 Date of production of the Key Information Document: 31/03/2026

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

Type	Unit-linked capitalisation contract
Term	Wealins Capi Monaco is subscribed for a specific duration of your choice. We are not entitled to unilaterally terminate Wealins Capi Monaco, unless you have deliberately or fraudulently provided us with false or incomplete information or have omitted to provide us with significant information.
Objectives	Wealins Capi Monaco is a personal capitalisation contract with non-scheduled premium payments and surrenders linked to one or more investment funds or structured products. Its object is to pay to the policyholder or to the designated beneficiary the value of the contract net of fees on expiration of the contract. Wealins Capi Monaco is denominated in EUR (default currency) or any other currency chosen by you and accepted by us. You can invest your net premium in the range of investment funds and structured products that we make available. These funds may include both external and internal funds. An external fund is a collective investment vehicle set up and run by a party other than an insurance company and subject to an approval procedure and ongoing financial supervision by an official regulatory authority. An internal fund is a segregated pool of assets of an insurance company. Internal funds may be collective, dedicated or specialised insurance funds, and in our case they do not offer a guaranteed return. An internal collective fund is a fund open to a multitude of policyholders. It is managed in accordance with the investment strategy of the fund and the applicable investment rules set forth by the CAA by an asset manager appointed by us. It is linked to one or more contracts. An internal dedicated fund (FID) is a fund that serves as an investment support to one single contract. It is managed in accordance with the investment strategy chosen by you and the applicable investment rules set forth by the CAA by an asset manager appointed by us. A specialised insurance fund (FAS) is an internal fund other than an internal dedicated fund that serves as investment support to a single contract. Its units are freely chosen and allocated by you or your mandate holder in accordance with your investment profile and the applicable investment rules set forth by the CAA. A structured product is a financial instrument designed to offer a predetermined return based on the performance of one or more underlying assets. You may choose between various underlying investment options according to your investment profile and, where applicable, the chosen investment strategy. Specific information on each chosen underlying investment option is provided in the Specific Information Document for such investment option which is available on our website https://wealins.com/en/priips . Specific information relating to the external funds and the structured products of your choice is made available in the Key Information Documents from the promoters of these external funds and structured products which you will also find on our website. The funds do not include any guarantee of performance. You bear the entire risk of the performance of the funds and structured products linked to Wealins Capi Monaco, i.e. the risk of significant potential losses. Indeed, the value of Wealins Capi Monaco depends on the evolution of the value of the units of the chosen funds and structured products. That value reflects the value of the underlying assets and is subject to fluctuations depending mainly on the evolution of the financial markets. Wealins Capi Monaco does not offer any right to participate in profit sharing. The risk and reward profile of Wealins Capi Monaco is determined by the below mentioned recommended holding period. Risks might be higher and reward lower if you don't keep the product for the recommended holding period.
Intended retail investor	Generally, the target investor for Wealins Capi Monaco is a natural person living in Monaco or a Monegasque citizen living abroad who wants a capitalisation contract governed by French law, subject to the overriding mandatory rules of Monaco. The French Insurance Code applies to Monaco through Order n° 3.041 of August 19, 1963 and Order n° 4.178 of December 12, 1968. He is able to invest an initial premium of minimum EUR 250 000 and seeks long term performance. He is prepared to take investment risks and bear significant losses on his investment, knowing that the value of his capitalisation contract is subject to fluctuations of the value of the chosen funds and structured products, i.e. their underlying assets. The targeted investor varies on the basis of the underlying investment options depending on his risk appetite, knowledge of financial markets and past experience.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

← LOWER RISK
HIGHER RISK →

Warning. The risk indicator assumes you keep the product for 10 years.

The actual risk can vary significantly if you cash in before the end of the recommended holding period and you may get back less. You may not be able to end your product easily or you may have to end it at a price that significantly impacts on how much you get back.

The summary risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the probability that this product will incur losses in the event of market movements or our inability to pay you.

Based on your choices, the summary risk indicator associated with this product will range from 1 to 7 on a scale of 1 to 7, thereby potentially ranging from the lowest to the highest risk class.

