and compliance tasks across the spectrum of ESG factors. An independent research-driven methodology is used to evaluate
green bonds to ensure they adhere to established Green Bond principles and are classified by their environmental use of proceeds. MSCI ESG Research has developed and implemented the following set of criteria to defined Green Bonds which are eligible to the index. Green bonds are fixed income securities in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The Sub-Fund followed an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by MSCI ESG Research (as mentioned above).

At the end of the period, the portfoio holds 99.62 % of green bonds.

- ***… and compared to previous periods?***

At the end of the previous period the portfolio held 98.33 % of green bonds

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

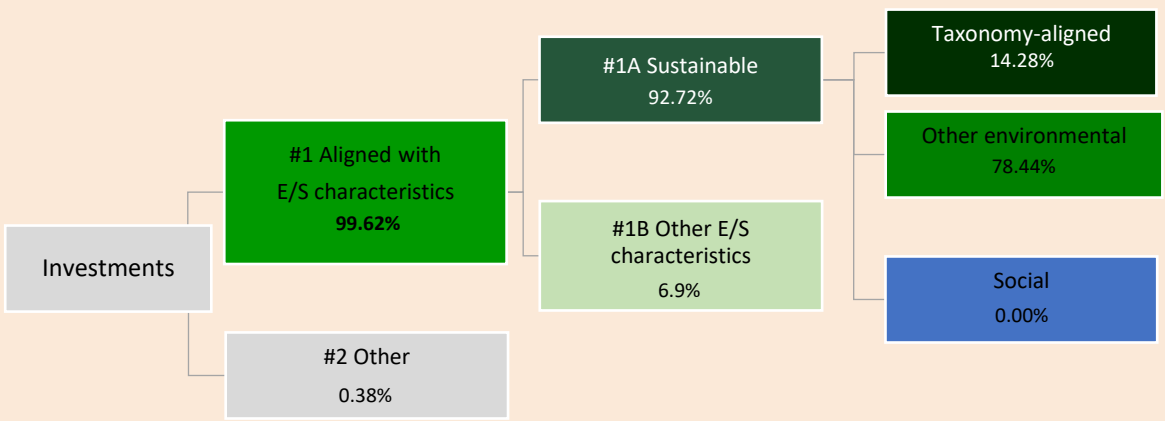

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| UK TSY 0.875% 07/33 | Treasuries | Treasuries | United Kingdom | 3.26% |
| BTPS 4% 10/31 8Y | Treasuries | Treasuries | Italy | 1.31% |
| BTPS 4% 04/35 13Y | Treasuries | Treasuries | Italy | 1.30% |
| EU 2.75% 02/33 UFA | Supranational | Supranational | | 1.29% |

| BELGIUM 1.25% 22/04/33 EUR | Treasuries | Treasuries | Belgium | 0.99% |
| DBR % 08/30 G | Treasuries | Treasuries | Germany | 0.92% |
| OBL 1.3% 10/27 G | Treasuries | Treasuries | Germany | 0.84% |

| | | | | |
|---|---|---|---|---|
| DBR 0% 08/31 G | Treasuries | Treasuries | Germany | 0.74% |
| KFW 2.875% 03/32 EMTN | Agencies | Agencies | Germany | 0.67% |
| AUSTRIA 2.9% 05/29 | Treasuries | Treasuries | Austria | 0.64% |
| IRELAND 1.35% 03/31 | Treasuries | Treasuries | Ireland | 0.64% |
| OBL 2.1% 04/29 G | Treasuries | Treasuries | Germany | 0.61% |
| EIB 2.75% 01/34 EARN | Supranational | Supranational | | 0.57% |
| KFW % 09/28 EMTN | Agencies | Agencies | Germany | 0.53% |

## What was the proportion of sustainability-related investments?

The fund invested 92.72% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Agencies* | *Government Related* | *17.56%* |
| *Banking* | *Corporates* | *15.67%* |
| *Treasuries* | *Treasuries* | *15.32%* |

| *Basic industry* | *Corporates* | *0.14%* |
| *Finance companies* | *Corporates* | *0.07%* |
| *Industrial other* | *Corporates* | *0.04%* |
| *Brokerage* | *Corporates* | *0.04%* |
| *Agency cmbs* | *Securitized* | *0.03%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 14.28% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [X] In nuclear energy

[ ] No

The Master Fund does not invest in fossil gas or nuclear energy projects. The figures shown below are at the issuer level, not at the project level. All green-financed projects comply with our fund's investment philosophy. However, the Fund may invest in companies that are also active in these industries. Such investments may or may not be taxonomy-aligned.

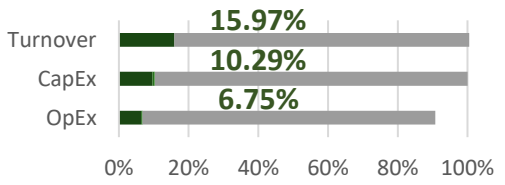

greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

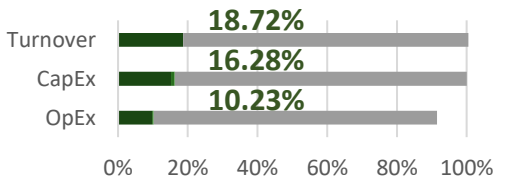

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 93.25% | 89.71% | 84.03% |
| Taxonomy-aligned: Fossil Gas | 0.03% | 0.07% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.36% | 0.65% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 6.36% | 9.57% | 15.97% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 89.77% | 83.72% | 81.28% |
| Taxonomy-aligned: Fossil Gas | 0.06% | 0.07% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.39% | 1.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 9.78% | 15.20% | 18.72% |

This graph represents 50.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.44%

are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **78.44%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments ?

This product did not commit to have social sustainable investments over the period.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The "Bloomberg MSCI Global Green Bond 1-10 Year Index" (the "Index") offers an exposure to the Green Bonds market issued by investment grade entities and denominated in multiple currencies .

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi S&P Eurozone Climate Paris Aligned

**Legal entity identifier:** 549300S2QFMA0J61VE20

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **85.80%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash.
The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.
- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.

- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index is 57.82
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the S&P Eurozone LargeMidCap Index (the "Parent Index") is 130.52.

***… and compared to previous periods?***

At the end of the previous period, the weighted average greenhouse gas (GHG) intensity of the Index S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index was 228.20
and the weighted average greenhouse gas (GHG) intensity of the parent Index S&P Eurozone LargeMidCap Index (the "Parent Index") was 789.81.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

**What were the top investments of this financial product?**

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

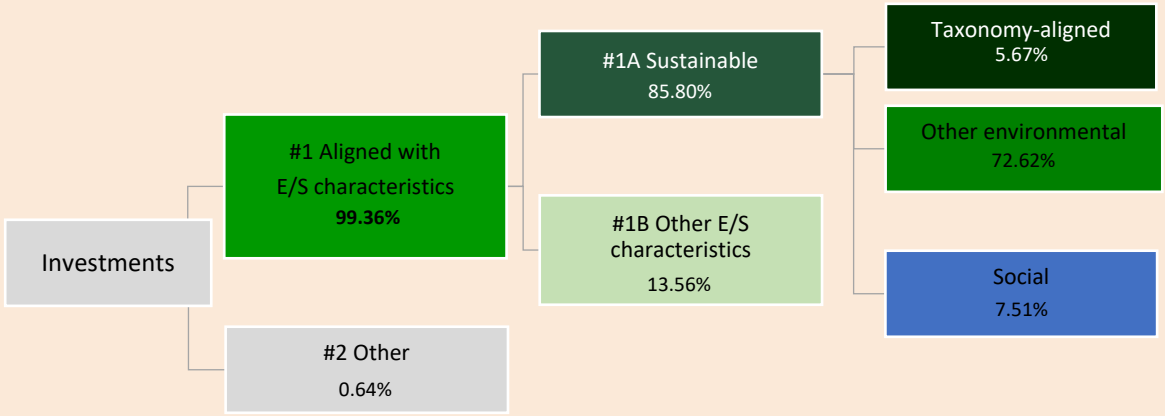

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| ASML HOLDING NV | Information Technology | Semiconductors & Semiconductor Equipment | Netherlands | 5.92% |
| SAP SE / XETRA | Information Technology | Software & Services | Germany | 4.96% |
| SCHNEIDER ELECT SE | Industrials | Capital goods | France | 4.19% |
| DEUTSCHE TELEKOM NAM (XETRA) | Communication Services | Telecommunication | Germany | 3.71% |
| INTESA SANPAOLO | Financials | Banks | Italy | 3.57% |
| SANOFI - PARIS | Health Care | Pharmaceuticals Biotech & Life Sciences | France | 3.46% |
| BNP PARIBAS | Financials | Banks | France | 3.39% |
| ALLIANZ SE-REG | Financials | Insurance | Germany | 3.30% |
| BANCO BILBAO VIZCAYA ARGENTA | Financials | Banks | Spain | 3.26% |
| HERMES INTERNATIONAL | Consumer Discretionary | Consumer Durables & Apparel | France | 3.16% |
| L OREAL (PARIS) | Consumer Staples | Household & Personal Products | France | 3.03% |

| | | | | |
|---|---|---|---|---|
| FERRARI NV MILAN | Consumer Discretionary | Automobiles & Components | Netherlands | 2.83% |
| DEUTSCHE BOERSE AG | Financials | Financial Services | Germany | 2.63% |
| UNICREDIT SPA | Financials | Banks | Italy | 2.41% |
| SOCIETE GENERALE | Financials | Banks | France | 2.28% |

## What was the proportion of sustainability-related investments?

The fund invested 85.80% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Cash* | *Cash* | *0.64%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 5.67% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [X] In nuclear energy

[ ] No

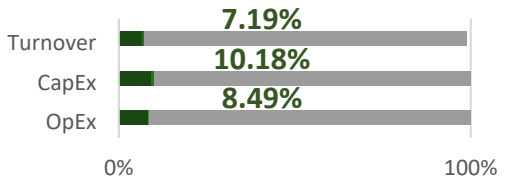

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

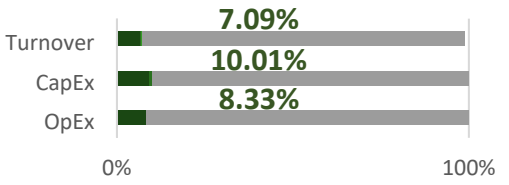

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 91.51% | 89.82% | 92.81% |
| Taxonomy-aligned: Fossil Gas | 0.01% | 0.02% | 0.01% |
| Taxonomy-aligned: Nuclear | 0.20% | 0.92% | 0.51% |
| Taxonomy-aligned [No gas and nuclear] | 8.28% | 9.23% | 6.68% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 91.67% | 89.99% | 92.91% |
| Taxonomy-aligned: Fossil Gas | 0.01% | 0.02% | 0.01% |
| Taxonomy-aligned: Nuclear | 0.14% | 0.89% | 0.42% |
| Taxonomy-aligned [No gas and nuclear] | 8.19% | 9.10% | 6.66% |

This graph represents 99.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### *What was the share of investments in transitional and enabling activities ?*

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.35% and the share of investment in enabling activities was 5.02%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

At the end of the previous period: the percentage of investments with Taxonomy alignment was 4.09%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **72.62%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.51%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the "Index"), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Eurozone LargeMidCap Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5 first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Euro Government Green Bond

**Legal entity identifier:** 549300JJ88530HI0FM17

# Sustainable investment objective

**Did this financial product have a sustainable investment objective?**

- [X] **Yes**
- [ ] **No**

- [X] It made **sustainable investments with an environmental objective: 100%**
  - [X] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective: _____**
- [ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent was the sustainable investment objective of this financial product met ?**

The Sub Fund continuously met its sustainable investment objective through among others replicating an Index (100% SOLACTIVE EURO GOVERNMENT GREEN BOND INDEX) composed of bonds which are considered as “Green Bond” according to the Climate Bonds Initiative.

***How did the sustainability indicators perform?***

Sustainabilty indicator used to measure the attainment of the sustainable investment objective of this financial product is the percentage of bonds considered as “Green Bond” by the Climate Bond Initiative in the Index composition.

At the end of the period the portfolio holds 100 % of green bonds

***… and compared to previous periods?***

At the end of the previous period the portfolio held 100 % of green bonds.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

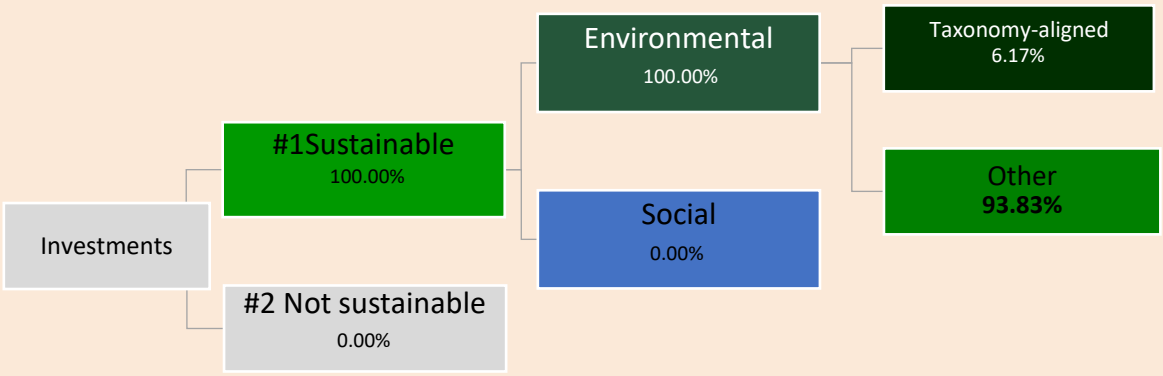

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| OAT 1.75% 06/39 | Treasuries | Treasuries | France | 11.31% |
| BTPS 4.05% 10/37 13Y | Treasuries | Treasuries | Italy | 5.83% |
| BTPS 4% 10/31 8Y | Treasuries | Treasuries | Italy | 5.55% |
| BTPS 4% 04/35 13Y | Treasuries | Treasuries | Italy | 5.50% |
| OAT 0.5% 06/44 OAT | Treasuries | Treasuries | France | 5.12% |
| OAT 3% 06/49 OAT | Treasuries | Treasuries | France | 4.91% |
| DBR 2.3% 02/33 G | Treasuries | Treasuries | Germany | 4.75% |
| NEDERLD 3.25% 01/44 | Treasuries | Treasuries | Netherlands | 4.57% |
| SPAIN 1% 07/42 | Treasuries | Treasuries | Spain | 4.54% |
| NEDERLD 0.5% 01/40 | Treasuries | Treasuries | Netherlands | 4.35% |
| BELGIUM 1.25% 22/04/33 EUR | Treasuries | Treasuries | Belgium | 4.19% |
| DBR % 08/30 G | Treasuries | Treasuries | Germany | 3.90% |
| OBL 1.3% 10/27 G | Treasuries | Treasuries | Germany | 3.56% |
| BTPS 1.5% 04/45 24Y | Treasuries | Treasuries | Italy | 3.53% |
| DBR 1.8% 08/53 G | Treasuries | Treasuries | Germany | 3.51% |

