##### Investment Process

In actively managing the Fund, the Investment Manager uses a risk-managed approach to seek additional performance opportunities, and pursues a flexible asset allocation strategy. The Investment Manager considers ESG factors a core element of its strategy by adopting a tilted approach which seeks to increase the weight of securities with low sustainability risks and/or to decrease the weight of securities with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy\*, SFDR product category Article 8. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Fund's performance to that of the benchmark may vary.

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Fund's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Fund offers no capital guarantee or asset protection measures.

The Fund may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Investments in Mainland China** may be subject to capital restrictions and trading quotas (e.g. QFII and RQFII regimes). The Fund may encounter difficulties or delays in enforcing its rights in the event of disputes.
- **Chinese "Stock Connect"** trading programmes may be subject to additional risks related to ownership rights, clearing & settlement, trading quotas and operational issues.
- **Contingent Convertible ("CoCo") investments** may result in losses when regulatory or issuer-motivated triggering events cause a total loss of the investment or a conversion to equity.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Investments in emerging markets** are generally more sensitive to risk events, such as changes in the economic, political, fiscal and legal environment, as well as fraud.
- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sukuk investments** may lead to losses because of the lack of uniform regulatory standards and weak legal frameworks for settling disputes and defaults, among other risks.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.
