M&G (Lux) European Strategic Value Fund

a sub-fund of M&G (Lux) Investment Funds 1
EUR Class C – Accumulation shares ISIN no. LU1670707873
Managed by M&G Luxembourg S.A.

Objective and investment policy

The Fund aims to provide a combination of capital growth and income to deliver a return that is higher than that of the European stock market over any five-year period while applying ESG Criteria.

Core investment: at least 80% of the Fund is invested in the shares and equity-related instruments of companies, across any sector and of any size, that are based, or do most of their business, in Europe. The Fund invests in securities that meet the ESG Criteria, applying an Exclusionary Approach and Positive ESG Tilt as described in the precontractual annex.

Other investments: the Fund may invest in other funds, and up to 20% in cash (meaning eligible deposits) and assets that can be turned quickly into cash.

Derivatives usage: to reduce risks and costs.

Strategy in brief:

- Investment approach: the Fund employs a 'value' strategy, investing in cheap, out-of-favour companies whose share price, in the investment manager's view, does not reflect the underlying value of the business. Stocks are selected on the basis of their individual merits, through a combination of value-focused screening and qualitative assessment. The main drivers of returns are expected to be the value style and overall stock selection rather than any individual sector or stock.
- Investment manager's ESG classification: Planet+ / ESG Enhanced, as defined in the Fund's Prospectus.

Benchmark: MSCI Europe Net Return Index

The benchmark is a comparator against which the Fund's performance can be measured. The index has been chosen as the Fund's benchmark as it best reflects the scope of the Fund's investment policy. The benchmark is used solely to measure the Fund's performance and does not constrain the Fund's portfolio construction. The Fund is actively managed. The investment manager has complete freedom in choosing which investments to buy, hold and sell in the Fund. The Fund's holdings may deviate significantly from the benchmark's constituents. For performance measurement purposes the benchmark may be denominated or hedged into the relevant share class currency.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 5 because its Net Asset Value has shown medium to high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.
- ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.
- The investment policy for a Fund may exclude potential investments where they do not meet certain criteria (e.g. financial criteria such as minimum credit ratings, or non-financial criteria such as ESG screens). This may cause the Fund to perform differently compared to similar funds that are permitted to invest in those investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature
