AXIOM LUX is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Production date of the KID: 04.04.2025

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

This Product is a compartment of AXIOM LUX, an open-ended umbrella Fund, organized as an investment company with limited liability and with variable capital (a "SICAV") under Luxembourg law.

Term

The Product has no maturity date.

Objectives

The investment objective of the Product is to achieve, over a minimum 5-year investment horizon, an annual gross return (before management fees) of 500 basis points above, for each share class, its reference rate, the Euro Short Term Rate, the Sterling Overnight Index Average, the Swiss Average Rate Overnight and the Secured Overnight Financing Rate (the "Benchmarks").

The management company's investment process consists of actively managing a discretionary portfolio primarily composed of bonds issued by entities exposed to emerging markets and denominated mainly in US dollars, euros and pounds sterling (with the possibility of including other financial instruments within the limits specified in subsequent sections). Entities exposed to emerging markets are defined as governments, supranational or sub-sovereign bodies, state-owned or private enterprises headquartered in or defined on Bloomberg by a "country of risk" located in one of the following regions: Latin America and the Caribbean, Central and Eastern Europe, Africa and Asia.

The investment process is organized in three steps:

The investment process is organized in three steps:

Fundamental analysis: The selection of portfolio securities is partly based on an approach considering prevailing economic and political conditions (policy rates, long-term rates, monetary rates, inflation, global economic growth, etc.) at the international and national levels. However, it mainly relies on the fundamental credit analysis of the investment team. This fundamental analysis may include, in particular, an analysis of the company's cash flow generation, an estimation of the long-term value of its assets, its financial policy and a critical study of its liquidity management. Competitive positioning of companies, collateral, seniority of bonds, and applicable jurisdictions to the bond and issuer are also factors considered in the analysis.

Portfolio construction: Portfolio construction is independent of any indicator or benchmark. It is based on choices made regarding risk allocation and

issuers after the analysis described above. Portfolio construction also aims to ensure adequate diversification and liquidity of the Product's assets. The portfolio will be built through a selection of bonds considered to have the best prospects and risk/return profile within the investment universe, following fundamental analysis of the underlying credits and based on market valuations. Hence, the Product will be managed using a fully discretionary picking approach, aimed at taking advantage of fluctuations in the international bond markets.

Portfolio monitoring: Finally, the investment process involves monitoring the different positions of the Product selected through stages 1 and 2. This

monitoring includes regular tracking of the credit profile of the issuers of the portfolio bonds, as well as their valuation. As a general rule, circumstances that may affect coupon and amortization payments are also monitored.

In addition to the above, although the Product does not have specific sustainable investment objectives as defined by the SFDR, it has adopted the Therefore, the Product falls under the scope of Article 8 of the SFDR.

A Performance Fee may be paid even if the Adjusted Net Asset Value per Share outperformed the Reference NAV during the Calculation Period but had a negative absolute performance, subject to recovering any Negative Bonus.

This is an accumulation share class.

Intended Retail Investor

This Product is suitable for an investor with only a basic knowledge of this type of investment, an informed investor or an experienced investor who intends to remain invested for at least 5 years. Investors should understand the risks involved (including the risk of losing part or all of the capital invested) and whether they are consistent with their own investment goals and risk tolerances.

Practical information

Depositary: CACEIS Bank, Luxembourg Branch

Share subscription and redemption orders can be placed at any time and are centralised no later than noon on every valuation day and executed daily. Further information about the Product, the latest prospectus, latest periodical regulatory documents, as well as all other practical information, incl. where to find the latest prices of shares and information on other share classes marketed in your country, can be obtained in English free of charge from the Management Company Axiom Alternative Investments, 39 Avenue Pierre 1er de Serbie, F-75008 Paris, France or at the following e-mail address: contact@axiom-ai.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN ?

Risk Indicator

lower rewards

higher rewards

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (5 years).

The actual risk can vary significantly if you cash in at

an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Significant risk(s) for the Product not taken into account in this indicator include the following:

- Interest rate risk: By definition, interest rate risk corresponds to the possibility for an investment fund to be negatively impacted by a change in interest rates. The interest rate risk can thus manifest itself through a reduction in financial income in the event of a fall in interest rates and/or an increase in financial expenses in the event of a rise in interest rates. An increase in interest rates may cause the value of fixed-income securities held by the Product to decline.
- Derivative for hedging purpose: The use of derivatives for hedging in a rising market may restrict potential gains.
- "High yield" bonds risk: The Product will invest in sub-investment grade bonds. These bonds may produce a higher level of income than investment grade bonds but at a higher risk to your capital.
- Emerging market risk: A Product which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.
- Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Product's returns because the Product may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters

For more information on risks, please refer to the prospectus of the Product.

