This Product is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier.

Further information is available on the Management Company's website: www.dnca-investments.com.

Key information document production date: : 05/06/2026

What is this product ?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The investment objective of the Product is to outperform its benchmark, Goldman Sachs Metals Index, by being exposed to commodities through at least one Total Return Swap(s) (as described hereafter) over the recommended minimum investment period of 5 years. At the same time, the Sub-Fund implements an extra-financial approach through integration of Environmental, Social and Societal ("ESG") criteria in fundamental analysis, by aiming to participate in the energy and ecological transition (the durable transition) and limiting the potential principal adverse impacts.

For the universe composed of direct investment (such as bonds or equivalent, money market instruments) and indirect investment (derivatives on UCITS-eligible financial indices comprised of commodities), the Product is managed taking into consideration responsible and sustainable principles. In this way, the investment process and resulting commodities exposure and bond and money market instrument picking take into account internal scoring with respect to both issuers responsibility and sustainability profile based on an extra-financial analysis through a proprietary tool developed internally by the Management Company, with the "best in universe" method. There may be a sector bias. The achievement of the extra-financial strategy through Responsibility Risk Score, the controversies and sectorial exclusion policy is consequently leading to reduce scope 20% of the investment universe. The Product implements an extra-financial analysis on at least 90% of the underlying commodities, indirectly obtained through TRS, and on at least 90% of public issuers' securities in the Product's portfolio. Additional information on SRI strategy (including the exclusion policy) may be obtained in Product's prospectus and Appendix.

Through an active and discretionary management, the Product aims to achieve the investment objective by seeking exposure to a various range of indices representing commodities (mainly but not limited to metals materials, organics materials or minerals materials) whose components are listed commodity futures on organized markets (such as but not limited to CBOT, NYME, COMEX LME, LBMA, ICE...). The strategy will be based on the prospective medium and long-term fundamental analysis on the appreciation of supply and demand of commodities. The Product aims to take advantage of opportunities likely to arise from medium and long-term pressure that may be generated from the growth in demand required by all industrial sectors, in deployment of technologies consistent with a pathway towards low greenhouse gas emissions and climate-resilient development. The Product may at any time be invested in: (i) Government bonds or equivalent issued by public issuers from countries that are OECD member states, including in emerging countries, belonging to the "investment grade" category (i.e. having a rating at least BBB- by Standard & Poor's or at least Baa3 by Moody's or considered equivalent by the Management Company using similar credit criteria at the time of purchase); from 0% to 105% of its net assets ; (ii) securities issued in emerging countries : up to 20% of its net assets (iii) Money market instruments or deposits with a maturity below one year: from 0% to 105% of its net assets.

The risk exposure to exchange risk will not exceed 10 % of the Product's net assets.

The Product may invest up to 10% of its net asset in units and/or shares of UCITS and/or in AIFs.

Further, up to 200% of its net assets, the Product may use exchange traded or OTC derivatives, including but not limited to futures on index, options on index, Total Return Swap, interest rate swap, currency swap and currency forwards for the purpose of hedging or being exposed to commodities, interest rate and currency risk. The Product aims to generate positive returns from long positions. Under normal market conditions, the maximum absolute value of the Product's positions (i.e., through TRS) is anticipated to not exceed 105% of the Product's Net Asset Value. The Product may enter into total return swaps in order to gain exposure, including short exposure, to certain asset classes, baskets of assets, markets or eligible financial indices in line with the investment policy of the Product without having to invest directly in the reference assets, markets or indices.

The Product is actively managed and uses the benchmark as a universe from which securities may be selected (it being noted that the asset allocation is not constrained by the components of the benchmark), for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant. The reference benchmark does not intend to be consistent with the environmental or social characteristics promoted by the Product.

This is an accumulation share.

INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

OTHER INFORMATION

The Depositary is BNP Paribas, Luxembourg Branch.

What are the risk and what could I get in return ?

Risk indicator

This risk indicator assumes you keep the Product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

This product is rated 5 out of 7, representing a medium to high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Other risks materially relevant to the Product and which could lead to a fall in the net asset value to which the indicator gives too little consideration : counterparty risk and operational risk.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

PERFORMANCE SCENARIOS

This figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not takes into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

| Recommended holding period : 5 years Example Investment : 10,000 € | | If you exit after 1 year | If you exit after 5 years |
|---|---|-----------------------------|------------------------------|
| Scenarios | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | 2,220 € | 1,840 € |
| | Average return each year | -77.80 % | -28.70 % |
| Unfavourable | What you might get back after costs | 7,770 € | 10,440 € |
| | Average return each year | -22.30 % | 0.90 % |
| Moderate | What you might get back after costs | 10,630 € | 12,380 € |
| | Average return each year | 6.30 % | 4.40 % |
| Favourable | What you might get back after costs | 15,910 € | 17,260 € |
| | Average return each year | 59.10 % | 11.50 % |

- The unfavourable scenario occurred for an investment between February 2019 and February 2024.
- The moderate scenario occurred for an investment between July 2018 and July 2023.
- The favourable scenario occurred for an investment between May 2016 and May 2021.

What happens if DNCA Finance is unable to pay out ?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs ?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COST OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed :

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. ;
- EUR 10 000 is invested.

| Investment : 10,000 € | If you exit after 1 year | If you exit after 5 years |
|-----------------------|--------------------------|---------------------------|
| Total costs | 331 € | 911 € |
| Annual cost impact * | 3.30 % | 1.70 % each year |

*The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 6.10 % before cost and 4.40 % after costs..

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

| One-off upon entry or exit | | If you exit after 1 year |
|----------------------------|---|--------------------------|
| Entry costs | Up to 2.00 % of the amount you pay in when entering this Investment. This is the most you will be charged. The person selling you the production will inform you of the actual charge.. | up to 200 € |
| Exit cost | We do not charge an exit fee for this product.. | 0 € |

| | | |
|---|--|-------|
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 1.08 % of the value of your investment per year. This is an estimate based on actual costs over the last year.. | 108 € |
| Transaction costs | 0.13 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.. | 13 € |
| Incidental costs taken under specific conditions | | |
| Performance fees | 20% of the positive performance net of any fees above the Goldman Sachs Metals Index. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years. | 10 € |

How long should I hold it can I take my money out early ?

Recommended holding period : 5 years

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product features a redemption gating mechanism ("Gates") and a net asset value adjustment mechanism with a trigger threshold ("Swing Pricing"), as described in the prospectus.

How can I complain ?

If you have any complaints about the Product, you can send a written request with a description of the problem either by e-mail service.conformite@dnca-investments.com or to the following address: DNCA Finance, 19 Place Vendôme, 75001 Paris.
