Competent Authority:	The Commission de Surveillance du Secteur Financier (CSSF) is in charge of the control of Candriam with regard to this key information document. . This product is authorised in Luxembourg. Candriam is approved in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key information document is valid as at 2026-02-18.

WHAT IS THIS PRODUCT?

Type: This product is a share class (PI) of a sub-fund (Alternative Multi-Strategies) of an investment company with variable capital (SICAV) under Luxembourg law (Candriam L), Undertakings for Collective Investment in Transferable Securities (UCITS).

Term: Open-ended.

Objectives:

Principal assets traded:

Derivative products themselves essentially investing in different asset classes of all types of issuers on the global markets, in particular:

- Equities, deposits, cash and/or money market instruments,
- Stock market indices,
- Currencies,
- Commodities.

Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark.

The portfolio is built around three types of strategies:

i/ "Long / Short Directional" strategies that consist in identifying trends in order to take advantage of market direction by analysing prices and the economic and political situation. The goal is to benefit from market trends in various asset classes by taking long and short positions over different investment horizons;

ii/ "Upside Alpha" strategies which aim to capture returns from different asset classes by implementing strategies that have little correlation to traditional asset markets, such as the carry or arbitrage strategy on published merger-acquisition transactions. This consists in taking short and long positions based on how attractive the current yield is;

iii/ "Market Neutral" strategies that are intended to deliver an absolute performance that have little correlation to traditional asset markets. After analysing the investment universe, long positions are taken on financial assets whose relative performance is expected to be positive and short positions are taken on financial assets whose relative performance is expected to be negative.

The fund may use derivative products for investment, arbitrage and/or hedging purposes.

The Fund does not have sustainable investment as its objective and does not specifically promote environmental and/or social characteristics.

The Fund aims to exclude investments in companies which do not respect certain recognised international standards and principles, or which are significantly exposed to certain controversial activities.

Under certain conditions, the analysis and selection process may also be accompanied by active involvement, in particular dialogue with companies and voting as the shareholder at AGMs. For more information, please see the management company's website and/or the prospectus.

Benchmark: €STR (Euro Short Term Rate) Capitalized.

The fund is managed actively and the investment approach implies a reference to a benchmark (the index).

Benchmark definition:

The €STR is the short term rate in euros that reflects unsecured overnight borrowing costs in euros for banks in the euro zone.

Use of the benchmark:

- for performance comparison purposes,
- to calculate the performance fee for some share classes.

Repayment of shares: On demand, every day, in Luxembourg.

Allocation of income: Reinvestment.

Intended retail investor:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with the level of investment knowledge required by the distributor who are looking for Capital Growth. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 3 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

General information:

Depository bank: CACEIS Bank, Luxembourg Branch.

Other information:

This document provides a description of a share class of a sub-fund of Candriam L. The prospectus and periodical reports are established for all the sub-funds. There are other share classes and these are listed in the prospectus.

Investors may apply for the conversion of their shares into shares of another class of the same sub-fund or into shares of a class of another sub-fund of the fund, based on the eligibility criteria and following the procedures available through their financial intermediary.

The sub-fund is only liable for the debts, liabilities and obligations that can be charged to it.

Additional information about the fund can be found in the prospectus and the periodical reports, which may be obtained free of charge on request from Candriam or viewed at any time on the website www.candriam.com. These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its shares or in a common language in the international finance sphere. All other practical information, in particular the latest share price, is available from the places shown above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of the currency risk. If your reference currency is different from the product's currency, the yield of your investment will also be influenced by fluctuations, both up and down, in the exchange rate between these two currencies. In this case, the risk indicator above does not in fact take account of the fluctuations between these two currencies.

Other risk(s) materially relevant not included in the summary risk indicator: Arbitrage. Credit. Counterparty. Derivatives. Emerging markets. Leverage. Model. Sustainability.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 12/2024 and 12/2025.

Moderate: This type of scenario occurred for an investment between 05/2018 and 04/2021.

Favourable: This type of scenario occurred for an investment between 03/2021 and 02/2024.

Recommended holding period: Example Investment:		3 years 10 000 EUR	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	7 370 EUR	7 560 EUR
	Average return each year	- 26.29%	- 8.90%
Unfavourable	What you might get back after costs	9 870 EUR	10 620 EUR
	Average return each year	- 1.28%	2.02%
Moderate	What you might get back after costs	11 530 EUR	16 140 EUR
	Average return each year	15.34%	17.29%
Favourable	What you might get back after costs	13 150 EUR	18 300 EUR
	Average return each year	31.50%	22.32%

WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depositary, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depositary, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depositary.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	202 EUR	995 EUR
Annual cost impact (*)	2.0%	2.4% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 19.7% before costs and 17.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge any entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.77% of the value of your investment per year. This is an estimate based on actual costs over the last year.	78 EUR
Transaction costs	0.94% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	96 EUR
Incidental costs taken under specific conditions		
Performance fees	0.28% - 20% per annum calculated using the Permanent High Water Mark Methodology based on the outperformance of the NAV relative to the benchmark, namely €STR (Euro Short Term Rate) Capitalized (Floor 0), and the conditions of which are set out in prospectus. The actual amount varies according to the performance of your investment. The above estimation of total costs is the average over the past five years.	28 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 3 years

The choice of recommended holding period depends on the types of the underlying investments and on the associated degree of risk, which may be higher or lower. For example "equity" type products (higher risk) generally have a recommended holding period of six years (long term), and "bonds or money market" type products (lower risk) have a shorter recommended holding period (generally between two and four years for bond products or less than one year for money market products - medium term/short term). "Mixed" type products generally have a recommended holding period of between three and five years depending on the weighting of the types of underlyings. "Alternative" type products generally have a recommended holding period of three years.

Investors may request redemption of their units at any time under the conditions set out in "What will this investment cost me?". The shorter the holding period in relation to the recommended period, the greater the potential impact of any charges on the performance profile.

HOW CAN I COMPLAIN?

Complaints about this product or about the conduct of the product manufacturer or the person advising on, or selling, the product:

Postal address: Candriam, SERENITY – Bloc B, 19-21, route d'Arlon – L-8009 Strassen
Website: <https://contact.candriam.com>
E-mail: complaints@candriam.com
