Report of the Board of Directors (continued)

General (continued)

Merger of several sub-funds of Robeco All Strategies Funds (“RASf”) into sub-fund Robeco Capital Growth Funds

In accordance with the decisions made by the Board of Directors of RASf and the Board of Directors of the Company on 12 January 2024, Robeco Multi Asset Sustainable, Robeco Multi Asset Growth and Robeco Multi Asset Income have been merged into the corresponding sub-funds of RCGF. The decision to merge these sub-funds into the receiving sub-funds has been taken for the following reasons: (1) the mergers will lead to greater client centricity, as the mergers will result in efficiency benefits for existing and prospective shareholders; and (2) both the merging sub-funds and the receiving sub-funds are managed by Robeco Institutional Asset Management B.V. (“RIAM”), therefore it has been considered appropriate to transfer the merging Sub-funds to the receiving sub-funds.

Following the mergers, the merging sub-funds ceased to exist.

Below table states the merging and receiving share-classes including the conversion rates.

Merger of Robeco QI Global Dynamic Duration (“RQIGDD”) into sub-fund of Robeco Capital Growth Funds

On 17 April 2024, the Board of Directors of RQIGDD and the Board of Directors of the Company have resolved to propose to investors to merge RQIGDD into the corresponding sub-fund of the Company. The decision to merge the Fund into the receiving sub-fund has been taken for the following reasons: (1) the merger will lead to greater client centricity, as the merger will result in efficiency benefits for existing and prospective shareholders; and (2) both the merging fund and the receiving sub-fund are managed by Robeco Institutional Asset Management B.V. (“RIAM” or the “Management Company”), therefore it is considered appropriate to transfer the merging fund to the receiving sub-fund.

During the Extraordinary General Meeting as held on 19 June 2024, the shareholders in RQIGDD have resolved on the merger.

Effective as per 20 September 2024, RQIGDD has been merged into Robeco Capital Growth Funds - Robeco QI Global Dynamic Duration. Below table shows the details per share-class.

Report of the Board of Directors (continued)

Report of the investment manager

General market review

Despite a backdrop of the highest interest rates in decades, wars in Europe and the Middle East and considerable political uncertainty, with a fifth of the world's population voting in general elections over the year, the Organization for Economic Co-operation and Development (OECD) estimates that global real GDP expanded by 3.2% in 2024, up from 2.8% in 2023.

Remarkably, efforts by central banks to get inflation back to 2% did not lead to a significant rise in unemployment. However, the divergence in real activity between developed countries increased over the year, with the US economy once again performing better than those from elsewhere, growing by 2.8% over the year – above its long-term trend level. The euro zone economy, by contrast, came close to recession.

European consumers adopted a cautious stance over the year, increasing their excess savings, whereas the US household savings rate fell further, resulting in another strong year for US consumption. The US economy also received support from the government's expansionary fiscal policy stance, with a historically large US budget deficit.

The fortunes of services and manufacturing continued to diverge, with global manufacturing contracting whereas services expanded further. Unemployment among the 38 member countries of the OECD remained low by historical standards at 4.9% despite advances in artificial intelligence and monetary policy remaining tight. The surprise increase in US unemployment to 4.2% in July, which led to considerable volatility in the financial markets, proved to be a red herring.

The impact of divergence in services and manufacturing showed up in inflation figures in 2024. Inflation fell over the year, partly as a result of cooling demand from Western consumers, China's lingering excess industrial capacity and easing strains on supply chains. But while goods inflation was in negative territory, services inflation remained elevated by historical standards throughout the year. As a result, consumer price inflation remained above target in most G20 economies, with the notable exception of China.

This meant that core inflation remained uncomfortably high, so developed market central banks adopted a cautious approach to cutting rates in the second half of 2024. The Federal Reserve's first cut was by 50bp in September, but over the remainder of the year it only made 25bp cuts. Although the ECB had more scope to cut rates as euro zone headline inflation temporarily dipped below 2% in the second half of the year, services inflation proved stubborn, ending the year at 4.0%. Japan's central bank, by contrast, raised its policy rate by 0.35% over the course of 2024 (from -0.1%) as it became more confident that the country is putting its long period of deflation behind it.

China's economy, however, showed mounting signs of deflation, with headline inflation ending 2024 at just 0.1%. Millions of unsold homes continue to exert pressure on house prices and local developers' balance sheets, inhibiting domestic consumption growth. China's government adopted a piecemeal approach to stimulus for much of 2024, but in December it signaled a more determined stance consisting of moderately loose monetary policy and a more proactive fiscal policy.

Report of the Board of Directors (continued)

Risk Management

The presence of risks is inherent to the character of asset management. It is therefore very important to have a procedure for controlling these risks embedded in the company's day-to-day operations. The Management Company ensures that risks are effectively controlled via the three lines model: Robeco management (first line), the Compliance and Risk Management departments (second line) and the Internal Audit department (third line).

The Robeco management team is primarily responsible for risk management as part of its day-to-day activities. The Compliance and Risk Management departments develop and maintain policies, methods and systems that enable the management to fulfill their responsibilities relating to risk. Furthermore, portfolios are monitored by these departments to ensure that they remain within the investment restrictions under the prospectus, and to establish whether they comply with the internal guidelines. The Risk Management Committee decides how the risk-management policies are applied and monitors whether risks remain within the defined limits. The Group Internal Audit department carries out audits to assess the effectiveness of internal control.

Robeco uses a risk management and control framework that helps control all types of risk. Within this framework, risks are periodically identified and assessed as to their significance and materiality. Internal procedures and measures are focused on providing a structure to control both financial and operational risks. Management measures are included in the framework for each risk. Active monitoring is performed to establish the effectiveness of the procedures and measures of this framework.

Operational risk

Operational risk is the risk of loss as a result of inadequate or failing processes, people or systems. Robeco constantly seeks opportunities to simplify processes and reduce complexity in order to mitigate operational risks. Automation is a key resource in this regard and Robeco uses systems that can be seen as the market standard for financial institutions. Firstly, the use of automation increases the IT risk. This risk can be divided into three categories. The risk that unauthorized persons gain access is managed by means of preventive and detective measures to control access to the network and to systems and data. Secondly, processes such as change management and operational management ensure monitoring of a working system landscape. Lastly, business continuity measures are in place to limit the risk of breakdown as far as possible and to restore operational effectiveness as soon as possible in the event of disaster. The effectiveness of these measures is tested regularly both internally and externally.

Compliance risk

Compliance & Integrity risks embody the risk of corporate and individual behaviour that leads to insufficient compliance with laws and regulations and internal policies to such an extent that in the end this may cause serious damage to confidence in the Fund, Robeco and in the financial markets. Non-compliance with laws, regulations and policies might also result in penalties from regulators. Robeco's activities – collective and individual portfolio management – are subject to European and local rules of financial supervision. Observance of these rules is supervised by the national competent authorities (in the Netherlands the Authority for the Financial Markets, AFM and the Central Bank of the Netherlands, DNB and the CSSF in Luxembourg). It is in the interest of both Robeco and the investors in Robeco-managed funds that Robeco complies with all the applicable laws and regulations

With regard to the funds and counterparties, external worldwide events have had effect on financial institutions, specifically in the field of Sanctions regulations. Robeco follows applicable sanctions of the Netherlands, Luxembourg, UN, EU, UK and US, as amended and/or supplemented from time to time, and any mandatory (investment) restrictions deriving therefrom. In case of conflicting sanctions the applicable sanctions from the EU will prevail at all times.

The past few years the level of regulation has increased consistently while the regulatory environment is evolving as well by moving from a principle-based to a more rule-and evidence-based environment. Robeco actively follows these regulatory developments and is in continuous effort to incorporate all regulatory changes to ensure compliance with rules and regulations. Robeco performs Systematic Integrity Risk Assessments (“SIRAs”) to further identify and assess compliance and integrity risks and set-up control measures that mitigate these risks. If needed, follow-up actions will be discussed with the business departments to further mitigate compliance and integrity risks.

Changes in the field of legislation, regulation and external events that could affect the funds managed by Robeco also took place in 2024. The implementation of the EU regulatory framework on sustainable finance, consisting of multiple pieces of legislation, including the ESMA Guidelines on funds' names using ESG or sustainability-related terms, introduced requirements aiming for increased comparability between sustainable funds and to avoid greenwashing.

The SFDR classifications of the Robeco Capital Growth Sub-funds are shown in the table on pages 91 to 93. More information is available in the precontractual SFDR disclosures of the Fund on our website. Attached to this annual report for each article 8 Sub-fund an Annex IV disclosure can be found with details of the achieved ESG characteristics over the reporting period. For each article 9 Sub-fund an Annex V disclosure is attached with detailed information on the achievement of the sustainability goals over the reporting period.

Global Equity Sub-funds (continued)

Performance analysis

Robeco BP Global Premium Equities

Over the reporting period, Robeco BP Global Premium Equities generated a return of 16.1% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund underperformed its reference index in 2024 in what continued to be a narrow-driven mega-cap growth market. Both stock selection and sector allocation detracted from the relative returns, with stock selection driving underperformance for the year. Detraction from stock selection had the largest impact in the information technology and consumer discretionary sector, mainly as a result of not owning some U.S. mega-cap growth stocks that drove market returns in 2024. Sector allocation was weakest in information technology, where the Sub-fund was underweight, while its underweight to communication services and overweight in consumer staples also weighed meaningfully on relative returns. Sub-fund performance was challenging when compared to the MSCI World Index.

As part of the Sub-fund's robust process and philosophy, ESG characteristics are considered every step of the way through an investment decision. The Sub-fund has always maintained a lower carbon intensity than the stated value benchmark and currently has a higher degree of exposure to the highest-ranking names based on an ESG/SRI perspective. Over the course of the year, the Sub-fund cast over 1836 votes across 110 proxy voting meetings, commonly voting against management/board compensation practices and voting overwhelmingly in favor of shareholder environmental, social and governance proposals.

Robeco QI Global Conservative Equities

Over the reporting period, Robeco QI Global Conservative Equities generated a return of 21.2% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

For the period, the Sub-fund underperformed its reference index. The exposure to low risk made a negative contribution to relative performance, whereas the value and momentum factors contributed positively. The risk profile of the Sub-fund, as measured by volatility, was lower than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list, while it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco Sustainable Global Stars Equities

Over the reporting period, Robeco Sustainable Global Stars Equities generated a return of 30.2% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund outperformed strongly over the reporting period, mainly driven by strong stock-picking in the information technology and industrials sectors. Also, being underweight the staples and utilities sectors contributed positively to performance. Strong stock-picking in information technology was mainly led by semiconductor stocks that have exposure to the artificial intelligence theme, such as Nvidia and Broadcom. Within industrials, the most positive results came from Hitachi and Trane Technologies, as both companies benefited from strength in the electrification theme. In consumer discretionary, the Sub-fund benefited from strength in Booking Holdings, as international travel activity continued to be strong. CBRE was also a stock that contributed nicely once the real estate sector started to rebound. On the negative side, the Sub-fund suffered from weaker stock selection in the energy and materials sectors, where Nest Oyj, Schlumberger and Fortescue weighed on overall performance.

During the reporting period, the Sub-fund had a significantly better environmental footprint than the benchmark, as well as a better overall sustainability profile than the overall benchmark. During the reporting period, there were no investments in companies from the Robeco exclusion list. For this strategy, most portfolio holdings are under active engagement and voting was conducted at the annual general meetings for all portfolio holdings during the reporting period.

Global Equity Sub-funds (continued)

Performance analysis (continued)

Robeco Emerging Stars Equities

Over the reporting period, Robeco Emerging Stars Equities generated a return of 8.6% (gross of fees in EUR) against a return of 14.7% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

The main negative contributors to relative performance were the overweight positions in South Korea and Brazil, as both countries performed relatively poorly versus other emerging countries. This was partly compensated for by a positive stock selection result. During the year, the weights in China, South Africa and the United Arab Emirates were increased, while positions in Korea, Brazil and Mexico were lowered.

The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research supported by quantitative models, while ESG factors are fully integrated into the investment process. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile. Through engagement, the Sub-fund endeavors to improve the sustainability profile of the companies it invests in. The Sub-fund has no exposure to severe ESG risk companies as measured by Sustainalytics, and more than 60% of the portfolio is classified as sustainable investment.

Robeco Emerging Markets Equities

Over the reporting period, Robeco Emerging Markets Equities generated a return of 13.0% (gross of fees in EUR) against a return of 14.7% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

The main negative contributors to relative performance were the overweight positions in South Korea and Brazil, as both countries performed relatively poorly versus other emerging countries. This was partly compensated for by a positive stock selection result. During the year, the weights in South Africa and the United Arab Emirates were increased, while positions in Brazil and Mexico were lowered.

The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research supported by quantitative models, while ESG factors are fully integrated into the investment process. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile. Through engagement, the Sub-fund endeavors to improve the sustainability profile of the companies it invests in.

Robeco QI Emerging Markets Active Equities

Over the reporting period, Robeco QI Emerging Markets Active Equities generated a return of 21.5% (gross of fees in EUR) against a return of 14.7% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. Exposure to value, momentum, quality, analyst revisions and short-term signals contributed positively to relative performance. The volatility of the Sub-fund was lower than that of the reference index, with a medium level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Global Momentum Equities

Over the reporting period, Robeco QI Global Momentum Equities generated a return of 34.9% (gross of fees in EUR), against a return of 25.3% for its reference index, the MSCI All Countries World Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The momentum factor made a positive contribution to relative performance, followed by the value, quality and low risk factors. The risk profile of the Sub-fund, as measured by volatility, was higher than that of the reference index.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (primarily momentum, as well as value, quality and low risk), the model aims to harvest the momentum premium by identifying broad groups of stocks that exhibit positive medium-term trends that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Global Developed Sustainable Enhanced Index Equities

Over the reporting period, Robeco QI Global Developed Sustainable Enhanced Index Equities generated a return of 28.9% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The exposure to value contributed negatively to relative performance. On the other hand, exposure to momentum, quality, analyst revisions, sustainability and short-term signals contributed positively to the relative returns. The volatility of the Sub-fund was higher than the volatility of the reference index, with a low level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model with an improved sustainability profile. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Emerging Markets Enhanced Index Equities

Over the reporting period, Robeco QI Emerging Markets Enhanced Index Equities generated a return of 13.7% (gross of fees in USD) against a return of 7.5% for its reference index, the MSCI Emerging Markets Index (net return in USD).

For the period, the Sub-fund outperformed its reference index. The exposure to value, quality, momentum, analyst revisions and short-term signals contributed positively to relative performance. The volatility of the Sub-fund was lower than the volatility of the reference index, with a low level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Emerging Conservative Equities

Over the reporting period, Robeco QI Emerging Conservative Equities generated a return of 9.3% (gross of fees in USD) against a return of 7.5% for its reference index, the MSCI Emerging Markets Index (net return in USD).

For the period, the Sub-fund outperformed its reference index. The exposure to the value and momentum factors contributed positively to relative performance, while the low-risk factor contributed negatively to the relative returns. The risk profile of the Sub-fund, as measured by volatility, was lower than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Global Value Equities

Over the reporting period, Robeco QI Global Value Equities generated a return of 24.4% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Countries World Index (net return in EUR).

For the period, the Sub-fund underperformed the reference index. The exposure to the low-risk and momentum factors contributed negatively to relative performance. On the other hand, quality and value made a positive contribution to the relative returns. The risk profile of the Sub-fund, as measured by volatility, was higher than that of the reference index.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (primarily value, but also momentum, quality and low-risk), the model aims to harvest the value premium by identifying broad groups of stocks with low price to fundamentals characteristics that are likely to outperform in the long run.

Global Equity Sub-funds (continued)

Performance analysis (continued)

Robeco QI Global Value Equities (continued)

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Global Developed Multi-Factor Equities

Over the reporting period, until the liquidation of the Sub-fund on 4 October 2024, Robeco QI Global Developed Multi-Factor Equities generated a return of 17.7% (gross of fees in EUR), against a return of 17.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund performed close to its reference index. Exposure to the quality and value factors contributed negatively to relative performance. On the other hand, the low risk and momentum factors contributed positively to the relative returns. The risk profile of the Sub-fund, as measured by volatility, was lower than the volatility of the reference index.

The investment objective of the Sub-fund was to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, momentum, quality and low risk), the model aims to harvest the value, momentum, quality and low risk premiums by identifying broad groups of stocks with attractive factor characteristics that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Emerging Markets Sustainable Active Equities

Over the reporting period, Robeco QI Emerging Markets Sustainable Active Equities generated a return of 22.9% (gross of fees in EUR) against a return of 14.7% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The exposure to value, quality, momentum, analyst revisions, sustainability and short-term signals contributed positively to relative performance. The volatility of the Sub-fund was slightly lower than that of the reference index, with a medium level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Global Developed Conservative Equities

Over the reporting period, Robeco QI Global Developed Conservative Equities generated a return of 24.2% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund underperformed its reference index. The value and momentum factors had a positive impact on relative performance, while the low-risk factor had a negative effect. The risk profile of the Sub-fund, as measured by volatility, was higher than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. Robeco QI Customized Emerging Markets Enhanced Index Equities I

Over the reporting period, Robeco QI Customized Emerging Markets Enhanced Index Equities I generated a return of 9.9% (gross of fees in USD) against a return of 7.5% for its reference index, the MSCI Emerging Markets Index (net return in USD).

For the period, the Sub-fund outperformed its reference index. The exposure to value, quality, momentum, analyst revisions and short-term signals contributed positively to relative performance. The volatility of the Sub-fund was lower than that of its reference index, with a low level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI Global Quality Equities

Over the reporting period, Robeco QI Global Quality Equities generated a return of 26.3% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Countries World Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The exposure to low risk, value and momentum factors contributed positively to relative performance. On the other hand, quality contributed negatively to relative performance. The risk profile of the Sub-fund, as measured by volatility, was higher than that of the reference index.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (primarily quality, as well as value, momentum and low risk), the model aims to harvest the quality premium by identifying broad groups of stocks with favorable quality characteristics that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Global Equity Sub-funds (continued)

Performance analysis (continued)

Robeco QI Global SDG & Climate Conservative Equities (formerly RobecoSAM QI Global SDG & Climate Conservative Equities)

Over the reporting period, Robeco QI Global SDG & Climate Conservative Equities generated a return of 22.1% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

For the period, the Sub-fund underperformed its reference index. The low risk and sustainability factors contributed negatively to relative performance. On the other hand, value and momentum contributed positively to relative performance. The risk profile of the Sub-fund, as measured by volatility, was higher than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. In addition, the Sub-fund aims to advance the SDGs by investing in companies with business models and operational practices that align with the SDG targets. The Sub-fund also aims to contribute to the Paris Agreement by reducing the carbon footprint of the portfolio to keep the maximum global temperature increase well below 2°C above pre-industrial levels.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 2 exclusion list. At the same time it is managed so that it has at least a 10% better ESG risk rating than the primary benchmark, excludes non-positive-scoring stocks based on the proprietary Robeco SDG Framework (with the exception of 0-scoring stocks that are also part of the MSCI ACWI EU PAB Overlay Index), as well as having at least a 50% lower carbon footprint compared to MSCI ACWI Index, at least a lower carbon footprint than the MSCI ACWI EU PAB Overlay Index, and at least a 20% lower waste and water footprint versus the MSCI ACWI index.

