Directors' Report

Directors' Comments

The Board of Directors presents the Audited Annual Report and Accounts for HSBC Global Investment Funds (the "Company") for the year ending 31 March 2026.

The Company

The Company is a variable capital investment company, incorporated under the laws of the Grand Duchy of Luxembourg and is organized as an "umbrella" with a number of sub-funds, each of which has their own investment policies and restrictions. At present, the Company has issued shares in 74 sub-funds. During the year, the total net assets of the Company increased from USD 41.06 billion to USD 51.17 billion at year end.

The Company qualifies as an Undertaking for Collective Investment in Transferable Securities under the amended Directive 2009/65/EC of 13 July 2009 and may therefore be offered for sale in European Union Member States, subject to registration in countries other than the Grand Duchy of Luxembourg. In addition, applications to register the Company and its sub-funds may be made in other non-European countries. The Company and its sub-funds are currently registered for offer and distribution in the Grand Duchy of Luxembourg and in the following jurisdictions: Austria, Bahrain, Belgium, Brunei, Chile, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Jersey, Korea, Lebanon, Macau, Malaysia, Malta, Netherlands, Norway, Oman, Poland, Portugal, Qatar, Saudi Arabia, Singapore, Spain, Sweden, Switzerland, Taiwan, United Arab Emirates and United Kingdom.

Responsibility of the Directors

The responsibility of the directors of the Company (the "Directors") is governed exclusively by Luxembourg law. With respect to these financial statements, the duties of the Directors are governed by general corporate law and the law of 19 December 2002 on, inter alia, the accounting and annual accounts of undertakings, as amended, and by the law of 17 December 2010 relating to undertakings for collective investment, as amended (the "2010 Law"). Since 1 July 2011, the Company is governed by Part I of the 2010 Law implementing the Directive 2009/65/EC into Luxembourg Law.

Remuneration Policy

HSBC Investment Funds (Luxembourg) S.A. ("HIFL") has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by HIFL's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and articles of incorporation of the Company nor impair compliance with HIFL's duty to act in the best interest of the Company.

The remuneration policy, which describes how remuneration and benefits are determined, is available at www.assetmanagement.hsbc.com/about-us/our-governance, or on request from HIFL.

Directors' Report (continued)

Remuneration Policy (continued)

Total amount of remuneration paid by HIFL to all staff and paid by the investment advisers to their identified staff * during the 12 months period ending 31 March 2026 is as follows:

Fixed remuneration	USD	2,581,172
Variable remuneration	USD	401,537
Number of beneficiaries		22

of which, the disclosure of the fixed and variable remuneration of senior management within HIFL and of identified staff * of the investment advisers is:

Fixed remuneration	USD	1,024,151
Variable remuneration	USD	200,861
Number of beneficiaries		22

* identified staff are defined as members of staff whose actions have a material impact on the risk profile of the Company.

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

▶ Global Flexible Securitised Credit Bond (formerly Global Securitised Credit Bond)	
▶ Global Short Duration Bond	
▶ Ultra Short Duration Bond	
▶ US Dollar Bond	
▶ Corporate Euro Bond Fixed Term 2027	

The following sub-funds are categorised under Article 9 of SFDR as at 31 March 2026.

- ▶ Global Emerging Markets Corporate Sustainable Bond
- ▶ Global Equity Circular Economy
- ▶ Global Sustainable Long Term Equity

Impact of Global Conflicts

The value of investments may be affected by uncertainties such as international, political, economic and diplomatic developments (including sanctions, social instability, civil conflicts and war) or changes in government policies. Each of these factors could impact the value of investments in these markets, and they may be subject to greater volatility.

Directors' Report (continued)

Impact of Ukraine/Russia crisis

The Board of Directors has taken the decision to initiate on 30 July 2025 the liquidation of Russia Equity, which has been suspended since 2 March 2022. The liquidation initially only involves the disposal of the cash held by the Russia Equity fund and does not automatically involve the disposal of any of the Russian securities, owing to their lack of liquidity as a result of sanctions. Further communication will be sent to investors if there is a material change in circumstances, or if some/all of the Russian securities of the fund are sold.

The sub-fund held two lines of the security Yandex: a local line denominated in RUB and an ADR line denominated in USD and listed on the US stock exchange. Yandex N.V., a Dutch public company, disposed of all of its Russian and Russia-related assets and subsidiaries (including, among others Yandex LLC and Yandex Technologies LLC) in July 2024 and, at this time, Yandex was renamed Nebius. The Nebius Group is built on the foundation of Yandex N.V. Both lines of Yandex (ADR and local) converted to Nebius shares in July 2024 and Nebius shares commenced trading on Nasdaq 21 October 2024. The Nebius shares held outside of Russia, which had originated from the Yandex ADR line, were then sold.

Although Nebius Group N.V. no longer owns any Russian legal entities, the Nebius shares which originated from the Yandex local line are held in Russia meaning that they cannot be accessed and therefore cannot be sold so they continue to be held in the portfolio. The shares of Nebius held at the depositary in Russia remain non-tradeable and are valued at zero. This refers to shares held in BRIC Markets Equity, BRIC Equity and Russia Equity. In addition, Russian Equity held shares of Nebius at Euroclear (83,134 shares) which are tradable on the market and are priced as per the latest available price on the market.

Presently, all Russian equities and ADR/GDR held in Russia Equity have been written down and are therefore priced at zero.

Since 2 March 2022, all RUB denominated Russian Government Bonds and any associated coupons held in Global Emerging Markets Local Debt, Global Emerging Markets ESG Local Debt and Global Emerging Market Multi-Asset Income have been written down to 0.

From 3 March 2022, all Russian equities held in Global Emerging Markets Multi-Asset Income, Global Equity Volatility Focused, BRIC Markets Equity and BRIC Equity have been marked down by 90%. For ADR/GDR, if the market price dropped by more than 90%, the stock was valued using the latest market price. From 10 March 2022, all RUB denominated Russian equities held in Global Emerging Markets Multi-Asset Income, Global Equity Volatility Focused, BRIC Markets Equity and BRIC Equity, have been written down to 0.

The security of Sberbank PJSC ADR has been priced at 0 since 2 June 2022. This security is held in Russia Equity, BRIC Markets Equity, BRIC Equity and BRIC Equity.

The security of Rosneft IIGDR has been priced at 0 since 2 June 2022. This security is held in Russia Equity, BRIC Markets Equity, BRIC Equity and Global Emerging Markets Multi-Asset Income.

The Severstal PJSC GDR has been priced at 0 since 2 June 2022. This security is held in Russia Equity.

Due to further sanctions, Magnit PJSC GDR was also written down to 0 since 7 December 2022. This security is held in Russia Equity, BRIC Markets Equity and BRIC Equity.

Directors' Report (continued)

Corporate Governance Statement

The Board of Directors confirms its adoption of the ALFI (Association of the Luxembourg Fund Industry) Code of Conduct for Luxembourg Investment Funds (the "Code") and confirms its adherence to the principles of the Code at all times during the period.

Annual General Meeting

The next Annual General Meeting of the Company will be held on 29 September 2026.

The information stated in the report is historical and is not representative of future results.

Investment Adviser's Report

Market overview: 1 April 2025 to 31 March 2026

Global equities

The period was a strong one for global equity markets, with nearly all regions achieving double-digit returns. The asset class was supported by falling interest rates across many major economies, positive earnings growth, investor enthusiasm for artificial intelligence (AI) and relief that US President Donald Trump's tariff threats ultimately led to trade deals being signed with the major economic blocs. Many markets – including the S&P 500, Stoxx Europe 600, Nikkei 225 and FTSE 100 – set new all-time highs during the period.

Emerging markets heavily outperformed developed markets. The best returns by far came in Korea, which, along with Taiwan, was boosted by a large number of technology stocks and interest in AI. In developed markets, Japan led the way as investors were encouraged by Prime Minister Sanae Takaichi's pro-growth and easy monetary policy stance. The UK did well and outperformed the rest of Europe and the US.

Markets began the period strongly. US President Trump's trade tariffs were unleashed at the beginning of April 2025, but the worst of the levies were suspended to allow trade negotiations to take place, leading to a fast recovery from the shock. There was marked volatility towards the end of the 12-month period as investors faced up to the uncertainty generated by the US and Israeli airstrikes against Iran, and the effective closure of the Strait of Hormuz, a key waterway through which approximately 20% of the world's oil and gas traffic sails. This led to a surge in oil and gas prices and markets ended up weaker in March.

Interest rates continued to tumble across most major economies as inflationary pressures eased. The European Central Bank (ECB) cut rates twice during the period, although it left rates unchanged from early June. The Bank of England (BoE) lowered its benchmark rate three times. The US Federal Reserve (Fed) left its rates unchanged until September. However, the weakening labour market and dwindling inflationary pressures drove the Fed to cut rates three times in the final few months of 2025. In contrast, the Bank of Japan (BoJ) tightened its monetary policy and lifted its benchmark rate in December to a 30-year high of 0.75%. By the end of March, with oil and gas prices much higher due to the conflict in the Middle East, central banks began to sound more hawkish.

The global economy showed signs of a slowdown. The US economy fared well in the third quarter, growing by 4.4% on an annualised basis, but slowed sharply to record just 0.5% growth in the final quarter of 2025. The eurozone eked out quarterly growth of 0.3% and 0.2% in the third and fourth quarters respectively, while the UK barely grew, recording growth of 0.1% in both quarters. Growth in mainland China also slowed, although the country achieved its government target of 5% growth in 2025. Conversely, Japan's economy did recover from a contraction in the third quarter to show modest growth in the final quarter of the year, while India's economy expanded by around 8% in the final two quarters of the year.

US equities

US equities produced positive returns during the period, mainly driven by hopes of falling interest rates, positive corporate earnings announcements and, for the most part, continued optimism about AI. The major local equity indices – the S&P 500, the Dow Jones and the Nasdaq Composite – frequently hit new all-time highs during the year. AI-chip manufacturer Nvidia's shares soared, and after becoming the first \$4 trillion market-cap stock (in July), it became the first \$5 trillion market-cap stock (in October). However, the technology sector, which had driven returns through much of 2025, showed signs of peaking in early 2026 as investors worried much more about whether the potential returns of some of these companies justified the huge amount of investment sunk into AI expansion.

Much of the market turmoil emanating from Trump's tariffs subsided during the period as trade deals were agreed with some of the US's major trading partners, including the EU, Japan and mainland China.

Investment Adviser's Report

US equities (continued)

The largest US government shutdown in history – which lasted from the beginning of October into early November – tried investors' patience as some feared it could lead to a marked slowdown in the economy. Investors were also concerned about Trump-led US antics towards Venezuela (from where President Nicolás Maduro was captured) and Greenland (which Trump threatened to annex); and ultimately rising tensions with Iran over its suppression of domestic protests in early 2026 and its nuclear programme. There was a marked sell-off in share prices during March as the US joined Israel in launching airstrikes against Iran. Iran retaliated by launching strikes against some of its Middle Eastern neighbours and closing the Strait of Hormuz to non-Iranian oil and gas tankers, causing oil and gas prices to soar. However, the market began to turn towards the end of March on hopes of peace.

The Fed was initially cautious about easing monetary policy too quickly and left rates unchanged during the first eight months of 2025. However, by September, the Fed had grown circumspect about the risks of inflation and become more concerned about the economic outlook, leading it to cut rates that month. Rates were lowered again in October and December, taking the federal funds rate down to a range of 3.50%-3.75%. Headline inflation slowed from 3.0% to 2.4%, and core inflation from 3.0% to 2.5%.

The US economy showed signs of a slowdown. After expanding by 4.4% on an annualised basis in the third quarter, it dropped to 0.5% in the fourth quarter. Job creation, retail sales and factory orders all increasingly indicated a slowing economy, with many investors fearful that Trump's trade tariffs could tip the economy into recession, although by the end of the period these fears had eased somewhat.

Europe ex UK equities

European ex UK equities produced strong returns over the year, particularly in sterling and US dollar terms as the euro strengthened. The region benefited from lower inflation, falling interest rates and positive corporate earnings growth. Many European nations continued to ramp up their spending on defence, which boosted the share prices of a wide range of industrials companies. The Europe-wide Stoxx Europe 600 Index frequently established new all-time highs during the period, as did several individual markets, including Germany's Dax Index and Italy's Borsa di Milano.

European markets began the period on an upward trajectory as they recovered from the initial blow of Donald Trump's tariffs, which had turned out to be particularly punitive for the EU and the region's car manufacturers. Trump quickly agreed to suspend the full weight of the tariffs to allow trade talks to take place, which eventually led to a trade agreement between the US and the eurozone. Along with other global markets, European bourses sold off in early March as the Iran conflict intensified and energy prices shot up, although they began to recover later in the month as negotiations between the US and Iran took place.

Spain, Austria, Norway and Portugal were among the strongest-performing markets. In contrast, returns in the larger markets of Germany and France were subdued, which partially reflected political unrest and economic uncertainties within those countries. France, in particular, endured great political drama as the parliamentary government collapsed and efforts to unify a divided parliament proved very difficult, with prime ministers coming and going in quick succession.

Annual headline inflation continued to ease. In the eurozone, the figure fell from 2.2% in April to 1.9% in February, although there were increasing concerns that inflation would spike higher again due to the conflict in the Middle East. The ECB cut its benchmark and deposit rates twice early in the period, but left rates unchanged from early June onwards as it considered the risks between inflation and economic growth to be well balanced.

Economic growth eased from a quarterly pace of 0.7% in the first quarter of 2025 to 0.2% by the fourth quarter of 2025. Overall economic trends remained fragile. Various consumer confidence and business sentiment indices remained lacklustre for much of the period. The manufacturing sector, however, did recover notably in early 2026, with the eurozone manufacturing purchasing managers' index (PMI) rising above the 50.0 level (that separates economic expansion from contraction) in the final two months of the period, and hitting a near-four-year high in March. The labour market remained relatively robust. The eurozone unemployment rate remained stable, starting and ending the period at 6.3%.

Investment Adviser's Report

UK equities

The UK performed strongly over the period. The bellwether FTSE 100 and FTSE All-Share indices frequently hit new all-time highs, with the FTSE 100 breaking through the 10,000 level early in 2026 for the first time in its history and climbing close to 11,000 by the end of February. UK equities were supported for much of the period by the hopes of further interest-rate cuts and relatively positive earnings growth, as well as easing trade tensions. The asset class prospered despite some concerns in January when US President Donald Trump threatened the UK and some other European nations with higher tariffs if they did not agree with his plan to take over Greenland. The escalation of tensions in the Middle East following the US and Israeli airstrikes against Iran and the blockade of the Strait of Hormuz created selling pressure, especially with the UK increasingly reliant on imported oil and gas. However, after the initial sell-off in the first few weeks of March, share prices had begun to recover in the final week or so on the hopes that the conflict would gradually blow over. UK equities were also favoured by global investors for their relatively low valuations, as many investors looked for alternatives to US equities and other markets that had performed well.

Annual inflation fell from 3.5% in April 2025 to 3.0% in February but remained high relative to other G7 nations. Core inflation (excluding energy and food prices) fell from 3.8% to 3.2% over the same period. The BoE cut interest rates three times from 4.5% to 3.75%, with the final 25 basis points (bps) cut coming in December. There were hopes that the BoE would cut again in early 2026 but events in the Middle East largely ended those hopes, with some fearing the central bank may have to raise rates again.

Investors worried about the outlook for the UK economy. This did not only reflect ongoing issues around slower growth abroad and the adaption of commerce to the new regime of US trade tariffs but also concerns about the state of domestic business activity and the high cost of living. A key headwind remained the higher taxes on companies and employees following the Labour government's decision to raise the National Insurance levy on companies. Having grown at a respectable rate of 0.6% in the first quarter of 2025, the economy slowed and grew by just 0.1% in the third and fourth quarters of 2025, as the manufacturing sector contracted and services slowed in the second half of the year.

Other economic data was mixed. Unemployment crept up to a more than four-year high of 5.2% in the three months to January, as companies retrenched and vacancies began to dry up. Consumer sentiment remained soggy, although retail sales figures did pick up strongly in January after a poor Christmas season. Additionally, the manufacturing PMI recovered and rose above 50.0 in the first quarter of 2026.

Japan equities

The Japanese market produced impressive returns in sterling and US dollar terms, and even better ones in local-currency terms, as the yen weakened over the period. The local bellwether indices, the Nikkei 225 and Topix, surged to new all-time highs, with the Nikkei breaching 50,000 for the first time in its history early in the period and climbing close to 60,000 in late February before selling off in March. Investors in Japan were encouraged by positive corporate earnings momentum, some signs of economic improvement, the signing of a trade deal between the US and Japan in the summer of 2025 and political change.

After Prime Minister Shigeru Ishiba resigned his post in the autumn of 2025 following the loss of the LDP/Komeito coalition's majority in the Upper House of parliament, Japan's first ever female prime minister, Sanae Takaichi, took office in the late autumn. She called an election for early February, and her subsequent resounding victory lit a fire under share prices, as investor sentiment towards her pro-reform, pro-growth and easy monetary policy stance was positive. However, bond prices and the yen subsequently fell as concerns grew about the impact of her policies on Japan's already stretched fiscal situation and outstanding debts. Some longer-duration bond yields hit record high levels during the period.

Having last raised rates in January 2025, the BoJ raised them again in December, taking its benchmark interest rate from 0.5% to 0.75%, a 30-year high. BoJ Governor Kazuo Ueda suggested that growing wage pressures in the economy, emanating mainly from the highest spring wage settlements in decades in 2025, would likely force the central bank to continue to tighten. However, annual consumer inflation drifted lower over the period, falling from 3.6% in April 2025 to 1.3% in February, its lowest level since March 2022. Meanwhile, core inflation (excluding fresh food prices) fell from 3.5% to 1.6% over the same period.

Investment Adviser's Report

Japan equities (continued)

After five consecutive quarters of growth, GDP contracted by 2.3% on an annualised basis in the third quarter of the year, mainly due to weaker net trade, resulting from higher US tariffs. The final quarter of the year saw a small recovery in the economy, and GDP expanded by 0.7%, led by an acceleration in both business investment and government spending, as well as resilient consumer expenditure. The manufacturing sector showed increasing signs of recovery and stayed above 50.0 in the first three months of 2026. The services side of the economy also showed sustained expansion. There were other positive signs, not least strong growth in Japanese exports in January, which grew by 16.8% year on year, the strongest rate for over three years, driven by robust demand from mainland China.

Asia ex-Japan equities

Asia ex Japan equities produced very positive returns over the period. In 2025 the asst class enjoyed one of its best calendar years, driven by falling inflation, hopes of lower interest rates, a weaker US dollar and a recovery in earnings and economic growth. The region was also supported by reduced uncertainty around US trade tariffs as mainland China and belatedly India agreed trade deals with the US.

Within the region and among the larger markets, Korea was the strongest performer by far as the Bank of Korea cut interest rates, economic growth recovered, demand surged for technology parts and products, and the country embraced corporate reforms. Taiwan was also notably strong, driven largely by its technology industry, especially AI-related stocks, as well as decent economic growth. Mainland China also made gains, but these were much more modest. Its market was supported by stimulus measures from the government to help support the economy, as well as positive sentiment about the prospects for AI. Nevertheless, concerns remained about the domestic economy, deflation and especially the state of the country's property sector. Singapore benefited from waning inflation and recovering economic growth, and its local index hit a new all-time high. In contrast, India's market fell as investor interest tended to be more concentrated in Northern Asian technology stocks, and the US ramped up tariffs on the country as a penalty for continuing to import Russian oil, leading to strong selling pressures, especially from foreign investors. India did, however, see its local market index hit a new all-time high in late 2025 on the back of recovering economic growth and falling interest rates.

Headline inflation rates showed some signs of picking up. In mainland China, annual consumer inflation turned positive in late 2025, having been in negative territory for several months in 2025, and hit a more than three-year high of 1.3% in February. In India, annual inflation fell markedly from 3.16% in April 2025 to reach 0.25% in October, the lowest level on record, as food prices softened. However, by February of this year, they had recovered to 3.2%.

Some of the region's major central banks reduced interest rates over the period. The People's Bank of China reduced its key loan prime rates once in May 2025, as well as reducing its bank reserve requirements. The Reserve Bank of India cut rates three times, lowering its repo rate from 6.25% to 5.25%, with the latest cut coming in December, as inflation eased. The Bank of Korea lowered its rates on one occasion in May, leaving them unchanged thereafter.

Economic data was mixed. Mainland China achieved its official government target of 5% growth in 2025, but annual GDP slowed quarter by quarter through the year from 5.4% in the first quarter of 2025 to 4.5% in the final quarter. While export growth was strong, particularly in the Asian region, the domestic economy was quite subdued due to deflationary pressures and the weak state of the country's property market. Conversely, India's economy recovered well and grew by about 8% in both the third and fourth quarters of 2025, while Taiwan enjoyed annual growth of nearly 13% in the final quarter of 2025, the highest growth rate for almost 30 years, driven by exports of technology products and parts, especially AI-related ones.

Emerging market equities

Emerging markets produced very strong returns over the year and significantly outperformed developed markets. They were buoyed by falling inflation, generally lower interest rates, a falling US dollar and a recovery in earnings and economic growth. Like other markets, they began the period on an upward tack following Donald Trump's decision to delay the worst of his tariffs to allow trade negotiations to take place, which ultimately led to the signing of trade deals.

Latin American equities performed very strongly and outperformed Asian markets in aggregate. Colombia and Peru were the strongest markets, while Brazil, Mexico, Peru and Chile all posted positive returns. Eastern European countries, such as Hungary and Poland also rose strongly. Within Asia, Korea was the strongest market, while Taiwan was also notably strong. Mainland China also made gains, but these were much more modest. In contrast, India's market fell.

Investment Adviser's Report

Emerging market equities (continued)

Headline inflation rates showed some signs of picking up. In mainland China, annual consumer inflation turned positive in late 2025, having been in negative territory for several months in 2025, and hit a more than three-year high of 1.3% in February. In India, annual inflation fell markedly from 3.16% in April 2025 to reach 0.25% in October, the lowest level on record, as food prices softened. However, by February of this year, they had recovered to 3.2%. Conversely, inflation in Brazil hit a more than two-year high of 5.53% in April 2025, before easing to a near-two-year low of 3.81% in February.

Some of the region's major central banks reduced interest rates over the period. The People's Bank of China reduced its key loan prime rates once in May 2025, as well as reducing its bank reserve requirements. The Reserve Bank of India cut rates three times, lowering its repo rate from 6.25% to 5.25%, with the latest cut coming in December, as inflation eased. The Bank of Korea lowered its rates on one occasion in May, leaving them unchanged thereafter. In contrast, Brazil's central bank raised rates twice in the early summer of 2025, which took the Selic rate to 15.0% as the central bank battled stubbornly high inflation in the early months of the period. However, with inflationary pressures subsiding late in 2025 and in early 2026, it chose to cut rates by 25bps in March.

Economic data was mixed. Mainland China achieved its official government target of 5% growth in 2025, but annual GDP slowed quarter by quarter through the year from 5.4% in the first quarter of 2025 to 4.5% in the final quarter. While export growth was strong, particularly in the Asian region, the domestic economy was quite subdued due to deflationary pressures and the weak state of the country's property market. Brazil's economy slowed after a strong first quarter as the manufacturing sector contracted. Conversely, India's economy recovered well and grew by about 8% in both the third and fourth quarters of 2025. Taiwan enjoyed annual growth of nearly 13% in the final quarter of 2025 - the highest growth rate for almost 30 years - driven by exports of technology products and parts, especially AI-related ones.

UK bonds

UK bonds produced mildly positive returns over the period. Corporate bonds outperformed gilts as investors chased the higher yields on offer. Gilts had performed well for much of the period but fell sharply in March after the US and Israel attacked Iran and oil and gas prices soared, leading to fears that the BoE might have to raise rates again. In addition, while UK bonds generally benefitted from falling interest rates and relatively weak economic data, they were unsettled by the disruption from US trade tariffs and their potential impact on inflation levels, as well as growing worries about national debt levels and large new bond issuance. The UK's stretched fiscal position meant that the UK might find it increasingly costly to finance its spending plans. Indeed, its cost of debt is currently noticeably higher than in other G7 nations. The tax-raising budget of November 2025 increased the chancellor's fiscal headroom, leading to an easing in bond yields across most maturities. However, with the situation in Iran deteriorating in March, investors forecast that the balance of payments would likely worsen again due to the high cost of imported oil and gas.

The UK benchmark 10-year gilt yield rose from approximately 4.45% to just below 4.9% over the period, having traded up to nearly 5.2% in March, the highest level for 18 years. Short-dated gilt yields also gained and the two-year gilt yield rose from 3.95% to 4.4%, ensuring that the key yield curve between 10-year and two-year bonds was largely unchanged at about 50bps. Longer-dated bond yields also rose, and the 30-year gilt yield gained 40bps to 5.5% over the period, touching a 28-year high.

Annual inflation fell from 3.5% in April 2025 to 3.0% in February but remained high relative to other G7 nations. Core inflation (excluding energy and food prices) fell from 3.8% to 3.2% over the same period. The BoE cut interest rates three times from 4.5% to 3.75%, with the final 25bps cut coming in December. There were hopes that the BoE would cut again in early 2026 but the events in the Middle East largely ended those hopes, with some fearing the central bank may have to raise rates again.

Investors worried about the outlook for the UK economy. This did not only reflect ongoing issues around slower growth abroad and the adaption of commerce to the new regime of US trade tariffs, but also concerns about the state of domestic business activity and the high cost of living. A key headwind remained the higher taxes on companies and employees following the Labour government's decision to raise the National Insurance levy on companies. Having grown by a respectable rate of 0.6% in the first quarter of 2025, the economy slowed and grew by just 0.1% in the third and fourth quarters of 2025, as the manufacturing sector contracted and services slowed in the second half of the year.

Investment Adviser's Report

UK bonds (continued)

Other economic data was mixed. Unemployment crept up to a more than four-year high of 5.2% in the three months to January, as companies retrenched and vacancies began to dry up. Consumer sentiment remained soggy, although retail sales figures did pick up strongly in January after a poor Christmas season. Additionally, the manufacturing PMI recovered and rose above 50.0 in the first quarter of 2026.

Global bonds

Global bond markets produced mild gains over the period. They benefitted from falling interest rates and subdued inflation for much of the period. However, they were under pressure in 2026 as inflationary pressures began to pick up again in many economies around the world and especially following the start of the Middle Eastern conflict in March. Investors were also concerned about growing national debt levels and large new bond issuance by countries such as the US and Japan.

The US 10-year Treasury yield rose from approximately 4.0% to 4.3% over the period, with all the increases coming in March as oil prices soared. Investors feared that the Fed might raise rates again as inflation picked up markedly in 2026. Long-dated bond yields rose by more, and the 30-year Treasury ended March at a near 20-year high of 4.9%. The UK benchmark 10-year gilt yield rose from approximately 4.45% to just below 4.9% over the period, having traded up to nearly 5.2% in March, the highest level for 18 years. Longer-dated bond yields also rose, and the 30-year gilt yield gained 40bps to 5.5% over the period, touching a 28-year high. Eurozone bond yields followed a similar path.

The German 10-year Bund yield climbed from 2.6% to 3.0%, its highest level since 2011. Japan was by far and away the weakest major bond market, and yields soared as the BoJ tightened its monetary policy. The Japanese 10-year bond yield doubled from 1.15% to just over 2.3%, its highest level for almost 30 years. Some longer-dated Japanese government bond yields hit all-time highs during the year.

Interest rates continued to tumble during 2025 across most major economies as inflationary pressures eased. The ECB cut rates twice during the period, although it left rates unchanged from early June. The BoE lowered its rates three times. The Fed left rates unchanged until September. However, the weakening labour market and dwindling inflationary pressures drove the Fed to cut rates three times in the final few months of the year. In contrast, the BoJ tightened its monetary policy and lifted its benchmark rate in December to a 30-year high of 0.75%.

The global economy showed signs of a slowdown. The US economy fared well in the third quarter, growing by 4.4% on an annualised basis, but slowed sharply to record just 0.5% growth in the final quarter of 2025. The eurozone eked out quarterly growth of 0.3% and 0.2% in the third and fourth quarters respectively, while the UK barely grew, recording growth of 0.1% in both quarters. Growth in mainland China also slowed, although the country achieved its government target of 5% growth in 2025. Conversely, Japan's economy did recover from a contraction in the third quarter to show modest growth in the final quarter of the year, while India's economy expanded by around 8% in the final two quarters of the year.

Audit report

To the Shareholders of
HSBC GLOBAL INVESTMENT FUNDS

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of HSBC GLOBAL INVESTMENT FUNDS (the “Fund”) and of each of its sub-funds as at 31 March 2026, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 March 2026;
- the combined statement of operations for the Fund and the statement of operations for each of the sub-funds for the year then ended;
- the statement of investments as at 31 March 2026; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

PricewaterhouseCoopers Assurance, Société coopérative,
2 rue Gerhard Mercator, L-2182 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds except for the sub funds "Asia ESG Bond" and "ESG Short Duration Credit Bond" and "Russia Equity" where a decision to liquidate exists to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

31 March 2024		822,139,985	109,999,724	511,105,564

* Based on market circumstances due to the Ukraine and Russia Crisis since 25 February 2022, the Pricing Committee and Management company have agreed and instructed to write down to zero all the local RUB-denominated Russian equities held in the Portfolio of Investments.

**The Board of Directors has taken the decision to liquidate Russia Equity sub-fund as at 30 July 2025 in the best interest of Shareholders. The Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following Russia's invasion of Ukraine.

*** The Total Net Assets of Multi-Strategy Target Return Sub-Fund and the Net Asset Value per Share on Share Classes IC, ICH GBP and ID have been adjusted for the prior year end as at 31 March 2024, following an over-accrual on Management Fees accrual, amounting to a total of USD 122,656, detected post year-end on 16 April 2024.

The accompanying notes form an integral part of these financial statements.

* Based on market circumstances due to the Ukraine and Russia Crisis since 25 February 2022, the Pricing Committee and Management company have agreed and instructed to write down to zero all the local RUB-denominated Russian equities held in the Portfolio of Investments.

** The Board of Directors has taken the decision to liquidate Russia Equity sub-fund as at 30 July 2025 in the best interest of Shareholders. The Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following Russia's invasion of Ukraine.

*** Following the liquidation of the sub-fund, a cash distribution based on liquid assets has been made to the existing shareholders on 30 July 2025.

The accompanying notes form an integral part of these financial statements.

* Swung Net Asset Value per Share (see Note 14). NAVs per share as at 31 March 2024 were presented in sub-fund currency. Starting from 31 March 2025, there is a change in the presentation of the NAV per share as the values will be now disclosed in share classes currencies.

** Hedged Classes.

*** The Board of Directors has taken the decision to liquidate Russia Equity sub-fund as at 30 July 2025 in the best interest of Shareholders. The Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following Russia's invasion of Ukraine.

NAV per share for share classes closed during the reporting period are considered as of closing date.

*Based on market circumstances due to the Ukraine and Russia Crisis since 25 February 2022, the Pricing Committee and Management Company agreed and instructed to writedown to zero all the local RUB-denominated Russian equities held in the Portfolio of Investments.

**This portion of shares held into Nebius Group at Euroclear are tradable on the market and are priced as per the latest price available on the market.

***The Board of Directors has taken the decision to liquidate Russia Equity sub-fund as at 30 July 2025 in the best interest of Shareholders. The Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following Russia's invasion of Ukraine.

The accompanying notes form an integral part of these financial statements.

Notes to the Financial Statements

As at 31 March 2026

1. General information

HSBC Global Investment Funds (the “Company”) is incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable capital (*Société d’Investissement à Capital Variable* or “SICAV”). The capital comprises various separate portfolios (a “sub-fund”) consisting of securities, cash and other sundry assets and liabilities and each sub-fund may comprise various classes of shares being distinct from the other due to their fee structure, distribution policy and target investors.

The accompanying financial statements present the assets and liabilities and the Statement of Operations and Changes in Net Assets of the individual sub-funds and of the Company taken as a whole. The financial statements of each individual sub-fund are expressed in the currency designated in the Prospectus for that particular sub-fund and the combined financial statements of the Company are expressed in United States Dollars (USD). The combined Statement of Net Assets and the combined Statement of Operations and Changes in Net Assets are the sum of the statements of each sub-fund.

The financial statements have been prepared in accordance with the format prescribed by the Luxembourg authorities for Luxembourg investment companies under the going concern basis of accounting except for the sub-funds Asia ESG Bond and ESG Short Duration Credit Bond. Asia ESG Bond and ESG Short Duration Credit Bond sub-funds were put into liquidation on 16 May 2025 and Russia Equity is under liquidation since 30 July 2025, and as such, the financial statements for these sub-funds have been prepared on a non-going concern basis.

For the sub-funds for which the financial statements have been prepared on a non-going concern basis, the following accounting policies differ from those described in the following notes:

- Expected liquidation expenses (if any) will be covered as part of the Operating, Administrative and Servicing Fees;
- Any remaining formation expenses have been fully expensed;
- The valuation of the sub-funds’ investments are based on their net realizable value.

The application of the non-going concern basis of accounting has not led to adjustments to the sub-funds’ published net asset value.

The Company is an officially registered investment fund under part I of the amended 2010 Law and qualifies as a UCITS fund under the European Directive 2009/65/EC.

Certain sub-funds of the Company are authorised by the Hong Kong Securities and Futures Commission under Section 104 of the “Securities and Futures Ordinance”.

In the Prospectus and in the various reports, the short names of the sub-funds are used. The complete name of each sub-fund consists of “HSBC Global Investment Funds” plus the short name of the sub-fund.

From 1 April 2025 to 31 March 2026:

a) The following sub-funds have been closed:

- ▶ Asia ESG Bond on 16 May 2025
- ▶ ESG Short Duration Credit Bond on 16 May 2025

Notes to the Financial Statements (continued)

As at 31 March 2026

1. General information (continued)

b) The names of the following sub-funds have changed:

Formerly Names	New names	Dates
Global Lower Carbon Bond	Global Corporate Bond Climate Transition	16 May 2025
Global Lower Carbon Equity	Global Equity Climate Transition	16 May 2025
Global Sustainable Equity Income	Global Equity Quality Income	30 April 2025
Global Securitised Credit Bond	Global Flexible Securitised Credit Bond	5 February 2026
Global Equity Climate Change	Global Equity Climate Solutions	19 February 2026

c) Russia Equity status moved from "Suspended" to "In liquidation" from 30 July 2025.

2. Accounting policies

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the Company's financial statements.

a. Accounting convention

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds.

b. Assets and portfolio securities valuation

Portfolio securities and/or financial derivative instruments which are listed on an official stock exchange are valued at the last available price on the principal market on which such securities are traded. Securities traded on other organised markets are valued at the last available price or yield equivalents obtained from one or more dealers in such organised markets at the time of valuation.

If such prices are not representative of their fair value, all such securities and all other permitted assets shall be valued at their fair value at which it is expected they may be resold as determined in good faith by or under the direction of the Board of Directors.

The assets of the sub-funds are valued using prices available at different times during the day of 31 March 2026, being the last business day of the reporting year.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in accordance with market practice as follows:

Options

Outstanding options traded on a regulated market are valued based on the intraday price or the last available market price of the instruments.

OTC options are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

The market value of options is included in the Statement of Net Assets under the headings "Options contracts at market value".

Notes to the Financial Statements (continued)

As at 31 March 2026

2. Accounting policies (continued)

b. Assets and portfolio securities valuation (continued)

Options (continued)

The realised gains/(losses) and change in unrealised appreciation/(depreciation) on options are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Realised Gains/(Losses) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Futures Contracts

Upon entering into a futures contract, the Company is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account. Subsequent payments, referred to as variation margin, are made or received by each sub-fund periodically and are based on changes in the market value of open futures contracts.

The unrealised appreciation/(depreciation) on futures Contracts is disclosed in the Statement of Net Assets under "Unrealised Gain on Futures Contracts" and "Unrealised Loss on Futures Contracts". Changes in the market value of open futures contracts are recorded as unrealised appreciation/(depreciation) in the Statement of Operations and Changes in Net Assets under "Change in Unrealised Appreciation/(Depreciation) on Derivatives". Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the Statement of Operations and Changes in Net Assets under "Realised Gains/(Losses) on Derivatives". Securities deposited as initial margin account are designated in the Statement of Investments and cash deposited is recorded in the Statement of Net Assets in "Cash at Bank". A receivable and/or a payable to brokers for the daily variation margin is also recorded in the Statement of Net Assets under caption Cash at Bank or Bank Overdraft.

Forward Foreign Exchange Contracts

The values of the Forward Foreign Exchange Contracts are adjusted daily based on the applicable forward exchange rate of the underlying currency for the remaining period, until maturity. Changes in the value of these contracts are recorded as unrealised appreciation or depreciation until the contract settlement date. When the forward contract is being closed, the sub-fund records a realised gain or loss equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

The unrealised appreciation/(depreciation) on Forward Foreign Exchange Contracts is disclosed in the Statement of Net Assets under "Unrealised Gain on Forward Foreign Exchange Contracts" and "Unrealised Loss on Forward Foreign Exchange Contracts". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the Statement of Operations and Changes in Net Assets respectively under "Realised Gains/(Losses) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Interest Rate Swaps

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under "Unrealised Gain on Swaps" and "Unrealised Loss on Swaps". Realised gains/(losses) and changes in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Realised Gains /(Losses) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Notes to the Financial Statements (continued)

As at 31 March 2026

2. Accounting policies (continued)

b. Assets and portfolio securities valuation (continued)

Credit Default Swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a Company's portfolio up to the notional amount of swap agreements.

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under "Unrealised Gain on Swaps" and "Unrealised Loss on Swaps". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the Statement of Operations and Changes in Net Assets respectively under the heading "Realised Gains/(Losses) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives."

Total Return Swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity. To the extent the total return of the reference asset underlying the transaction exceeds or falls short of the offsetting payment, the Company will receive a payment from or make a payment to the counterparty.

Total return swaps are marked to market at each NAV calculation date. The estimated market value is based on the valuation elements laid down in the contract, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under "Unrealised Gain on Swaps" and "Unrealised Loss on Swaps". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the Statement of Operations and Changes in Net Assets respectively under the heading "Realised Gains/(Losses) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

As at 31 March 2026, there is no Total Return Swap derivative held in the portfolio of investments.

Collective Investment Schemes

Shares or units in underlying open-ended investment sub-funds are valued at their last available Net Asset Value reduced by any applicable charges.

Money Market Investments

The Company uses the amortized cost method of valuation in valuing its portfolio of financial instruments in the form of short term debt (such as commercial paper, certificate of deposit, treasury bills). In addition, in the rare circumstances where a fixed income instrument with a time to maturity exceeding 90 days becomes stale, the Company will effectively value it at amortised cost until such date when it is either sold or its market becomes active again.

Notes to the Financial Statements (continued)

As at 31 March 2026

2. Accounting policies (continued)

b. Assets and portfolio securities valuation (continued)

Mortgage related securities - To Be Announced securities (TBAs)

TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g., Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of the purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of the purchase, the principal value has not been finalised. TBA positions are disclosed in the portfolio of investments and other net assets. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Payable on Investment Purchase" in the Statement of Net Assets. Negative positions in the portfolio of investments and other net assets reflect the Fund's sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under "Receivable on Investment Sold" in the Statement of Net Assets. The realised gains/(losses) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Realised Profit/(Loss) on Investments" and "Change in Unrealised Appreciation/(Depreciation) on Investments".

Warrants

Warrants are securities issued by the issuer company and give the holder of the share the right (not obligation) to buy the issuer company's shares at a fixed exercise price up to an expiry date. Warrants held in the Statement of Investments are valued at their last available price on the principal market on which such securities are traded.

c. Income and expenses

Dividends are accounted for on an ex-dividend basis. Dividends are reflected in the Statement of Operations and Changes in Net Assets, net of withholding taxes, under the caption "Investment Income, net".

Interest income on debt securities is accrued on a day-to-day basis. In the case of debt securities issued at discount or premium to maturity value, the total income arising on such securities, taking into account the amortisation of such discount or premium on an effective interest rate basis, is spread over the life of the security. Interest income on bonds are accounted for using the effective interest rate ("EIR") method. Interest income on debt securities are reflected in the Statement of Operations and Changes in Net Assets under the caption "Investment Income, net".

The interest income / expense on interest rate swap contracts (IRS) are accrued on a day-to-day basis. The net interest income / expense on interest rate swap contracts (IRS) are reflected in the Statement of Operations and Changes in Net Assets under the caption "Investment Income, net".

d. Foreign exchange

The cost of investments, income and expenses in currencies other than the sub-funds' relevant reporting currency have been recorded at the rate of exchange ruling at the time of the transaction. The market value of investments and other assets and liabilities in currencies other than the relevant reporting currency have been converted at the rates of exchange ruling at 31 March 2026.

e. Realised profit/(loss) on sale of investments

Realised profit/(loss) on sale of investments is the difference between the historical average cost of the investment and the sale proceeds (excluding any transaction expenses as further explained in Note 5).

Notes to the Financial Statements (continued)

As at 31 March 2026

2. Accounting policies (continued)

f. Foreign currency translation

The reference currency of the Fund is USD and the combined statements are expressed in that currency. The books and records of each sub-fund are denominated in the reference currency of the corresponding sub-fund.

Income and expenses, assets and liabilities expressed in currencies other than the reference currency of the Fund are converted at exchange rate prevailing at year-end.

Here are the main exchange rates applied at year-end.

1 USD =	EUR	0.8679
	SGD	1.2901

g. Segregated liability

The Company has segregated liability between its sub-funds; meaning, the assets of a sub-fund are exclusively available to satisfy the rights of shareholders in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation and liquidation of that sub-fund.

h. Securities lending

The Company may enter into Securities Lending transactions by which a counterparty transfers securities subject to a commitment that the borrower will return equivalent securities at a future date or when requested to do so by the transferor, that transaction being considered as securities lending for the counterparty transferring the securities and being considered as securities borrowing for the counterparty to which they are transferred.

The Company will ensure that it is able at any time to recall any securities that has been lent out or terminate any Securities Lending agreement into which it has entered.

All revenues (less transaction costs) from Securities Lending transactions are accrued to the relevant sub-fund based on information confirmed by the Lending Agent.

Detail on Security Lending transaction is disclosed in Note 11 of the current report.

To guarantee this transaction, the relevant sub-fund receives collateral. Securities on loan are delivered to a third party broker, the assets lent continue to be valued as part of the portfolio of the relevant sub-fund. Upon termination of a loan, the relevant sub-fund is required to return to the borrower the posted collateral. This remuneration is accounted for in the Statement of Operations and Changes in Net Assets under "Investment Income, net".

i. Spot foreign currency transactions

Unsettled spot foreign currency transactions as at 31 March 2026 are recorded under "Receivable on Unsettled Spot Foreign Currency Transactions" and "Payable on Unsettled Spot Foreign Currency Transactions" in the Statement of Net Assets.

j. Trailer fees and rebates

The Company pays management fees to the Management Company. Trailer fees are either taken out of the management fees or the Management Company may instruct the Company to pay a portion of the management fees directly out of the assets of a sub-fund to a recognised intermediary. In both cases, the management fees due are reduced accordingly.

Notes to the Financial Statements (continued)

As at 31 March 2026

3. Share capital

The Company has issued either A, B, C, E, F, I, J, K, L, M, N, P, R, S, SP, T, U, W, X, Y, YP, Z and ZP Shares to investors in one or several sub-funds as detailed below.

Within each Share Class of a sub-fund, the Company shall be entitled to create different sub-classes, distinguished by their distribution policy (Capital Accumulation (C) and Distribution (D) Shares), their reference currency, their hedging activity (H) and/or by any other criteria stipulated by the Board of Directors.

All share classes are available as both “Capital Accumulation” and “Distribution” shares.

Class	Description	Minimum Initial Investment Minimum Holding (in US Dollar or equivalent amount in a major currency)
Class A	A Shares are available to all investors.	USD 5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class B	B Shares are available to: • Sub-distributors who are prohibited from accepting and retaining inducements from third parties under applicable laws and regulations or court rulings, such as in the United Kingdom or the Netherlands; or • Sub-distributors who have a separate fee arrangement with their clients in relation to the provision of investment services and activities (for example, in the European Union, services and activities performed under MiFID II) and who have opted not to accept and retain inducements from third parties.	USD 5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class C	C Shares are available in certain countries. C Shares will incur a contingent deferred sales charge (“CDSC”), which is further outlined below. C Shares will automatically convert without any fees into A Shares of the same Fund three years from the date of the original subscription in the relevant C Shares. This conversion may give rise to tax liability for investors in certain jurisdictions. Automatic conversion are processed free of charge based on the NAV of both Share Classes on the conversion date or on the next Valuation Day if the anniversary is not a Valuation Day. This share is not yet active on the reporting date.	USD 5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class E	E Shares are available in certain countries, subject to the relevant regulatory approval, through distributors selected by the Global Distributor. E Shares shall incur annual management fees equivalent to that of the Class A Shares plus 0.3% to 0.5% per annum of the Net Asset Value of Class E Shares, which may be payable to the selected distributors in certain countries.	USD 5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class F	F Shares are available to investors who have entered into a discretionary management agreement with an HSBC Group entity and to investors subscribing via Distributors selected by the Global Distributor, provided that the investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD 1,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class I	I Shares are available to all investors through distributors selected by the Global Distributor on application to the Company.	USD 1,000,000
Class J*	J Shares are available to funds of funds managed by the HSBC Group or managed by specific entities selected by the Global Distributor on application to the Company.	USD 100,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus

Notes to the Financial Statements (continued)

As at 31 March 2026

3. Share capital (continued)

Class	Description		Minimum Initial Investment Minimum Holding (in US Dollar or equivalent amount in a major currency)
Class K	K Shares are available to HSBC Group insurance companies that qualify as institutional investors within the meaning of article 174 of the 2010 Law. This share is not yet active on the reporting date.	USD	1,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class L*	L Shares are available through distributors selected by the Global Distributor, provided that the investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD	1,000,000
Class M*	M Shares are available to all investors.	USD	5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class N*	N Shares are available to: • Sub-distributors who are prohibited from accepting and retaining inducements from third parties under applicable laws and regulations or court rulings, such as in the United Kingdom or the Netherlands; or • Sub-distributors who have a separate fee arrangement with their clients in relation to the provision of investment services and activities (for example, in the European Union, services and activities performed under MiFID II) and who have opted not to accept and retain inducements from third parties.	USD	5,000
Class P	P Shares are available in certain countries or through certain distributors selected by the Global Distributor on application to the Company.	USD	50,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class PN	PN Shares are available in certain European countries through certain Distributors selected by the Global Distributor on application to the Company, who are prohibited from accepting and retaining inducements from third parties under applicable laws and regulations or court rulings, such as in the United Kingdom or the Netherlands.	USD	1,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class PR	PR Shares are available in certain European countries through certain Distributors selected by the Global Distributor on application to the Company. This share is not yet active on the reporting date.	USD	1,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class R*	R Shares are available in certain countries, subject to the relevant regulatory approval, through distributors selected by the Global Distributor on application to the Company.	USD	5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class S*	S Shares are available in certain countries or through distributors selected by the Global Distributor provided that the investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD	100,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class SP	SP Shares are available in certain countries and/or through Distributors selected by the Global Distributor provided that the investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD	25,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus

Notes to the Financial Statements (continued)

As at 31 March 2026

3. Share capital (continued)

Class	Description	Minimum Initial Investment Minimum Holding (in US Dollar or equivalent amount in a major currency)
Class T	T Shares are available to all investors. T Shares are available to eligible investors until such time the assets under management of the associated sub-fund reach a pre-defined threshold at which point the T Shares will be closed for further subscriptions or conversions from both new and existing investors. In the event that a subfunds' assets under management fall below this threshold or at the Board of Director's discretion, the Board of Directors may elect to reinstate the availability of the T Shares.	USD 5,000
Class U	U Shares are available to all investors through Distributors selected by the Global Distributor on application to the Company.	USD 30,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class W	W Shares are available through distributors that shall also be Members or affiliated entities of the HSBC Group as selected by the Global Distributor provided that the investors qualify as institutional investors within the meaning of article 174 of the 2010 Law. No Operating, Administrative and Servicing Expenses shall be charged to Class W Shares. All the fees and charges allocated to this Class shall be paid directly by members or affiliated entities of the HSBC Group.	USD 100,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class X	X Shares are available through distributors selected by the Global Distributor provided that the investors qualify as institutional investors within the meaning of article 174 of the 2010 Law and fall into one of the following categories: companies or company pension funds, insurance companies, registered charities or Funds managed or advised by an HSBC Group entity and other such institutional investors, as agreed by the Board of Directors.	USD 10,000,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus
Class Y	Y Shares are available in certain countries through distributors selected by the Global Distributor on application to the Company.	USD 1,000
Class YP*	YP Shares are available in certain countries through Distributors selected by the Global Distributor on application to the Company. This share is not yet active on the reporting date.	USD 1,000
Class Z	Z Shares are available to investors who have entered into a discretionary management agreement with an HSBC Group entity and to investors subscribing via distributors selected by the Global Distributor provided that such investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD 1,000,000
Class ZP*	ZP Shares are available to investors who have entered into a discretionary management agreement with an HSBC Group entity and to investors subscribing via Distributors selected by the Global Distributor provided that such investors qualify as institutional investors within the meaning of article 174 of the 2010 Law. This share is not yet active on the reporting date.	USD 1,000,000

* Successive Share Classes may be issued in one or more sub-funds and will be denominated with sequential numbering (e.g. J1, J2, J3, etc) as further detailed in section 3.2. "Sub-fund Details" of the prospectus for further information on the different Share Classes offered in relation to each sub-fund.