## What was the proportion of sustainability-related investments?

The fund invested 100.00% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Sustainable** covers sustainable investments with environmental or social objectives
**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Treasuries* | *Treasuries* | *100.00%* |
| *Cash* | *Cash* | *0.00%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund has an environmental sustainable investment objective. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.17% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

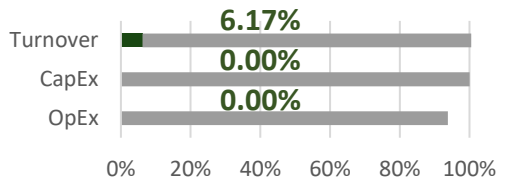

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

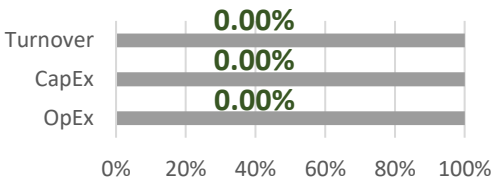

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 100.00% | 100.00% | 93.83% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.00% | 0.00% | 6.17% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 100.00% | 100.00% | 100.00% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.00% | 0.00% | 0.00% |

This graph represents 0.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 45.08%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **93.83%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

## What was the share of socially sustainable investments ?

This product did not commit to have social sustainable investments over the period.

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to attain the sustainable investment objective during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is representative of the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR. Green Bonds are issued in order to fund projects that have positive environmental outcomes.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Corporate Proceeds Bond

**Legal entity identifier:** 549300DGW633M4IHL895

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **84.01%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an Index (100% SOLACTIVE EUR USD IG CORPORATE GREEN BOND TR INDEX) composed of bonds which are considered as “Green Bond” according to the Climate Bonds Initiative.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the Solactive EUR USD IG Corporate Green Bond TR Index” (the “Index"), a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.
The Sub-Fund followed an extra-financial approach significantly engaging that contributes to and

has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index.

At the end of the period, the portfoio holds 99.81 % of green bonds.

- ***… and compared to previous periods?***

At the end of the previous period the portfolio held 99.42 % of green bonds.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates

the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

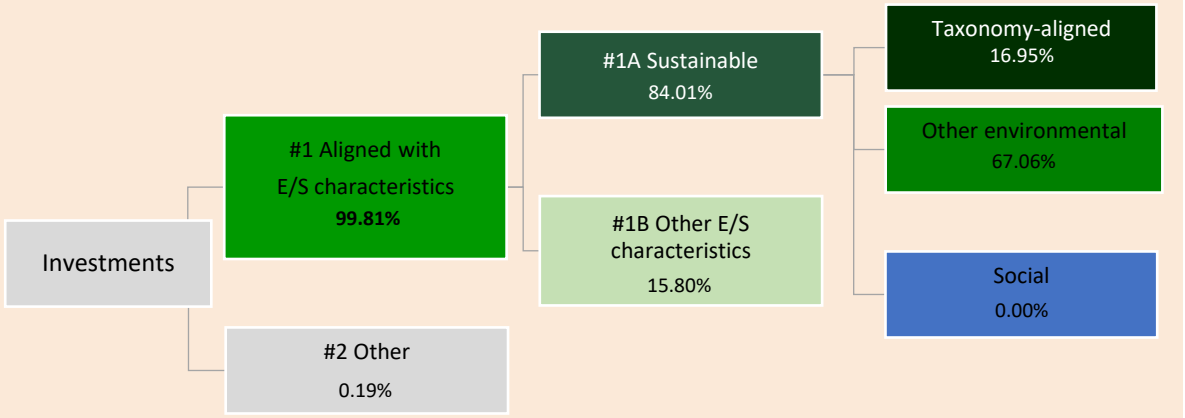

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| JPM VAR 10/27 | Corporates | Banking | United States | 1.96% |
| NNGRNV VAR 11/43 EMTN | Corporates | Insurance | Netherlands | 1.63% |
| CABKSM VAR 11/30 EMTN | Corporates | Banking | Spain | 1.57% |
| HESLAN 4% 02/30 EMTN | Corporates | Banking | Germany | 1.48% |
| SRBANK 3.75% 11/27 EMTN | Corporates | Banking | Norway | 1.46% |
| ENGIFP 4% 01/35 EMTN | Corporates | Natural Gas | France | 1.45% |

| VW 3.625% 10/26 EMTN | Corporates | Consumer Discretionary | Germany | 1.44% |
| ASSGEN 3.212% 01/29 EMTN | Corporates | Insurance | Italy | 1.43% |
| ASSGEN 3.547% 01/34 EMTN | Corporates | Insurance | Italy | 1.43% |
| SEB 4.125% 06/27 EMTN | Corporates | Banking | Sweden | 1.43% |
| NWG VAR 09/28 EMTN | Corporates | Banking | United Kingdom | 1.42% |
| INTNED VAR 08/33 | Corporates | Banking | Netherlands | 1.42% |
| C VAR 09/28 | Corporates | Banking | United States | 1.41% |
| AMPRIO 3.45% 09/27 | Corporates | Electric | Germany | 1.40% |

## What was the proportion of sustainability-related investments?

The fund invested 84.01% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made ?***

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Corporates* | *Banking* | *34.08%* |
| *Corporates* | *Electric* | *20.61%* |
| *Corporates* | *Real Estate (REIT)* | *10.74%* |
| *Corporates* | *Consumer Discretionary* | *7.88%* |
| *Corporates* | *Natural Gas* | *6.45%* |
| *Corporates* | *Insurance* | *5.67%* |
| *Corporates* | *Communications* | *4.34%* |
| *Corporates* | *Consumer Staples* | *2.81%* |

| | | |
|---|---|---|
| *Corporates* | *Other Financials* | *2.60%* |
| *Corporates* | *Technology* | *2.43%* |
| *Corporates* | *Transportation* | *1.27%* |
| *Corporates* | *Capital Goods* | *0.94%* |
| *Forex* | *Forex* | *-0.00%* |
| *Cash* | *Cash* | *0.19%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 16.95% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [X] In nuclear energy

[ ] No

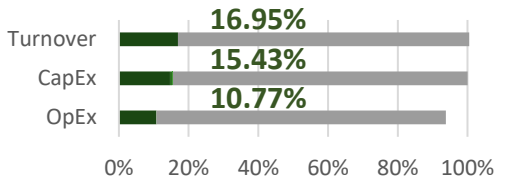

The Master Fund does not invest in fossil gas or nuclear energy projects. The figures shown below are at the issuer level, not at the project level. All green-financed projects comply with our fund's investment philosophy. However, the Fund may invest in companies that are also active in these industries. Such investments may or may not be taxonomy-aligned.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

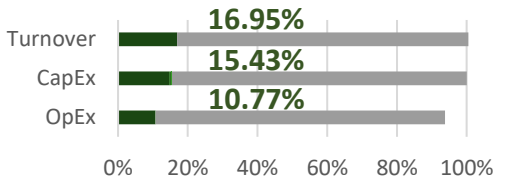

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 89.23% | 84.57% | 83.05% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.04% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.05% | 0.73% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 10.72% | 14.66% | 16.95% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 89.23% | 84.57% | 83.05% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.04% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.05% | 0.73% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 10.72% | 14.66% | 16.95% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 41.86%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **67.06%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The "Solactive EUR USD IG Corporate Green Bond TR Index" (the "Index") offers an exposure to investment grade rated Green Bonds denominated in EUR and USD issued by companies.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI Europe Action

**Legal entity identifier:** 213800U223GTVOYUZJ92

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **80.24%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% MSCI EUROPE CLIMATE ACTION. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The MSCI "Climate Risk Management Weighted Average Score" is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, the MSCI Europe Climate Action Net Total Return Index (the "Index") is based on

the MSCI Europe Index (the “Parent Index”) and is representative of the performance of large and mid cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition, based on, among others, the “Climate Risk Management Weighted Average Score”, while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index

At the end of the period MSCI Climate Risk Management Weighted Average Score of the index MSCI Europe Climate Action Net Total Return Index is 8.084.