Robeco QI Global Developed Enhanced Index Equities

Over the reporting period, Robeco QI Global Developed Enhanced Index Equities generated a return of 29.9% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The momentum factor was the primary positive contributor to relative performance, while exposure to the quality, analyst revisions and short-term signals factors also added to the relative returns. On the other hand, value impacted negatively on relative performance. The volatility of the Sub-fund was higher than that of its reference index, with a low level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco Sustainable Emerging Stars Equities

Over the reporting period, Robeco Sustainable Emerging Stars Equities generated a return of 3.8% (gross of fees in EUR) against a return of 14.7% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

The main negative contributors to relative performance were the overweight positions in South Korea and Brazil, as both countries performed relatively poorly versus other emerging countries. In addition, stock selection also contributed negatively, mainly due to positions in China. During the year, the weights in China, South Africa and the United Arab Emirates were increased, while the positions in Korea, Brazil and Mexico were lowered.

The Sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and is supported by quantitative models, while fully integrating ESG factors into the investment process. In addition, the Sub-fund has a better sustainability profile than the MSCI EM Index, limits investments in companies with an elevated sustainability risk profile and, through engagement, endeavors to improve the sustainability profile of the companies it invests in. The Sub-fund has no exposure to companies with an elevated sustainability risk based on ESG risk scores as measured by Sustainalytics, and more than 70% of the portfolio is classified as sustainable investments which is above the required 50% minimum.

Robeco QI Emerging Markets Sustainable Enhanced Index Equities

Over the reporting period, Robeco QI Emerging Markets Sustainable Enhanced Index Equities generated a return of 12.9% (gross of fees in USD) against a return of 7.5% for its reference index, the MSCI Emerging Markets Index (net return in USD).

For the period, the Sub-fund outperformed its reference index. Short-term signals was the primary positive contributor to relative performance, while exposure to analyst revisions, momentum, quality, sustainability and value also added to the relative returns. The volatility of the Sub-fund was lower than that of its reference index, with a medium level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 2 exclusion list, while it is managed so that it has at least a 10% better ESG risk rating than the benchmark, excludes -3 or -2-scoring stocks based on the proprietary Robeco SDG Framework, as well as having at least a 30% lower carbon footprint compared to the benchmark, and at least a 20% lower waste and water footprint versus the benchmark.

Robeco Global SDG Equities (formerly RobecoSAM Global SDG Equities)

Over the reporting period, Robeco Global SDG Equities generated a return of 22.3% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (total return in EUR).

The main reason for its underperformance was negative stock selection and the lower risk profile of the Sub-fund versus the overall market, with a beta clearly below 1. Among the largest detractors were preliminary mega-cap stocks which are considered to make a negative or only a minor positive contribution to the sustainable development goals. A negative contribution was also made by the large overweight position in healthcare. This was offset somewhat by a positive contribution from stock picking in the consumer staples and materials sectors, as well as the Sub-fund's zero exposure to energy.

Based on Robeco's proprietary SDG framework, the Sub-fund focuses solely on companies that generate a positive social/environmental impact by contributing to the achievement of the SDGs as defined by the United Nations. The highest allocation is to companies contributing to Good Health and Wellbeing (SDG 3), Decent Work and Economic Growth (SDG 8), Industry Innovation and Infrastructure (SDG 9).

Robeco Global SDG Engagement Equities (formerly RobecoSAM Global SDG Engagement Equities)

Over the reporting period, Robeco Global SDG Engagement Equities generated a return of 12.8% (gross of fees in USD) against a return of 17.5% for its reference index, the MSCI All Country World Index (net return in USD).

The Sub-fund underperformed its reference index over the reporting period due to weak stock selection in the information technology sector. Most other sectors actually contributed positively to overall performance. The underperformance in the information technology sector was mainly driven by not owning a number of the artificial intelligence high-flyers and Magnificent 7 stocks, such as Nvidia and Microsoft. In addition, weak results from individual companies such as STMicroelectronics, Samsung Electronics and Adobe Software led to disappointing results in this space. On the other hand, the Sub-fund benefited from very strong stock-picking in the industrials and consumer discretionary sectors, with good performance from Trane Technologies, Hitachi and Mr Price in consumer discretionary.

During the reporting period, the Sub-fund had a significantly better environmental footprint than the benchmark, as well as a better overall sustainability profile than the overall benchmark. For this strategy, all portfolio holdings are under active engagement and voting was conducted at the annual general meetings for all portfolio holdings during the reporting period.

Robeco QI Emerging Markets Sustainable Enhanced Index Equities II

Over the reporting period, Robeco QI Emerging Markets Sustainable Enhanced Index Equities II generated a return of 12.6% (gross of fees in GBP) against a return of 9.4% for its reference index, the MSCI Emerging Markets Index (net return in GBP).

For the period, the Sub-fund outperformed its reference index. Short-term signals was the primary positive contributor to relative performance, while exposure to analyst revisions, momentum, quality and value also added to the relative returns. On the other hand, sustainability detracted from the relative returns. The volatility of the Sub-fund was lower than that of the reference index, with a medium level of active risk. The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 2 exclusion list. At the same time it is managed so that it has at least a 10% better ESG risk rating than the benchmark, excludes -3 or -2-scoring stocks based on the proprietary Robeco SDG Framework, as well as having at least a 30% lower carbon footprint compared to the benchmark, and at least a 20% lower waste and water footprint versus the benchmark.

Performance analysis (continued)

Robeco QI Global SDG & Climate Beta Equities (formerly RobecoSAM QI Global SDG & Climate Beta Equities)

Over the reporting period, Robeco QI Global SDG & Climate Beta Equities generated a return of 25.7% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. No exposure to stocks with high negative (-3), medium negative (-2) and low negative (-1) SDG scores contributed positively to relative performance. On the other hand, exposure to stocks with high positive (+3), medium positive (+2) and low positive (+1) SDG scores contributed negatively to the relative returns.

The investment objective of the Sub-fund is to advance the SDGs by investing in companies with business models and operational practices that align with the SDGs and contribute to the Paris Agreement by reducing the carbon footprint of the portfolio to keep the maximum global temperature increase well below 2°C above pre-industrial levels.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 2 exclusion list. At the same time it is managed so that it has at least a 10% better ESG risk rating than the primary benchmark, excludes non-positive-scoring stocks based on the proprietary Robeco SDG Framework (with the exception of 0-scoring stocks that are also part of the MSCI ACWI EU PAB Overlay Index), as well as having at least a 50% lower carbon footprint compared to the primary benchmark; at least a lower carbon footprint than the MSCI ACWI EU PAB Overlay Index; and at least a 20% lower waste and water footprint versus the primary benchmark.

Robeco Quantum Equities

Over the reporting period, Robeco Quantum Equities generated a return of 25.2% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

For the period, the Sub-fund underperformed its reference index. From a country perspective, stock selection in the US, Japan and Italy contributed negatively to relative performance. From a sector perspective, stock selection in services, healthcare and materials contributed negatively to the relative returns.

From a factor attribution perspective, short-term momentum was the primary negative contributor to relative performance, while exposure to flow and jobs also detracted from the relative returns. On the other hand, short-term analyst revisions added to the relative returns.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of innovative short-term signals (sentiment and technical variables) based on novel datasets and advanced modeling techniques, the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco Emerging Markets ex China Equities

Over the reporting period, Robeco Emerging Markets ex China Equities generated a return of 0.9% (gross of fees in USD) against a return of 2.5% for its reference indices, the MSCI Emerging Markets ex China Index (net return in USD) up until 31 May 2024, and then the MSCI Emerging Markets ex China 10/40 Index (net return EUR) from 1 June 2024 onwards.

Country allocation was negative with overweight positions in South Korea, Mexico and Brazil as well as underweights in India and Taiwan detracting from performance. Positive country allocation came from our overweight in the United Arab Emirates and to a lesser extent from the overweight in Hungary and Greece. Stock selection was positive, with strong performance from the Indian automobile manufacturer Mahindra & Mahindra and Dubai's real estate giant Emaar Properties.

The Sub-fund actively integrates ESG factors into its investment process, aiming for a lower environmental footprint and a better ESG risk rating than its benchmark. The Sub-fund complies with the Robeco exclusion policy and actively votes according to the Robeco proxy voting policy. The Sub-fund has limited exposure to high-risk investments (1%) as defined by Sustainalytics, which is below the 3% maximum set. Over 62% of the Sub-fund investments are deemed sustainable (SDG>0).

Performance analysis (continued)

Robeco Emerging Markets Asia Select Equities

The Robeco Emerging Markets Asia Select Equities Sub-fund was launched in 2024. Over the reporting period commencing on 23 April 2024, the Sub-fund generated a return of 1.7% (gross of fees in USD) against a return of 4.2% for its reference index, the MSCI Emerging Markets Asia ex China ex Thailand Index (net return in USD).

The Sub-fund is overweighted in Korea, Indonesia and the Philippines, and underweighted in Taiwan and India, whilst neutral in Malaysia. The Sub-fund is overweight in communication services, financials, real estate, energy and healthcare, with underweights in IT, consumer discretionary and industrials. The benchmark has a weight of over 22% for Taiwan Semiconductor Manufacturing Co. ("TSMC"), but the Sub-fund is limited to a maximum position of 10% in any stock. The strong performance of TSMC was a significant headwind. The overweight position in Indonesia also proved to be ineffective due to ongoing outflows of capital.

The Sub-fund actively integrates ESG factors and sustainability risks into its investment process, but the focus is on engagement and improvement rather than exclusion. A substantially lower environmental intensity profile (greenhouse gas emission, water usage and waste generation) over the benchmark is maintained.

Robeco Quantum Market Neutral Equities

Over the reporting period, Robeco Quantum Market Neutral Equities generated a return of 0.7% (gross of fees in EUR) against a return of 3.8% for its reference index, the ICE BofA ESTR Overnight Rate Index (net return in EUR).

For the period, the Sub-fund underperformed its reference index. From a country perspective, stock selection in the US, Japan and Belgium contributed negatively to relative performance. From a sector perspective, stock selection in energy, healthcare and materials contributed negatively to the relative returns. The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model, while seeking a return that has a low correlation with equity market returns. Using a combination of innovative short-term signals (sentiment and technical variables) based on novel datasets and advanced modeling techniques, the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco Emerging Markets Climate Transition Equities

Over the reporting period, Robeco Emerging Markets Climate Transition Equities generated a return of 3.3% (gross of fees in EUR) against a return of 3.9% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

Country allocation was negative, with the Sub-fund's overweight in Brazil and South Korea detracting from performance. Stock selection was positive, with overweights in Korean power equipment manufacturer HD Hyundai Electric; China's battery producer Contemporary Amperex Technology ("CATL"); and waste recycling company China Everbright Environment.

The Sub-fund actively integrates ESG factors into its investment process. The Sub-fund complies with the Robeco exclusion policy and actively votes according to the Robeco proxy voting policy. The Sub-fund has no exposure to high-risk investments as defined by Sustainalytics. Over 93% of the assets are invested in companies that are either enablers (climate solution providers) or makers (transition leaders) or a combination of the two.

Performance analysis

Robeco Asia-Pacific Equities

Over the reporting period, Robeco Asia-Pacific Equities generated a return of 20.3% (gross of fees in EUR) against a return of 16.9% for its reference index, the MSCI All Country Asia Pacific Index (net return in EUR).

The Sub-fund generated strong outperformance due to positive stock selection across most markets, including Japan, China, Korea and India. A large overweight position in Japan was maintained and the market continued to re-rate on the back of corporate governance reforms. Exposures in heavy industrials such as IHI corp, Hitachi and Mitsubishi Heavy benefited on strong demand for energy investments and defense spending. The portfolio shifted in a timely fashion to an overweight in China during the second half, as the market witnessed a strong rally on stimulus hopes. Stock selection in Australia was a detractor driven by an underweight in the banking sector, which re-rated despite rate cut headwinds. The overweight position in Indonesia also proved ineffective due to ongoing outflows of capital.

The Sub-fund incorporates sustainability risks in company assessments, but the focus is on engagement and improvement rather than exclusion. A substantially lower energy intensity profile over the benchmark is maintained.

Robeco Sustainable European Stars Equities

Over the reporting period, Robeco Sustainable European Stars Equities generated a return of 8.8% (gross of fees in EUR) against a return of 8.6% for its reference index, the MSCI Europe Index (total return in EUR). The active share is around 70% with a beta of around 1, a tracking error of around 3% and volatility lower than the benchmark's.

This outperformance is the result of positive contributions from various sectors. A positive allocation effect was the biggest contributor to relative gain, while the selection effect was negative. The consumer staples, materials, utilities and communication services sectors contributed positively to relative performance, partly offset by poor relative returns in financials, information technology and industrials.

As the strategy seeks to have a lower environmental footprint and a better ESG risk rating than the benchmark (using Sustainalytics ESG Risk Score), investment decisions are considering the effect of adding or exiting positions on these KPIs. Utilities and materials, two sectors with high carbon intensity, are underweighted as a result. Consequently, the strategy's carbon footprint (Scope 1, 2 and 3 upstream) is materially lower and the aggregate ESG risk rating better than that of the benchmark.

Robeco QI European Conservative Equities

Over the reporting period, Robeco QI European Conservative Equities generated a return of 9.5% (gross of fees in EUR) against a return of 8.6% for its reference index, the MSCI Europe Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The low risk factor contributed negatively to relative performance. On the other hand, the momentum and value factors contributed positively to the relative returns. The risk profile of the Sub-fund, as measured by volatility, was lower than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI US Conservative Equities

Over the reporting period, Robeco QI US Conservative Equities generated a return of 17.7% (gross of fees in USD) against a return of 24.0% for its reference index, the MSCI North America Index (net return in USD).

For the period, the Sub-fund underperformed its reference index. The low risk factor contributed negatively to relative performance, while momentum and value factors also detracted from relative returns. The risk profile of the Sub-fund, as measured by volatility, was lower than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Regional & Country Equity Sub-funds (continued)

Performance analysis (continued)

Robeco BP US Premium Equities

Over the reporting period, Robeco BP US Premium Equities generated a return of 10.0% (gross of fees in USD) against a return of 14.0% for its reference index, the Russell 3000 Value Index (gross return in USD).

The Sub-fund underperformed its reference index for the year, with stock selection the primary driver of relative underperformance, while sector allocation had no impact during the year. The Sub-fund lagged, as large and mega-cap tech stocks climbed significantly higher during the year, largely driven by the emergence of artificial intelligence. The strong success seen in these stocks resulted in a concentrated environment that favored growth rather than value, resulting in a headwind during the year. From a stock selection perspective, stocks in healthcare, industrials and energy were the primary causes of detraction, while stock selection in materials and consumer discretionary helped offset this disadvantage, albeit slight. Sector allocation was flat for the year.

As part of the Sub-fund's robust process and philosophy, ESG characteristics are considered every step of the way through an investment decision. The Sub-fund has always maintained a lower carbon intensity than the stated value benchmark and currently has a higher degree of exposure to the highest-ranking stocks based on an ESG/SRI perspective. Over the course of the year, the Sub-fund cast over 1600 votes across 116 proxy voting meetings, commonly voting against management/board compensation practices and voting overwhelmingly in favor of shareholder environmental, social and governance proposals.

Robeco Chinese Equities

Over the reporting period, Robeco Chinese Equities generated a return of 19.6% (gross of fees in EUR) against a return of 26.1% for its reference index, the MSCI China 10/40 Index (net return in EUR).

The Sub-fund underperformed its reference index. Stock selection in the communications and consumer discretionary sectors were the main detractors from performance. Additionally, an underweight position in financials contributed to this underperformance, while stock selection in consumer staples had a positive impact.

The China A-shares market experienced a tumultuous yet surprisingly positive year in 2024. It began with a sell-off, hitting a low in early February due to weak macroeconomic data and margin calls on derivatives. However, the market rebounded, as policymakers intervened with strategic purchases and tighter regulations to protect smaller investors. This rally was bolstered by strong first-quarter GDP growth, but profit-taking emerged in mid-May and persisted until late September. An unprecedented rally followed a significant policy pivot, but soaring expectations turned to disappointment after a lackluster national day announcement, leading to a sharp correction and consolidation phase.

The Sub-fund has integrated ESG factors into its investment process by adhering to our binding elements such as limiting exposure to elevated risk investments based on data from Sustainalytics, voting in line with the Robeco proxy voting policy and complying with our exclusion policy.

Robeco Indian Equities

Over the reporting period, Robeco Indian Equities generated a return of 22.4% (gross of fees in EUR) against a return of 18.6% for its reference index, the MSCI India Index (net return in EUR).

Stock selection remained an overwhelming driver of total attribution. Eight out of eleven sectors contributed positively to performance in 2024. Consumer discretionary, industrials, financials and energy were the top contributors to performance in 2024. Stock selection in financials, industrials and consumer discretionary were the largest contributors to performance. Sector allocation driven by an overweight position in consumer discretionary and an underweight position in energy contributed to performance. Consumer staples was the largest detractor to performance, while real estate and materials detracted mildly. Apart from the exclusion of weapons, tobacco and coal utility companies, the Sub-fund's ESG focus stresses integration, focusing on key sustainability parameters and how these impact companies' income statements through both risk and opportunity factors.

The Sub-fund's ESG lens puts emphasis on companies that practice good governance and have articulated a coherent strategy on moving towards decarbonization. In line with this, the Sub-fund preferred investing in companies such as Maruti over Mahindra and Mahindra, which relies largely on diesel as a fuel variant. Maruti correspondingly has consciously completely moved away from diesel as a fuel variant in its product mix.

Regional & Country Equity Sub-funds (continued)

Performance analysis (continued)

Robeco Asian Stars Equities

Over the reporting period, Robeco Asian Stars Equities generated a return of 11.7% (gross of fees in USD) against a return of 12.0% for its reference index, the MSCI All Country Asia ex Japan Index (net return in USD).

The Sub-fund invests in value stocks with an exciting future, while maintaining positive earnings and price momentum. It is a high conviction strategy with a concentrated portfolio of 47 stocks. This strategy delivered a small negative relative return in 2024. Solid stock selection in Korea and Vietnam contributed to performance, but China stock selection was difficult. Technology stock selection contributed positively for another year, driven by AI-related demand. The underweight position in TSMC was offset by other outperforming exposures in IT services, memory and hardware. Consumer discretionary stocks in home appliances and autos delivered strong earnings and benefited from a cyclical upturn. Communications stock selection posted challenges in 2024, but improvements began in the fourth quarter. The China market bottomed in September 2024. However, a clear recovery path has not yet been established. India experienced a correction in the last quarter due to weak earnings revisions, though the structural growth outlook remains favorable.

ESG integration continues to play an important role in the investment process and the focus is on engagement and improvement. ESG topics remain a priority across governments, regulators and companies in the region. The Sub-fund limits investments in companies with an elevated sustainability risk profile.

Robeco Sustainable Asian Stars Equities

Over the reporting period, Robeco Sustainable Asian Stars Equities generated a return of 10.9% (gross of fees in USD) against a return of 12.0% for its reference index, the MSCI All Country Asia ex Japan Index (net return in USD).

The Sub-fund focuses on identifying and investing in underappreciated beneficiaries of Asia's conversion towards sustainability. This strategy is characterized by high conviction and a concentrated portfolio consisting of 45 stocks, demonstrating strong sustainability credentials and achieving a carbon footprint ownership 55% below benchmark in 2024. The strategy underperformed in 2024. Investments in technology enabling and smart mobility themes contributed positively to performance, while stock selections for financial inclusion, fintech and healthy living were less favorable. The continued excitement around AI in Asia bolstered returns for the semiconductor supply chain. In 2025, opportunities are anticipated in downstream applications alongside challenges related to high valuations and expectations. The combination of robust economic growth, lower interest rates and expansionary fiscal policies in India and ASEAN will create a favorable environment for healthy living and financial inclusion stocks, where valuations remain appealing.

