Further information is available on the Management Company's website: www.dnca-investments.com.

Key information document production date: : 13/05/2025

What is this product ?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Product's objective is to outperform Pan-European equity markets over the recommended investment period. The STOXX EUROPE 600 Net Return EUR reference indicator, calculated with dividends reinvested, is provided for a posteriori comparison purposes. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

To achieve its investment objective, the Product's investment strategy relies on active discretionary management aimed at investing in high-quality Pan-European "growth" stocks. The selection process is based on picking stocks according to their intrinsic worth (an in-depth analysis of fundamentals is conducted in-house), not on the composition of the benchmark index. Investments may therefore be concentrated on a limited number of stocks; there must nevertheless be at least 20 stocks in the portfolio. In this context, the Sub-Fund implements active conviction management and SRI approach. The investment process and resulting stock picking take into account internal scoring with respect to both corporate responsibility and sustainability of companies based on an extra-financial analysis through a proprietary tool developed (ABA, Above & Beyond Analysis), developed internally by the Management Company. This model is centered on four pillars as further detailed below (i) corporate responsibility, (ii) sustainable transition, (iii) controversies and (iv) dialogue and engagement with issuers. The Management Company uses a proprietary ESG analysis approach with the "best in universe" method. There may be a sector bias. The risk exists that the models used to make these investment decisions do not perform the tasks they were designed to. This extra-financial analysis is made on at least 90% of the Product's net assets, and results in the exclusion of at least 30% of the worst issuers of shares from its investment universe. The Product benefits from the French SRI Label. Additional information on SRI strategy may be obtained in the prospectus of the Product.

The Product may at any time invest in: Equities of issuers having their registered office in the EU or related financial derivative instruments (such as CFD or DPS): from 60% to 100% of its net assets; Equities outside the EU: from 0% to 40% of its net assets; Corporate or government fixed income securities denominated in Euro: from 0% to 25% of its net assets. At least 50% of the Product's assets shall be invested in stocks of issuers belonging to the STOXX EUROPE 600 Net Return Index. Investment in small and mid-cap stocks (less than EUR 3 billion) may not exceed 50% of the Product's net assets. The Product may be exposed to emerging markets for 5% of its net assets. Exposure to exchange risk may reach 100% of the Product's net assets. Corporate or government fixed income securities shall mainly be selected from the "Investment grade" category. The proportion of speculative issues may not represent more than 10% of the Product's net assets.

Investment in units and or shares of UCITS and/or other UCIs is limited to 10% of the Product's net assets.

The Product may use exchange traded or OTC derivatives (other than CFD and DPS) up to 40% of the Product's net assets, including but not limited to, futures contracts and non complex options negotiated on regulated markets for the purpose of hedging or increasing equity risk. The Product may also operate on the foreign exchange markets to cover investments realised outside the euro area.

The Product uses the benchmark for the calculation of the performance fee and performance comparison purposes. The benchmark is also used as a reference point for portfolio construction as at least 50% of the Products' assets shall be invested in stocks of issuers belonging to the benchmark. The Product is actively managed. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective. The Product may take positions whose weightings diverge from the benchmark and will invest less than 50% of its assets in securities which are not included in the benchmark. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the benchmark. This deviation may be limited.

This is an accumulation share.

INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

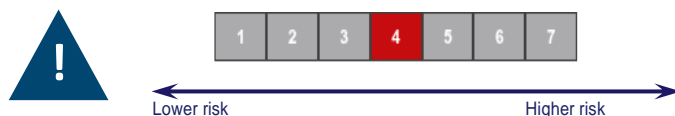

OTHER INFORMATION

The Depositary is BNP Paribas, Luxembourg Branch.

The Product is eligible to the French Plan d'Epargne en Actions (PEA).

What are the risk and what could I get in return ?

Risk indicator

This risk indicator assumes you keep the Product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

This product is rated 4 out of 7, representing a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Product and which could lead to a fall in the net asset value to which the indicator gives too little consideration : liquidity risk and operational risk.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

PERFORMANCE SCENARIOS

This figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

| Recommended holding period : 5 years Example Investment : 10,000 € | | If you exit after 1 year | If you exit after 5 years |
|---|---|-----------------------------|------------------------------|
| Scenarios | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | 6,220 € | 3,390 € |
| | Average return each year | -37.80 % | -19.50 % |
| Unfavourable | What you might get back after costs | 7,460 € | 8,810 € |
| | Average return each year | -25.40 % | -2.50 % |
| Moderate | What you might get back after costs | 10,750 € | 15,110 € |
| | Average return each year | 7.50 % | 8.60 % |
| Favourable | What you might get back after costs | 14,330 € | 21,250 € |
| | Average return each year | 43.30 % | 16.30 % |

- The unfavourable scenario occurred for an investment between December 2021 and February 2025.
- The moderate scenario occurred for an investment between February 2018 and February 2023.
- The favourable scenario occurred for an investment between October 2016 and October 2021.

What happens if DNCA Finance is unable to pay out ?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs ?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COST OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed :

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. ;
- EUR 10 000 is invested.

| Investment : 10,000 € | If you exit after 1 year | If you exit after 5 years |
|-----------------------|--------------------------|---------------------------|
| Total costs | 436 € | 2,054 € |
| Annual cost impact * | 4.40 % | 2.80 % each year |

*The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 11.40 % before cost and 8.60 % after costs. .

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This personne will inform you of the actual distribution fee.

COMPOSITION OF COSTS

| One-off upon entry or exit | | If you exit after 1 year |
|---|---|--------------------------|
| Entry costs | Up to 2.00 % of the amount you pay in when entering this Investment. This is the most you will be charged. The person selling you the production will inform you of the actual charge.. | up to 200 € |
| Exit cost | We do not charge an exit fee for this product.. | 0 € |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 1.07 % of the value of your investment per year. This is an estimate based on actual costs over the last year.. | 107 € |
| Transaction costs | 0.08 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.. | 8 € |
| Incidental costs taken under specific conditions | | |
| Performance fees | 20% of the positive performance net of any fees above the STOXX EUROPE 600 Net Return EUR index. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years. | 121 € |

How long should I hold it can I take my money out early ?

Recommended holding period : 5 years

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product has a redemption capping system know as « Gates » described in the prospectus.

How can I complain ?

If you have any complaints about the Product, you can send a written request with a description of the problem either by e-mail service.conformite@dnca-investments.com or to the following address: DNCA Finance, 19 Place Vendôme, 75001 Paris.
