WHAT IS THIS PRODUCT?

Type

This product is a sub-fund of Artemis Funds (Lux), an open-ended investment company (société d'Investissement à capital variable "SICAV") organised under the laws of the Grand Duchy of Luxembourg. The fund qualifies as an undertaking for collective investment in transferable securities (UCITS).

Term

This product has no fixed maturity date. An investor can hold their investment for any time period but 5 years is the recommended holding period. The board of directors of the SICAV has the authority to decide on the merger, split, liquidation or the closure of the product, with adequate notice to investors. Furthermore, the product may be wound up by decision of an extraordinary general meeting of shareholders.

Objective

To increase the value of shareholders' investments through a combination of capital growth and income.

Investment policy

The fund is actively managed.
The fund invests principally in equities of companies that are listed, headquartered or that exercise the predominant part of their economic activities in emerging market countries.
A proprietary tool called 'SmartGARP' is used as the foundation of the investment process. It screens the financial characteristics of companies by identifying those that are growing faster than the market but are trading on lower valuations than the market. The Investment Manager selects companies that in aggregate have good 'SmartGARP' characteristics. This tends to mean that the portfolio contains stocks that have lower valuations than the market average, upgrades to profit forecasts, and are under-owned by the investment community, while at the same time benefiting from helpful trends in the wider economy.
The fund may not invest in companies (either directly or indirectly via derivatives) with exposure to tobacco, weapons, or thermal coal, subject to revenue thresholds set out in the fund's prospectus, or in companies that the manager determines to be in breach of the United Nations Global Compact principles on human rights, labour rights, the environment and anti-corruption.
The fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. More information about the environmental or social characteristics for this fund is available in the pre-contractual disclosure for financial products referred to in Article 8 under SFDR in the fund's prospectus.
The fund will invest in equity securities directly or indirectly through instruments such as, but not limited to, ADRs, GDRs, participatory notes and contracts for difference. Participatory notes and contracts for difference will be used to access markets where direct access to purchase equities may be difficult. Their use is not intended to create leverage. Investments in participatory notes and contracts for difference shall not exceed 20% of the fund's Net Asset Value.
The fund may invest up to 20% of its Net Asset Value in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.
The fund may use derivatives and other techniques for hedging and for efficient portfolio management. The fund's derivatives may include, but are not limited to, futures and forward currency contracts.
Subject to the limits set out in the 'Investment Restrictions' section of the fund's prospectus, the fund may also hold ancillary liquid assets for treasury purposes.
The fund may invest up to 10% of its Net Asset Value in other collective investment schemes.
The fund may also hold up to 10% of its Net Asset Value in REITs.

Benchmark: MSCI Emerging Markets NR EUR

The benchmark is a point of reference against which the performance of the fund may be measured. Management of the fund is not restricted by this benchmark. The deviation from the benchmark may be significant and the portfolio of the fund may at times bear little or no resemblance to its benchmark.
The benchmark does not take into account environmental and/or social characteristics promoted by the Fund.

Intended retail investor

This product is intended for retail, professional and institutional investors who are willing to invest for the long-term and who plan to stay invested for at least 5 years. Investors should be prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return. This investment should form part of a varied portfolio, it is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

Lower risk — Higher risk

1 2 3 **4** 5 6 7

The risk indicator assumes you keep the product for 5 years.

- The actual risk can vary significantly if you cash in at an early stage and you may get back less.
- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Fund to pay you.
- **Be aware of currency risk.** You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Other materially relevant risks for the fund are: Market volatility risk, Currency risk, Charges from capital risk, Emerging markets risk, China risk and ESG risk. Please refer to the fund's prospectus, available at www.artemisfunds.com/literature, for full details of these and other risks which are applicable to this fund.

Risk indicator number is accurate as at: 30 September 2026.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and its suitable benchmark over the last 10 years. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. Markets could develop very differently in the future.

Recommended holding period: 5 years **Example investment: 10,000 EUR**			
Scenarios **Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.**		**If you exit after 1 year**	**If you exit after 5 years**
Stress scenario	What might you get back after costs	**3,730 EUR**	**3,030 EUR**
	Average return each year	-62.69 %	- 21.23 %
Unfavourable scenario	What might you get back after costs	**8,120 EUR**	**11,230 EUR**

Favourable scenario	What might you get back after costs	**16,220 EUR**	**19,930 EUR**
	Average return each year	62.22 %	14.79 %

Performance scenarios are accurate as at: 30 September 2026.
The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Unfavourable: This type of scenario occurred for an investment between 11/2017 and 10/2022.
Moderate: This type of scenario occurred for an investment between 01/2019 and 12/2023.
Favourable: This type of scenario occurred for an investment between 11/2020 and 10/2025.

WHAT HAPPENS IF FUNDROCK MANAGEMENT COMPANY S.A. IS UNABLE TO PAY OUT?

The Management Company is responsible for administration and management of the Fund, and does not typically hold assets of the Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:
We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000.00 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	120 EUR	866 EUR
Annual cost impact *	1.20 %	1.28 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.40% before costs and 7.11% after costs.
