

Key Investor Information

Kempen (Lux) Euro Sustainable Credit Fund - Class I (the "Fund") a Sub-Fund of Kempen International Funds (the 'SICAV') | ISIN: LU0986646882

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

Investment Policy

The Fund primarily invests in corporate bonds denominated in Euro and may, on an ancillary basis, invest in other fixed income securities, government bonds, structured finance products, asset backed securities, subordinated debt, collateralised debt or similar products denominated in Euro. Investments may be made in all available sectors and there are no constraints regarding the maturity of fixed income securities. Strict sustainability criteria are used to minimise or exclude investments in companies involved in controversial activities such as alcohol, tobacco and adult entertainment. Investments may be made in financial instruments included in the benchmark or should at least have a rating of BB- at the time of purchase. Maximum 10% may be invested in financial instruments that are not included in the benchmark with a rating of BB+ to B- and no more than 10% may be invested in financial instruments with a rating between BB+ and BB- at the time of purchase.

The Fund may also invest in other investment funds or through financial derivative instruments such as options, warrants, futures (interest rate) swaps, credit default swaps, caps and floors. These financial derivatives instruments may be used for hedging purposes and for investment purposes and the total global exposure will not exceed 100% van de net asset value.

The Fund is actively managed and may hold investments that are not included in the benchmark. The investment manager is allowed to deviate significantly from the benchmark. The benchmark is the iBoxx EUR Corporates Net Zero 2050 Paris-Aligned ESG, which includes only financial instruments that have an investment grade rating of BBB- or higher.

Objectives

The Fund primarily aims to generate a long-term return in excess of the benchmark, comprising capital growth and income. The Fund falls under the scope of article 8 of the SFDR which means that the Fund promotes environmental and/or social characteristics. While it does not have as its objective a sustainable investment, it will have a minimum proportion of the benchmark level of sustainable investments. The Fund considers principal adverse impact on sustainability factors. **This Fund is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.**

This share class of the Fund does not distribute dividend and is only available for institutional investors.

The Fund is not listed on any stock exchange. Shares in the Fund can normally be bought or sold on any business day in Luxembourg.

For the share class a minimum initial subscription of € 50,000 applies. The Fund is a UCITS fund.

Risk and Reward Profile

What does the indicator mean?

The risk indicator is a measure of the risk which you run when you invest in the Fund. The indicator is based on the volatility of the share price of the Fund over the last five years. The volatility means to which extent the price has risen and fallen. As a general rule, you have to run greater risk to potentially achieve a higher return. Note that a classification in the first category does not mean that you do not run any risk.

Why is this fund in category 3?

The Fund primarily invests in corporate bonds that are in general more volatile than government bonds and money market instruments, but less volatile than equities.

Attention:

The indicator is based on historical data over the past five years.

Historical figures do not always offer a reliable indication of the future risk profile of the Fund. The risk profile and, consequently, this classification of the Fund are not definite and can change.

Other particular risks

There are various risks with potential impact on the Fund performance which are not fully captured by the risk-reward indicator.

Credit risk

The Fund invests in fixed income securities. The value of fixed income securities also depends on the credit rating of the issuer. The issuers may not be able to meet its interest and repayment liabilities, which may result in the Fund sustaining losses.

Interest rate risk

The Fund invests in fixed income securities. The value of fixed income securities also depends on the interest rate. In general the value of fixed income securities may fluctuate with a change in interest rates.

Risk relating to derivatives transactions

The Fund may use financial derivative instruments like future contracts for hedging and investment purposes. If the Fund uses leverage and the investment has a loss, this may cause a greater loss than when no leverage would have been used.

Charges

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
This is the maximum amount that might be taken out of your money before it is invested or before the proceeds of your investment is paid out.	
Charges taken from the Fund over a year:	
Ongoing charges	0.43%
This figure is based on the costs that were charged in the financial year 2023/2024. This may vary from year to year.	
Charges taken from the Fund under certain specific conditions:	
Performance fee	None

When investing in the Fund you should also take into account the costs. These costs are deducted as a fee for managing the Fund and include the marketing and distribution costs. All costs reduce the potential value appreciation of your investment in the Fund.

The entry and exit charges shown are maximum figures. Contact your financial advisor or distributor to find out the actual entry or exit charges. Dependent on the distribution channel, it is possible that additional costs are charged by the distributor.

The 'ongoing costs' consist of a management and service fee and a tax d'abonnement. If there are also investments in other investment companies this percentage also comprises the ongoing costs of those investment companies. Performance fees and transaction costs are not included, unless it concerns entry and exit charges that were paid by the Fund when participations in another investment company were purchased or sold. For further information on charges, please refer to section 'Management and Fund charges' of the Fund prospectus, available at www.vanlanschotkempen.com/investment-management.

Past Performance

Performance is shown after deduction of ongoing charges.

Performance is calculated in EUR.

This share class of the Fund was launched on 14 May 2019.

Past performance is not a reliable indicator of future performance.

The benchmark over the period to 1 July 2025 was the Markit iBoxx Euro Corporates Index.

Practical Information

The SICAV's depositary is BNP Paribas, Luxembourg Branch. This Fund is a Sub-Fund of Kempen International Funds SICAV. More information about the Fund can be found on the website www.vanlanschotkempen.com/investment-management. The net asset value of the Fund will be published on this website daily.