This rates the potential losses from future performance from a very low to a very high level, and poor market conditions range from very unlikely to impact to very likely to impact our capacity to pay you.

We draw your attention to the following facts:

The amounts invested in funds expressed in units of account are subject to upward and downward fluctuations in the financial markets and may therefore incur capital losses.

Be aware of the currency risk. The amounts paid to you may be in another currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown left.

In the presence of illiquid underlying assets or assets with reduced liquidity, you may not be able to sell your product easily or have to sell it at a price that will materially affect the amount you receive in return.

Since the contract foresees potentially long periods of notice for divestment (for certain types of underlying assets), we draw the policyholder's attention to the section "How long should I hold it and can I take money out early?".

Product-associated yields and risks depend on the choices made by the investor among the range of investment options available to him. We strongly advise you to become aware of the risks and yields specific to the various investment options you plan to subscribe and to compare the summary risk indicators published in the Key Information Document or Specific Information Document of each option.

Performance scenarios

The risk and return of the investment varies on the basis of the underlying investment options. The performance of Wealins Capi Monaco depends on the performances of the external funds, internal collective funds, internal dedicated funds, specialised insurance funds or structured products selected by you. The tax legislation of your state of fiscal residence may have an impact on the actual payout of Wealins Capi Monaco. Specific information on each underlying internal investment option is provided in the Specific Information Document for such investment option, available on our website <https://wealins.com/en/prijips>. With regard to the external funds and structured products, please refer to the Key Information Documents of the promoters of these external funds and structured products which you will also find on our website.

WHAT HAPPENS IF WEALINS S.A. IS UNABLE TO PAY OUT?

As there is no guarantee scheme in Luxembourg to indemnify policyholders in case of default of WEALINS S.A. and in order to limit the financial losses that could be encountered by policyholders and/or beneficiaries, the Luxembourg legislation foresees that the underlying assets of insurance contracts are segregated from the own assets of WEALINS S.A. Those underlying assets are indeed governed by custodian agreements previously agreed by the CAA with custodian banks. Through those custody agreements, the CAA has an obligation to control and the right to block those segregated assets. In case of failure of the insurer, the segregated assets are thus protected in relation to the other assets of the insurer and policyholders and/or beneficiaries have collectively the quality of privileged first rank creditors over those segregated assets ranking above all other creditors. This allows them to recover first and foremost all claims related to the execution of their insurance contracts. Policyholders and/or beneficiaries are moreover potentially exposed to the default of a custodian bank with regard to the liquidities deposited with that bank which might be partially or totally lost, whereas it should be possible to recover the securities deposited there in full.

WHAT ARE THE COSTS?

Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- That the average annual return net of costs is 0.00%.
- EUR 10 000 are invested.

The total costs to the retail investor consist of a combination of the PRIIP costs other than the costs of the underlying investment options and the costs of the investment options that vary with the underlying investment options. Due to the difference between the calculation assumptions applied in this Key Information Document and in the Key Information Documents and Specific Information Documents of the investment options, the figures and rates relating to the investment options in this table may differ from the corresponding figures and rates in the tables in the Key Information Documents and Specific Information Documents of the investment options.

	If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
TOTAL COSTS (EUR)			
Capitalisation contract	395 €	922 €	1 575 €
Investment options	17 € - 185 €	85 € - 891 €	169 € - 1 703 €
ANNUAL COST IMPACT (*)			
Capitalisation contract	4.0%	1.9%	1.7%
Investment options	0.2% - 1.9%	0.2% - 1.9%	0.2% - 1.9%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the end of the recommended holding period, your average annual return is projected to be 0.00% before costs and up to -3.55% after costs.

