<b>Objectives</b>	Bantleon Changing World is a mixed fund that invests primarily in equities and bonds. The investment objective is to achieve reasonable capital growth through a flexible asset allocation in equities and bonds, taking account of the opportunities and risks on the international capital markets. The investment management team invests at least 25% of the subfund's assets in equities, either directly or via funds. The investment management team makes equity investments primarily in companies that develop products or services to solve the challenges of a changing world and the structural trends driving change. In addition to equities, the sub-fund may also invest in other securities such as bonds and in other asset classes. The sub-fund may hold assets in all currencies of states that feature in the MSCI All Country World Index (ACWI). This Sub-Fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Disclosure Regulation (Regulation (EU) 2019/2088). Further information can be found in the Annex »Information on Sub-Funds under Article 8 EU Disclosure Regulation« of the fund's prospectus. The shareholder has the right to switch his shares in one sub-fund into shares of another sub-fund. For further information about how to exercise that right, please refer to the detailed description in the prospectus. <b>Intended retail investor</b>	The fund is designed for investors who are capable of assessing the risks and value of the investment. The investor must be prepared and able to accept significant fluctuations in the value of the shares, and the potential of a significant loss of capital. The assessment of the SICAV should not be considered investment advice; instead, it is intended to provide the investor with an initial point of reference for determining whether the fund is appropriate for their investing experience, risk tolerance and investment horizon.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The failure of the Manufacturer will have no direct impact on your payment, since statutory regulations required that, if the Manufacturer becomes insolvent, the fund does not become part of the insolvency assets, but rather remains separate.

## What are the costs?

The person selling you this product or advising you on it may charge you other costs. If this is the case, this person will inform you of these costs (also free of charge in paper form) and explain how these costs will affect your investment.

### Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	612 EUR	1,492 EUR
<b>Annual cost impact (*)</b>	6.1%	2.9%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.1% before costs and 4.2% after costs.

## How long should I hold it and can I take my money out early?

### Recommended holding period: 5 Years

This product does not have a mandatory holding period. The recommended holding period is based either on historical data or the Manufacturer's estimate regarding the average fluctuation in the unit value, which is to be expected for this product. If you, as an investor, have a shorter investment horizon, the risk is on average higher than at the time of redemption, the unit value of the product will be lower than when you invested. The company may restrict the redemption of units if investors' redemption requests reach a pre-determined threshold beyond which such requests can no longer be met in the interests of all investors.
