Robeco Global Consumer Trends F EUR (LU0871827464)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Global Consumer Trends is an actively managed fund that invests in stocks in developed and emerging countries across the world. The selection of these stocks is based on fundamental analysis. The fund's objective is to achieve a better return than the index. The fund invests in a number of structural growth trends in consumer spending. The first is the "digital transformation of consumption". The second trend is that of the "rise of the middle class". The third trend focuses on the increasing importance of "health & wellbeing". The fund managers aim to select stocks of the structural winners within these trends.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to normative, activity-based and region-based exclusions, proxy voting and engagement.

The fund can engage in currency hedging transactions. Typically currency hedging is not applied.

Benchmark: MSCI All Country World Index (Net Return, EUR)

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark. There are no restrictions on the deviation from the benchmark. The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk - Typically lower rewards

Higher risk - Typically higher rewards

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equity theme funds have a view on a specific segment of the equity market. By making the choice to focus on a specific segment the fund becomes more volatile as price movements of shares within this theme tend to have a larger impact on the value of the fund. The fund may use financial derivatives.

The following data are deemed material for this fund, and are not (adequately) reflected by the

indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets.
- The fund invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.