This Product does not include any protection from future market performance so you could loose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately

predicted.

The unfavourable, moderate and favourable, scenarios presented represent examples using the best and worst performances, as well as the average performance of the Product and/or the appropriate benchmark indicator over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10.000

The recommended holding period is 5 years.		If you exit after 1 year	If you exit after 5 years (recommended holding period)		
Scenarios					
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.				
011633	What you might get back after costs	EUR 7,240	EUR 6,770		
	Average return each year	-27.6%	-7.5%		
a a a m a wi a	What you might get back after costs	EUR 8,240	EUR 8,470		
	Average return each year	-17.6%	-3.3%		
occupation	What you might get back after costs	EUR 9,450	EUR 9,260		
	Average return each year	-5.5%	-1.5%		
	What you might get back after costs	EUR 10,830	EUR 10,890		
	Average return each year	8.3%	1.7%		

This table shows the money you could get back over the recommended holding period of 5 years, under the different scenarios, assuming you invest EUR 10.000.

Unfavourable scenario: this scenario occurred for an investment between 03/2017 and 03/2022. Moderate scenario: this scenario occurred for an investment between 01/2017 and 01/2022

Favourable scenario: this scenario occurred for an investment between 12/2014 and 12/2019.

WHAT HAPPENS IF AXIOM ALTERNATIVE INVESTMENTS IS UNABLE TO PAY OUT ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

WHAT ARE THE COSTS?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario
- EUR 10,000 per year is invested

Investment EUR 10,000	If you exit after 1 year	If you exit after 5 year (recommended holding period)
Total costs	EUR 591	EUR 1,337
Annual cost impact (*)	5.9%	2.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 1.17% before costs and -1.53% after costs. We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs	If you exit after 1 year	
Entry costs	This includes distribution costs of 2.00% of the invested amount. This is the most you will be charged. The person selling you the Product will inform you of the actual charge.	EUR 200
Exit costs	This includes distribution costs of 2.00% of the invested amount. This is the most you will be charged. The person selling you the Product will inform you of the actual charge.	EUR 200
Ongoing costs (taken each ye	ar)	
Management fees and other administrative or operating costs	1.56% of the value of your investment per year. This figure is based on actual costs over the past year.	EUR 156
Transaction costs	0.35% of the value of your investment per year. This is an estimate of the costs incurred when we buy or sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 35
Incidental costs taken under s	pecific conditions	
Performance fees and carried interest	Description: 20% (All taxes included) maximum of the Product's annual performance beyond the performance of the Benchmarks.	EUR 0

The table below shows the impact of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE THE MONEY OUT EARLY?

Recommended holding period: 5 years

This Product is designed for longer term investments; you should be prepared to stay invested for at least five years. Share subscription and redemption orders can be placed at any time and are centralised no later than noon on every valuation day and executed daily.

HOW CAN I COMPLAIN?

Pursuant to Article 313-8 of the AMF general regulation, information on the complaint handling procedure is made available free of charge by Axiom Alternative Investments.

Axiom has implemented and maintains an operational procedure to quickly and efficiently process complaints made by its clients. Any complaint may be sent to the Compliance department by post to Axiom Alternative Investments, 39 avenue Pierre 1er de Serbie 75008 Paris, France. The management company will acknowledge receipt of the complaint within ten working days of the date on which it was received, unless a response has been issued to the client in the intervening period. Except in duly justified exceptional circumstances, a response will be issued to the client within two months of receipt of the complaint.

For France: In the event of an ongoing dispute, the client may contact a mediator, such as the AMF Ombudsman. The address of the AMF Ombudsman is: Autorité des marchés financiers, The AMF Ombudsman, 17 place de la Bourse, 75082 PARIS CEDEX 02, FRANCE. The AMF mediation request form and the Mediation Charter are available online at http://www.amf-france.org.

For Luxembourg: In the event of a dispute or in the absence of an acknowledgment of receipt or response within one month of the complaint being

made, the client may contact the competent authority, either by post to Commission de Surveillance du Secteur Financier, L-2991 Luxembourg or by

The CSSF dispute resolution request form and relevant texts on the matter are available at http://www.cssf.lu.