At the end of the period MSCI Climate Risk Management Weighted Average Score of the parent index MSCI Europe Index is 7.698.

***… and compared to previous periods?***

At the end of the previous period:

- the MSCI ESG score of the MSCI Climate Risk Management Weighted Average Score of the index MSCI Europe Climate Action Net Total Return Index was 7.1
- the MSCI ESG score of the MSCI Climate Risk Management Weighted Average Score of the parent index MSCI Europe Index was 6.6.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

anti-corruption and anti-bribery matters.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

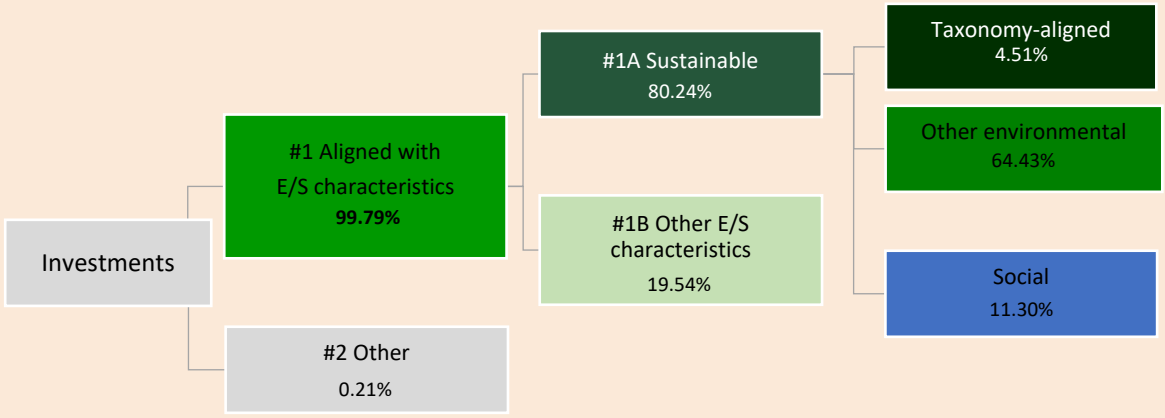

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| ASML HOLDING NV | Information Technology | Semiconductors & Semiconductor Equipment | Netherlands | 4.63% |
| SAP SE / XETRA | Information Technology | Software & Services | Germany | 3.38% |
| HSBC HOLDING PLC GBP | Financials | Banks | United Kingdom | 2.96% |
| NOVARTIS AG-REG | Health Care | Pharmaceuticals Biotech & Life Sciences | Switzerland | 2.89% |
| NESTLE SA-REG | Consumer Staples | Food, Beverage & Tobacco | Switzerland | 2.85% |
| ASTRAZENECA GBP | Health Care | Pharmaceuticals Biotech & Life Sciences | United Kingdom | 2.82% |
| ROCHE HLDG AG-GENUSS | Health Care | Pharmaceuticals Biotech & Life Sciences | Switzerland | 2.77% |
| SIEMENS AG-REG | Industrials | Capital goods | Germany | 2.47% |
| NOVO NORDISK A/S-B | Health Care | Pharmaceuticals Biotech & Life Sciences | Denmark | 2.11% |
| ALLIANZ SE-REG | Financials | Insurance | Germany | 1.96% |
| BANCO SANTANDER SA | Financials | Banks | Spain | 1.87% |

| | | | | |
|---|---|---|---|---|
| MADRID | | | | |
| SCHNEIDER ELECT SE | Industrials | Capital goods | France | 1.85% |
| LVMH MOET HENNESSY LOUIS VUI | Consumer Discretionary | Consumer Durables & Apparel | France | 1.85% |
| UNILEVER PLC (GBP) | Consumer Staples | Household & Personal Products | United Kingdom | 1.75% |
| UBS GROUP AG | Financials | Financial Services | Switzerland | 1.57% |

## What was the proportion of sustainability-related investments?

The fund invested 80.24% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Health Care* | *Pharmaceuticals Biotech & Life Sciences* | *15.19%* |

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on

emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.51% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

○ ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

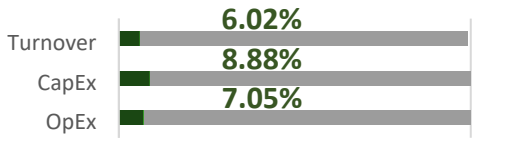

[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

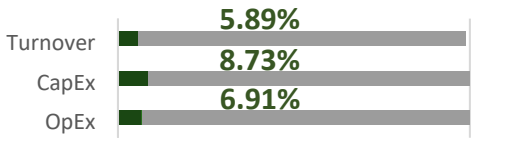

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 92.95% | 91.12% | 93.98% |
| Taxonomy-aligned: Fossil Gas | 0.07% | 0.02% | 0.02% |
| Taxonomy-aligned: Nuclear | 0.11% | 0.19% | 0.20% |
| Taxonomy-aligned [No gas and nuclear] | 6.87% | 8.67% | 5.80% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 93.09% | 91.27% | 94.11% |
| Taxonomy-aligned: Fossil Gas | 0.07% | 0.02% | 0.02% |
| Taxonomy-aligned: Nuclear | 0.09% | 0.18% | 0.16% |
| Taxonomy-aligned [No gas and nuclear] | 6.76% | 8.53% | 5.70% |

This graph represents 99.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

○ ***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.11% and the share of investment in

enabling activities was 4.27%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 2.87%

**are** sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **64.43%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.30%.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

**How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is denominated in Euros and representative of the performance of large and mid-cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi STOXX Europe 600 Energy Screened

**Legal entity identifier:** 213800BXD1FUAIZFLG25

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [X] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (STOXX Europe 600 Energy Screened+ Index) "integrating an environmental, social and governance ("ESG") negative screening approach.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, the weight of the Parent Index constituents were tilted based on an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainability indicators perform?***

The Sustainalytics ESG Risk Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. The Sustainalytics ESG Risk Ratings (the "ESG score") measures a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. Exposure refers to the extent to which

a company is exposed to different material ESG issues.

More precisely, the STOXX Europe 600 Energy Screened+ Index is constructed from the securites from the STOXX Europe 600 belonging to the ICB Energy Industry (the "Eligible Universe").

- At the end of the period, the Sustainalytics ESG Risk Rating of the index STOXX Europe 600 Energy Screened+ Index is 59.2.
- At the end of the period, the Sustainalytics ESG Risk Rating of the parent index STOXX Europe 600 is 57.02.