Notes to the Financial Statements (continued)

As at 31 March 2026

3. Share capital (continued)

The Board of Directors of the Company is authorised to issue different Classes of Shares in one or more sub-funds. Details of the characteristics of such Share Classes offered shall be determined at the sole discretion of the Board of Directors. In case of the creation of any additional Classes of Shares, the Prospectus shall be updated.

The subscription proceeds of all Shares in a sub-fund are invested in one common underlying portfolio of investments. All Shares of the same Class have equal rights and privileges. Each Share is, upon issue, entitled to participate equally in assets of the relevant class of the sub-fund to which it relates on liquidation and in dividends and other distributions as declared for such sub-fund. The Shares shall carry no preferential or pre-emptive rights and each whole Share shall be entitled to one vote at all meetings of shareholders.

The Board of Directors may suspend the right to vote of any shareholder who does not comply with his/her/its obligations set out in the Articles of Incorporation and/or any document (including any application form) stating his/her/its obligations towards the Company and/or the other shareholders. In case the voting rights of one or more shareholders are suspended in accordance with the above paragraph, such shareholders shall be sent the convening notice for any general meeting and may attend the general meeting but their Shares shall not be taken into account for determining whether the quorum and majority requirements are satisfied. Any shareholder may undertake (personally) not to exercise his/her/its voting rights in respect of all or part of his/her/its Shares, temporarily or indefinitely.

The minimum initial investment amount may be waived or reduced at the discretion of the Board of Directors of the Company.

Share Class Denominations and Successive Classes:

The Share Classes issued in the different sub-funds are designated by their class name, followed by their distribution characteristics and, if applicable, their specific hedging policy and the currency into which the Base Currency is hedged. This means that for example Shares issued in Class A which are distributing income and applying a hedging policy to Euro, as defined above, would be identified as ADHEUR whereas Class I Shares accumulating income would be identified as IC.

Distribution Shares are identifiable by a "D" following the sub-fund and Class names (e.g., Class AD), with the exception of Monthly Distribution Shares which are identifiable by a "M" following the sub-fund and Class names (e.g., Class AM), Bi-Monthly Distribution Shares which are identifiable by a "B" following the sub-fund and Class names (e.g., Class AB), Quarterly Distribution Shares which are identified by a "Q" following the sub-fund and Class names (e.g., Class AQ) and Semi-Annual Distribution Shares which are identified by a "S" following the sub-fund and Class names (e.g., Class AS). Shares that distribute a fixed dividend rate are identified by a "FIX5", a "FIXA" or a "TW" (e.g., Class AMFIX5, Class AMFIXA, Class AMTW) and shares that distribute a variable dividend rate are identified by a "FLX" (e.g., Class AMFLX).

Within each Share Class of a sub-fund, separate currency hedged classes may be issued (suffixed by "H" or "O" and the currency into which the Base Currency is hedged or the currency into which the sub-fund total assets are primarily invested in, is hedged. These currency hedged share classes shall be named: "ACHEUR" or "ACOEUR" for a Capital-Accumulation Share Class hedged into Euro). Any fees of the Administrator or other appointed parties relating to the execution of the currency hedging policy shall be borne by the relevant currency hedged class. These fees are in addition to the operating, administrative and servicing expenses detailed below. Any gains or losses shall also accrue to the relevant currency hedged class.

4. Charges and expenses

a. Explanation of the charging structure

Investment in the Company is generally offered via charging structures, as represented by the A, B, C, E, F, I, J, K, L, M, N, P, R, S, SP, T, U, W, X, Y, YP, Z and ZP Classes of Shares.

Notes to the Financial Statements (continued)

As at 31 March 2026

4. Charges and expenses (continued)

a. Explanation of the charging structure (continued)

HSBC Investment Funds (Luxembourg) S.A. (the "Management Company") is entitled, in respect of each Class of Shares, to a management fee to cover all investment management, investment advisory and distribution services provided in relation to the relevant class (see paragraph (b) headed "Management Fee" below).

In addition, the Company pays to the Management Company a fee to cover operating, administrative and servicing expenses. To safeguard shareholders from fluctuations in a sub-fund's operating, administrative and servicing expenses, the Company has agreed with the Management Company that the fee charged to cover such operating, administrative and servicing expenses is fixed at an annual rate.

The potential excess of such expenses above such annual rate shall be borne directly by the Management Company (see paragraph (e) headed "Operating, Administrative and Servicing Expenses/Operating Currency Hedged Share Class Fees" below).

b. Management fee

The Company pays to the Management Company an annual management fee calculated as a percentage of the Net Asset Value of each sub-fund or share class ("Management Fee"). The Management Fee is accrued daily and payable monthly in arrears.

The Management Fee covers investment management, investment advisory and distribution services provided in relation to the relevant sub-fund of the Company by the Management Company, the Investment Advisers and the Distributors. The Management Company is responsible for paying, out of such fee, the fees of the Investment Advisers and the Distributors and may pay part of such fee to recognised intermediaries or such other person as the Management Company may determine, at its discretion.

The Management Company may instruct the Company to pay a portion of the Management Fee directly out of the assets of the Company to any of such service providers or identified persons. In such case, the Management Fee due to the Management Company is reduced accordingly. If the Company invests in shares or units of UCITS (including other sub-funds of the Company) and other eligible UCIs that are managed directly or indirectly by the Management Company itself or a company with which it is linked by way of common management or control or by way of a direct or indirect stake of more than 10% of the capital or votes, then there will be no duplication of management, subscription or repurchase fees between the Company and the UCIs into which the Company invests.

The effective management fee payable to the Management Company out of the net asset value of the relevant category of shares issued in the sub-fund is presented in the Key Figures section of the report. The maximum management fees payable to the Management Company are presented in the latest prospectus of the Company.

c. Directors' fees, expenses and interests

A Director may be a party to, or otherwise interested in, any transaction or arrangement with the Company or in which the Company is interested, provided that he has disclosed to the other Directors, prior to the conclusion of any such transaction or arrangement, the nature and extent of any interest of his therein. Subject to approval of the Board, a Director may vote in respect of any contract or arrangement or any proposal whatsoever in which he has an interest, having first disclosed such interest. He shall not be disqualified by his office from contracting with the Company. If a Director declares his interest in any contract which the Company is considering entering into, he may be counted in the quorum of any meeting to consider the contract and may vote on any resolution to enter into such contract, provided that the decision to be taken by the Board of Directors relates to the current operations entered into under normal conditions.

Notes to the Financial Statements (continued)

As at 31 March 2026

4. Charges and expenses (continued)

c. Directors' fees, expenses and interests (continued)

The Company pays an annual fee to each of the Independent Directors amounting to EUR 55,000. This amount is paid by the Management Company through the operating, administrative and servicing expenses paid by the Company. The amount of Operating, Administrative and Servicing Expenses is accrued with every net asset value calculation and paid quarterly in arrears. For the year-end as at 31 March 2026, a total of EUR 165,000 has been charged as Independent Directors' fees.

d. Operating, Administrative and Servicing Expenses / Operating Currency Hedged Share Class Fees

The Company pays to the Management Company fees to cover certain Operating, Administrative and Servicing expenses and the execution of the currency hedging policy. The Management Company is responsible for discharging out of this fee, the expenses described below, inter alia, payable to the Depositary Bank, the Administration Agent and the Registrar and Transfer Agent or any other appointed entity. If the total actual expenses described below exceeds the total of Operating, Administrative and Services Expenses and the Operating Currency Hedged Share Class Fee set for each sub-fund and Share class, the excess of such expenses above such annual percentage will be borne directly by the Management Company or its affiliates, and equally the Management Company or its affiliates may retain any surplus.

(i) Operating, Administrative and Servicing Expenses cover the ongoing custody/depositary fees and safekeeping charges payable to the Depositary Bank and its correspondent banks, fees for Fund accounting and administration services (including domiciliary services) payable to the Administration Agent and transfer, registrar and payment agency fees payable to the Registrar and Transfer Agent.

Operating, Administrative and Servicing Expenses also cover expenses relating to the creation of new sub-funds; the Luxembourg asset-based tax d'abonnement, at the rate referred to under Section "Taxation" of the Company's Prospectus; fees and reasonable out-of-pocket expenses incurred by the Board of Directors; legal and auditing fees and expenses; ongoing registration and listing fees, including translation expenses; the costs and expenses of preparing, printing, and distributing the Company's Prospectus, Key Investor Information Documents, financial reports, statements and other documents made available directly or through intermediaries to its shareholders.

This fee is set, for each sub-fund and/or Class, at a fixed percentage of the Net Asset Value of the relevant sub-fund or Class is specified in Key Figures section of the current report. The maximum fees rates are presented in the latest prospectus of the Company.

No Operating, Administrative and Servicing Expenses shall be charged to Class W Shares. All the fees and charges allocated to such Class of Shares shall be paid directly by a member or an affiliated entity of HSBC Group.

(ii) Operating Currency Hedging Fees cover the fees of the Administration Agent or other appointed parties relating to the execution of the currency Hedged Share Class policy for the Currency Hedged Share Classes as described in "Profile of the Typical Investor Categories".

The maximum rate for (i) and (ii) together for Class A, B, E, I, J, L, M, N, P, R, S, X, Y, YP, Z and ZP Shares is 1.0%. However, the Board of Directors reserves the right to amend the levels of the above fees applicable to each Class of Shares. In the event of an increase of such expenses, the concerned shareholders will be given at least one-month prior notice, of such increase. During this notice period, such shareholders may request the redemption of their Shares, free of charge.

The Management Company may instruct the Company to pay a portion of the aforesaid fees directly out of the assets of the Company to any of the aforementioned service providers. In such case the fee due to the Management Company is reduced accordingly.

The effective Operating fees payable out of the net asset value of the relevant category of shares issued in the sub-fund is presented in the Key Figures section of the report.

Notes to the Financial Statements (continued)

As at 31 March 2026

5. Transaction expenses and extraordinary expenses

Transaction expenses linked to security dealing are included with the cost of investments purchased and deducted from the proceeds received on sales of investments and are included in the Statement of Operations and Changes in Net Assets under the heading "Transaction Fees".

Each sub-fund bears the costs and expenses of buying and selling portfolio securities and financial instruments, brokerage fees and commissions, interest or taxes payable, and other transaction related expenses. These transaction fees are accounted for on a cash basis and are paid when incurred or invoiced from the net assets of the sub-fund to which they are attributable. Transaction fees are allocated across each sub-fund's Share Classes.

The Company bears any extraordinary expenses including, without limitation, litigation expenses and the full amount of any tax, levy, duty or similar charge and any unforeseen charges imposed on the Company or its assets.

For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

6. Taxation of the Company

The following is based on the Company's understanding of the law and practice currently in force in the Grand Duchy of Luxembourg and is subject to changes therein.

The Company is not liable to any Luxembourg tax on profits or income or gains and is not subject to net wealth tax in the Grand Duchy of Luxembourg. No stamp duty, capital duty or other tax will payable in Luxembourg upon the issue of the Shares of the Company. Distributions made by the Company as well as liquidation proceeds and capital gains derived therefrom are not subject to withholding tax or VAT in the Grand Duchy of Luxembourg.

The Company is however liable in Luxembourg to a tax of 0.05% per annum of its Net Asset Value, such tax being payable quarterly on the basis of the value of the net assets of the Company at the end of the relevant calendar quarter. The tax rate is reduced to 0.01% per annum for Classes SP, ZP, J, L, S, W, X and Z Shares in the relevant sub-funds.

The classes/sub-funds may be exempted from this 0.01% tax if they comply with the requirements of the articles 174 and 175 of the 2010 Law which include: (i) the shares of the class/sub-fund must be reserved to institutional investors; (ii) the exclusive object of the class/sub-fund's portfolio must be the investment in money market instruments and/or deposits with credit institutions; (iii) the remaining average maturity of the class/sub-fund's portfolio must be less than 90 days; and (iv) the class/sub-fund must benefit from the highest possible rating of a recognized rating agency.

Since 1 January 2021, subject to certification and depending on the proportion of net assets of an individual sub-fund invested in sustainable economic activities ("Sustainable Economic Activities") as defined in Article 3 of the Taxonomy Regulation (except for the proportion of net assets an individual sub-fund invested in fossil gas and/or nuclear energy related activities), a reduced subscription tax rate applies as indicated in the list below:

- 0.04% if at least 5% of the total net assets of the sub-fund, are invested in Sustainable Economic Activities;
- 0.03% if at least 20% of the total net assets of the sub-fund are invested in Sustainable Economic Activities;
- 0.02% if at least 35% of the total net assets of the sub-fund are invested in Sustainable Economic Activities; and
- 0.01% if at least 50% of the total net assets of the sub-fund are invested in Sustainable Economic Activities.

Following are also exempt from this tax:

- a) The portion of any sub-fund's assets (prorata) invested in a Luxembourg investment fund or any of its sub-funds to the extent it is subject to the subscription tax;

Notes to the Financial Statements (continued)

As at 31 March 2026

6. Taxation of the Company (continued)

- b) Any sub-fund, whose securities are reserved for (i) institutions for occupational retirement pension or similar investment vehicles, set up on one or more employers' initiative for the benefit of their employees and (ii) companies of one or more employers investing funds they hold, to provide retirement benefits to their employees and (iii) savers in the context of a pan-European personal pension product established under Regulation (EU) 2019/1238 of the European Parliament and of the Council of 20 June 2019 on a pan-European personal pension product (PEPP);
- c) Any sub-funds whose main objective is the investment in microfinance institutions; and
- d) Any sub-fund, (i) whose securities are listed or traded on a stock exchange or another regulated market operating regularly, recognised and open to the public and (ii) whose exclusive object is to replicate the performance of one or more indices. If several Share Classes are in issue in the relevant sub-fund meeting (ii) above, only those Share Classes meeting (i) above will benefit from this exemption.

No Luxembourg tax is payable on the realised or unrealised capital appreciation of the assets of the Company.

Other Taxes

Under applicable foreign tax laws, withholding taxes may be deducted from interest and dividends and capital gains taxes may be payable at various rates. For the summary of foreign tax laws and practices, refer to Appendix I.

General

In many markets the Company, as a foreign investment fund, may be subject to non-recoverable tax on income and gains (either by withholding or direct assessment) in relation to the investment returns it realizes from its holdings of shares and securities in those markets. Where practicable the Company shall make claims under the relevant double tax treaties and domestic law of the countries concerned in order to minimize the impact of local taxation on the investment return and to obtain the best return for its shareholders. Those claims shall be made on the basis of the Company's understanding of the validity of such claims given the information available from the Company's depositaries, external advisers and other sources as to the interpretation and application of the relevant legal provisions by the tax authorities in the country concerned.

The Company shall seek to provide for tax on capital gains where it considers that it is more likely than not that the tax shall be payable, given the advice and information available to the Company at the date concerned. However, any provision held may be insufficient to cover, or be in excess of, any final liability.

The Company shall seek to claim concessionary tax treatment and account for tax on a best efforts basis, given the tax law and practices at that date. Any change in tax law or practice in any country where the Company is registered, marketed or invested could affect the value of the Company's investments in the affected country. In particular, where retrospective changes to tax law or practice are applied by the legislature or tax authorities in a particular country these may result in a loss for current Shareholders in the affected sub-fund. The Company does not offer any warranty as to the tax position of returns from investments held in a particular market nor of the risk of a retrospective assessment to tax in a particular market or country.

Notes to the Financial Statements (continued)

As at 31 March 2026

7. Net asset value disclosures

a. Closing prices

The assets of the sub-funds are valued using prices available at different times during the day of 31 March 2026, being the last business day of the reporting year.

The following sub-funds were valued using prices available at different dates, prior to 31 March 2026:

Sub-fund	Valuation date
BRIC Equity	30 March 2026
BRIC Markets Equity	30 March 2026
Indian Equity	30 March 2026
Global High Yield Securitised Credit Bond	30 March 2026
India Fixed Income	30 March 2026

If the Company had calculated the Net Asset Values solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 31 March 2026. However, these Net Asset Values would not have been significantly different from those shown in these financial statements except for the following sub-funds:

Sub-fund	Currency	% difference (in % of NAV)
Brazil Equity	USD	1.80%
Economic Scale US Equity	USD	1.44%
Global Equity Climate Transition (formerly named Global Lower Carbon Equity)	USD	1.47%
Global Equity Quality Income (formerly Global Sustainable Equity Income)	USD	1.31%
Global Equity Sustainable Healthcare	USD	1.12%
Global Equity Volatility Focused	USD	1.08%
Global Sustainable Long Term Equity	USD	1.12%
US Income Focused	USD	0.69%

b. Cross sub-fund investments

As at 31 March 2026, the total cross sub-fund investments amounts to USD 1,363,073,237 and therefore the total combined net assets at the year end without cross sub-fund investments would amount to USD 49,809,158,129.

The following table shows the amounts of cross sub-fund investments made by each sub-fund:

Sub-fund	Investment value USD
Asia Bond	2,126,520
Asia High Yield Bond	8,427,294
Global Bond	4,339,824
Global Bond Total Return	21,394,665
Global Corporate Bond	247,827,349
Global Corporate Bond Climate Transition (formerly named Global Lower Carbon Bond)	3,103,209
Global ESG Corporate Bond	7,321,973
Global Government Bond	296,797,098
Global High Income Bond	14,953,895

Notes to the Financial Statements (continued)

As at 31 March 2026

7. Net asset value disclosures (continued)

b. Cross sub-fund investments (continued)

Sub-fund	Investment value USD
Global High Yield Bond	58,279,309
Global High Yield ESG Bond	1,216,434
Global Short Duration Bond	279,142,758
Strategic Duration and Income Bond	120,248,709
Ultra Short Duration Bond	165,851,721
US Dollar Bond	15,358,580
Global Emerging Markets Multi-Asset Income	4,485,386
Managed Solutions - Asia Focused Conservative	63,830,746
Managed Solutions - Asia Focused Growth	5,206,709
Managed Solutions - Asia Focused Income	1,874,256
Multi-Strategy Target Return	15,008,919
US Income Focused	26,277,883

As at 31 March 2026, the above mentioned sub-funds invested in “Z” share classes category which are not subject to management fees.

8. Cash collateral information

As at 31 March 2026, the Company has paid/(received) the following cash collateral:

As at 31 March 2026

9. Dividends

Most distributing fund share classes in issue as at 31 March 2026 have had UK Reporting Fund status, either from 1 April 2010 or from the launch of the fund share class concerned. All Distributing and Accumulating Share Classes have UK Reporting Fund status from 1 April 2025. As and when new fund share classes are launched, UK Reporting Fund applications shall be made to HM Revenue & Customs accordingly. Details of the share classes that have UK Reporting Fund status can be found on the HM Revenue & Customs' website (www.hmrc.gov.uk)

At the date of this report, the status can be found at <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

The Company publishes annual reportable income information that shareholders require for their UK tax returns at www.kpmgreportingfunds.co.uk. If investors do not have access to the internet they can apply in writing at the registered office of the Company.

The Company paid the following per share dividends (ex-date) during the year ended 31 March 2026. The dividend rates disclosed in the note are reported in share class currency.

10. Other Income

Other income mainly consists of dilution levy (refer to Note 14).

11. Security Lending

Each sub-fund may for the purpose of generating additional capital or income (either through the fee paid by the borrowers or the reinvestment of the cash collateral) or for reducing costs participate in Securities Lending subject to complying with the provisions set forth in Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse ("SFTR"), ESMA's Guidelines of 1 August 2014 on ETFs and other UCITS issues (ESMA/2014/937EN) (the "ESMA Guidelines on ETFs and other UCITS issues"), CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investment when they use certain techniques and instruments relating to transferable securities and money market instruments and CSSF Circular 14/592 relating to the ESMA Guidelines on ETFs and other UCITS issues (the "CSSF Circular 14/592") and any other applicable laws, regulations, circulars or CSSF positions as may be amended or replaced.

The Board of Directors has delegated the implementation, management and day to day oversight of a Securities Lending Programme to the Management Company. The Management Company may decide which sub-fund should participate in a Securities Lending programme in which securities are transferred temporarily to approved borrowers by the Management Company in exchange for collateral. Any of the transferable securities or money market instruments belonging to a sub-fund may be subject to Securities Lending. The Management Company report regularly to the board on the Securities Lending activity and remain subject to the ongoing supervision and control of the board in relation to the Securities Lending Programme.

The aim is to use Securities Lending on a continuous basis. The proportion of a sub-fund's net assets subject to Securities Lending transactions is intended to be around 25%.

The Lending Agent, shall receive a fee of 15% of the gross revenue for its services related to Securities Lending and the Management Company a fee of 10% of the gross revenue for the oversight work undertaken in relation to Securities Lending. The remainder (75%) of the gross revenue is received by the relevant sub-funds taking part in the Securities Lending program. The detail of return and cost for each sub-fund are disclosed on Appendix VII (Unaudited Additional Disclosures) - Securities Financing Transactions Regulation ("SFTR") from page 623 to page 626.

Notes to the Financial Statements (continued)

As at 31 March 2026

11. Security Lending (continued)

The approval and selection process for counterparties to Securities Lending is a dynamic assessment of counterparties based on various criteria. Criteria used for approval of counterparties may include, but are not limited to, a counterparty's minimum credit rating, country or origin, accessibility, execution of specialized trade and regulatory risk profile at year-end.

*All revenues (less transaction costs) from securities lending transactions are accrued to the relevant sub-fund and are included in the caption "Investment Income, net" in the Statement of Operations and Changes in Net Assets. The total gross income amounts by sub-fund are disclosed in Appendix VII (Additional Disclosures) – Securities Financing Transactions Regulation ("SFTR") in Return and Cost section of the current report.

The security lending agent is The Hong Kong and Shanghai Banking Corporation Limited which is an affiliated entity of the management company.

The collateral type received on security lending are corresponding to bonds and shares.

The names of each counterparty by sub-fund are disclosed in Appendix VII (Additional Disclosures) – Securities Financing Transactions Regulation ("SFTR") in Concentration data section from page 505 to page 528 of the current report.

There was no collateral reused on securities lending during the year ended 31 March 2026.

12. Transactions with connected persons

All transactions with connected parties were carried out on an arm's length basis.

Notes to the Financial Statements (continued)

As at 31 March 2026

12. Transactions with connected persons (continued)

a. Bank accounts and deposits with related parties

Bank accounts are maintained and deposits are made mainly with HSBC Continental Europe, a member of HSBC Group.

Notes to the Financial Statements (continued)

As at 31 March 2026

12. Transactions with connected persons (continued)

b. Investment transactions with related parties (continued)

Sub-fund	Currency	Total aggregate value of such transactions during the year	Percentage of such transactions in value to total transactions during the year	Commission paid during the year	Average rate of commission
Multi-Asset Style Factors	EUR	8,376,504,261	18.77%	-	0.00%
Multi-Strategy Target Return	EUR	3,053,597,412	52.45%	-	0.00%
US Income Focused	USD	418,988,548	11.34%	-	0.00%

No soft commission arrangements are in place, except commission sharing arrangements as specifically detailed below.

In some locations, the investment adviser and its connected persons have entered into commission sharing arrangements (related solely to research services, defined as soft commissions by the Hong Kong Securities and Futures Commission, that are utilized by the Fund) with certain brokers, for which goods and services used to support the investment decision making process were received by it or its connected persons.

The investment adviser or its connected persons do not make direct payment for these services, but transact and agree an amount of business with brokers on behalf of the sub-funds concerned. All transactions were entered into in the ordinary course of business and on normal commercial terms.

Commissions were paid by the Company on these transactions. The goods and services utilized for the Company include the following: research and advisory services, economic and political analysis, portfolio analysis, market analysis and investment related publications.

c. Director holdings in the Company

Timothy Palmer acquired, prior to his appointment as a Director of the Company, and holds shares in HGIF Turkey Equity.

13. List of movements in the investment portfolio

The detailed list of movements in the investment portfolio can be obtained free of charge upon request at the registered office of the Company.

14. Anti-Dilution Mechanisms

There are two Anti-Dilution Mechanisms available to each sub-fund, a Pricing Adjustment and an Anti-Dilution Levy, both mechanisms aim to protect shareholders in a sub-fund. There are 2 different Pricing Adjustment mechanisms: a Partial Swing Pricing Adjustment and a Full Swing Pricing Adjustment (which operates only for Sub-Fund Corporate Euro Bond Fixed Term 2027).

When investors buy or sell Shares in a sub-fund, the Investment Adviser may need to buy or sell the underlying investments within the sub-fund. Without an Anti-Dilution Mechanism to take account of these transactions, all Shareholders in the sub-fund would pay the associated costs of buying and selling these underlying investments. These transaction costs can include, but are not limited to, bid-offer spreads, brokerage and taxes on transactions.

Notes to the Financial Statements (continued)

As at 31 March 2026

14. Anti-Dilution Mechanisms (continued)

Anti-Dilution Levy

Until Anti-Dilution Mechanism's threshold rate is triggered, no Anti-Dilution Levy or Pricing Adjustment is applied and the transaction costs will be borne by the sub-fund. This will result in a dilution (reduction in the Net Asset Value per Share) to existing Shareholders. Investors should note that sub-distributors may levy the sales charge (if any) on an investor's full subscription and may not take into account the application of an Anti-Dilution Levy. For the avoidance of doubt, it is clarified that fees other than the sales charge will continue to be calculated on the basis of the unadjusted Net Asset Value for Pricing Adjustment.

There is an adjustment of the Net Asset Value per Share only when a Pricing Adjustment is applied. When Anti-Dilution Levy is applied, in the case of net capital inflows, the Anti-Dilution Levy will be deducted from each subscription amount and accordingly reduce the number of Shares received by an investor or, in the case of net capital outflows, will be deducted from each redemption amount and accordingly reduce the redemption proceeds received by an investor. The amount of the Anti-Dilution Levy may be up to a maximum of 2% and may be reduced or waived at the discretion of the Board of Directors. In the case of Pricing Adjustment, the adjustment will not exceed 2%. However, it may be significantly higher during exceptional market conditions such as periods of high volatility, reduced asset liquidity and market stress.

Details of each Mechanism are specified in the latest Company's prospectus under specific section "Anti-Dilution Mechanisms".

Pricing Adjustment

Partial Swing Pricing Adjustment has been applied by the Company during the year.

No Full Swing Pricing Adjustment has been applied during the year on eligible sub-fund Corporate Euro Bond Fixed Term 2027.

Details of which Anti-Dilution Mechanism is applicable on a particular sub-fund can be obtained from the Management Company. Should the Company decide to change the Anti-Dilution Mechanism in operation for a particular sub-fund (i.e. from a Pricing Adjustment to Anti-Dilution Levy or vice versa), prior approval will be sought from relevant regulators (where required) and affected investors will receive at least one month's prior written notification.

A list of the sub-funds that have applied the mechanism of pricing adjustment (whether the NAV has swung or not) during the financial year is available at <https://www.assetmanagement.hsbc.co.uk/en/intermediary/funds>.

The table below discloses the Net Asset Value per Share in each sub-fund's reference currency before pricing adjustment (the "Unswung NAV per share") and the Net Asset Value per Share in each sub-fund's reference currency pricing adjustment (the "Swung NAV per share") for sub-funds which have been impacted by pricing adjustment on 31 March 2026.

15. Total expense ratio

The Total Expense Ratio ("TER") has been computed by the Administrator as required per the AMAS (Asset Management Association Switzerland) guidelines on the calculation and disclosure of the TER of collective investment schemes. The actual expenses incurred during the period are annualised and calculated as a percentage of the average Assets Under Management of the share class for the period. The TER also includes the percentage corresponding to passive hedging fees.

Synthetic TER is applicable for each sub-fund that invests at least 10% of its net assets as a fund of funds in other collective investment schemes (target funds) which publish a TER within the meaning of the present guidelines. A composite (synthetic) TER of the fund of funds is to be calculated by the administrator, as of the closing date of the financial year or the end of the financial year.

16. Liquidation of sub-funds

The following sub-funds have been closed during the year or during previous periods. As at 31 March 2026, the following cash positions are still held by the "Depositary Bank" of the following liquidated sub-funds:

	Brazil Bond (closed as at 15 May 2024) USD	China Consumer Opportunities (closed as at 25 May 2021) USD	China Multi- Assets Income (closed as at 26 October 2020) USD	Economic Scale GEM Equity (closed as at 22 October 2020) USD	Economic Scale Global Equity (closed as at 15 April 2021) USD

16. Liquidation of sub-funds (continued)

As at 31 March 2026, the following securities are still held by the "Depository Bank" of the following liquidated sub-funds:

Stock pending

Sub Fund	Description	Quantity
Economic Scale GEM Equity*	Folli Follie Group	3,361
Economic Scale GEM Equity*	Yes Bank	125,960
Economic Scale GEM Equity*	Inter RAO UES	1
Economic Scale GEM Equity*	Wintek Corp	333,820
ASEAN Equity**	Security BK VAR	54,010

*Closed as at 22 October 2020. These assets have not been sold due to constraint and restriction on the market not allowing the transactions.

**Closed as at 25 March 2019. This asset has not been sold due to constrain and restriction on the market not allowing the transaction. The sub-fund referred to is distinct from the existing sub-fund named "ASEAN Equity" as presented in the Statement of Net Assets.

17. Significant Events

The recent announcements of tariffs by the US government has caused significant market disruptions across financial markets and the economy. The Company and its Investment Adviser continue to monitor these developments.

Global Sustainable Equity Income has been renamed Global Equity Quality Income as at 30 April 2025.

Global Lower Carbon Bond and Global Lower Carbon Equity have been renamed respectively Global Corporate Bond Climate Transition and Global Equity Climate Transition as at 16 May 2025.

Global Securitised Credit Bond has been renamed Global Flexible Securitised Credit Bond as at 5 February 2026.

Global Equity Climate Change has been renamed Global Equity Climate Solutions as at 19 February 2026.

Asia ESG Bond and ESG Short Duration Credit Bond has been closed as at 16 May 2025.

The Board of Directors has taken the decision to initiate on 30 July 2025 the liquidation of Russia Equity, which has been suspended since 2 March 2022.

18. Subsequent Events

Global Sustainable Long-Term Equity has been closed as at 29 June 2026.

Global Sustainable Long Term Dividend has been renamed Global Equity High Dividend as at 30 April 2026.

The Board of Directors has taken the decision to liquidate the sub-fund Global Sustainable Long Term Equity effective 2 July 2026.

Additional Disclosure (Unaudited Information)

Appendix I - Taxation of the Company (foreign countries)

The following summary is based on the Company's understanding of the law and practice currently in force in the in other jurisdictions and is subject to changes therein.

Belgium

The Belgian government has enacted a law which charges an annual Net Asset Value tax on foreign investment funds registered with the FSMA (Financial Services and Markets Authority). An annual tax of 0.0925% is charged on the net outstanding amounts of sub-funds placed in Belgium through Belgian financial intermediaries on 31 December of the preceding year.

To date as the amounts are small, the Management Company has paid this tax cost on behalf of the Company out of the Operating, Administrative and Servicing Expenses it receives. However, should the cost become substantial or long term, the Management Company may require the sub-funds concerned to bear that tax charge for future periods.

People's Republic of China ("PRC")

Where the Company invests in shares and securities issued by companies tax resident (or with their primary activity) in the Peoples Republic of China ("PRC"), securities issued by government agencies in the PRC or other permissible PRC investments, the Company may be subject to Corporate Income Tax ("CIT"), withholding and other taxes imposed in the PRC.

The tax laws, regulations and practice in the PRC are constantly changing, and they may be changed with retrospective effect. In particular, there is uncertainty as to whether and how capital gains are to be taxed. Therefore, any provision for PRC tax liabilities that the Company may hold is likely to be excessive or inadequate to meet final PRC tax liabilities, and in particular (but not exclusively) in relation to gains derived from the disposal of PRC investments.

Consequently, the Company and shareholders may be disadvantaged depending upon the final outcome of how PRC investment returns will be taxed.

Germany

The sub-funds listed below will seek to continuously invest a minimum percentage of their net assets in equity assets as defined in sec. 2 para 8 German Investment Tax Act (2018).

% of Sub-fund's Net Assets	Sub-funds
More than 50%	All Equity Sub-Funds
	Managed Solutions - Asia Focused Growth
At least 25%	Managed Solutions - Asia Focused Income

Hong Kong

The Company may be subject to Hong Kong profits tax in relation to a particular sub-fund if it is treated as carrying on a trade or business in Hong Kong either on its own account or through the agency of the investment adviser of that subfund. If the Company is treated as carrying on business in Hong Kong, a liability to profits tax, the rate of which is currently 16.5%, shall only exist in respect of any profits of the relevant sub-funds which arise in or are derived from Hong Kong from that trade or business, and which are not capital in nature.

Under Hong Kong tax law and practice, funds resident outside Hong Kong ("Offshore Funds") are exempted from Hong Kong profits tax providing certain conditions are met. It is intended that affairs of the Company shall be conducted as far as possible to comply with the conditions for exemption from profits tax. However, the Company can offer no warranty that such exemption will be obtained in every instance.

Additional Disclosure (Unaudited Information)

Appendix I - Taxation of the Company (foreign countries) (continued)

India

The Income Tax Act, 1961 ("ITA") introduced the General Anti Avoidance Rule ("GAAR") which has been effective since 1 April 2017. Under GAAR, the Indian tax authorities have been given the power to re-characterise or disregard any arrangement which qualifies as an "impermissible avoidance arrangement" ("IAA"). This means an arrangement, the main purpose of which is to obtain a "tax benefit" (i.e., a reduction or avoidance of tax that would be payable under the ITA), and, amongst other things, which "lacks" or is "deemed to lack" commercial substance in whole or in part. The Income Tax Rules further clarify that a Foreign Portfolio Investor ("FPI") making investments in securities in the Indian market and availing any benefits under the double taxation avoidance agreement ("DTAA") could fall within the purview of GAAR. Accordingly, there is a risk that Indian tax authorities could deny tax exemption or relief claimed as per the provisions of the DTAA by invoking provisions of the GAAR. The Income Tax Rules also provide that investments made up to 31 March 2017 will be protected from the application of the GAAR.

United Kingdom

It is the intention of the Board of Directors to conduct the affairs of the Company so that it does not become resident in the United Kingdom. On the basis that the Company is not resident in the United Kingdom for tax purposes it should not be subject to United Kingdom corporation tax on its income and capital gains.

France

Currently applies to Euroland Value, Euroland Equity Smaller Companies and Euroland Growth.

"Plan d'Epargne en Actions"

In order for a sub-fund to claim eligibility to the French "Plan d'Epargne en Actions" and as long as they are registered with the Autorité des Marchés Financiers in France, the following additional investment restriction applies:

The total amount invested in equity or equity equivalent securities (as defined by art. L-221-31 of the French Monetary and Financial Code, § I-1°, a), b) and c)), which have their registered office in a country member of:

- ▶ the EU; or
- ▶ the European Economic Area (provided that the said country has concluded with France a bilateral tax cooperation agreement with a clause of administrative assistance aiming at fighting against tax fraud or evasion).

must not be less than 75% of the total assets of the relevant sub-fund at any point of time.

The definition given by art. L- 221-31 of the French Monetary and Financial Code, § I-1°, a), b) and c), excludes equities or equity equivalent securities issued by corporates which are not subject to corporate tax at the normal rate applying in their home country, and which in particular excludes shares of listed real estate corporates ("SIIC" - "*sociétés d'investissements immobiliers cotées*").

The following sub-funds are eligible as from 1 April 2007:

Sub-fund	% of holdings in shares
Euroland Equity Smaller Companies	96.34%
Euroland Growth	98.03%
Euroland Value	96.42%

Additional Disclosure (Unaudited Information)

Appendix I - Taxation of the Company (foreign countries) (continued)

France (continued)

Article 150-OD of the tax General Regulation

In order for a sub-fund to claim under Article 150-OD 1ter of the Tax General Regulation, the total amount invested in equity or equity equivalent securities must not be less than 75% of the total assets of the relevant sub-fund at any point of time.

The following sub-funds are eligible as from 1 April 2007:

Sub-fund	% of holdings in shares
Euroland Equity Smaller Companies	97.65%
Euroland Value	97.41%
Europe Value	99.24%

Additional Disclosure (Unaudited Information) (continued)

Appendix II - UK SORP Disclosure

Investment risk

Information in relation to certain investment risks are disclosed for selected sub-funds as follows:

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as market prices, foreign exchange rates and interest rates. It comprises of three major types of risks i.e. currency risk, interest rate risk and other price risk.

As invested in equities and fixed income securities, the Fund is exposed to the risk that the equity and fixed income markets decline. This risk is monitored in absolute by the equity exposure and relative to the benchmark by the calculation of the ex-ante tracking-error.

a. Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.

The below table summarises the following sub-funds' exposure to currency risks.

Sub-fund	Currency	Net currency exposure in Sub-fund currency

Credit risk arising on bonds is mitigated by investing in government bonds where the credit risk is minimal, or corporate bonds which are rated at least investment grade. The sub-funds also invests in high yield and emerging market bonds which are non-investment grade. The sub-fund manages the associated credit risk by requesting the investment manager to diversify the portfolio to minimise the impact of default by any one issuer.

e. Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Other price risk arises principally in relation to the sub-fund's return seeking portfolio which includes shares, depositary receipts, warrants/equity linked securities, preferred shares and collective investment scheme.

Additional Disclosure (Unaudited Information) (continued)

Appendix II - UK SORP Disclosure (continued)

Market risk (continued)

e. Other price risk (continued)

The sub-fund manages this exposure to other price risk by constructing a diverse portfolio of investments across various markets.

At the year end, the sub-fund's exposure to investments subject to other price risk was:

Fair value hierarchy

The fair value of financial instruments has been determined using the following fair value hierarchy:

Category (a) The quoted price for an identical asset in an active market.

Category (b) When quoted prices are unavailable, the price of a recent transaction for an identical asset adjusted if necessary.

Category (c) Where a quoted price is not available and recent transactions of an identical asset on their own are not a good estimate of fair value, the fair value is determined by using a valuation technique which uses:

C (i) observable market data; or

C (ii) non-observable data.

The sub-fund's investment assets and liabilities have been fair valued using the above hierarchy categories as follows:

Sub-fund	Currency	Category (a)	Category (b)	Category c(i)	Category c(ii)	Total
China A-shares Equity	USD	30,771,677	3,472	-	-	30,775,149

Appendix III - Dealing Days of the Fund

Dealing for Shares in the Company will take place on any Business Day (other than days during a period of suspension of dealing in Shares) and which is also for each sub-fund, a day where stock exchanges and regulated markets in countries where the sub-fund is materially invested are open for normal trading.

The Business Days which are not Dealing Days will be listed in the annual report and semi-annual reports and available at the registered office of the Company. Any amendments to such lists are also available at the registered office of the Company.

Shareholders who deal through the Company's local distributor or representative should note that there will be no dealing for the Shares of the Company in the jurisdiction in which such distributor or representative operates on a day which is not a Business Day in such jurisdiction. Shareholders in such jurisdictions can however deal via the Transfer Agent in Luxembourg.

The Company will determine the dealing/non-dealing calendar according to the latest market information obtained by the Company from time to time. Shareholders can obtain the latest dealing/non-dealing calendar of the Company from the registered office of the Company or from the Company's local distributor or representative.

HSBC Investment Funds (Hong Kong) Limited has been appointed by the Company as its Representative and Share Distributor in Hong Kong. There shall be no dealing for the shares of the Company in Hong Kong on a day which is a public or bank holiday in Hong Kong.

Additional Disclosure (Unaudited Information) (continued)

Appendix IV - Fund Holiday Calendar for 2026

All HGIF sub-funds will have no NAV calculated on the following days:

- ▶ all Saturdays and Sundays
- ▶ and on the following dates for Luxembourg Holidays:

1 January
3 April
6 April
1 May
9 May
14 May
25 May
23 June
25 December

In addition, the following sub-funds will have no NAV calculated on the following dates:

ASEAN Equity

* Other - dates on which other individual markets, which when amalgamated represent a material portion of the fund's underlying exposure, are closed.

** The NYSE and Nasdaq are open on Columbus Day (12th October) and Veteran's Day (11th November) therefore equity sub-funds listing the US as a material market will not have a holiday on these dates. Bond markets will be closed to trading on these dates and bond sub-funds listing the US as a material market will be closed.

*** NAV is calculated weekly on Monday (or on the immediately following business day if the relevant Monday is not a business day).

**** The Board of Directors has taken the decision to liquidate Russia Equity sub-fund as at 30 July 2025 in the best interest of Shareholders. The Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following Russia's invasion of Ukraine.

Appendix VI - Risk Management

General

HSBC Investment Funds (Luxembourg) S.A. (the "Management Company") uses a risk management process that monitors the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the managed funds at any time. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ("CSSF"), the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company assures on the basis of appropriate and reasonable methods that the overall risk associated with derivatives does not exceed the Net Asset Value of the portfolio. The Management Company uses the following methods:

Commitment Approach

The "Commitment Approach" is based on the positions of Financial Derivative Instruments ("FDI") converted into their corresponding underlying equivalents using the delta approach. Netting and hedging might be considered for FDI and their underlying assets provided that the approach complies with the regulations. The sum of these underlying equivalents must not exceed the Net Asset Value of the Fund.

Value-at-Risk ("VaR") is a mathematical approach used to estimate the potential loss of a portfolio over a specified holding period within a given confidence level. VaR can be calculated on either an absolute or a relative basis.

Absolute VaR approach

In the absolute VaR approach the VaR (99% confidence level, 20-day holding period) of the Fund cannot exceed 20% of the Fund net assets.

Relative VaR approach

Relative VaR is calculated in relation to a suitable benchmark or reference portfolio. Using this approach, the relative VaR cannot exceed the VaR of a reference portfolio by more than a maximum of twice (200%). The reference portfolio is a matching portfolio in comparison to the Fund's investment policy.

The UK and India GSC Risk Teams of HSBC Asset Management Limited are responsible for setting up, maintaining and running the APT risk model, and ensuring that appropriate analysis and reports are available for the local risk teams to consume. The local risk teams (AMUS, AMFR, AMHK and UK Risk Team) are responsible for reviewing and validating the results, applying Management Action Trigger levels ("MATs"), following up with fund managers, and reporting as required to the Management Company.

The calculation of the VaR is done accordingly to the following calculation standards and in line with the standards defined in ESMA guidelines 10/788 Box 15 and CSSF CR 11/512:

- a) Confidence interval: 99%
- b) Simulation horizon: 4 weeks
- c) Model estimation window of 180 weeks (3.5 years) used to calibrate the correlation structure of the model
- d) Daily VaR calculation with daily data sets updates

Currently the risk team use the APT Parametric VaR approach. Since 1st January 2023, the Monte-Carlo VaR model is used for the monitoring of Multi-Asset Style Factors sub-fund.

The VaR utilization (lowest, highest and average) of the sub-fund is calculated by dividing the realized (lower, highest and average during the period) daily VaR by the VaR Regulatory limit (20% for the Absolute VaR and 200% for the Relative VaR sub-funds).

Additional Disclosure (Unaudited Information) (continued)

Leverage

For sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company has delegated the leverage monitoring to the respective sub-funds' Investment Advisers who determine the sum of the notional values of all the relevant FDI and estimate in this regard a degree of the expected average value (leverage). This level of leverage can, depending on the respective market conditions, derive from the actual value at the reporting date. Furthermore, the published expected/ level of leverage is explicitly not understood as an investment limit.

For the sub-funds using the Value at Risk method, the leverage has been calculated using the sum of notionals for the entire period.

Sub-fund	Starting Period	Ending Period	Leverage Methodology	Expected Level of Leverage	Realised Average Level of Leverage
1) Bond Sub-funds					
Euro Bond Total Return	01/04/2025	31/03/2026	Sum of Notionals	80.00%	42.56%

Appendix VII - Securities Financing Transactions Regulation ("SFTR")

Securities Financing Transactions Regulation ("SFTR") introduces reporting requirements for Securities Lending and Total Return Swaps.

A Securities Financing Transactions (SFT) is defined as per Article 3 of Regulation (EU) 2015/2365(11) of the SFTR as:

- a repurchase/reverse repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transactions or sell-buy back transactions;
- a margin lending transaction.

During the year ending as at 31 March 2026, several sub-funds have engaged in Securities Lending transactions and no sub-fund has invested into Total Return Swap contract or repurchase/reverse repurchase transaction under the scope of the SFT.

Global Data

Amount of assets engaged in Securities Lending transactions

The amount of assets engaged in Securities Lending, including their proportion to the sub-fund Total Net Assets and total lendable assets* are as follows:

Sub-fund	Currency	Type of Asset	Market Value of securities lent (in sub-fund Ccy)	% of Total Net Assets	% of Total lendable Assets
ASEAN Equity	USD	Securities Lending	1,084,567	3.41%	3.47%

Appendix IX - Additional notes for Hong Kong residents in relation to HSBC Global Investment Funds

Additional notes for Hong Kong residents in relation to HSBC Global Investment Funds

The following sub-funds of HSBC Global Investment Funds referred to in this document are not authorised in Hong Kong and not available to Hong Kong residents:

- ▶ Asia Bond
- ▶ Asia High Yield Bond
- ▶ China A-shares Equity
- ▶ Corporate Euro Bond Fixed Term 2027
- ▶ Euro Bond Total Return
- ▶ Euro Credit Bond
- ▶ Euroland Growth
- ▶ GEM Debt Total Return
- ▶ Global Bond Total Return
- ▶ Global Emerging Markets Corporate Sustainable Bond
- ▶ Global Emerging Markets ESG Bond
- ▶ Global Emerging Markets ESG Local Debt
- ▶ Global Emerging Markets Local Debt
- ▶ Global Equity Circular Economy
- ▶ Global ESG Corporate Bond
- ▶ Global Green Bond
- ▶ Global High Yield ESG Bond
- ▶ Global High Yield Securitised Credit Bond
- ▶ Global Inflation Linked Bond
- ▶ Global Equity Quality Income (formerly Global Sustainable Equity Income)
- ▶ Global Sustainable Long Term Equity
- ▶ Multi-Asset Style Factors
- ▶ Multi-Strategy Target Return
- ▶ RMB Fixed Income
- ▶ Singapore Dollar Income Bond
- ▶ Turkey Equity

Additional Disclosure (Unaudited Information) (continued)

Appendix X - Sustainable Finance Disclosure Regulation ("SFDR")

ESG reporting

On 10 March 2021, the Sustainable Finance Disclosure Regulation ("SFDR") entered into force. The SFDR provides for a harmonised approach in respect of sustainability-related disclosures to investors within the European Union.

Article 6 framework

The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

▶ Bond SFDR Article 6

- Asia Bond
- Asia High Yield Bond
- Asian Currencies Bond
- GEM Debt Total Return
- Global Emerging Markets Bond
- Global Emerging Markets Local Debt
- Global High Yield Bond
- India Fixed Income
- RMB Fixed Income
- Singapore Dollar Income Bond
- Strategic Duration and Income Bond
- US High Yield Bond
- US Short Duration High Yield Bond

▶ International and Regional Equity SFDR Article 6

- BRIC Equity
- BRIC Markets Equity
- Frontier Markets
- Global Equity Volatility Focused

▶ Market Specific Equity SFDR Article 6

- Brazil Equity
- Economic Scale US Equity
- Russia Equity (In Liquidation)*
- Turkey Equity

*Investment in the Russia Equity sub-fund is currently suspended.

▶ Other SFDR Article 6

- Global Emerging Markets Multi-Asset Income
- Managed Solutions - Asia Focused Conservative
- Managed Solutions - Asia Focused Growth
- Managed Solutions - Asia Focused Income
- Multi-Asset Style Factors
- Multi-Strategy Target Return
- US Income Focused

Additional Disclosure (Unaudited Information) (continued)

Appendix X - Sustainable Finance Disclosure Regulation ("SFDR") (continued)

Article 8 framework

To have qualified as an SFDR Article 8 sub-fund, each sub-fund had to promote one or more social or environmental characteristics. HSBC Asset Management's position is that the vast majority of assets should exhibit strong and improving characteristics. In addition, as a Sustainability Indicator, all Article 8 sub-funds have actively considered all mandatory Principle Adverse Impacts (PAIs) in their investment decision making process and actively take into consideration all relevant PAIs.