Sustainability is integral to the Sub-fund's entire investment process, from stock selection to portfolio construction. A thematic approach underscores the key drivers of sustainable development in the region. New engagements on climate and biodiversity as well as dialogues with portfolio companies aim to further enhance sustainability improvements across Asia.

Robeco BP US Large Cap Equities

Over the reporting period, Robeco BP US Large Cap Equities generated a return of 17.0% (gross of fees in USD) against a return of 14.4% for its reference index, the Russell 1000 Value Index (gross return in USD).

The Sub-fund outperformed its reference index in 2024, as both stock selection and sector allocation drove outperformance. Contribution to stock selection came across various sectors with financials, consumer staples, information technology and materials holdings having the largest positive impact. The sector allocation contribution was aided by the Sub-fund's overweight exposure to the financials sector and underweight exposure to real estate and healthcare.

As part of the Sub-fund's robust process and philosophy, ESG characteristics are considered every step of the way through an investment decision. The Sub-fund has always maintained a lower carbon intensity than the stated value benchmark and currently has a higher degree of exposure to the highest-ranking stocks based on an ESG/SRI perspective. Over the course of the year, the Sub-fund cast over 1170 votes across 80 proxy voting meetings, commonly voting against management/board compensation practices and voting overwhelmingly in favor of shareholder environmental, social and governance proposals.

Report of the Board of Directors (continued)

Regional & Country Equity Sub-funds (continued)

Performance analysis (continued)

Robeco BP US Select Opportunities Equities

Over the reporting period, Robeco BP US Select Opportunities Equities generated a return of 10.7% (gross of fees in USD) against a return of 13.1% for its reference index, the Russell Mid Cap Value Index (gross return in USD).

The Sub-fund underperformed the reference index during 2024, as stock selection was the sole detractor from relative performance, while sector allocation helped offset this disadvantage. From a stock selection perspective, energy and industrials were the two primary detractors, as both sectors faced a volatile environment in 2024. Utilities also detracted slightly, with the Sub-fund's underweight weighing on performance and the requirement for supplementary power to support AI driving the sector higher. On a positive note, the Sub-fund saw strong performance contributions from consumer staples, information technology and consumer discretionary. From a sector allocation perspective, the Sub-fund added value in healthcare and consumer staples.

As part of the Sub-fund's robust process and philosophy, ESG characteristics are considered every step of the way through an investment decision. The Sub-fund has always maintained a lower carbon intensity than the stated value benchmark and currently has a higher degree of exposure to the highest-ranking stocks based on an ESG/SRI perspective. Over the course of the year, the Sub-fund cast over 1800 votes across 145 proxy voting meetings, commonly voting against management/board compensation practices and voting overwhelmingly in favor of shareholder environmental, social and governance proposals.

Robeco Chinese A-share Equities

Over the reporting period, Robeco Chinese A-share Equities generated a return of 12.1% (gross of fees in EUR) against a return of 19.0% for its reference index, the MSCI China A International Index (net returns in EUR).

The Sub-fund underperformed its reference index. Stock selection in the materials sector delivered positive results, while the information technology sector, particularly in hardware, was the primary detractor from performance. Additionally, an underweight position in financials negatively impacted performance. The China A-shares market experienced a tumultuous yet surprisingly positive year in 2024. The year began with a sell-off, hitting a low in early February due to weak macroeconomic data and forced selling by investors to deposit additional funds or sell assets to meet margin requirements. However, the market rebounded, as policymakers intervened with strategic purchases and tighter regulations to protect smaller investors. This rally was bolstered by strong first-quarter GDP growth, but profit-taking emerged in mid-May and persisted until late September. An unprecedented rally followed a significant policy pivot, but soaring expectations turned to disappointment after a lackluster National Day announcement, leading to a sharp correction and consolidation phase.

The Sub-fund has integrated ESG factors into its investment process by adhering to our binding elements such as limiting exposure to elevated risk investments based on data from Sustainalytics; voting in line with the Robeco proxy voting policy; and complying with our exclusion policy. It maintained a better Sustainalytics risk score than the reference index and earned the Febelfin label.

Robeco QI Chinese A-share Active Equities

Over the reporting period, Robeco QI Chinese A-share Active Equities generated a return of 23.3% (gross of fees in EUR) against a return of 19.0% for its reference index, the MSCI China A International Index (net returns in EUR).

For the period, the Sub-fund outperformed its reference index. Value was the primary positive contributor to relative performance, while exposure to analyst revisions, quality and short-term signals also added to the relative returns. On the other hand, momentum contributed negatively to relative performance. The volatility of the Sub-fund was lower than that of the reference index, with a medium level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Report of the Board of Directors (continued)

Regional & Country Equity Sub-funds (continued)

Performance analysis (continued)

Robeco QI Chinese A-share Conservative Equities

Over the reporting period, Robeco QI Chinese A-share Conservative Equities generated a return of 28.4% (gross of fees in EUR) against a return of 19.0% for its reference index, the MSCI China A International Index (net returns in EUR).

For the period, the Sub-fund outperformed its reference index. The low risk, momentum and value factors contributed positively to relative performance. The risk profile of the Sub-fund, as measured by volatility, was lower than that of the index.

The investment objective of the Sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI European Value Equities

Over the reporting period, Robeco QI European Value Equities generated a return of 9.1% (gross of fees in EUR) against a return of 8.6% for its reference index, the MSCI Europe Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The momentum, quality and value factors contributed positively to relative performance. On the other hand, low risk detracted from the relative returns. The risk profile of the Sub-fund, as measured by volatility, was higher than that of the index.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (primarily value, as well as momentum, quality and low risk), the model aims to harvest the value premium by identifying broad groups of stocks with low price to fundamentals characteristics that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco QI US Climate Beta Equities (formerly RobecoSAM QI US Climate Beta Equities)

Over the reporting period, Robeco QI US Climate Beta Equities generated a return of 24.2% (gross of fees in USD) against a return of 24.6% for its reference index, the MSCI USA Index (net return in USD).

For the period, the Sub-fund underperformed its reference index. The overweight exposure to stocks with low carbon footprints (top two quintiles) detracted from relative performance.

The investment objective of the Sub-fund is to contribute to the Paris Agreement by reducing the carbon footprint of the portfolio to help keep the maximum global temperature increase well below 2°C above pre-industrial levels.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 2 exclusion list. At the same time it is managed so that it has at least a 10% better ESG risk rating than the primary benchmark. It excludes non-positive-scoring stocks based on the proprietary Robeco SDG Framework (with the exception of 0-scoring stocks that are also part of the MSCI USA EU PAB Overlay Index), as well as having at least a 50% lower carbon footprint compared to the primary benchmark; at least a lower carbon footprint than the MSCI USA EU PAB Overlay Index; and at least a 20% lower waste and water footprint versus the primary benchmark.

Report of the Board of Directors (continued)

Regional & Country Equity Sub-funds (continued)

Performance analysis (continued)

Robeco QI European Active Equities

Over the reporting period, Robeco QI European Active Equities generated a return of 12.5% (gross of fees in EUR) against a return of 8.6% for its reference index, the MSCI Europe Index (net return in EUR).

For the period, the Sub-fund outperformed its reference index. The momentum factor was the primary positive contributor to relative performance, while the exposure to analyst revisions, quality, short-term signals and value also added to the relative returns. The volatility of the Sub-fund was lower than that of the reference index, with a medium level of active risk.

The investment objective of the Sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum, analyst revisions and short-term signals), the model identifies broad groups of stocks that are likely to outperform in the long run.

The Sub-fund is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Robeco Transition Asian Equities

The Robeco Transition Asian Equities Sub-fund was launched on 24 July 2024. Over the reporting period since inception, the Sub-fund generated a return of 2.2% (gross of fees in USD) against a return of 2.4% for its reference index, the MSCI All Country Asia ex Japan Index (net return in USD). The Sub-fund aims to make investments in assets that contribute to transition. Transition pertains to activities that measurably and credibly contribute to the goals of the Paris Agreement. This is achieved by investing in companies that have credible emission reduction targets as assessed by Robeco's inhouse proprietary IP, and companies that provide solutions to enable climate change mitigation.

The Sub-fund is overweight in Australia, Japan (both non-benchmark), Malaysia, Korea, the Philippines and India, whilst being underweight in Taiwan, China, Hong Kong and Singapore. The Sub-fund is overweight in industrials, healthcare and materials, whilst being underweight in financials, consumer discretionary, IT and consumer staples, with other sectors around neutral. The strong performance of TSMC was a significant headwind. In addition to utilizing Robeco's in-house climate IP, the Sub-fund actively integrates ESG factors and sustainability risks into its investment process, with an emphasized focus on engagement. A substantially lower environmental intensity profile (greenhouse gas emission, water usage and waste generation) over the benchmark is maintained.

Performance analysis

Robeco New World Financials

Over the reporting period, Robeco New World Financials generated a return of 29.1% (gross of fees in EUR) against a return of 32.6% for its reference index, the MSCI All Country World Financials Index (net return in EUR).

Banks delivered outstanding results in 2024, driven by ‘higher-for-longer’ rates, boosting net interest income. US equity ‘exceptionalism’ was prevalent, with only few other markets close and Resona, Standard Chartered, Barclays, Erste Bank and DBS as main examples. Conversely, banks in Mexico, Brazil and Indonesia underperformed due to weak currencies and political risks impacting the Emerging Finance trend. p

We shifted our portfolio towards financials with fee-driven revenues, driven by improving capital markets. Capital-markets-exposed financials such as Goldman Sachs, KKR, BlackRock, Morgan Stanley and Ameriprise outperformed, benefiting the Aging Finance trend. However, life insurance stocks such as Prudential and AIA Group lagged.

The Digital Finance trend rebounded in 2H 2024, aided by deregulation hopes from the incoming Trump administration and strong operational results. Robinhood nearly doubled since its addition to the Sub-fund in August, and payment bellwethers Fiserv, PayPal and Discovery also saw strong returns. East Money gained from China’s stimulus rally, while Coinbase benefited from rising crypto prices. However, Brazilian payment companies StoneCo and PagSeguro were major detractors. The Sub-fund actively engaged with payment provider Adyen, which has contributed to strongly improved communication and relations with investors.

Robeco Sustainable Property Equities

Over the reporting period, Robeco Sustainable Property Equities generated a return of 5.6% (gross of fees in EUR) against a return of 8.5% for its reference index, the S&P Developed Property Index (net return in EUR). A flat stock selection in Asia Pacific ex-Japan was offset by a negative contribution from stock selection in European multifamily REITs and a negative contribution in the PropTech segment in North America.

Inflation and volatility in real interest rates combined with structural trends drove performance differences throughout the year. Increased transaction activity including Blackstone’s takeover of Apartment Income REIT, a portfolio holding, drove the rally in multifamily residential REITs. Data center REITs was the best-performing subindustry, fueled by the rising AI demand for capacity.

The Sub-fund has an ESG risk score below average and actively steers towards a carbon intensity below the benchmark average. Besides Scope 1 and 2, Scope 3 upstream is now also included in this process. In addition, the Sub-fund limits investments in companies with an elevated sustainability risk profile. In 2024, Keppel DC REIT, a Singapore-based data center REIT, was added to the portfolio, contributing to an overall improvement in the overall ESG risk score.

Report of the Board of Directors (continued)

Theme Equity Sub-funds (continued)

Robeco Global Consumer Trends

Over the reporting period, Robeco Global Consumer Trends generated a return of 20.4% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

The Sub-fund lagged the overall market, mainly due to the defensive Health & Wellbeing trend, which could not keep up with the strong market as revenue growth slowed down for most consumer staples holdings, with lower inflation and higher interest rates pressuring valuations. The portfolio is positioned along three overarching themes. First, the digital transformation of consumption theme was the best-performing underlying trend. Most of the Magnificent 7 tech firms handsomely beat driven by the ongoing AI frenzy, with Nvidia the prime beneficiary. Second, the rise of the middle class theme delivered a decent return, driven by our exposure to local brands in developed and emerging markets. Finally, our health & wellbeing theme contributed negatively as defensive stocks underperformed the broader market and top ten holding Novo Nordisk suffered a drawback in its obesity franchise.

The Sub-fund has integrated ESG factors into its investment process by adhering to our binding elements such as limiting exposure to elevated risk investments based on data from Sustainalytics, voting in line with the Robeco proxy voting policy and complying with our exclusion policy. The Sub-fund actively engaged with Adyen, which has contributed to strongly improved communication with investors.

Robeco Global Multi-Thematic (formerly Robeco MegaTrends)

Over the reporting period, Robeco Global Multi-Thematic generated a return of 21.5% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

As mentioned in the semi-annual report, the investment policy was modified and the investment universe broadened during the first half of the year. The Sub-fund now focuses on three megatrends that drive structural change in our socioeconomic environment. Although the year 2024 turned out to be another rewarding year in terms of investment returns, performance lagged the reference index. Transforming technologies was by far the best-performing theme, driven by advances in artificial intelligence and its perceived leader Nvidia. The changing sociodemographic theme had a disappointing year and ended flat as 2/3 of the positions here generated a negative return. Preserving earth made up a lot of ground in the second half, driven by the electrification sub-theme.

The position in Sika AG was sold, as Robeco's SI Research flagged that the company has significant exposure to some of the chemicals that are facing tightening regulation from both the EU and the US. The company could have a hard time creating new products to counter this regulatory risk. This company no longer fitted in the portfolio, both from an environmental and from a financial point of view.

Robeco Digital Innovations

Over the reporting period, Robeco Digital Innovations generated a return of 27.5% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

In 2024, for the second year in a row, AI proved the driving force behind technology innovation and earnings growth. The Sub-fund was well-positioned to benefit through its sizeable holdings in AI market leaders such as Nvidia and TSMC. Other themes that contributed positively to performance were cyber security (Palo Alto Networks, CyberArk, Fortinet), enterprise software (SAP, ServiceNow, Salesforce) and cloud computing (Amazon, Microsoft). Factory automation made a mixed contribution to performance (positive Zebra Technologies, Emerson Electric, ABB; negative GXO Logistics, Rockwell Automation and Fanuc), while observability (Dynatrace, Datadog), new data stack (Snowflake, MongoDB) and semiconductors (Microchip Technology, Infineon Technologies, Samsung Electronics) detracted from performance. Robotics & automation was the standout performer among the trends that the strategy tracks, followed by secure digital infrastructure and digital enablers.

The Sub-fund retained its low SI risk profile (better than the reference index) over the reporting period.

Robeco FinTech

Over the reporting period, Robeco FinTech generated a return of 31.7% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

Strong equity returns were boosted by rate cuts in the U.S. and Europe as inflation moderated. While macro data was resilient, the AI theme came to the fore, supported by ongoing China stimulus. Nevertheless, the rally was narrow with only 29% of stocks outperforming the global index and only eight stocks contributing half the return of the global index. This environment proved challenging for data & analytics and financial infrastructure companies even though banking software provider Q2 Holdings more than doubled its share price.

Digital assets players such as Coinbase gained amid improved outlook for U.S. crypto regulation. The successful launch of bitcoin ETFs in January was noteworthy, managing over USD 100 bln in bitcoins by year end. The Sub-fund took positions in online brokerage firms Robinhood and Interactive Brokerage in August. Both financial management stocks have risen strongly since, as China brokerage East Money Information alongside neobank NU Holdings and AI lending marketplace Upstart all had a tremendous year.

Payment companies such as Fiserv, PayPal and Shopify also contributed significantly to returns. However, there was a divergence in emerging markets with Brazilian payment providers StoneCo and PagSeguro sharply correcting, while embedded finance players SEA and Tencent performed well. The Sub-fund also actively engaged with payment provider Adyen, contributing to strongly improved communication and relations with investors.

Report of the Board of Directors (continued)

Theme Equity Sub-funds (continued)

Performance analysis (continued)

Robeco Circular Economy (formerly RobecoSAM Circular Economy Equities)

Over the reporting period, Robeco Circular Economy generated a return of 20.7% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The investment landscape in 2024 showcased the strength of structural growth drivers in the theme, particularly in AI, data center build-outs and the modernization of the electrical grid. The Sub-fund capitalized on these trends. Sector-wise, the technology and industrial sectors were the largest positive contributors, while the main drag came from the lack of exposure to financials.

The Sub-fund holds a position in Sprouts Farmers Market, a US specialty food retailer that targets the fast-growing health-conscious consumer, with organic food being increasingly recognized for its low-impact agricultural practices (removes synthetic pesticides from production). Said company is aligned with the sustainable objective of the Sub-fund to finance solutions that support the transition from traditional production and consumption patterns toward a circular economy, as evidenced through SDG Zero hunger (SDG 2), Good health and well-being (SDG 3) and Responsible consumption and production (SDG 12).

Robeco Smart Energy (formerly RobecoSAM Smart Energy Equities)

Over the reporting period, Robeco Smart Energy generated a return of 11.8% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's and the theme's underperformance was mostly attributable to the renewable energies cluster, where despite strong regulatory support and increasing demand for power, prolonged higher interest rates and various supply bottlenecks kept growth below expectations. The energy efficiency cluster was the top performer, with the big data subcluster benefiting from increased investments by hyperscalers in data centers and related energy systems to meet the growing AI demands. Equipment suppliers also displayed robust returns, with Quanta Services benefiting from strong demand in the U.S. for power grid expansion, and Schneider Electric capitalizing on accelerating trends in electrification and data center construction.

Within renewable energies, one name that stands out not only in terms of positive performance but also related to the Sub-fund's sustainable objective is First Solar. Said company produces solar panels in the U.S., Malaysia, India and Vietnam. Their PV (solar photovoltaics) is one of the main technologies that can help decarbonize the economy. Therefore, the company is aligned with the sustainable objective of the Sub-fund to further accelerate the transformation and decarbonization of the global energy sector, as evidenced through SDG Affordable and clean energy (SDG 7) and Climate action (SDG 13).

Robeco Smart Materials (formerly RobecoSAM Smart Materials Equities)

Over the reporting period, Robeco Smart Materials generated a return of -0.5% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

In 2024, the Sub-fund underperformed as the advanced materials cluster faced challenges, particularly in transition metals and specialty chemicals, due to weak metal prices and lower-than-expected volume growth. Conversely, the resource recovery sub-cluster performed well, while building efficiency emerged as the best-performing sub-cluster, benefiting from strong demand for energy-efficient materials. The smart manufacturing cluster outperformed the broader portfolio, with Industry 4.0 software leading gains on software and advanced equipment.

The Sub-fund holds a position in Rockwool, a global leader in stone wool, which is an insulation material derived from melted volcanic rock. Insulation has always been critical, but becomes even more so with the focus on energy efficiency. The company is aligned with the sustainable objective of the Sub-fund to help mitigate the resource scarcity challenge within industries while supporting economic growth, as evidenced by SDGs Affordable and clean energy (SDG 17), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11), Responsible consumption and production (SDG 12) and Climate action (SDG 13).

Report of the Board of Directors (continued)

Theme Equity Sub-funds (continued)

Performance analysis (continued)

Robeco Smart Mobility (formerly RobecoSAM Smart Mobility Equities)

Over the reporting period, Robeco Smart Mobility generated a return of 6.5% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's and the theme's underperformance was mostly attributable to the EV component suppliers cluster, as the battery value chain continued to face challenges in 2024. The upstream sector experienced a decline in lithium spot prices in the first half of the year, with conditions stabilizing in the second half. Some Korean companies faced challenges due to their exposure to the US EV market, while Chinese battery manufacturer CATL saw strong performance. The semiconductor sector was characterized by a slowdown in the automotive space, though exposure to advanced Driver-assistent systems and autonomous driving applications was a positive. EV manufacturers were a notable highlight: Tesla outperformed, largely due to the company's emphasis on autonomous driving technology, and BYD also performed well, driven by impressive volume growth.