- ***… and compared to previous periods?***

At the end of the previous period:
- the the Sustainalytics ESG Risk Rating of the index STOXX Europe 600 Energy ESG+ Index was 78.16
- the Sustainalytics ESG Risk Rating of the Parent index STOXX Europe 600 is 75.18

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

This product did not commit to make sustainable investments during the period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This product did not commit to make sustainable investments during the period.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  This product did not commit to make sustainable investments during the period.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  This product did not commit to make sustainable investments during the period.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

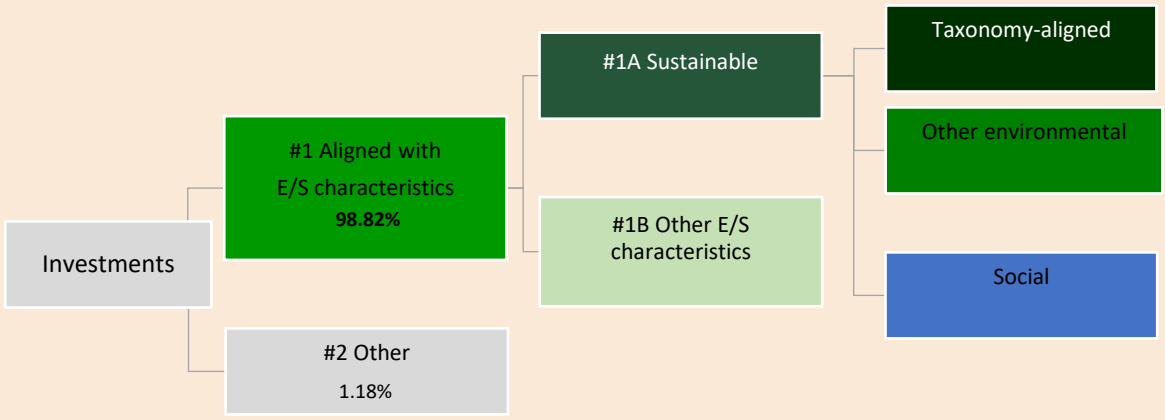

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| SHELL PLC EUR | Energy | Oil, Gas & Consumable Fuels | United Kingdom | 29.14% |

## What was the proportion of sustainability-related investments?

The fund did not commit to have sustainable investments over the period.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Energy* | *Oil, Gas & Consumable Fuels* | *61.47%* |
| *Industrials* | *Capital goods* | *22.87%* |
| *Energy* | *Energy Equipment & Services* | *9.19%* |
| *Utilities* | *Gas Utilities* | *5.29%* |

| | | |
|---|---|---|
| *Forex* | *Forex* | *0.00%* |
| *Others* | *Others* | *0.00%* |
| *Cash* | *Cash* | *1.18%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 14.35% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [ ] In nuclear energy

[ ] No

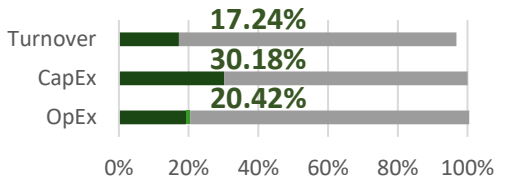

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

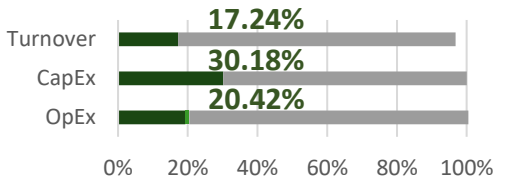

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 79.58% | 69.82% | 82.76% |
| Taxonomy-aligned: Fossil Gas | 1.12% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 19.30% | 30.18% | 17.24% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 79.58% | 69.82% | 82.76% |
| Taxonomy-aligned: Fossil Gas | 1.12% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 19.30% | 30.18% | 17.24% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 1.78% and the share of investment in enabling activities was 12.31%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 12.88%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

This product did not commit to have environmental sustainable investments over the period.

**What was the share of socially sustainable investments ?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is an equity index that tracks the performance of the companies of the STOXX Europe 600 (which represents the 600 leading securities of European developed countries) belonging to the Energy Industry as determined by the ICB after a set of compliance, involvement and ESG performance screens are applied.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Global Gender Equality

**Legal entity identifier:** 213800EGF3QX5VPK3Z27

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **63.53%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating the Index (Solactive Equileap Global Gender Equality Index), integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

***How did the sustainability indicators perform?***

The Equileap Gender Diversity Score is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The Equileap Gender Diversity Score (the "Equileap Score") is calculated based on criteria which are grouped in

financial product are attained.

categories such as gender balance in leadership and workforce; equal compensation and worklife balance; policies promoting gender equality; commitment to transparency and accountability.

The sustainability indicator used is the Equileap Gender Diversity Score of the ESG reference benchmark that is measured against the weighted Gender Scores of the Parent Index.

At the end of the period:
- the Equileap Gender Diversity Score of the Solactive Equileap Global Gender Equality Index is 68.48
- the Equileap Gender Diversity Score of the Solactive GBS Developed Markets Large & Mid Cap Index (the "Parent Index") is 55.18

***… and compared to previous periods?***

At the end of the previous period:
- the Equileap Gender Diversity Score of the Solactive Equileap Global Gender Equality Index was 68.13
- the Equileap Gender Diversity Score of the Solactive GBS Developed Markets Large & Mid Cap Index (the "Parent Index") was 55.22

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

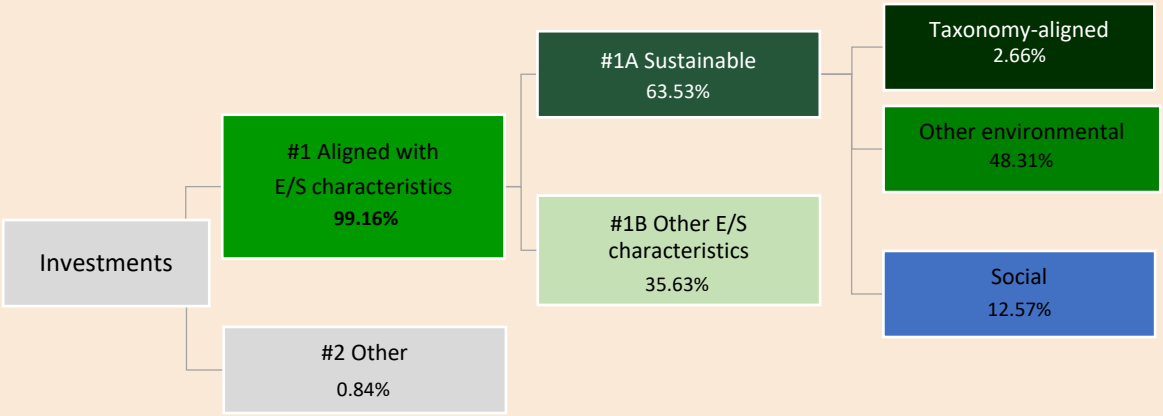

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| UCB SA | Health Care | Pharmaceuticals Biotech & Life Sciences | Belgium | 0.78% |
| MERCK & CO. INC. | Health Care | Pharmaceuticals Biotech & Life Sciences | United States | 0.70% |

## What was the proportion of sustainability-related investments?

The fund invested 63.53% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are**

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.66% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

[ ]

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

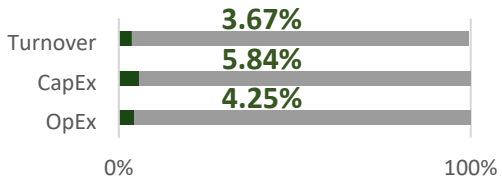

No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

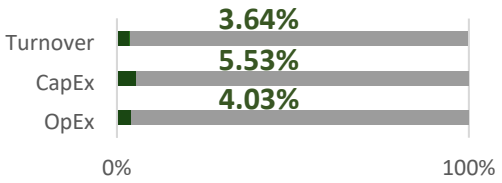

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |

| ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy | ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | ☒ with a social objective |
| ☐ It made a **sustainable investments with a social objective:** _____ | ☐ It promoted E/S characteristics, but **did not make any sustainable investments** |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promoted environmental and/or social characteristics through, among others, replicating the Index (MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

***How did the sustainability indicators perform?***

**Sustainability indicators** measure how the environmental or social characteristics

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or

promoted by the financial product are attained.

social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company.
The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index is 7.141

- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.581

***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the Index MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index was 7.084
and the weighted average ESG rating of the parent Index MSCI ACWI Investable Market Index (IMI) was 6.7.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of

this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

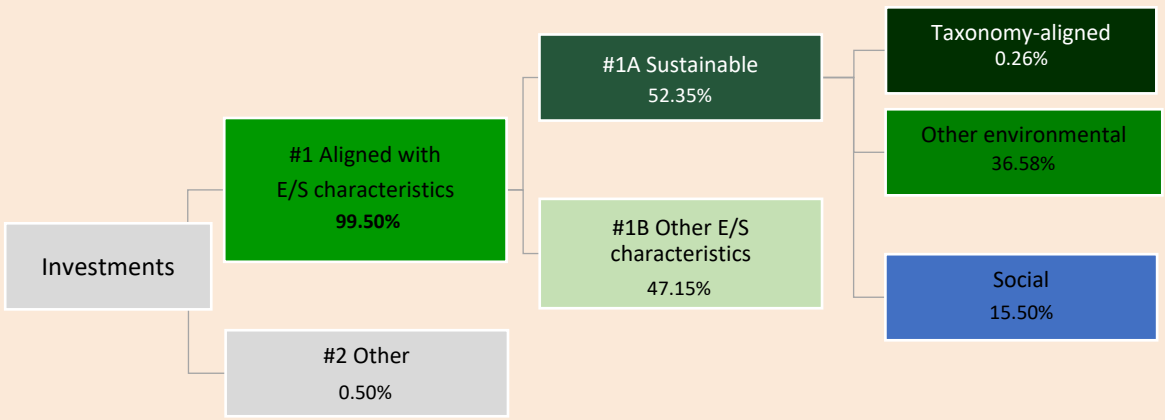

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| ORACLE CORP | Information Technology | Software & Services | United States | 3.63% |
| INTEL CORP | Information Technology | Semiconductors & Semiconductor Equipment | United States | 3.25% |
| ARISTA NETWORKS INC | Information Technology | Technology Hardware & Equipment | United States | 3.15% |
| ALIBABA GROUP HOLDING LTD | Consumer Discretionary | Consumer Discretionary Distribution & Retail | Cayman Islands | 3.03% |
| ADVANCED MICRO DEVICES | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.95% |
| BROADCOM INC | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.95% |
| ALPHABET INC CL | Communication | Media & | United States | 2.94% |

| | | | | |
|---|---|---|---|---|
| A | Services | Entertainment | | |
| ALPHABET INC CL C | Communication Services | Media & Entertainment | United States | 2.92% |
| NVIDIA CORP | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.88% |
| TENCENT HOLDINGS LTD | Communication Services | Media & Entertainment | Cayman Islands | 2.56% |
| APPLE INC | Information Technology | Technology Hardware & Equipment | United States | 2.55% |
| ABB LTD-REG | Industrials | Capital goods | Switzerland | 2.53% |
| MICROSOFT CORP | Information Technology | Software & Services | United States | 2.24% |
| PALO ALTO NETWORKS INC | Information Technology | Software & Services | United States | 2.17% |
| AMAZON.COM INC | Consumer Discretionary | Consumer Discretionary Distribution & Retail | United States | 2.13% |

## What was the proportion of sustainability-related investments?

The fund invested 52.35% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.26% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

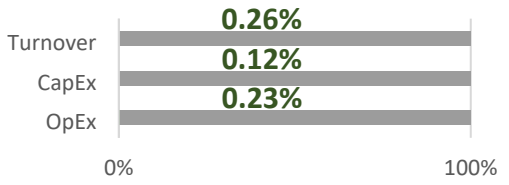

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

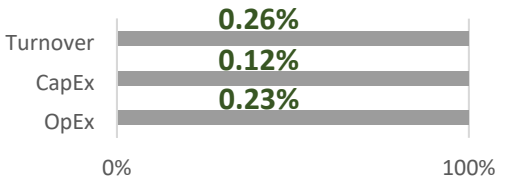

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 99.77% | 99.88% | 99.74% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.23% | 0.12% | 0.26% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 99.77% | 99.88% | 99.74% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.23% | 0.12% | 0.26% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### *What was the share of investments in transitional and enabling activities ?*

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.19%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.44%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **36.58%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 15.50%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI Disruptive Technology

**Legal entity identifier:** 2138007XHBINA7L93Q09

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Disruptive Technology ESG Filtered Index is 7.169
- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.581

***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the Index MSCI ACWI IMI Disruptive Technology ESG Filtered Index was 7.472
and the weighted average ESG rating of the parent Index MSCI ACWI Investable Market Index (IMI) was 6.7.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

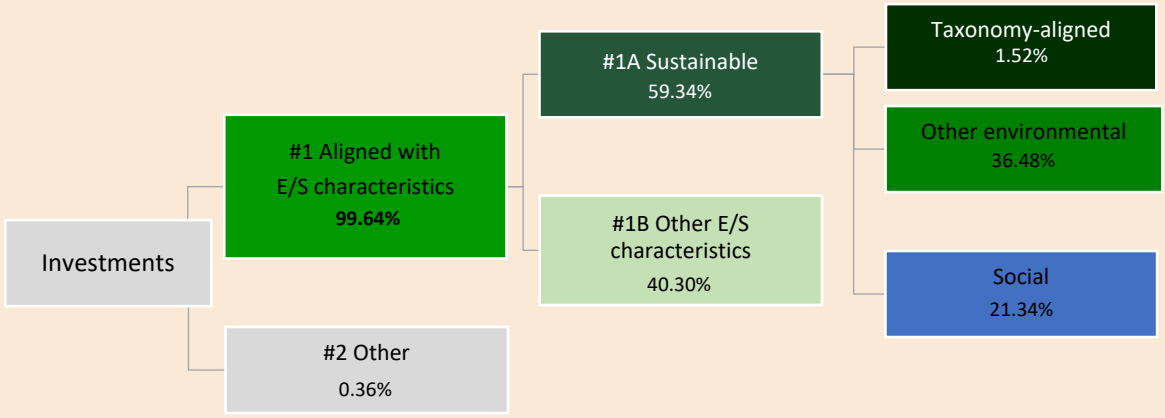

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|

## What was the proportion of sustainability-related investments?

The fund invested 59.34% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.52% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

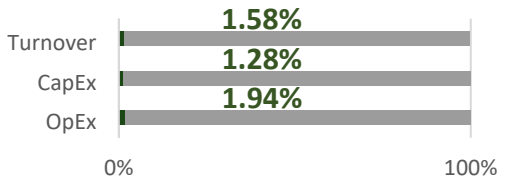

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

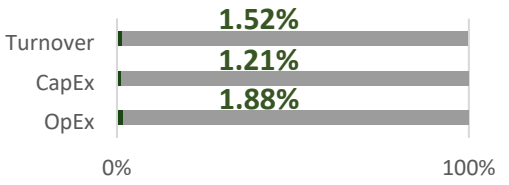

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 98.06% | 98.72% | 98.42% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 1.94% | 1.28% | 1.58% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 98.12% | 98.79% | 98.48% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 1.88% | 1.21% | 1.52% |

This graph represents 99.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### *What was the share of investments in transitional and enabling activities ?*

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.23%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

At the end of the previous period: the percentage of investments with Taxonomy alignment was 2.26%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **36.48%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 21.34%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies aligned to themes commonly associated with or described as disruptive technology and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI Smart Mobility

**Legal entity identifier:** 2138009XSCOQRL54WY80

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **65.46%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promoted environmental and/or social characteristics through among others , replicating the Index (MSCI ACWI IMI Future Mobility Filtered) integrating an environment al, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Future Mobility Filtered Index is 7.034
- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.581