► Bond SFDR Article 8

- Asia ESG Bond (closed as at 16 May 2025)
- Corporate Euro Bond Fixed Term 2027
- Euro Bond
- Euro Bond Total Return
- Euro Credit Bond
- Euro High Yield Bond
- ESG Short Duration Credit Bond (closed as at 16 May 2025)
- Global Bond
- Global Bond Total Return
- Global Corporate Bond
- Global Corporate Bond Climate Transition (formerly Global Lower Carbon Bond)
- Global Emerging Markets ESG Bond
- Global Emerging Markets ESG Local Debt
- Global ESG Corporate Bond
- Global Flexible Securitised Credit Bond (formerly Global Securitised Credit Bond)
- Global Government Bond
- Global Green Bond
- Global High Income Bond
- Global High Yield ESG Bond
- Global High Yield Securitised Credit Bond
- Global Inflation Linked Bond
- Global Investment Grade Securitised Credit Bond
- Global Short Duration Bond
- Ultra Short Duration Bond
- US Dollar Bond

Equity SFDR Article 8

- ASEAN Equity
- Asia ex Japan Equity
- Asia ex Japan Equity Smaller Companies
- Asia Pacific ex Japan Equity High Dividend
- China A-shares Equity
- Chinese Equity
- Euroland Equity Smaller Companies
- Euroland Growth
- Euroland Value
- Europe Value
- Global Emerging Markets Equity
- Global Equity Climate Solutions (formerly Global Equity Climate Change)
- Global Equity Climate Transition (formerly Global Lower Carbon Equity)
- Global Equity Sustainable Healthcare

Additional Disclosure (Unaudited Information) (continued)

Appendix X - Sustainable Finance Disclosure Regulation ("SFDR") (continued)

Article 8 framework (continued)

- Global Infrastructure Equity
- Global Real Estate Equity
- Global Equity Quality Income (formerly Global Sustainable Equity Income)
- Global Sustainable Long Term Dividend
- Hong Kong Equity
- Indian Equity

Article 9 framework

To have qualified as an SFDR Article 9 sub-fund, each sub-fund had specifically sustainable goals or a reduction in carbon emissions as their objective. HSBC Asset Management's position is that the vast majority of assets should exhibit strong and improving characteristics. In addition, an Article 9 sub-fund is required to assess the sub-fund's portfolio against the principle of "do no significant harm" by considering the PAIs, and incorporating considerations of the minimum social safeguards specified in the Taxonomy Regulation (Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment).

► Bond SFDR Article 9

- Global Emerging Markets Corporate Sustainable Bond

► Equity SFDR Article 9

- Global Equity Circular Economy
- Global Sustainable Long Term Equity

Excluded Activities

In line with HSBC's Responsible Investment Policies, the companies and/or issuers into which the sub-funds invest may be subject to stewardship & engagement efforts and due diligence checks. The sub-funds may also be subject to the application of investment exclusions. These are referred to as "Excluded Activities" as further described below.

Environmental and social factors, corporate governance practices, lower carbon intensity (if applicable), Excluded Activities and the need for ESG due diligence may be identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and scores, fundamental qualitative research, third party data and corporate engagement. HSBC may rely on expertise, research and information provided by financial and non-financial data providers.

HSBC Asset Management uses third party non-financial data sources, including environmental, social, and governance (ESG) data and scores, to monitor the exposure of companies and issuers to certain activities, breaches of standards, sustainability risks and opportunities, and perform an assessment of environmental and/or social characteristics and sustainable investment objectives where relevant. It is also used for reporting and disclosure purposes. While HSBC Asset Management will assess third party providers as part of initial and ongoing due diligence, it is not possible to guarantee the accuracy, completeness, availability, quality of judgement or timeliness of the data and scores obtained from such providers. Any monitoring performed is subject to limitations in respect of coverage of companies and issuers by third party providers.

HSBC Asset Management does not generally have the ability to individually verify any such ESG data and scores it receives from third party providers and is therefore dependent on the integrity of both the external providers and the processes by which any such data is generated. These data inputs may include information self-reported by companies and from third-party providers, which may be derived from the provider's proprietary estimation models, proxies, assumptions, and techniques that are not made public.

Additionally, there can be significant variances in data and scores supplied across different third-party providers. The lack of consistency and comparability between data and scores that is available may require HSBC Asset Management to make judgements, estimations, and assumptions, as necessary.

Additional Disclosure (Unaudited Information) (continued)

Appendix X - Sustainable Finance Disclosure Regulation ("SFDR") (continued)

Excluded Activities (continued)

HSBC Asset Management may choose to disregard any data or scores it receives on a company or issuer held within a subfund's portfolio or which is being considered for investment by a sub-fund, where HSBC Asset Management's due diligence suggests the information provided by the third party provider may be inaccurate, incomplete or disproportionate. Shareholders should be aware that, where a sub-fund invests into other funds or sub funds, which may include those managed by HSBC, there is a risk that the underlying fund or sub fund will have exposure to companies or issuers that would otherwise be excluded by the Responsible Investment policies of the investing sub-fund. For example, the underlying funds or sub funds that HSBC invests into may not apply exclusions or may not have the same interpretation and standards as set out in HSBC's Banned Weapons Policy or HSBC's Controversial Weapons definition.

HSBC's Responsible Investment Policies may be amended from time to time. Any investor relying on the information contained in the sustainability policies should ensure they refer to the latest version which is available on our website at: <http://www.assetmanagement.hsbc.com/about-us/responsible-investing> - select your location and then choose Policies and Disclosures.

The Excluded Activities below may be applicable to the sub-funds of the Company:

Excluded Activity	Details
Banned Weapons	Sub-funds will exclude companies and/or issuers HSBC considers to have verified or strongly indicated involvement in the development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of weapons banned by certain international conventions. Where HSBC has identified potential involvement, those companies and/or issuers may be subject to ESG due diligence checks to determine whether those companies and/or issuers should be excluded from a sub-fund's portfolio. Banned weapons include anti-personnel mines, biological weapons, blinding laser weapons, chemical weapons, cluster munitions & non-detectable fragments.
Controversial Weapons	Sub-funds will not invest in companies and/or issuers HSBC considers to be directly involved in the production of controversial weapons or their key components. Controversial weapons include depleted uranium ammunition and depleted uranium armour, incendiary weapons, nuclear weapons and white phosphorus weapons. Where HSBC has identified potential involvement, those companies and/or issuers may be subject to ESG due diligence checks to determine whether those companies and/or issuers should be excluded from a sub-fund's portfolio. HSBC may continue to invest in companies and/or issuers with immaterial involvement. HSBC defines immaterial involvement as being companies and/or issuers where less than 5% of revenues is derived from the production of controversial weapons or its key components.
Thermal Coal (Expanders)	Sub-funds will not participate in initial public offerings ("IPOs") or primary fixed income financing by companies and/or issuers HSBC considers to be engaged in the expansion of thermal coal production.
Thermal Coal (Revenue threshold)	Sub-funds will not invest in companies and/or issuers HSBC considers to have more than 10% revenue generated from thermal coal power generation or extraction and which, in the opinion of HSBC, do not have a credible transition plan.
Thermal Coal (Revenue threshold)	Sub-funds will not invest in companies and/or issuers HSBC considers to have more than 2.5% revenue generated from thermal coal power generation or extraction and which, in the opinion of HSBC, do not have a credible transition plan.
Arctic Oil & Gas	Sub-funds will not invest in companies and/or issuers HSBC considers to have more than 10% of their revenues generated from oil & gas extraction in the Arctic region and which, in the opinion of HSBC, do not have a credible transition plan.

Additional Disclosure (Unaudited Information) (continued)

Appendix X - Sustainable Finance Disclosure Regulation ("SFDR") (continued)

Excluded Activities (continued)

Excluded Activity	Details
Oil Sands	Sub-funds will not invest in companies and/or issuers HSBC considers to have more than 10% of their revenues generated from oil sands extraction and which, in the opinion of HSBC, do not have a credible transition plan.
Shale Oil	Sub-funds will not invest in companies and/or issuers HSBC considers to have more than 35% of their revenues generated from the extraction of Shale Oil and which, in the opinion of HSBC, do not have a credible transition plan.
Tobacco	Sub-funds will not invest in companies and/or issuers HSBC considers to be directly involved in the production of tobacco.
UNGC	Sub-funds will not invest in companies and/or issuers HSBC considers to be non-compliant with United Nations Global Compact (UNGC) Principles. Where instances of potential violations of UNGC principles are identified, companies and/or issuers may be subject to proprietary enhanced due diligence checks to determine their suitability for inclusion in a sub-fund's portfolio.

EU climate transition Benchmark and Paris-aligned Benchmark Exclusions

In order to comply with the European Securities and Markets Authority's (ESMA's) guidelines on funds' names using ESG or sustainability-related terms, certain sub-funds may apply additional exclusions for the EU Climate Transition Benchmarks as defined by Article 12(1)(a) to (c) of CDR (EU) 2020/1818 or the Paris-aligned Benchmarks as defined by Article 12(1)(a) to (g) of CDR (EU) 2020/1818, in addition to the HSBC Responsible Investment Policies outlined above.

The CTB/PAB's exclusions below may be applicable to the sub-funds:

Excluded Activity	Details
Controversial weapons (a)	Sub-funds will not invest in companies and/or issuers involved in any activities related to controversial weapons, namely anti-personnel mines, cluster munitions, chemical weapons and biological weapons
Tobacco (b)	Sub-funds will not invest in companies and/or issuers involved in the cultivation and production of tobacco.
UNGC and OECD (c)	Sub-funds will not invest in companies and/or issuers in violation of the United Nations Global Compact (UNGC) principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
Hard coal and lignite (d)	Sub-funds will not invest in companies and/or issuers that derive 1% or more of revenue from exploration, mining extraction, distribution or refining of hard coal and lignite.
Oil fuels (e)	Sub-funds will not invest in companies and/or issuers that derive 10% or more of their revenues from the exploration, extraction, distribution or refining of oil fuels.
Gaseous fuels (f)	Sub-funds will not invest in companies and/or issuers that derive 50% or more of their revenues from the exploration, extraction, manufacturing or distribution of gaseous fuels.
Electricity generation (g)	Sub-funds will not invest in companies and/or issuers that derive 50% or more of their revenues from electricity generation with a GHG intensity of more than 100 g CO ₂ e/kWh.

Additional Disclosure (Unaudited Information) (continued)

Appendix X - Sustainable Finance Disclosure Regulation ("SFDR") (continued)

Excluded Activities (continued)

Taxonomy

The Taxonomy Regulation was established to provide an EU-wide classification system which provides investors and investee companies with a common language to identify whether certain economic activities could be considered environmentally sustainable.

The Taxonomy Regulation introduces additional disclosure requirements in respect of Article 8 and Article 9 SFDR sub-funds. For Article 6 SFDR sub-funds, the investments underlying these sub-funds do not take into account the EU criteria for environmentally sustainable economic activities. However, as disclosed above in the section "Integration of sustainability risks into investment decisions", the Investment Advisers integrate sustainability risk considerations into the management of these sub-funds.

Under the Taxonomy Regulation, an economic activity was considered to be environmentally sustainable where it:

- ▶ Contributed substantially to one or more defined environmental objectives;
- ▶ Did not significantly harm any of the environmental objectives;
- ▶ Complied with certain minimum social safeguards; and
- ▶ Complied with specified performance thresholds known as technical screening criteria.

For points 1 and 2 above, the Taxonomy Regulation defines six environmental objectives:

- ▶ Climate change mitigation;
- ▶ Climate change adaptation;
- ▶ Sustainable use and protection of water and marine resources;
- ▶ Transition to a circular economy;
- ▶ Pollution prevention and control; and
- ▶ Protection and restoration of biodiversity and ecosystems.

Any information on the alignment of the Sub-fund with these environmental objectives is set out in the appendix of the latest prospectus dated as at 30 March 2026.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO BOND

Legal Entity Identifier: QCWW2LDBI4BRGCNZ8497

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 70.84% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	97.72	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.18	6.70
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.16%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Euro Aggregate

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	97.72	NA
	31 March 2025	98.93	NA
	31 March 2024	97.43	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.18	6.70
	31 March 2025	7.35	6.77
	31 March 2024	7.43	6.79
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.16%
	31 March 2025	0.00%	0.19%
	31 March 2024	0.00%	0.09%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.02%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.03%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	123.16	81.02
	31 March 2025	103.91	75.87
	31 March 2024	99.29	79.89
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.16%
	31 March 2025	0.00%	0.19%
	31 March 2024	0.00%	0.09%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.02%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.03%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	107.30	112.49
	31 March 2025	119.70	123.88
	31 March 2024	271.08	282.09

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Euro Aggregate

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of France 3.5% 25-nov-2033	Government	4.18%	France
Government Of Italy 2.8% 01-dec-2028	Government	3.70%	Italy
Government Of The Netherlands 0.5% 15-jul-2032	Government	2.54%	Netherlands
Government Of Luxembourg 0.0% 28-apr-2030	Government	2.28%	Luxembourg
European Investment Bank 2.375% 15-may-2030	Government	2.20%	SUPRANATIONAL
Government Of Italy 3.5% 01-mar-2030	Government	2.17%	Italy
Government Of Belgium 1.9% 22-jun-2038	Government	2.13%	Belgium

Cash and derivatives were excluded

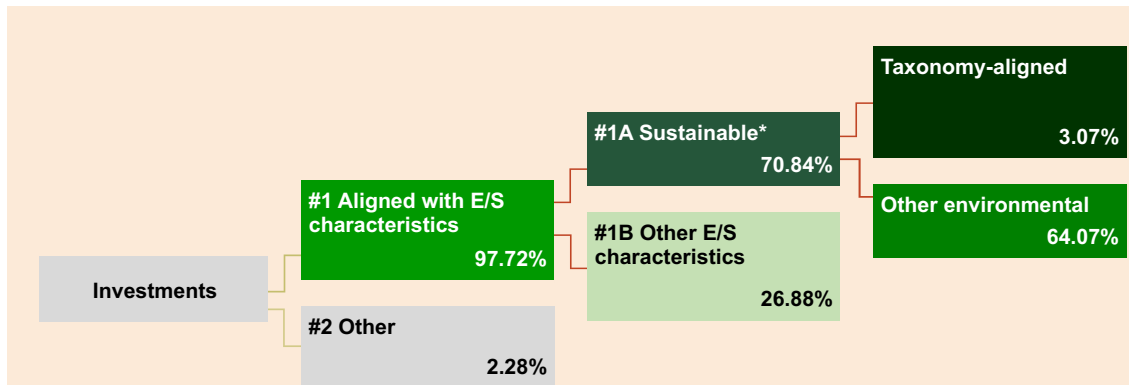

What was the proportion of sustainability-related investments?

70.84% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Government	56.55%
Financials	18.82%
Utilities	9.27%
<i>Electric Utilities</i>	<i>6.56%</i>
<i>Multi-Utilities</i>	<i>2.71%</i>
Communication Services	3.31%
Industrials	3.17%
Cash & Derivatives	1.63%
Real Estate	1.55%
Materials	1.47%
Energy	1.40%
<i>Integrated Oil & Gas</i>	<i>1.40%</i>
Consumer Staples	1.33%
Consumer Discretionary	0.97%
Health Care	0.53%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 3.07%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes: ☐ In fossil gas ☒ In nuclear energy

☐ No

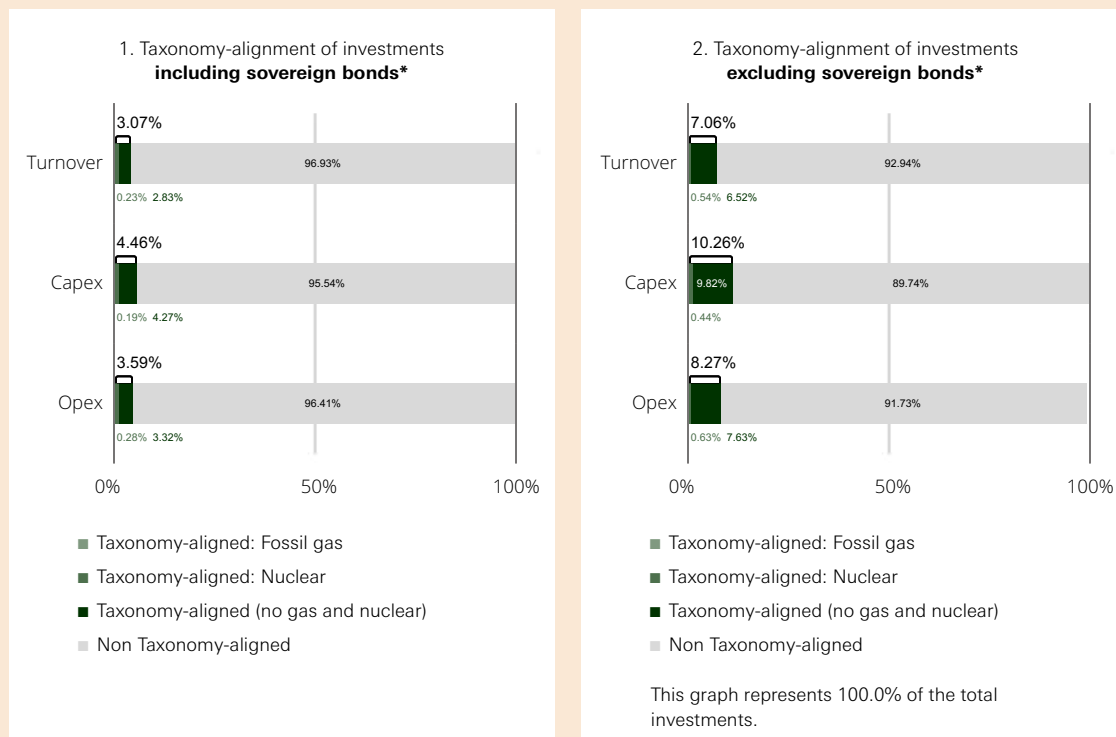

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.70%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.23%	0.25%	0.11%
Revenue - Taxonomy-aligned (no gas and nuclear)	2.83%	2.41%	0.69%
Revenue - Non Taxonomy-aligned	96.93%	97.34%	99.20%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.19%	0.20%	0.20%
CAPEX - Taxonomy-aligned (no gas and nuclear)	4.27%	3.75%	1.75%
CAPEX - Non Taxonomy-aligned	95.54%	96.05%	98.04%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.28%	0.30%	0.32%
OPEX - Taxonomy-aligned (no gas and nuclear)	3.32%	3.06%	1.10%
OPEX - Non Taxonomy-aligned	96.41%	96.64%	98.58%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 64.07%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in issuers with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO BOND TOTAL RETURN

Legal Entity Identifier: 549300IG7G81KR48XN60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.30% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● ***How did the sustainability indicators perform?***

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	93.67	NA
Identification and analysis of a company's environmental and social factors (Asset Class versus Asset Class Reference Benchmark)		
Euro Investment Grade Corporates	7.98	7.33
Euro High Yield Corporates	6.88	6.54
Euro Government Bonds	7.20	6.30
Responsible business practice in line with UNGC and OECD principles

	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Asset Class Reference Benchmarks: iBoxx Euro Corporates Index, ICE BofA BB-B Euro High Yield Index, FTSE EMU Government Bond Index EUR

● ***...and compared to previous periods?***

The sub-fund was uplifted to SFDR Article 8 on 1 August 2025 and therefore no previous period information is available.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	105.17	NA
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	NA
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	NA

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Kfw 1.125% 15-sep-2032	Government	2.91%	Germany

Cash and derivatives were excluded

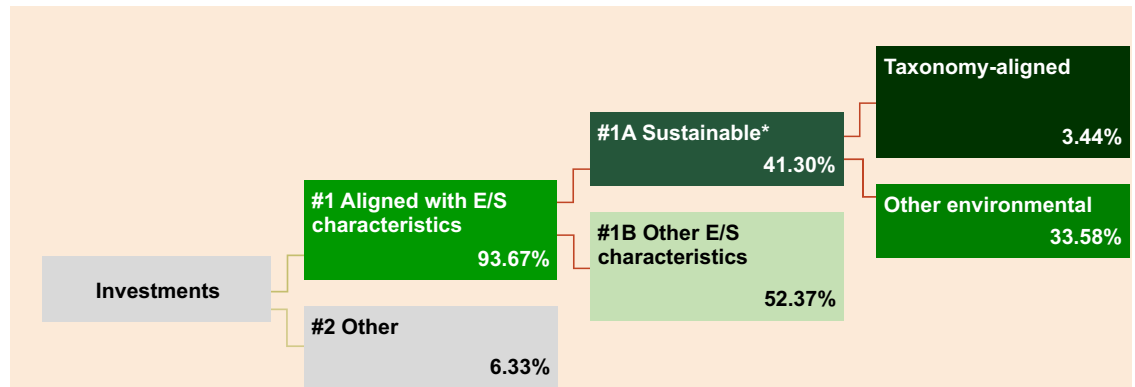

What was the proportion of sustainability-related investments?

41.30% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	27.67%
Utilities	20.67%
<i>Electric Utilities</i>	16.20%
<i>Independent Power Producers & Energy Traders</i>	1.63%
<i>Multi-Utilities</i>	1.45%
Government	15.49%
Communication Services	13.47%
Industrials	6.25%
Consumer Discretionary	3.71%
Energy	2.99%
<i>Integrated Oil & Gas</i>	2.59%
<i>Oil & Gas Equipment & Services</i>	0.40%
Consumer Staples	2.42%
Real Estate	1.85%
Information Technology	1.73%
Health Care	1.56%
Materials	1.22%
Cash & Derivatives	0.97%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 3.44%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

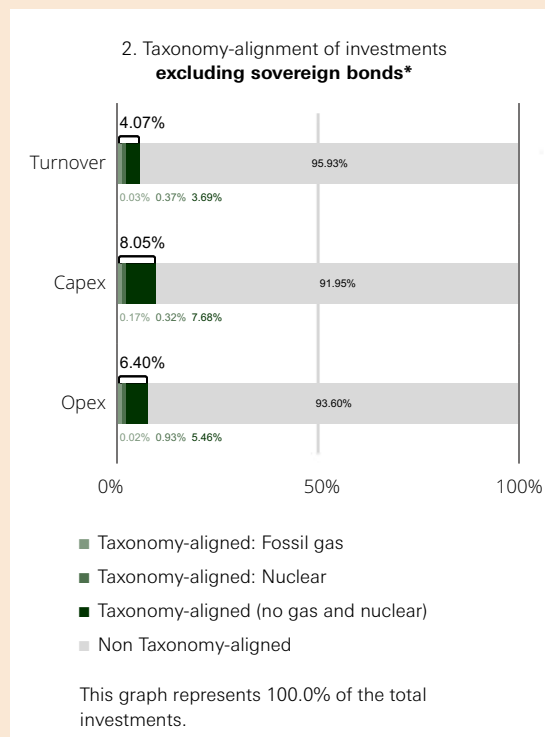

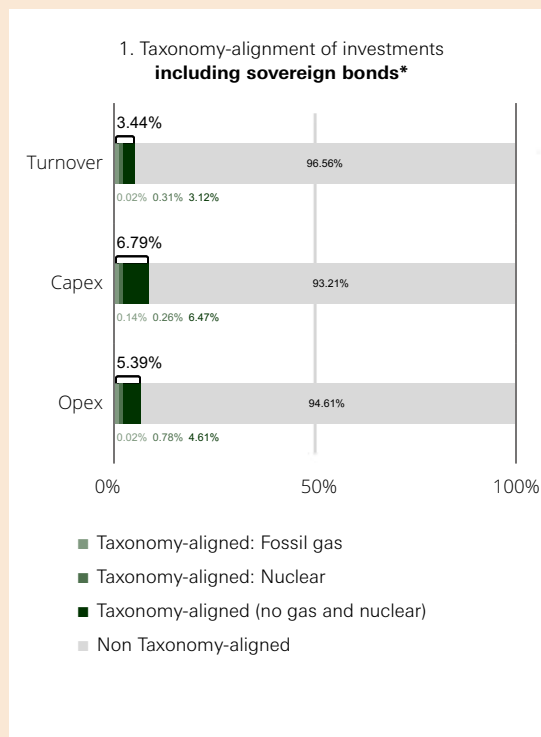

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.99%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26
Revenue - Taxonomy-aligned: Fossil gas	0.02%
Revenue - Taxonomy-aligned: Nuclear	0.31%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.12%
Revenue - Non Taxonomy-aligned	96.56%
CAPEX - Taxonomy-aligned: Fossil gas	0.14%
CAPEX - Taxonomy-aligned: Nuclear	0.26%
CAPEX - Taxonomy-aligned (no gas and nuclear)	6.47%
CAPEX - Non Taxonomy-aligned	93.21%
OPEX - Taxonomy-aligned: Fossil gas	0.02%
OPEX - Taxonomy-aligned: Nuclear	0.78%
OPEX - Taxonomy-aligned (no gas and nuclear)	4.61%
OPEX - Non Taxonomy-aligned	94.61%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 33.58%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in issuers with responsible business practices in accordance with UNGC principles.

The sub-fund aimed to have, in respect of each of the asset classes that the sub-fund invested in, a higher ESG score, calculated as the weighted average of the ESG scores given to the issuers in which the sub-fund had invested than the weighted average of the constituents of the relevant reference benchmark which was representative of the Asset Class.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO CREDIT BOND

Legal Entity Identifier: 549300R35ZWT4M8NDL73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/ Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.71% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	94.70	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.55	7.31
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.28%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - iBoxx € Corporates

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	94.70	NA
	31 March 2025	98.24	NA
	31 March 2024	92.68	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.55	7.31
	31 March 2025	7.50	7.24
	31 March 2024	7.66	7.26
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.28%
	31 March 2025	0.00%	0.26%
	31 March 2024	0.00%	0.43%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	62.41	100.99
	31 March 2025	65.43	95.03
	31 March 2024	83.41	100.61
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.28%
	31 March 2025	0.00%	0.26%
	31 March 2024	0.00%	0.43%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - iBoxx € Corporates

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Cash and derivatives were excluded

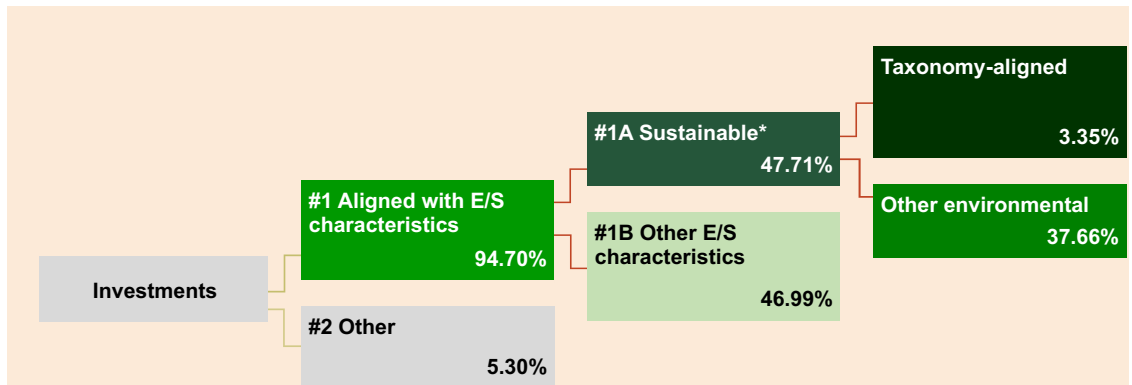

What was the proportion of sustainability-related investments?

47.71% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	31.56%
Utilities	17.08%
<i>Electric Utilities</i>	14.62%

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 3.35%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes:
 ☐ In fossil gas
 ☒ In nuclear energy

☐ No

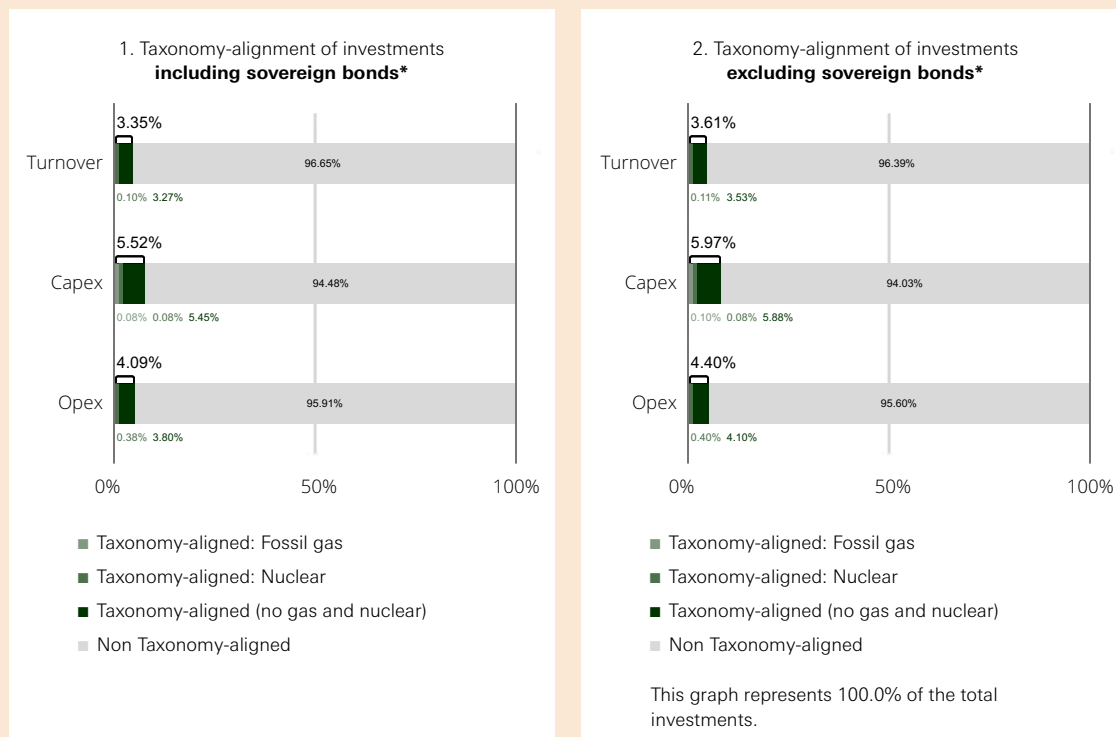

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 2.03%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.10%	0.21%	0.30%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.27%	6.02%	3.52%
Revenue - Non Taxonomy-aligned	96.65%	93.77%	96.19%
CAPEX - Taxonomy-aligned: Fossil gas	0.08%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.08%	0.17%	0.56%
CAPEX - Taxonomy-aligned (no gas and nuclear)	5.45%	8.76%	4.96%
CAPEX - Non Taxonomy-aligned	94.48%	91.07%	94.49%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.38%	0.29%	0.88%
OPEX - Taxonomy-aligned (no gas and nuclear)	3.80%	7.42%	4.46%
OPEX - Non Taxonomy-aligned	95.91%	92.28%	94.67%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 37.66%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in issuers with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO HIGH YIELD BOND

Legal Entity Identifier: T0V7HE6AJ96APO3LYL24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.04% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	94.17	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.84	6.54
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.75%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - ICE BofA Euro High Yield BB-B Rated Constrained Index

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	94.17	NA
	31 March 2025	97.42	NA
	31 March 2024	86.50	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.84	6.54
	31 March 2025	7.38	6.46
	31 March 2024	7.45	6.25
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.75%
	31 March 2025	0.00%	1.40%
	31 March 2024	0.00%	1.55%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	111.13	141.42
	31 March 2025	98.00	124.79
	31 March 2024	134.43	159.88
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.75%
	31 March 2025	0.00%	1.40%
	31 March 2024	0.00%	1.55%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - ICE BofA Euro High Yield BB-B Rated Constrained Index

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Lorca Telecom Bondco Sa 5.75% 30-apr-2029	Communication Services	3.10%	Spain

Cash and derivatives were excluded

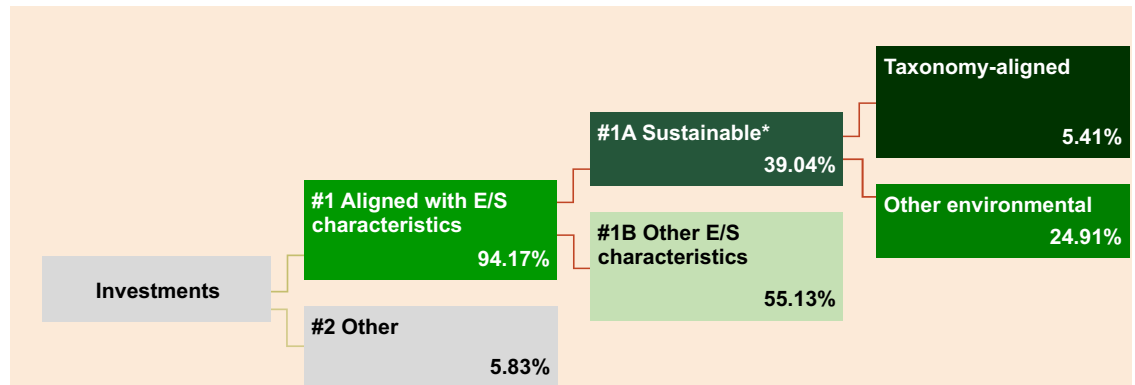

What was the proportion of sustainability-related investments?

39.04% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	35.82%
Utilities	16.90%
<i>Electric Utilities</i>	13.39%
<i>Independent Power Producers & Energy Traders</i>	0.46%
<i>Multi-Utilities</i>	1.59%

Industrials	9.80%
Real Estate	5.11%
Government	4.73%
Materials	4.47%
Consumer Discretionary	4.29%
Health Care	4.18%
Energy	1.10%
<i>Oil & Gas Equipment & Services</i>	0.74%
Consumer Staples	0.71%
Other	0.38%
Cash & Derivatives	-2.46%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 5.41%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

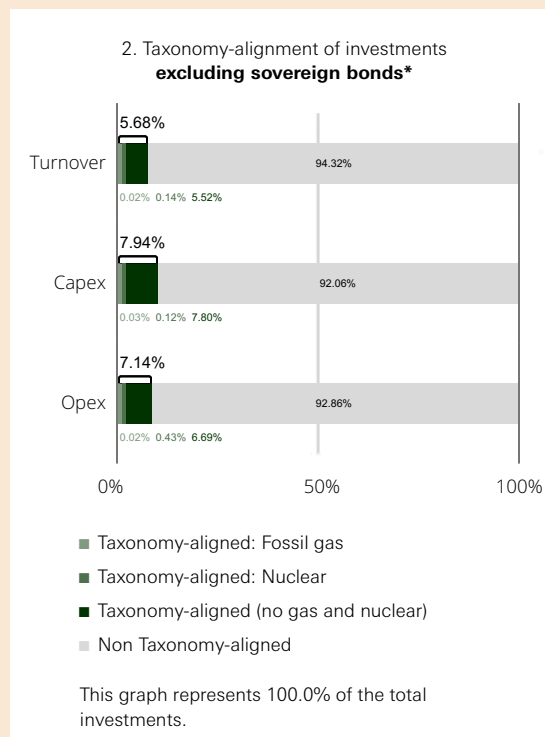

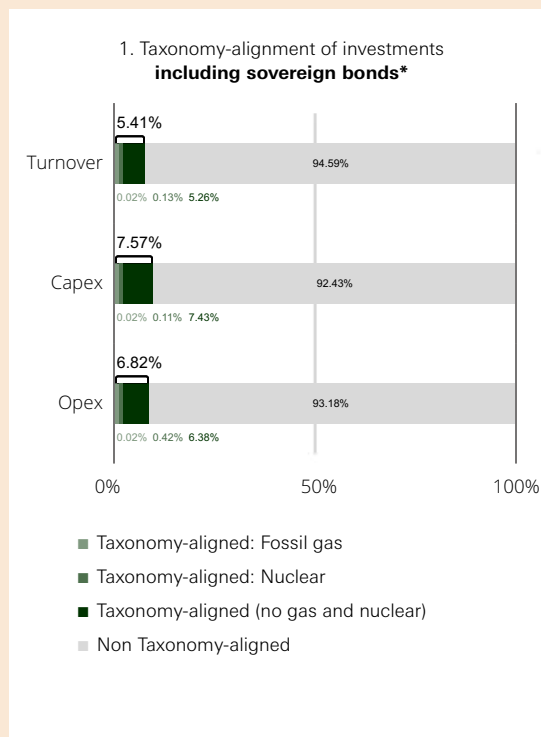

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 3.85%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.02%	0.02%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.13%	0.34%	0.15%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.26%	5.55%	2.75%
Revenue - Non Taxonomy-aligned	94.59%	94.09%	97.10%
CAPEX - Taxonomy-aligned: Fossil gas	0.02%	0.09%	0.01%
CAPEX - Taxonomy-aligned: Nuclear	0.11%	0.27%	0.29%
CAPEX - Taxonomy-aligned (no gas and nuclear)	7.43%	7.93%	2.99%
CAPEX - Non Taxonomy-aligned	92.43%	91.71%	96.71%
OPEX - Taxonomy-aligned: Fossil gas	0.02%	0.03%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.42%	0.40%	0.45%
OPEX - Taxonomy-aligned (no gas and nuclear)	6.38%	6.32%	3.12%
OPEX - Non Taxonomy-aligned	93.18%	93.25%	96.43%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 24.91%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in issuers with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark.

The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL BOND

Legal Entity Identifier: 2138003JMNNOHPVAFG48

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ Yes ☐ It made sustainable investments with an environmental objective: _% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: _%	☒ ☐ No ☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.59% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact (“UNGC”) and OECD Guidelines for Multinational Enterprises (“OECD”) principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC’s proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund’s portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	97.49	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.23	6.01
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.50%	0.35%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	97.49	NA
	31 March 2025	96.83	NA
	31 March 2024	92.46	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.23	6.01
	31 March 2025	6.44	6.00
	31 March 2024	6.22	5.95
Responsible business practice in line with UNGC and OECD principles

	31 March 2024	0.00%	0.01%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	166.90	179.48
	31 March 2025	158.93	118.91
	31 March 2024	160.26	171.20
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.50%	0.35%
	31 March 2025	0.31%	0.16%
	31 March 2024	0.35%	0.12%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.01%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	222.82	215.15
	31 March 2025	224.56	13.71
	31 March 2024	355.93	349.49

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country

Cash and derivatives were excluded

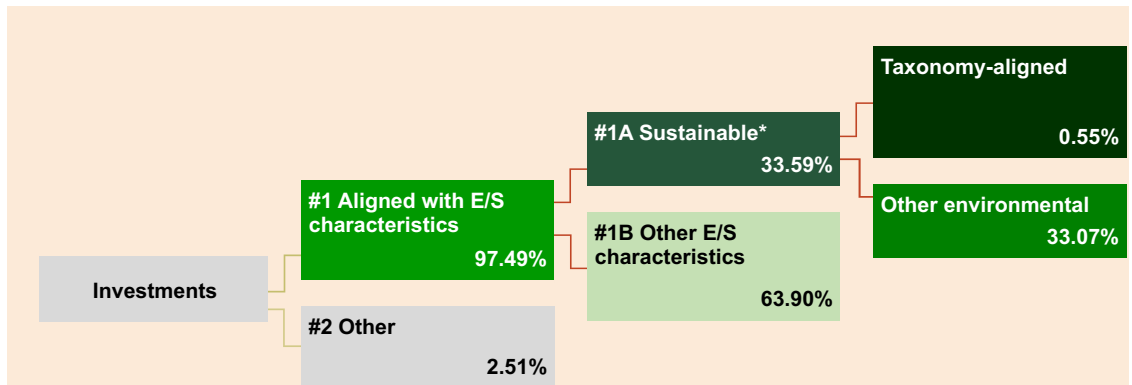

What was the proportion of sustainability-related investments?

33.59% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.55%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.31%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.06%	0.11%	0.09%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.51%	1.40%	0.48%
Revenue - Non Taxonomy-aligned	99.45%	98.49%	99.42%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.07%	0.12%	0.17%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.00%	1.79%	0.77%
CAPEX - Non Taxonomy-aligned	98.95%	98.13%	99.05%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.09%	0.17%	0.27%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.74%	1.56%	0.76%
OPEX - Non Taxonomy-aligned	99.22%	98.31%	98.97%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 33.07%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in issuers with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores comparable to the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL BOND TOTAL RETURN

Legal Entity Identifier: 213800AEAJMQQ76VRI57

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 18.06% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	92.57	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.81	6.01
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.98%	0.35%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	92.57	NA
	31 March 2025	95.40	NA
	31 March 2024	80.95	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.81	6.01
	31 March 2025	7.11	NA
	31 March 2024	6.87	NA
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.98%	0.35%
	31 March 2025	0.98%	0.00%
	31 March 2024	0.07%	0.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	164.28	179.38
	31 March 2025	137.90	NA
	31 March 2024	159.15	NA
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.98%	0.35%
	31 March 2025	0.98%	NA
	31 March 2024	0.07%	NA
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	NA
	31 March 2024	0.00%	NA
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	272.30	215.15
	31 March 2025	249.33	NA
	31 March 2024	401.74	NA

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of China 1.67% 25-may-2035	Government	1.09%	China

Cash and derivatives were excluded

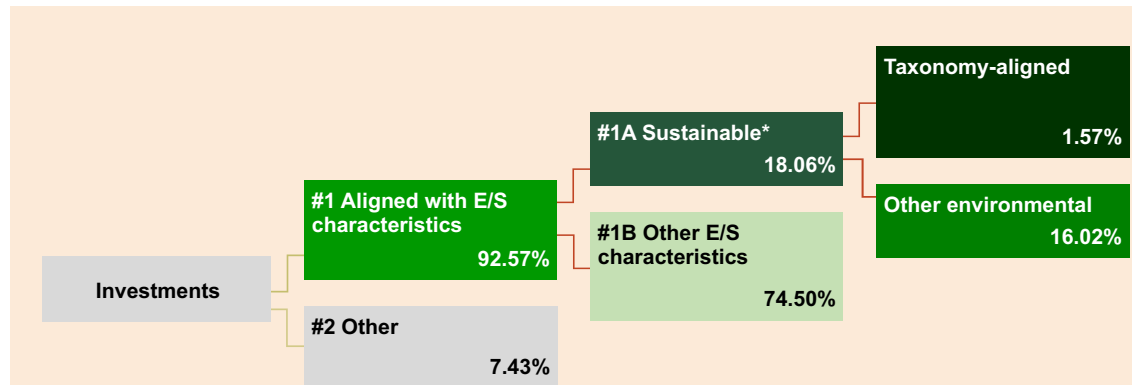

What was the proportion of sustainability-related investments?

18.06% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	38.86%
Other	11.99%
Government	9.14%
Utilities	8.14%

Cash & Derivatives	1.83%
Consumer Staples	1.46%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.57%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

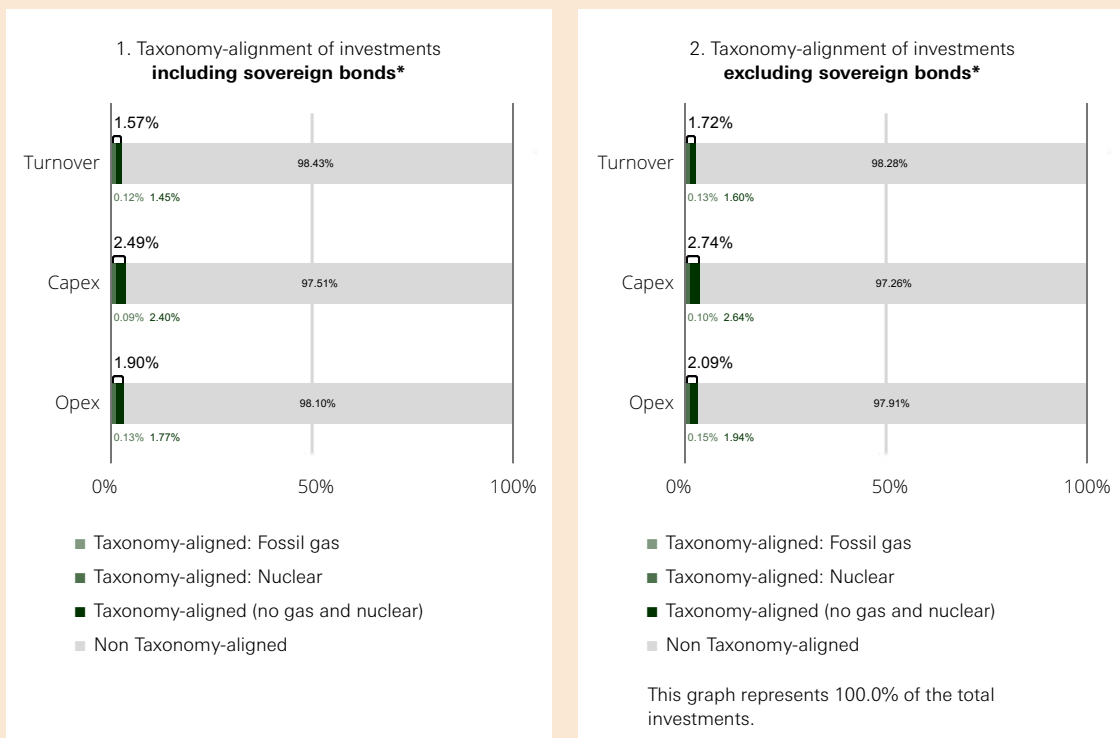

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.75%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.12%	0.21%	0.33%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.45%	2.76%	3.15%
Revenue - Non Taxonomy-aligned	98.43%	97.03%	96.52%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.09%	0.17%	0.61%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.40%	4.13%	4.72%
CAPEX - Non Taxonomy-aligned	97.51%	95.70%	94.66%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.13%	0.25%	0.97%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.77%	3.42%	4.28%
OPEX - Non Taxonomy-aligned	98.10%	96.34%	94.75%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 16.02%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to, banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production.

The sub-fund also assessed ESG scores resulting in an ESG score higher than the weighted average of the ESG score of the benchmark throughout the reporting period. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

The Reference Benchmark was updated during the reporting period and therefore no data for prior periods is available.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL CORPORATE BOND

Legal Entity Identifier: 549300OIOBSL9ETYLK03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● ☐ Yes

It made **sustainable investments**
with an environmental objective:
_ %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments** with a social objective: **%**

☒ ☐ ☒ **No**

✓ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.26% of sustainable investments

- ✓ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

- ✓ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	Fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	95.06	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.03	6.89
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.80%	1.15%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate Corporates

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	Fund	Reference Benchmark

Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	95.06	NA
	31 March 2025	98.16	NA
	31 March 2024	96.70	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.03	6.89
	31 March 2025	7.22	7.17
	31 March 2024	7.25	7.19
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.80%	1.15%
	31 March 2025	0.98%	0.19%
	31 March 2024	0.66%	0.35%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.18%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	Fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	178.08	173.79
	31 March 2025	97.51	94.13
	31 March 2024	73.68	98.87
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.80%	1.15%
	31 March 2025	0.98%	0.19%
	31 March 2024	0.66%	0.35%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.18%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate Corporates

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Southwestern Public Service Company 5.3% 15-may-2035	Utilities	0.79%	United States of America
Dell International Llc 4.75% 06-oct-2032	Information Technology	0.65%	United States of America

Corebridge Financial, Inc. 4.9% 03-dec-2029	Financials	0.44%	United States of America

Cash and derivatives were excluded

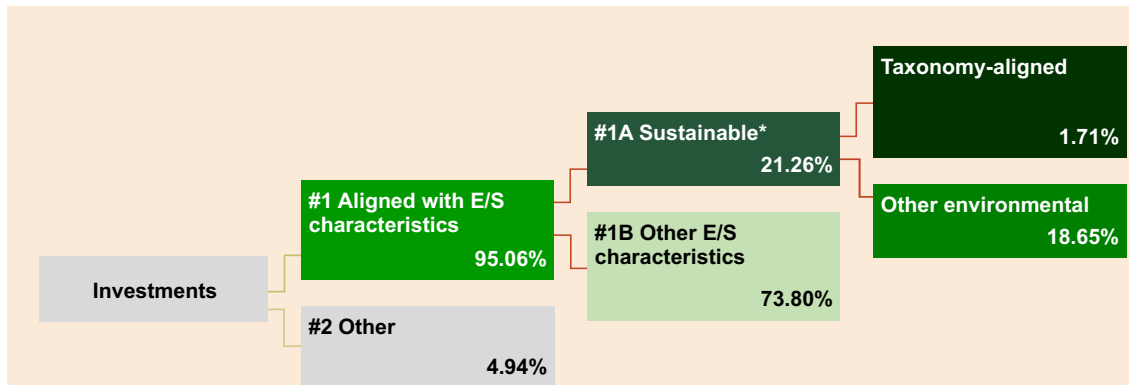

What was the proportion of sustainability-related investments?