The Sub-fund holds a position in EV manufacturer BYD, whose impact on decarbonization goes beyond making cars. The company manufactures public transport vehicles (e.g. eBuses), partly produces its own chips, makes batteries for other end products and manufactures and sells solar panels. The company is aligned with the sustainable objective of the Sub-fund to support the transformation and decarbonization of the global transportation sector, contributing to SDGs such as Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11) and Climate action (SDG 13), thus complying with the binding elements as defined for the Sub-fund.

Robeco Sustainable Healthy Living (formerly RobecoSAM Sustainable Healthy Living Equities)

Over the reporting period, Robeco Sustainable Healthy Living generated a return of 10.1% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

Performance was driven by the healthy nutrition and healthy lifestyle clusters, followed by therapeutics and healthcare efficiency. Overall, the Sub-fund's underperformance versus the broad markets was mostly due to the absence of thematic sector exposure to information technology and AI stocks. Moreover, growth in discretionary categories slowed down, particularly in the mass market, after a prolonged period of elevated post-pandemic growth. At the same time, staples companies faced declines in volumes and, together with the healthcare sector, were affected by uncertainties following Trump's election.

Abbvie is a new holding in the Sub-fund. AbbVie is a large U.S. pharma company specializing in immunology, neuroscience and oncology, thus supporting the development of innovative treatments for diseases with high burdens to society. The company is aligned with the sustainable objective of the Sub-fund to contribute to the Sustainable Development Goals promoting good health and well-being and contributing to an efficient healthcare system (SDG 3), thus complying with the binding elements as defined for the Sub-fund.

Robeco Sustainable Water (formerly RobecoSAM Sustainable Water Equities)

Over the reporting period, Robeco Sustainable Water generated a return of 13.2% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's relative underperformance versus the broad markets was mostly due to the lack of thematic sector exposure to information technology and financials. Other sectors that performed well though they weighed on relative performance were communication services, energy and consumer discretionary, where the Sub-fund also has no exposure. The relatively high allocation of the Sub-fund to industrials helped to partially offset the underperformance, with investments in more efficient and up-to-date water infrastructure continuing to drive demand globally.

The Sub-fund holds a position in American Water Works, a U.S. water utility company supplying water and waste water services. The company operates in an industry where aging water infrastructure and stricter water quality regulations around PFAS are driving the need for increased investments. The company is aligned with the sustainable objective of the Sub-fund to help mitigate the global challenges related to scarcity, quality and allocation of water, contributing to SDGs such as Clean water and sanitation (SDG 6) and Industry, innovation and infrastructure (SDG 9).

Report of the Board of Directors (continued)

Theme Equity Sub-funds (continued)

Performance analysis (continued)

Robeco Global Gender Equality (formerly RobecoSAM Global Gender Equality Equities)

Over the reporting period, Robeco Global Gender Equality generated a strong return of 27.0% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (total return in EUR).

The positive portfolio returns were driven by both sector allocation and strong stock selection amongst companies which support gender equality, diversity, equity and inclusion (DE&I). The main contributors to positive stock selection came from technology innovation leaders with favorable high gender scores (100=best, 1=worst) including: Nvidia (89), a leading AI enabler; SAP (74), a leader in cloud computing; and Alphabet (66), a multi-AI tech segment leader. The Sub-fund also benefited from CBRE (92), a leading global commercial real estate services & investment solutions provider; KB Financial Group (78), a leading Korean banking group, benefiting from the government's "Corporate Value-up Program"; and lululemon, a leading global wellbeing brand which is currently implementing diversity goals which will improve their gender score. On the negative side, performance detraction came from unowned Broadcom (30), Meta (59) and Tesla (18), as these companies outperformed and have low gender scores, reflecting poor results on corporate DE&I.

The Sub-fund selects leading gender equality companies which focus not only on board-level diversity but also on items including senior and junior management diversity, overall workforce equality, talent retention and ensuring gender pay equality. The Sub-fund also has a lower environmental footprint versus the MSCI World Index.

Robeco Next Digital Billion

Over the reporting period, Robeco Next Digital Billion generated a return of 21.6% (gross of fees in EUR) against a return of 14.7% for its reference index, the MSCI Emerging Markets Index (net return in EUR).

The consumer segment lifted performance in 2024, driven by Chinese firms such as Meituan (+86%) and Trip.com (+45%), which benefited from a favorable policy shift and strong results throughout the year. Similarly, Indian food-delivery Zomato (+118%) excelled by tapping into huge underserved markets. The platform and mobility segments also performed well, with Southeast Asia's Sea (+162%) and Grab (+40%) emerging as local champions. In contrast, Airtel Africa (-10.4%) struggled in the enablers segment on FX, but GDS (+153%) thrived on AI-driven data center demand. In the enterprise segment, IT firms EPAM and Globant rebounded, though not enough to offset earlier weakness, while Vietnamese FPT (+64%) showcased the portfolio's unique growth opportunities. In Latin America, fiscal concerns and rate hikes weighed on performance, but Nu Holdings (+24.4%) stood out as fintech success.

The Sub-fund incorporates sustainability risks in company assessments, but the focus is on engagement and improvement rather than exclusion. A substantially lower energy intensity profile over the benchmark is maintained. The Sub-fund maintains a better Sustainability ESG risk score than the benchmark and limits investments with elevated sustainability risks.

Robeco Biodiversity Equities (formerly RobecoSAM Biodiversity Equities)

Over the reporting period, Robeco Biodiversity Equities generated a return of 12.6% (gross of fees in EUR) against a return of 26.6% for its reference index, the MSCI World Index (net return in EUR).

The Sub-fund's and the theme's relative underperformance was mostly attributable to the fund not investing in the Magnificent 7 and IT/AI stocks, which are not part of the eligible universe, coupled with a significant underweight of the portfolio to the US market. At a stock level, Sprouts Farmers Markets was a highlight, as its organic food offering struck a chord with customers, leading to several earnings upgrades throughout the year.

Not only does Sprouts Farmers Market offer products with cleaner labels, including 25% of its sales that are classified as organic, but the company is also aligned with the sustainable objective of the Sub-fund to support the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce biodiversity threats or restore natural habitats, as evidenced through SDG Good health and well-being (SDG 3) and Life on land (SDG 15), thus complying with the binding elements as defined for the Sub-fund.

Report of the Board of Directors (continued)

Theme Equity Sub-funds (continued)

Performance analysis (continued)

Robeco Global Climate Transition Equities (Formerly RobecoSAM Net Zero 2050 Climate Equities)

Over the reporting period, Robeco Global Climate Transition Equities generated a return of 26.7% (gross of fees in EUR) against a return of 29.8% for its reference index, the MSCI All Country World Index (net return in EUR).

Note that as of 26 September 2024, Robeco Net Zero 2050 Climate Equities has been renamed Robeco Global Climate Transition Equities. The official reference index was the MSCI World Climate Change Index until 30 September 2024 and the MSCI All Country World Index from 1 October 2024 on. The Sub-fund has also become an Article 8 fund under SFDR. Consequently, the binding element for the Sub-fund also changed into one that stipulates that at least 80% of holdings need to be either climate solution providers (enablers) and/or transition leaders (makers). This change aligns the fund with other Robeco climate transition strategies that are all based on the same underlying climate analytics framework.

During the full year 2024, the portfolio performance attribution was positive in terms of stock selection but was offset by negative sector allocation. The Sub-fund's underweight and stock selection in the information technology sector contributed most negatively to overall performance, followed by the overweight position in industrials. The underweight position in healthcare added most to performance. In terms of stock selection, the most positive contribution to the Sub-fund was provided by Sprouts Farmers Market, a food retail grocery chain offering fresh, natural and organic food items that cater to a growing consumer interest in healthy foods and environmental consciousness. Nvidia also contributed positively to performance on the back of its leading position in the development of artificial intelligence (AI). The Sub-fund experienced most detraction from analog chip makers such as Infineon and Power Integrations, as weakening automotive and industrial end markets hurt sales and margins. Building insulation player TopBuild also detracted, as higher yields and higher mortgage rates in the U.S. caused concerns around U.S. construction trends.

Robeco Fashion Engagement (formerly Robeco Fashion Engagement Equities)

Over the reporting period, Robeco Fashion Engagement generated a return of 10.9% (gross of fees in EUR) against a return of 25.3% for its reference index, the MSCI All Country World Index (net return in EUR).

The Sub-fund is purely focused on the fashion value chain and has not benefited from the explosive growth of the AI boom. Underperformance against the reference index was partially driven by outsized exposure to the consumer discretionary sector, which makes up 64% of the fashion engagement strategy versus 9.9% in the MSCI ACW Index. Consequently, the perceived financial health of consumer cohorts across the world was an important macroeconomic valuation driver for portfolio holdings in 2024. The Sub-fund has shown resilience in areas such as software and retail inventory management, as well as sportswear, mass market cosmetics and jewellery.

In 2024, The Sub-fund's team completed 54 engagements with investee companies, bringing the total number of engagements since the Sub-fund's launch to 71. During the year, the team conducted in-person due diligence visits to several holdings in France and Italy (e.g. Ermenegildo Zegna, Essilor Luxottica), including visits to several production facilities of subsidiaries and suppliers. The concurrent discovery by Italian authorities of potentially illicit conduct by fashion suppliers confirmed the team's conviction to focus initial engagements on social issues such as worker rights and living wages.

Robeco Gravis Digital Infrastructure Income

Over the reporting period, Robeco Gravis Digital Infrastructure Income Fund generated a return of 1.7% (gross of fees in EUR), against a return of 10.9% for the comparable index, S&P Developed Property Index (in EUR).

Analysing the annual performance in more detail reveals that most of the underperformance can be attributed to differences in sector exposures. No exposure to Retail, Residential or Healthcare detracted from performance. Data centres were the best performing subsectors of infrastructure investments, followed by cell towers. The logistics, incorporating both e-commerce fulfilment centres and urban logistics warehouses, and networks segments delivered negative returns.

The Sub-fund invests in companies that own and operate infrastructure assets which enable the successful operation of the modern digital economy. The Sub-fund benefits from strong digital megatrends. These trends include 5G wireless communications, AI and e-commerce. The companies own physical infrastructure assets that are vital to the functioning of the digital economy: data centres, logistics warehouses, communication towers and fibre networks.

The Sub-fund incorporates sustainability risks in company assessments, but the focus is on engagement and improvement rather than exclusion. The portfolio has a better Sustainability score compared to the reference index and limits investments in companies with an elevated sustainability risk profile.

Performance analysis

Robeco High Yield Bonds

Over the reporting period, Robeco High Yield Bonds generated a return of 5.1% (gross of fees hedged into EUR) against a return of 6.5% for its reference index, the Bloomberg US Corp. HY & Pan Eur. HY. ex Fin. 2.5% Issuer Cap (hedged into EUR).

High yield performed well, with credit spreads tightening significantly in 2024, nearing all-time low levels. This tightening was driven by a favorable combination of a robust U.S. economy and cooling inflationary pressures, which enabled the Federal Reserve to begin easing interest rates. Consequently, recession risks diminished, creating an ideal environment for the high-yield market. The Sub-fund underperformed its reference index due to its conservative investment approach, characterized by a beta below 1, which proved less effective in this environment. Additionally, the recovery of several large distressed issuers, which the Sub-fund did not hold, contributed to the underperformance. The Sub-fund was further impacted by holdings in bonds issued by Ardagh and Selecta, as both companies faced the prospect of financial restructuring, and bond prices declined.

With respect to sustainable investing, the Sub-fund has integrated ESG factors into the investment process. Next to promoting certain environmental and social characteristics, the goal of integrating ESG factors into the analysis is to strengthen the ability to assess the downside risk of the credit investments.

Robeco Global Credits

Over the reporting period, Robeco Global Credits generated a return of 2.5% (gross of fees hedged into EUR) against a return of 1.9% for its reference index, the Bloomberg Global-Aggregate Corporate Index (hedged into EUR).

The outperformance of the Sub-fund was mostly driven by issuer selection, while the top-down beta positioning also contributed positively. Factors that played a role in the positive contribution by issuer selection were allocation and stock selection in banking, the underweight in U.K. stocks and the long position in BBB and BB rated credits versus underweights in higher-rated credits. The top-down positioning was fairly conservative during 2024, with credit beta ranging from 1.0 to 1.1. This means that the positive impact of general spread tightening was relatively limited.

The Sub-fund actively invests in green, social and sustainability bonds. The current exposure in the portfolio is circa 11%. Examples of new green bond issues in which the Sub-fund participated are Equinix 2033, Prologis 2034 and Orsted 2033.

Report of the Board of Directors (continued)

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco QI Dynamic High Yield

Over the reporting period, Robeco QI Dynamic High Yield generated a return of 6.6% (gross of fees hedged into EUR) against a return of 7.3% for its index, the Bloomberg Global High Yield Corporate Index (hedged into EUR).

The Sub-fund provides liquid exposure to high yield through credit default swap (CDS) indices on top of a portfolio of government bonds. The position in CDS indices is based on a quantitative model: the position is increased to at most 150% when the model is positive and reduced to at most 50% when negative. The duration of the portfolio can be increased or decreased by at most one year based on a quantitative model.

The -0.7% underperformance is explained by a negative contribution of -0.9% from the model-based active positions, and a 0.2% positive contribution from CDS indices outperforming high-yield bonds. The Sub-fund held an overweight credit beta position from January to April, which contributed positively to its performance. The underweight beta in August and September impacted performance negatively, as did the overweight in November and December. The overall contribution from beta allocation was negative over the year. The duration allocation contributed positively, and the region allocation had a slight negative impact on performance. In the long run, no structural return differences between CDS indices and bonds are expected.

Robeco QI Global Multi-Factor Credits

Over the reporting period, Robeco QI Global Multi-Factor Credits generated a return of 1.9% (gross hedged into EUR), compared to the return of 1.9% of its index, the Bloomberg Global Aggregate Corporates Index (hedged into EUR).

This Sub-fund offers balanced exposure to the value, momentum, low-risk, quality and size factors in the global investment-grade corporate bond market by using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including sustainability risks. The strategy is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on our proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Issuer selection delivered a strong positive contribution, as did beta allocation. The use of bond futures to manage duration at the long end of the curve had a negative impact. The value factor delivered the largest positive contribution, followed by smaller positive contributions from size and momentum. The low risk/quality factor impacted performance negatively, driven by both the underweight in longer-dated bonds and the defensive company selection. Sector allocation had a strong negative impact on performance, mainly due to the overweight in the technology sector and the underweight in the 'financial other' sector. Currency allocation delivered a small positive contribution due to the overweight in euro-denominated paper. Country allocation delivered a positive contribution due to the overweights in Germany and Italy. The underweight in Australia had a slight negative impact on performance. The allocation to subordination groups impacted performance negatively due to the underweight in senior financials. Rating allocation impacted performance negatively due to the off-benchmark position in Ba's. SDG score allocation delivered a small positive contribution especially due to the underweight in companies with strongly negative SDG scores. ESG risk rating allocation contributed neutrally; the overweight in companies with negligible ESG risk contributed positively.

Robeco QI Global Multi-Factor Bonds

Over the reporting period, Robeco QI Global Multi-Factor Bonds generated a return of 2.1% (gross of fees hedged into EUR), against a return of 1.7% for its reference index, the Bloomberg Global Aggregate Index (hedged into EUR).

All three performance drivers contributed positively to performance. The multi-factor government bond selection model contributed positively, mainly by selecting bonds from Australia and Sweden instead of from Germany and later the U.S., and by selecting the right maturities within Japan. The quantitative duration overlay contributed mainly with duration underweights in February – May and with overweight positions in the third quarter. The multi-factor credit selection model also contributed positively. The value factor was the strongest factor for credit selection. The Sub-fund offers balanced exposure to the value, momentum, low-risk, quality and size factors. The bottom-up selection of bonds aims to systematically harvest factor premiums with a risk profile similar to the index and with the weighted average ESG scores and CO2 emissions of the government bonds and the credits in portfolio better than in the index. The Sub-fund incorporates an active duration overlay, which is driven by the outcomes of the manager's quantitative duration model.

Report of the Board of Directors (continued)

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco Global Credits - Short Maturity

Over the reporting period, Robeco Global Credits - Short Maturity generated a return of 4.2% (gross of fees hedged into EUR) against a return of 4.0% for its reference index, the Bloomberg Global Aggregate Corporate 1-5 years Index (hedged into EUR).

The outperformance of the Sub-fund was driven by issuer selection and the top-down beta positioning. Factors that played a role in the positive contribution of issuer selection were allocation and name selection in banking and the long position in BBB and BB-rated credits versus underweights in higher-rated credits. The top-down positioning was fairly neutral during 2024. This resulted in a positive impact from general spread tightening. This resulted in a positive impact from general spread tightening.

The Sub-fund actively invests in green, social and sustainability bonds; the current exposure in the portfolio is circa 9%. Examples of new green bond issues in which the Sub-fund participated are ZF Europe 2029, Unibail-Rodamco 2029 and Eurobank 2030.

Robeco Corporate Hybrid Bonds

Over the reporting period, Robeco Corporate Hybrid Bonds generated a return of 8.5% (gross of fees hedged into EUR) against a return of 7.4% for its reference index, the Bloomberg Global Corporate Hybrids 3% Issuer Cap (hedged into EUR).

The Sub-fund's outperformance was driven roughly equally by both top-down beta positioning and issuer selection. In 2024, the portfolio maintained a credit beta consistently above 1.0, averaging closer to 1.1, allowing it to benefit from the overall tightening of credit spreads. Positive issuer selection stemmed from long positions in hybrids that saw compression during the year, including Enbridge, Stanley Black & Decker and TC Energy, while underweighting certain reference index bonds such as Adecco Group and AusNet Services. Additionally, off-benchmark positions in subordinated financials enhanced performance through a positive allocation effect.

The Sub-fund actively invests in green, social and sustainability bonds, with the portfolio currently holding approximately 8% exposure to these instruments.

Robeco QI Global Multi-Factor High Yield

Over the reporting period, Robeco QI Global Multi-Factor High Yield generated a return of 6.0% (gross of fees hedged into EUR) compared to the return of 6.9% of its index, the Bloomberg Global High Yield Corporates ex-Financials Index (hedged into EUR).

This Sub-fund offers balanced exposure to the value, momentum, low-risk, quality and size factors in the global high-yield corporate bond market by using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including sustainability risks. The strategy is managed to comply with its sustainability-related binding elements at an overall level. In this regard, the strategy applies the Robeco Level 1 exclusion list. At the same time it is managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on our proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprint versus the benchmark.

Issuer selection had a strong negative impact on performance. The value factor was the strongest positive contributor, while momentum and size also delivered large positive contributions. The low-risk/quality factor had a strong negative impact on performance. Sector allocation impacted performance negatively due mainly to the underweights in the communications and energy sectors. Currency allocation delivered a small positive contribution due to the overweight in CAD-denominated paper. Country allocation delivered a small positive contribution due to the underweight in Luxembourg, and the underweight in EM had a strong negative impact on performance. The allocation to subordination groups contributed slightly positively due to the overweight in corporate hybrids. Rating allocation also contributed slightly positively. The underweight in Ca's had a strong negative impact on performance, but this was offset by positive contributions from the overweight in Ba's and the underweight in Caa's. SDG score allocation had a strong negative impact on performance due mostly to the underweight in companies with neutral SDG scores. ESG Risk Rating allocation impacted performance negatively especially due to the underweight in companies with high or severe ESG risk. Beta allocation had a strong negative impact on performance: the beta position of the bond portfolio had a strong negative impact on performance, while the CDS index beta hedge delivered a smaller positive contribution. Examples of single-name detractors include overweights in Dish Network, Gray Television, AMC Networks and Beasley Broadcasting, whereas single-name contributors include the underweight in Altice, CSC Holdings, Atos and Ardagh, and the overweights in Seagate and Carnival.

