## Mirova Global Sustainable Equity is a sub-fund of Mirova Funds (the "SICAV").

R/A (EUR) ISIN LU0914729966

Natixis Investment Managers International, part of the BPCE Group, is the Management Company of the Fund.

### OBJECTIVES AND INVESTMENT POLICY

The Product has a sustainable investment objective which is to provide long-term capital growth by investing in global equities securities through an investment process that fully integrates sustainability considerations. The Benchmark of the Product is the MSCI World Net Dividends Reinvested Index which is representative of global equity markets. This Product may not be appropriate for investors who plan to withdraw their money within less than 5 years.

The Product is actively managed. The Product's performance may be compared to the Benchmark. In practice, the portfolio of the Product is likely to include constituents of the Benchmark, but the Investment Manager has full discretion in the selection of the securities comprising the portfolio within the limits of the Product's investment policy. However, it does not aim to replicate that Benchmark and may therefore significantly deviate from it.

The Benchmark can be used to determine the performance fee that will possibly be levied.

The Product invests at least 80% of its net assets in equity securities of companies globally and seeks to invest in companies with exposure to economic tailwinds from the long-term transitions affecting the global economy over the next decade or longer (major demographic, technology, environmental and governance transitions). The Product also implements a sustainable investment approach by seeking to invest in companies that contribute to the achievement of United Nations' Sustainable Development Goals (the "SDGs") through their products, services and/or practices. The investment strategy relies on an active, fundamental investment process aimed at creating long-term value through a bottom-up approach. Stock selection is based on a deep fundamental analysis of companies combining both financial and sustainability considerations. The Product will seek to invest in companies benefiting from long term growth outlooks and whose stocks present attractive valuation over a medium-term period. The portfolio construction is driven by the Investment Manager's conviction in the investment company case and sustainability profile, with liquidity and upside potential as additional considerations, without constraint regarding market capitalisations, sectors and weights compared to the Benchmark.

The Product follows an ESG thematic and "Best-In-Universe" approach (complemented by sectoral exclusion, commitment and voting policies) which aims at assessing systematically the social and environmental impacts of each company in relation to the achievement of UN SDGs. It involves the rating of each company in respect of the criteria: Environmental (such as environmental recycling), Social (such as employee health) and Governance (such as business ethics). An ESG strategy may comprise methodological limitations such as the ESG Driven Investments Risk. Please refer to the sections "Description of the extra-financial analysis and consideration of the ESG criteria" and "Principal risks" of the Prospectus for additional information.

The Product invests at least 80% of its net assets in equity securities of companies globally. The Product may invest up to 25% of its net assets into Emerging Markets. The Product may invest up to 10% of its net assets in money market and cash instruments.

The Product may use derivatives for hedging and investment purposes.

Income earned by the Sub-Fund is reinvested.

Shareholders may redeem Shares on demand on any business day in Luxembourg at 11h30.