21.26% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	43.03%
Utilities	10.25%
<i>Electric Utilities</i>	7.34%
<i>Gas</i>	0.78%
<i>Independent Power Producers & Energy Traders</i>	0.01%
<i>Multi-Utilities</i>	1.32%
Communication Services	6.59%
Industrials	6.03%
Consumer Discretionary	5.84%
Real Estate	5.07%
Information Technology	4.54%
Health Care	3.87%
Consumer Staples	3.70%
Government	3.56%
Other	3.08%
Energy	2.03%
<i>Integrated Oil & Gas</i>	0.96%
<i>Oil & Gas Equipment & Services</i>	0.33%
<i>Oil & Gas Exploration & Production</i>	0.11%
<i>Oil & Gas Refining & Marketing</i>	0.01%
<i>Oil & Gas Storage & Transportation</i>	0.61%
Cash & Derivatives	1.22%
Materials	1.21%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 1.71%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

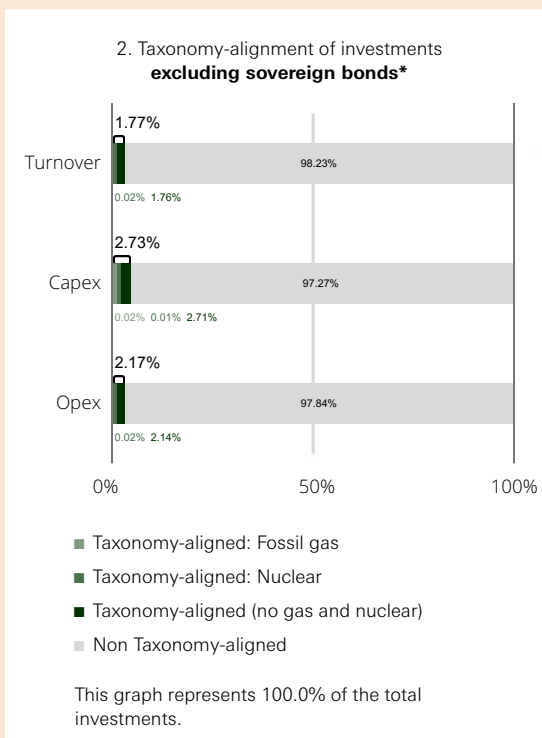

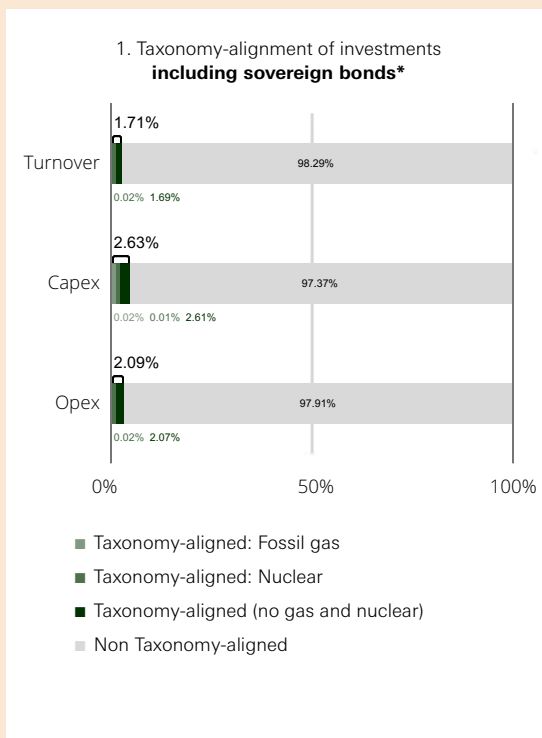

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.86%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.02%	0.06%	0.03%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.69%	2.16%	1.76%
Revenue - Non Taxonomy-aligned	98.29%	97.78%	98.21%
CAPEX - Taxonomy-aligned: Fossil gas	0.02%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.04%	0.05%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.61%	3.22%	3.23%
CAPEX - Non Taxonomy-aligned	97.37%	96.73%	96.72%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.02%	0.06%	0.08%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.07%	2.85%	2.83%
OPEX - Non Taxonomy-aligned	97.91%	97.08%	97.08%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 18.65%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in a PAI score comparable with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

- Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

- Not applicable.

How did this financial product perform compared with the reference benchmark?

- Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EMERGING MARKETS ESG BOND

Legal Entity Identifier: 213800GKT3144FMKDN91

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 45.63% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("HSBC Excluded Activities") and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities")

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	93.12	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	4.59	3.86
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	170.07	382.53
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	2.88%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan EMBI Global Diversified (the parent Reference Benchmark, rather than the ESG version of this Benchmark as noted in the pre-contractual document, as the parent Reference Benchmark is appropriate for this sub-fund.

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	93.12	NA
	31 March 2025	87.50	NA
	31 March 2024	99.41	NA

ESG score (third-party score)	31 March 2026	4.59	3.86
	31 March 2025	4.71	3.94
	31 March 2024	4.71	4.24
Consideration of lower carbon intensity investments			
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	170.07	382.53
	31 March 2025	127.35	388.45
	31 March 2024	374.23	94.05

Responsible business practice in line with UNGC and OECD principles

Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	2.88%
	31 March 2025	0.00%	4.36%
	31 March 2024	0.00%	1.38%

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	170.07	382.53
	31 March 2025	127.35	388.45
	31 March 2024	374.23	94.05
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	2.88%
	31 March 2025	0.00%	4.36%
	31 March 2024	0.00%	1.38%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan EMBI Global Diversified

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country

Cash and derivatives were excluded

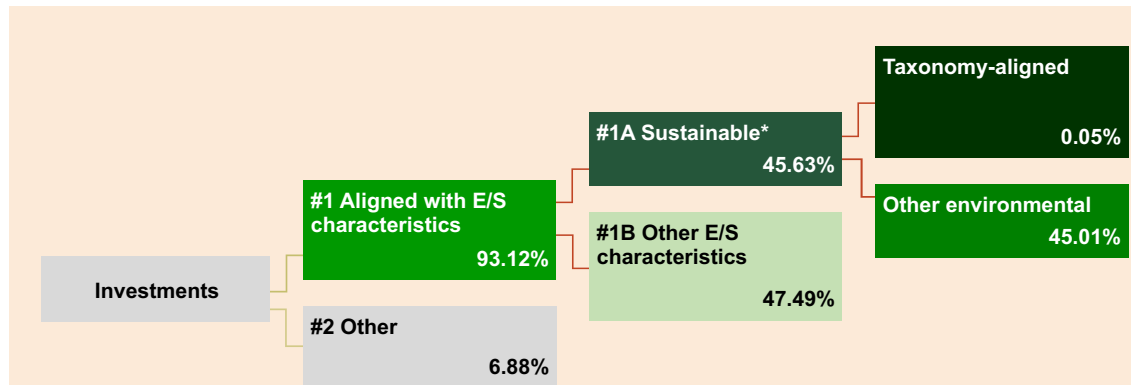

What was the proportion of sustainability-related investments?

45.63% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Government	77.28%
Financials	10.61%
Materials	4.34%
Utilities	3.03%
Electric Utilities	1.03%
Independent Power Producers & Energy Traders	0.30%
Industrials	2.21%
Consumer Staples	1.11%
Consumer Discretionary	0.73%
Real Estate	0.55%
Other	0.42%
Communication Services	0.09%
Cash & Derivatives	-0.38%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.05%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.05%	0.01%	0.00%
Revenue - Non Taxonomy-aligned	99.95%	99.99%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.07%	0.04%	0.00%
CAPEX - Non Taxonomy-aligned	99.93%	99.96%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.09%	0.10%	0.00%
OPEX - Non Taxonomy-aligned	99.91%	99.90%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 45.01%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score better the benchmark throughout the reporting period. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
☒ Yes	☐ No
☒ It made sustainable investments with an environmental objective :100% ☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: _%	☐ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund aimed to make a positive environmental, social and governance (“ESG”) effect, by investing in fixed income (e.g. bonds) and other similar securities issued by companies/issuers that contributed to United Nations Sustainable Development Goals (“Contributing Companies/Issuers” and “SDGs”), while also aiming to provide long term total return.

During the financial year ended 31 March 2026, the sustainable investment objectives promoted by this sub-fund were:

- Investment into a portfolio of fixed income securities issued by Contributing Companies/ Issuers that contributed to SDGs including, but not limited to, Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.
- The identification and analysis of a Contributing Company/Issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.

3. Consideration of lower carbon intensity investments compared to the JP Morgan Corporate EMBI Broad Diversified the ("Parent Benchmark").
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles are identified, Contributing Companies/Issuers will be subject to the HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

● ***How did the sustainability indicators perform?***

Sustainability Indicator	Sub-fund	Reference Benchmark
Consideration of SDGs	All investments, with the exception of cash, were aligned with one or more SDGs	
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.70	5.64
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	115.77	368.63
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	3.00%
Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan CEMBI Broad Diversified

	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The sustainable investments in the sub-fund were assessed against the principle of 'do no significant harm' ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser used third-party research providers to monitor contributing Contributing Companies/Issuers for controversies which indicated potential breaches of the UNGC principles. Contributing Companies/Issuers that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	Sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	7,537.74	75,310,503.86
	31 March 2025	11,655.93	81,468,506.78
	31 March 2024	13,837.33	73,735,494.55
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	57.85	176.44
	31 March 2025	91.22	198.61
	31 March 2024	132.82	159.28
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	115.77	368.63
	31 March 2025	138.35	397.01
	31 March 2024	194.11	522.00
4. Exposure to companies active in the fossil fuel sector	31 March 2026	2.86%	21.43%
	31 March 2025	6.18%	22.91%
	31 March 2024	0.00%	0.00%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 March 2026	2.45	39.28
	31 March 2025	0.00	39.97
	31 March 2024	0.00	0.00
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 March 2026	0.88	1.68
	31 March 2025	0.94	0.16
	31 March 2024	0.00	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	3.00%
	31 March 2025	0.00%	2.91%
	31 March 2024	0.00%	3.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan CEMBI Broad Diversified

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Hta Group Ltd. (mauritius) 7.5% 04-jun-2029	Industrials	2.73%	Tanzania, United Republic of

Real Estate	8.78%
Materials	8.16%
Health Care	1.38%
Consumer Discretionary	1.27%
Government	1.09%
Consumer Staples	0.98%
Cash & Derivatives	-0.63%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.06%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

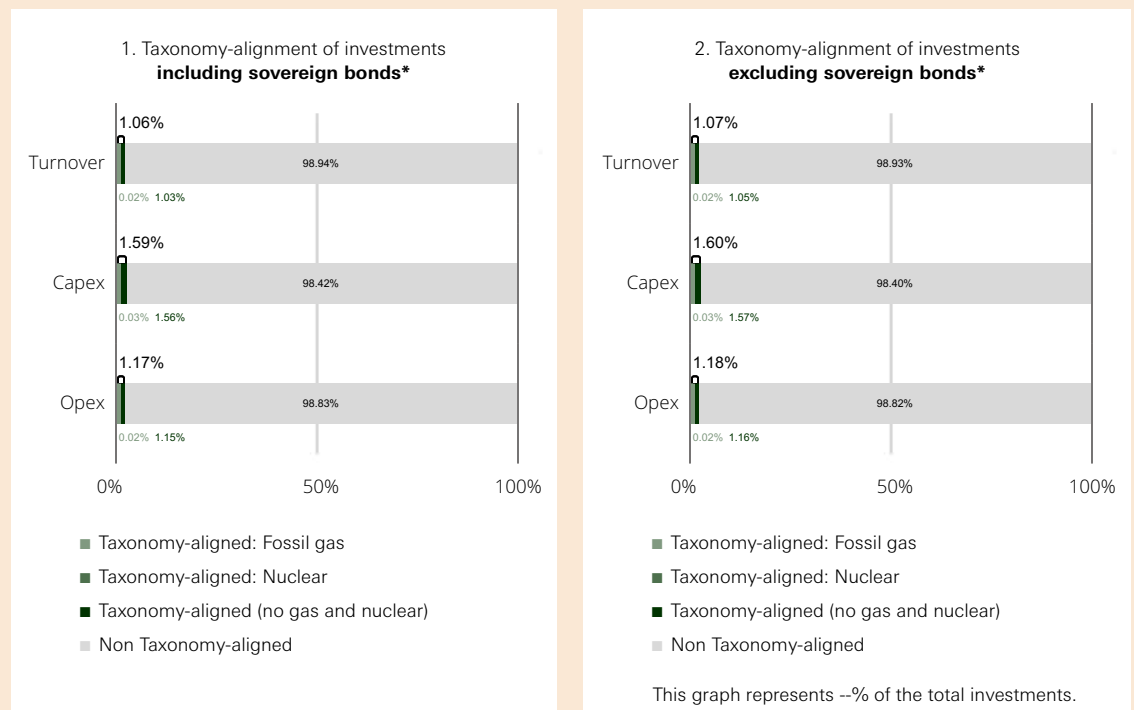

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the fund's share of investment in transitional activities was 0.10% and the share of investment in enabling activities was 0.30%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

● *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.02%	0.01%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.03%	0.85%	0.63%
Revenue - Non Taxonomy-aligned	98.94%	99.14%	99.69%
CAPEX - Taxonomy-aligned: Fossil gas	0.03%	0.04%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	98.42%	98.60%	99.92%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.56%	1.37%	0.16%
OPEX - Taxonomy-aligned: Fossil gas	0.02%	0.01%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.15%	1.01%	0.51%
OPEX - Non Taxonomy-aligned	98.83%	98.98%	99.74%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 98.15% in sustainable investments, with an environmental objective that was not aligned with the EU Taxonomy. HSBC did not commit to having EU Taxonomy aligned investments due to the lack of coverage and data available.

What was the share of socially sustainable investments?

The sub-fund invested into a portfolio of fixed income securities issued by Contributing Companies/ Issuers that actively contributed to the UNSDGs and therefore considered social elements of investments, namely Good Health and Well-Being, Gender Equality, Decent Work and Economic Growth and Reduced Inequalities. However, these social UNSDGs were considered in conjunction with environmental UNSDGs and so it is not possible to provide a separate proportion of socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund may have invested in money market funds or liquid assets (ancillary liquid assets, bank deposits and money market instruments) for liquidity management purposes. Financial derivative instruments may have also been used for efficient portfolio management. These financial instruments may not have qualified as sustainable investments. In some instances, investments may have been included under #2 Not Sustainable due to corporate actions and/or non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with sustainable investment objective within the sub-fund and did not have any minimum environmental or social safeguards applied. However, money market funds which met the requirements of Article 8 SFDR were deemed to have minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The sub-fund delivered positive environmental impact through integrated sustainability analysis and continuous engagement with emerging market issuers. This credit-intensive strategy focused on rigorous credit research and engagement, leveraging HSBC Asset Management's robust emerging market debt investment platform and top tier credit and responsible investment analyst teams. The sub-fund is an SFDR Article 9 sub-fund with a specific sustainability objective: it aimed to help positive change and measurable impact in emerging markets, comprised of countries that represented some of the largest carbon emitters in the world.

The sustainability assessment was at the core of the strategy's investment process. The bottom-up investment process selected corporate issuers based on rigorous fundamental analysis and a forward-looking, integrated Sustainability Assessment which aimed to:

1. evaluate a Contributing Company/Issuer's current sustainability plans and challenges
2. track the Contributing Company/Issuer's ongoing sustainability progress based on ESG data and engagement
3. measure the Contributing Company/Issuer's positive change and impact achievements

The Sustainability Assessment was completed by credit research and RI team members, with issuers names presented to the Fixed Income ESG Committee for approval. A dedicated credit analyst was assigned to each Contributing Company/Issuer name where they sought sufficient transparency, ESG data & willingness to engage. On the basis of our engagement, sustainability analysis and screening, we focused on Contributing Company/Issuers that had clear sustainability objectives and that are showed progress in achieving them. This selection process eliminated approximately 85% of the overall emerging markets corporate universe (≈810 Contributing Company/Issuers).

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable for this sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable for this sub-fund.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The attainment of the sustainable investment objective was measured using sustainable indicators, some of which were measured against the Parent Benchmark for the sub-fund. However, this benchmark was not been designated for the purpose of achieving the sustainable investment objective promoted by the sub-fund.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EMERGING MARKETS ESG LOCAL DEBT

Legal Entity Identifier: 54930054ELQ4UKC2EY24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.71% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. Consideration of lower carbon intensity investments.
3. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities")

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	99.81	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	5.30	4.22
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	226.49	293.66
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan GBI-EM Global Diversified

Please note that the pre-contractual document for this sub-fund makes reference to PAI 3 - Greenhouse gas intensity of investee companies, but PAI 15 - Greenhouse gas intensity for sovereign issuers has been used for this report as it is more appropriate for this sub-fund.

...and compared to previous periods?

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	99.81	NA
	31 March 2025	98.40	NA
	31 March 2024	99.22	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	5.30	4.22
	31 March 2025	5.53	4.34
	31 March 2024	5.43	4.60
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	226.49	293.66
	31 March 2025	232.91	304.09
	31 March 2024	271.70	322.93

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	226.49	293.66
	31 March 2025	232.91	304.09
	31 March 2024	271.70	322.93

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan GBI-EM Global Diversified

Please note that the pre-contractual document for this sub-fund makes reference to PAI 3 - Greenhouse gas intensity of investee companies, but PAI 15 - Greenhouse gas intensity for sovereign issuers has been used for this report as it is more appropriate for this sub-fund.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of South Africa 9.0% 31-jan-2040	Government	3.56%	South Africa

Government Of Romania 5.8% 26-jul-2027	Government	1.68%	Romania

Cash and derivatives were excluded

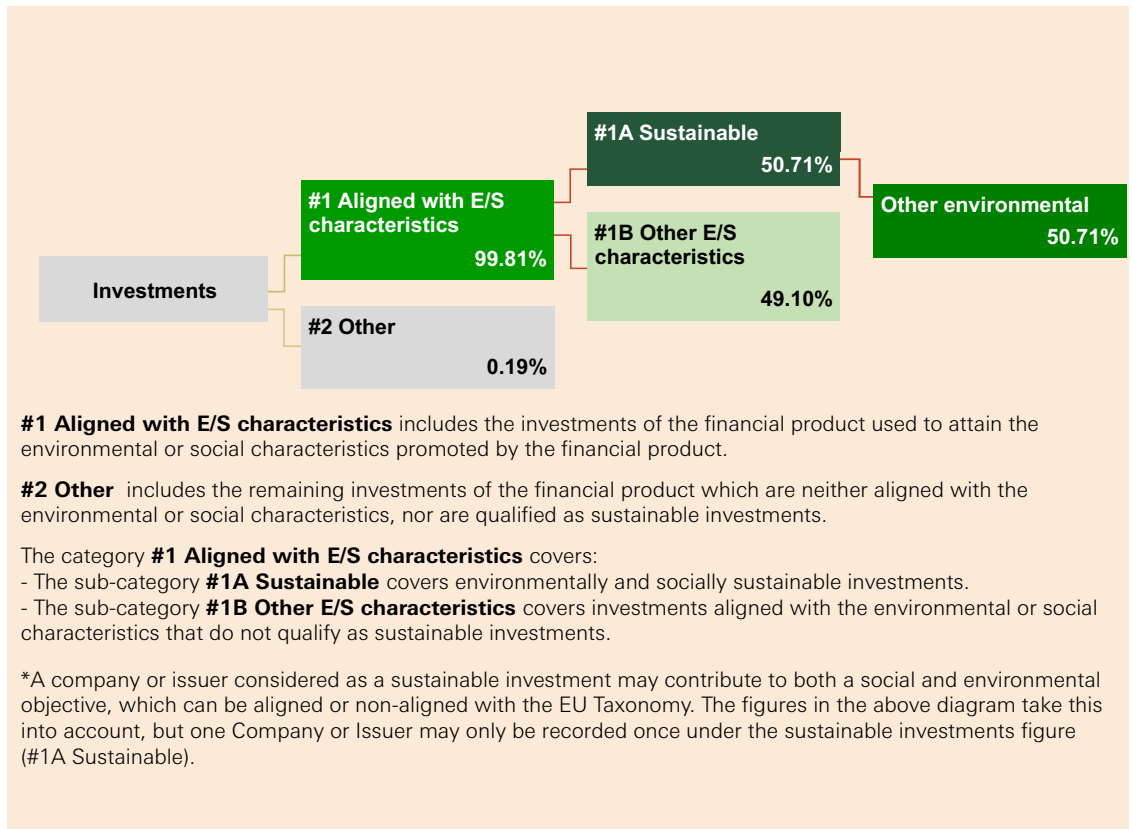

What was the proportion of sustainability-related investments?

50.71% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Government	99.96%
Cash & Derivatives	0.10%
Financials	-0.01%
Other	-0.06%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

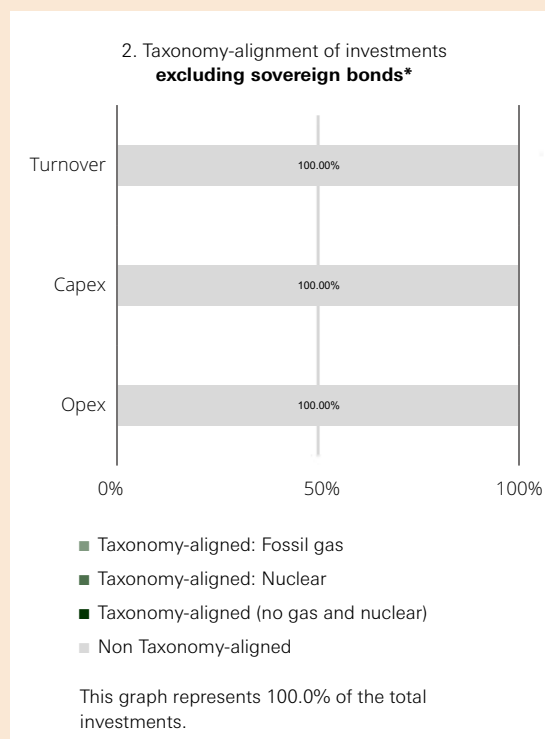

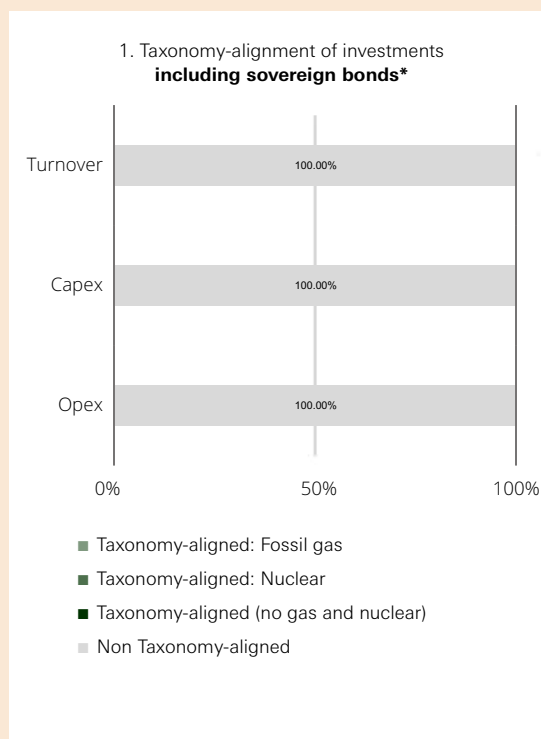

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 50.71%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL ESG CORPORATE BOND

Legal Entity Identifier: 213800GRNWXQGN3QZK39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

It made **sustainable investments**
with an environmental objective:
%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

☒ ☐ ☐ ☐ **No**

✓ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.06% of sustainable investments

- ✓ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	94.56	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.60	6.89
Consideration of lower carbon intensity investments		
GHG Emissions - Metric tons CO2 equivalents	2,973.37	551,858.39
Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	25.98	54.81
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	78.63	173.79
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.15%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Barclays Global Aggregate Corporate Total Return Index Hedged USD

Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.15%
	31 March 2025	0.40%	0.15%
	31 March 2024	0.00%	0.28%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.18%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	2,973.37	551,858.39
	31 March 2025	2,947.67	272,715.18
	31 March 2024	3,377.35	499,257.46
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	25.98	54.81
	31 March 2025	22.46	52.84
	31 March 2024	22.59	59.10
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	78.63	173.79
	31 March 2025	61.91	93.04
	31 March 2024	62.29	97.25
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.15%
	31 March 2025	0.40%	0.15%
	31 March 2024	0.00%	0.28%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.18%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Barclays Global Aggregate Corporate Total Return Index Hedged USD

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Motorola Solutions, Inc. 5.2% 15-aug-2032	Information Technology	0.90%	United States of America

Cash and derivatives were excluded

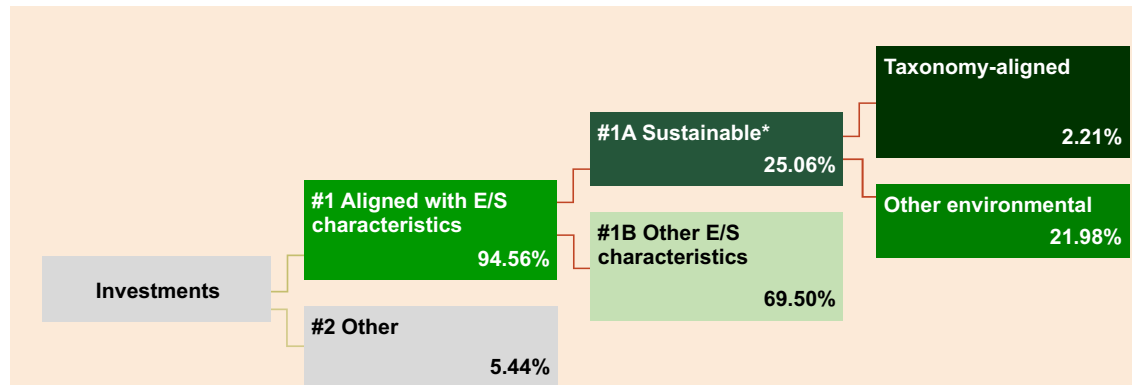

What was the proportion of sustainability-related investments?

25.06% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	45.38%
Utilities	7.40%
<i>Electric Utilities</i>	5.59%
<i>Gas</i>	0.17%
<i>Independent Power Producers & Energy Traders</i>	0.02%

Materials	1.33%
Other	0.57%
Energy	0.49%
<i>Integrated Oil & Gas</i>	0.15%
<i>Oil & Gas Equipment & Services</i>	0.32%
<i>Oil & Gas Exploration & Production</i>	0.02%
<i>Oil & Gas Refining & Marketing</i>	0.01%
<i>Oil & Gas Storage & Transportation</i>	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 2.21%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☒

Yes:

☐

In fossil gas

☒

In nuclear energy

☐

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

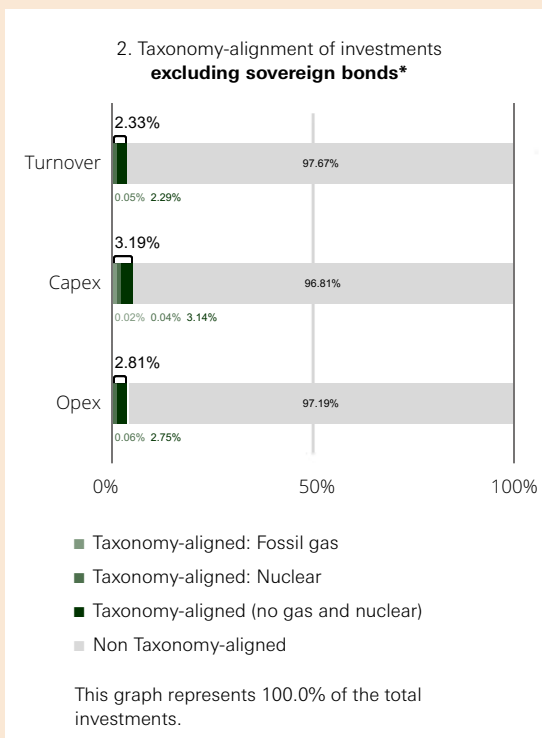

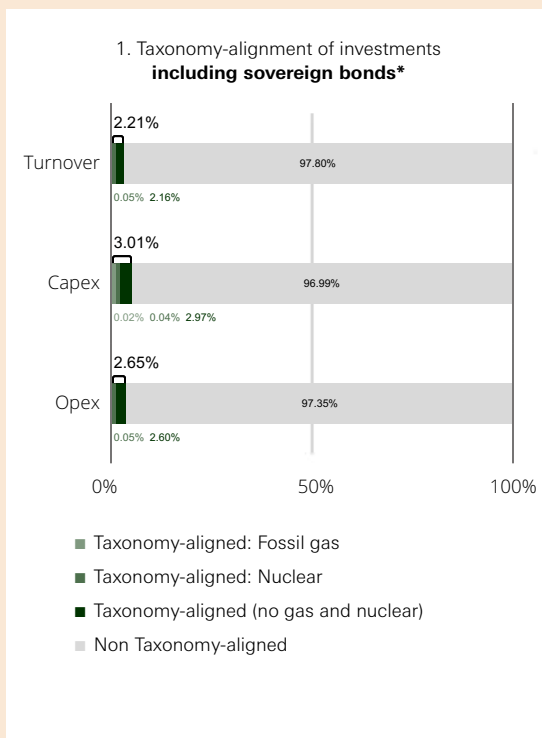

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.41%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.05%	0.10%	0.06%
Revenue - Taxonomy-aligned (no gas and nuclear)	2.16%	2.54%	1.92%
Revenue - Non Taxonomy-aligned	97.80%	97.36%	98.02%
CAPEX - Taxonomy-aligned: Fossil gas	0.02%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.04%	0.08%	0.12%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.97%	3.53%	3.11%
CAPEX - Non Taxonomy-aligned	96.99%	96.39%	96.78%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.05%	0.12%	0.19%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.60%	3.18%	2.94%
OPEX - Non Taxonomy-aligned	97.35%	96.70%	96.88%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 21.98%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

The sub-fund invested in Investment Grade rated fixed income and other similar securities issued by issuers meeting certain minimum ESG and E, and S and G scores. The sub-fund considered lower carbon intensity investments.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with a higher ESG score than the weighted average of the constituents of the Reference Benchmark and a lower carbon intensity relative to the Reference Benchmark.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL GREEN BOND

Legal Entity Identifier: 213800HHURCXB0G5F376

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/ Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 81.91% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. The analysis of securities that supported climate-related or environmental projects.
2. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
3. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	97.66	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.81	7.10
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.06%
Green Bonds		
Percentage of assets in securities meeting certain green bond principles	99.13%	NA
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI Global Green Bond USD Hedged

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	97.66	NA
	31 March 2025	97.70	NA
	31 March 2024	97.64	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.81	7.10
	31 March 2025	7.69	7.15
	31 March 2024	7.73	7.27
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.06%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
Green Bonds			
Percentage of assets in securities meeting certain green bond principles	31 March 2026	99.13%	NA
	31 March 2025	97.70%	NA
	31 March 2024	99.51%	NA

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.19%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.79%	0.24%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	1.95	123.21
	31 March 2025	9.51	53.90
	31 March 2024	3.40	58.92
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.06%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.19%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.79%	0.24%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI Global Green Bond USD Hedged

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of Germany 2.3% 15-feb-2033	Government	3.58%	Germany
Government Of Germany 2.1% 12-apr-2029	Government	2.89%	Germany

Cash and derivatives were excluded

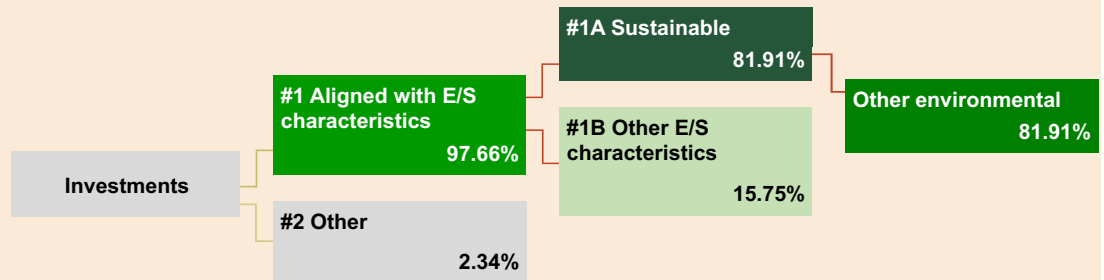

What was the proportion of sustainability-related investments?

81.91% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	34.71%
Government	33.52%
Utilities	15.73%
<i>Electric Utilities</i>	12.31%
<i>Gas</i>	0.97%
<i>Multi-Utilities</i>	2.44%
Real Estate	5.78%
Communication Services	3.71%
Industrials	1.92%
Information Technology	1.26%
Materials	0.98%
Consumer Discretionary	0.94%
Cash & Derivatives	0.74%
Other	0.71%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

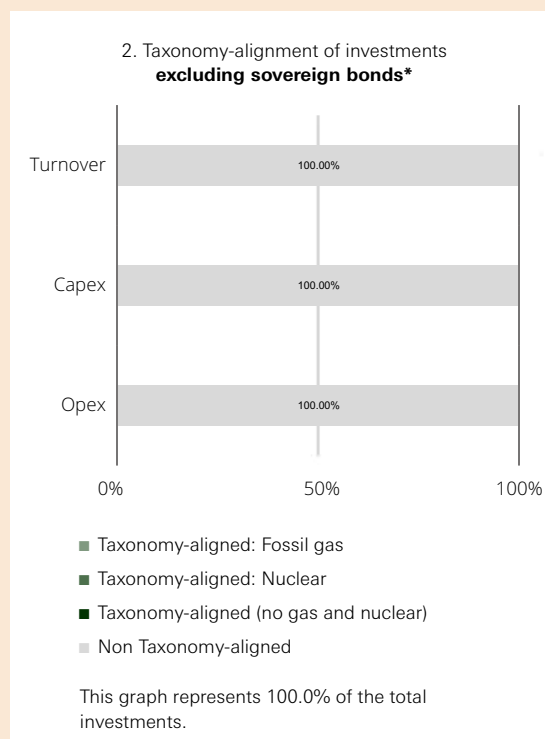

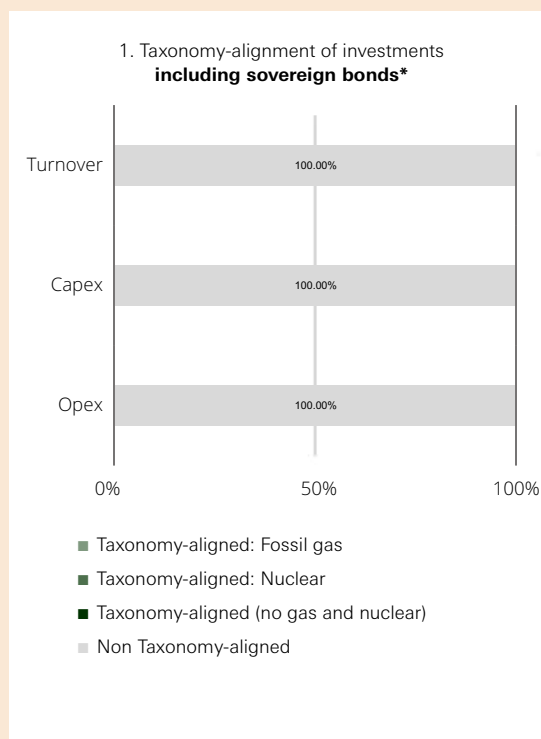

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.12%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.21%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	99.92%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.22%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.35%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	99.86%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.35%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.27%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	99.84%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 81.91%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

The sub-fund assessed ESG scores resulting in an ESG score exceeding the benchmark throughout the reporting period. The Investment Adviser invested 99.13% of the net assets of the sub-fund in securities meeting certain green bond principles. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

All holdings in the portfolio were also assessed for their individual greenhouse gas intensity, resulting in a PAI score well below the benchmark.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL HIGH INCOME BOND

Legal Entity Identifier: 4Z04JLSNEZGELBE69R05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.28% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	88.00	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.17	6.06
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.33%	1.88%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - BMK_HGIF Global High Income Bond

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	88.00	NA
	31 March 2025	89.38	NA
	31 March 2024	93.27	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.17	6.06
	31 March 2025	6.29	6.04
	31 March 2024	6.28	6.00
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.33%	1.88%
	31 March 2025	0.45%	1.97%
	31 March 2024	0.78%	2.16%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.21%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.25%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm (“DNSH”) to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts (“PAIs”).

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of ‘sustainable investments’ within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	184.12	264.71
	31 March 2025	171.78	240.47
	31 March 2024	161.54	259.05
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.33%	1.88%
	31 March 2025	0.45%	1.97%
	31 March 2024	0.78%	2.16%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.21%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.25%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - BMK_HGIF Global High Income Bond

Cash and derivatives were excluded

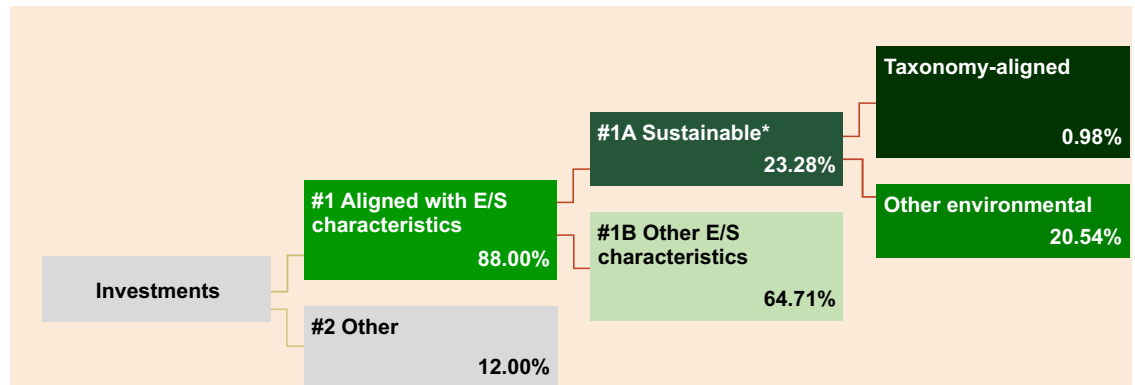

What was the proportion of sustainability-related investments?

23.28% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	27.49%
Government	17.59%
Utilities	8.41%
<i>Electric Utilities</i>	5.79%
<i>Gas</i>	0.12%
<i>Independent Power Producers & Energy Traders</i>	0.87%
<i>Multi-Utilities</i>	1.14%
Communication Services	7.63%
Other	7.53%
Energy	7.17%
<i>Integrated Oil & Gas</i>	2.04%
<i>Oil & Gas Equipment & Services</i>	0.85%
<i>Oil & Gas Exploration & Production</i>	1.52%
<i>Oil & Gas Refining & Marketing</i>	0.62%
<i>Oil & Gas Storage & Transportation</i>	2.14%
Consumer Discretionary	4.66%
Materials	4.51%
Industrials	4.41%
Consumer Staples	2.68%
Real Estate	2.60%
Health Care	2.53%
Information Technology	2.07%
Cash & Derivatives	0.71%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.98%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

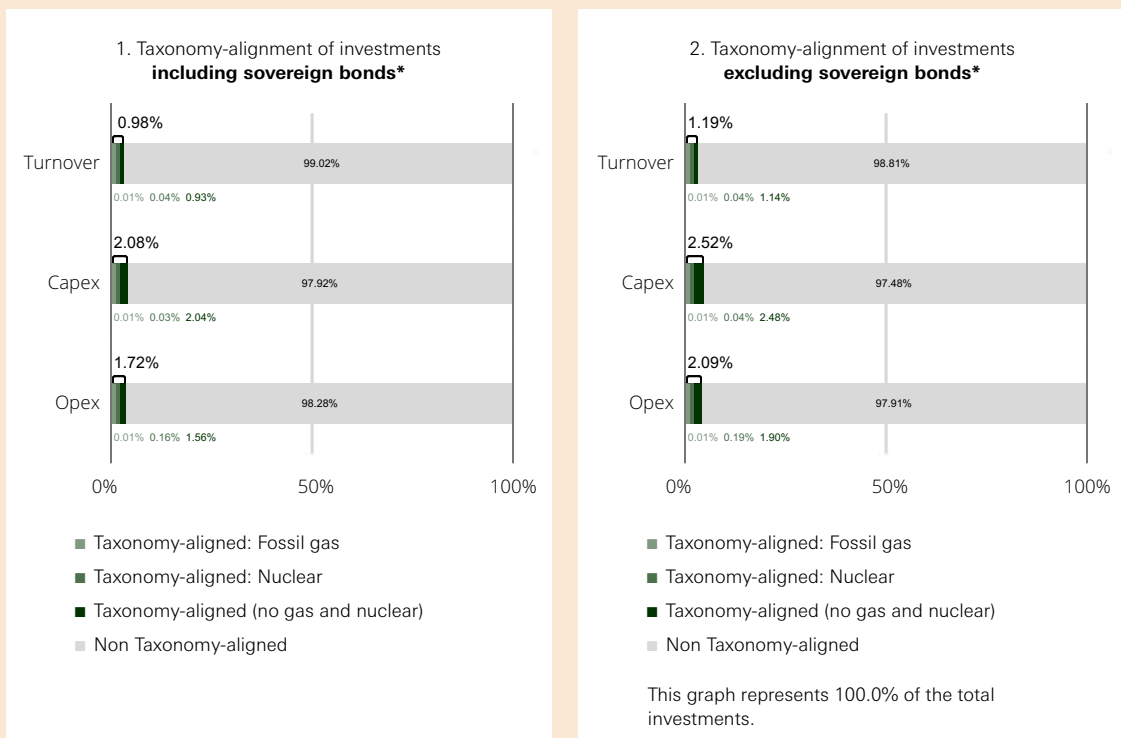

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.53%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.04%	0.00%	0.08%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.93%	1.02%	0.85%
Revenue - Non Taxonomy-aligned	99.02%	98.98%	99.10%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.01%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.03%	0.00%	0.14%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.04%	2.12%	1.39%
CAPEX - Non Taxonomy-aligned	97.92%	97.87%	98.50%
OPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.16%	0.00%	0.22%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.56%	1.66%	1.32%
OPEX - Non Taxonomy-aligned	98.28%	98.34%	98.52%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 20.54%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

- Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

- Not applicable.

How did this financial product perform compared with the reference benchmark?

- Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL HIGH YIELD ESG BOND

Legal Entity Identifier: 21380045AQUJTDLNG49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.07% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("HSBC Excluded Activities") and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	91.80	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.65	5.93
Consideration of lower carbon intensity investments		
GHG Emissions - Metric tons CO2 equivalents	4,207.69	137,103.95
Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	109.66	139.69
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	158.77	255.53
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.16%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	4,207.69	137,103.95
	31 March 2025	2,200.39	143,051.50
	31 March 2024	2,163.21	198,703.51
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	109.66	139.69
	31 March 2025	62.17	143.99
	31 March 2024	67.51	124.21
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	158.77	255.53
	31 March 2025	103.09	247.01
	31 March 2024	131.12	337.95
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.16%
	31 March 2025	0.03%	0.08%
	31 March 2024	0.01%	2.27%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - ICE BofA Rated Developed Markets High Yield Constrained (BB-B)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
HSBC GLF-USD LIQUIDITY-Y 10116567	Other	2.96%	Ireland

Cash and derivatives were excluded

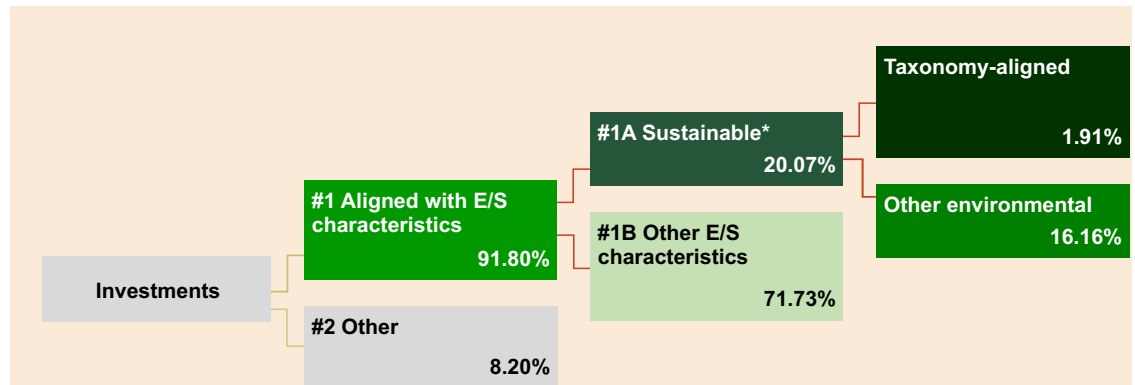

What was the proportion of sustainability-related investments?

20.07% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	15.32%
Consumer Discretionary	14.90%
Communication Services	14.81%
Industrials	14.65%
Materials	9.71%
Health Care	8.39%
Other	5.59%
Utilities	4.94%
Electric Utilities	4.47%
Consumer Staples	3.53%
Real Estate	3.31%
Information Technology	2.47%
Energy	1.32%
Oil & Gas Equipment & Services	1.32%
Government	0.86%
Cash & Derivatives	0.20%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.91%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes:
 ☐ In fossil gas
 ☒ In nuclear energy

☐ No

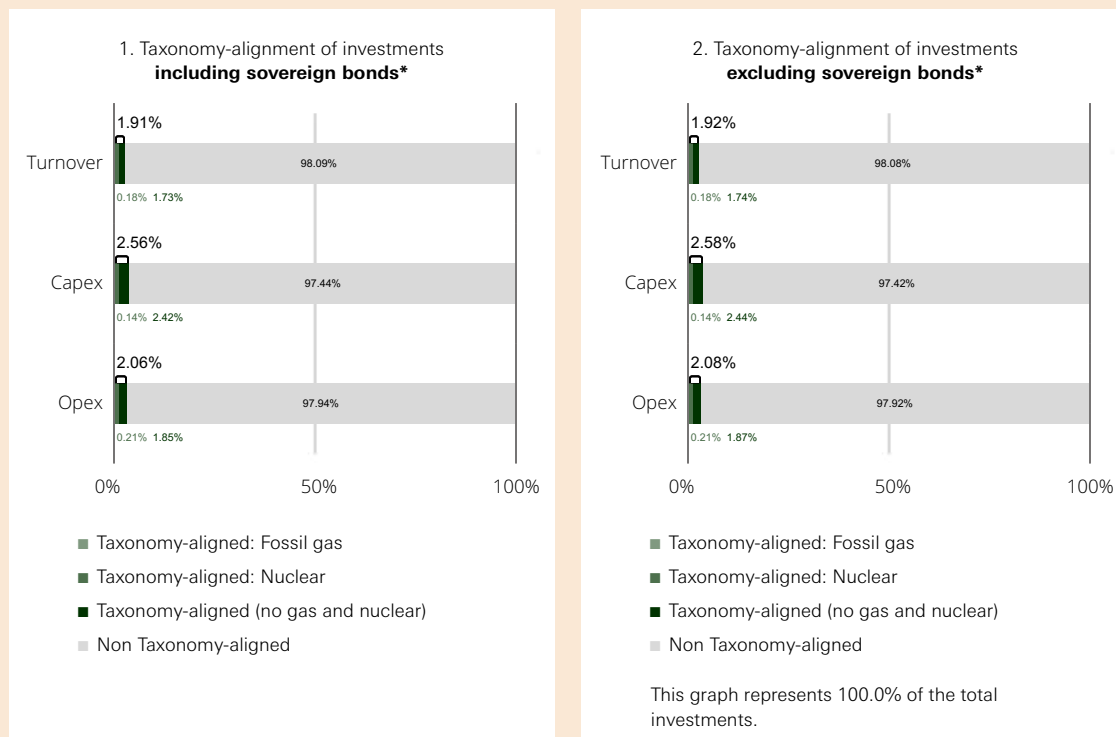

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.34%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.18%	0.13%	0.11%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.73%	1.06%	0.61%
Revenue - Non Taxonomy-aligned	98.09%	98.81%	99.28%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.01%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.14%	0.10%	0.20%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.42%	1.63%	0.95%
CAPEX - Non Taxonomy-aligned	97.44%	98.25%	98.85%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.21%	0.15%	0.32%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.85%	1.34%	0.84%
OPEX - Non Taxonomy-aligned	97.94%	98.51%	98.84%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 16.16%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL HIGH YIELD SECURITISED CREDIT BOND

Legal Entity Identifier: 213800198CU86I7VMN23

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.02% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact (“UNGC”) and OECD Guidelines for Multinational Enterprises (“OECD”) principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC’s proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund’s portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● ***How did the sustainability indicators perform?***

Sustainability Indicator	sub-fund
Minimum ESG standards	
Percentage of the sub-fund aligned with the E/S characteristics	92.35
Identification and analysis of a company's environmental and social factors	
ESG Score	6.46
Responsible business practice in line with UNGC and OECD principles	
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
Excluded Activities	
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

● ***...and compared to previous periods?***

Sustainability Indicator	Period Ending	sub-fund
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	92.35
	31 March 2025	88.93
	31 March 2024	12.30
Identification and analysis of a company's environmental and social factors		
ESG Score	31 March 2026	6.46
	31 March 2025	6.60
	31 March 2024	4.92
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
CORDA 5X DR3 11936496	Financials	2.55%	Ireland

Cash and derivatives were excluded

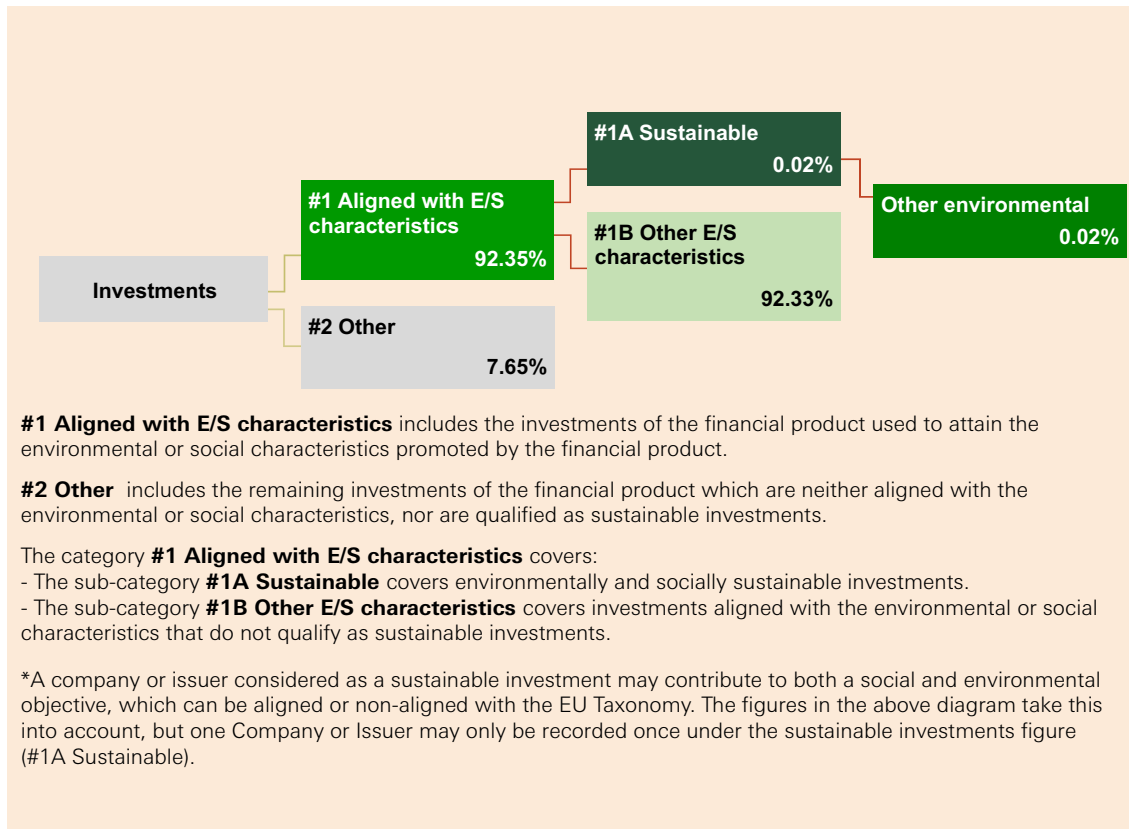

What was the proportion of sustainability-related investments?