Report of the Board of Directors (continued)

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco SDG Credit Income (formerly RobecoSAM SDG Credit Income)

Over the reporting period, Robeco SDG Credit Income generated a return of 6.6% (gross of fees in USD). The Sub-fund is managed on a total return basis.

There was a strong positive contribution from spread returns in 2024. The Sub-fund's exposures in the banking and insurance sectors showed strong performance in 2024; examples are Deutsche Bank, Intesa, Barclays and Santander. In industrial sectors, the fund benefited from several good issuer selection decisions; examples are Braskem and EP Infrastructure. The Sub-fund's exposure to troubled Thames Water, which was sold during the summer, contributed negatively in 2024.

With yields rising over 2024, the contribution from duration exposure was negative in 2024. The Sub-fund started the year with a duration of five years, which was lowered in several steps to 3.8 years during the summer months. Although the Sub-fund was still impacted by the rise in yields in the last months of the year, the decision to reduce duration was positive for the Sub-fund's total return.

One of the Sub-fund's binding elements is to invest at least 5% in green, social and sustainable bonds. At year end the Sub-fund had invested 14% in these bonds. Amongst others, green bonds from Polish mBank and Czech utility company EPH were added to the portfolio.

Robeco Global SDG Credits (formerly RobecoSAM Global SDG Credits)

Over the reporting period, Robeco Global SDG Credits generated a return of 2.5% (gross of fees hedged into EUR) against a return of 1.9% for its reference index, the Bloomberg Global-Aggregate Corporate Index (hedged into EUR).

The outperformance of the Sub-fund was mostly driven by issuer selection, while the top-down beta positioning also contributed positively. Factors that played a role in the positive contribution by issuer selection were allocation and name selection in banking, the underweight in U.K. stocks and the long position in BBB and BB-rated credits versus underweights in higher-rated credits. The top-down positioning was fairly neutral during 2024. This resulted in a positive impact from general spread tightening. This means that the positive impact of general spread tightening was relatively limited.

In the investment process, the Sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. This means that companies that contribute negatively to one or more SDGs are excluded from the portfolio. The allocation effect of this SDG investment policy was positive in 2024. The Sub-fund also invests in green, social and sustainability bonds; with the exposure in the portfolio being circa 17%. Examples of new green bond issues in which the Sub-fund participated are Equinix 2033, Prologis 2034 and Orsted 3024.

Robeco SDG High Yield Bonds (formerly RobecoSAM SDG High Yield Bonds)

Over the reporting period, Robeco SDG High Yield Bonds generated a return of 6.3% (gross of fees hedged into EUR) against a return of 7.3% for its reference index, the Bloomberg Global High Yield Corporate Index (hedged into EUR).

High yield performed well, with credit spreads tightening significantly in 2024, nearing all-time low levels. This tightening was driven by a favorable combination of a robust U.S. economy and cooling inflationary pressures, which enabled the Federal Reserve to begin easing interest rates. Consequently, recession risks diminished, creating an ideal environment for the high-yield market.

The Sub-fund underperformed its reference index due to its conservative investment approach characterized by a beta below 1, which proved less effective in this environment. The Sub-fund was also impacted by holdings in bonds issued by Ardagh, Thames Water and Selecta, as these companies faced the prospect of financial restructuring and bond prices declined. The Sub-fund gained in relative performance by being underweight in Altice and Atos. With respect to sustainable investing, the Sub-fund does not invest in companies that contribute negatively to the SDGs. The Sub-fund also excludes certain sectors such as the exploration and production of fossil fuels. The exclusion of the Energy and Power sector did not have an impact on the Sub-fund's relative performance in 2024.

Report of the Board of Directors (continued)

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco Global Green Bonds (formerly RobecoSAM Global Green Bonds)

Over the reporting period, Robeco Global Green Bonds generated a return of 1.5% (gross of fees hedged into EUR) against a return of 2.1% for its reference index, the Bloomberg MSCI Global Green Bond Index (hedged into EUR).

The Sub-fund provides diversified exposure to the global green bonds market. The proceeds of green bonds are employed to finance projects with a positive environmental impact. A proprietary screening process is applied to determine the eligibility of a green bond for the fund. Over 2024, Global green bond issuance amounted to USD 685 bln (source: BNEF), significantly surpassing the levels seen in 2023 (USD 649 bln) and reaching a new all-time high.

In 2024, bond markets were characterized by significant volatility, as especially U.S. economic data, which initially surprised to the upside, started to fall around summer but resumed its strength in the final quarter of the year. Central bank policy rate expectations across the globe were adjusted accordingly during the year. All in all, most bond markets posted positive returns. For the USD market, a negative contribution from the rise in Treasury yield was compensated by lower credit spreads. Over the year, duration and yield curve positions detracted from performance. While the Sub-fund was correctly positioned for a re-steepening of inverted yield curves led by lower front-end yields, the magnitude of the moves was lower than priced in by the forward curve. Positive contributors to performance were country and government-related bond positions. Notably, a below-index exposure in French OATs added to performance. Top-down credit positioning added to the performance of the fund, due to a tactical beta overweight. In addition, issuer selection made a positive contribution. The overweight in banking and government-owned corporate issuers contributed positively. In particular, senior banking credits added to performance.

Robeco Climate Global Credits (formerly RobecoSAM Climate Global Credits)

Over the reporting period, Robeco Climate Global Credits generated a return of 1.7% (gross of fees hedged into EUR) against a return of 1.7% for its reference index, the Solactive Paris Aligned Global Corporate Index (hedged into EUR).

The Sub-fund's underperformance was primarily attributed to a one-day timing mismatch between the portfolio's NAV and the reference index. Excluding this timing impact, the Sub-fund's performance was in line with its reference index, driven by a positive contribution from beta policy and issuer selection, while the use of bond futures to manage duration at the long end of the curve had a negative impact. Throughout 2024, the portfolio maintained a credit beta consistently within the range of 1.0 to 1.1, enabling it to capitalize on the general tightening of credit spreads, albeit modestly due to its relatively conservative stance. Issuer selection further bolstered performance, with contributions from companies such as BT Group, Enel and Svenska Handelsbanken.

The Sub-fund remains committed to reducing the portfolio's carbon footprint, aligning with the Paris Agreement's objective of limiting global temperature increases to well below 2°C. Additionally, the Sub-fund actively invests in green, social and sustainability bonds, with approximately 21% of the portfolio allocated to these instruments.

Robeco Climate Global Bonds (in liquidation) (formerly RobecoSAM Climate Global Bonds)

Over the reporting period, Robeco Climate Global Bonds (in liquidation) generated a return of -0.2% (gross of fees hedged into EUR) against a return of 1.4% for its reference index, the Solactive Paris Aware Global Corporate Index (hedged into EUR).

The main drivers of underperformance were the overweight duration and yield curve positions, as many developed economies proved more resilient than previously expected. Central banks did not deliver the rate cuts that were anticipated at the start of the year, as the disinflation process stalled and moved at a slower pace. The fund benefited from steeper positions in various markets when government bonds rallied and inverted yield curves re-steepened as economic data softened and recession risks rose. Country allocation contributed positively to performance, while currency and emerging market debt allocations subtracted from performance.

Furthermore, the Sub-fund met its carbon reduction target by having less exposure to the worst-polluting countries and corporates whilst having an overweight in aggregate to issuers which are outperforming based on their carbon intensities. The Sub-fund actively invests in green, social and sustainable bonds, with exposure around 22.7% at period end.

Report of the Board of Directors (continued)

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco QI Global SDG & Climate Multi-Factor Credits (formerly RobecoSAM QI Global SDG & Climate Multi-Factor Credits)

Over the reporting period, Robeco QI Global SDG & Climate Multi-Factor Credits generated a return of 1.4% (gross, hedged into EUR) compared to the return of 1.7% of its index, the Solactive Paris Aligned Global Corporate Index (hedged into EUR).

The Sub-fund invests in bonds from companies that on average decarbonize in line with the Paris Agreement. Furthermore, it invests primarily in bonds issued by companies that contribute positively to the SDGs. The portfolio construction ensures that the portfolio's Sustainability ESG Risk Rating, carbon emission footprint, water consumption footprint and waste disposal footprint are all lower than those of its index, the Solactive Paris Aligned Global Corporate Index. Within these constraints, the Sub-fund offers balanced exposure to the value, momentum, low-risk, quality and size factors using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including sustainability risks.

Beta allocation contributed somewhat positively and issuer selection had a strong negative impact on performance. The use of bond futures to manage duration at the long end of the curve had a negative impact. SDG score allocation impacted performance somewhat negatively, mainly due to not investing in companies with low negative SDG scores. The ESG Risk Rating allocation contributed neutrally. The value factor delivered the largest positive contribution, followed by smaller positive contributions from size and momentum. The low-risk/quality factor had a strong negative impact on performance, driven by both the underweight in longer-dated bonds and the defensive company selection. Sector allocation had a strong negative impact on performance, mainly due to the underweight in the 'financial other' and REITs sectors and the overweight in the technology sector. Currency allocation had a slightly negative impact on performance, due to the underweights in EUR and GBP-denominated bonds; the overweights in AUD and CAD bonds delivered a small positive contribution. Country allocation had a strong negative impact on performance due to the overweight in the U.S. and the underweights in Sweden and Germany. The allocation to subordination groups made a large negative contribution due to the overweight in senior corporates and the underweights in senior financials and LT2 financials. Rating allocation impacted performance negatively, primarily due to the off-benchmark position in Ba's.

Robeco Transition Emerging Credits (formerly Robeco Sustainable Emerging Credits)

Over the reporting period, Robeco Transition Emerging Credits generated a return of 7.5% (gross of fees in USD) against a return of 7.6% for its reference index, the JP Morgan CEMBI Broad Diversified Index (net return in USD).

Returns were dominated by credit spread tightening. Returns in the high-yielding component was 11.7% versus investment grade which returned 4.9%. In term of regions, EM Europe led, followed by Latin America, Africa and Asia. The Sub-fund started the year with a credit beta below one, remaining cautious on tight valuation. The Sub-fund's underperformance during the reporting period was due to this underweight in beta, which was moved closer to one by the end of the reporting period. Issuer selection made a positive contribution to performance, with key contributors being New World Development, Braskem and Aramco; detractors were Adani Green and Republic of Panama. The investment process is focused on selecting companies that enable emerging market corporates to transition toward a more sustainable future and, as a result, the Sub-fund is predominately invested in sustainable corporates or those that contribute as climate solution providers or transition leaders. During the reporting period, the Sub-fund added Sorik Marapi Geothermal Power PT, an Indonesian-based geothermal power company that is supporting Indonesia on its energy transition journey. The Sub-fund also invests in green, social, sustainability and/or sustainability-linked bonds, with exposure around 30% at period end.

Robeco Climate Global High Yield Bonds

Over the reporting period, Robeco Climate Global High Yield generated a return of 5.8% (gross of fees in EUR) against a return of 7.8% for its reference index, the Solactive Global High Yield Corporate PAB Select Index (hedged into EUR).

High yield performed well with credit spreads tightening significantly in 2024, nearing all-time low levels. This tightening was driven by a favorable combination of a robust U.S. economy and cooling inflationary pressures, which enabled the Federal Reserve to begin easing interest rates. Consequently, recession risks diminished, creating an ideal environment for the high-yield market.

The Sub-fund underperformed its reference index due to its conservative investment approach characterized by a beta below one, which proved less effective in this environment. The Sub-fund also lagged the index reference by not being invested in some large reference index names in the stressed real estate sector that recovered in 2024. The Sub-fund gained in relative performance by being underweight in Altice and Atos. With respect to sustainable investing, the Sub-fund has set a target to have a 50% lower carbon footprint than the regular High Yield Index and also aims to decarbonize by 7% per year. The Sub-fund also excludes certain sectors such as the E&P of fossil fuels. The exclusion of the E&P sector did not have any impact on relative performance in 2024.

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco High Income Green Bonds

Over the reporting period and since the launch of the Sub-fund on 25 June 2024, Robeco High Income Green Bonds has generated a return of 4.8% (gross of fees hedged into EUR). The Sub-fund is managed on a total return basis and not versus an index.

The performance can be split into a duration and a credit spread contribution. There was a close-to-equal positive contribution from spread and duration returns over the reporting period. The duration exposure (focused on European underlying yields) was around five years, contributing positively to performance as government bond yields decreased. The Sub-fund benefited from the large positions in senior and subordinated banking bonds, communications, government-owned issuers and insurance companies. Particularly Raiffeisen Bank, EDF, Telecom Italia, Banca Transilvania, NN Group and Virgin Media contributed positively for the year. The Sub-fund actively invests in green, social and sustainability bonds; the current exposure in the portfolio is circa 91%. They are employed to finance projects with a positive environmental, social or sustainable impact.

Robeco QI Global Dynamic Duration

Over the reporting period, commencing on 20 September 2024, Robeco QI Global Dynamic Duration generated a return of -4.2% (gross of fees hedged into EUR) against a return of -2.2% for its reference index, the JPM Government Bond Index Global Investment Grade Index (hedged into EUR).

On 20 September 2024, the fund Robeco QI Global Dynamic Duration merged into the Sub-fund.

The Sub-fund was positioned for declining yields (hence rising bond prices) with overweight duration positions in German, U.S. and Japanese bond futures from the launch date in September to early November. These overweight positions generated outperformance when bonds rallied in the third quarter, but underperformance in October, when especially U.S. yields rose again. The active duration positioning of the fund is based on a quantitative model.

The government bond portfolio, on top of which the duration positions are implemented, was generally tilted to Australian, British and Japanese bonds and away from German and U.S. bonds. These bond positions aim to enhance the return and the sustainability profile of the portfolio without altering the top-down risk profile. Due to these positions, the weighted average carbon emissions and sovereign ESG score of the portfolio were better than those of the index.

Robeco Sustainable Global Bonds

Over the reporting period, Robeco Sustainable Bonds generated a return of -1.1% (gross of fees hedged into EUR) against a return of -0.8% for its reference index, the Bloomberg Global-Aggregate Index (hedged into EUR). This Sub-fund merged with Robeco Global Total Bond Fund on 13 December.

Duration strategies contributed negatively to performance over the reporting period. The Sub-fund's overweight duration and yield curve positions drove underperformance at the start of the year, when interest rates rose as central banks postponed rate cuts and curves flattened. The Sub-fund benefited from steeper positions in various markets, when government bonds rallied and inverted yield curves re-steepened as economic data softened and recession risks rose. Credit selection and allocation were mostly neutral, while allocation to emerging markets subtracted.

ESG factors are considered when assessing the fundamental credit quality of individual issuers. At the end of the period, roughly 24% of the Sub-fund was invested in green, social and sustainability bonds and 53% was invested in sustainable investments, above the minimum requirement of 40%. The Sub-fund also achieved its sustainable investment objectives of having a lower (better) carbon intensity and a higher (better) country sustainability ranking score versus the Sub-fund's index. In addition, the Sub-fund has a better weighted average SGD score than the benchmark, and over 30% of the Sub-fund is invested in government-related and corporate issuers with an SDG score of one or higher.

Robeco Emerging Markets Bonds

Over the reporting period, Robeco Emerging Markets Bonds generated a return of -1.7% (gross of fees in USD), against a return of -1.6% for its reference index, the J.P. Morgan EMBI Global Diversified Index (in USD).

EM fixed income returns were dominated by rising core rates, with 10YR US Treasury yields rising 84 basis points, which detracted 4.21% of total returns over the period. EM spreads meanwhile tightened 48 basis points, contributing 2.70% to EM returns, leading to a total return of -1.63%.

Country allocation was the most important driver of relative returns. Overweight positioning in Argentina, Zambia, Sri Lanka and El Salvador all contributed to performance. Underweights in low-spread issuers such as Qatar, China and the Philippines added further, as these underperformed. Not owning any exposure to Lebanon, which is excluded for ESG reasons, detracted from returns. Security selection detracted from performance, with the short duration bonds selected by the fund in Argentina, underperforming. Top-down effects such as the yield curve did not add to or detract from returns. The Sub-fund also invests in green bonds, social bonds and sustainability bonds; total exposure in the portfolio was 13.1% at year end.

Report of the Board of Directors (continued)

Global Bond Sub-funds (continued)

Performance analysis (continued)

Robeco Emerging Markets Bonds Local Currency

Over the reporting period, Robeco Emerging Markets Bonds Local Currency generated a return of -7.6% (gross of fees in USD), against a return of -6.9% for its reference index, the J.P. Morgan GBI Global Diversified Index (in USD).

FX returns were the main detractor from emerging market (EM) local debt total return in 2024. Since the fund's inception in September, FX accounted for -6.55%. Bond returns were also negative due to rising yields; these were partially offset by carry returns of 1.50%.

FX positioning contributed positively to the fund's relative performance, with underweights in the euro, Czech koruna, and Chinese renminbi being the largest contributors. An overweight position in the Ghanaian cedi also supported returns. However, the Brazilian real was the largest FX detractor, followed by the Turkish lira and Egyptian pound. While the latter two detracted in spot terms, carry returns in Egypt offset losses and the Turkish lira's high carry contributed strongly to performance.

For local bond returns, the largest detractor was the overweight in Brazilian bonds, with smaller impacts from Mexican and Colombian bonds. Underweights in Thai and Chinese local bonds also weighed on relative performance.

The Sub-fund exceeded its binding ESG targets throughout the period. Notable highlights included an underweight position in Chinese local bonds driven by unattractive valuations and elevated ESG concerns as well as significantly higher sustainable bond holdings than the benchmark, particularly in Mexico and Hungary. The Sub-fund also invests in green bonds, social bonds and sustainability bonds; total exposure in the portfolio was 10.0% at year end.

Report of the Board of Directors (continued)

Regional Bond Sub-funds (continued)

Performance analysis

Robeco Euro Government Bonds

Over the reporting period, Robeco Euro Government Bonds generated a return of 1.7% (gross of fees in EUR), underperforming the 1.9% of the Bloomberg Euro Aggregate Treasury Index (in EUR).

In 2024, bond markets were characterized by significant volatility, as especially the U.S. economic data initially surprised to the upside but started to fall around summer, resuming its strength in the final quarter of the year. The central bank policy rate expectations across the globe were adjusted accordingly during the year. In the euro area, while most bond markets had positive returns, the French government bond market was negatively impacted by the domestic turmoil. Over the year, the duration and yield curve positions detracted from performance. While the Sub-fund was correctly positioned for a re-steepening of inverted yield curves led by lower front-end yields, the magnitude of the moves was lower than priced in by the forward curve. Positive contributors to performance were country and government-related bond positions. Notably, a below-index exposure in French OATs added significantly to performance. Going forward, a further steepening of yield curves is expected, driven by more monetary easing.

The Sub-fund participated in green bond issuance from both government and government-related issuers. ESG factors are considered when assessing the fundamental credit quality of individual issuers. At the end of December, around 17% of the Sub-fund was invested in green bonds, social bonds and sustainable bonds.

Robeco Euro Credit Bonds

Over the reporting period, Robeco Euro Credit Bonds generated a return of 5.3% (gross of fees in EUR) against a return of 4.7% for its reference index, the Bloomberg Euro Aggregate: Corporates Index (in EUR).

