

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone SICAV Ethical Bond Fund (Z EUR Acc Hedged)

A sub-fund of Rathbone Luxembourg Funds SICAV

Management Company: FundRock Management Company S.A

Z EUR Acc Hedged ISIN LU1396461185

Objectives and investment policy

The objective of the Sub-Fund is to provide a regular, above average income through investing in a range of fixed income and fixed income related instruments of issuers worldwide that meet strict criteria ethically and financially. The Sub-Fund is actively managed at the Investment Manager's discretion without reference to any benchmark.

The Sub-Fund will gain, directly or indirectly, exposure to investment grade fixed income and fixed income related instruments of sovereign and corporate issuers worldwide denominated in any freely convertible currency. The predominant part of the fixed income and fixed income related securities to which the Sub-Fund will be exposed will be denominated in GB.

There is no guarantee that this investment objective will be achieved over five years, or any other time period.

To meet the objective, the Sub-Fund will gain exposure to sub-investment grade instruments for up to a maximum of 20% of its net assets. The Sub-Fund will invest at least 80% of its assets in investment grade assets. The investment grade of an instrument shall be determined based on ratings established by international recognised rating agencies. The Sub-Fund may also invest up to 10% of its net assets in un-rated assets that the Investment Manager considers to be equivalent to investment grade or sub-investment grade. The Sub-Fund will not invest in fixed income and fixed income related instruments rated or considered by the Investment Manager as distressed or lower. On an ancillary basis, the Sub-Fund may also invest in money market instruments and liquidities. In response to exceptional circumstances, the Sub-Fund may invest on a temporary

basis up to 100% of its net assets in liquidities (including bonds or treasury bills issued by a government of any OECD country or supra national organisations, money market instruments and cash) if the Investment Manager believes that this is in the best interest of shareholders. The Sub-Fund may also hold up to 20% of its net assets in equities of issuers of the fixed income and fixed income related instruments to which the Sub-Fund may gain exposure.

The Investment Manager does not invest in companies engaged in the following: • Alcohol manufacturing • Alcohol retail • Animal welfare violations • Armaments • Carbon intensive industries • Poor employment practices • Polluting the environment • Gambling • Human rights abuses • Nuclear power • Pornography • Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss. For definitions please visit the glossary on our website. You can buy and sell units on each business day of the fund between 9am and 5pm.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Typically lower rewards,
Lower risk

Typically higher rewards,
Higher risk

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk.

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

However, the lowest category (1) does not mean a risk free investment.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Interest Rate Risk: Most bonds pay us a fixed amount over an agreed

period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Liquidity risk: Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Sustainability Risk: Returns could deviate from the market or funds that don't promote environmental or social characteristics, or that don't avoid investments/sectors e.g., oil, tobacco.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Derivatives risk: Sometimes we invest in financial contracts or assets with similar exposures, such as structured products and currency hedging. These assets can be used to offset risks or meet other objectives, however market moves can cause these assets returns not to align with those objectives and can result in losses or gains.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.

Charges

One-off charges taken before or after you invest

Entry Charge	0.00%
--------------	-------

Exit Charge	0.00%
-------------	-------

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.55%
-----------------	-------

Charges taken from the Sub-Fund under certain specific conditions.

Performance Fee	None
-----------------	------

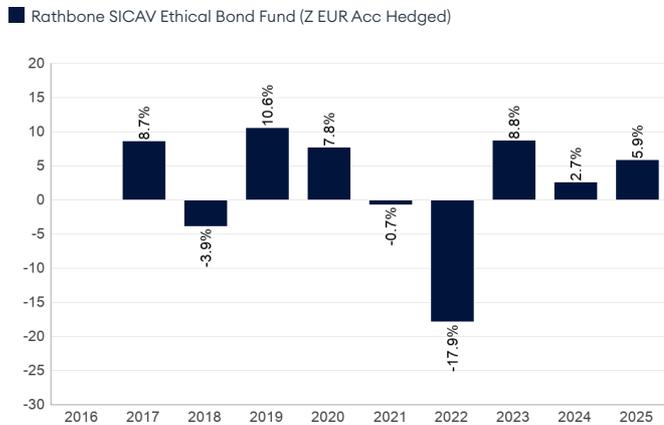

The Fund does not charge entry or exit charges.

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing RAM@Rathbones.com.

The charges you pay are used to pay for the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment. The fund manager receives an annual fee, which is included in the ongoing charges shown. Ongoing charges are the same for all investors in the same class. The charges shown are based on actual fees and expenses. The ongoing charge is made up of the Annual Management Charge and other fees. In this case there is an expense cap on other fees of 0.25% (excluding any ongoing charges for the investment into other underlying funds). The ongoing charges figure excludes portfolio transaction costs.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

Past performance

The performance of this Class is calculated in EUR

This share class launched on 20 May 2016.

The Fund launched on 17 May 2016.

Past performance should not be seen as an indication of future performance. Basis of performance: Price performance based upon mid to mid price. Past performance is reported on a full calendar year basis.

Practical information

Depositary: HSBC Continental Europe, Luxembourg

Tax: Investors should note that the tax legislation that applies to the fund may have an impact on the personal tax position of their investment in the fund. Contact your adviser to discuss tax treatment and the suitability of this investment.