0.02% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Other	71.51%
Financials	27.33%
Real Estate	1.51%
Government	0.54%
Cash & Derivatives	-0.89%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

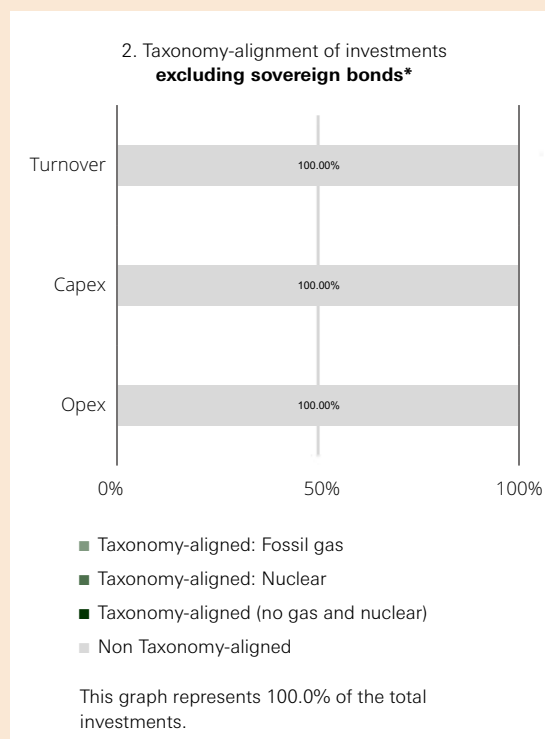

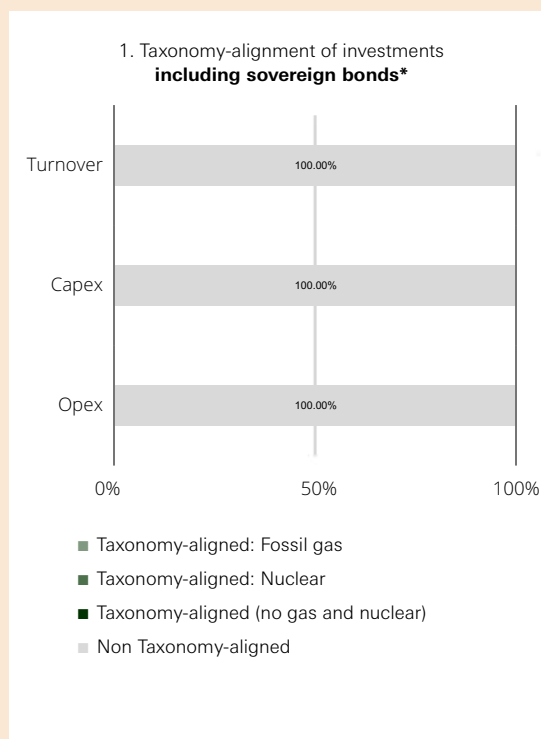

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%

OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0.02%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes ☐ It made sustainable investments with an environmental objective: _% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: _%	☒ ☐ ☒ No ☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60.44% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact (“UNGC”) and OECD Guidelines for Multinational Enterprises (“OECD”) principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC’s proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund’s portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	99.24	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.45	6.07
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - ICE BofA Global Governments - Inflation-Linked

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	99.24	NA
	31 March 2025	99.74	NA
	31 March 2024	99.64	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.45	6.07
	31 March 2025	6.39	6.16
	31 March 2024	6.48	6.17
Responsible business practice in line with UNGC and OECD principles

	31 March 2024	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	4.64	0.00
	31 March 2025	4.29	0.00
	31 March 2024	4.27	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.01%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	169.89	180.35
	31 March 2025	179.49	196.27
	31 March 2024	310.70	307.87

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

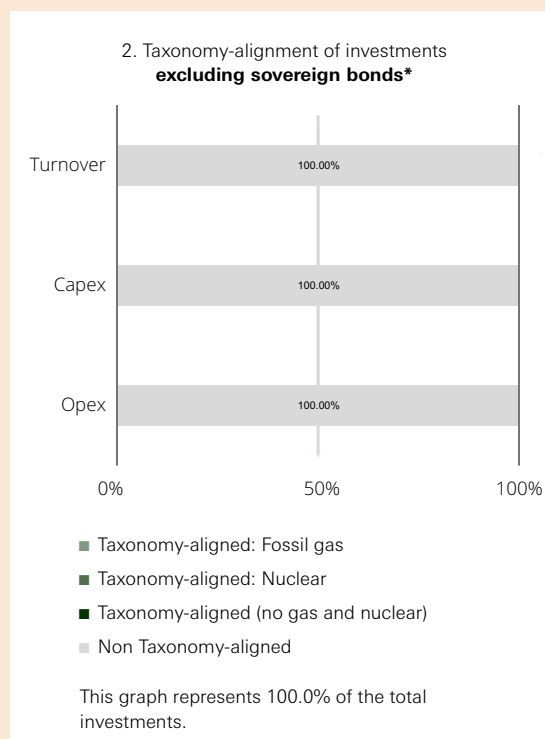

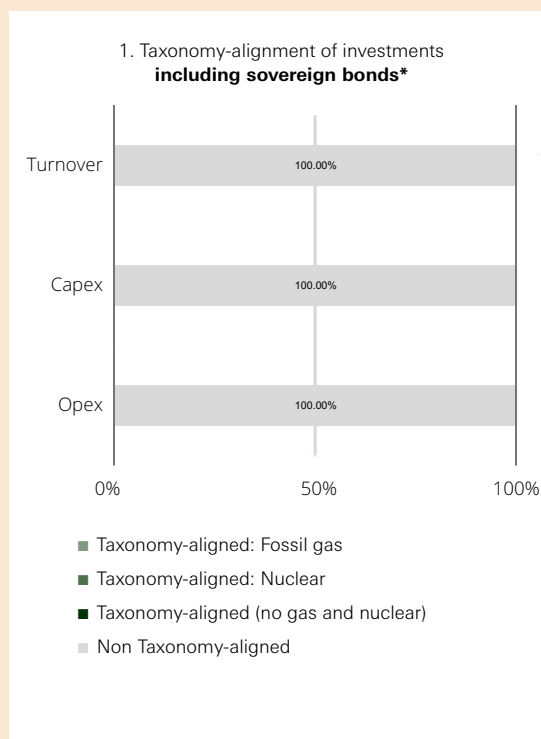

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 60.44%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, issuer's with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production.

The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.02%
	31 March 2024	0.00%

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
VDCDE 2025-1X A2 11914537	Other	0.84%	Luxembourg

Cash and derivatives were excluded

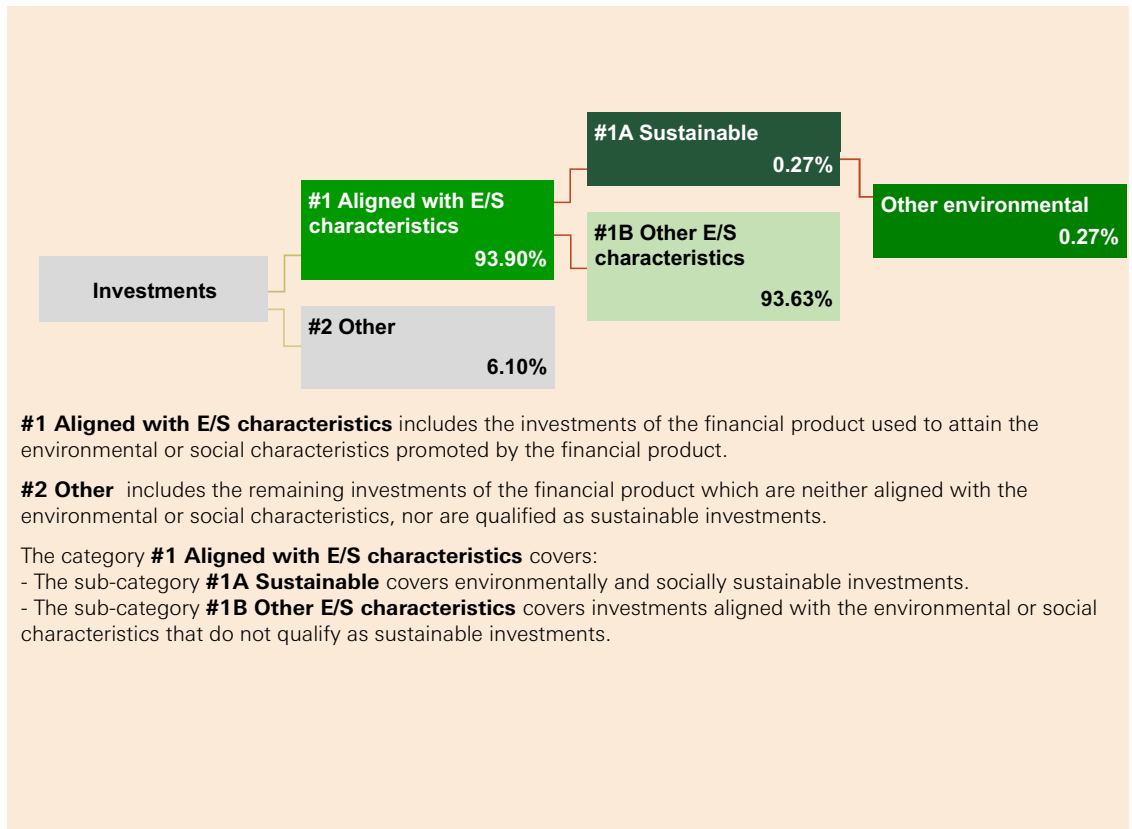

What was the proportion of sustainability-related investments?

0.27% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Other	67.58%
Financials	30.96%
Government	0.93%
Real Estate	0.69%
Industrials	0.11%
Communication Services	0.07%
Cash & Derivatives	-0.34%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

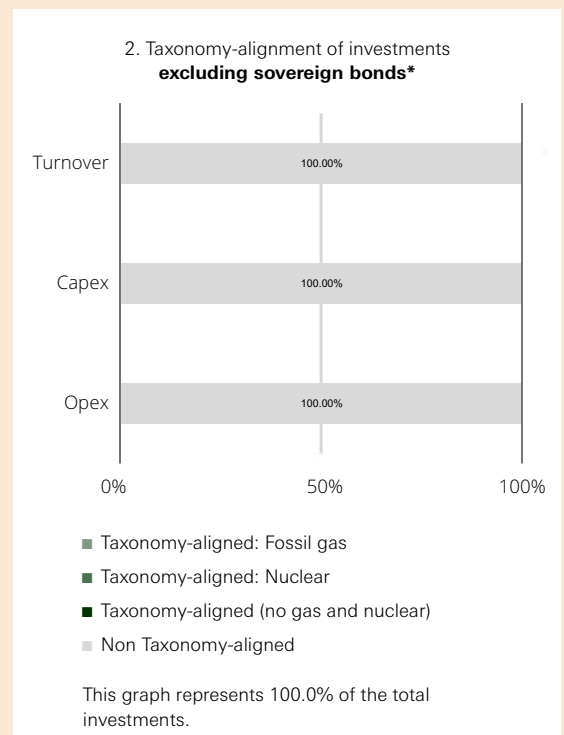

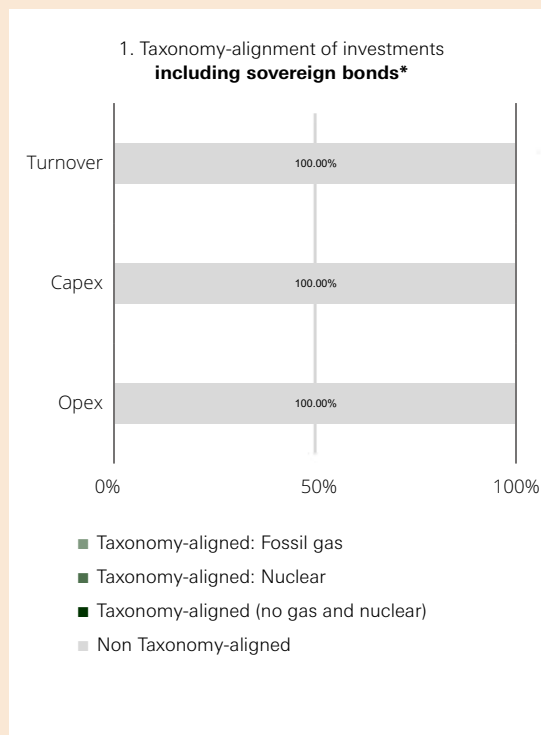

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0.27%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL CORPORATE BOND CLIMATE TRANSITION

Legal Entity Identifier: 213800QEYRDOIIO7S350

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30.39% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in met minimum ESG and E, and S and G score levels.
2. The construction of a portfolio that was on a clear and measurable path to decarbonise over time.
3. Responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. Identification of issuers on a clear and measurable climate transition pathway as informed by HSBC Asset Management's proprietary climate transition assessment to determine an issuer's progress or commitment towards alignment with "Net Zero" pathways.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the EU Climate Transition Benchmark exclusions (together referred to as the "Excluded Activities").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund meeting minimum ESG standards	98.38	NA
Portfolio on a clear and measurable path		
Weighted average carbon intensity of the portfolio, compared to the weighted average carbon intensity of the constituents of the Reference Benchmark.	107.62	107.19
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.84%
Issuers are on a clear and measurable transition pathway		
Percentage of issuers positively categorised within the HSBC Asset Management proprietary climate transition assessment	89.93%	NA
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - ICE Global Corporate Climate Transition CTB Index

...and compared to previous periods?

	31 March 2025	NA	NA
	31 March 2024	NA	NA
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The sub-fund changed its objective during the reporting period and therefore some data for previous periods is not available.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a issuer was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	3,416.91	246,974.95
	31 March 2025	2,943.82	283,500.77
	31 March 2024	2,135.15	501,925.58
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	24.91	26.82
	31 March 2025	14.52	29.44
	31 March 2024	13.61	59.18
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	107.62	107.19
	31 March 2025	37.91	99.48
	31 March 2024	55.21	97.31
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.84%
	31 March 2025	0.01%	0.00%
	31 March 2024	1.12%	0.29%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - ICE Global Corporate Climate Transition CTB Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Aib Group Plc 5.32% 15-may-2031	Financials	1.63%	Ireland

Cash and derivatives were excluded

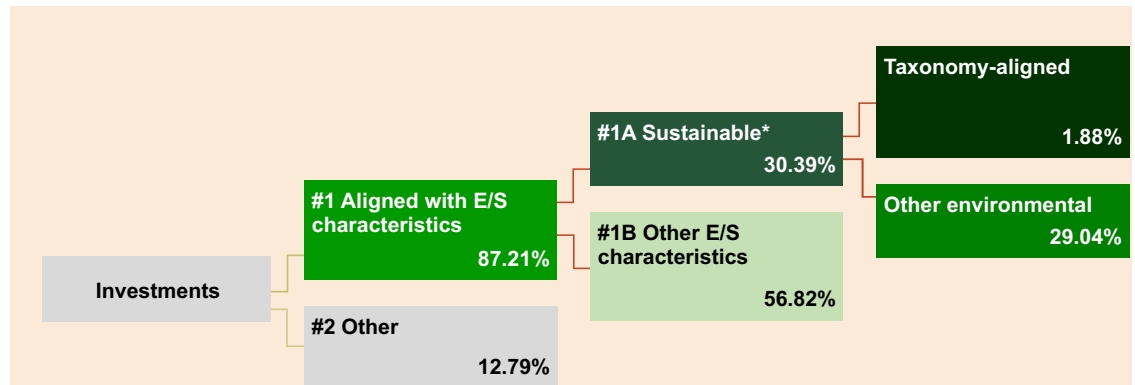

What was the proportion of sustainability-related investments?

30.39% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	47.28%
Utilities	9.67%
<i>Electric Utilities</i>	7.07%
<i>Gas</i>	0.66%
<i>Multi-Utilities</i>	1.21%
Communication Services	7.88%
Health Care	6.22%
Information Technology	5.77%
Industrials	5.33%
Consumer Discretionary	5.10%
Real Estate	4.23%
Consumer Staples	3.55%
Government	1.85%
Materials	1.34%
Cash & Derivatives	1.27%
Other	0.52%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.88%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

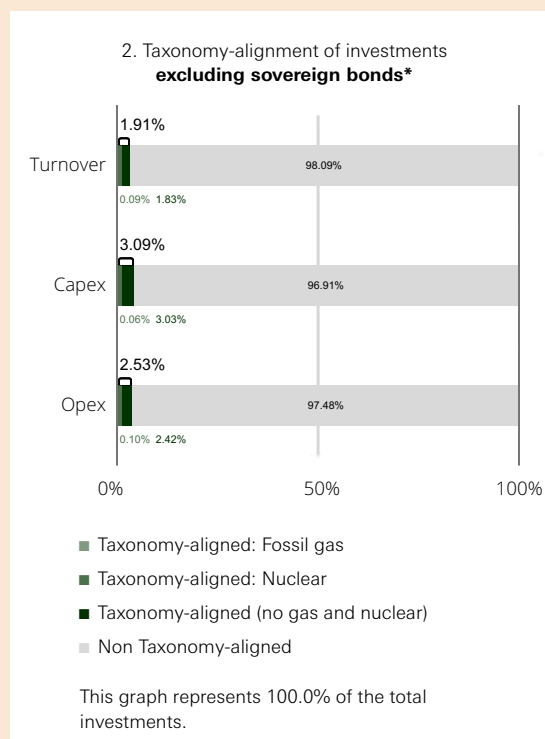

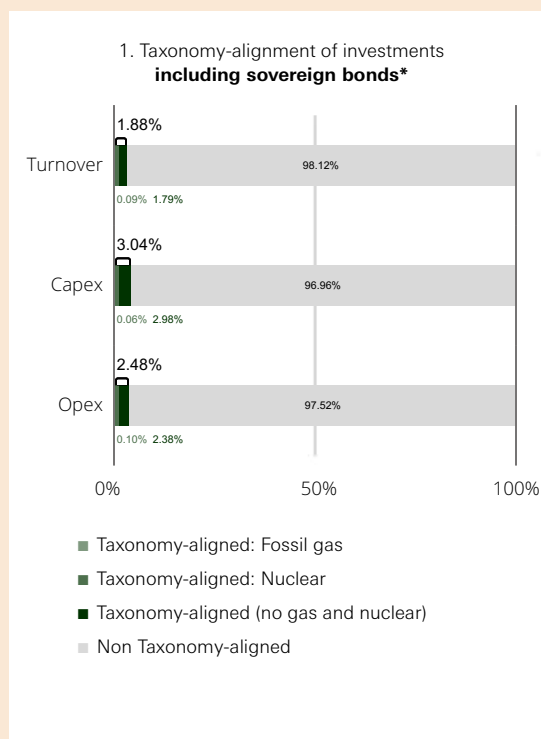

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.24%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.09%	0.07%	0.04%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.79%	1.61%	0.72%
Revenue - Non Taxonomy-aligned	98.12%	98.32%	99.24%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.06%	0.06%	0.07%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.98%	2.74%	1.77%
CAPEX - Non Taxonomy-aligned	96.96%	97.20%	98.16%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.10%	0.08%	0.11%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.38%	2.24%	1.45%
OPEX - Non Taxonomy-aligned	97.52%	97.68%	98.43%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 29.04%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

In order to invest in issuers with a clear and measurable climate transition pathway, and to lower the carbon intensity of the portfolio, all holdings in the portfolio were assessed through HSBC proprietary climate transition assessment.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL FLEXIBLE SECURITISED CREDIT BOND (GLOBAL SECURITISED CREDIT BOND)

Legal Entity Identifier: 213800ETFO3K123TXM05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.14% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● ***How did the sustainability indicators perform?***

Sustainability Indicator	sub-fund
Minimum ESG standards	
Percentage of the sub-fund aligned with the E/S characteristics	92.86
Identification and analysis of a company's environmental and social factors	
ESG Score	6.53
Responsible business practice in line with UNGC and OECD principles	
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
Excluded Activities	
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

● ***...and compared to previous periods?***

Sustainability Indicator	Period Ending	sub-fund
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	92.86
	31 March 2025	91.46
	31 March 2024	10.31
Identification and analysis of a company's environmental and social factors		
ESG Score	31 March 2026	6.53
	31 March 2025	6.67
	31 March 2024	5.09
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.02%
	31 March 2024	0.00%
Excluded Activities		
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.02%
	31 March 2024	0.00%

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country

Cash and derivatives were excluded

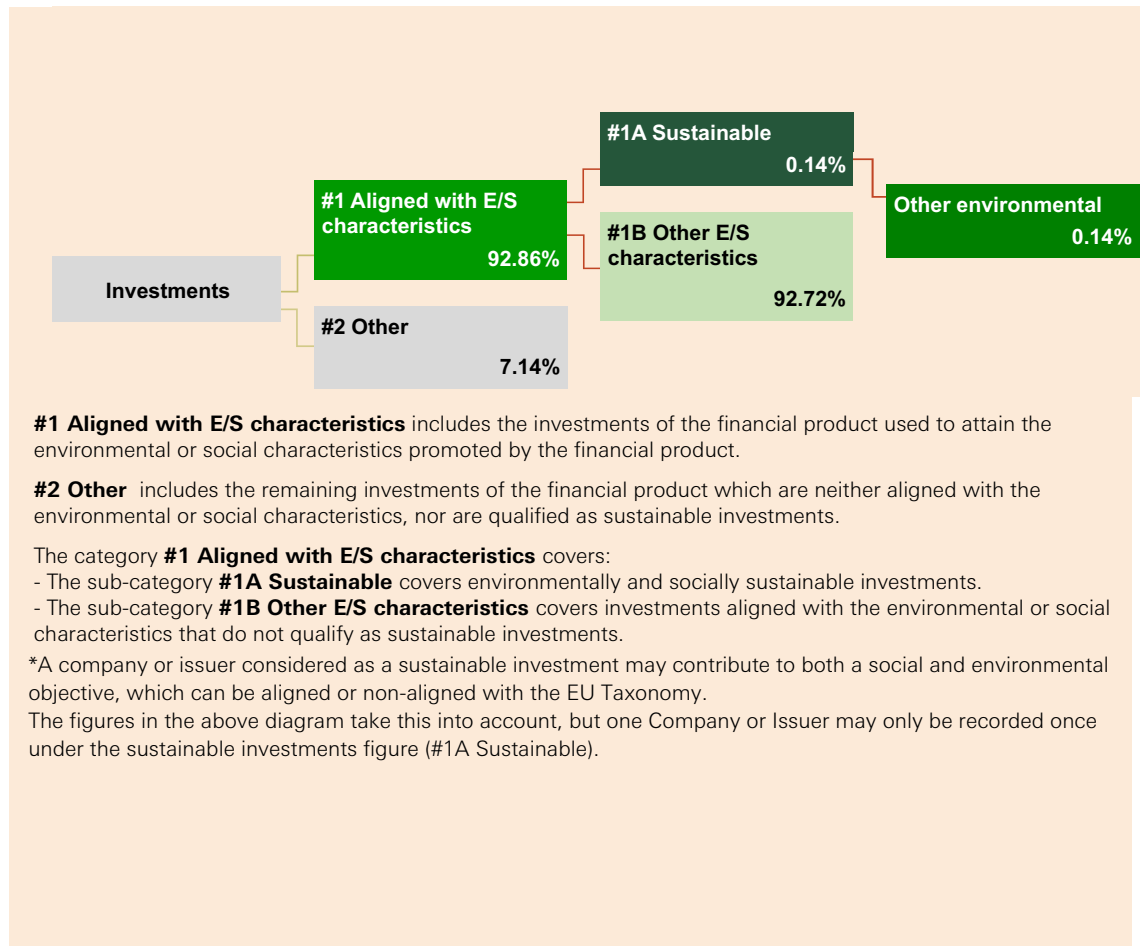

What was the proportion of sustainability-related investments?

0.14% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Other	65.53%
Financials	34.08%
Government	1.31%
Real Estate	0.88%
Communication Services	0.76%
Cash & Derivatives	-2.57%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

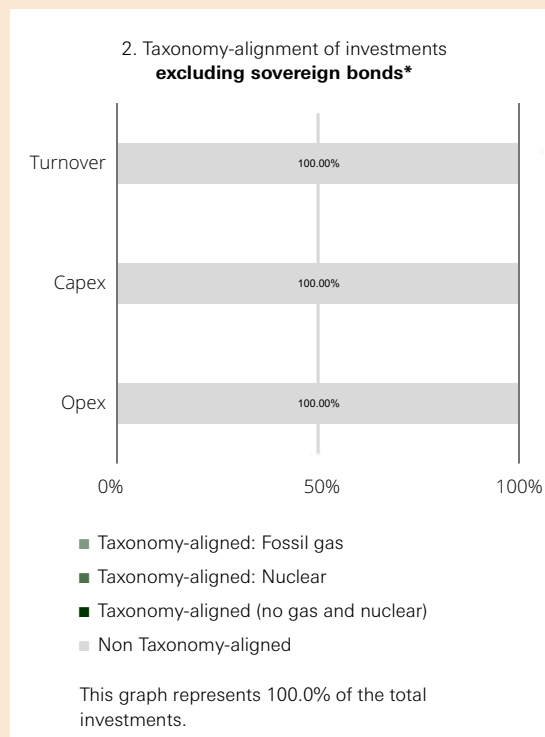

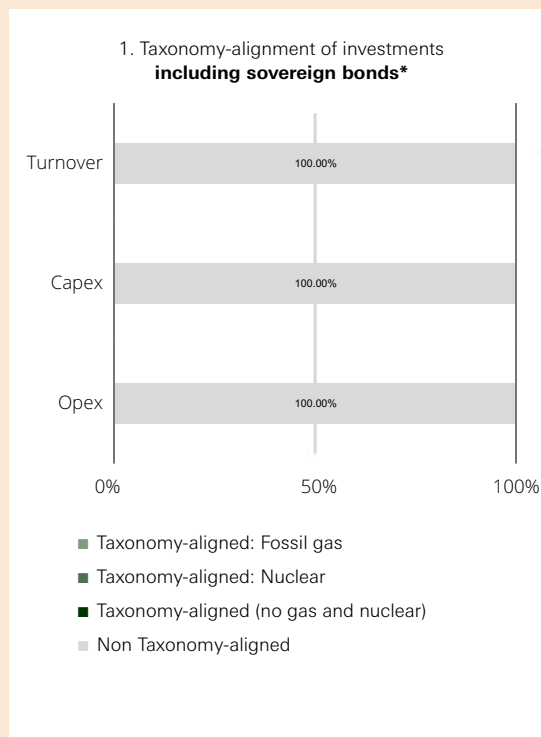

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0.14%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

The sub-fund assessed the ESG scores of the issuers it invested in. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL GOVERNMENT BOND

Legal Entity Identifier: 213800U23ATP2ADUS371

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.57% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	99.72	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.25	6.12
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.05%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan GBI Global (Traded)

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards

	31 March 2024	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	152.07	0.00
	31 March 2025	127.11	0.00
	31 March 2024	150.90	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.05%	0.00%
	31 March 2025	0.04%	0.00%
	31 March 2024	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	195.21	191.31
	31 March 2025	205.67	200.07
	31 March 2024	333.64	325.72

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - JP Morgan GBI Global (Traded)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of Japan 1.2% 20-dec-2034	Government	2.98%	Japan
Government Of The United States Of America 4.375% 31-dec-2029	Government	2.81%	United States of America

Cash and derivatives were excluded

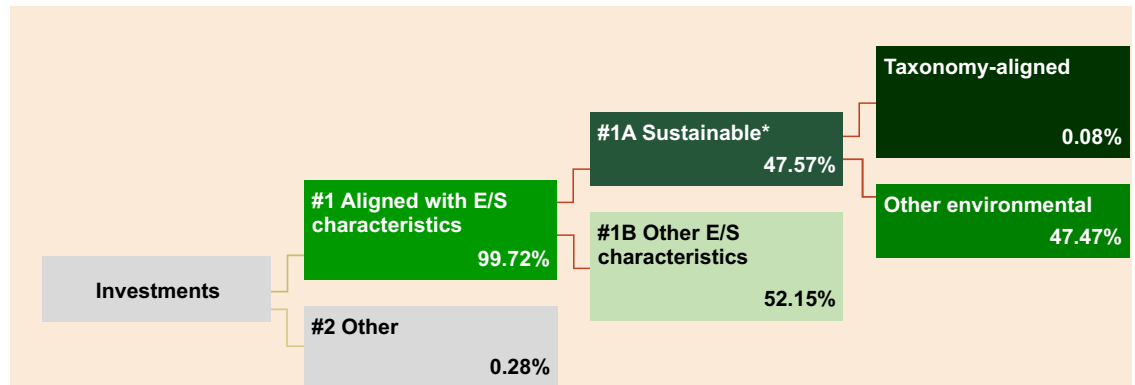

What was the proportion of sustainability-related investments?

47.57% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Government	95.38%
Financials	2.40%
Other	0.64%
Utilities	0.41%
<i>Electric Utilities</i>	0.26%
<i>Gas</i>	0.01%

Energy	0.22%
<i>Integrated Oil & Gas</i>	0.08%
<i>Oil & Gas Equipment & Services</i>	0.02%
<i>Oil & Gas Exploration & Production</i>	0.00%
<i>Oil & Gas Refining & Marketing</i>	0.02%
<i>Oil & Gas Storage & Transportation</i>	0.11%
Industrials	0.21%
Consumer Discretionary	0.20%
Real Estate	0.18%
Materials	0.12%
Health Care	0.11%
Information Technology	0.11%
Consumer Staples	0.07%
Cash & Derivatives	-0.33%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.08%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

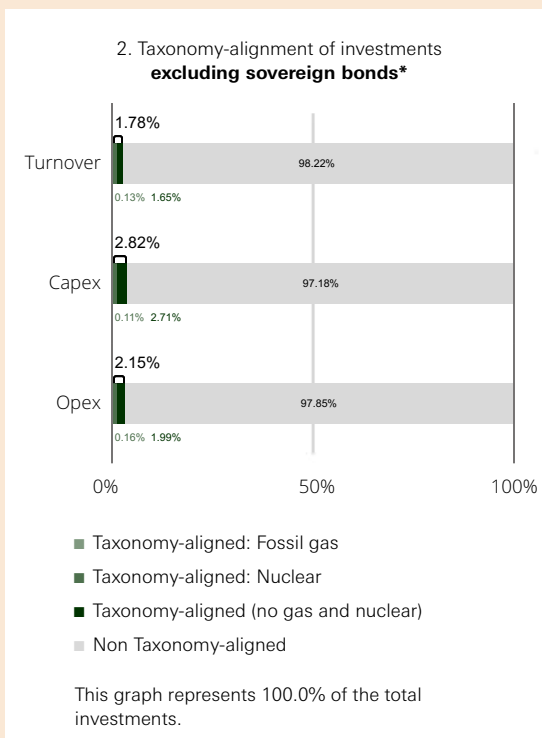

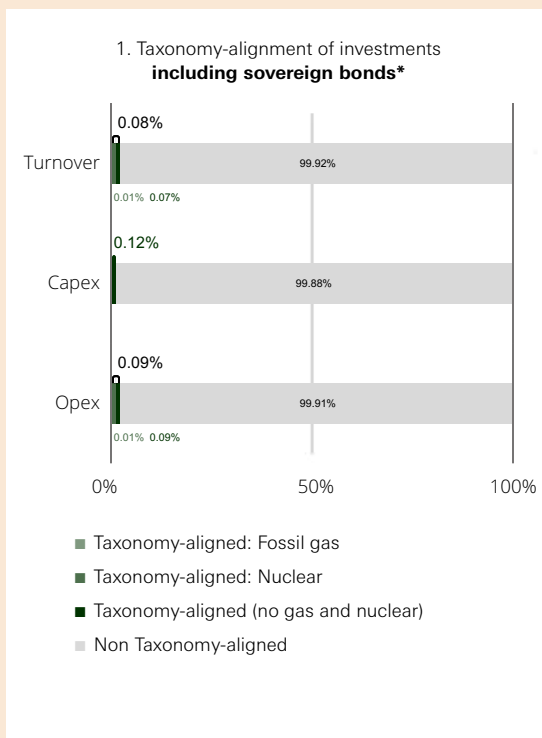

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.04%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.01%	0.01%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.07%	0.12%	0.06%
Revenue - Non Taxonomy-aligned	99.92%	99.87%	99.93%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.12%	0.17%	0.10%
CAPEX - Non Taxonomy-aligned	99.88%	99.82%	99.89%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.01%	0.01%	0.02%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.09%	0.14%	0.09%
OPEX - Non Taxonomy-aligned	99.91%	99.85%	99.90%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 47.47%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL SHORT DURATION BOND

Legal Entity Identifier: 213800OJCTAUAEUXXF30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.22% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	96.33	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.56	5.99
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.31%	0.36%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg Global Aggregate (1-3 Y)

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	96.33	NA
	31 March 2025	96.09	NA
	31 March 2024	79.88	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.56	5.99
	31 March 2025	6.62	5.96
	31 March 2024	6.66	5.87
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.31%	0.36%
	31 March 2025	0.76%	0.21%
	31 March 2024	0.11%	0.15%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.08%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.03%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	106.17	125.92
	31 March 2025	70.18	97.32
	31 March 2024	92.54	154.29
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.31%	0.36%
	31 March 2025	0.76%	0.21%
	31 March 2024	0.11%	0.15%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.08%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.03%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2026	256.23	227.49
	31 March 2025	224.77	20.07
	31 March 2024	370.15	361.31

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark -- Bloomberg Global Aggregate (1-3 Y)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of Germany 2.2% 13-apr-2028	Government	2.16%	Germany

Cash and derivatives were excluded

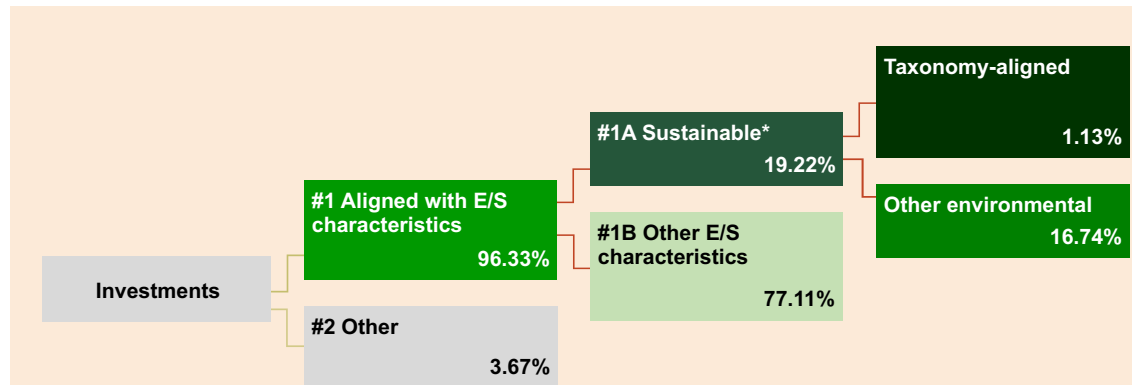

What was the proportion of sustainability-related investments?

19.22% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	44.20%
Government	20.79%
Other	8.22%
Utilities	5.02%
<i>Electric Utilities</i>	3.82%

Cash & Derivatives	0.05%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.13%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

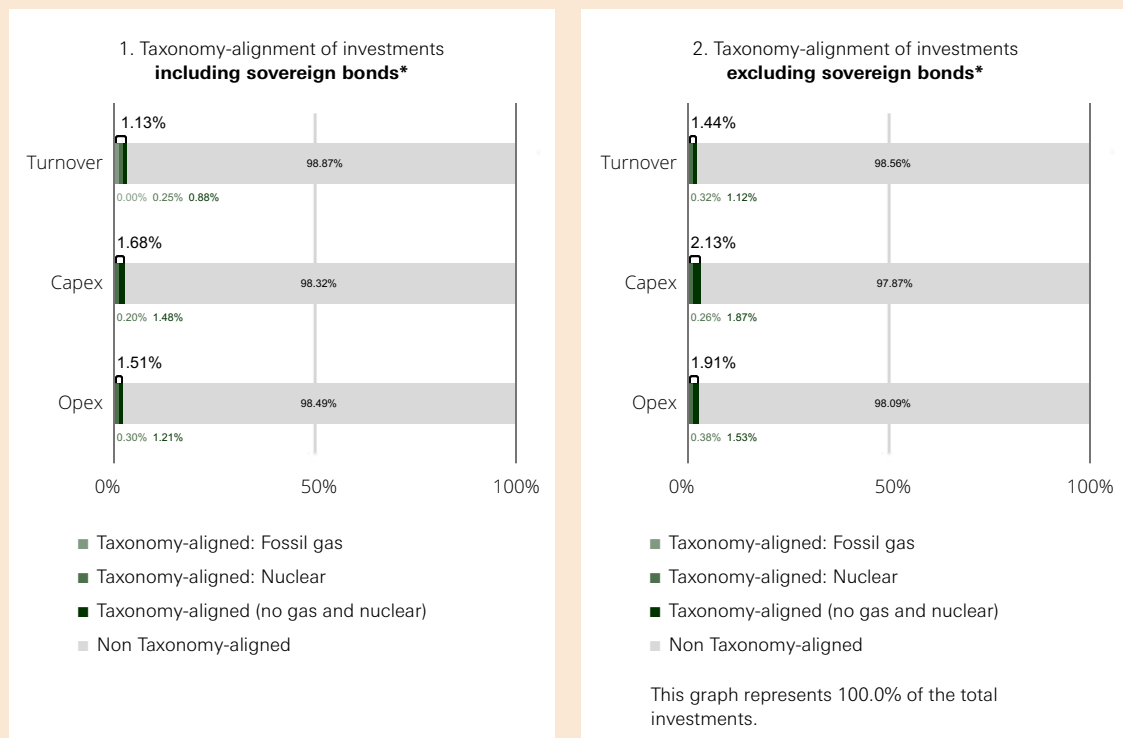

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.62%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.25%	0.40%	0.10%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.88%	2.02%	0.75%
Revenue - Non Taxonomy-aligned	98.87%	97.58%	99.14%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.20%	0.32%	0.19%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.48%	3.21%	1.51%
CAPEX - Non Taxonomy-aligned	98.32%	96.47%	98.30%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.30%	0.47%	0.31%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.21%	2.70%	1.35%
OPEX - Non Taxonomy-aligned	98.49%	96.82%	98.34%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 16.74%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to, banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production.

The sub-fund assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles OKensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ULTRA SHORT DURATION BOND

Legal Entity Identifier: 213800K751A281K04P97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13.90% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	97.07	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.01	6.73
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.97%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg US Corporate (1-3 Y) (Inception 11/28/2003)

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	97.07	NA
	31 March 2025	97.95	NA
	31 March 2024	88.03	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.01	6.73
	31 March 2025	6.98	6.82
	31 March 2024	7.03	6.81

	31 March 2024	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	83.78	162.02
	31 March 2025	80.67	169.65
	31 March 2024	77.00	71.52
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.97%
	31 March 2025	1.00%	0.00%
	31 March 2024	1.12%	0.17%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.12%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg US Corporate (1-3 Y) (Inception 11/28/2003)

What were the top investments of this financial product?

Cash and derivatives were excluded

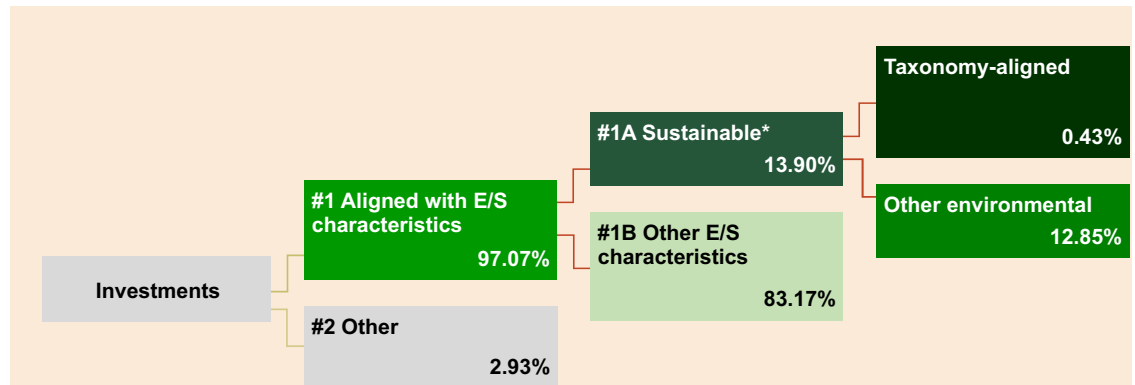

What was the proportion of sustainability-related investments?

13.90% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	55.14%
Other	8.48%

Cash & Derivatives	-0.48%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.43%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

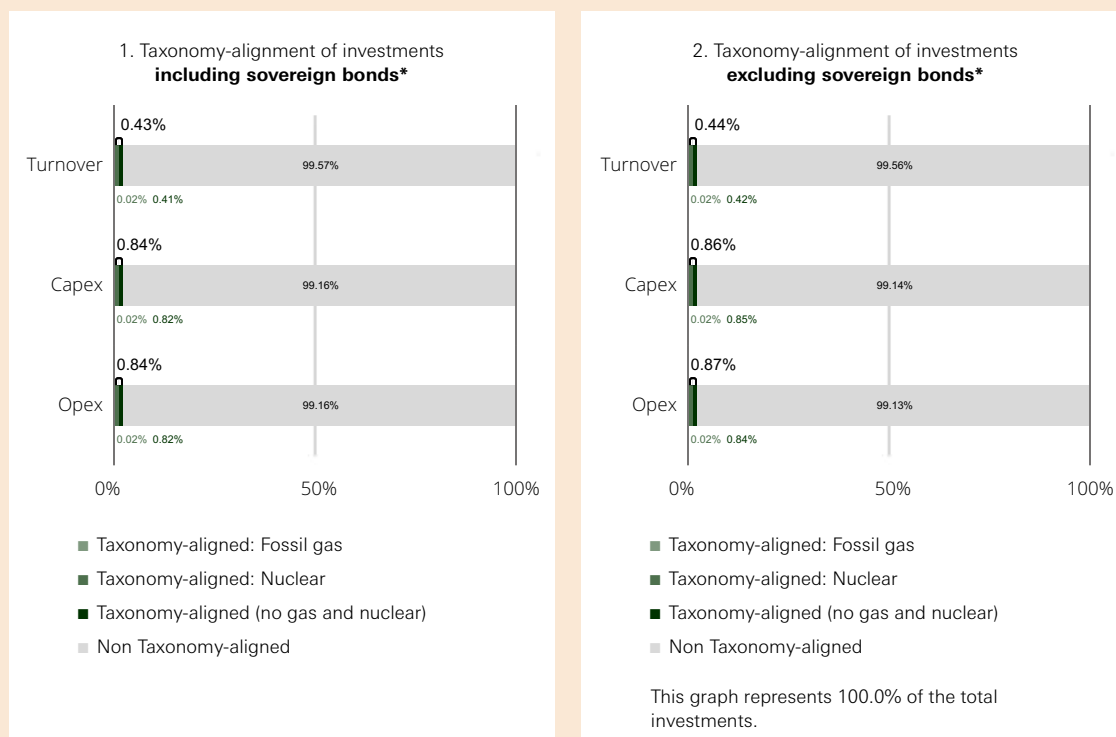

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.37%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.02%	0.00%	0.03%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.41%	0.49%	0.48%
Revenue - Non Taxonomy-aligned	99.57%	99.51%	99.50%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.02%	0.00%	0.06%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.82%	1.03%	1.37%
CAPEX - Non Taxonomy-aligned	99.16%	98.97%	98.59%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.02%	0.00%	0.09%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.82%	1.14%	1.31%
OPEX - Non Taxonomy-aligned	99.16%	98.86%	98.62%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 12.85%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

- Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - US DOLLAR BOND

Legal Entity Identifier: 213800O9RWE9DATIW963

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.04% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of an issuer's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	68.44	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.89	6.04
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.62%	0.43%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg US Aggregate

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	68.44	NA
	31 March 2025	99.85	NA
	31 March 2024	97.70	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.89	6.04
	31 March 2025	6.32	5.89
	31 March 2024	6.29	5.88
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.62%	0.43%
	31 March 2025	1.24%	0.02%
	31 March 2024	0.45%	0.01%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.12%

	31 March 2024	0.00%	0.00%

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	90.41	228.60
	31 March 2025	102.24	90.07
	31 March 2024	82.07	62.89
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.62%	0.43%
	31 March 2025	1.24%	0.02%
	31 March 2024	0.45%	0.01%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.12%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - Bloomberg US Aggregate

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Government Of The United States Of America 0.0% 09-dec-2025	Government	5.44%	United States of America

Cash and derivatives were excluded

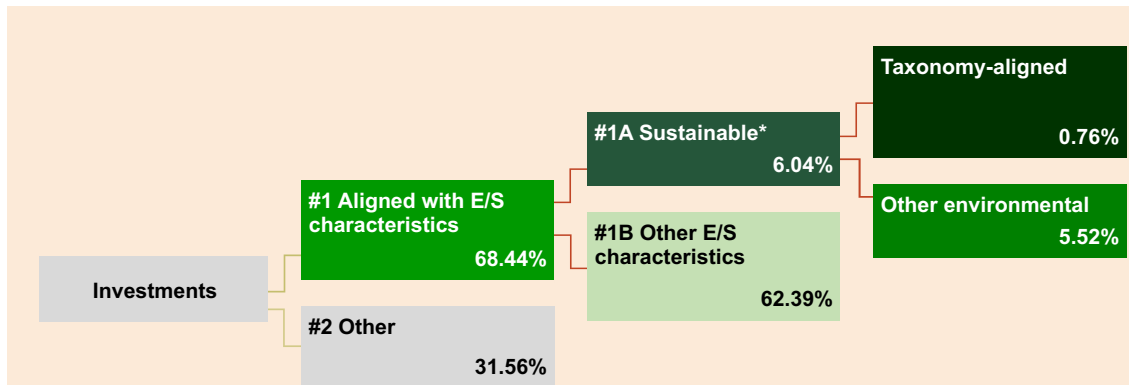

What was the proportion of sustainability-related investments?

6.04% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	66.79%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.76%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.76%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.76%	0.56%	0.11%
Revenue - Non Taxonomy-aligned	99.62%	99.44%	99.89%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.88%	0.66%	0.35%
CAPEX - Non Taxonomy-aligned	99.56%	99.34%	99.65%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.91%	0.69%	0.36%
OPEX - Non Taxonomy-aligned	99.55%	99.31%	99.64%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 5.52%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - CORPORATE EURO BOND FIXED TERM 2027

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 26.56% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the issuers that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
3. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Sustainability Indicator	sub-fund
Minimum ESG standards	
Percentage of the sub-fund aligned with the E/S characteristics	97.25
Responsible business practice in line with UNGC and OECD principles	
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
Excluded Activities	
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

● ***...and compared to previous periods?***

Sustainability Indicator	Period Ending	sub-fund
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	97.25
	31 March 2025	97.85
	31 March 2024	86.65
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.86%
	31 March 2024	0.00%
Excluded Activities		
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%
	31 March 2025	0.86%
	31 March 2024	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%
	31 March 2025	0.00%
	31 March 2024	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Cash and derivatives were excluded

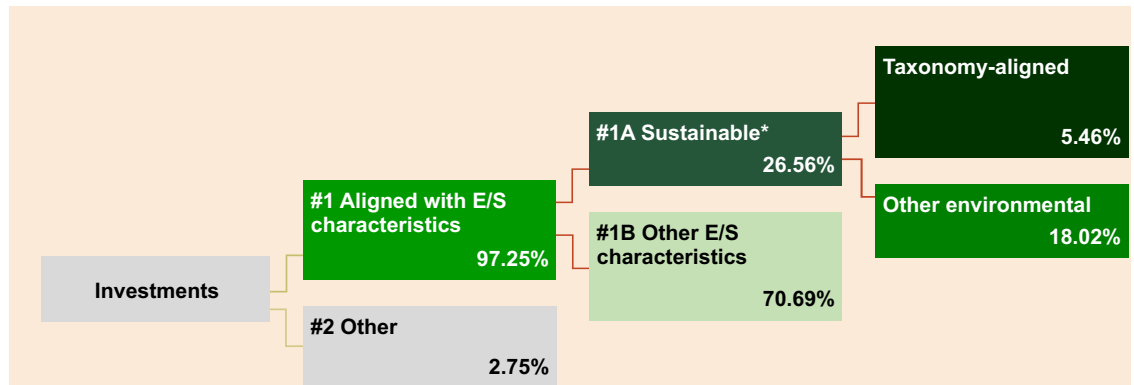

What was the proportion of sustainability-related investments?