The outperformance of the Sub-fund was mostly driven by issuer selection, while the top-down beta positioning also contributed positively. Factors that played a role in the positive contribution from issuer selection were the overweight in banking and covered bonds, the underweight in French stocks and in longer-maturity bonds, and the overweight in BB-rated bonds. The top-down positioning was fairly conservative during 2024, with the credit beta ranging from 1.0 to 1.1. This means that the positive impact of general spread tightening was relatively limited.

The Sub-fund actively invests in green, social and sustainability bonds; current exposure in the portfolio is circa 20%. Examples of new green bond issues in which the Sub-fund participated are Smurfit Kappa 2032, Eurobank 2030 and National Grid 2031.

Robeco All Strategy Euro Bonds

Over the reporting period, Robeco All Strategy Euro Bonds generated a return of 1.7% (gross of fees in EUR) against a return of 2.6% for its reference index, the Bloomberg Euro Aggregate Index (in EUR).

In 2024, bond markets were characterized by significant volatility, as especially the U.S. economic data initially surprised to the upside, started to fall around summer but resumed its strength in the final quarter of the year. Central bank policy rate expectations across the globe were adjusted accordingly. In the euro area, while most bond markets had positive returns, the French bond market was negatively impacted by the domestic turmoil. Over the year, duration and yield curve positions detracted from performance. While the Sub-fund was correctly positioned for a re-steepening of inverted yield curves led by lower front-end yields, the magnitude of the moves was lower than priced in by the forward curve. The overweight credit allocation contributed to performance, as European credit spreads tightened to the lowest level since early 2022. The exposure to sovereign, supranational and agency bonds also contributed. Positions in emerging markets such as Brazil and Mexico detracted, while positions in Hungary and Poland benefited performance.

ESG factors are considered when assessing the fundamental credit quality of individual issuers. At the end of the year, 17% of the Sub-fund was invested in green, social and sustainable bonds, well above the minimum threshold of 5%.

Robeco European High Yield Bonds

Over the reporting period, Robeco European High Yield Bonds generated a return of 6.6% (gross of fees hedged into EUR) against a return of 7.0% for its reference index, the Bloomberg Pan-European HY Corp. ex Fin. 2.5% Issuer Cap Index (hedged into EUR).

High yield performed well, with credit spreads tightening significantly in 2024, nearing all-time low levels. This tightening was driven by a cooling of inflationary pressures, which enabled the ECB to begin easing interest rates. Consequently, recession risks diminished, creating an ideal environment for the high-yield market. The Sub-fund underperformed its reference index due to its conservative investment approach characterized by a beta below 1, which proved less effective in this environment. The Sub-fund was also impacted by holdings in bonds issued by Ardagh, Thames Water and Selecta, as these companies faced the prospect of financial restructuring and bond prices declined. The Sub-fund gained in relative performance by being underweight in Allice, Auchan and Atos. With respect to sustainable investing, the Sub-fund has integrated ESG factors into its investment process. Next to promoting certain environmental and social characteristics, the goal of integrating ESG factors into the analysis is to strengthen the ability to assess the downside risk of the credit investments.

Report of the Board of Directors (continued)

Regional Bond Sub-funds (continued)

Performance analysis (continued)

Robeco Transition Asian Bonds (formerly Robeco Sustainable Asian Bonds)

Over the reporting period, Robeco Transition Asian Bonds generated a return of 6.7% (gross of fees in USD) against a return of 5.7% for its reference index, the JP Morgan Asia Credit Index (in USD).

The Sub-fund outperformed the index primarily through issuer selection and a small contribution through beta positioning. The Sub-fund's overweight in Korea and Indonesia contributed positively to performance, whereas the underweight to Pakistan contributed negatively, as the IMF negotiation in Pakistan turned positive in the reporting period. An underweight to China also contributed negatively. Korea has issued several green and sustainability bonds that have been well received in the market despite the macro headlines. The Sub-fund's overweight in the banking sector contributed positively to performance, as did the overweight allocation to the basic industry, especially in companies that are exposed to transition materials. The Sub-fund's underweight to China property was a positive contributor, whereas the overweight in electric power, including renewable power in India, was a negative contributor, as a headline from Adani affected the sector negatively. The investment process is focused on selecting companies that enable emerging market corporates to transition toward a more sustainable future and, as a result, the Sub-fund is predominately invested in sustainable corporates or those that contribute as climate solution providers or transition leaders. During the reporting period, the Sub-fund added Sorik Marapi Geothermal Power PT, an Indonesia-based geothermal power company that is supporting Indonesia in its energy transition journey. The Sub-fund also invests in green, social, sustainability and/ or sustainability-linked bonds, with exposure around 36% at period end.

Robeco Euro SDG Credits (formerly RobecoSAM Euro SDG Credits)

Over the reporting period, Robeco Euro SDG Credits generated a return of 5.3% (gross of fees in EUR) against a return of 4.7% for its reference index, the Bloomberg Euro-Aggregate: Corporates Index (in EUR).

The outperformance of the Sub-fund was mostly driven by issuer selection, while the top-down beta positioning also contributed positively. Factors that played a role in the positive contribution from issuer selection were the overweight in banking and covered bonds, the underweight in French stocks and in longer-maturity bonds, and the overweight in BB-rated bonds. The top-down positioning was fairly conservative during 2024, with the credit beta ranging from 1.0 to 1.1. This means that the positive impact of general spread tightening was relatively limited.

In the investment process, the Sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. This means that companies that contribute negatively to one or more SDGs are excluded from the portfolio. The allocation effect of this SDG investment policy was positive in 2024. The Sub-fund also invests in green, social and sustainability bonds; the exposure in the portfolio is circa 25%. Examples of new green bond issues in which the Sub-fund participated are Smurfit Kappa 2032, Eurobank 2030 and National Grid 2031.

Robeco Financial Institutions Bonds

Over the reporting period, Robeco Financial Institutions Bonds generated a return of 9.3% (gross of fees in EUR) against a return of 8.7% for its reference index, the Bloomberg Euro-Aggregate: Corp. Fin. Subordinated 2% Issuer Cap Index (in EUR).

The outperformance of the Sub-fund was driven by the top-down beta positioning. The credit beta ranged between 1.1 and 1.2 during the year, which means that the portfolio benefited from the general tightening of credit spreads. The performance contribution of issuer selection was negative. This can be fully attributed to the underweight positions in Aroundtown and Grand City Properties - two real estate companies. Examples of trades that did contribute positively were the off-benchmark position in GBP-denominated bonds (of which currency and rates risk is fully hedged), the underweight in French stocks and the overweight in perpetual insurance bonds. The Sub-fund also invests in green, social and sustainability bonds; the exposure in the portfolio is circa 9%. Examples of new green bond issues in which the Sub-fund participated are AIB Tier 2, Nordea Tier 2 and De Volksbank Tier 2.

Robeco Investment Grade Corporate Bonds

Over the reporting period until the liquidation of the Sub-fund on 16 September, Robeco Investment Grade Corporate Bonds generated a return of 3.1% (gross of fees in EUR) against a return of 2.6% for its reference index, the Bloomberg Euro-Aggregate: Corporates Ex Financials 2% Issuer Cap (in EUR).

The Sub-fund's outperformance was driven roughly equally by both top-down beta positioning and issuer selection. In 2024, the portfolio maintained a credit beta consistently above 1.0, averaging closer to 1.1, allowing it to benefit from the overall tightening of credit spreads. Positive issuer selection stemmed from long positions that saw compression during the year, including SPP-Distribucia, TotalEnergies, Orange, Autostrade per l'Italia and others. Being underweight stocks such as Thames also contributed positively to performance during the period. The Sub-fund actively invested in green, social and sustainability bonds, with the portfolio holding approximately 15% exposure to these instruments.

Report of the Board of Directors (continued)

Regional Bond Sub-funds (continued)

Performance analysis (continued)

Robeco US Green Bonds (formerly RobecoSAM US Green Bonds)

Over the reporting period, Robeco US Green Bonds generated a return of 0.5% (gross of fees hedged into EUR) against a return of 1.3% for its reference index, the Bloomberg MSCI US Green Bond Index (in EUR).

The Sub-fund provides diversified exposure to the USD denominated green bonds market. The proceeds of green bonds are employed to finance projects with a positive environmental impact. A proprietary screening process is applied to determine the eligibility of a green bond for the fund, mitigating the risk of “greenwashing”.

In 2024, bond markets were characterized by significant volatility, as especially the U.S. economic data initially surprised to the upside, but activity started to fall around summer, resuming its strength in the final quarter of the year. Central bank policy rate expectations across the globe were adjusted accordingly during the year. While the return for U.S. Treasuries was negative, the USD corporate market was supported by lower credit spreads, which brought performance to just above zero. Duration and yield curve positions detracted from performance. While the Sub-fund was correctly positioned for a re-steepening of inverted yield curves led by lower front-end yields, the magnitude of the moves was lower than priced in by the forward curve. For corporate credits, the overall beta contribution was slightly negative for the year, as top-down positioning was just below one and credit spreads rallied. Nonetheless, this was largely offset by issuer selection. Banking and government-owned corporates added most outperformance, whereas REITS and other financials (quasi real estate) cost performance, as we remained underweight. Over 2024, U.S.-denominated green bond issuance amounted to USD 140 bln (source: BNEF), which was slightly lower than the previous year (USD 142 bln).

Robeco Euro SDG Short Duration Bonds

Over the reporting period, Robeco Euro SDG Short Duration Bonds generated a return of 3.3% (gross of fees in EUR) against a return of 3.4% for its reference index, the Bloomberg Euro-Aggregate 500MM 1-3 years Index (in EUR).

In the second half of 2024, the European bond market was characterized by the interest-rate cutting cycle of the ECB. Shorter-maturity bonds in particular benefited from this regime change. At the end of the year however, front-end yields rose again. Duration positioning made a slightly positive contribution, while the modest curve-flattener position detracted, as the 2s5s part of the yield curve steepened. The beta overweight of the fund added to performance as spreads tightened further due to optimism on loosening central bank policy. At the end of the year, the beta of the portfolio was reduced back to neutral. The sector allocation detracted slightly, with government bonds underperforming covered bonds and sovereign, supranational and agency bonds.

In the investment process, the Sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. This means that companies that contribute negatively to one or more SDGs are excluded from the portfolio. At the end of the year, 20.8% of the Sub-fund was invested in green bonds, social bonds and sustainability bonds.

Performance analysis

Robeco Sustainable Income Allocation

Over the reporting period, Robeco Sustainable Income Allocation returned 5.5% (gross of fees in EUR) compared to 5.8% for its reference indices, 25% MSCI ACWI Index (in EUR) and 75% Bloomberg Global Aggregate Index (hedged into EUR).

A higher structural equity weight, implemented to offset the lower beta of the QI Global Conservative strategy, contributed positively. Global developed market equities had a strong year, with returns exceeding 25%, but tactical tilts caused relative underperformance. The Sub-fund maintained a higher tactical equity weight, which was beneficial.

Regional equity preferences contributed positively, with well-timed long positions in China, Japan and healthcare. A long Japanese equities position against a short European equities position and a structural overweight to emerging markets were key detractors. Currency positions added marginally, mainly due to long yen positions. Commodities were a positive contributor, particularly long gold positions.

Fixed income presented challenges. The underweight in high yield and steeper positions in the U.S. detracted, as did regional pair trades (long U.S. vs. short Canada, long U.K. vs. short Germany). The underweight in Japanese bonds and a steeper in Germany were among the fixed-income positions that contributed positively.

Selection was mixed. The Global Stars strategy exceeded its reference index by over 200 basis points, while QI Conservative performed well on a beta-adjusted base. Detractors included QI Global Value and Sustainable Emerging Stars. The Sub-fund's exclusion of corporate bonds and equities with an SDG score below -1 had a marginal impact. However, the exclusion of Chinese bonds detracted from performance. Strong equity allocation benefited the fund, but tactical tilts and fixed income challenges led to relative underperformance.

Report of the Board of Directors (continued)

Asset Allocation Sub-funds (continued)

Performance analysis (continued)

Robeco Sustainable Dynamic Allocation

Over the reporting period, Robeco Sustainable Dynamic Allocation posted an 11.3% return (gross of fees in EUR) compared to 12.2% for its reference indices, 75% MSCI ACWI Index (in EUR) and 25% Bloomberg Global Aggregate Index (hedged into EUR). The underperformance stemmed mainly from allocation effects; positive selection was insufficient to offset the allocation-related impact.

Global developed market equities saw strong double-digit returns exceeding 25% driving Sub-fund performance. Despite maintaining a higher equity weighting for most of the year, the Sub-fund lagged its reference index due to tactical tilts.

Regional equity preferences contributed largely positively, with well-timed long positions in China, Japan and healthcare. A long Japanese equities position against a short European equities position and a structural overweight to emerging markets were key detractors. Currency positions added marginally, mainly due to long yen positions. Commodities contributed positively, with gold performing particularly well.

Fixed income posed challenges. The underweight in high yield and steeper positions in the U.S. detracted, as did regional pair trades (long U.S. vs. short Canada, long U.K. vs. short Germany). The underweight in Japanese bonds and a steeper in Germany were among the fixed-income positions that contributed positively.

Selection was strong, with most allocated strategies outperforming benchmarks. Global Stars and QI Global Developed Sustainable Enhanced strategies exceeded their benchmarks by over 200 basis points, while QI Global Value and Sustainable Emerging Stars underperformed. The Sub-fund does not invest in corporate bonds or equities with an SDG score below -1, which had a marginal impact on performance. However, the exclusion of Chinese bonds from the portfolio detracted from performance over the year.

Robeco Sustainable Diversified Allocation

Over the reporting period, Robeco Sustainable Diversified Allocation posted an 8.3% return (gross of fees in EUR) compared to 9.0% for its reference indices, 50% MSCI ACWI Index (in EUR) and 50% Bloomberg Global Aggregate Index (hedged into EUR). The underperformance resulted from both active allocation decisions and selection effects. The impact strategy in equities, with a tilt toward European equities and small and mid-cap stocks affected performance negatively.

Global developed market equities experienced a strong year, with returns exceeding 25% significantly influencing the Sub-fund's performance. Despite maintaining a higher equity weighting for most of the year, the Sub-fund lagged its reference index due to tactical tilts and selection.

Regional equity preferences contributed positively, with well-timed long positions in China, Japan and in healthcare. A long Japanese equities position against a short European equities position and a structural overweight to emerging markets were key detractors. Currency positions added marginally, mainly due to long yen positions. Commodities were a positive contributor, particularly long gold positions.

Fixed income presented challenges. The underweight in high yield and steeper positions in the U.S. detracted, as did regional pair trades (long U.S. vs. short Canada, long U.K. vs. short Germany). The underweight in Japanese bonds and a steeper in Germany were among the fixed-income positions that contributed positively.

Selection was mixed. Global Stars outperformed its reference index by over 250 basis points, but QI Global Value and Sustainable Emerging Stars underperformed. The Credit Income strategy contributed positively, while the Climate Global Bond strategy detracted. The Sub-fund's exclusion of corporate bonds and equities with an SDG score below -1 had a marginal impact. However, the exclusion of Chinese bonds detracted from performance.

Robeco Flexible Allocation

Over the reporting period and since the launch of the Sub-fund, Robeco Flexible Allocation posted a 1.1% return (gross of fees in EUR) against a return of 1.7% for its reference index, the ICE BofA €STR Overnight Rate Index (in EUR).

The Sub-fund maintained an equity exposure between 21% and 29%; given its positive equity performance, this was beneficial to performance. Regional equity preferences were also largely positive, due to structural longs in U.S. large cap equities and well-timed long positions in China. The choice to gain exposure through the Global Stars strategies proved to be beneficial, as the strategy outperformed handsomely. Currency positions added marginally, mainly due to long USD positions. Commodities contributed positively, with gold performing particularly well.

Fixed income posed challenges. Yield curve steeper positions in the U.S. detracted, as did regional pair trades (long U.S. vs. short Canada, long U.K. vs. short Germany). The underweight in Japanese bonds and a steeper in Germany were among the few winning fixed-income positions. The rise in yield in the latter part of the year had a limited impact, as the Sub-fund was mainly invested in short-dated government bonds, maintaining a low duration position.

Report of the Board of Directors (continued)

Asset Allocation Sub-funds (continued)

Performance analysis (continued)

Robeco QI Multi Factor Absolute Return

Over the reporting period, until the liquidation of the Sub-fund on 4 April 2024, Robeco QI Multi Factor Absolute Return generated a return of 3.2% (gross of fees in EUR) against a return of 0.5% for its reference index, the ICE BofA ESTR Overnight Rate Index (in EUR). Overlay strategies added positively across asset classes and in the multi-factor equities segment the momentum factor excelled.

The Sub-fund harvests factor premiums through bottom-up credit and equity selection and at market level through top-down factor-based allocation. The Sub-fund targets a low correlation with equity and bond markets and market-agnostic returns. The environmental footprint and ESG factors are integrated. The equity sleeves realized their targets of reducing the environmental footprint metrics, greenhouse gas emissions, water usage and waste generation by 30%, 20% and 20% respectively relative to the benchmark. In addition, the Sustainalytics ESG Risk Rating was at least 10% better than that of the benchmark. The credit sleeve incorporates better ESG than benchmark and lower carbon/water/waste than benchmark.

Report of the Board of Directors (continued)

Sustainable investing

All Robeco's investment activities are in accordance with the Principles for Responsible Investing (PRI). Responsibility for implementing sustainable investing lies with Robeco's CIO, who holds a seat on Robeco's Executive Committee.

Fulfilling the responsibilities in the field of stewardship forms an integral part of Robeco's approach to sustainable investing. Robeco publishes its own stewardship policy on the website. This policy describes how Robeco deals with possible conflicts of interest, how the companies in which the Sub-funds invest are monitored, how the activities in the field of engagement and voting are conducted, and how the stewardship activities are reported.

Constructive and effective activities under active ownership encourage companies to improve their management of risks and opportunities in the field of ESG. These in turn, should contribute to establish a better competitive position and improve profitability and moreover have a positive impact on the community. Active ownership furthermore involves voting and engagement. Robeco exercises, in line with its policy, its voting rights for the shares in its investment funds all over the world. Robeco uses this engagement to address strategic ESG issues that might affect value creation in the long term.

Robeco has research available from leading sustainability experts, including own proprietary research from the sustainable investing research team. This dedicated sustainable investing research team works together very closely with the investment teams to provide them with in-depth sustainability information. The investment analysis focuses on the most material ESG factors and the connection with the financial performance of a company. Robeco can then focus on the most relevant information in performing the investment-analysis and can reach enhanced investment decisions.

To help customers contribute to their sustainable investment objectives, Robeco has developed a methodology that analyses the contribution of investee companies to the Sustainable Development Goals (SDGs) and has developed SDG investment solutions. Furthermore, Robeco contributes to the SDGs by integrating ESG factors in its decision-making process for investments and encourages companies to act in support of these goals by means of a constructive dialogue.

Robeco's climate change policy is focused on integrating climate issues in investments when financially material and engaging with companies. Furthermore climate risks for the funds are assessed and monitored by Robeco's financial risk management department.

Robeco pursues an exclusion policy for companies that are involved in the production of or trade in controversial weapons such as cluster munitions and anti-personnel mines, for tobacco companies and for companies that seriously and habitually violate either the United Nations Global Compact (UNGC) or the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. Robeco applies strict criteria for this last category and if a dialogue fails, the Company can be excluded. Robeco publishes its exclusion policy and the list of exclusions on its website.

The SFDR classifications of the Robeco Capital Growth sub-funds are shown in the table below. More information is available in the precontractual SFDR disclosures of the Fund on our website. Attached to this annual report for each article 8 Sub-fund an Annex IV disclosure can be found with details of the achieved ESG characteristics over the reporting period. For each article 9 Sub-fund an Annex V disclosure is attached with detailed information on the achievement of the sustainability goals over the reporting period.

Notes to the financial statements as at 31 December 2024

1. General

The Company was incorporated on 2 May 1997 for an undetermined period of time as an open ended investment company based in Luxembourg, issuing and redeeming its shares on demand at prices based on the respective net asset value per share. Its Articles of Incorporation were published in the 'Memorial, Recueil des Societes et Associations' of the Grand Duchy of Luxembourg (the 'Memorial') on 6 June 1997. The Articles of Incorporation were last amended and became effective as per 1 January 2022. The Company is a 'Societe d'Investissement a Capital Variable' (SICAV) pursuant to the law of 10 August 1915, as amended, on commercial companies and to part I of the law of 17 December 2010, on undertakings for collective investment of the Grand Duchy of Luxembourg.

The Company takes the form of an umbrella fund. It is made up of several sub-funds each representing an investment portfolio and other assets and liabilities corresponding to a different investment policy. Each sub-fund is therefore represented by different types of shares with one or more classes of shares. The Board of Directors has the authority to issue different categories of shares within each of the sub-funds. The Directors of the Company may at any time establish new sub-funds and/or may decide upon the issue of class A, AH, D, D2, D2H, D2HL, D2L, DCo, DH, DHCo, DHL, DL, F, F2, F2H, FCo, FH, FHCo, FHL, FL, I, ICo, IH, IHC, IHH, IHI, IHL, IL, IM, IML, IMH, IMHL, J, K, K1, K1H, K2, K2H, K3, K3H, KH, M, M2, M2H, MH, ML, S, SH, SHL, SL, X, XH, Y, YH, Z, Z2, Z2H, ZH, ZHL, ZL, 0D, 0DH, 0F, 0FH, 0IH, 0MH, 2F 2FH, 2I and 2IH shares (accumulating classes) and class A1, A1H, B, Ba, BaH, BH, BHL, BL, Bx, BxH, BxHL, BxL, C, CH, CHL, CL, Cx, CxH, CxHL, CxL, D3, D3H, D3HL, D3L, E, EH, G, GH, GHL, GL, IB, IBH, IBHL, IBL, IBx, IBxH, IBxHL, IBxL, IE, IEH, IEL, IEx, IExH, IMB, IMBxH, K1E, K1EH, K2E, K2EH, K3E, K3EH, KE, M3, M3H, MB, MBH, MBx, MBxH, SE, SEH, XG, XGH, YE, YEH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0E, 0EH, 0IEH, 2C, 2CH 2E and 2EH shares (distributing classes) in existing or new sub-funds.

Legal entity

The Company as a whole constitutes a single legal entity, however the assets of any one sub-fund will only be available to satisfy the rights of investors in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of the sub-fund. For the purpose of the relations as between shareholders, each sub-fund is deemed to be a separate entity.

Dividend policy

The general policy regarding the appropriation of net income and capital gains is as follows:

Class D, D2, D2H, DCo, DH, DHCo, DL, F, F2, F2H, FCo, FH, FHCo, FL, I, ICo, IH, IHC, IHI, IL, J, K, KH, M, M2, M2H, MH, ML, S, SH, X, XH, Y, YH, Z, Z2, Z2H, ZH, 0D, 0DH, 0F, 0FH, 0I, 0IH, 0MH, 2F and 2I shares (accumulating).

Income is reinvested and added to the relevant sub-funds and contributes to a further increase in value of the total net assets.

Class B, BH, Bx, BxH, C, CH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IExH, KE, M3, M3H, MBxH, SE, SEH, YE, YEH, ZB, ZBH, 0BxH, 0CH, 0D3H, 0E, 0EH, 0IEH, 2C and 2E shares (distributing).

After the end of the reporting period, the Company can recommend what distribution shall be made from the net investment income and net capital gains attributable to the Class B, BH, Bx, BxH, C, CH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IExH, KE, M3, M3H, MBxH, SE, SEH, YE, YEH, ZB, ZBH, 0BxH, 0CH, 0D3H, 0E, 0EH, 0IEH, 2C and 2E shares.

The annual general meeting of shareholders will determine the dividend payment. The Board of Directors of the Company may decide to distribute interim dividends, in accordance with Luxembourg law.

General remarks

As provided by the 2010 law, the Company may decide to distribute dividends with no other limit than the obligation that any such dividend distribution does not reduce the net asset value of the Company below the legal minimum amount. Similarly, the Company may distribute interim dividends and may decide to pay dividends in shares. If dividends are distributed, payments of cash dividends to registered shareholders will be made in the currency of the relevant share class to such shareholders at the addresses they have given to the Registrar Agent. Dividend announcements (including names of paying agents) and all other financial notices concerning the Funds shall be published on www.robeco.com/riam and published in those newspapers as the Board of Directors shall determine from time to time. Dividends not collected within five years will lapse and accrue for the benefit of the Company in accordance with Luxembourg law.

Open-ended fund

The Fund is an open-ended investment Company, meaning that, barring exceptional circumstances, the Fund issues and purchases its shares on a daily basis at net asset value prices per share. The Company reserves the right to refuse any subscription request at any time.

Notes to the financial statements as at 31 December 2024 (continued)

1. General (continued)

Swing pricing

Shares are issued and redeemed on the basis of the net asset value per share. However, the actual costs of purchasing or selling assets and investments for a sub-fund may deviate from the latest available prices, as appropriate, when calculating the net asset value per share. This deviation can be caused by duties and charges, and spread from buying and selling prices of the underlying investments ('spreads'). These costs have an adverse effect on the value of a sub-fund and its underlying share classes, and are known as dilution. To mitigate the effects of dilution, the company may, at its discretion, make a dilution adjustment to the net asset value per share on any valuation day. The company will retain the discretion in relation to the circumstances under which to make such a dilution adjustment. At the end of the reporting period, no swing adjustments were made.

The dilution adjustment will involve adding to (when the sub-fund is in a net subscription position) and deducting from (when the sub-fund is in a net redemption position) the net asset value per share, such figure as the Company considers representing an appropriate figure to meet the cash flow costs. The resultant amount will be the price rounded to such number of decimal places as the Company deems appropriate. The dilution adjustments may vary depending on the order type (net subscription or net redemption), on the underlying asset classes for any sub-fund or on the market conditions. The dilution adjustments as well as the dealing levels from which they become applicable may be amended from time to time depending on market conditions or any other situation where the Company is of the opinion that the interests of the shareholders require such amendment(s).

For any given valuation day, the swing factor adjustment is limited to a maximum of 2% of what the net asset value would otherwise be. In exceptional circumstances, the Board of Directors may, in the best interest of its shareholders, decide to temporarily increase the swing factor above the maximum-stated level. Such exceptional circumstances can be triggered by (but not limited to) high market volatility, disruption of markets or slowdown of the economy caused by terrorist attack or war (or other hostilities), serious pandemic or a natural disaster (such as a hurricane or a super typhoon).

Additional details on the anti-dilution/swing pricing adjustments and actual swing factors can be found on www.robeco.com/riam.

To avoid doubt, shareholders holding shares in the same share class will be treated in an identical manner.

Pooling and co-management

For the purpose of efficient management and to reduce administrative costs and if the investment policies of the sub-funds allow such, the Board of Directors may decide to co-manage some or all of the assets of certain sub-funds with assets of other Luxembourg UCIs of the Robeco Group (co-managed units). In this case, the assets from different co-managed units will be jointly managed using the pooling technique. Assets that are co-managed will be referred to using the term 'pool'. Such pools will only be used for the purposes of internal management. They will not constitute distinct legal entities and will not be directly accessible to investors. Each co-managed unit will have its own assets allocated to it. During the reporting period no pooling or co-management took place.

Affiliated parties

The Directors of the Company have appointed the affiliated entity RIAM, responsible on a day-to-day basis, under supervision of the Directors of the Company, to provide administration, marketing, portfolio management and investment advisory services in respect of Fund. The Management Company may, from time to time, carry out its portfolio management activities through one or more of its European branches, which will in such case not be fully in charge of the day-to-day management of the relevant Fund. The Directors of the Company are also Directors of Robeco (LU) Funds III, Robeco All Strategies Fund and Robeco Institutional Solutions Funds. The Chairman of the Board of Directors is also director of Robeco UCITS ICAV. The Management Company has delegated the administration, registrar and transfer functions to J.P. Morgan S.E., Luxembourg Branch.

The delegated portfolio managers, Boston Partners Global Investors Inc., Robeco Hong Kong Ltd, Robeco Schweiz AG, Robeco Singapore Private Ltd, Gravis Capital Management Limited and Robeco Institutional Asset Management UK Limited are affiliated entities. The delegated portfolio managers are charged with the day-to-day management of the assets and receive a fee for that service.

The Company is affiliated with the entities belonging to ORIX Corporation Europe N.V. The affiliation with ORIX Corporation Europe N.V. is the result of the possibility of having decisive control or a substantial influence on the Company's business policy. ORIX Corporation Europe N.V. is part of ORIX Corporation. The management structure of ORIX Corporation Europe N.V. is such that ORIX Corporation does not have any meaningful say in or influence on the Company's business policy. ORIX Corporation Europe N.V. pursues an independent investment policy on behalf of its affiliated investment companies, taking into account the interest of the investors involved. Besides services of other market parties, the Company may also utilize the services of one or more of these affiliated entities including transactions relating to securities, treasury, derivatives, securities lending, and subscriptions and redemptions of its own shares, as well as management activities. Transactions are executed at market rates.

Notes to the financial statements as at 31 December 2024 (continued)

1. General (continued)

Financial instruments

Risks

Transactions in financial instruments may lead the sub-funds to be subject to the risks described below or to the sub-funds transferring these risks to another party.

General investment risk

The value of the investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the sub-funds is affected by developments in the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested or even worth nothing. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the net asset value per share. General investment risk can be broken down into market risk, concentration risk, currency risk and counterparty risk.

Market risk

The net asset value of the sub-funds is sensitive to market movements. In addition, investors should be aware of the possibility that value of investments may vary as a result of changes in political, economic or market circumstances. Therefore, no assurance can be given that the sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in a sub-fund will not fall below its value at the time of acquisition.

Concentration risk

Based on its investment policies, each sub-fund may invest in financial instruments from issuing institutions that (mainly) operate within the same sector, region, or market. If this is the case, the concentration of sub-fund's investment portfolio may cause events that have an effect on these issuing institutions to have a greater effect on the sub-fund's assets than would occur with a less concentrated investment portfolio.

Currency risk

All or part of the securities portfolio of the sub-funds may be invested in transferable securities, money market instruments, UCITS or other UCIs and other eligible financial instruments denominated in currencies other than the Base currency of the sub-fund. As a result, fluctuations in the exchange rate may have both a negative and a positive effect on the investment result of the sub-funds. As part of an active currency policy, exposure to currencies may be hedged but Investors should note that there is no guarantee that the exposure of the currency in which the Shares are invested can be fully or effectively hedged against the base currency of the relevant sub-fund. Investors should also note that the implementation of an active currency policy may, in certain circumstances, substantially reduce the benefit to Shareholders in the relevant class of Shares (for instance, if the base currency depreciates against the currency of the instrument in which the relevant sub-fund is invested) and could thereby result in a decrease in the value of their shareholding.

Inflation risk

As a result of inflation (reduction in value of money), the actual investment income of each sub-fund may be eroded.

Counterparty risk

A counterparty of a sub-fund may fail to fulfil its obligations towards that sub-fund. In case of hedging transactions in classes of shares, the relevant sub-fund carries the counterparty risk. This risk is limited as much as possible by taking every possible care in the selection of counterparties. Wherever it is customary in the market, the sub-funds will demand and obtain collateral. The sub-funds minimize this risk by trading exclusively with reputable counterparties with a minimum rating of A in the Standard & Poor's or other recognized credit rating agencies lists. The positions that each sub-fund takes in terms of interest-rate swaps and credit default (index) swaps (where possible) are centrally cleared at a clearing house. This means that the sub-fund has a single central counter party (CCP) for derivative instruments with which the required collateral (margin) is exchanged on a daily basis. To hedge the initial required collateral (initial margin) and for the variable required collateral (variation margin), the sub-funds use cash.

Notes to the financial statements as at 31 December 2024 (continued)

1. General (continued)

Financial instruments (continued)

Risks (continued)

Counterparty risk (continued)

Risk of lending financial instruments

In the case of financial instrument lending transactions, the Company and its respective sub-funds concerned run the risk that the borrower cannot comply with its obligation to return the financial instruments on the agreed date or furnish the requested collateral. The lending policy of the Company is designed to control these risks as much as possible.

The credit worthiness of counterparties in securities-lending transactions is assessed on the basis of how independent rating agencies rank their short-term credit worthiness and on the basis of their net assets. Guarantees given by parent companies are also taken into account. The Fund only accepts collateral from OECD countries in the form of:

- Government bonds with a minimum credit rating of BBB;
- The bonds of supranational bodies with a minimum credit rating of BBB-;
- Stocks listed on the main indexes of stock markets in OECD countries; and to a limited extent in the form of
- Index trackers;
- Cash.

As of balance-sheet date, the Fund had received collateral ensuing from securities-lending transactions. More information can be found on page 201.

Liquidity risk

The actual buying and selling prices of financial instruments in which the sub-funds invest partly depend upon the liquidity of the financial instruments in question. It is possible that a position taken on behalf of a sub-fund cannot be quickly liquidated at a reasonable price due to a lack of liquidity in the market in terms of supply and demand. The sub-funds minimize this risk by mainly investing in financial instruments that are tradable on a daily basis.

Euro currency risk

All or part of the assets of the sub-funds may be invested in securities denominated in Euro. In the event of any adjustments, including a full break-up, an exit of individual countries or other circumstances that may result in the emergence or reintroduction of national currencies, each sub-fund runs the risks that the value of its investments is reduced and/or the liquidity of its investments is (temporarily) reduced, regardless of the measures the Company may seek to reduce this risk.

Sustainability risk

RIAM systematically incorporates sustainability factors, to the extent these present a material risk to a sub-fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability Risk Policy, which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability Risk Policy is built on three pillars. The environmental or social characteristics promoted by a sub-fund or sustainable investment objective of a sub-fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a sub-fund.

Operational risk

The operational risk is the non inherent risk remaining after determining the risks as detailed afore (general investment risk, counterparty risk, liquidity risk, Euro currency risk or risk of lending financial instruments). It mainly includes risks resulting from breakdowns in internal procedures, people and systems.

Insight into actual risks

The report of the Board of Directors, the Combined Statement of Net Assets, the Notes to the Financial Statements and the Schedule of Investments, which include currency classification of the investments, give an insight into the actual risks at the end of the reporting period.

Risk management

Managing risk is a part of the investment process as a whole and with the help of advanced systems, the risks outlined above are limited, measured and monitored on the basis of fixed risk measures.

Notes to the financial statements as at 31 December 2024 (continued)

1. General (continued)

Financial instruments (continued)

Risks (continued)

Risk management (continued)

Policy regarding the use of derivatives

Investing implies that positions are taken. As it is possible to use various instruments, including derivative instruments, to construct an identical position, the selection of derivatives is subordinate to the positioning of an investment portfolio. In the published information, attention is given primarily to the overall position, and secondarily to the nature and volume of the financial instruments employed.

Derivative instruments

The unrealised results of derivative instruments are reported in the Combined Statement of Net Assets. Commitments to derivatives are not included in the Combined Statement of Net Assets. They are, however, explained in the Schedule of Investments. The unrealised results presented in the Combined Statement of Net Assets are disclosed by contract in the Schedule of Investments.

The derivative instruments listed in the Notes are transacted through third party brokers. Those brokers hold/paid collateral as described on pages 198 to 200. The Company is exposed to counterparty risk in respect of all amounts including collateral due to it from such brokers.

2. Summary of significant accounting principles

General

Unless stated otherwise, the items shown in the financial statements are included at their nominal value and expressed in the reference currency of the Sub-fund. This annual report covers the reporting period from 1 January 2024 until 31 December 2024.

Preparation and presentation of financial statements

The financial statements are prepared on the basis of the last net asset value calculated during the year (31 December 2024 for all Sub-funds) and presented in accordance with Luxembourg generally accepted accounting principles for investment funds. The going concern basis was applied for the preparation of the financial statements of the Fund and its Sub-funds, except for Robeco QI Global Developed Multi-Factor Equities, Robeco Investment Grade Corporate Bonds and Robeco QI Multi Factor Absolute Return which were liquidated during the year and Robeco Climate Global Bonds (in liquidation) which was liquidated on 18 March 2025.

Combined figures

The combined figures are expressed in Euro and are presented for information purpose only. The combined figures are the sum of the statements of each Sub-funds. The Combined Statement of Net Assets is presented in EUR at the exchange rates prevailing at the end of the reporting period, while the Combined Statement of Operations and Changes in Net Assets is presented in EUR at the average exchange rates during the year. Cross Sub-funds investments (where one Sub-fund invested within Sub-fund of the Company) are not eliminated from the combined statement.

Foreign currencies

Transactions in currencies other than the reference currency of the relevant Sub-fund are converted into the reference currency at the exchange rates prevailing at the time of the transaction. The market value of the investments, assets and liabilities expressed in currencies other than the reference currency of the Sub-fund are converted into the Sub-fund's reference currency at the exchange rates prevailing at the end of the reporting period. Any positive or negative exchange differences arising are accounted for in the Combined Statement of Operations and Changes in Net Assets. The table on page 285 shows the exchange rates as at 31 December 2024.

Valuation of investments

Transferable securities, money market instruments and financial derivative instruments listed on an official stock exchange listing

These instruments are valued at their last available market price. In the event that there should be several such markets, the instruments will be valued on the basis of the last available price of the main market for the relevant security or asset. Should the last available market price for a given transferable security, money market instrument or financial derivative instrument not truly reflect its fair market value, then that transferable security, money market instrument or financial derivative instrument is valued on the basis of the probable sales price which the Board of Directors deems prudent to assume. Fixed income securities not traded on such markets are generally valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors or any other price deemed appropriate by the Board of Directors. According to the valuation policy which is approved by the Fund Board, a fair value adjustment will be made to reflect the current market values for securities traded in markets with a different timezone (mainly Asia Pacific) where new market information surfaces after the close of the local market but before the calculation of the net asset value. There were no fair value adjustments as at 31 December 2024.

Transferable securities and/or money market instruments dealt in on another regulated market

These instruments are valued on the basis of their last available market price. Should the last available market price for a given transferable security and/or money market instrument not truly reflect its fair market value, then that transferable security and/or money market instrument is valued by the Board of Directors on the basis of the probable sales price which the Board of Directors deems prudent to assume.

Notes to the financial statements as at 31 December 2024 (continued)

2. Summary of significant accounting principles (continued)

Valuation of investments (continued)

Transferable securities and/or money market instruments not listed or dealt in on any stock exchange or on any regulated market

In the event that any assets are not listed or dealt in on any stock exchange or on any regulated market, or if the above valuation methods are inappropriate or misleading, with respect to assets listed or dealt in on any stock exchange, or on any regulated market as aforesaid, where the above valuation methods are inappropriate or misleading, the Board of Directors may adopt any other appropriate valuation principles for the assets of the Company.