***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the Index MSCI ACWI IMI Future Mobility ESG Filtered Index was 7.125
and the weighted average ESG rating of the parent Index MSCI ACWI Investable Market Index (IMI) was 6.7.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

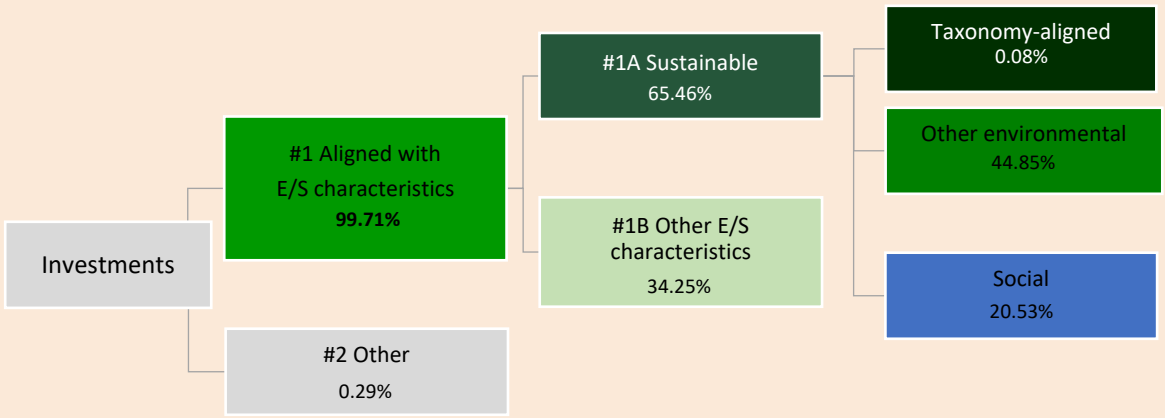

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| NVIDIA CORP | Information Technology | Semiconductors & Semiconductor Equipment | United States | 17.34% |
| UBER TECHNOLOGIES INC | Industrials | Transportation | United States | 13.32% |
| HITACHI LTD | Industrials | Capital goods | Japan | 12.48% |
| TESLA INC | Consumer Discretionary | Automobiles & Components | United States | 12.11% |
| GENERAL MOTORS CO | Consumer Discretionary | Automobiles & Components | United States | 6.04% |
| MURATA MANUFACT | Information Technology | Technology Hardware & Equipment | Japan | 3.26% |
| PANASONIC HOLDINGS CORP | Consumer Discretionary | Consumer Durables & Apparel | Japan | 2.61% |
| DENSO CORP | Consumer Discretionary | Automobiles & Components | Japan | 2.50% |
| APTIV PLC | Consumer Discretionary | Automobiles & Components | Jersey | 2.03% |
| GEELY AUTO HOLDINGS | Consumer Discretionary | Automobiles & Components | Cayman Islands | 1.56% |
| XPENG INC - CLASS A SHARES | Consumer Discretionary | Automobiles & Components | Cayman Islands | 1.52% |
| LI AUTO INC- | Consumer | Automobiles & | Cayman Islands | 1.49% |

| | | | | |
|---|---|---|---|---|
| CLASS A | Discretionary | Components | | |
| MAGNA INTERNATIONAL INC | Consumer Discretionary | Automobiles & Components | Canada | 1.30% |
| NIO INC-CLASS A | Consumer Discretionary | Automobiles & Components | Cayman Islands | 1.19% |
| ELEMENT FLEET MANAGEMENT COR | Industrials | Commercial & Professional Services | Canada | 1.07% |

## What was the proportion of sustainability-related investments?

The fund invested 65.46% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Consumer Discretionary* | *Automobiles & Components* | *34.13%* |

| | | |
|---|---|---|
| *Information Technology* | *Semiconductors & Semiconductor Equipment* | *17.44%* |
| *Industrials* | *Capital goods* | *16.26%* |
| *Industrials* | *Transportation* | *15.47%* |
| *Information Technology* | *Technology Hardware & Equipment* | *6.07%* |
| *Materials* | *Metals & Mining* | *2.99%* |
| *Consumer Discretionary* | *Consumer Durables & Apparel* | *2.71%* |
| *Materials* | *Chemicals* | *2.61%* |
| *Industrials* | *Commercial & Professional Services* | *1.07%* |
| *Financials* | *Financial Services* | *0.53%* |
| *Energy* | *Oil, Gas & Consumable Fuels* | *0.28%* |
| *Consumer Staples* | *Household & Personal Products* | *0.17%* |
| *Others* | *Others* | *0.00%* |
| *Cash* | *Cash* | *0.29%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.08% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

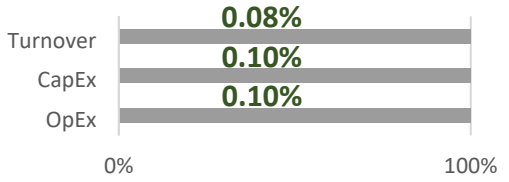

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

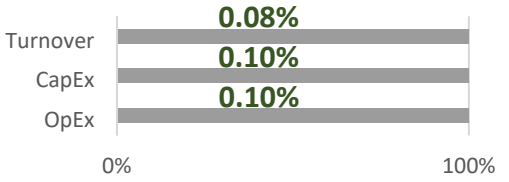

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 99.90% | 99.90% | 99.92% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.10% | 0.10% | 0.08% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 99.90% | 99.90% | 99.92% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.10% | 0.10% | 0.08% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.08%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.12%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **44.85%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 20.53%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies that are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI Millennials

**Legal entity identifier:** 213800YM4X4Y6L955761

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **50.56%** of sustainable investments
  - [x] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [x] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating the Index (MSCI ACWI IMI Millennials ESG Filtered Index), integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index is 7.01
- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.48

***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the Index MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index was 7.205
and the weighted average ESG rating of the parent Index MSCI ACWI Investable Market Index (IMI) was 6.7.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

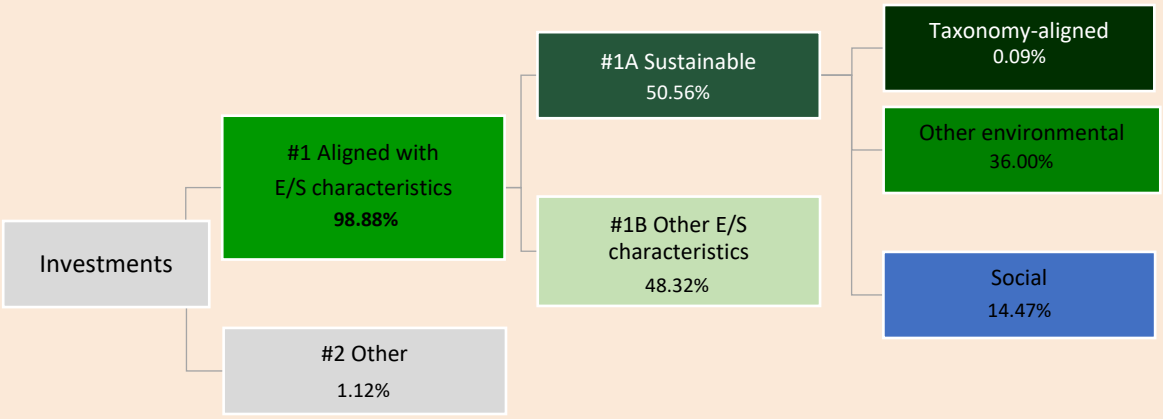

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|
| ROBINHOOD MARKETS INC - A | Financials | Financial Services | United States | 3.64% |
| NVIDIA CORP | Information Technology | Semiconductors & Semiconductor Equipment | United States | 2.30% |
| PROSUS NV | Consumer Discretionary | Consumer Discretionary Distribution & Retail | Netherlands | 2.27% |
| TENCENT HOLDINGS LTD | Communication Services | Media & Entertainment | Cayman Islands | 2.13% |
| NASPERS LTD-N SHS | Consumer Discretionary | Consumer Discretionary Distribution & Retail | South Africa | 2.07% |
| APPLE INC | Information Technology | Technology Hardware & Equipment | United States | 2.04% |
| NETEASE INC | Communication Services | Media & Entertainment | Cayman Islands | 1.84% |
| AMAZON.COM INC | Consumer Discretionary | Consumer Discretionary Distribution & Retail | United States | 1.78% |
| WALMART INC | Consumer Staples | Consumer Staples Distribution & | United States | 1.75% |