26.56% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	38.03%
Industrials	13.64%
Consumer Discretionary	13.50%
Real Estate	9.58%
Utilities	8.40%
<i>Electric Utilities</i>	<i>6.00%</i>
<i>Gas</i>	<i>2.27%</i>
Materials	8.32%
Communication Services	5.13%
Information Technology	1.07%
Consumer Staples	1.05%
Energy	0.90%
<i>Oil & Gas Storage & Transportation</i>	<i>0.90%</i>
Health Care	0.28%
Cash & Derivatives	0.10%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 5.46%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

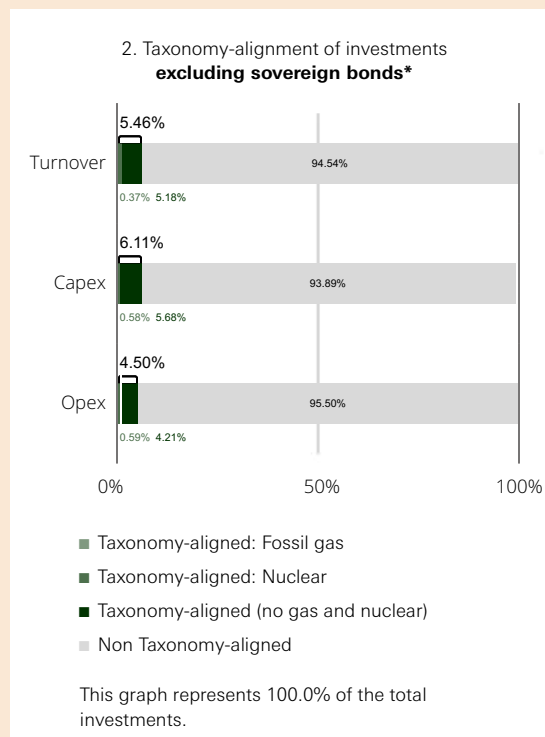

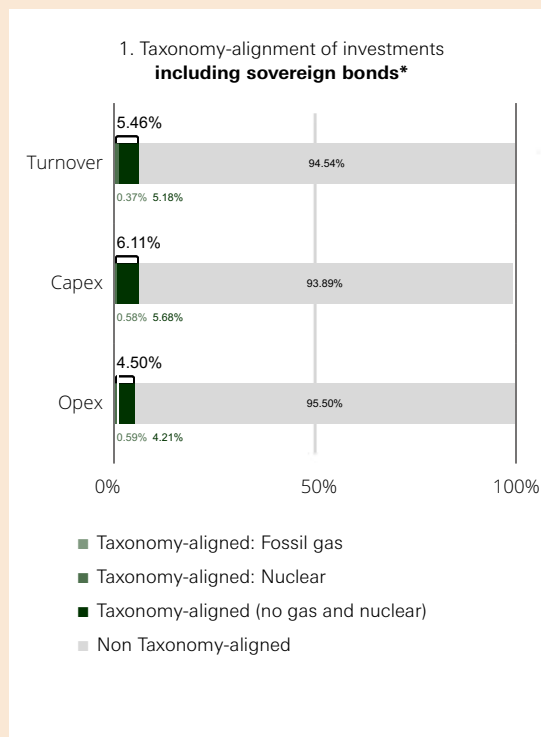

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 2.53%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.37%	0.00%	0.02%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.18%	3.38%	0.93%
Revenue - Non Taxonomy-aligned	94.54%	96.62%	99.06%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.58%	0.00%	0.04%
CAPEX - Taxonomy-aligned (no gas and nuclear)	5.68%	3.93%	1.80%
CAPEX - Non Taxonomy-aligned	93.89%	96.07%	98.18%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.59%	0.00%	0.06%
OPEX - Taxonomy-aligned (no gas and nuclear)	4.21%	3.56%	1.12%
OPEX - Non Taxonomy-aligned	95.50%	96.44%	98.85%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 18.02%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and issuers with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in issuers with responsible business practices in accordance with UNGC principles.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision-making process. ESG metrics were derived from a range of HSBC proprietary and third party sources, which are subject to ongoing research and may change over time as new metrics are identified.

The investment decision-making process integrated ESG metrics in a number of ways:

- Excluding issuers with a low ESG score and issuers that are considered to be non-compliant with the UNGC Principles. This exclusion was at the discretion of the Investment Adviser. Issuers with an improving but still low ESG score and issuers with a discernible direction of travel towards UNGC Principles compliance were still be invested in.
- Engagement with issuers around energy transition and ESG regulation.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASEAN EQUITY

Legal Entity Identifier: 213800GX2NCDIS6WSV60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
Yes It made sustainable investments with an environmental objective: _% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made sustainable investments with a social objective: _%	No It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.55% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	Sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	96.26	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.93	6.72
Consideration of lower carbon intensity investments		
GHG Emissions - Metric tons CO2 equivalents	279.82	67,644,836.49
Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	11.12	107.20
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	60.86	323.38
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI ASEAN

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	Sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	279.82	67,644,836.49
	31 March 2025	399.31	74,991,415.42
	31 March 2024	420.31	86,293,746.11
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	11.12	107.20
	31 March 2025	14.68	124.22
	31 March 2024	13.92	145.99
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	60.86	323.38
	31 March 2025	73.75	302.87
	31 March 2024	79.58	341.34

4. Exposure to companies active in the fossil fuel sector	31 March 2026	2.52%	1.21%
	31 March 2025	2.13%	0.97%
	31 March 2024	0.00%	8.54%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.03%	0.00%
	31 March 2024	0.01%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI ASEAN

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
DBS Group Holdings Ltd	Financials	9.95%	Singapore
Oversea-Chinese Banking Corporation Limited	Financials	8.98%	Singapore
Sea Limited Sponsored ADR Class A	Consumer Discretionary	7.36%	Singapore

IHH Healthcare Bhd.	Health Care	4.37%	Malaysia
United Overseas Bank Limited	Financials	4.05%	Singapore
Grab Holdings Limited Class A	Industrials	3.99%	Singapore

Cash and derivatives were excluded

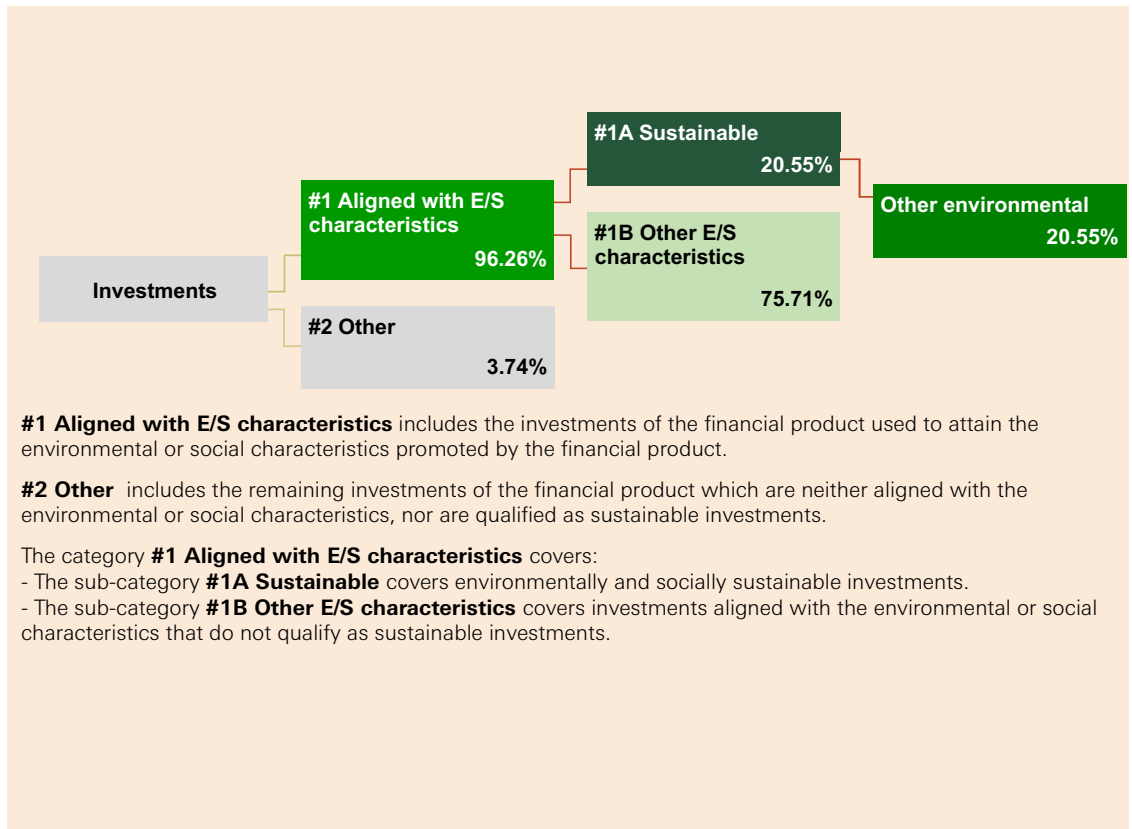

What was the proportion of sustainability-related investments?

20.55% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	43.77%
Industrials	15.94%
Communication Services	11.79%
Consumer Discretionary	7.58%
Real Estate	7.28%
Health Care	7.23%
Information Technology	2.67%
Other	2.25%
Cash & Derivatives	1.49%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

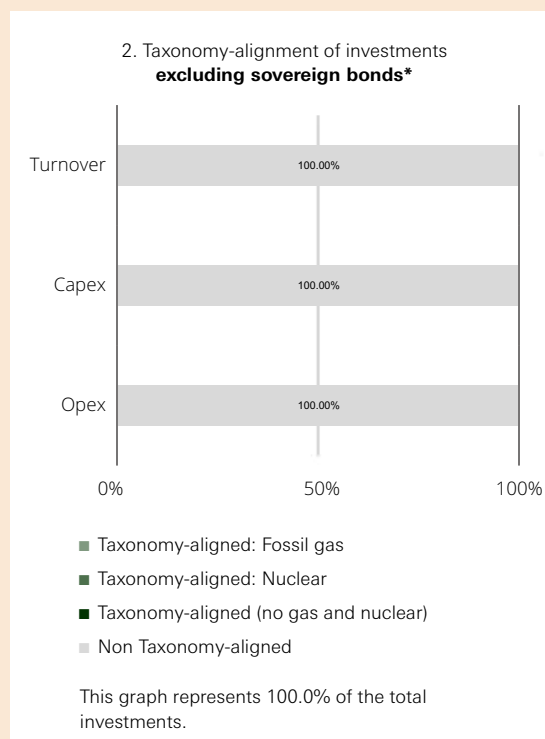

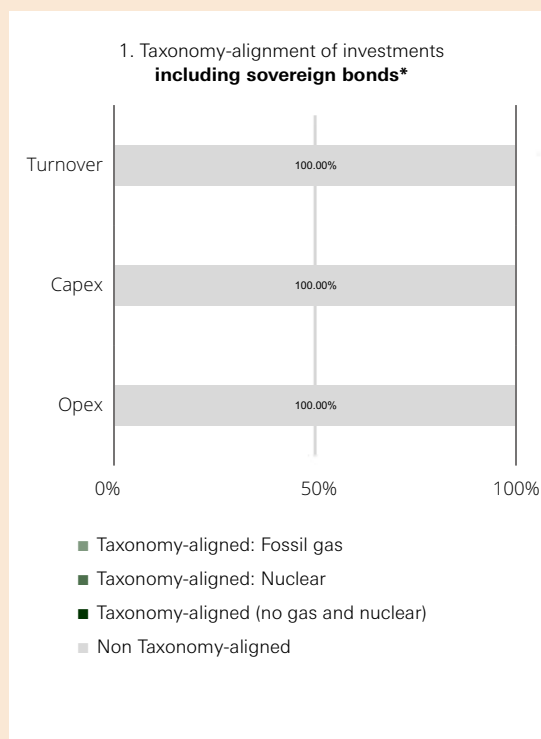

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 20.55%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASIA EX JAPAN EQUITY

Legal Entity Identifier: 21380086TMCIPDOJI191

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
Yes	No
It made sustainable investments with an environmental objective: _%	It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.30% of sustainable investments
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	with a social objective
It made sustainable investments with a social objective: _%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. Consideration of lower carbon intensity investments.
3. The identification and analysis of a company’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	94.30	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.72	6.53
Consideration of lower carbon intensity investments		
GHG Emissions - Metric tons CO2 equivalents	9,440.07	838,880,685.83
Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	33.46	120.87
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	107.27	301.53
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	8.33%	7.28%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

	31 March 2025	98.92	327.68
	31 March 2024	112.10	327.20

Responsible business practice in line with UNGC and OECD principles

Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	8.33%	7.28%
	31 March 2025	8.22%	7.64%
	31 March 2024	7.55%	7.00%

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.08%
	31 March 2025	0.00%	0.05%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	9,440.07	838,880,685.83
	31 March 2025	8,181.51	987,781,014.75
	31 March 2024	11,788.56	871,936,834.19
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	33.46	120.87
	31 March 2025	28.56	155.70
	31 March 2024	34.97	159.15
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	107.27	301.53
	31 March 2025	98.92	327.68
	31 March 2024	112.10	327.20

4. Exposure to companies active in the fossil fuel sector	31 March 2026	3.10%	1.03%
	31 March 2025	3.51%	1.51%
	31 March 2024	4.85%	5.46%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	8.33%	7.28%
	31 March 2025	8.22%	7.64%
	31 March 2024	7.55%	7.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.08%
	31 March 2025	0.00%	0.05%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI All Country Asia Ex-Japan

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.65%	Taiwan
Tencent Holdings Ltd	Communication Services	7.26%	China
Samsung Electronics Co., Ltd.	Information Technology	6.26%	Korea
Alibaba Group Holding Limited	Consumer Discretionary	4.52%	China
China Construction Bank Corporation Class H	Financials	3.49%	China
SK hynix Inc.	Information Technology	3.18%	Korea
Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	2.93%	China
AIA Group Limited	Financials	2.66%	Hong Kong
HDFC Bank Limited	Financials	2.46%	India
Hon Hai Precision Industry Co., Ltd.	Information Technology	2.35%	Taiwan
Contemporary Amperex Technology Co., Limited Class A	Industrials	2.14%	China
Bharti Airtel Limited	Communication Services	2.07%	India
ASE Technology Holding Co., Ltd.	Information Technology	1.88%	Taiwan

Cash and derivatives were excluded

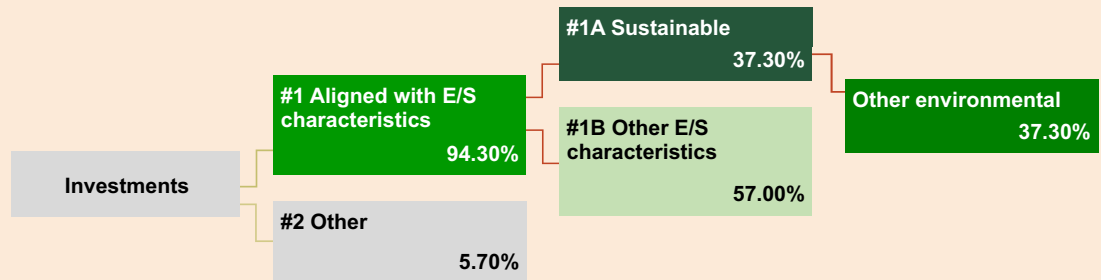

What was the proportion of sustainability-related investments?

37.30% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	32.97%
Financials	21.74%
Communication Services	10.48%
Consumer Discretionary	10.43%
Industrials	10.30%
Health Care	3.87%
Materials	2.25%
Cash & Derivatives	1.93%
Consumer Staples	1.84%
Energy	1.52%
Oil & Gas Refining & Marketing	1.00%
Real Estate	1.35%
Other	1.32%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

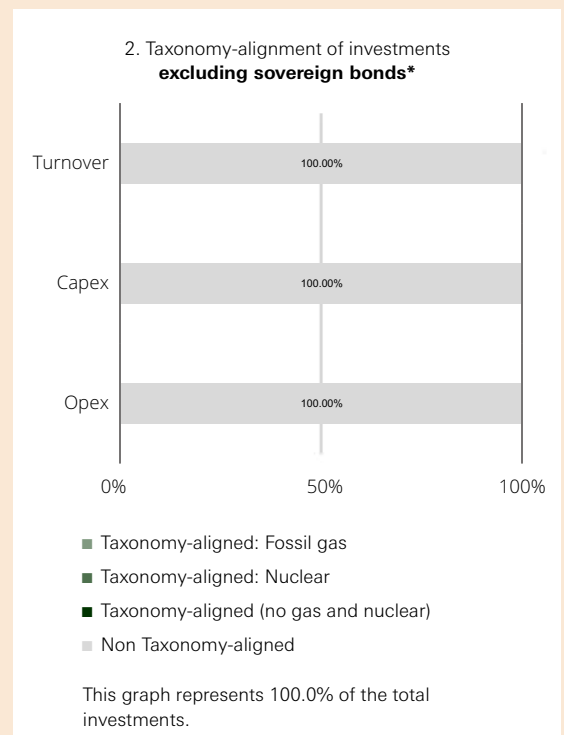

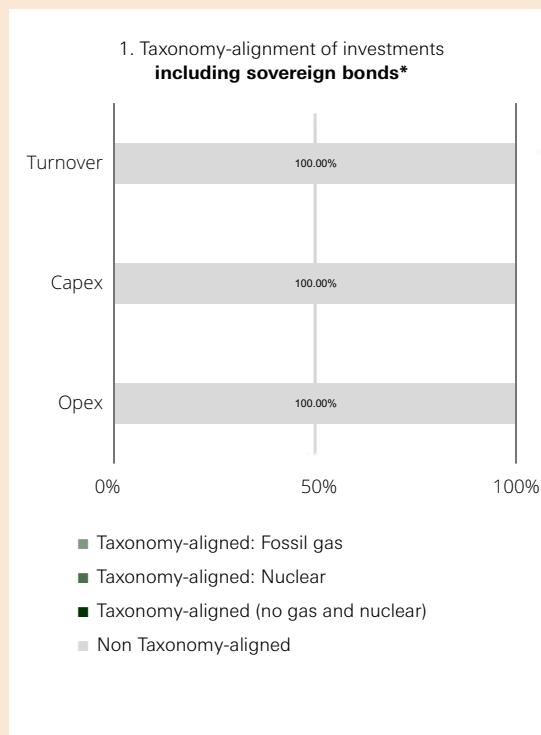

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 37.30%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level comparable to the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASIA EX JAPAN EQUITY SMALLER COMPANIES

Legal Entity Identifier: 21380036FEZ4XDRMY876

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	75.51	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	5.32	4.83
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.80%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI AC Asia ex JP Small Cap

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.32%
	31 March 2025	0.00%	0.42%
	31 March 2024	0.00%	0.32%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	28,715.66	197,705,458.12
	31 March 2025	57,715.33	180,006,394.20
	31 March 2024	127,656.80	191,191,247.10
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	128.14	197.00
	31 March 2025	184.60	193.74
	31 March 2024	300.66	212.86
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	527.68	451.34
	31 March 2025	688.80	444.03
	31 March 2024	238.22	425.49
4. Exposure to companies active in the fossil fuel sector	31 March 2026	2.92%	0.22%
	31 March 2025	2.77%	0.05%
	31 March 2024	1.85%	3.18%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.80%
	31 March 2025	0.00%	0.90%
	31 March 2024	0.17%	0.54%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.32%
	31 March 2025	0.00%	0.42%
	31 March 2024	0.00%	0.32%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark -- MSCI AC Asia ex JP Small Cap

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
HSBC GLF-USD LIQUIDITY-Y 10116567	Other	3.42%	Ireland

Cash and derivatives were excluded

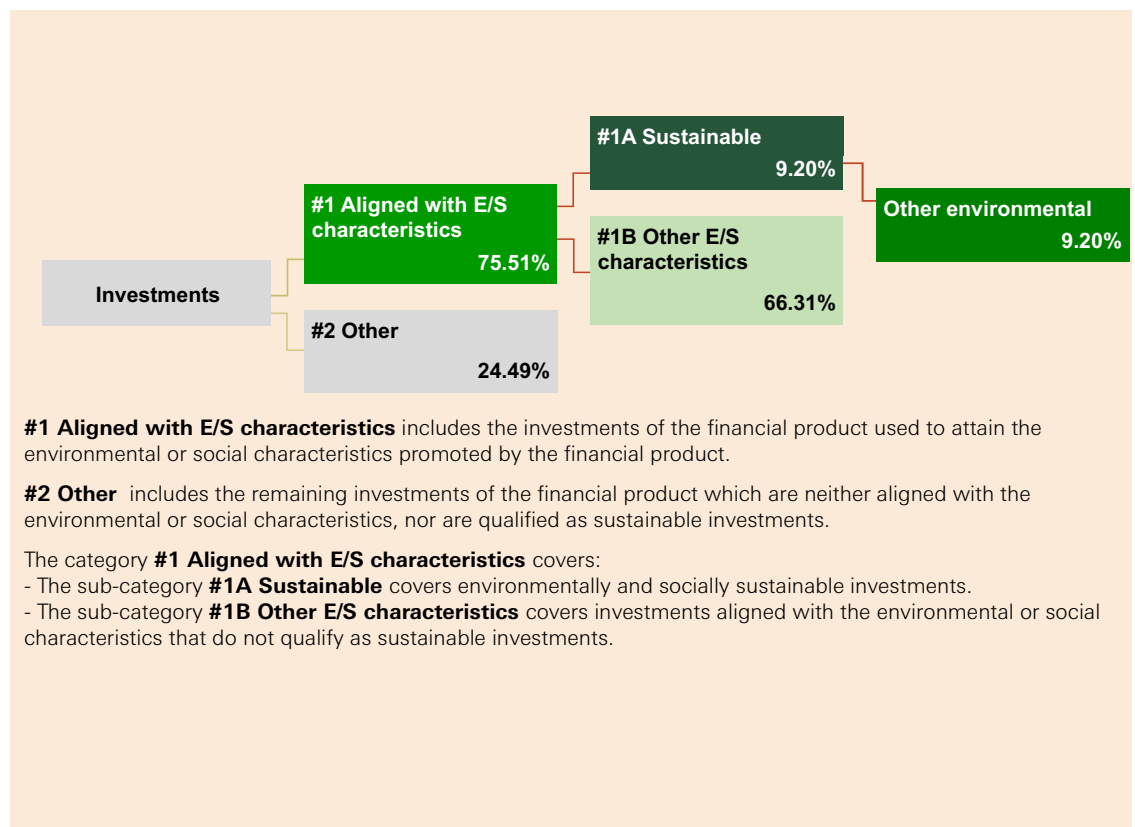

What was the proportion of sustainability-related investments?

9.20% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	20.04%
Consumer Discretionary	14.99%
Industrials	14.42%
Financials	11.27%
Real Estate	9.09%
Health Care	8.74%
Materials	8.29%
Consumer Staples	4.41%
Other	2.97%
Communication Services	2.94%
Cash & Derivatives	1.98%
Utilities	0.61%
<i>Gas</i>	<i>0.26%</i>
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

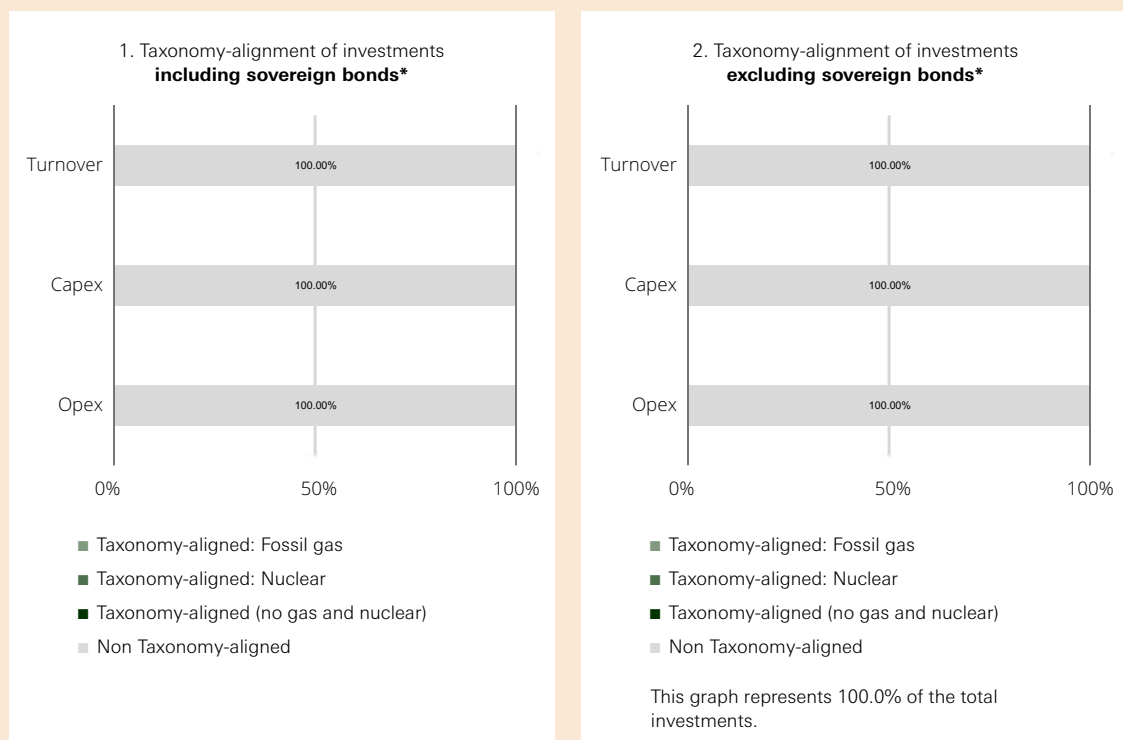

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 9.20%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level comparable with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASIA PACIFIC EX JAPAN EQUITY HIGH DIVIDEND

Legal Entity Identifier: 213800MMWTNUVALJY871

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32.76% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

	31 March 2025	3.90%	6.46%
	31 March 2024	4.42%	5.82%

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	0.04%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	11,706.76	917,915,634.51
	31 March 2025	24,048.67	1,069,640,000.00
	31 March 2024	40,814.21	955,245,595.07
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	33.74	113.47
	31 March 2025	95.72	142.44
	31 March 2024	129.29	145.01
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	120.01	281.66
	31 March 2025	203.29	298.84
	31 March 2024	225.64	297.61

4. Exposure to companies active in the fossil fuel sector	31 March 2026	6.61%	1.66%
	31 March 2025	9.98%	1.97%
	31 March 2024	3.71%	5.81%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	3.92%	6.28%
	31 March 2025	3.90%	6.46%
	31 March 2024	4.42%	5.82%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	0.04%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI All Country Asia Pacific Ex-Japan

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.99%	Taiwan
Samsung Electronics Co Ltd Pfd Non-Voting	Information Technology	4.94%	Korea
Baidu, Inc. Class A	Communication Services	4.07%	China
Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	3.69%	China
Alibaba Group Holding Limited	Consumer Discretionary	3.48%	China
Singapore Telecommunications Limited	Communication Services	3.36%	Singapore
Hong Kong Exchanges & Clearing Ltd.	Financials	3.22%	Hong Kong
AIA Group Limited	Financials	2.81%	Hong Kong

Santos Limited	Energy	2.66%	Australia
DBS Group Holdings Ltd	Financials	2.58%	Singapore
Budweiser Brewing Co. APAC Ltd.	Consumer Staples	2.45%	China

Cash and derivatives were excluded

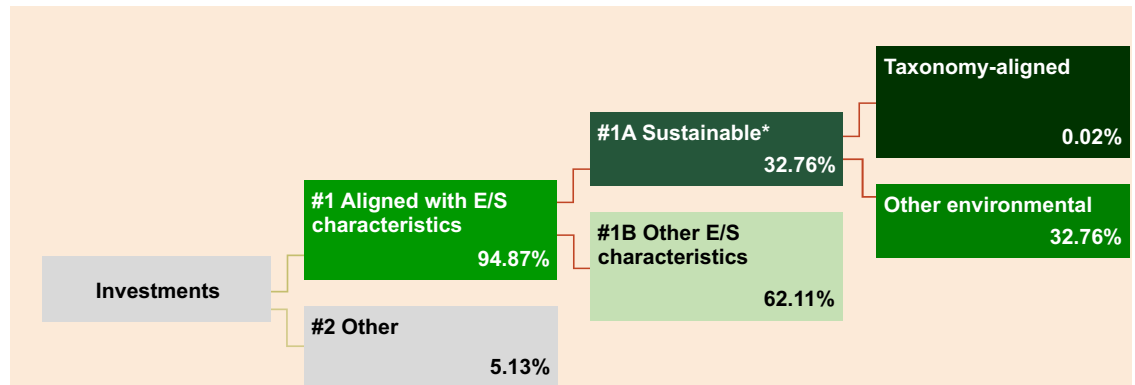

What was the proportion of sustainability-related investments?

32.76% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	28.61%
Information Technology	26.21%
Consumer Discretionary	12.13%
Communication Services	11.64%
Consumer Staples	4.83%
Energy	4.20%
Oil & Gas Exploration & Production	2.84%
Oil & Gas Storage & Transportation	1.37%
Materials	3.11%
Cash & Derivatives	2.39%
Real Estate	2.08%
Industrials	1.95%
Utilities	1.78%
Electric Utilities	1.78%
Government	1.05%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.02%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes: ☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.02%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.02%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	99.98%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.08%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	99.92%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.22%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	99.78%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 32.76%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

 What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level comparable with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - CHINA A-SHARES EQUITY

Legal Entity Identifier: 213800ZAVP5VLFDDBBN34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

It made **sustainable investments**
with an environmental objective:
%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: **0%**

☒ ☐ ☐ ☐ **No**

✓ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 9.88% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	97.00	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	5.65	4.91
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.28%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI China A Onshore

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark

	31 March 2025	0.00%	1.67%
	31 March 2024	0.00%	1.67%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.06%
	31 March 2025	0.00%	0.06%
	31 March 2024	0.00%	0.09%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	6,005.23	631,653,755.70
	31 March 2025	6,661.76	625,942,367.43
	31 March 2024	3,023.27	578,061,943.40
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	210.78	203.41
	31 March 2025	225.37	235.83
	31 March 2024	141.19	212.73
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	303.42	390.88
	31 March 2025	271.93	367.32
	31 March 2024	184.41	313.94
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.28%
	31 March 2025	0.00%	1.67%
	31 March 2024	0.00%	1.67%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.06%
	31 March 2025	0.00%	0.06%
	31 March 2024	0.00%	0.09%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI China A Onshore

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Contemporary Ampere Technology Co., Limited Class A	Industrials	8.23%	China
Ping An Insurance (Group) Company of China, Ltd. Class A	Financials	8.00%	China
Zijin Mining Group Co., Ltd. Class A	Materials	6.93%	China
Huatai Securities Co., Ltd. Class A	Financials	5.92%	China
China Pacific Insurance (Group) Co., Ltd. Class A	Financials	5.71%	China
Luxshare Precision Industry Co. Ltd. Class A	Information Technology	5.10%	China
Weichai Power Co., Ltd. Class A	Industrials	4.42%	China
XCMG Construction Machinery Co., Ltd. Class A	Industrials	4.15%	China
Aluminum Corporation of China Limited Class A	Materials	2.69%	China

Cash and derivatives were excluded

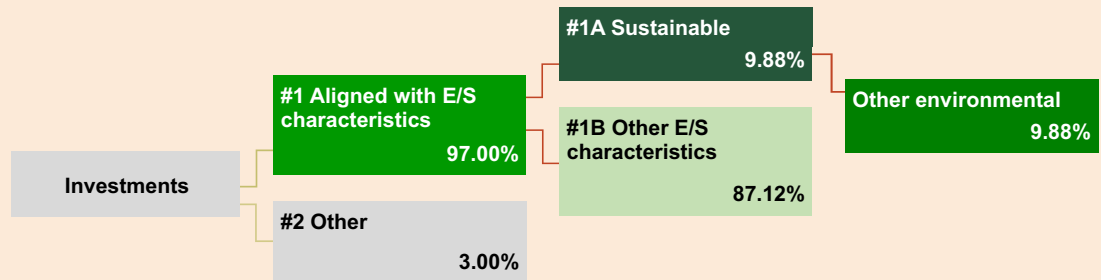

What was the proportion of sustainability-related investments?

9.88% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	29.78%
Financials	27.31%
Information Technology	18.72%
Materials	13.71%
Consumer Staples	4.43%
Health Care	1.57%
Energy	1.30%
Oil & Gas Exploration & Production	1.30%
Communication Services	1.28%
Consumer Discretionary	1.02%
Cash & Derivatives	0.80%
Other	0.08%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

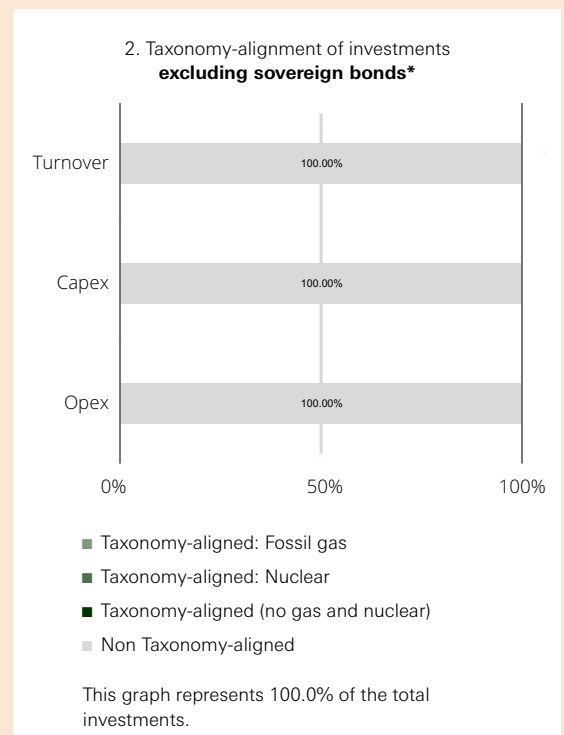

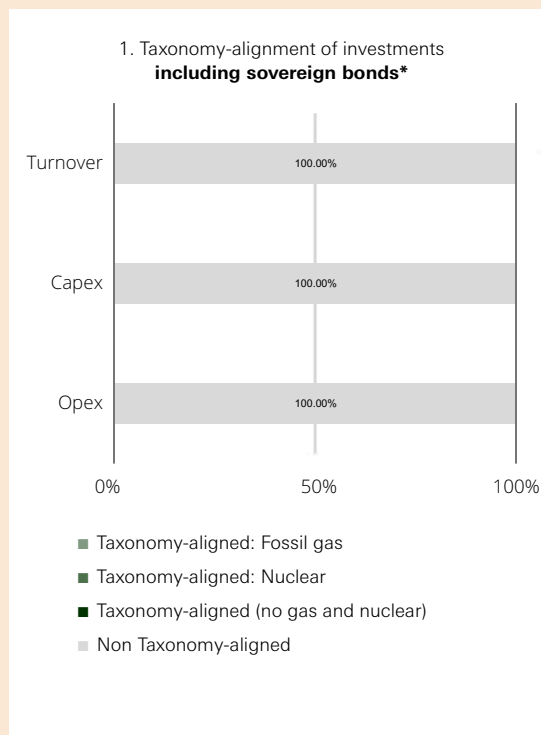

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 9.88%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

The sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - CHINESE EQUITY

Legal Entity Identifier: 21380041N4NYFPYHPQ91

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

It made **sustainable investments**
with an environmental objective:
%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: %

☒ No

✓ It **promoted Environmental/ Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 14.85% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	94.94	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.38	6.29
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	11.93%	11.80%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI China 10-40

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	94.94	NA
	31 March 2025	96.77	NA
	31 March 2024	97.73	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.38	6.29
	31 March 2025	5.83	5.77
	31 March 2024	4.97	5.29
Responsible business practice in line with UNGC and OECD principles

	31 March 2025	11.18%	14.55%
	31 March 2024	11.69%	15.33%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	27,302.62	423,968,694.19
	31 March 2025	38,069.43	424,471,029.79
	31 March 2024	33,766.55	377,996,142.42
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	42.62	140.23
	31 March 2025	64.10	158.86
	31 March 2024	58.33	157.26
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	99.78	262.52
	31 March 2025	91.05	237.58
	31 March 2024	81.15	234.06
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	11.93%	11.80%
	31 March 2025	11.18%	14.55%
	31 March 2024	11.69%	15.33%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI China 10-40

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Tencent Holdings Ltd	Communication Services	9.40%	China
Alibaba Group Holding Limited	Consumer Discretionary	9.12%	China
China Construction Bank Corporation Class H	Financials	5.51%	China

Cash and derivatives were excluded

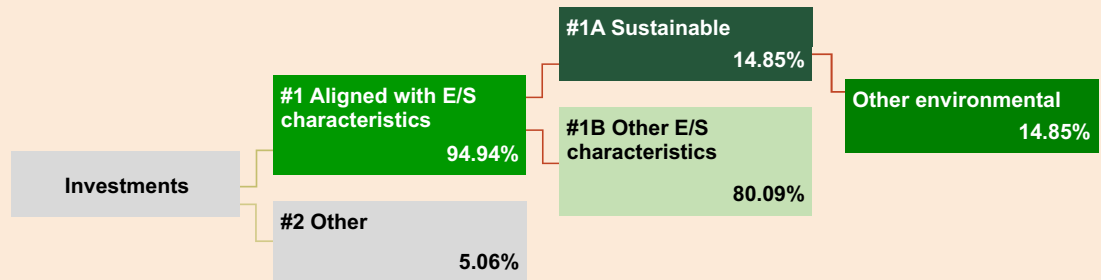

What was the proportion of sustainability-related investments?

14.85% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Consumer Discretionary	21.04%
Financials	19.02%
Communication Services	16.99%
Information Technology	14.67%
Industrials	8.04%
Health Care	7.65%
Materials	5.80%
Consumer Staples	1.75%
Cash & Derivatives	1.56%
Real Estate	1.46%
Government	1.21%
Energy	0.51%
Oil & Gas Exploration & Production	0.51%
Utilities	0.29%
Gas	0.03%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

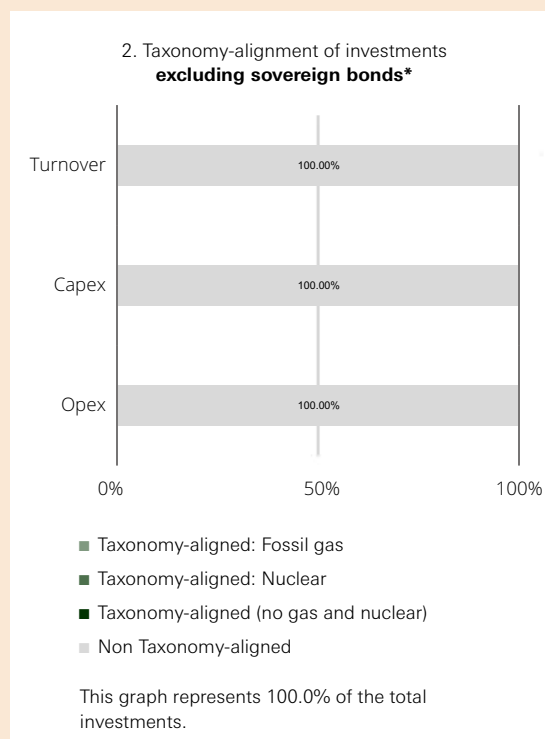

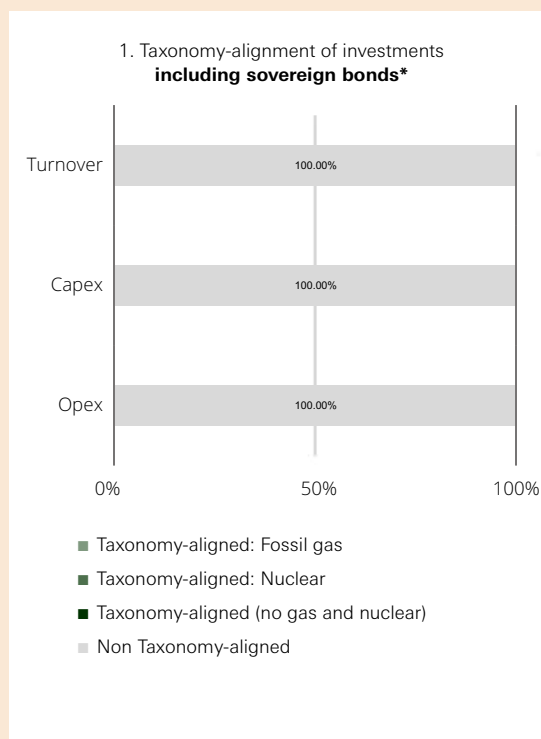

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%

OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 14.85%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

The sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROLAND EQUITY SMALLER COMPANIES

Legal Entity Identifier: 213800K2ESNFXN2ENI09

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.06% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	97.34	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.52	7.38
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI EMU Small Mid

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	97.34	NA
	31 March 2025	97.49	NA
	31 March 2024	97.43	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.52	7.38
	31 March 2025	7.39	7.23
	31 March 2024	7.48	7.28
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	67.28	118.47
	31 March 2025	81.96	128.58
	31 March 2024	62.52	154.21
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
13. Board gender diversity	31 March 2026	41.19%	40.05%
	31 March 2025	40.30%	39.86%
	31 March 2024	39.93%	39.54%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI EMU Small Mid

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
AIB Group plc	Financials	2.61%	Ireland
Elia Group SA/NV	Utilities	2.54%	Belgium
MTU Aero Engines AG	Industrials	2.47%	Germany
EDP Renovaveis SA	Utilities	2.23%	Spain
Banca Mediolanum SpA	Financials	2.10%	Italy
SBM Offshore NV	Energy	1.99%	Netherlands
Prysmian S.p.A.	Industrials	1.93%	Italy
NN Group N.V.	Financials	1.90%	Netherlands
MERLIN Properties SOCIMI, S.A.	Real Estate	1.78%	Spain
SCOR SE	Financials	1.77%	France
Leonardo SpA	Industrials	1.69%	Italy
Publicis Groupe SA	Communication Services	1.61%	France
Arcadis NV	Industrials	1.58%	Netherlands
BAWAG Group AG	Financials	1.58%	Austria
BE Semiconductor Industries N.V.	Information Technology	1.58%	Netherlands

Cash and derivatives were excluded

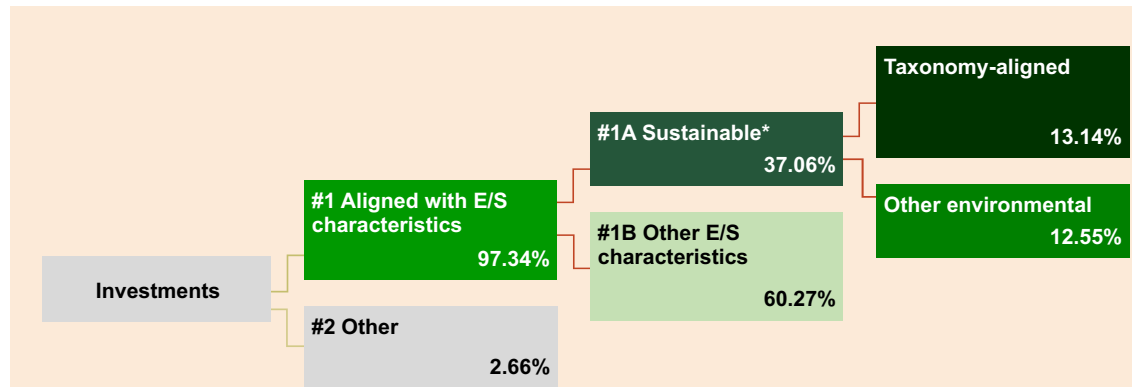

What was the proportion of sustainability-related investments?

37.06% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	26.30%
Financials	20.54%
Materials	8.28%
Consumer Discretionary	7.87%
Information Technology	6.20%
Communication Services	5.96%
Health Care	5.71%
Utilities	5.59%
<i>Electric Utilities</i>	<i>2.39%</i>
<i>Gas</i>	<i>0.19%</i>
Energy	5.18%
<i>Integrated Oil & Gas</i>	<i>1.74%</i>
<i>Oil & Gas Equipment & Services</i>	<i>2.61%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.57%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.25%</i>
Consumer Staples	4.63%
Real Estate	2.87%
Cash & Derivatives	0.86%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 13.14%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes:
 ☐ In fossil gas
 ☒ In nuclear energy

☐ No

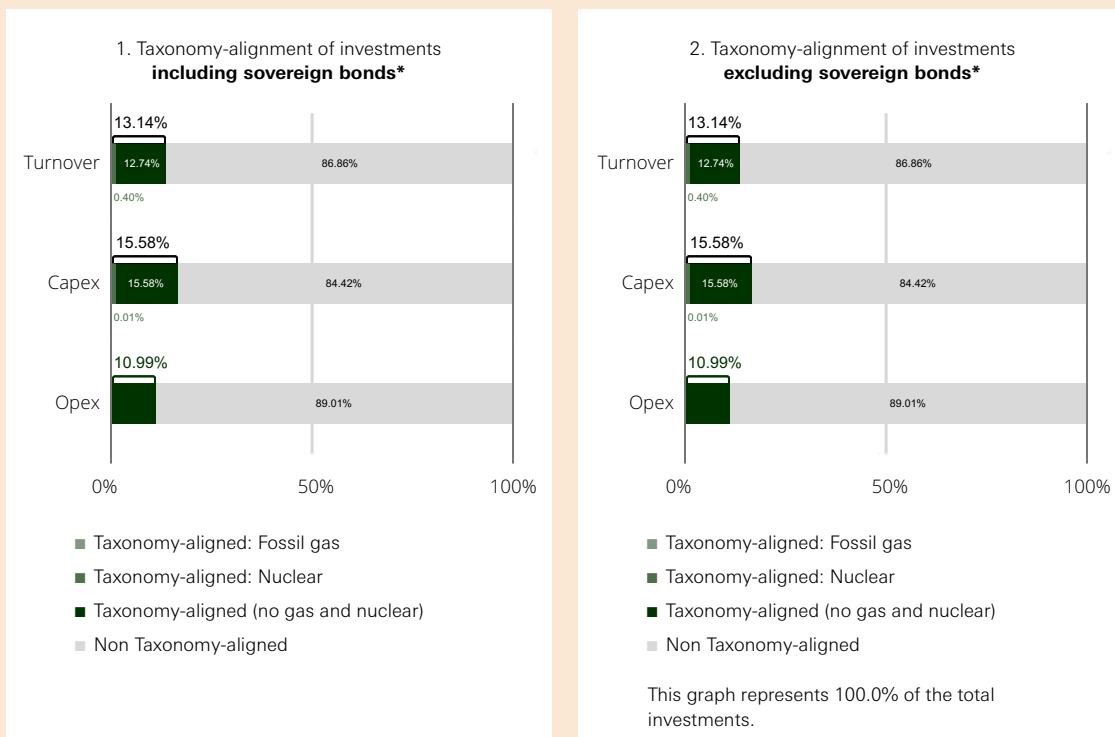

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 10.96%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.40%	0.03%	0.05%
Revenue - Taxonomy-aligned (no gas and nuclear)	12.74%	13.22%	6.06%
Revenue - Non Taxonomy-aligned	86.86%	86.74%	93.90%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	15.58%	15.08%	6.72%
CAPEX - Non Taxonomy-aligned	84.42%	84.92%	93.28%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	10.99%	12.73%	5.19%
OPEX - Non Taxonomy-aligned	89.01%	87.27%	94.81%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 12.55%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

The sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROLAND GROWTH

Legal Entity Identifier: 213800UUVN3ZTID5O892

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It **promoted Environmental/ Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact (“UNGC”) and OECD Guidelines for Multinational Enterprises (“OECD”) principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC’s proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund’s portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	98.78	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	8.09	7.77
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI EMU

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	98.78	NA
	31 March 2025	98.35	NA
	31 March 2024	98.29	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	8.09	7.77
	31 March 2025	8.36	7.79
	31 March 2024	8.44	7.81
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	87.82	114.88
	31 March 2025	85.54	99.11
	31 March 2024	85.95	109.50
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
13. Board gender diversity	31 March 2026	43.12%	41.74%
	31 March 2025	45.24%	41.89%
	31 March 2024	44.27%	41.63%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI EMU

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
ASML Holding NV	Information Technology	9.66%	Netherlands
SAP SE	Information Technology	6.29%	Germany
Schneider Electric SE	Industrials	5.52%	France
Air Liquide SA	Materials	4.67%	France
L'Oreal S.A.	Consumer Staples	4.13%	France
Siemens Aktiengesellschaft	Industrials	3.79%	Germany
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	3.74%	France
Deutsche Telekom AG	Communication Services	3.67%	Germany
Hermes International SCA	Consumer Discretionary	3.59%	France
Airbus SE	Industrials	3.55%	France
Industria de Diseno Textil, S.A.	Consumer Discretionary	3.53%	Spain

Cash and derivatives were excluded

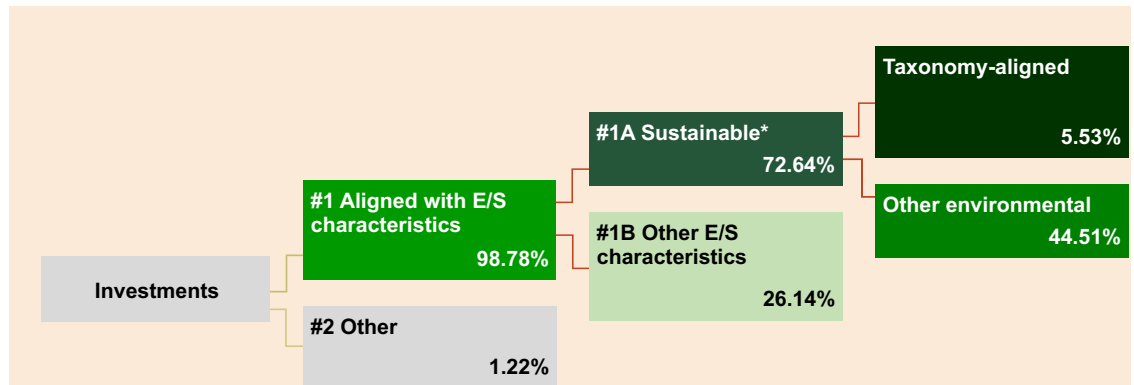

What was the proportion of sustainability-related investments?