We may share the costs with the person selling you the product to cover the services it provides to you. This person will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		Annual cost impact if you exit after 10 years.
Entry costs	The impact of the costs you pay when entering your investment. The impact of costs is already included in the price. This includes the costs of distribution of your product.	Capitalisation contract 0.20% Investment options 0.00% - 0.00%
Exit costs	The impact of the costs of exiting your investment on expiration of the contract. Exit costs are shown at 0.00% in the next column as they do not apply if you keep the product until the end of the recommended holding period. Exit costs apply only in the first 5 years of the contract. They decrease linearly from 0.5% in the first year to 0.1% in the fifth contract year.	Capitalisation contract 0.00% Investment options 0.00% - 0.00%
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investments. This is an estimate based on actual costs over the last year.	Capitalisation contract 1.50% Investment options 0.17% - 1.75%
Transaction costs	The impact of the costs of us buying and selling underlying investments for the product. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount depends on the volume and type of assets we buy and sell.	Capitalisation contract 0.00% Investment options 0.00% - 0.10%
Incidental costs taken under specific conditions		
Performance fees	Product: No results-related commission exists for this product. Investment options: If applicable, commissions on your investment are charged if the investment option exceeds its benchmark. The actual amount varies depending on the performance of your investment. The above estimate of total costs includes the average over the last 5 years.	Capitalisation contract 0.00% Investment options 0.00% - 0.00%

The aforementioned costs are expressed as ranges and depend on the investment options chosen.

The entry cost and administrative management fee of the capitalisation contract correspond in each case to the maximum percentage rate observed in the previous year's production of the product.

The management fees for the investment options correspond to the minimum and the maximum of the weighted average per contract of the costs of the investment options observed in the previous year's production.

We strongly advise you to become aware of the costs of the various investment options you plan to choose and compare them using the Key Information Document or the Specific Information Document of each option. This information is available in the "What are the costs?" section of the Key Information Document or the Specific Information Document of each option.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 10 years

If you are a natural person, you have a period of 30 calendar days from the time when you are informed that the contract has come into effect to cancel the contract by sending us your cancellation letter by registered letter with acknowledgement of receipt to our registered office. The above mentioned recommended holding period has been defined based on a medium to long-term investment horizon. Surrenders are possible at any moment after the expiry of the free cancellation period but may have a negative effect on the performance of the underlying investment option. Furthermore, surrenders of the capitalisation contract may be subject to potentially long divestment periods for some underlying assets.

HOW CAN I COMPLAIN?

In cases of dispute, and without prejudice to your right to pursue other legal action, you may contact our complaints department, in this case the compliance department, either via the e-mail address reclamations@wealins.com or our P.O. Box L-2986 Luxembourg, or the mediators of the insurance sector in Luxembourg (ACA). Your requests for mediation with the supporting documentation must be sent either to the e-mail address mediateur@caa.lu, or to the P.O. Box of the ACA: B.P. 448, L-2014 Luxembourg, Tel.: +352 44 21 44 1, Fax: +352 44 02 89. If you are a natural person and you have concluded the contract as a consumer, you may also contact the Luxembourg Commissariat aux Assurances if you have not obtained a response or a satisfactory response within a period of 90 days from the dispatch of your complaint. The relevant procedure is explained on the following internet page: <http://www.caa.lu/fr/consommateurs/resolution-extrajudiciaire-des-litiges>. The contact data of the CAA is: 11, rue Robert Stumper, L-2557 Luxembourg, Tel.: +352 22 69 11-1, Fax.: +352 22 69 10, E-mail: caa@caa.lu. Finally, you may also contact the "Médiateur des Assurances Français": La Médiation de l'Assurance TSA 50110 75441 Paris Cedex 09. Website: <https://www.mediation-assurance.org>, click on "Saisir le Médiateur". The 3 above-mentioned procedures (Ombudsman ACA, procedure with the CAA and Médiateur des Assurances français) are free of charge.

OTHER RELEVANT INFORMATION

Scope of the calculations: The form and content of this document have been implemented in compliance with the requirements of the applicable regulation. All calculations are based on assumptions (holding period, capitalisation contract and investment option costs). The results of those calculations would therefore be different if the policyholder was in a situation differing from the assumptions taken for working out this document. Additional regulatory information on the product can be requested by e-mail. You will then be able to receive it either as a printed or digital version. All mandatory documents are made available on the website www.wealins.com. The General Conditions deemed to be the Information Note, Application Form, Tax Information Note - Monaco, Information note - Description of the prevention and management of conflicts of interests policy, Investment rules for internal funds of type A, B, C and D (Circular letter 26/1 from the CAA) and the Information note concerning investments in specific assets with particular risks of Wealins Capi Monaco are available to potential investors on request.
