What is this Product ?

Type

The Product is a sub-fund of EDMOND DE ROTHSCHILD FUND, a public limited liability company (*société anonyme*), incorporated as a "*société d'investissement à capital variable*" under Part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment and qualifying as an undertaking for collective investment in transferable securities (UCITS) (the "Fund").

Term

The lifespan of this Product is not limited.

Objectives

Objective: The objective of the Product is to outperform its benchmark over a 5-year investment period, by investing on international capital markets and through the selection of, among others, companies involved in technology sectors or related to advanced analytics – Big Data – technologies.

Benchmark index: The benchmark index of the Product is the MSCI World Index, calculated with net dividends reinvested. The benchmark index will be expressed in the Class currency.

The benchmark index serves only for comparison purposes. The Product is actively managed.

Investment policy: The Investment Manager will systematically include environmental, social and governance (ESG) factors in their financial analysis in order to select the highest-rated companies.

At least 90% of the companies in the portfolio will have an ESG rating. At the end of this process, the Product will have an ESG rating that is greater than that of its investment universe.

Furthermore, the security selection process also includes a negative filter to exclude companies that contribute to the production of controversial weapons in compliance with international conventions in this area as well as companies that are exposed to activities related to thermal coal or tobacco in accordance with the exclusion policy of Edmond de Rothschild Group, which is available on its website: <https://www.edmond-de-rothschild.com/en/Pages/Responsible-investment.aspx>, more specifically on the Product's transparency code.

The Product classifies as Article 8(1) SFDR as it promotes a combination of ESG characteristics, although no reference benchmark has been designated for the purpose of attaining the environmental or social characteristics.

In view of its ESG strategy, the Product promotes environmental characteristics but does not invest in environmentally sustainable economic activities. The investments underlying this financial Product do not take into account the EU criteria for environmentally sustainable economic activities, in the context of the Taxonomy Regulation.

The Product invests at least 51% of its net assets in securities issued by companies involved in technology sectors or related to advanced analytics – Big Data – technologies.

Between 75% and 110% of the Product's net assets will be exposed (directly or indirectly) to the international equity markets and other assimilated securities.

The Product may invest, up to 30% of its net assets, in China A Shares via the Shanghai Hong Kong Stock Connect program.

For cash management purposes, the Product may invest up to 25% of its net assets in transferable debt securities, Money Market Instruments, Money Market Funds and bank term deposits. The Product will seek issues from public or private issuers that are rated Investment Grade at the time of purchase (i.e. which rating are higher than or equal to BBB- according to Standard & Poor's, or an equivalent rating attributed by another independent agency, or a deemed equivalent rating attributed by the Investment Manager for non-rated securities), with a short-term maturity of less than three months.

The Product may use financial derivative instruments to achieve its investment objective and for hedging purposes.

Income allocation: Accumulation

Intended retail investor

The Product is intended for investors who wish to receive a better return on their savings through exposure to the international markets for shares of companies that are active in the technology sectors or that have a connection to advanced analytics technologies —Big Data.

This share is intended for retail investors.

What are the risks and what could I get in return ?

Risk Indicator

←----->
Lower risk Higher risk

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (5 years).

The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Product to pay you.

In addition, you will be exposed to the following risk (not captured in the synthetic risk indicator), namely:

Liquidity risk : The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Product, both in the realisation of the prices quoted and the execution of orders at desired prices.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Beware of currency risk. If an Investment Product is denominated in a currency other than the official currency of the State in which this Product is marketed, the final gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator above.

Other risks may affect the performance of the Product. Please refer to the prospectus for further details.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable, scenarios presented represent examples using the best and worst performances, as well as the average performance of the Product and/or the appropriate benchmark indicator over the last 10 years.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

The recommended holding period is 5 years.		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 5,070	EUR 4,150
	Average return each year	-49.25%	-16.13%
Unfavourable	What you might get back after costs	EUR 8,510	EUR 9,510
	Average return each year	-14.86%	-1.01%
Moderate	What you might get back after costs	EUR 10,690	EUR 18,160
	Average return each year	6.88%	12.67%
Favourable	What you might get back after costs	EUR 15,570	EUR 22,320
	Average return each year	55.65%	17.42%

This table shows the money you could get back over the recommended holding period of 5 years, under the different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario: this scenario occurred for an investment between 01/2021 and 01/2026.

Moderate scenario: this scenario occurred for an investment between 02/2019 and 02/2024.

Favourable scenario: this scenario occurred for an investment between 03/2020 and 03/2025.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario ;
- EUR 10,000 is invested.

Investment EUR 10,000	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	EUR 555	EUR 2,737
Annual cost impact (*)	5.6%	3.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 16.25% before costs and 12.67% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	This includes distribution costs of 3.00%. The impact of the costs you pay when entering your investment. This is the maximum you will pay and you could pay less. These costs are already included in the price you pay.	EUR 300
Exit costs	We do not charge an exit fee for this Product (but the person selling the Product may do).	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	2.10% of the value of your investment per year. The impact of the costs that we take each year for managing this Product. This figure is based on actual costs over the last year.	EUR 210
Transaction costs	0.33% of the value of your investment per year. The impact of the costs of us buying and selling underlying investments for this Product. The actual amount will vary depending on how much we buy and sell.	EUR 33
Incidental costs taken under specific conditions		
Performance fees (and carried interest) (**)	0.12% - Description : The performance fee is set at 15% and is calculated by comparing the Product's share performance with that of an indexed reference asset. The above aggregate cost estimate includes the average over the last 5 years.	EUR 12

(**) Outperformance fees may be calculated and charged in the underlying funds held by the Product.

The table above shows the annual impact of the different types of costs on the return you could obtain on your investment at the end of the recommended investment period.

The costs shown here do not include any additional costs that may be charged by your distributor or advisor, or any costs in connection with a package that the Product may be part of. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the contract fees.

This table also explains what the different cost categories mean.

How long should I hold it and can I take the money out early ?