72.64% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	27.43%
Information Technology	25.16%
Financials	13.28%
Consumer Discretionary	12.77%
Consumer Staples	7.31%
Materials	4.63%
Communication Services	4.16%
Health Care	4.05%
Cash & Derivatives	1.22%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 5.53%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

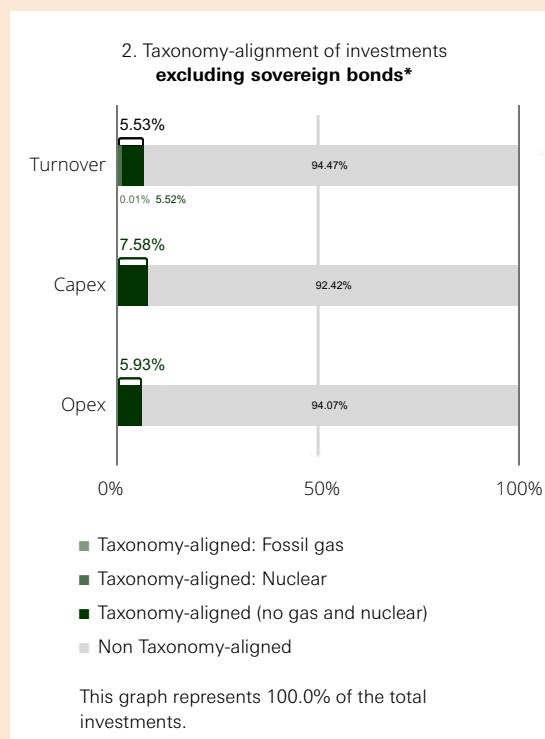

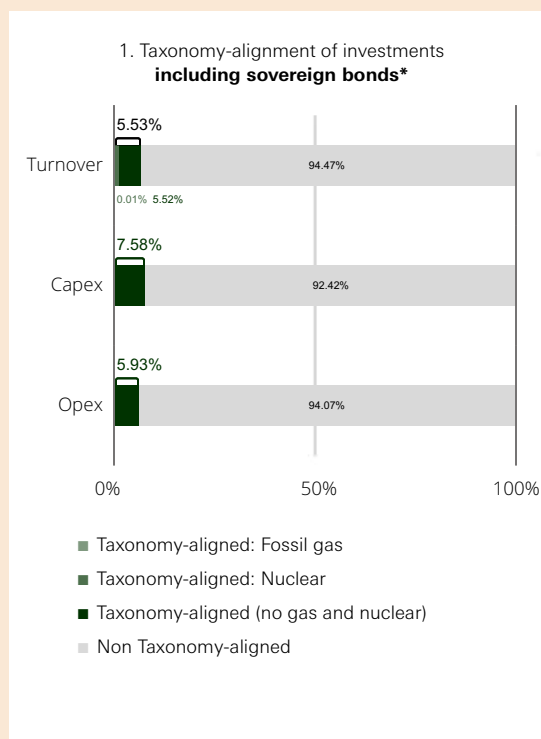

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 5.47%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.52%	4.06%	0.00%
Revenue - Non Taxonomy-aligned	94.47%	95.94%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	7.58%	6.35%	0.00%
CAPEX - Non Taxonomy-aligned	92.42%	93.65%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	5.93%	5.01%	0.00%
OPEX - Non Taxonomy-aligned	94.07%	94.99%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 44.51%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores with a lower carbon intensity than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. The Investment Adviser assessed companies board gender diversity resulting in a slightly higher PAI score than the benchmark. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROLAND VALUE

Legal Entity Identifier: 2138005UESNT8JGWI979

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.60% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	96.98	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	8.06	7.77
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI EMU

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	96.98	NA
	31 March 2025	96.27	NA
	31 March 2024	97.95	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	8.06	7.77
	31 March 2025	8.00	7.79
	31 March 2024	7.91	7.81
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	125.51	114.88
	31 March 2025	121.04	99.11
	31 March 2024	130.31	109.50
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
13. Board gender diversity	31 March 2026	42.77%	41.74%
	31 March 2025	43.03%	41.89%
	31 March 2024	42.33%	41.63%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI EMU

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Allianz SE	Financials	4.76%	Germany
Iberdrola SA	Utilities	4.43%	Spain
Banco Santander, S.A.	Financials	4.16%	Spain
UniCredit S.p.A.	Financials	4.11%	Italy
Societe Generale S.A. Class A	Financials	3.58%	France
ING Groep N.V.	Financials	3.54%	Netherlands
Erste Group Bank AG	Financials	3.34%	Austria
AXA SA	Financials	3.29%	France
ACS, Actividades de Construcción y Servicios SA	Industrials	3.11%	Spain
Siemens Aktiengesellschaft	Industrials	3.06%	Germany
Royal KPN NV	Communication Services	3.03%	Netherlands
TotalEnergies SE	Energy	2.99%	France
Koninklijke Ahold Delhaize N.V.	Consumer Staples	2.90%	Netherlands
Metso Corporation	Industrials	2.89%	Finland
Poste Italiane SpA	Financials	2.79%	Italy

Cash and derivatives were excluded

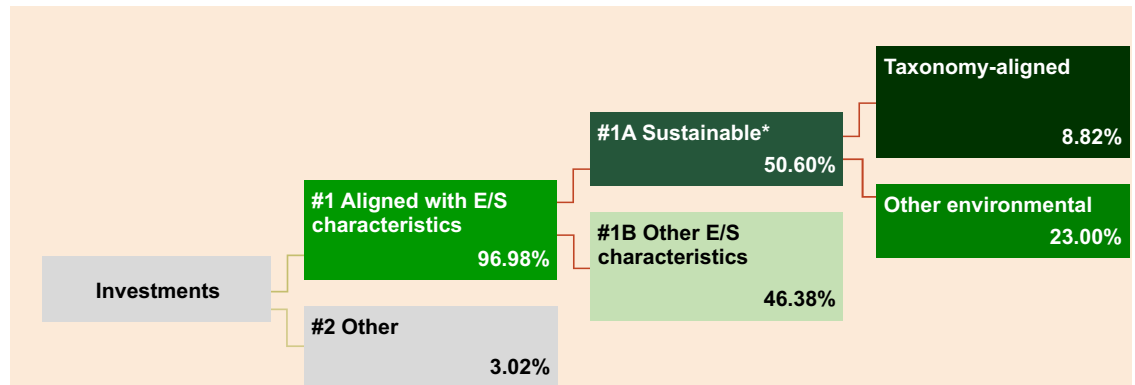

What was the proportion of sustainability-related investments?

50.60% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	29.84%
Industrials	20.51%
Utilities	9.99%
<i>Electric Utilities</i>	<i>6.35%</i>
<i>Multi-Utilities</i>	<i>3.64%</i>
Energy	7.56%
<i>Integrated Oil & Gas</i>	<i>7.56%</i>
Communication Services	6.48%
Health Care	6.38%
Consumer Staples	5.77%
Materials	4.57%
Consumer Discretionary	3.62%
Cash & Derivatives	3.02%
Real Estate	1.18%
Information Technology	1.07%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 8.82%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

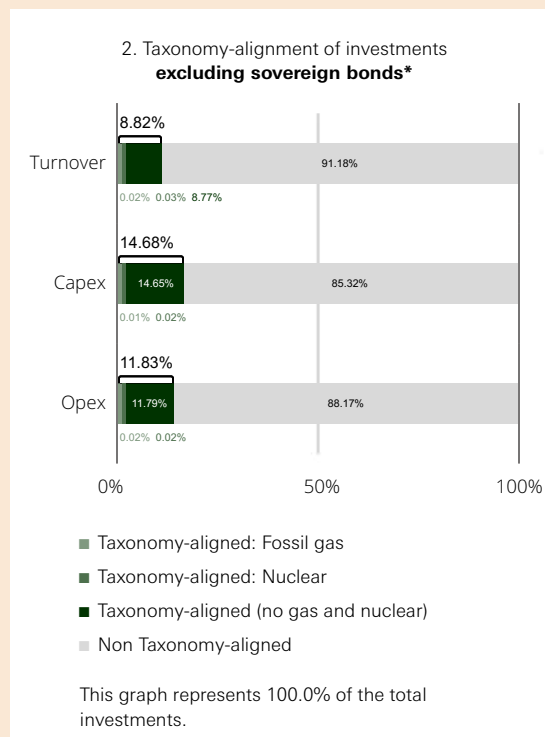

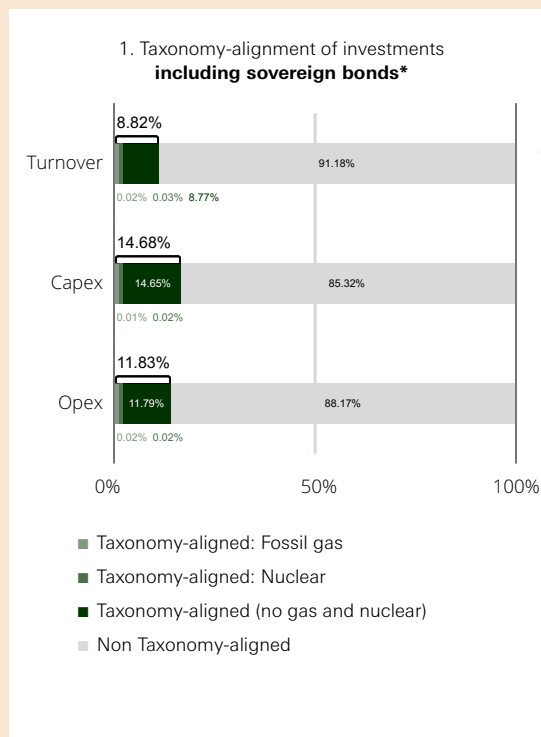

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 5.40%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.02%	0.01%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.03%	0.02%	0.01%
Revenue - Taxonomy-aligned (no gas and nuclear)	8.77%	7.05%	4.12%
Revenue - Non Taxonomy-aligned	91.18%	92.92%	95.87%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.04%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.02%	0.01%	0.03%
CAPEX - Taxonomy-aligned (no gas and nuclear)	14.65%	13.90%	9.85%
CAPEX - Non Taxonomy-aligned	85.32%	86.05%	90.12%
OPEX - Taxonomy-aligned: Fossil gas	0.02%	0.01%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.02%	0.02%	0.03%
OPEX - Taxonomy-aligned (no gas and nuclear)	11.79%	10.27%	6.38%
OPEX - Non Taxonomy-aligned	88.17%	89.70%	93.59%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 23.00%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

 What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

ESG analysis was embedded into the fundamental analysis of the stocks the investment teams holds and therefore contributed to all trading decisions.

Trades reflected a balanced integration of financial and non-financial criteria. To quote a few examples, among the most significant changes over the period were:

- We increased our holdings in a German pharmaceuticals and life sciences company, a Dutch telecommunications operator, and a Portuguese electric utilities company, which improved the ESG score of the fund. Those trades had a positive impact on carbon intensity too.

In addition, on an ongoing basis, the investment teams apply our stewardship policy and dialog with the companies, and also apply HSBC's voting policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROPE VALUE

Legal Entity Identifier: 213800NDHT1X7UMKBO83

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.13% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	98.98	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.83	7.76
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI Europe

...and compared to previous periods?

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	98.98	NA
	31 March 2025	96.84	NA
	31 March 2024	97.77	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.83	7.76
	31 March 2025	7.82	7.81
	31 March 2024	7.97	7.82
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.61%

	31 March 2024	0.00%	0.40%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	150.58	101.69
	31 March 2025	121.57	93.02
	31 March 2024	135.27	98.22
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
13. Board gender diversity	31 March 2026	40.74%	42.02%
	31 March 2025	42.01%	41.78%
	31 March 2024	41.03%	41.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.61%
	31 March 2025	0.00%	0.46%
	31 March 2024	0.00%	0.40%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI Europe

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
KBC Group N.V.	Financials	4.76%	Belgium
Commerzbank AG	Financials	4.44%	Germany
AstraZeneca PLC	Health Care	4.12%	United Kingdom of Great Britain and Northern Ireland

Cash and derivatives were excluded

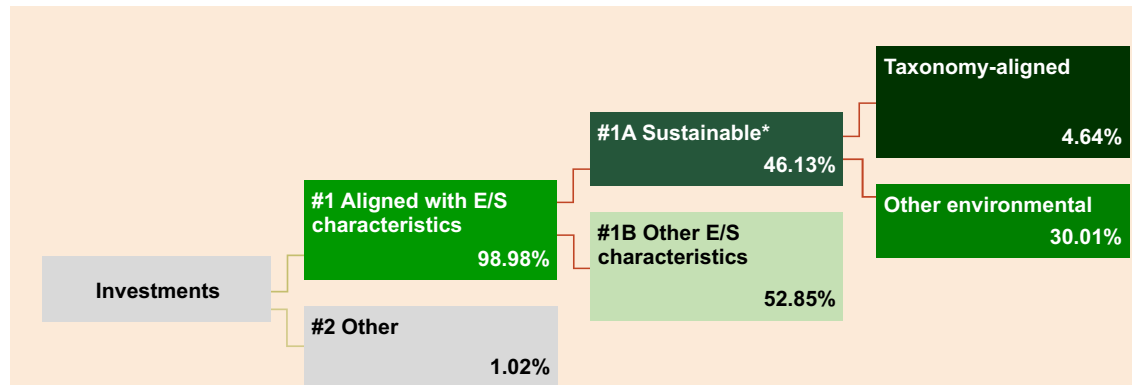

What was the proportion of sustainability-related investments?

46.13% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	31.18%
Industrials	14.86%
Materials	11.09%
Health Care	10.18%
Energy	6.96%
<i>Integrated Oil & Gas</i>	6.96%
Consumer Staples	6.86%
Utilities	6.49%
<i>Electric Utilities</i>	3.68%
<i>Multi-Utilities</i>	2.81%
Communication Services	6.12%
Consumer Discretionary	2.97%
Information Technology	2.26%
Cash & Derivatives	1.02%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 4.64%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

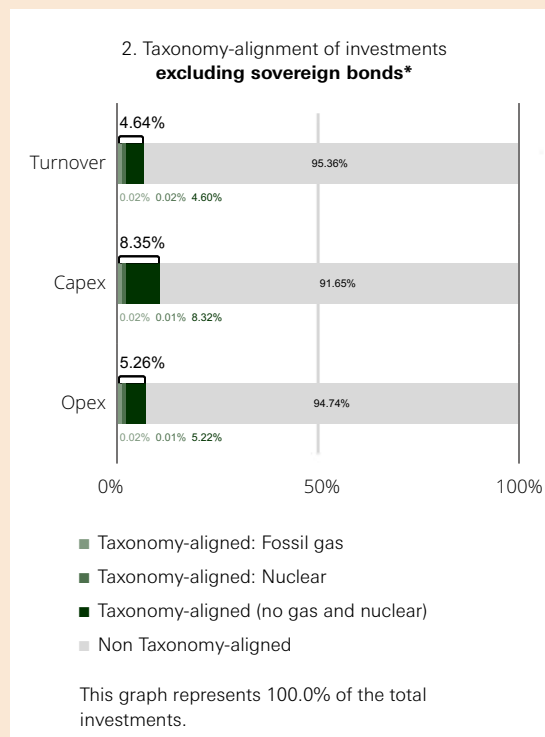

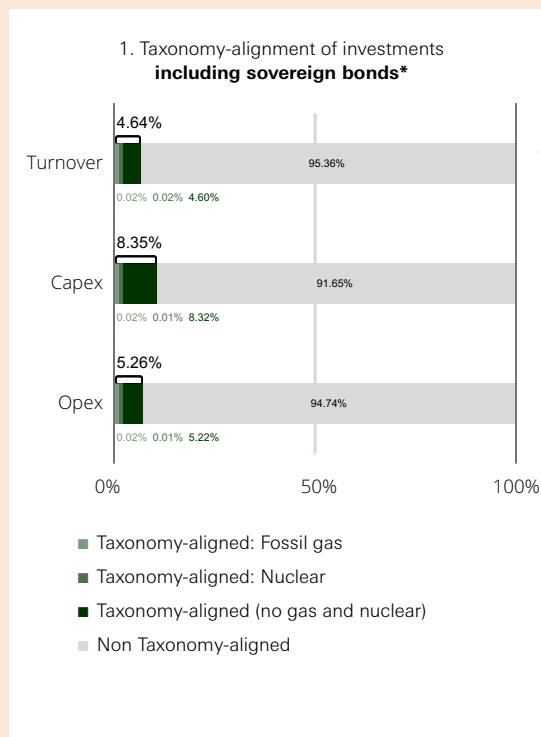

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 2.03%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.02%	0.01%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.02%	0.01%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	4.60%	4.76%	0.00%
Revenue - Non Taxonomy-aligned	95.36%	95.22%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.02%	0.03%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.01%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	8.32%	8.88%	0.00%
CAPEX - Non Taxonomy-aligned	91.65%	91.08%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.02%	0.01%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.01%	0.01%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	5.22%	5.55%	0.00%
OPEX - Non Taxonomy-aligned	94.74%	94.43%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 30.01%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

ESG analysis was embedded into the fundamental analysis of the stocks the investment teams hold and therefore contributed to all trading decisions.

Trades reflected a balanced integration of financial and non-financial criteria. To quote a few examples, among the most significant changes over the period were: we increased or initiated new holdings in a German pharmaceuticals and life sciences company, a Swiss pharmaceuticals company, a German building materials and cement company, a European aerospace and defense manufacturer and an Italian retail and commercial bank, on the other hand, we sharply decreased or exited a Dutch brewing company, a Danish pharmaceuticals company, a French business process outsourcing and customer experience services company, a Swedish banking group and a French glass packaging manufacturer. All in all, those trades slightly improved the ESG score and notably the carbon intensity and governance components, of the sub-fund.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EMERGING MARKETS EQUITY

Legal Entity Identifier: 213800LINXZ2GGCA7L71

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ ☐ Yes ☐ It made sustainable investments with an environmental objective: _% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: _%	☒ ☐ ☒ No ☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.88% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	96.55	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.54	6.38
E Pillar	6.66	6.10
S Pillar	5.45	5.43
G Pillar	5.14	5.11
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	108.33	323.85
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	6.96%	7.45%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI Emerging Markets

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	0.04%
	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	108.33	323.85
	31 March 2025	160.02	356.31
	31 March 2024	165.60	384.37
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	6.96%	7.45%
	31 March 2025	6.87%	7.88%
	31 March 2024	6.07%	7.40%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.07%
	31 March 2025	0.00%	0.04%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI Emerging Markets

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	10.05%	Taiwan
Tencent Holdings Ltd	Communication Services	6.90%	China
Samsung Electronics Co., Ltd.	Information Technology	6.43%	Korea

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

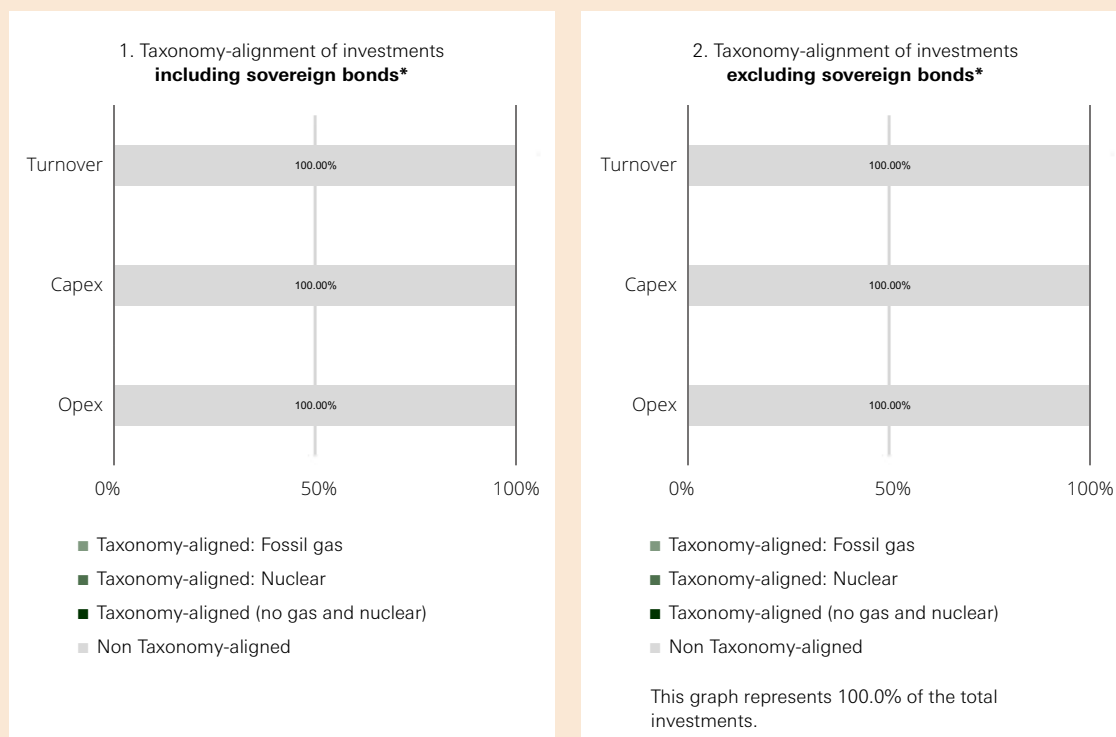

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 41.88%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CIRCULAR ECONOMY

Legal Entity Identifier: 213800KB6BO3Z43JHW60

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ ☒ ☒ Yes	☒ ☐ ☐ No
☒ It made sustainable investments with an environmental objective: 98.35%	☐ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sub-fund made a positive environmental, social and governance (“ESG”) effect by investing in a concentrated portfolio of companies that actively contributed to the transition to a more circular global economy, based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems, while providing a long term total return.

The sustainable investment objectives promoted by this sub-fund were:

1. Investment into a concentrated portfolio of companies that actively contributed to the transition to a more circular global economy, based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems.
2. The identification and analysis of a company’s environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles are identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

● ***How did the sustainability indicators perform?***

Sustainability Indicator	sub-fund	Reference Benchmark
Contribution to the transition to a more circular global economy	All sub-fund holdings, excluding cash were aligned to the transition of a more circular global economy	
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.77	7.26
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.35%
Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The sustainable investments in the sub-fund were assessed against the principle of 'do no significant harm' ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser used third-party research providers to monitor contributing companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	100.57	115.18
	31 March 2025	125.66	121.98
	31 March 2024	128.57	126.54
4. Exposure to companies active in the fossil fuel sector	31 March 2026	7.46%	9.56%
	31 March 2025	8.77%	9.91%
	31 March 2024	0.00%	7.20%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.35%
	31 March 2025	0.00%	1.29%
	31 March 2024	0.00%	1.39%

14. Exposure to controversial weapons	31 March 2026	0.00%	0.22%
(anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2025	0.00%	0.21%
	31 March 2024	0.00%	0.22%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI All Country World

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	4.42%	United States of America
TJX Companies Inc	Consumer Discretionary	4.27%	United States of America
Microsoft Corporation	Information Technology	3.84%	United States of America
Waste Management, Inc.	Industrials	3.76%	United States of America
Xylem Inc.	Industrials	3.44%	United States of America
Cisco Systems, Inc.	Information Technology	3.32%	United States of America
Intesa Sanpaolo S.p.A.	Financials	3.18%	Italy
Autodesk, Inc.	Information Technology	2.94%	United States of America
Veolia Environnement SA	Utilities	2.87%	France
Stantec Inc	Industrials	2.63%	Canada
Cintas Corporation	Industrials	2.61%	United States of America
Brambles Limited	Industrials	2.53%	Australia
Munchener Ruckversicherungs-Gesellschaft AG	Financials	2.49%	Germany
SSE PLC	Utilities	2.37%	United Kingdom of Great Britain and Northern Ireland
Novonesis A/S Class B	Materials	2.34%	Denmark

Cash and derivatives were excluded

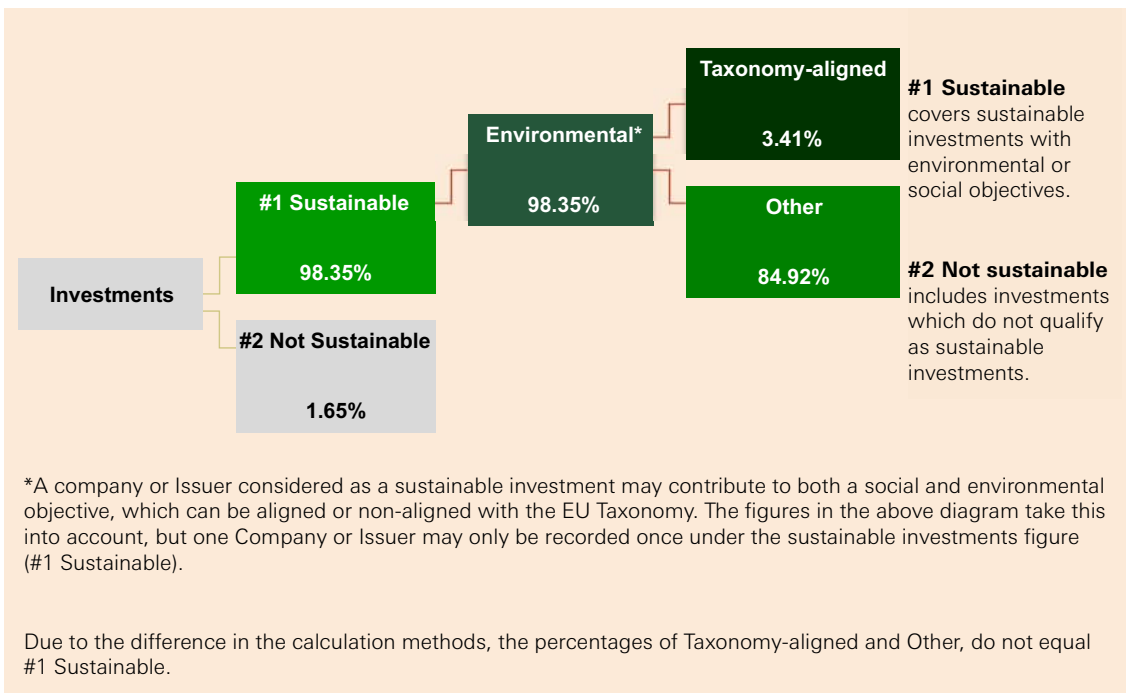

What was the proportion of sustainability-related investments?

98.35% of the portfolio was invested in sustainable investments.

What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	27.25%
Information Technology	21.61%
Consumer Discretionary	9.50%
Financials	9.17%
Materials	7.31%
Real Estate	6.06%
Consumer Staples	5.60%
Utilities	5.42%
<i>Electric Utilities</i>	<i>2.78%</i>
<i>Multi-Utilities</i>	<i>2.65%</i>
Communication Services	3.86%
Health Care	2.57%
Cash & Derivatives	1.65%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 3.41%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

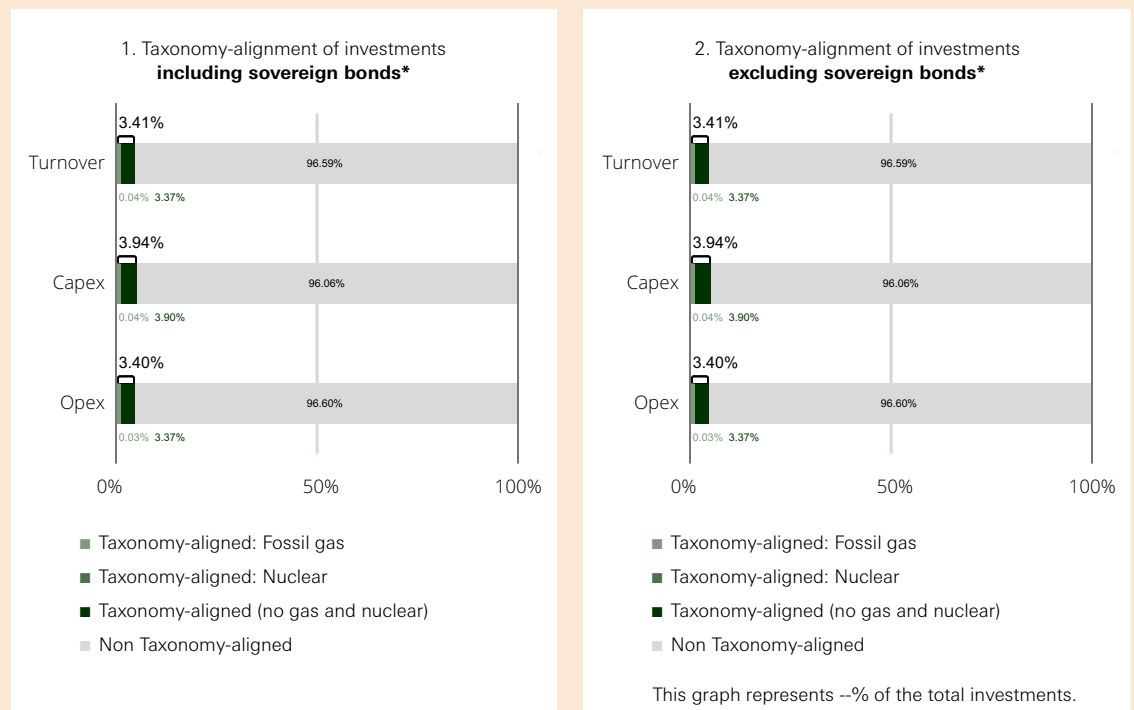

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the fund's share of investment in transitional activities was 0.49% and the share of investment in enabling activities was 1.45%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

● *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.04%	0.01%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.37%	3.46%	3.34%
Revenue - Non Taxonomy-aligned	96.59%	96.53%	96.66%
CAPEX - Taxonomy-aligned: Fossil gas	0.04%	0.07%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	96.06%	94.60%	96.61%
CAPEX - Taxonomy-aligned (no gas and nuclear)	3.90%	5.33%	3.39%
OPEX - Taxonomy-aligned: Fossil gas	0.03%	0.02%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	3.37%	4.14%	3.37%
OPEX - Non Taxonomy-aligned	96.60%	95.84%	96.63%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 84.92%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The sub-fund has delivered a positive environmental, social and governance (“ESG”) impact by investing in a concentrated portfolio of companies that actively contributed to the transition to a more circular global economy, based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems.

The sub-fund had a minimum of 90% of its net assets in equities and equity equivalent securities of companies with exposure to circular economy themes (“Circular Economy Themes”) which are domiciled in, based in, carry out business activities in, or are listed on a Regulated Market in any country including both developed markets and Emerging Markets.

At any time, 100% of the portfolio assets are whitelisted in accordance with our Sustainable Investment Framework which incorporates the application of Excluded Activities in accordance with HSBC Asset Management's Responsible Investment Policies and our proprietary company assessment of thematic alignment, by leveraging our internal circular economy research. The latter consists of identifying two types of companies:

1. "Enablers" with at least 20% revenue alignment to our proprietary Circular Economy Taxonomy
2. "Trailblazers" that integrate circular economy principles in their own operation to generate higher financial and sustainability efficiency, with a minimum score of 30 as measured by our circularity assessment tool.

The portfolio ESG score is higher than the weighted average of the constituents of the MSCI All Country World (the "Reference Benchmark") after eliminating 20% of the lowest ESG scored issuers from the Reference Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CLIMATE SOLUTIONS
(Previously named GLOBAL EQUITY CLIMATE CHANGE)

Legal Entity Identifier: 213800BN2PIFBP7BXW47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.16% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in met minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments compared to the MSCI AC World Index.
4. Responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
5. Investment into companies that actively contributed to climate change mitigation and adaptation ("Climate Solutions").
6. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund meeting minimum ESG standards	90.19	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	7.92	6.63
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	106.87	135.09
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.35%
Percentage of the sub-fund invested in equities of companies that contributed to Climate Solutions	92.79%	NA
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI AC World Index.

Please note that the environmental and social characteristics promoted by this sub-fund changed on 19 February 2026, and the new criteria has therefore been used within this report.

...and compared to previous periods?

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	90.19	NA
	31 March 2025	96.82	NA
	31 March 2024	99.08	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	7.92	6.63
	31 March 2025	8.12	6.71
	31 March 2024	8.10	6.78

Consideration of lower carbon intensity investments

GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	106.87	135.09
	31 March 2025	67.69	131.32
	31 March 2024	62.14	137.11

Responsible business practice in line with UNGC and OECD principles

Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.35%
	31 March 2025	0.00%	1.29%
	31 March 2024	0.00%	1.39%

Percentage of the sub-fund invested in equities of companies that contribute to Climate Solutions

31 March 2026	92.79%	NA
31 March 2025	NA	NA
31 March 2024	NA	NA

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.22%
	31 March 2025	0.00%	0.21%
	31 March 2024	0.00%	0.22%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	106.87	135.09
	31 March 2025	67.69	131.32
	31 March 2024	62.14	137.11
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.35%
	31 March 2025	0.00%	1.29%
	31 March 2024	0.00%	1.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.22%
	31 March 2025	0.00%	0.21%
	31 March 2024	0.00%	0.22%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI All Country World

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	5.76%	United States of America
Trane Technologies plc	Industrials	4.69%	United States of America
Ecolab Inc.	Materials	3.61%	United States of America
Schneider Electric SE	Industrials	3.51%	France
Taiwan Semiconductor Manufacturing Co., Ltd. Sponsored ADR	Information Technology	3.29%	Taiwan
Vertiv Holdings Co. Class A	Industrials	3.20%	United States of America
Cadence Design Systems, Inc.	Information Technology	3.10%	United States of America
E.ON SE	Utilities	3.06%	Germany
Prysmian S.p.A.	Industrials	2.66%	Italy
Compass Group PLC	Consumer Discretionary	2.62%	United Kingdom of Great Britain and Northern Ireland
NVIDIA Corporation	Information Technology	2.51%	United States of America
Munchener Ruckversicherungs-Gesellschaft AG	Financials	2.50%	Germany
SAP SE	Information Technology	2.48%	Germany
ASM International N.V.	Information Technology	2.47%	Netherlands
Autodesk, Inc.	Information Technology	2.41%	United States of America

Cash and derivatives were excluded

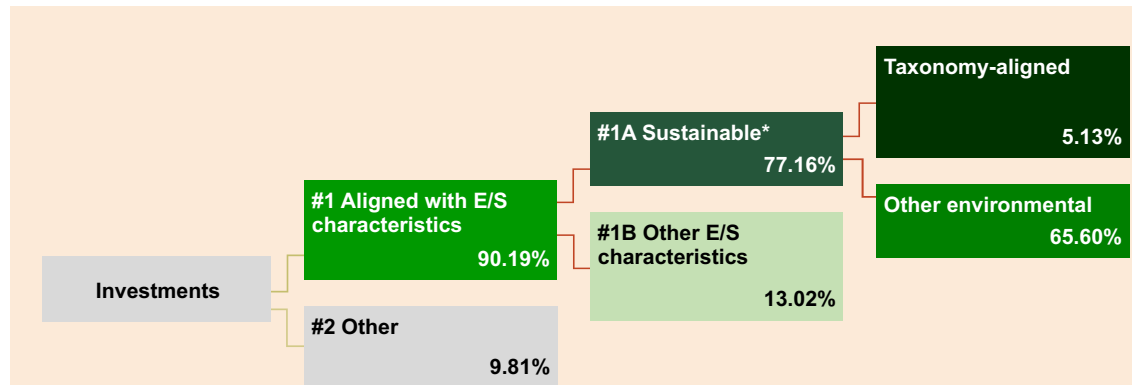

What was the proportion of sustainability-related investments?

77.16% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	42.56%
Information Technology	29.99%
Materials	8.82%
Utilities	6.73%
<i>Electric Utilities</i>	1.72%
<i>Multi-Utilities</i>	5.01%
Consumer Discretionary	4.76%
Financials	2.45%
Real Estate	1.89%
Health Care	1.50%
Cash & Derivatives	1.30%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 5.13%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:
 ☐ In fossil gas
 ☐ In nuclear energy

☒ No

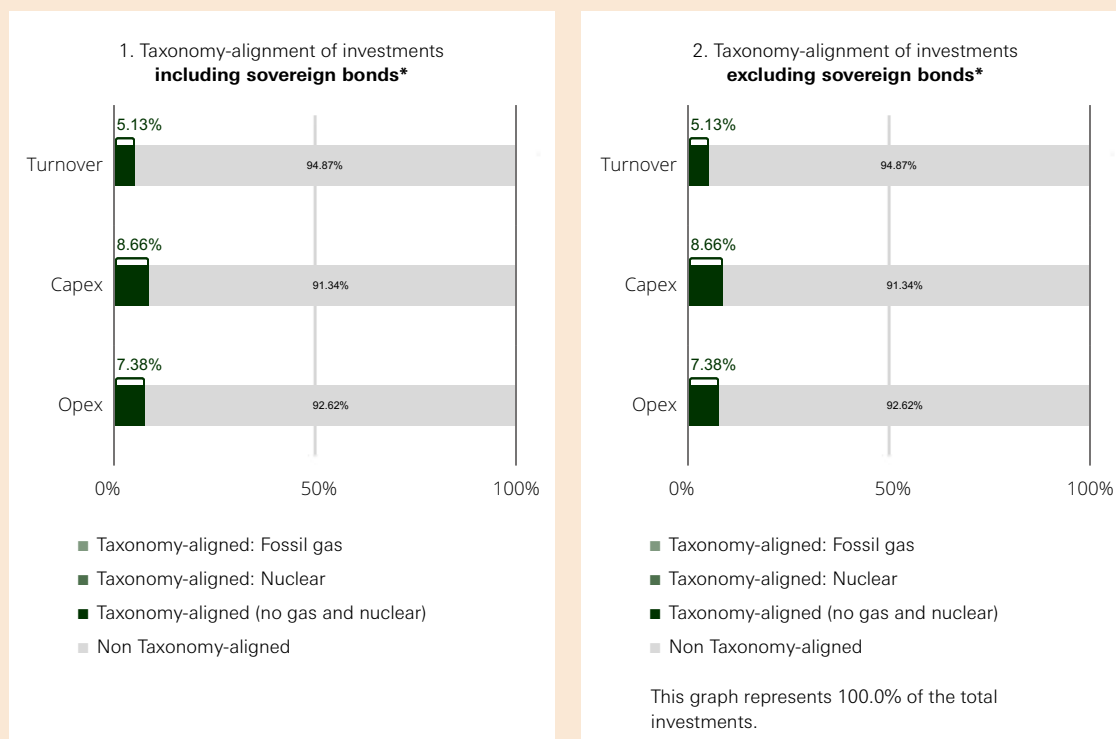

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 4.96%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.02%	0.02%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.13%	5.99%	7.89%
Revenue - Non Taxonomy-aligned	94.87%	93.99%	92.10%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.02%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	8.66%	9.90%	10.33%
CAPEX - Non Taxonomy-aligned	91.34%	90.09%	89.67%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	7.38%	8.02%	9.14%
OPEX - Non Taxonomy-aligned	92.62%	91.98%	90.86%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 65.60%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reference period, the sub-fund promoted environmental characteristics by investing in a concentrated portfolio of companies that actively contributed to climate solutions. The sub-fund had a minimum of 80% of its net assets in equities and equity equivalent securities of companies with at least 20% revenue exposure to climate solutions themes. In addition, the sub-fund incorporated targets around ESG standards and carbon intensity. The investment advisor did not invest in any of the Excluded Activities as detailed in the Prospectus and the Pre-Contractual Disclosure.

The name of the sub-fund changed during the reporting period from Global Equity Climate Change to Global Equity Climate Solutions.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL REAL ESTATE EQUITY

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 37.72% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	98.47	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.76	6.35
Consideration of lower carbon intensity investments		
GHG Emissions - Metric tons CO2 equivalents	4,374.34	13,221,462.17
Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	7.50	8.41
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	96.22	101.81
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

	31 March 2024	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	4,374.34	13,221,462.17
	31 March 2025	3,751.35	12,059,287.97
	31 March 2024	3,521.35	3,787,332.99
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	7.50	8.41
	31 March 2025	5.74	7.51
	31 March 2024	6.16	7.08
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	96.22	101.81
	31 March 2025	80.05	95.77
	31 March 2024	79.88	77.31
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - FTSE EPRA Nareit Developed

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Welltower Inc.	Real Estate	7.57%	United States of America
Prologis, Inc.	Real Estate	6.95%	United States of America
Equinix, Inc.	Real Estate	5.55%	United States of America
Realty Income Corporation	Real Estate	3.41%	United States of America

Mitsubishi Estate Company, Limited	Real Estate	2.25%	Japan
Unibail-Rodamco-Westfield SE Stapled Secs Cons of 1 Sh Unibail Rodamco + 1 Sh WFD Unib Rod	Real Estate	2.23%	France

Cash and derivatives were excluded

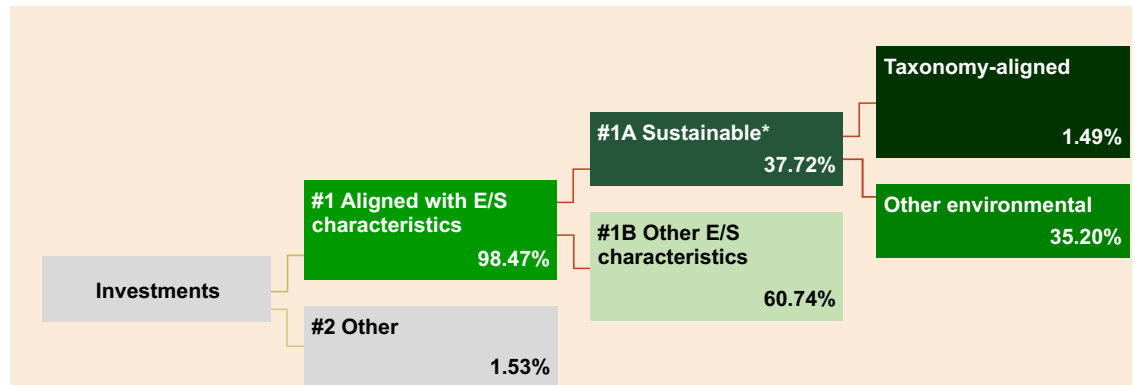

What was the proportion of sustainability-related investments?

37.72% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Real Estate	98.24%
Health Care	1.26%
Cash & Derivatives	0.49%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.49%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

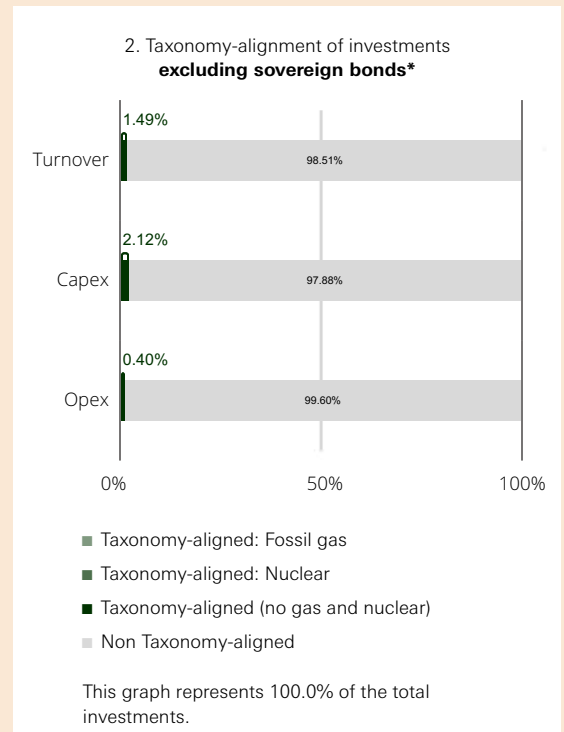

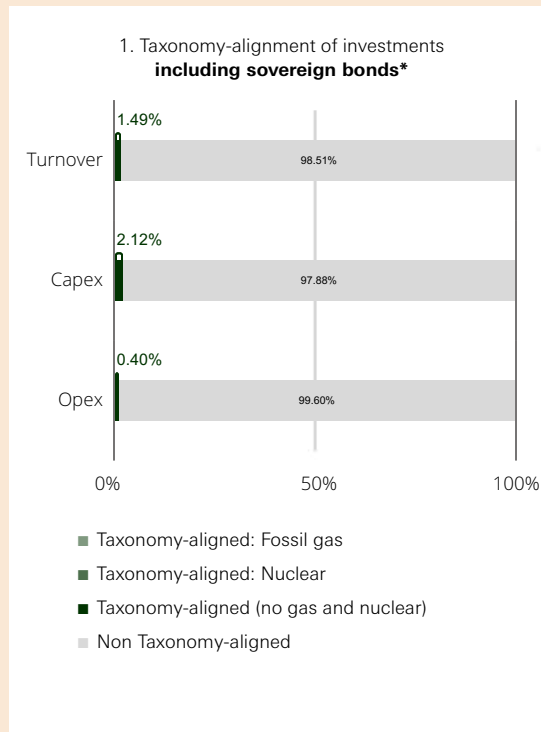

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.49%	0.95%	0.34%
Revenue - Non Taxonomy-aligned	98.51%	99.05%	99.66%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.12%	1.57%	0.61%
CAPEX - Non Taxonomy-aligned	97.88%	98.43%	99.39%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.40%	0.86%	0.33%
OPEX - Non Taxonomy-aligned	99.60%	99.14%	99.67%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 35.20%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores better than the benchmark.

The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY QUALITY INCOME

(Previously named GLOBAL SUSTAINABLE EQUITY INCOME)

Legal Entity Identifier: 213800P8MQVXCNL9A447

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.38% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of lower carbon intensity investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	99.40	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	8.12	6.66
Consideration of lower carbon intensity investments		
GHG Emissions - Metric tons CO2 equivalents	4,291.72	2,294,526,195.38
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	65.09	112.49
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.61%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		
The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.		
Reference Benchmark - MSCI World		

● *...and compared to previous periods?*

	31 March 2025	0.00%	0.54%
	31 March 2024	0.00%	0.69%

Excluded Activities

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.24%
	31 March 2025	0.00%	0.23%
	31 March 2024	0.00%	0.24%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm (“DNSH”) to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts (“PAIs”).

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of ‘sustainable investments’ within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	4,291.72	2,294,526,195.38
	31 March 2025	5,569.54	2,197,380,000.00
	31 March 2024	5,767.96	2,397,199,103.00

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	65.09	112.49
	31 March 2025	55.30	105.51
	31 March 2024	58.37	109.67
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.61%
	31 March 2025	0.00%	0.54%
	31 March 2024	0.00%	0.69%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.24%
	31 March 2025	0.00%	0.23%
	31 March 2024	0.00%	0.24%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	6.39%	United States of America
Microsoft Corporation	Information Technology	5.14%	United States of America
Apple Inc.	Information Technology	3.84%	United States of America

Cash and derivatives were excluded

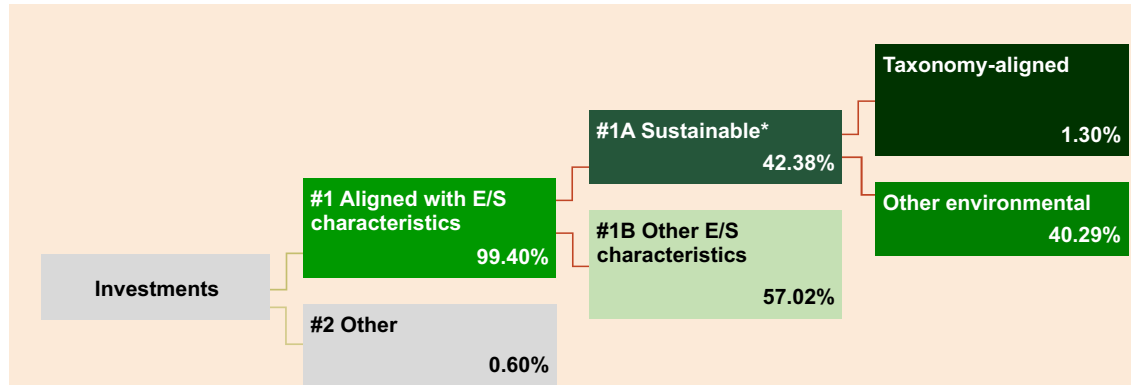

What was the proportion of sustainability-related investments?