| | | | | |
|---|---|---|---|---|
| | | Retail | | |
| PEPSICO INC | Consumer Staples | Food, Beverage & Tobacco | United States | 1.73% |
| WALT DISNEY CO/THE | Communication Services | Media & Entertainment | United States | 1.69% |
| BOOKING HOLDINGS INC | Consumer Discretionary | Consumer Services | United States | 1.68% |
| DANONE | Consumer Staples | Food, Beverage & Tobacco | France | 1.66% |
| MASTERCARD INC-CL A | Financials | Financial Services | United States | 1.62% |
| XIAOMI CORP | Information Technology | Technology Hardware & Equipment | Cayman Islands | 1.60% |

## What was the proportion of sustainability-related investments?

The fund invested 50.56% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.09% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

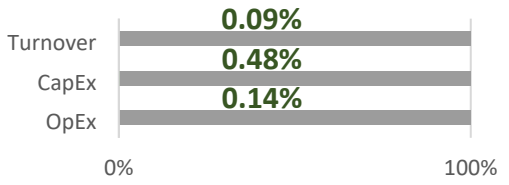

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

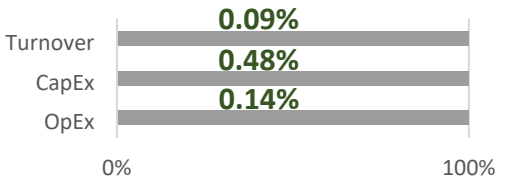

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 99.86% | 99.52% | 99.91% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.14% | 0.48% | 0.09% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 99.86% | 99.52% | 99.91% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned: Nuclear | 0.00% | 0.00% | 0.00% |
| Taxonomy-aligned [No gas and nuclear] | 0.14% | 0.48% | 0.09% |

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.02%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.03%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **36.00%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.47%.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index objective is to measure the performance of companies that are expected to derive significant revenues from industries that target the preferences of the "millennial" generation and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe as further described in this Annex 1 - ESG Related Disclosures to the Sub-Fund's Prospectus.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi MSCI World Catholic Principles

**Legal entity identifier:** 213800A41KUBULMPQB59

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **58.03%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index (MSCI World Select Catholic Principles ESG Universal and Environment Net Total Return Index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. It is constructed using a tilted approach, the weight of best ranked companies based on their ESG rating will be overall positively tilted and the weight of worst ranked companies based on their ESG rating will be overall negatively tilted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI World Select Catholic Principles ESG Universal and Environment Net Total Return Index is 7.84
- the MSCI ESG score of the MSCI World Index is 6.61

***… and compared to previous periods?***

This is the first SFDR periodic report produced for this sub-fund.

***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2024 to 30/09/2025**

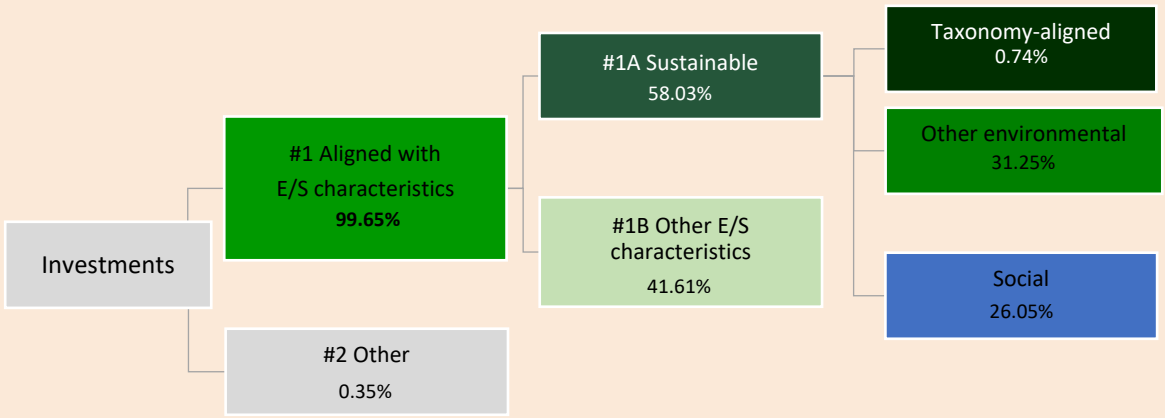

| Largest Investments | Sector | Sub-Sector | Country | % Assets |
|---|---|---|---|---|

## What was the proportion of sustainability-related investments?

The fund invested 58.03% in sustainability-related investments.

### *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### *In which economic sectors were the investments made ?*

| *Sector* | *Sub-Sector* | *% Assets* |
|---|---|---|
| *Information Technology* | *Semiconductors & Semiconductor Equipment* | *28.41%* |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.74% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

[X] Yes:

[X] In fossil gas [X] In nuclear energy

[ ] No

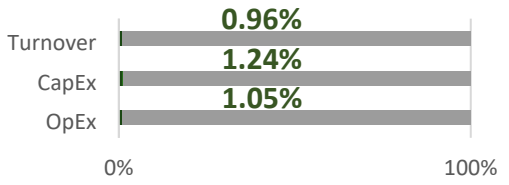

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

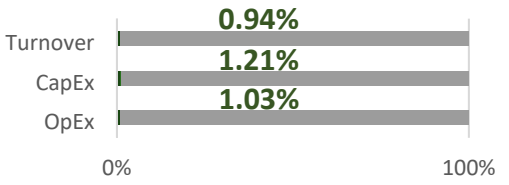

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

1. Taxonomy-alignment of investments **including sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 98.95% | 98.76% | 99.04% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.01% | 0.01% |
| Taxonomy-aligned: Nuclear | 0.03% | 0.15% | 0.08% |
| Taxonomy-aligned [No gas and nuclear] | 1.02% | 1.09% | 0.88% |

2. Taxonomy-alignment of investments **excluding sovereign bonds***

| | OpEx | CapEx | Turnover |
|---|---|---|---|
| Non Taxonomy-aligned | 98.97% | 98.79% | 99.06% |
| Taxonomy-aligned: Fossil Gas | 0.00% | 0.01% | 0.01% |
| Taxonomy-aligned: Nuclear | 0.03% | 0.14% | 0.07% |
| Taxonomy-aligned [No gas and nuclear] | 1.00% | 1.06% | 0.86% |

This graph represents 99.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

### *What was the share of investments in transitional and enabling activities ?*

As of 30/09/2025, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.57%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

This is the first SFDR periodic report produced for this sub-fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **31.25%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 26.05%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is designed to measure the performance of a strategy that aims to select companies having lower carbon exposure and higher Environmental, Social and Governance (ESG) performance, while excluding companies that are involved in controversial businesses like weapons, gambling, adult entertainment, etc. The Index also excludes companies that are involved in abortion and contraceptives, stem cell research, and animal testing.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?
