WHAT IS THIS PRODUCT?

TYPE

Carmignac Portfolio Asia Discovery is a segregated sub-fund of Carmignac Porfolio SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The SICAV was launched on 30/06/1999 for unlimited period. The sub-fund was launched on 14/12/2007.

OBJECTIVES

The sub-fund aims to outperform its reference indicator through exposure to the small, mid and large cap equity markets of Asian emerging countries. The reference indicator is the MSCI EM Asia Ex-China IMI 10/40 Capped NR index.

The portfolio is mainly invested in equities (at least 60%) in the emerging markets in Asia from all economic sectors. It will be actively exposed to emerging markets in Asia through the selection of small, medium and large capitalization companies offering mid to long-term return prospects and growth potential selected on the basis of their company fundamentals.

The sub-fund uses derivatives for hedging or arbitrage purposes, or to expose the portfolio to the following risks (directly or via indices): currencies, bonds, equities (all categories of capitalisation), ETFs, dividends, volatility, variance (the latter two categories for up to 10% of net assets) and commodities (up to 10% of assets). The derivatives available are options (vanilla, barrier, binary), futures and forwards, swaps (including performance) and CFDs (contracts for difference) on one or more underlyings. Up to 10 % of the net assets may be invested in contingent convertible bonds (“CoCos”). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature. Please refer to the prospectus for more information. The sub-fund may invest up to 10% of its net assets in units or shares of investment funds.

This sub-fund is an actively managed UCITS. The investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. the sub-fund's investment universe is totally independent from the indicator. The sub-fund's investment strategy is not dependent on the indicator; therefore, the sub-fund's holdings and the weightings may substantially deviate from the composition of the indicator. There is no limit set on the level of such deviation.

The sub-fund promotes environmental/social characteristics in accordance with Article 8 of the Sustainable Finance Disclosure Regulation ('SFDR') through best-in-universe and best-effort approaches, and an active engagement policy. Extra-financial analysis leads to a reduction of at least 20% of the sub-fund's investment universe. The sub-fund commits to invest at least 50% of its net assets in sustainable investments within the meaning of SFDR. The sustainable investment definition used by the sub-fund is based on the United Nations Sustainable Development Goals ('SDGs'). This framework is one of the several that can be used to illustrate positive results; other frameworks may yield different results. The sustainability risk of the sub-fund may differ from that of its reference indicator.

INTENDED RETAIL INVESTOR

This sub-fund is intended for private and institutional investors wishing to diversify their investments while benefiting from market opportunities through active and discretionary asset management over a recommended investment period of more than 5 years, due to the sub-fund's exposure to the equity market.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

OTHER INFORMATION

This is an accumulation share.

Investments may be redeemed each business day on request. Subscription, redemption or conversion requests are centralised on each NAV calculation and publication day before 13:30 CET and are executed on the next business day using the previous day's NAV.

The Depositary of the sub-fund is BNP Paribas, Luxembourg branch.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website www.carmignac.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks not sufficiently considered by the indicator include:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- Liquidity risk: the markets in which the sub-fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the sub-fund may be caused to liquidate, initiate or modify its positions.

Lower risk **Higher risk**

The length of the recommended holding period is 5 years.

If the product is denominated in a currency other than the applicable currency of the legal tender of the Member State where the PRIIP is being marketed, the return the retail investor gets, when expressed in the currency of the Member State where the PRIIP is being marketed,may change depending on currency fluctuations.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The summary risk indicator shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets may develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Recommended holding period:		**5 years**	
Example Investment:		**10 000 €**	
		If you exit after 1 year	**If you exit after 5 years**

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- Unfavourable scenario: This type of scenario occurred for an investment between December 2017 and December 2022
- Moderate scenario: This type of scenario occurred for an investment between May 2016 and May 2021
- Favourable scenario: This type of scenario occurred for an investment between February 2021 and February 2026

WHAT HAPPENS IF CARMIGNAC GESTION LUXEMBOURG IS UNABLE TO PAY OUT?

For your protection, the assets of the fund are held with a separate entity, the custodian, so that the fund's ability to pay would not be affected by the insolvency of the management company. In the event of failure of the latter, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the product.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that these costs will have on your investment over time.

Costs over time

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 €. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 5 years
Total costs	223 EUR	1 638 EUR
Annual cost impact (*)	2.23 %	2.43 %

* The Reduction in Yield (RIY) illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.92 % before costs and 6.49 % after costs. The total costs take into account one-off, ongoing and incidental costs.

Composition of costs

Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	65 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Due to the sub-fund's exposure to the equity market, the recommended investment period is over 5 years. However, you can redeem your investment without incurring any penalties at any point during this period, or stay invested for longer. Redemptions are possible each business day. A redemption gate mechanism can be activated when net redemptions exceed 10% of the fund's net assets, resulting in the partial execution of redemption requests and the carryover of the balance to one or more subsequent net asset values. Furthermore, a swing pricing mechanism is in place. This allows for adjustments to the net asset value when net subscriptions and redemptions reach certain thresholds, in order to cover the cost of portfolio restructuring following significant changes in liabilities, with the aim of protecting the interests of unit holders