42.38% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	27.66%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.30%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

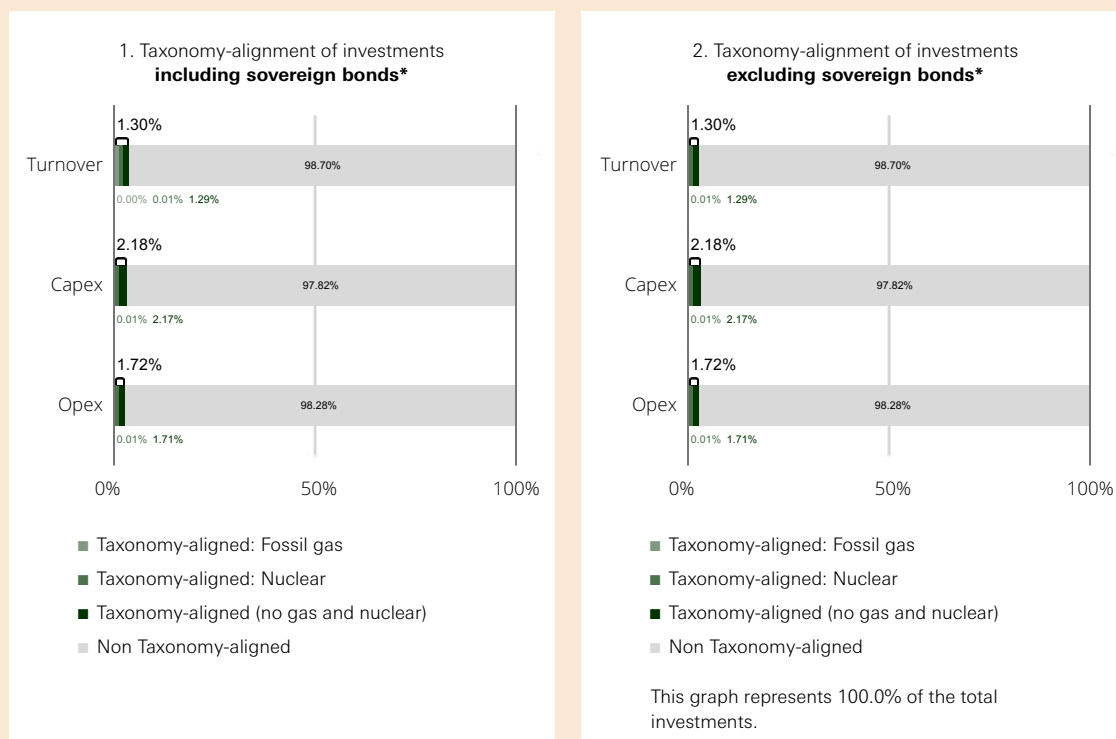

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.97%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.29%	1.32%	0.73%
Revenue - Non Taxonomy-aligned	98.70%	98.68%	99.27%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.17%	1.95%	1.17%
CAPEX - Non Taxonomy-aligned	97.82%	98.05%	98.83%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.71%	1.54%	0.82%
OPEX - Non Taxonomy-aligned	98.28%	98.46%	99.18%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 40.29%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 75.34% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics (“E/S characteristics”) promoted by this sub-fund were:

1. A minimum proportion of the sub-fund’s investments met minimum ESG standards, i.e. the companies that the sub-fund invested in met minimum ESG and E, and S and G score levels.
2. Investment into in a concentrated portfolio of equities of companies that may have supported increasingly constrained healthcare budgets world-wide, including patient accessibility to care and affordability.
3. Responsible business practices in accordance with UN Global Compact Principles for business.
4. Excluding activities covered by HSBC Asset Management’s Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the “Excluded Activities”).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	91.63	NA
Sustainable Healthcare Score		
Sustainable Healthcare Score - Cost Savings	0.34	NA
Sustainable Healthcare Score - Clinical Outcomes	0.71	NA
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World Health Care

Please note that the environmental and social characteristics promoted by this sub-fund changed on 16 May 2025, and the new criteria has therefore been used within this report.

	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World Health Care

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
AstraZeneca PLC	Health Care	4.77%	United Kingdom of Great Britain and Northern Ireland

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

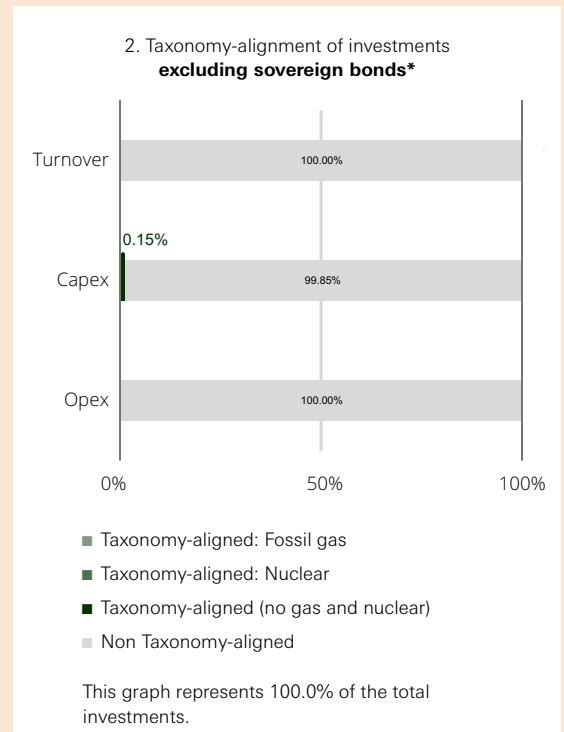

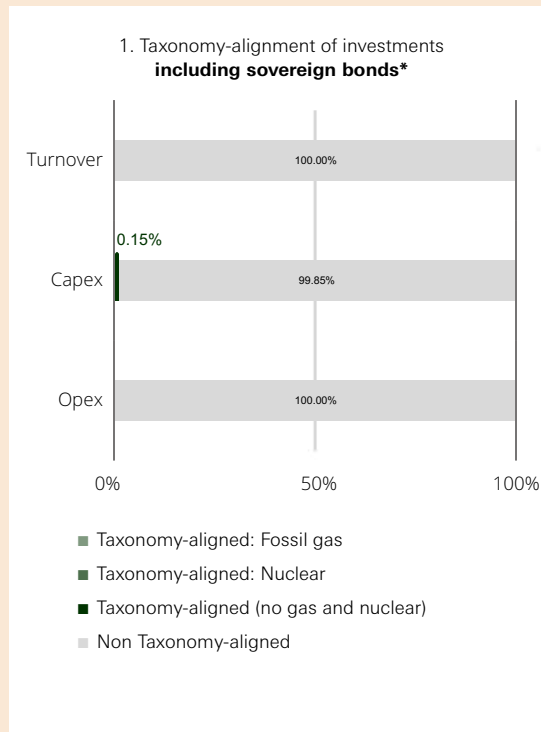

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 56.63%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund invested 56.63% in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the sub-fund aimed to invest all assets, with a minimum of 80% of its net assets, in investments that met the social characteristics of its investment theme. The investment theme which met these characteristics was to invest in companies that promoted affordable healthcare. This was determined by companies that scored neutral or positive with our sustainable healthcare care score which assesses products and services that delivered lower cost and effective healthcare solutions, while minimising overall ESG risk as demonstrated by minimum standards of ESG scores.

A minimum of 80% of the sub-fund's net assets was in equities and equity equivalent securities of 'Sustainable Healthcare Companies', which were domiciled in, based in, carried out business activities in, or were listed on a Regulated Market in, any country including both developed and emerging markets. 'Sustainable Healthcare Companies' were identified through fundamental analysis of the healthcare sector and sub-sectors to identify companies with at least 10% of their revenue associated with products that deliver improved clinical benefits and cost saving, which is indicative of promoting sustainable healthcare.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.30% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable for this sub-fund.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable for this sub-fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable for this sub-fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	131,640.64	277,369,978.43
	31 March 2025	86,422.95	940,992,137.55
	31 March 2024	68,755.01	1,031,256,894.87
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	78.66	222.93
	31 March 2025	66.49	221.25
	31 March 2024	101.61	239.53
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	396.16	1,085.42
	31 March 2025	330.97	951.84
	31 March 2024	396.72	897.70
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.13%

	31 March 2024	0.00%	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Cheniere Energy, Inc.	Energy	5.88%	United States of America
Eversource Energy	Utilities	4.87%	United States of America
Sempra	Utilities	4.70%	United States of America
American Tower Corporation	Real Estate	4.69%	United States of America
Targa Resources Corp.	Energy	4.44%	United States of America
Cellnex Telecom S.A.	Communication Services	4.42%	Spain
Enbridge Inc.	Energy	4.34%	Canada
Pembina Pipeline Corporation	Energy	4.34%	Canada
Pennon Group Plc	Utilities	4.10%	United Kingdom of Great Britain and Northern Ireland
PG&E Corporation	Utilities	3.87%	United States of America
Royal Vopak NV	Energy	3.73%	Netherlands
Edison International	Utilities	3.54%	United States of America

Cash and derivatives were excluded

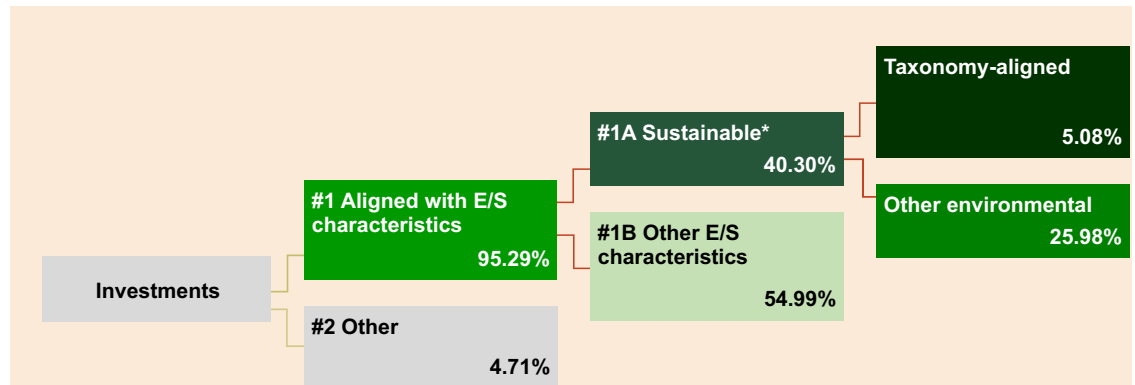

What was the proportion of sustainability-related investments?

40.30% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Utilities	33.80%
<i>Electric Utilities</i>	15.81%
<i>Gas</i>	2.68%
<i>Multi-Utilities</i>	10.61%
Energy	31.71%
<i>Oil & Gas Storage & Transportation</i>	31.71%
Industrials	17.44%
Communication Services	8.62%
Real Estate	7.97%
Cash & Derivatives	0.46%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 5.08%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

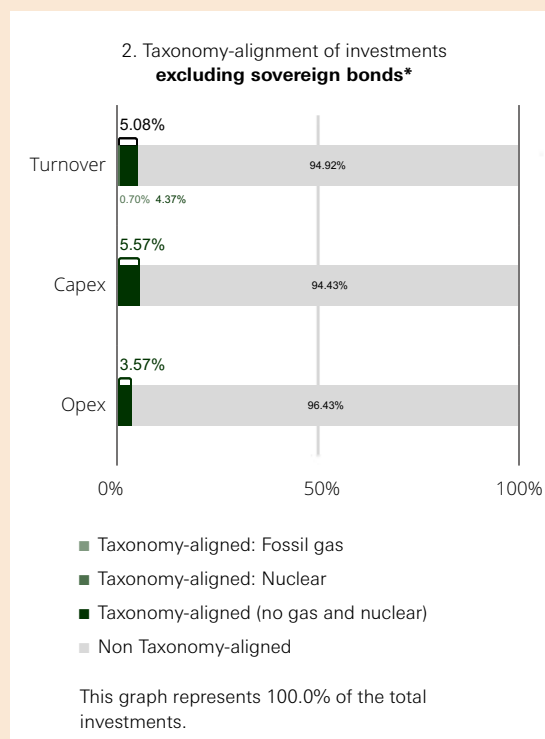

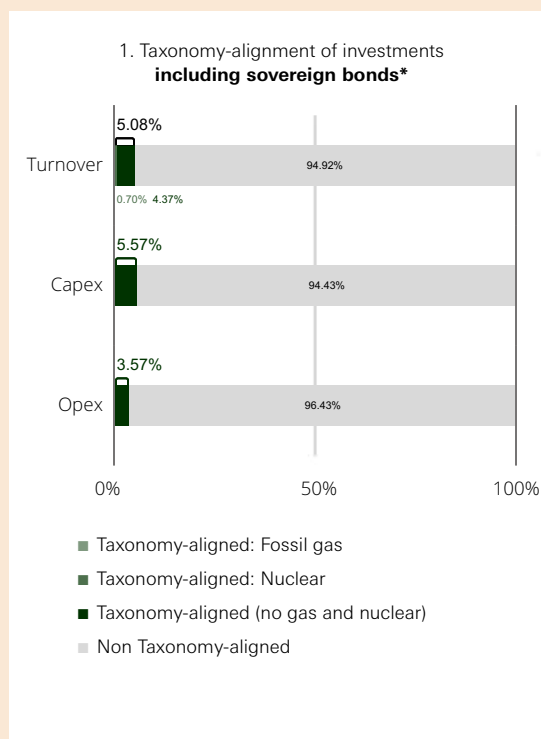

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 10.96%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.70%	0.05%	0.03%
Revenue - Taxonomy-aligned (no gas and nuclear)	4.37%	5.70%	1.65%
Revenue - Non Taxonomy-aligned	94.92%	94.25%	98.32%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	5.57%	6.58%	1.79%
CAPEX - Non Taxonomy-aligned	94.43%	93.42%	98.21%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	3.57%	5.83%	1.48%
OPEX - Non Taxonomy-aligned	96.43%	94.17%	98.52%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 25.98%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund provided a long term total return by investing in a concentrated, globally diversified portfolio of listed infrastructure securities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund aimed to do this with a higher ESG rating, as provided by established third party sources subject to additional HSBC proprietary analysis, calculated as a market cap weighted average of the ESG ratings given to the companies of the sub-fund’s investments, than the weighted average of the investable infrastructure equity universe. The sub-fund achieved a higher ESG score than the HSBC Global Infrastructure Equity Investment Universe.

The sub-fund used a bottom-up quality and valuation-based investment approach, which aimed to identify listed infrastructure related securities whose underlying assets were considered to have stable long term cash flows, issued by companies with strong management teams and appropriate capital structures and which were favourably priced. Overlaying this was a top-down view on specific infrastructure sectors and geographies.

The sub-fund's investments were diversified across geographic regions and infrastructure related sectors.

The investment decision making process integrated ESG metrics in a number of ways:

- Apportioning a minimum 25% of an infrastructure related security's quality score to ESG metrics.
- Excluding companies with a low ESG rating and companies that were considered to be non-compliant with the UN Global Compact Principles. This exclusion was at the discretion of the Investment Adviser. Companies with an improving but still low ESG rating and companies with a discernible direction of travel towards UN Global Compact Principles compliance may have still been invested in.
- Conducting enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.
- Engaging with multiple stakeholders on various ESG matters such as energy transition, regulation and governance.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

● *How did this financial product perform compared with the broad market index?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CLIMATE TRANSITION

Legal Entity Identifier: 213800ENBN1SRILVHQ60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● ☐ Yes

It made **sustainable investments**
with an environmental objective:
_ %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments** with a social objective: _%

☒ ☐ ☒ **No**

✓ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.76% of sustainable investments

- ✓ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

- ✓ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in met minimum ESG and E, and S and G score levels.
2. Consideration of lower carbon intensity investments compared to the Reference Benchmark.
3. Responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. Identification of companies on a clear and measurable climate transition pathway as informed by HSBC Asset Management's proprietary climate transition assessment to determine a company's progress or commitment towards alignment with "Net Zero" pathways.
5. The sub-fund identified revenues of investee companies that were considered to be providing Green Solutions. For example revenues that were linked to technologies, services and tools that mitigated or eliminated or contributed to the removal of Greenhouse gasses.
6. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the EU Climate Transition Benchmark exclusions (together referred to as the "Excluded Activities").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund meeting minimum ESG standards	98.66	NA
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	98.40	112.49
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.61%
Clear and measurable climate transition pathway - Percentage of companies positively categorised within the HSBC Asset Management proprietary climate transition assessment	89.92%	NA
Implied Temperature Rise - Degrees Celsius	2.1	2.7
Green Solutions - Weighted average percentage of green solutions	47.42%	40.01%
Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World

...and compared to previous periods?

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund meeting minimum ESG standard	31 March 2026	98.66	NA
	31 March 2025	98.93	NA
	31 March 2024	98.89	NA
Consideration of lower carbon intensity investments			
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	98.40	112.49
	31 March 2025	52.53	105.51
	31 March 2024	54.03	109.67
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.61%
	31 March 2025	0.00%	0.54%
	31 March 2024	0.00%	0.69%

Clear and measurable climate transition pathway - Percentage of companies positively categorised within the HSBC Asset Management proprietary climate transition assessment	31 March 2026	89.92%	NA
	31 March 2025	NA	NA
	31 March 2024	NA	NA
Implied Temperature Rise - Degrees Celsius	31 March 2026	2.1	2.7
	31 March 2025	NA	NA
	31 March 2024	NA	NA
Green Solutions - Weighted average percentage of green solutions	31 March 2026	47.42%	40.01%
	31 March 2025	NA	NA
	31 March 2024	NA	NA
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.24%
	31 March 2025	0.00%	0.23%
	31 March 2024	0.00%	0.24%
The sub-fund changed its objective during the reporting period and therefore some data for previous periods is not available.			

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of ‘sustainable investments’ within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	98.40	112.49
	31 March 2025	52.53	105.51
	31 March 2024	54.03	109.67
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.61%
	31 March 2025	0.00%	0.54%
	31 March 2024	0.00%	0.69%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.24%
	31 March 2025	0.00%	0.23%
	31 March 2024	0.00%	0.24%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	5.60%	United States of America
Apple Inc.	Information Technology	4.70%	United States of America
Microsoft Corporation	Information Technology	4.59%	United States of America
Alphabet Inc. Class A	Communication Services	2.78%	United States of America
Amazon.com, Inc.	Consumer Discretionary	2.40%	United States of America
Alphabet Inc. Class C	Communication Services	1.73%	United States of America
Meta Platforms Inc Class A	Communication Services	1.73%	United States of America
Exxon Mobil Corporation	Energy	1.47%	United States of America
Cisco Systems, Inc.	Information Technology	1.23%	United States of America
Broadcom Inc.	Information Technology	1.20%	United States of America
Home Depot, Inc.	Consumer Discretionary	1.16%	United States of America
Applied Materials, Inc.	Information Technology	1.14%	United States of America
ASML Holding NV	Information Technology	1.13%	Netherlands
Allianz SE	Financials	1.08%	Germany
QUALCOMM Incorporated	Information Technology	1.07%	United States of America

Cash and derivatives were excluded

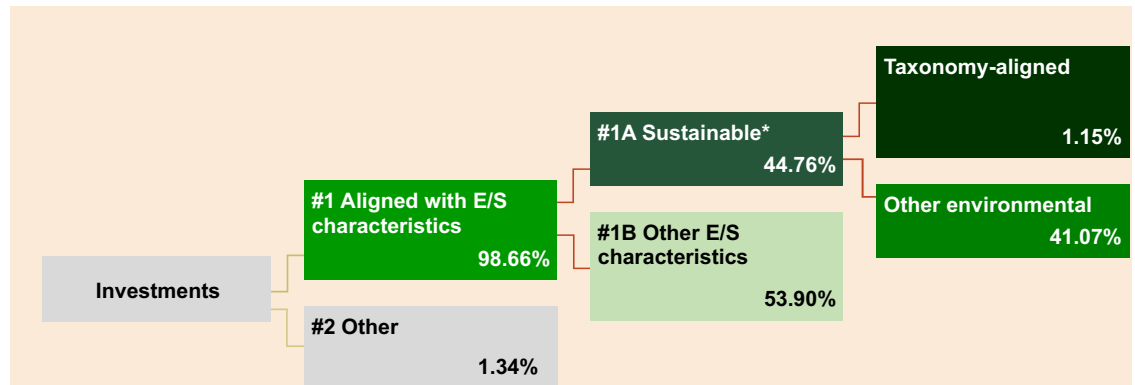

What was the proportion of sustainability-related investments?

44.76% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	28.98%
Financials	16.38%
Industrials	12.42%
Consumer Discretionary	10.63%
Communication Services	8.85%
Health Care	6.88%
Materials	3.91%
Utilities	3.33%
<i>Electric Utilities</i>	2.56%
<i>Gas</i>	0.04%
<i>Multi-Utilities</i>	0.72%
Energy	2.82%
<i>Integrated Oil & Gas</i>	2.51%
<i>Oil & Gas Exploration & Production</i>	0.19%
<i>Oil & Gas Refining & Marketing</i>	0.12%
Consumer Staples	2.57%
Real Estate	1.91%
Cash & Derivatives	1.32%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 1.15%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

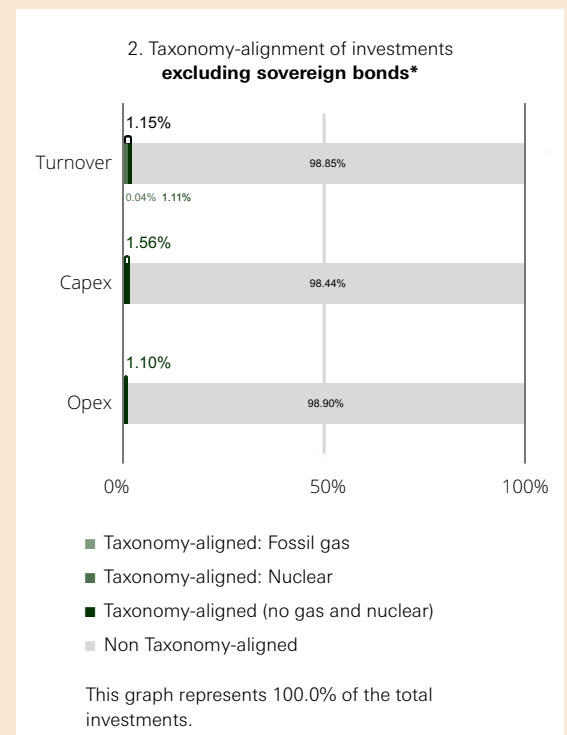

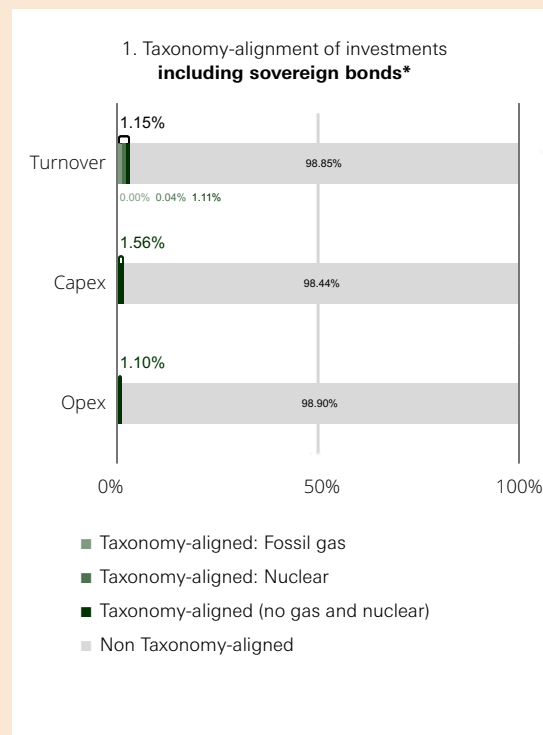

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.94%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.04%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.11%	0.84%	0.20%
Revenue - Non Taxonomy-aligned	98.85%	99.16%	99.80%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.56%	1.59%	0.54%
CAPEX - Non Taxonomy-aligned	98.44%	98.41%	99.46%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.10%	1.30%	0.44%
OPEX - Non Taxonomy-aligned	98.90%	98.70%	99.56%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 41.07%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

 What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

In order to invest in companies with a clear and measurable climate transition pathway, and to lower the carbon intensity of the portfolio and raise its exposure to green solutions, all holdings in the portfolio were assessed through HSBC proprietary climate transition assessment, for their individual carbon intensity and whether they provide green solutions at each monthly rebalance.

Through an HSBC proprietary systematic investment process, a portfolio was created to maximise the exposure to the desired factors to deliver its financial objectives, but which also aimed for at least 80% of the portfolio to be in companies on a clear and measurable path to climate transition, and which also aimed for a lower carbon intensity and a higher proportion to green solutions than the MSCI World which is the Reference Benchmark. As a result, the sub-fund had the desired extra financial characteristics mentioned above throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

- Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

- Not applicable.

How did this financial product perform compared with the reference benchmark?

- Not applicable.

How did this financial product perform compared with the broad market index?

- Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY HIGH DIVIDENED
(Previously named GLOBAL SUSTAINABLE LONG TERM DIVIDENED)

Legal Entity Identifier: 213800Q412OUFUB41202

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: _% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: _%	☒ It promoted Environmental/ Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 99.13% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. Consideration of lower carbon intensity investments.
3. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies(the "Excluded Activities").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	99.13	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	8.32	7.06
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.64%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World High Dividend Yield

...and compared to previous periods?

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	99.13	NA
	31 March 2025	99.11	NA
	31 March 2024	98.40	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	8.32	7.06
	31 March 2025	8.25	7.12

	31 March 2024	0.00%	1.10%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	98.68	198.56
	31 March 2025	72.69	197.88
	31 March 2024	74.16	186.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	0.64%
	31 March 2025	0.00%	0.74%
	31 March 2024	0.00%	0.77%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	1.11%
	31 March 2025	0.00%	1.09%
	31 March 2024	0.00%	1.10%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI World High Dividend Yield

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
L'Oreal S.A.	Consumer Staples	8.81%	France
ASML Holding NV	Information Technology	6.13%	Netherlands
Visa Inc. Class A	Financials	5.51%	United States of America
Microsoft Corporation	Information Technology	5.20%	United States of America
KONE Oyj Class B	Industrials	5.18%	Finland
Automatic Data Processing, Inc.	Industrials	4.90%	United States of America
Colgate-Palmolive Company	Consumer Staples	4.77%	United States of America
Recordati S.p.A.	Health Care	4.54%	Italy
Intuit Inc.	Information Technology	4.38%	United States of America
Amadeus IT Group SA Class A	Consumer Discretionary	4.22%	Spain

Cash and derivatives were excluded

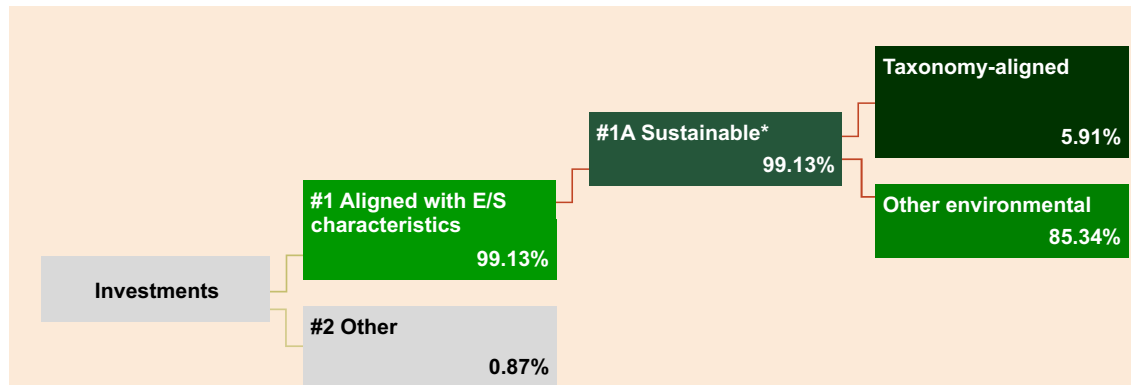

What was the proportion of sustainability-related investments?

99.13% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Health Care	20.75%
Information Technology	18.82%
Industrials	17.59%
Consumer Staples	13.25%
Consumer Discretionary	8.17%
Financials	7.01%
Materials	6.05%
Utilities	5.22%
Electric Utilities	5.22%
Communication Services	2.26%
Cash & Derivatives	0.87%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 5.91%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

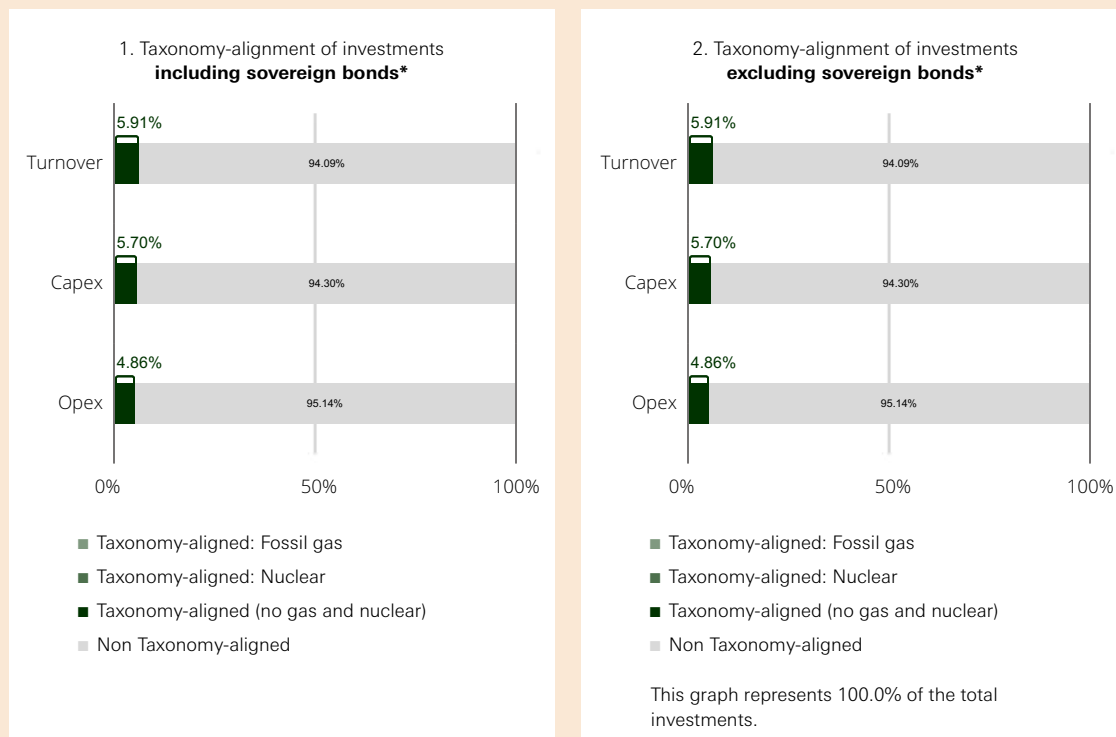

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 5.64%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.91%	4.29%	4.47%
Revenue - Non Taxonomy-aligned	94.09%	95.71%	95.53%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	5.70%	4.80%	4.46%
CAPEX - Non Taxonomy-aligned	94.30%	95.20%	95.54%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	4.86%	4.29%	4.26%
OPEX - Non Taxonomy-aligned	95.14%	95.71%	95.74%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 85.34%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation.

The sub-fund assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period. In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

The sub-fund was re-named Global Equity High Dividend on 30 April 2026, and following this date, does not consider the carbon intensity of companies in which it invests.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL SUSTAINABLE LONG TERM EQUITY

Legal Entity Identifier: 213800T5TN9TXJMB1G69

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ ☒ ☒ Yes	☒ ☐ ☐ No
☒ It made sustainable investments with an environmental objective: 98.89%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: _%	☐ with a social objective
☐ It made sustainable investments with a social objective: _%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sub-fund aimed to make a positive environmental, social and governance ("ESG") effect, by investing in equities and equity equivalent securities issued by companies that contributed to United Nations Sustainable Development Goals ("Contributing Companies" and "SDGs"), while also aiming to provide long-term total return.

The sustainable investment objectives promoted by this sub-fund were:

- Investment into a portfolio of companies that contributed to SDGs, including, but not limited to, Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.
- The identification and analysis of a Contributing Company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
- Consideration of lower carbon intensity investments compared to the 100% MSCI AC World Index TRI, the ("Reference Benchmark").

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

4. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles are identified, companies will be subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.
5. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies and the Paris-aligned Benchmark exclusions (together referred to as the "Excluded Activities").

● ***How did the sustainability indicators perform?***

Sustainability Indicator	sub-fund	Reference Benchmark
Consideration of SDGs	All investments, with the exception of cash, were aligned with one or more SDGs	
Identification and analysis of a company’s environmental and social factors		
ESG score (third-party score)	8.66	6.63
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	16.61	115.18
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.35%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - 100% MSCI AC World Index Tri

● ***...and compared to previous periods?***

	31 March 2025	0.00%	0.21%
	31 March 2024	0.00%	0.22%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The sustainable investments in the sub-fund were assessed against the principle of 'do no significant harm' ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser used third-party research providers to monitor contributing companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	16.61	115.18
	31 March 2025	17.38	121.98
	31 March 2024	34.46	126.54
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	0.00%	1.35%
	31 March 2025	0.00%	1.29%
	31 March 2024	0.00%	1.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.22%
	31 March 2025	0.00%	0.21%
	31 March 2024	0.00%	0.22%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - 100% MSCI AC World Index Tri

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.28%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

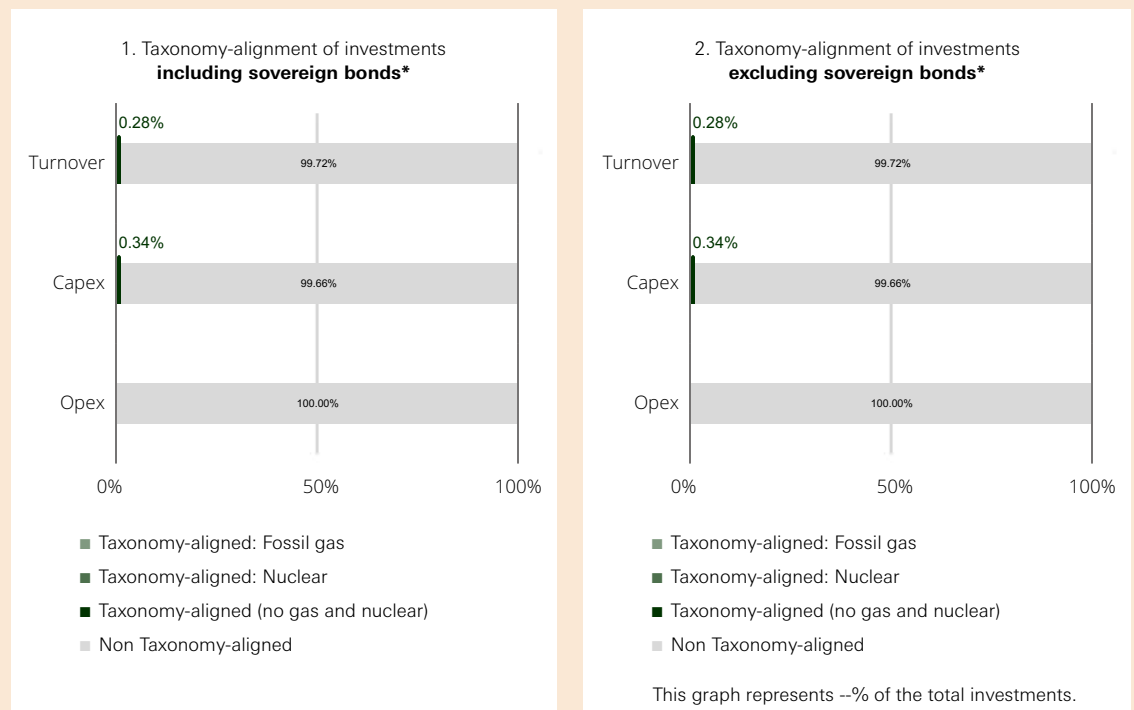

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.23%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.28%	0.12%	0.38%
Revenue - Non Taxonomy-aligned	99.72%	99.88%	99.62%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%

OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.03%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	99.97%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 97.89%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund invested into a portfolio of fixed income securities issued by companies that actively contributed to the UNSDGs and therefore considered social elements of investments, namely Good Health and Well-Being, Gender Equality, Decent Work and Economic Growth and Reduced Inequalities. However, these social UNSDGs were considered in conjunction with environmental UNSDGs and so it is not possible to provide a separate proportion of socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the strategy delivered on its sustainable investment objective by rigorously assessing the sustainability of the business model, product, and practices of all holdings in the portfolio. Additionally, through our fundamental analysis, the Investment Adviser ensured that every company included in the portfolio materially aligned to at least one United Nations Sustainable Development Goal.

The Investment Adviser scored the companies using a proprietary scorecard addressing three dimensions of sustainability, practices and culture, business model and product.

UN SDG mapping was carried out by the Investment Adviser, and not driven by how the company itself determined alignment. The investment team specified an alignment metric for SDG mapping, a baseline year for the datapoint, and tracked the metric over time.

The team engaged with several companies specifically on the basis of that metric to ensure that over time it met our expectations.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

● ***How did the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - HONG KONG EQUITY

Legal Entity Identifier: 213800ZW3O5YHRYHI687

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

It made **sustainable investments**
with an environmental objective:
%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

☒ ☐ ☐ ☐ **No**

✓ It **promoted Environmental/ Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.28% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	96.22	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.82	6.61
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	11.58%	11.39%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - FTSE MPF Hong Kong

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	96.22	NA
	31 March 2025	97.65	NA
	31 March 2024	97.48	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	6.82	6.61
	31 March 2025	6.44	6.23
	31 March 2024	5.84	5.88
Responsible business practice in line with UNGC and OECD principles			
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	11.58%	11.39%
	31 March 2025	10.67%	11.73%
	31 March 2024	11.34%	12.48%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)			
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures			

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2026	6,914.95	296,118,227.91
	31 March 2025	7,512.46	298,334,701.25
	31 March 2024	4,041.59	260,060,990.07
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2026	41.61	126.30
	31 March 2025	56.60	147.00
	31 March 2024	34.13	144.84
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	133.53	247.99
	31 March 2025	209.01	253.29
	31 March 2024	77.82	251.52
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	11.58%	11.39%
	31 March 2025	10.67%	11.73%
	31 March 2024	11.34%	12.48%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.00%
	31 March 2025	0.00%	0.00%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - FTSE MPF Hong Kong

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
Tencent Holdings Ltd	Communication Services	9.50%	China
Alibaba Group Holding Limited	Consumer Discretionary	9.35%	China
HSBC Holdings Plc	Financials	9.24%	United Kingdom of Great Britain and Northern Ireland
China Construction Bank Corporation Class H	Financials	5.03%	China
AIA Group Limited	Financials	3.98%	Hong Kong
Zijin Mining Group Co., Ltd. Class H	Materials	3.33%	China
Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	3.19%	China
Netease Inc	Communication Services	3.13%	China
Hong Kong Exchanges & Clearing Ltd.	Financials	2.63%	Hong Kong
Baidu, Inc. Class A	Communication Services	2.58%	China

Cash and derivatives were excluded

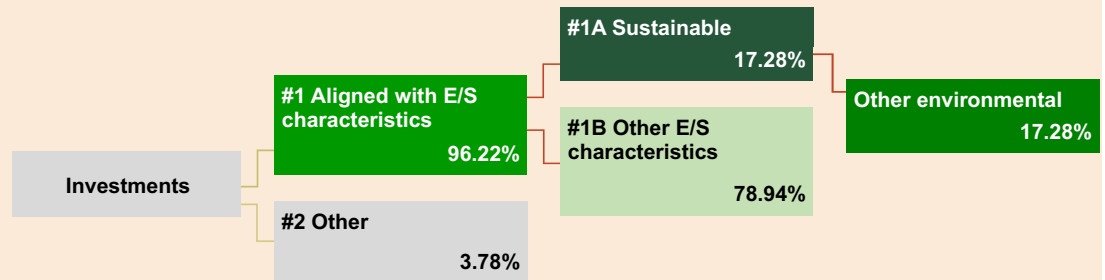

What was the proportion of sustainability-related investments?

17.28% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	32.94%
Consumer Discretionary	17.12%
Communication Services	16.04%
Information Technology	8.91%
Health Care	6.41%
Industrials	5.54%
Materials	4.48%
Real Estate	4.18%
Cash & Derivatives	1.56%
Consumer Staples	1.03%
Government	0.68%
Utilities	0.60%
Electric Utilities	0.50%
Gas	0.06%
Energy	0.51%
Oil & Gas Exploration & Production	0.51%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

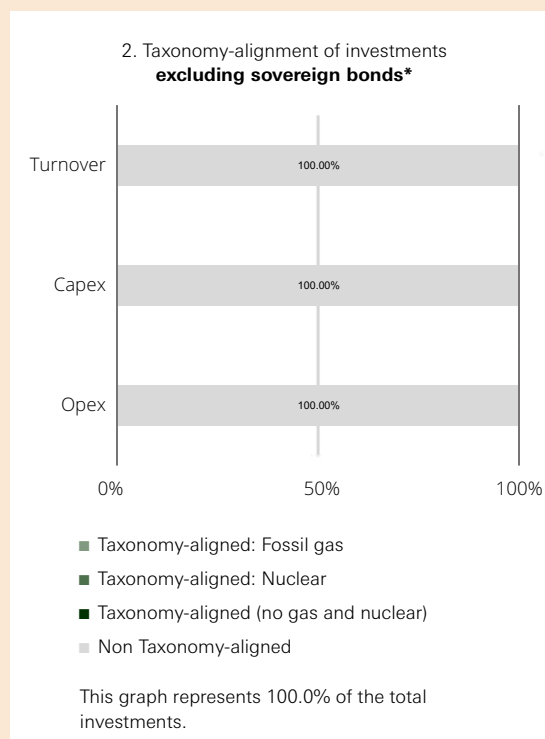

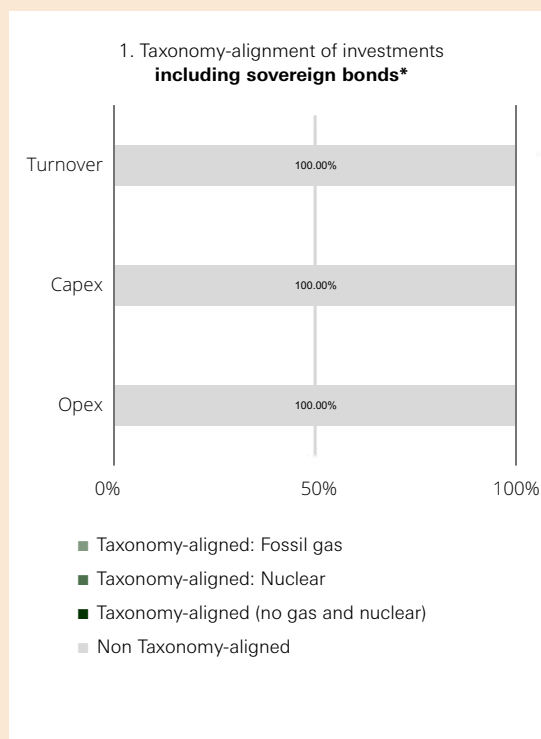

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 17.28%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

The sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - INDIAN EQUITY

Legal Entity Identifier: 213800AYVU7GQ41BUM81

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.53% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, companies were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

Sustainability Indicator	sub-fund	Reference Benchmark
Minimum ESG standards		
Percentage of the sub-fund aligned with the E/S characteristics	96.00	NA
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	5.60	5.53
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	4.62%	4.86%
Excluded Activities		
The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosures		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI India

● *...and compared to previous periods?*

Sustainability Indicator	Period Ending	sub-fund	Reference Benchmark
Minimum ESG standards			
Percentage of the sub-fund aligned with the E/S characteristics	31 March 2026	96.00	NA
	31 March 2025	97.94	NA
	31 March 2024	0.00	NA
Identification and analysis of a company's environmental and social factors			
ESG score (third-party score)	31 March 2026	5.60	5.53
	31 March 2025	5.69	5.36
	31 March 2024	0.00	0.00

	31 March 2025	4.57%	4.89%
	31 March 2024	0.00%	0.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.28%
	31 March 2025	0.00%	0.26%
	31 March 2024	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

Principal Adverse Impact	Period Ending	sub-fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2026	491.73	695.34
	31 March 2025	480.95	684.52
	31 March 2024	0.00	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2026	4.62%	4.86%
	31 March 2025	4.57%	4.89%
	31 March 2024	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2026	0.00%	0.28%
	31 March 2025	0.00%	0.26%
	31 March 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2026.

Reference Benchmark - MSCI India

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2026

Largest Investments	Sector	% Assets	Country
HDFC Bank Limited	Financials	7.14%	India

Cash and derivatives were excluded

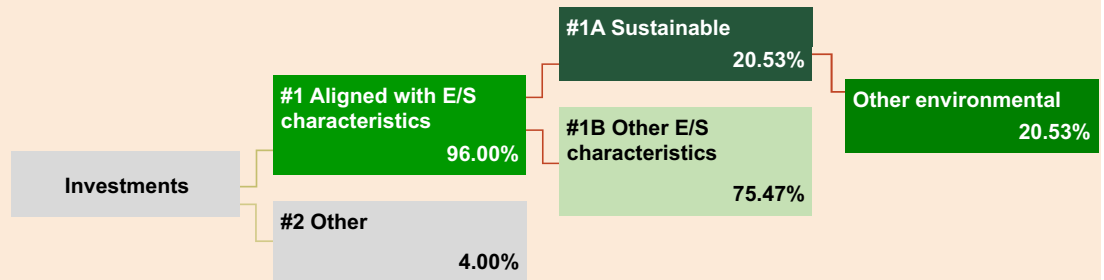

What was the proportion of sustainability-related investments?

20.53% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	32.59%
Consumer Discretionary	14.41%
Industrials	9.77%
Information Technology	8.18%
Health Care	7.64%
Energy	7.23%
Oil & Gas Refining & Marketing	7.23%
Materials	6.95%
Consumer Staples	6.60%
Real Estate	5.36%
Communication Services	3.14%
Other	0.39%
Cash & Derivatives	-2.27%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0.00%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

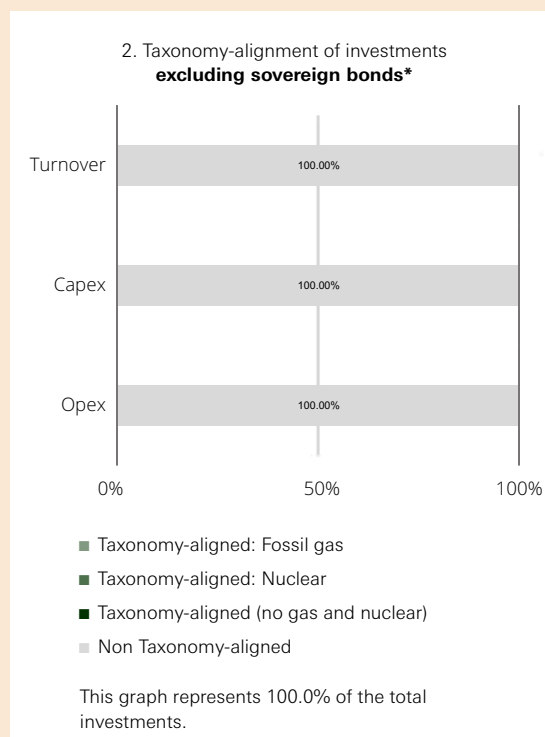

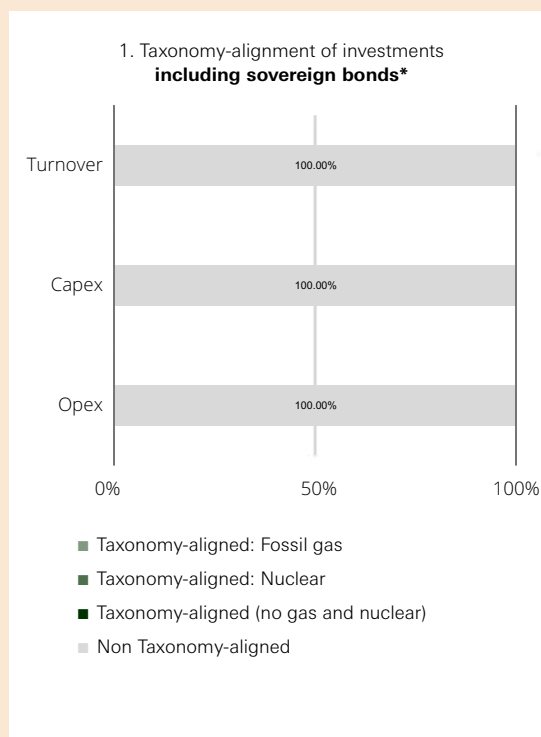

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● <i>How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?</i>			
Indicator	2025-26	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	0.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**
 The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 20.53%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**
 The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**
 #2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

 Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, tobacco production and companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and invested in companies with responsible business practices in accordance with UNGC principles.

The sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made. The sub-fund was uplifted from SFDR Article 6 to SFDR Article 8 during 2025, therefore no prior sustainability indicator data or PAI data is available for 2024.

How did this financial product perform compared to the reference benchmark?

- Not applicable.

How does the reference benchmark differ from a broad market index?

- Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

- Not applicable.

How did this financial product perform compared with the reference benchmark?

- Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