Investment transactions and investment income

Securities are initially recorded at cost, and where applicable on the basis of exchange rates prevailing on the date they are purchased. Results on sales of securities are determined on the basis of the average cost method (for future first-in-first-out method). Investment transactions are accounted for on the trade date. Dividends are accounted for on the ex-dividend date. Interest income is recorded on an accrual basis. Discounts/premiums on zero-coupon bonds are accreted as adjustments to interest income. Interest and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

Valuation of Russian Investments as at financial year-end:

As at 31 December 2024, the securities issued by Russian companies are valued at 'nil' in the schedules of investments of the respective Sub-funds exposed to such securities. This nil value may not reflect the intrinsic value of those companies but rather reflect the fact that those securities are not tradable as of 31 December 2024.

3. Open forward exchange transactions

Open forward exchange transactions are valued with market practice valuation models using forwards rates based on exchange and interest rates applicable at 31 December 2024. The unrealised results of these transactions have been recorded gross in the Combined Statement of Net Assets under the heading 'Unrealised gain/loss on forward currency exchange contracts' and changes in unrealised results are recorded in the Combined Statement of Operations and Changes in Net Assets under the heading 'Net change in unrealised appreciation/(depreciation) on forward currency exchange contracts'.

The contracts outstanding as at 31 December 2024 are disclosed in the Schedule of Investments. Information on the collateral received or paid on these positions is stated in the table on pages 198 to 200. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

4. Interest rate swaps

Interest rate swaps are valued with market practice valuation models using exchange and interest rates applicable at 31 December 2024. The unrealised gains/losses on interest rate swaps are recorded gross in the Combined Statement of Net Assets under the heading 'Swap contracts at fair value' and changes in unrealised results are recorded in the Combined Statement of Operations and Changes in Net Assets under the heading 'Net change in unrealised appreciation/(depreciation) on swaps contracts'. The contracts outstanding as at 31 December 2024 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 198 to 200. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

5. Credit default swaps

Credit default swaps are valued at fair value under procedures approved by the Board of Directors. The valuation is based on market practice valuations models using observable market inputs. The unrealised gains/losses on credit default swaps are recorded gross in the Combined Statement of Net Assets under the heading 'Swap contracts at fair value' and changes in unrealised results are recorded in the Combined Statement of Operations and Changes in Net Assets under the heading 'Net change in unrealised appreciation/(depreciation) on Swaps contracts'. The contracts outstanding as at 31 December 2024 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 198 to 200. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

Notes to the financial statements as at 31 December 2024 (continued)

6. Financial futures contracts

Regulated futures contracts are valued at their exchange quoted settlement price. Initial margin deposits are made upon entering into futures contracts. Variation margin payments are made or received, depending on the daily fluctuation in market value of the contract and are recorded by the fund as unrealised appreciation or depreciation. When the contract is closed, the Company records a realised gain or loss equal to difference between the value of the contract at the time it was opened and the value at the time it was closed. All margin deposits are included in the Combined Statement of Net Assets under the heading 'Cash at bank and at brokers'.

Changes in unrealised results and realised results during the year are both recorded in the Combined Statement of Operations and Changes in Net Assets. The contracts outstanding as at 31 December 2024 are disclosed in the Schedule of Investments.

7. Options contracts

Options contracts not traded on exchanges or on other Regulated Markets are valued at fair value under procedures approved by the Board of Directors. Options contracts traded on exchanges or on other Regulated Markets are valued at last available settlement prices of these contracts on exchanges and Regulated Markets on which the options contracts are traded. When the contract is closed, the Company records a realised gain or loss equal to difference between the value of the contract at the time it was opened and the value at the time it was closed. Changes in unrealised results and realised results during the year are both recorded in the Combined Statement of Operations and Changes in Net Assets. The contracts outstanding as at 31 December 2024 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 198 to 200. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'.

8. Collateral

Several sub-funds received or paid collateral to cover the unrealised results on derivative instruments. Collaterals are calculated and settled on a daily basis per counterparty. The collateral is primarily cash held at the broker in the name of the sub-fund. The paid collateral is restricted cash and is included in the Combined Statement of Net Assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Combined Statement of Net Assets under the liabilities 'Due to brokers'. No cash collateral has been reinvested. The amounts per sub-fund and counterparty are shown in the table below.

9. Schedule of Investments

The Schedule of Investments of the Sub-funds are included at the end of this report.

Notes to the financial statements as at 31 December 2024 (continued)

10. Securities lending

J.P. Morgan SE, Luxembourg Branch is a lending agent for all Robeco Capital Growth Funds securities lending transactions. J.P. Morgan SE, Luxembourg Branch is authorized to retain a fee in an amount equal to (A) 25% of the income from securities-lending transactions for any loans which generate a return of 0.5% or less and (B) 10% of the income from securities-lending transactions for any loans which generate a return greater than 0.5% of the sum of (i) earnings derived from authorized investments (as adjusted for any rebate paid or received by J.P. Morgan SE, Luxembourg Branch) (ii) any fee, paid or payable by the borrower with respect to loans (including any loan fee but excluding any compensation payable by borrower under the Master Securities Lending Agreement "MSLA" in connection with a loan (net, however, of any other amount payable by a lender in connection with such loan).

Gains and losses on cash collateral investments shall not be taken into account in calculating earnings for the purpose of J.P. Morgan's fees. The following table shows the position of the collateralized securities lending transactions with first-class financial institutions as described in the prospectus at the end of the reporting period, as well as the income from securities lending over the reporting period for the Company and the income for J.P. Morgan SE, Luxembourg Branch. Income on securities-lending transactions is recorded under the heading 'Securities lending income' in the statement of operations and changes in net assets. Collateral received in the frame of the lending activity, primarily securities, is held in the name of the Fund on an escrow account with external agents. In exceptional cases, the collateral is received in cash, which is not subject to reinvestment. More information on collateral received can be found on pages 1162 and further.

11. Taxes

The classes of shares of the Sub-funds are liable in Luxembourg to an annual duty (“taxe d’abonnement”/“subscription tax”) at the rate of 0.05% of their net assets calculated and payable at the end of each quarter. This rate is 0.01% per annum for institutional classes of shares such as class I, IB, IBH, IBHL, IBL, IBx, IBxH, IBxHL, IBxL, ICo, IE, IEH, IEL, IEx, IExH, IH, IHCo, IHHi, IHL, IL, IM, IML, IMB, IMBxH, IMH, IMHL, J, K, K1, K1E, K1EH, K1H, K2, K2E, K2EH, K2H, K3, K3E, K3EH, K3H, KE, KH, Y, YE, YEH, YH, Z, Z2, Z2H, ZB, ZBH, ZEH, ZH, ZHL, ZL, OIEH, OIH and 2IH shares. To the extent that the assets of the Sub-funds are invested in investment funds which are established in Luxembourg, no such tax is payable, provided that the relevant investment funds have been subject to this tax. The Sub-funds will receive income from their investments after deduction of applicable withholding taxes in the country of origin. There are no taxes regarding Luxembourg income, withholding, capital gains, estate or inheritance taxes that are payable by the Sub-funds.

Taxation of Chinese A shares:

Capital gains derived from the transfer of Chinese A shares on or after 17 November 2014 are (temporarily) exempt from the 10% capital withholding tax (‘CWT’).

Taxation Indian listed stocks

As of 23 July 2024, capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 20% Indian capital gains tax increased with surcharges (before 23 July 2024 the base rate was 15%). The disposal of Indian listed stocks after 12 months after purchase (long-term gains) is subject to a capital gains tax on long-term gains at a rate of 12,5% increased with surcharges (before 23 July 2024 the base rate was 10%). The capital gains taxes are accrued in the net asset value and included in the statement of net assets under the heading ‘Other liabilities’ and included in the statement of operations and changes in net assets under ‘Net realized gain/(loss) on currency exchange’ for the capital gain taxes linked to realized gains and under ‘Net Change in unrealised appreciation/depreciation on: currency exchange’ for the unrealised appreciation of investments during the year.

Notes to the financial statements as at 31 December 2024 (continued)

12. Management Company

The Board of Directors of the Company has appointed RIAM. as the Management Company to be responsible on a day-to-day basis for providing administration, marketing and investment management services in respect of the Sub-funds.

RIAM is incorporated under the laws of the Netherlands on 21 May 1974 and at that time called Rotrusco B.V. On 25 February 1997, the name was changed into RIAM. RIAM holds an AIFMD license as referred to in Section 2:65 Wft. In addition, RIAM is licensed as a manager of UCITS (2:69b Wft, the Dutch Financial Supervision Act). RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (Stichting Autoriteit Financiële Markten, "AFM").

The Management Company has delegated the administration functions and registrar agent functions to J.P. Morgan SE, Luxembourg branch.

RIAM is part of ORIX Corporation Europe N.V. and also acts as the Management Company for other Luxembourg, Dutch and Irish domiciled funds.

13. Portfolio Manager

RIAM, an investment management company forming part of the Robeco Group in Rotterdam, the Netherlands, manages the assets of the Sub-funds on a day-to-day basis. The Portfolio Management Agreement between the Management Company and RIAM was concluded on 1 June 2019 for an undetermined period.

RIAM has appointed Boston Partners Global Investors Inc. as its Sub Delegated Portfolio Manager for the Sub-funds Robeco BP Global Premium Equities, Robeco BP US Premium Equities, Robeco BP US Large Cap Equities and Robeco BP US Select Opportunities Equities.

The Sub Delegated Portfolio Manager for the sub-funds Robeco Emerging Markets Asia Select Equities, Robeco Asia-Pacific Equities, Robeco Chinese Equities, Robeco Indian Equities, Robeco Asian Stars Equities, Robeco Sustainable Asian Stars Equities, Robeco Chinese A-Share Equities and Robeco Transition Asian Equities is Robeco Hong Kong Ltd.

The Sub Delegated Portfolio Manager for the sub-funds Robeco Global SDG Equities, Robeco Sustainable European Stars Equities, Robeco Global Multi-Thematic, Robeco Circular Economy, Robeco Smart Energy, Robeco Smart Materials, Robeco Smart Mobility, Robeco Sustainable Healthy Living, Robeco Sustainable Water, Robeco Biodiversity Equities and Robeco Fashion Engagement is Robeco Schweiz AG.

The Sub Delegated Portfolio Manager for Robeco Transition Asian Bonds is Robeco Singapore Private Ltd.

The Sub Delegated Portfolio Manager for Robeco Gravis Digital Infrastructure Income is Gravis Capital Management Limited.

The Sub Delegated Portfolio Manager for Robeco Emerging Markets Bonds and Robeco Emerging Markets Bonds Local Currency is Robeco Institutional Asset Management UK Limited.

Notes to the financial statements as at 31 December 2024 (continued)

14. Cross investment between Sub-funds

The Company is permitted to engage in cross investment between sub-funds within the umbrella structure. In case there are management fees or service fees charged on the cross investments, these fees are returned to the investor Sub-fund. The following information pertains to the cross investment between sub-funds within the Company as of 31 December 2024:

Investment	Sub-fund Currency	Market Value	% of net assets

Robeco Sustainable Global Stars Equities - Z EUR		7,059,123	5.35
	EUR	10,298,159	7.80

If the Sub-funds invest in UCITS/UCI's that are not part of the Robeco Group, all costs at the level of these UCITS/UCI's (including the non recoverable management fees, service fees, performance fees and/or transactions costs) shall be borne by the Sub-funds ultimately and therefore by the shareholders. The management fee and service fee paid in the Robeco funds is restituted to the Sub-funds and recorded in the Statement of operations and changes in net assets. During the year, the cross investments between the Sub-funds mainly occurred in share-class Z of Robeco Sub-fund which does not pay any management fees.

Notes to the financial statements as at 31 December 2024 (continued)

15. Management, service and performance fees

The different sub-funds or classes of shares incur an annual management fee payable to the Management Company, which reflects expenses¹ related to the management of the sub-funds. Furthermore the different sub-funds or classes of shares incur an annual service fee payable to the Management Company reflecting expenses¹ such as the fees of the administration agent, the registrar agent, auditors and legal advisers, the costs of custody (including custody fees and bank charges), the costs of depositary services, the costs of preparing, printing and distributing all prospectuses, memorandums, reports and other necessary documents concerning the Company, any fees and expenses involved in the registration of the Company with any governmental agency and stock exchange, the costs of publishing prices and operational expenses, and the cost of holding shareholders' meetings.

¹ Additional expenses maybe charged to the Fund on an exceptional basis as disclosed in the prospectus.

The annual charges, both management fee and service fee, are expressed as a percentage of the net asset value. The charges, paid quarterly, are based on the net asset value of the relevant period and are reflected in the share price.

The share classes Z do not pay management fees. For some sub-funds the Management Company is entitled to a performance fee, payable annually in arrears after the end of the reporting period. A performance fee for the relevant class of shares of the sub-fund is only due at the end of the financial year when the relevant class of shares of the sub-fund outperforms the relevant index or hurdle rate as indicated in the prospectus. Note that an outperformance of the relevant class of shares of the sub-fund does not imply a positive return of the relevant class of sub-fund's shares. A performance fee is also due when the relevant class of sub-fund's shares has a negative return but an outperformance over the relevant index or hurdle rate as indicated in the prospectus. This outperformance must have taken place since inception of the relevant class of share of the sub-fund's or since the time that a performance fee was due. In the event that payment of the performance fee is due, the basis for the performance fee calculation for the next financial year will start at 0 (reset). In the event that no payment of the performance fee is due no reset will take place. In addition, if a shareholder redeems or switches all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallize on that Valuation Day and will then become payable to the Management Company. The basis for the performance fee calculation will not reset on those valuation days at which performance fees crystallize following the redemption or switch of shares.

The following table shows the maximum percentages for the different outstanding classes of shares on an annual basis.

	Sub-fund currency	Performance fee	% of average net assets
Robeco Sustainable Global Stars Equities			
I USD	EUR	1,207,490	0.39%

If the net asset value per share class exceeds EUR 1 billion the service fee will be reduced by 0.02% for the portion above 1 billion. If the net asset value per share class value exceeds EUR 5 billion, the service fee will be reduced by a further 0.02% for the portion above EUR 5 billion.

The service fee paid to the Management Company include Audit fees and Audit related fees. Audit fees, amounting to EUR 577,067 relate to the statutory audit of the Company's annual accounts performed by the Statutory Auditor. Audit related fees, amounting to EUR 42,124 relate to the regulatory reporting of the Company performed by the Statutory Auditor. No other services were charged by the Statutory Auditor to the Company.

16. Depositary fees

The Depositary bank is remunerated in accordance with the agreement between J.P. Morgan SE, Luxembourg Branch (acting as the depositary) and the Company. The depositary fees are paid by RIAM out of the service fee.

17. Other operating expenses

The banking fees relating to the assets of the Sub-funds or expenses incurred thereof, such as proxy voting are paid by RIAM out of the service fee. The costs of establishing the Company have been paid entirely. If additional sub-funds are created in the future, these sub-funds will bear, in principle, their own formation expenses.

Notes to the financial statements as at 31 December 2024 (continued)

18. Transaction costs

The Sub-funds and their classes of shares pay directly commissions, brokerage fees and taxes resulting from financial transactions. Transaction costs are included in the purchase/sale price of the securities.

19. Total Expense Ratio (TER)

The Total Expense Ratio ('TER') expresses the operational costs (e.g. management fee, service fee, performance fee, taxe d'abonnement and bank charges) charged to the Sub-funds as a percentage of the average assets entrusted, calculated on a daily basis, during the reporting period. The TER as shown below do not include transaction costs. The other costs concern mainly bank charges and taxe d'abonnement. TERs are annualized for periods of less than one year.

20. Broker commission

Robeco will ensure that the selection of counterparties for trade execution ("Brokers") will take place according to defined procedures and criteria to ensure best execution, taking into account execution capability and - where applicable - quality of investment research ("Research").

Under the influence of the MIFID II regulation RIAM decided to bear the research costs for most of the sub-funds of the Fund from 2018. Only for the sub-funds for which the American based asset manager Boston Partners is the Sub Delegated Portfolio Manager, the research costs are charged to the Fund. The below text on research costs is only applicable to the sub-funds in the table below.

Brokers may charge execution only fees (excluding a fee for Research) and brokers may also charge a transaction fee consisting of two elements: a fee for the execution of an order and a fee for Research. Robeco will only pay a fee for Research if such Research is directly instrumental for improving the investment decision-making process within Robeco (via full service fees and via Commission Sharing Agreements ("CSA")). Having CSAs enables Robeco to unbundle Research and execution services to fulfill best execution criteria. By using CSAs, the Fund can obtain research services from those providers who do not have an execution business or do not fit the Fund's best execution criteria. It is Robeco's policy that the abovementioned arrangements are only allowed as long as the research services under consideration research, securities advice, etc.) are related to the enhancement of our investment process. Robeco makes use of:

1. Execution-only fees for quantitatively managed equity Sub-funds;
2. Full services fees for fundamentally managed equity Sub-funds; and
3. CSAs for fundamentally managed equity Sub-funds.

Robeco BP US Large Cap Equities	USD	343,830
Robeco BP US Select Opportunities Equities	USD	147,096

21. Portfolio Turnover Ratio (PTR)

This is the turnover ratio of the investments, against the average assets entrusted and this is a measure of the incurred transaction costs resulting from the investment portfolio policies pursued and the ensuing investment transactions. In the employed calculation method, the amount of turnover is determined by the sum of purchases and sales of investments, excluding derivative and liquidity instruments, less the sum of issuance and repurchase of own shares, divided by the daily average of the net assets. The portfolio turnover ratio is determined by expressing the amount of turnover as a percentage of the average assets entrusted. The following table shows the portfolio turnover ratios of the Sub-funds.

Sub-fund	Portfolio turnover ratio (%)
Robeco BP Global Premium Equities	51.33
Robeco QI Global Conservative Equities	10.31

REPORT OF THE REVISEUR D'ENTREPRISES AGREÉ

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Robeco Capital Growth Funds ("the Fund") and of each of its sub-funds, which comprise the combined statement of net assets and the schedule of investments as at 31 December 2024, and the combined statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (the "CSSF"). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the audit of the financial statements » section of our report. We are also independent of the Fund and of each of its sub-funds in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation and existence of investments in securities at market value (Refer to note 2 of the financial statements)

Why the matter was considered to be one of most significance to the audit

The investments in securities at market value represent between 83.34% and 100.63% of total net assets (by value) as at 31 December 2024 depending on sub-fund, and are considered to be the key driver of the Fund's performance. The market values of the majority of the Fund's investments are based on available market prices from an official stock exchange or another regulated market. Accordingly, the valuations and existence of investments are considered to be a key audit matter due to the significance of the balances to the financial statements as a whole.

How the matter was addressed in our audit

We have performed the following procedures:

- for the investments in shares or units of underlying open-ended investment funds, we compared their valuation as at year-end to valuations recalculated using the audited or published net asset value per share or unit;
- for the investments where market prices were available, we compared their valuation using externally quoted prices;
- for the investments where market prices were unavailable, we checked that the valuations were performed in accordance with the valuation principles established for the Fund; and
- we agreed holdings in the schedules of investments as at year-end to the confirmations received directly from the depositary bank.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the “réviseur d’entreprises agréé” to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the “réviseur d’entreprises agréé”. However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-fund where a decision or an intention to close exists) to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as “réviseur d’entreprises agréé” by the General Meeting of the shareholders on 14 June 2024 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 11 years.

We confirm that the prohibited non-audit services referred to in the EU Regulation N° 537/2014 were not provided and that we remained independent of the Fund and of each of its sub-funds in conducting the audit.
